Catalog Home

The Union College Academic Catalog describes the College's academic program, including the Common Curriculum and individual department and program majors, minors, and course offerings, as well as academic policies and regulations. The Academic Catalog also contains information about Union College, including life on campus as well as costs and financial aid.

Accessing the On-line Academic Catalog

This is the home page for the Online Academic Catalog, which provides the most up-to-date information about courses and programs. You can access sections of the Academic Catalog using the navigational tabs to the right. For example, for requirements of particular majors and minors, click on "Majors, Minors and other Programs" and for information about particular courses, click on "Course Listing."

Downloading the Academic Catalog

You can download the Academic Catalog in a pdf document. **PLEASE NOTE THAT THE MOST UP TO DATE INFORMATION IS IN THE ONLINE VERSION.**

Union College 2021-2022 Academic Catalog

The information in this Academic Catalog was prepared as of September 1, 2021. Provisions of this publication are not to be regarded as an irrevocable contract between the student and Union College. The College reserves the right to make changes in its course offerings, degree requirements, regulations and procedures, and fees and expenses as educational and financial considerations require.

Union College does not discriminate on the basis of age, sex, race, color, religious belief, disability, sexual orientation, or national origin. The College's policy of nondiscrimination extends to all areas of college operations, including but not limited to admissions, student aid, athletics, employment, and educational programs. All the rights, privileges, programs, and activities generally accorded to all full-time matriculated students of the College are accorded on a nondiscriminatory basis.

Mission Statement and General Information

Union College Mission Statement

Union College provides a rigorous, holistic and immersive residential liberal education that emphasizes **integration, innovation, inclusion and reflection** for every student.

General Information

Union's Faculty: The student-faculty ratio at Union is 10:1. Ninety-six percent of the full-time teaching faculty holds the doctorate or terminal degree (excluding library staff, some of whom hold faculty rank).

Union's Students: More than 6,000 apply for placement in the first-year class. Exact statistics vary from year to year, but approximately 63 percent of the applicants are in the top decile of their secondary school class. Approximately 78% of the College's students are from the Northeast region; 40 states and territories and 36 other countries also are represented. More than half receive financial aid from the College. On average approximately 86 percent of each class completes the degree requirements within six years.

Enrollment: Union College enrolls approximately 2,195 full-time undergraduates.

Accreditation: Union College is accredited by the Middle States Commission on Higher Education, 3624 Market St., Philadelphia, PA 19104, (267) 284-5000. The College was last reaffirmed on November 19, 2015. The Middle States Commission on Higher Education is an institutional accrediting agency recognized by the U.S. Secretary of Education and the Council for Higher Education Accreditation. The programs in chemistry are certified by the American Chemical Society. The bioengineering, computer engineering, electrical engineering, and mechanical engineering programs are accredited by the Engineering Accreditation Commission of ABET.

The Board of Trustees: The governing body of the College is the Board of Trustees. The Board of Trustees holds title to the property, is responsible for the administration of the College and its funds, and determines the policies under which programs are offered. The chief executive officer is the president, who also serves as chancellor of Union University, comprising Union College, Albany Medical College (1839), Albany Law School (1851), Dudley Observatory (1852), and Albany College of Pharmacy (1881). Each institution has its own governing board and is responsible for its own programs. The Board of Governors of the University serves both to advise and to expand the areas of voluntary cooperation.

Alumni: The College's 27,000 alumni are represented by the Alumni Council, which is incorporated under the laws of the State of New York. The council has at least two representatives from each class, possibly more depending on the size of the class. It helps operate the alumni program through a group of standing committees and an executive committee, in conjunction with the Alumni Office. Alumni are welcome on campus every day of the year, with special emphasis on Homecoming and Family Weekend in the fall and ReUnion Weekend in late spring. ReUnions are held officially every five years, although all alumni are invited back to campus every year. Alumni clubs are organized wherever local alumni wish to use such an organization as a center of their college activity. The College's quarterly magazine, *Union College*, is sent to all alumni and to parents of undergraduates.

About Union College

A Brief History

Union College traces its beginnings to 1779. Several hundred residents of northern New York, certain that Burgoyne's defeat at Saratoga two years before would mean a new nation, began the first popular demand for higher education in America. These residents pursued that dream for 16 years until, in 1795, Union became the first college chartered by the Regents of the State of New York. The first trustees consciously attempted to bring their new college into the mainstream of their world. The very name, Union, carried echoes of the new national union. More immediately and directly, it recognized the fact that the College was an outgrowth of a new sense of community among the several religious and national groups in the local population. Union's founders were determined to avoid the narrow sectarianism characteristic of earlier American colleges; today, Union is one of the oldest nondenominational colleges in the country.

Union did not share the heavily classical bias of most colleges of the day. Its motto ("*Sous les lois de Minerve nous devenons tous freres et soeurs*," or "We all become brothers and sisters under the laws of Minerva") is significantly of French rather than Latin origin. Union was among the first to introduce French on an equal level with Greek and Latin. In the 1820s, when the classical curriculum was the most widely accepted field of study, Union introduced a bachelor's degree with greater emphasis on history, science, modern languages, and mathematics. This liberality of educational vision characterized Union during the early years of the term of Eliphalet Nott, president from 1804 to 1866. Science and technology became important concerns; chemistry was taught before 1809, a degree in scientific studies was added, and in 1845 Union became the first liberal arts college to offer engineering. The College was one of the first to offer work in American history and constitutional government and did pioneer work in the elective system of study.

By about 1830, Union was graduating as many students as any other college in America. Students came from the South and West as well as the East. Among them were the father of Franklin D. Roosevelt, the grandfather of Winston Churchill, a president of the United States (Chester A. Arthur, Class of 1848), seven cabinet secretaries, 15 United States senators, 91 members of the House of Representatives, 13 governors, 50 important diplomats, more than 200 judges, 40 missionaries, 16 generals, and 90 college presidents, including the first presidents of the University of Illinois, the University of Iowa, the University of Michigan, Vassar College, Smith College, and Elmira College.

Nott's ingenious schemes for financing higher education, including a statewide lottery, also were instrumental in building Union's reputation. Innovations under the leadership of Andrew Van Vranken Raymond, president from 1894 to 1907 include the establishment of a Department of Electrical Engineering and Applied Physics, headed by the "electrical wizard" of the General Electric Company, Charles P. Steinmetz. The new department gave impetus to the development of strong programs in science and technology and attracted attention and applications to the College.

The 20th century brought other changes to Union. In 1970, the College adopted co-education and welcomed the first class of two dozen women transfer students. Today, roughly half of Union's students are women. More recently, the College has added programs in Asian Studies, Biomedical Engineering, Film Studies, Nanotechnology, and Neuroscience.

In 2004, the Minervas were inaugurated to broaden the educational experience for students, faculty and staff. Every incoming student is assigned to one of seven Minerva Houses, joining upper-class students, faculty and staff in a house affiliation. Each Minerva, with its own budget and governing council, is a center for intellectual and social activity. Union's fraternities and sororities continue a proud tradition of service. Theme Houses are a popular option for students who seek residential affiliation with others who are committed to themes such as community service, environmental awareness, art, music and language.

The College has done important experimental work in interdepartmental studies, which is reflected in a number of programs that cut across the lines of academic disciplines. Organized interdepartmental majors are offered in numerous areas, and the College has also developed programs that enable students to work toward both a bachelor's degree and an advanced degree. The Common Curriculum (General Education) has received national recognition, and the College has an innovative program of Writing Across the Curriculum. Efforts to renew and enhance the College's academic programs and curricula continue to be supported by major foundations.

Presidents of Union College

John Blair Smith	December 9, 1795 - May 1799
Jonathan Edwards Jr.	July 1799 - August 1, 1801
Jonathan Maxcy	September 1802 - July 1804
Eliphalet Nott	August 1804 - January 29, 1866
Laurens Perseus Hickok	March 1, 1866 - June 30, 1868
Charles Augustus Aiken	October 12, 1869 - June 1871
Eliphalet Nott Potter, Class of 1861	Summer of 1871 - July 31, 1884
Harrison Edwin Webster, Class of 1868	Mid-1888 - January 1894
Andrew Van Vranken Raymond, Class of 1875	May 5, 1894 - mid-1907
Charles Alexander Richmond	April 1, 1909 - January 20, 1928
Frank Parker Day	January 20, 1929 - August 10, 1933
Dixon Ryan Fox	July 1, 1934 - January 30, 1945
Carter Davidson	March 1, 1946 - January 31, 1965
Harold Clark Martin	July 1, 1965 - June 30, 1974
Thomas Neville Bonner	July 1, 1974 - August 31, 1978
John Selwyn Morris	August 1, 1979 - August 31, 1990
Roger Harold Hull	September 1, 1990 - June 30, 2005
Stephen Charles Ainlay	July, 1 2006 - June 30, 2018
David Robert Harris	July 1, 2018 -

The College Grounds

The Union College campus, officially known as the College Grounds, occupies 100 acres in Schenectady, a city of 60,000 founded by the Dutch in 1661. The Grounds are the College's third home. In 1813, shortly after the College decided to move to the new location, the French architect and landscape planner Joseph Ramée laid out the new campus - the first unified campus plan in America. He designed a great central courtyard, flanked on three sides by buildings and open to the west, with a round pantheon as the focus of the courtyard.

The distinctive Ramée style, with its arches and pilasters in white, remains the dominant motif in Union College architecture. Recent additions have included the Feigenbaum Center for Visual Arts, Henle Dance Pavillion and the Wicker Wellness Center.

Alumni Gymnasium, the Murray and Ruth Reamer Campus Center, and Schaffer Library have received major renovations and expansion, the historic Nott Memorial has been restored to become a display and discussion center, and a \$25 million project revitalized the neighborhood to the immediate west of campus by creating apartment-style housing for 160 students, a community center, and a residence hall for 230 students. Other facilities include the Viniar Athletic Center, home of women's and men's basketball; the Taylor Music Center, a state-of-the art classroom, rehearsal and performance facility; Breazzano Fitness Center in Alumni Gymnasium; the new Center for Bioengineering and Computational Biology; and the opening of seven Minerva Houses: Beuth House, Breazzano House, Golub House, Green House, Messa House, Sorum House and Wold House.

North of the central campus lie the eight acres of formal gardens and woodland known as Jackson's Garden, begun in the 1830s by Captain Isaac Jackson of the Mathematics Department. Through the garden runs Hans Groot's Kill, the brook that bounds through Union's Grounds in the College song. A durable local legend, never confirmed by historians, holds that the villagers of Schenectady burned a local maiden at the stake there in 1672, and that the ghost of the dead girl has haunted Jackson's Garden ever since.

At the center of the Grounds, on the spot designated by Ramée for his pantheon, stands Union's most unusual building, the distinctive, 16-sided Nott Memorial. Begun in the 1850s and completed in 1875, it has been hailed by architectural historians as an important example of American Victorian architecture and is a National Historic Landmark. Facing the Nott Memorial is Memorial Chapel, built in 1925 as a monument to the Union College graduates who lost their lives in World War I. Along its walls hang portraits of the former presidents of the College. Memorial Chapel is home to the renowned Union College Concert Series, which presents the world's finest chamber musicians. It also serves as the venue for major College convocations.

Also near the center of campus is Schaffer Library, which not only houses an extensive collection but also provides comfortable and modern space for reading, research and collaborative study. The library staff offers support for research and teaching in a variety of ways including in-class presentations, individual consultations, online research guides and informal inquiries at the reference desk. The Schaffer Library provides access to electronic books, journals and databases, while on campus or off, 24 hours a day. Special Collections and Archives holds several of the College's most prized possessions, including an elephant folio edition of Audubon's Birds of America, which the College purchased directly from the artist; the Trianon editions of William Blake's works; the first books bought for the library in 1796; and the original College charter. The Library also houses the Union College Permanent Collection of fine art and scientific instruments. The collection includes over 2,800 works of art and material culture, including significant resources from internationally recognized artists and objects from Eastern and Ancient cultures. The collection also includes the original Ramée drawings for the campus and the Olivier Models. The Artist Installation Series is in the Learning Commons and Union's fine art collection is on display throughout the library. There is always an interesting exhibition of the College's treasures on display in the Lally Reading Room and the Beuth Atrium.

Flanking the library and connected to it by a curved colonnade are Karp Hall and Lippman Hall. Karp Hall is the home for the Departments of English and Modern Languages. Lippman Hall, named in honor of Robert Lippman '50 through a gift by his son, Jim '79, houses Economics, History, Political Science and Sociology. On nearby South Lane, Lamont House is the home of Anthropology, Classics, Philosophy and Religious Studies programs.

Filling the area in front of the library and between the two classroom buildings is Roger Hull Plaza (named for the former Union president), an open space with benches and flower beds. This campus crossroads was furnished and landscaped in part with gifts from parents of Union College students. It serves as the site for such formal ceremonies as Commencement and for informal meetings and conversation.

The Science and Engineering complex, which includes the Science and Engineering Building, Bailey Hall, Steinmetz Hall and Butterfield Hall, is the home of the Departments of Biological Sciences, Chemistry, Computer Science, Electrical and Computer Engineering, Mathematics, Mechanical Engineering, Physics and Psychology. Mathematics and Psychology are in Bailey Hall, Computer Science in Steinmetz Hall, and Bioengineering and Neuroscience in Butterfield Hall. In this complex, and available for student use, are such research tools as a nuclear magnetic resonance spectrometer, a Pelletron accelerator, X-ray diffraction equipment, a centrifuge, and a scanning electron microscope capable of examining a surface area 200,000 times smaller than what can be seen with a conventional light microscope.

The new Integrated Science and Engineering Complex promotes connections across disciplines. The centerpiece building, a 142,000-square-foot facility will house primarily the departments of Biology; Chemistry; Electrical, Computer and Biomedical Engineering; Mechanical Engineering and Physics and Astronomy

The nearby F.W. Olin Center's interactive computerization capabilities make the building adaptable for use by nearly every academic department and student. The Geosciences Department is located here, and, in addition to a variety of collaborative computer classrooms and laboratories, the center has a multi-media auditorium and a 20-inch, remote-controlled telescope.

The Peter Irving Wold Center for Science and Engineering was made possible by a gift from John Wold '38. The interdisciplinary Center serves as a platform for learning, research and innovation which solidifies the College's role as a national leader in the integration of science, engineering and the liberal arts. The three-story 35,000-square-foot research and education facility houses space for interdisciplinary programs such as Biochemistry, Environmental Science and Engineering, a high performance computer lab, state-of-the-art laboratories and classrooms, and flexible incubator labs for leading edge interdisciplinary research. Recent additions to Wold include labs for robotics and 3-D printing.

The Feigenbaum Center for Visual Arts is in North Colonnade in the former Philosophical Hall, which held the first analytical chemistry laboratory specifically opened for college students, and is home to the Department of Visual Arts. Also in the North Colonnade, is the Taylor Music Center which includes the Fred L. Emerson Auditorium, a performance and teaching space with state-of-the-art recording technology. Surrounding the performance hall are practice rooms, high-tech classrooms and faculty offices. The Yulman Theater and Henle Dance Pavilion, overlooking Jackson's Garden, complete the performing arts facilities.

The focal point of the Murray and Ruth Reamer Campus Center is a commons area, part of a multi-level atrium that extends to a patio overlooking Jackson's Garden. The building also houses an auditorium, a dining hall, food court, a two-level bookstore, and a variety of office and activity rooms for student organizations such as Concordiensis, the student newspaper; WRUC, the first radio station to offer regularly scheduled broadcasts; The Garnet, the yearbook; the literary magazine, Idol; and the student activities office.

Alumni Gymnasium houses Breazzano Fitness Center, made possible by a gift from David Breazzano '78, a spacious facility with an extensive assortment of equipment for cardio fitness and weight training. The building also has an eight-lane swimming pool with seating and a diving area; racquetball/squash courts; and multi-use rooms for dance, aerobics and yoga programs.

Achilles Center houses Messa Rink, the renovation of which was made possible by a gift from Frank Messa '73, as well as athletic training and strength and conditioning programs.

Old Chapel, the former chapel and student meeting hall, is still used for many meetings.

South College, built in 1814, contains Sorum House and Green House, two of the College's Minerva Houses. North College, its counterpart on the other side of Library Field, is the home of Messa House and Wold House. Beuth House, Breazzano House and Golub House complete the Minerva House system.

Other residence halls are Davidson and Fox Houses, West College, Richmond House, Raymond House, Potter House, College Park Hall, Garnet Commons and apartments along Seward Place to the west of campus.

Admissions

The Admissions Committee is concerned with the candidate's ability to benefit from and contribute to the academic, intellectual, and extracurricular life of the College.

Three factors are considered in evaluating each application:

- The candidate's record in secondary school, including grades, the challenge and quality of courses taken, and rank in class
- The recommendations from the secondary school
- The personal qualities and extracurricular record of the candidate

The admissions committee attempts to broaden geographic and socioeconomic distribution of the student body by giving preference to students who live or attend schools in regions not well represented in the College and to students who will broaden the range of backgrounds and lifestyles within the College community.

The candidate's potential contribution to the Union community is also taken into consideration. Union is a close-knit community and, as such, depends heavily upon the constructive participation of each individual in the life of the College.

Application and Admission Procedures

Applications should be filed by November 1 for Early Action, Early Decision 1 and the Leadership in Medicine Program and by January 15 for Early Decision 2, Regular Decision and the 3 + 3 Law Program in the final year in secondary school. The Admissions Committee generally announces its decisions in December and at the end of March and no later than April 15. There is a \$60 application fee.

Admitted candidates must reserve places by paying the \$750 admissions deposit on or before May 1. The admitted applicant then becomes a degree candidate entitled to a place in the class with all the rights and privileges of a Union student. Reservations submitted without the deposit are considered incomplete. If the degree candidate withdraws for any reason or is removed from candidacy for the degree before successfully completing three terms at Union, the admissions deposit is retained by the College in consideration of the degree candidate's placement in the class. After the student successfully completes three terms, if all obligations of the student to the College, financial and otherwise, are satisfied, the deposit may be refunded upon withdrawal (within the specified guidelines), removal, or graduation.

Requirements for Admissions: The Admissions Committee will carefully consider applications from candidates whose preparation is unusual and who, for good reason, do not meet the norms as stated below. Normally, a minimum of 16 units (courses) of secondary school preparation are required for admission. These should include certain fundamentals such as English, mathematics, science, social studies, and a world language. The following units are recommended:

For Liberal Arts: Students should have four years of English, at least two years of a world language, and a minimum of two and one-half years of college preparatory mathematics. Students planning to major in chemistry, physics, and mathematics should have at least three and one-half years of mathematics.

For Engineering: Students planning to complete the engineering curriculum should have elementary and intermediate algebra, geometry, trigonometry, chemistry, physics, and four years of English. Although more advanced mathematics work is not required, it will prove helpful.

For the Leadership in Medicine Program: Students applying for the accelerated B.S./M.S. or M.B.A./M.D. program sponsored by Union College, Clarkson University, and Albany Medical College must present at least four years of English, one year each of biology and chemistry, and at least three years of college preparatory mathematics. A year of physics is recommended but not required. International students are not eligible for the LIM program.

Interviews and Group Information Sessions: Interviews are strongly recommended. Appointments may be made in advance of the proposed visit by calling (518) 388-6112 or using www.union.edu/visit. Personal interviews are offered weekdays from May 1 to January 31 for students who will be or are seniors. Off campus interviews are offered by alumni. Register at www.union.edu/alumniinterview from August 15 to December 15.

Student-guided tours are available in conjunction with group information sessions weekdays and on many Saturdays throughout the year. Transfer students may visit and interview at any time. Contact the admissions office for daily schedules or consult www.union.edu/visit.

School Reports and Recommendations: The secondary school report form, requesting a recommendation from the school counselor and a transcript of the academic record, is part of the Common or Coalition Application. The transcript should include a listing of the courses in progress as well as completed courses. A report of mid-year grades is required. A letter of recommendation from a secondary school teacher who has taught the student is also expected. The recommendation may be submitted through the Common or Coalition Application or sent directly to the admissions office by the teacher. All materials must be on file with the admissions office by the deadline for the program and no later than January 15.

College Entrance Examinations: Applicants may submit standardized test scores and choose to have the scores considered with the application. For most applicants, standardized testing is optional. The SAT or the ACT are required for applicants to the Leadership in Medicine program. For the 3+3 Accelerated Law Program, applicants must submit either the SAT or the ACT. The November test date is the last test date available to applicants to Leadership in Medicine program. The December test date is the last test date available to for the 3+3 Accelerated Law Program. Testing is strongly recommended for U.S. residents for whom English is not a first language; the TOEFL, ACT or SAT may fulfill that requirement.

Early Action: The deadline for early action is November 1. Early action applications are evaluated in the same way as regular decision applications. Students receiving offers of admission in early action may apply to other colleges and will have until May 1 to accept or decline Union's offer of admission. Early action decisions will be released in mid-to late December.

Early Decision: A significant number of Union's applicants request early decision. The College recommends this program to all candidates who have decided that Union is their first choice college. Early decision candidates are favored in evaluation. A candidate who wishes to be considered for early decision must check the appropriate space on the application for admission. An early decision application carries with it the commitment that the candidate will enroll if admitted. Regular applications to other colleges may be filed - with the understanding that these will be withdrawn if the candidate is admitted to Union.

Applications and requests for early decision must be received by the College by November 1 for Option I or January 15 for Option II. All other forms and credentials, including the Early Decision Agreement, must also be received by November 15 or January 15, respectively. Early Decision candidates will be notified of the decision by mid-December for Option I and by early February for Option II. Candidates not offered admission under the Early Decision Program may either be deferred to the regular applicant group and reconsidered or denied admission.

Early Admission: In recent years, a number of high school students have expressed an interest in accelerated completion of high school requirements and early admission to the College. The admissions committee will consider candidates for early admission providing that, on the basis of high school achievement, they have demonstrated the potential to do college-level work. Interviews are required of candidates requesting early admission.

Deferral: Union College allows any student who has paid the enrollment deposit to defer entry for one year at a time (gap year) for reasons such as athletes, health, military service, community service, travel and work. The deferral may be renewed for a second year. Requests to defer must be received by July 1 and submitted to the Director of Admissions, Ann Fleming Brown, at browna@union.edu for approval. Students who choose this option commit to attending Union in the year after the gap year. Students also agree not to apply to other colleges during the gap year. Students may

take courses at another institution, but must not be fully matriculated. Union accepts up to six AP results, IB results and/or college classes for credit. Applicants for financial aid must submit the updated CSS Profile and FAFSA by January 15 of the gap year. Merit scholarships are guaranteed at the same level for the following year.

International Students

In addition to the application requirements described above, applicants who are citizens of other countries must be proficient in reading, listening, writing, and speaking English as English is the language of instruction at Union. The Admissions Committee requires that all international students (for whom English is not their first language) submit the results of the Test of English as a Foreign Language (TOEFL) or IELTS examination. For those that cannot access TOEFL or IELTS, a Duolingo score and interview may be submitted. The SAT or ACT is also strongly recommended for international applicants. English language proficiency waivers are granted on an individual basis at the discretion of the admissions team. Admissions interviews are recommended for all applicants and required for international students who are from China, India, and Vietnam.

Limited financial aid is available to non-U.S. citizens, however competition for funding is selective. Union expects international applicants to be able to contribute a minimum of \$7,500 (USD) each year toward the cost of attending. All aid is determined by the College's evaluation of a family's financial contribution. To apply for aid, non-U.S. citizens must submit the International CSS Profile. Canadian citizens are required to file the CSS PROFILE form with the appropriate agency before February 1. Additional information is available at www.union.edu/financialaid.

Transfer Students

Union welcomes the applications of students wishing to transfer from other two-year and four-year colleges. In making its decisions, the admissions committee considers college work completed and the recommendations of appropriate officials at the college presently attended. Students should arrange for transcripts of all college work, a college report, a secondary school transcript and recommendations to be submitted to the Admissions Office. An interview is recommended, but not required. Transfer students must have completed some college courses within five years to be considered for admission.

Financial aid for transfer students is limited and depends on the economic need of the student. Candidates applying for financial aid must submit the College Scholarship Service's PROFILE Form and the FAFSA (Free Application for Federal Student Aid) Form to their respective processing agencies.

The admissions process for transfer students follows a separate timetable. For admission to the fall term, transfer applicants must submit their completed applications by April 15. For entry into the winter term, the deadline is November 1; while for the spring term, the date is February 1. Applicants are notified of admissions decision on a rolling basis. Admission for spring and winter terms is on a space available basis only.

Union has articulation agreements with Berkshire County Community College in Pittsfield, MA.

Visiting Students

Occasionally, non-matriculated students may wish to attend the Union on a full-time basis. These students are considered visiting students. They may take courses full-time at the College for a maximum of two trimesters, at which time they must apply for transfer admission and be admitted before continuing their studies. The Registrar's Office is the entry point for Visiting Students. High school students who wish to take a course or courses at Union should inquire about that possibility at the Registrar's Office.

Admissions Timetable

Application Deadlines:

Regular decision deadline is January 15.

Early action deadline is November 1.

Early decision deadlines are November 1 or January 15.

Leadership in Medicine deadline is November 1.

3+3 Accelerated Law Program deadline is January 15.

Transfer applications should be filed by April 15 for Fall term, November 1 for Winter term, and February 1 for Spring term.

Entrance Examinations: Standardized testing is optional for most applicants. If the candidate submits testing, the SAT and SAT Subject Tests or the ACT must be completed by January of the senior year (by November/December for accelerated programs).

Interviews: Individual interviews are strongly recommended and must be completed by the end of January. Register at www.union.edu/visit.

Financial Aid Applicants: Applicants must file the College Scholarship Service's PROFILE Form and the Free Application for Federal Student Aid (FAFSA) with the appropriate agencies no later than February 1. Citizens of other countries file the International CSS Profile.

Candidate Reply Date: Accepted candidates reserve places in the first-year class by early May.

Admissions Office Hours: Weekdays, 8:30 a.m. to 4:30 p.m. Selected Saturdays, 10 a.m. to 2 p.m., April, July through November.

Campus Tours: Weekdays from the Admissions Office and on selected Saturdays, April, and July through November. www.union.edu/visit

Costs and Financial Aid

Costs

The costs included in this *Academic Catalog* are those in effect at the time of publication. They are subject to change by action of the Union College Board of Trustees. Tuition and fees paid by students cover about 70 percent of the instructional and operating costs of the College. The difference is met by income from endowment and contributions from individuals and organizations that recognize the opportunities offered by Union College.

Comprehensive Fee: The comprehensive fee, which includes tuition, room, board, and fees for all full-time undergraduate programs is \$76,857. A year's tuition allows students to register for three terms, taking three courses per trimester. This amount will be billed in three equal installments, payable on receipt of the bill for each term, in advance of the first day of classes. All full-time undergraduate students are expected to register for three courses per trimester. All continuing matriculated (full-time) students must register for at least three courses in every trimester prior to graduation.

Additional Courses/Fourth Courses: Full-time undergraduate students who are required to pay for additional courses above the normal course load will be charged \$4,523 per course. Refer to "Academic Policies, Fourth Courses" for policies regarding enrollment for fourth courses.

Part-time and non-degree course fees: All students in a part-time undergraduate program, both matriculated and non-degree, will be charged \$6,812 per course. The charge to audit a course is \$3,396.

Dining Services: All students living in college owned housing are required to be on a meal plan. All first-year students are required to be on the 15-meal plan for the Fall and Winter trimesters. First-year students may also select the 12-meal plan for Spring trimester. Upper-class students may choose any of the meal plans offered. Students living off campus receive a rebate on their student bill equal to \$1,848 per term, which allows \$200 per term to remain on their account to use as dining dollars. Residential commuter students will not be charged for board 2021-22.

Credit left on the student's declining balance at the end of the fall or winter term will be credited to the following term. Because the meal plans are exempt from New York State sales tax, any credit remaining at the end of the spring term will be forfeited. Students have the option of adding to their declining balance in increments of \$25. The declining balance credit can be used in any of the College's dining service facilities.

The student's ID will also act as a declining balance card, which has the cardholder's picture for identification and a magnetic strip to track the student's cash and meal balance. Students wishing to purchase additional credit may do so in the Dining Service Office or online. The card is non-transferable and alterations or misuse can result in disciplinary action. Lost cards should be reported to the Campus Safety Office immediately. Replacement charges are \$25.

Any board student requiring a special diet must comply with the following procedures:

1. A letter from the student's physician must be submitted detailing the specific diet, the reason for the diet, and the expected duration of the diet.
2. A copy of the diet must be sent to Health Services.

3. A follow-up letter from the student's physician must be sent at the end of each term stating the results of the diet and whatever changes, if necessary, must be made in that diet.

Union College holds a club New York State liquor license. The laws governing the locations, sale, and consumption of alcohol on or off campus by student groups or organizations using the dining services will be strictly enforced. Temporary beer and wine permits are necessary for any group wishing to sell beer or wine or charge admission at a social function where beer and wine are being served. Such permits are available through the local A.B.C. Board.

College Housing: Union is a residential college, and all students are expected to live on campus during the course of their undergraduate years, provided housing is available. Each year, prior to the spring housing lottery, the Office of Residence Life will publish guidelines for requesting permission to live off campus. Students living off campus will receive a housing rebate of \$2,511 per term, for a total of \$7,533 per year. Students who are married or who commute can be exempted from the on-campus requirement. (There are no housing facilities for married students.) Once the residence contract is signed, the student is bound to all College policies as outlined in this *Academic Catalog*, the College's *Student Handbook*, and the terms and conditions of the residence hall contract.

All residence hall rooms are provided with a single telephone connection and an individual network connection for each occupant. Telephone service that is provided at no additional cost includes dial tone for touch tone service; campus and local calling; and custom calling features. The phones for the rooms are provided by the residents. Long distance calling can be provided by the College using personal authorization codes obtainable through the Telecommunications Office, or by other long distance carriers using a calling card. The 100Mbit/second Ethernet network connection provides access to the computers run by the Office of Information Technology Services and to the Internet.

Bookstore Charges: Students may open a charge account at the Bookstore at any time, with a parent as co-signer on the account agreement. These charges will be included on the student account bill. Students with financial holds will have their Bookstore account closed until the balance is satisfied. Bookstore accounts for all students are suspended on May 16th in preparation for final billing information. The Bookstore also accepts cash, checks, and major credit cards as payment.

Student Health Insurance: All full-time undergraduate students are required to be covered by health insurance that meets the minimum requirements established by the College. U.S. Citizens who are covered by their parents' / responsible party's insurance may waive enrollment in the College plan by completing the online waiver at www.haylor.com/college/union-college/. Students will be enrolled for insurance provided through the College and charged \$1,959 if the online waiver is not completed. The waiver is only valid for the current year; therefore it must be completed annually. The deadline to waive is September 15 and is the only means students have of avoiding compulsory enrollment and charges under the College-sponsored plan.

International students are automatically enrolled in and billed for the Union College health insurance.

Tuition, Room and Board Refund Policy in the Event of a Withdrawal or Suspension

Voluntary Withdrawals

Tuition Refund

Any student who withdraws voluntarily or takes a leave of absence will be eligible for a refund of tuition using the last day of attendance based on the following schedule.

- Withdrawal before the first day of classes -100% refunded
- Withdrawal during 1st and 2nd week - 75% refunded
- Withdrawal during 3rd week - 50% refunded
- Withdrawal during 4th week - 25% refunded
- Withdrawal after the end of 4th week - no refund

Room and Board Refund

Refunds for room and board charges will be pro-rated based on the percentage of the term elapsed. Credits for room and board will be applied to the student account at the time of withdrawal.

Medical Withdrawals

The medical withdrawal policy is the same for involuntary and voluntary medical withdrawals. Students are encouraged to request a voluntary medical withdrawal at any time they believe that their physical or mental health concerns are significantly interfering with the ability to be a successful student and/or that the demands of College life are interfering with recovery or safety. A medical withdrawal must be approved by the Dean of Students in consultation with campus health care professionals in accordance with College policy.

Students medically withdrawn during the term can choose one of the following:

1. A Tuition Waiver for the Comprehensive fee charged for the term to be applied to the next term in which a student enrolls. Charges for room and board will be pro-rated based on percentage of the term elapsed. Credits for room and board will be applied to the student account at the time of withdrawal.

OR

2. Receive a pro-rated refund of tuition based on the schedule above. Charges for room and board will be pro-rated based on the percentage of the term elapsed.

If a student should not be able to return following a medical leave (involuntary and/or voluntary) and had originally chosen to receive a tuition waiver ("A" from above), the student may be, at the discretion of the Dean of Students, eligible for a prorated refund of tuition based on the schedule above. If a refund is approved, refunds will be calculated on amounts paid for tuition less scholarships and grants and will be prorated based on leave date.

If the withdrawn student does not return to Union within six (6) months of the withdrawal and has a student loan, they may be contacted to begin repayment of their student loans. Students should contact their loan servicer for any questions regarding their loan repayment options.

If the student does not plan to return for the term following withdrawal, he/she must notify the Dean of Students Office in writing; by the last day of classes of the withdrawal term. Failure to pre-schedule, register, non-payment of the term bill, or a request for a transcript constitute official notice of withdrawal or leave of absence.

Students are encouraged to take the time that is needed to be well enough to return to campus to continue their studies. When ready to return, please submit a letter to the Dean of Students office indicating your intent to return. You will also need to include a letter from your treating clinician indicating your current ability to return to a residential environment as well as any treatment you have received and will need to continue.

Suspensions

Suspensions from the College include withdrawals for poor academic performance, for academic dishonesty, or for disciplinary reasons.

Students required to leave during the term because of a suspension:

1. Will not receive a refund of the Comprehensive fee (Tuition, Room, Board, and Fees) paid for the term.
2. A student that is suspended may also face restitution or fines resulting from the violation. The Student Affairs office determines these fines.
3. The suspended term will be counted towards the student's residency requirement; thus, the student is not required to enroll for an additional term but rather can make up lost courses by enrolling in fourth courses or by transferring credits from other institutions. Fourth courses may be subject to the 4th course enrollment fees. See the Fourth Course Policy for more information.
4. If the withdrawn student does not return to Union within six (6) months of the withdrawal and has a student loan, they may be contacted to begin repayment of their student loans. Students should contact their loan servicer for any questions regarding their loan repayment options.
5. If the student does not plan to return the term following suspension, he/she must notify the Dean of Students Office in writing; by the last day withdrawal term. Failure to pre-schedule, register, non-payment of the term bill, or a request for a transcript constitute official notice of withdrawal or leave of absence.

Refunds will be credited in the following order: Federal Stafford Loans; Federal Supplemental Loan to Students (SLS); Federal PLUS Loans; Federal Perkins Loans; Federal Pell Grant program; Federal Supplemental Educational Opportunity Grant program; other Title IV funds; non-Title IV funds; any remaining credit balance to the student.

Other fees not subject to a refund include health service fees; health insurance; late payment fee; security fines; late registration fee; telephone charges; and declining balance.

Students will not be entitled to any portion of a refund until all Title IV programs are credited and all outstanding charges have been paid.

Registration: All financial obligations must be satisfied before prescheduling. This includes the receipt of funds from student loans and scholarships from sources outside of Union College.

General Financial Obligations: Diplomas and transcripts will be withheld from a student who has not met all of his or her financial obligations to the College. Failure to satisfy financial obligations may result in suspension from the College and the account being sent to an agency for collection, where the student is responsible for collection fees assessed. To return to Union, the student must apply to the dean of students for readmission. Payment of the outstanding tuition balance plus the full amount of the next term's bill will be required before the student is accepted.

Fees

Admission Deposit - to be applied as a credit to the student account with the fall term billing.

- Accelerated Programs and Leadership in Medicine - \$50
- Collection Fee
- A fee of \$25 will be charged for each check returned for insufficient funds

International Programs

- Students participating in a **faculty led** term abroad are charged the comprehensive fee for the term plus a \$650 International Program fee. Charges include tuition, room, board, insurance, and group excursions; but exclude round trip airfare to and from the host country program destination.
- Students participating in an exchange program or term abroad **without a Union faculty member** are charged the comprehensive fee for the term. Charges include tuition, room, board, insurance, and group excursions; but exclude round trip airfare to and from the host country / program destination.
- Exchange programs in Lille, France; Aachen, Germany; Antwerp, Belgium; and Istanbul, Turkey have special billing arrangements and students are encouraged to check with the International Programs Office.
- Students who withdrawal from a Term Abroad program are subject to a \$600 penalty.

Late Fees

- \$100 (assessed for past due student account balances, failure to check-in on schedule and/or late add/drop course transactions)

Student Activity Fee

- Included in the Comprehensive Fee (allocated to student organizations/committees by the student government. Payment is required of all full-time matriculated undergraduate students)

Financial Aid

Union College has a long-standing history of enrolling students who have an outstanding record of personal and academic achievement with a strong commitment to excellence. Since not all qualified students have the financial resources required to attend the College, we offer a very comprehensive financial aid program designed to make a Union education an affordable option for all undergraduate students.

Although the College offers some merit awards to recognize the outstanding accomplishments of applicants, the majority of aid resources are awarded based on demonstrated financial need as measured through both the Free Application for Federal Student Aid (FAFSA) and the CSS Profile. All candidates for admission are automatically considered for merit awards. There are no separate applications required.

Applying for Financial Aid

Prospective students who would like to be considered for need-based financial aid must indicate on their admissions application their desire to apply for aid and submit both the Free Application for Federal Student Aid (FAFSA) and the CSS Profile by January 15. In addition, if the biological parents of the dependent student are separated or divorced, the noncustodial parent must also complete and submit the CSS Profile.

Continuing students must complete the current year FAFSA and Profile and submit all verification documents to the aid office by April 1. A listing of the required verification documents is provided on the financial aid web site.

Aid Awards

Generally awards consist of a combination of scholarships, grants, loans, and part-time employment. In determining the aid award, Union typically includes a part-time job ranging from \$1,700 to \$2,200 as well as some minimal amount of loan. The balance of the award consists of scholarship assistance. The College attempts to meet the full demonstrated need of all of our applicants. Since needs change from year to year, students must submit applications each year to determine their award eligibility.

Initial aid awards will be offered based on the information provided on both the FAFSA and Profile. All enrolling students will be required to either utilize the IRS data retrieval tool or submit copies of federal tax returns to verify the awards that have been offered. Awards may be adjusted when there are differences between FAFSA/Profile estimates and actual figures. If a student receives outside scholarship awards, he or she must notify the financial aid office. If federal need has not been fully met or a student is receiving only merit awards, he or she may be able to keep the outside award in addition to our financial aid offer. If federal need is fully met, the College will reduce the loan or work portion of the package first. For questions about how the award may affect an aid package, please contact the financial aid office.

Disbursement of Aid

Financial aid awards will be disbursed to a student's account provided that the award has been income verified and all required documents have been completed online or submitted directly to the financial aid or the finance office. Typically the aid will be disbursed at the beginning of each term and subsequent disbursements will occur on a weekly basis.

Annual Renewals

Since family circumstances change from year to year, need is re-evaluated annually. Continuing students will receive a reminder via email from the Department of Education for the renewal of their FAFSA application. In addition, the Financial Aid office will provide detailed information on its web site regarding the renewal application process. Students and parents can view the status of their application through Financial Aid Self Service which is accessed from the Self Service Student Menu. The deadline for continuing students is April 1. Once the completed aid application has been reviewed by the Financial Aid Office, the student will be notified via email to view their award online. In Self Service you are able to view financial aid award letters, keep track of application requirements and accept or reject student loans. Please note that all students are eligible to receive a maximum of 12 terms of financial assistance.

If a student is receiving only a merit award the scholarship will automatically be renewed in subsequent years provided the student is enrolled as a full-time undergraduate at Union College. Students who are enrolled in the Leadership in Medicine Program and/or the 3+3 Accelerated Law Program are not eligible to receive merit and/or need-based aid from Union College once they have officially enrolled at Albany Medical College or Albany Law School.

Refunds

In some cases the total amount of financial aid will exceed the amount of the bill. This most often occurs for students living off-campus. If a credit balance exists on a student account, he or she may elect to leave the surplus to be used for a future term or request a refund from the Finance office. Please note that refunds can be issued only on amounts that have been credited to the account.

Satisfactory Academic Progress

There are no minimum grade point average requirements for the renewal of Union College scholarship awards. However, if a student is receiving federal and/or New York State awards, he or she must meet satisfactory progress guidelines described in the sections that follow.

Academic Eligibility for Federal Title IV Programs

Federal regulations require that schools monitor the academic progress of each applicant for financial assistance to ensure they are meeting academic progress standards. At Union College, the standards of Satisfactory Academic Progress (SAP) are evaluated annually at the end of each academic year. In order to maintain SAP, all three of the following guidelines must be met.

- Students must complete each academic year (three terms of enrollment) with a cumulative GPA of 2.0.
- Students must complete their program at a pace of 67%. To illustrate: Typically, students register for/attempt a total of 9 credit-bearing courses per academic year. In order to meet Union's pace standard, 6 of those courses must be successfully completed (67%).

- Students are expected to complete graduation requirements within the normal time specified in the program description for the program in which they are enrolled. Under certain circumstances, however, the student may require more than the normal completion time to fulfill graduation requirements. The maximum time frame in which a student must complete the program is 150% of the published length of program measured in credit-bearing classes attempted.

When evaluating pace, please note the following:

- Credits transferred in from another institution as well as Advanced Placement classes that are accepted towards the student's educational program are counted when measuring SAP as classes attempted and classes earned.
- Grades of "W" (withdrawn), "WF" (withdrawn failing) and "I" (incomplete) will be included as classes attempted, but not as earned. Note: Students who have received an "I" and, as a result, are not making SAP are responsible for informing the Financial Aid office when they have been assigned a traditional letter grade. They should request a review of their SAP status. This review is not considered an appeal and may not result in eligibility for federal student aid. For example, if a processing deadline has passed then federal aid cannot be disbursed regardless of their SAP status. *It is the responsibility of the student in this situation to contact the financial aid office for all processing deadlines.*
- For repeated courses, the original and repeated course will both be included in the total number of classes attempted. However, the student will only receive credit for taking the class once. This includes students who have repeated a course because of a prior failure or who are repeating a course they have passed, but not met a minimum grade requirement.

For instance, if a required prerequisite must be completed with a "C-", but the student previously passed with a "D", both classes will count as attempted, but counted only once as earned.

Students who are not meeting the SAP requirements will lose eligibility for their federal aid (Direct loans, PLUS loans, PELL, SEOG and federal work study) the following academic year. In order to regain eligibility, they must be meeting SAP requirements by the end of the following year.

Federal regulations permit students to appeal their loss of federal aid and, instead, be placed on one term of Academic Probation status. This status allows for reinstatement of federal funds for one payment period only, provided all appeal conditions are met and approved. The bases on which a student may file an appeal include the death of a relative, an injury or illness of the student, or other special circumstances beyond the student's control. The student must complete the Satisfactory Academic Progress Appeal Form and include documentation to support their basis of appeal, a letter that explains what has changed in the student's situation that will allow the student to demonstrate SAP at the next evaluation and a plan of action developed with the academic advisor that will ensure they continue to meet SAP. *In certain cases, an academic advisor may develop a plan which will enable the student to meet Union's SAP standards by a specific point in time. In such situations, until the specified point in time is reached, the student's progress must be evaluated each term to determine whether or not the student is meeting the requirements of the plan. Any student who is not meeting the requirements of the plan will lose their Academic Probation status and, therefore, eligibility for federal funding.* The Appeal Form along with supporting documentation will be reviewed by a committee that will include the Director of Financial Aid as well as an Academic Dean. The student will be informed of the committee's decision by letter and/or email.

In the event that a student is placed on Academic Probation for one term, Union will review the progress at the end of each subsequent term for the entire academic year to confirm he/she is making SAP *or* meeting the requirements specified in the academic plan.

New York State: Academic Eligibility Requirements

Payment: 1 2 3 4 5 6 7 8 9 10 11 12 13 14 15

Course Credits: 0 1.5 3 4.5 7.5 10.5 13.5 16.5 19.5 22.5 25.5 28.5 31.5 34.5 36

GPA: 0 1.3 1.5 1.8 1.8 2.0 2.0 2.0 2.0 2.0 2.0 2.0 2.0 2.0 2.0

A student must also achieve what is referred to as "satisfactory program pursuit." This is defined as completing, with either a passing or a failing grade, a certain percentage of a full-time course load in each term for which an award is received. The percentage is 50 percent of the minimum full-time course load in each term of study during the first year in which an award is received; 75 percent of the full-time course load in each term of study in the second year for which an award is received; and 100 percent of the minimum full-time course load in each term thereafter.

Student Rights and Responsibilities

A student has the right to know and understand all aspects of the financial aid process and programs that are administered through the Union College Financial Aid Office. Questions may be directed to the staff of the Office of Financial Aid. Some commonly asked questions are listed below:

- What financial assistance is available, including information on all federal, state, and Union College aid programs?
- What are the specific deadlines for submitting applications for each of the various aid programs?
- What is Union's cost of attendance and what is our policy with regard to making refunds to students who leave the College?
- What criterion is used to determine which students are eligible to receive aid?
- How does the College determine financial need, including how costs for tuition, fees, room and board, travel, books and supplies are considered in the calculated budget?
- What resources (such as parental contribution, other aid resources, assets, etc.) are considered in the calculation of need?
- How much of financial need as determined by the College has been met?
- What does each of the types of aid included in a package mean?
- What portion of an aid award must be repaid and what portion represents gift aid? If any portion of a package includes a loan, the student has the right to know the interest rate, the total amount that must be repaid, the payback procedures, the total time to repay the loan, and when the repayment is to begin.

Along with these rights, students also have responsibilities which include:

- Review and consider all information about a school's financial aid program and specifically, the financial aid award, before enrollment.
- Complete financial aid applications accurately and within the established deadlines. Errors may delay the processing of an application. Intentional misreporting of information on application forms for federal aid is a federal violation and is subject to penalties under the U.S. Criminal Code.
- Return all additional documentation, verification, corrections, or other requests from the financial aid office or by agencies to which a student has submitted applications.
- Read and understand and accept responsibility for all of the forms. Keep copies for records.
- Notify a lender of any change in name, address, or school enrollment status.
- Perform in an acceptable manner, the work that is agreed upon when accepting employment through the Federal Work-Study Program.

Financial Aid Programs

Federal Aid

Students must file the Free Application for Federal Student Aid (FAFSA) in order to be considered for any of the federal programs (grants, loans, and work study). Based on the FAFSA, the Financial Aid Office reviews eligibility and makes awards within program guidelines and formulas (as always, subject to available funds).

Grants

Pell Grant: These grants, varying from \$695 to \$6,495, are awarded to the neediest students (based on a federal calculation).

Federal Supplementary Educational Grant Program (FSEOG): These additional grants are awarded to Pell Grant recipients.

Work Study

Federal Work-Study Program: Students work in part-time jobs on campus and can earn up to the amount indicated on the award letter. This is a federally subsidized program administered by the College and offered to students as part of their aid package. Preference for jobs is given to students based on financial need. Additional information regarding the work-study employment program is available on the financial aid office website.

Loans

Federal Direct Subsidized Loan Program: A need-based student loan that carries a fixed interest rate and allows for the deferment of both principal and interest while the student is enrolled at least half-time. Loan maximum amounts are \$3,500 (first-year students), \$4,500 (sophomores), and \$5,500 (juniors and seniors) with a maximum cumulative total of \$23,000.

Federal Direct Unsubsidized Loan: Students who do not qualify for all or part of the need-based subsidized Direct Loan may qualify for an unsubsidized Direct loan. The interest rate is fixed and the interest begins at time of disbursement (or the student can choose to pay the interest while still in school). For dependent undergraduate students, the annual loan limits include amounts borrowed under a Federal Direct Subsidized Loan (i.e. first-year students \$3,500; sophomores \$4,500; juniors and seniors \$5,500). Dependent undergraduates may borrow an additional \$2,000. Undergraduates who are independent according to the federal guidelines or whose parents are ineligible for a Federal Direct PLUS Loan may borrow up to an additional \$6,000 (for first-year students and sophomores) and \$7,000 (for juniors and seniors). The interest rate for Direct Loans effective July 1, 2021 is 3.73% with an origination fee of 1.057%. Eligibility for these loans is determined through the Free Application for Federal Student Aid (FAFSA) at www.fafsa.ed.gov. The Financial Aid Office notifies applicants the specific amounts for which they qualify from both the subsidized and unsubsidized loan programs. Repayment begins six months after completion of studies or leaving college and may extend up to ten years.

Federal Direct Parent Loan for Undergraduate Students (PLUS): If creditworthy, parents of undergraduate students may be eligible to borrow up to the cost of attending Union (minus other financial aid accepted). The PLUS loan has a fixed interest rate of 6.28% effective July 1, 2021 and repayment begins 60 days after the funds are fully disbursed. The parent borrower does have the option to defer payments on the PLUS loan until the student's six month grace period ends. PLUS loans are subject to a 4.228% origination fee. Information on the application process is available on our web site or from the Financial Aid Office.

Veterans Administration (VA) Benefits: Many programs of educational assistance benefits are available to those who have served in the military, and their dependents. Program benefits vary with dates and length of service. Detailed information on all veterans' benefits and assistance in applying for benefits can be obtained from offices of the Veterans Administration in each state.

GI Bill Educational Benefits and the Yellow Ribbon Program

Union College is a proud participant in the Yellow Ribbon Program and its commitment to provide educational opportunities and resources for U.S. Veterans. Congress passed the Post 9-11 GI Bill to enable affordability for eligible participants at public and private colleges and universities as well as other educational programs. In some cases, the resources provided by the Veterans Administration combined with the Union College award enable the qualified applicants to enroll at Union at minimal cost.

The Post-9-11 GI Bill provides educational resources for individuals who served on active duty after September 10, 2001 with at least 90 days of aggregate service, or individuals who were discharged as a result of a service-connected disability after serving 30 continuous days following September 10, 2001. Individuals must also have received an honorable discharge for consideration of the Post 9-11 GI Bill. The level of eligibility ranges from 40% - 100% depending on the actual length of time of active duty after September 10, 2001.

Veterans who are eligible at the 100% level may receive payments from the Veterans Administration covering the following:

- Tuition and fees - up to a maximum of \$26,043
- A monthly housing allowance
- A stipend to cover the cost of books

Veterans who qualify for benefits at less than the 100% level will receive prorated amounts for the benefits listed above. In some instances, individuals may transfer their benefits to their spouse or dependent children. More detailed information regarding the specific levels of eligibility and transfer of benefits is available on the GI Bill Website.

Students receiving Veterans benefits may also qualify for Institutional, Federal, and State financial aid programs. Application requirements are available on the financial aid website.

As a participant in the Yellow Ribbon program, qualified applicants must self-identify as Yellow Ribbon eligible on their admission application. Union College will fund up to six Yellow Ribbon awards. These awards are granted on a first-come, first served basis. Qualified Veterans will receive \$35,616 in Union Scholarship, which when combined with the Veterans assistance, will cover the cost of tuition and fees. Please note that eligibility for Yellow Ribbon is limited to applicants who are eligible at the 100% level.

Upon submission of your application to the Veterans Administration for benefits, you will receive a Certificate of Eligibility which must be completed by the School Certifying Official in the Registrar's office. Please send this form to Drew Lentz, Assistant Registrar and School Certifying Officer at lentza2@union.edu for certification.

For additional information regarding admission or financial aid please email inquiries to admissions@union.edu or finaid@union.edu

State of New York Aid

New York offers a number of financial aid programs to residents. The Tuition Assistance Program (TAP) and Higher Education Opportunity Program (HEOP) are described below. In addition, the state offers other special programs for which details and application information are available at New York State Higher Education Services Corporation (HESC), 99 Washington Avenue, Albany, NY 12255.

Tuition Assistance Program (TAP): Awards range from \$500 to \$5,665 annually and eligibility is based on New York State family net taxable income. Applicants must apply each year to the New York State Higher Education Services Corp., 99 Washington Ave., Albany, N.Y. 12255. In addition to meeting the income eligibility guidelines, TAP recipients must continue to meet the satisfactory academic progress and program pursuit requirements as described in the N.Y.S. Academic Eligibility section. Students who fail to meet the minimum successful completion of coursework and grade point average requirements, may lose their eligibility for TAP for the following term or until they meet the minimum requirements. Students must also be enrolled full time to qualify for New York State awards. Students withdrawing from all courses in a particular term will be ineligible for the next term. More information is available under the section "New York State Satisfactory Academic Progress".

Higher Education Opportunity Program: To qualify for this program a student must be a N.Y. State resident attending a N.Y. college or university, and be economically and educationally disadvantaged. Need is met through a combination of state, federal, and institutional funds. In addition to the financial component, the program offers support services such as counseling and tutoring. There is not a separate application required for this program.

Other State Aid

Students who are residents of certain states may be eligible to receive grant assistance from their state applicable to their costs at Union. Contact the appropriate state agency listed for further information and applications:

- Delaware Postsecondary Education Commission, 820 French St., 4th Floor, Wilmington, Delaware 19801; (302) 571-3240; <https://www.doe.k12.de.us/>
- Rhode Island Higher Education Assistance Authority, 274 Weybosset St., Providence, Rhode Island 02903; (401) 277-2050; www.riheaa.org
- Vermont Student Assistance Corp., Champlain Mill, P.O. Box 2000, Winooski, Vermont 05404; (802) 655-9602; www.vsac.org
- Department of Human Services Office of Postsecondary Education Research & Assistance, 1331 H. St. N.W., Suite 600, Washington, D.C. 20005; (202) 727-3688; www.ed.gov

Institutional Aid

Scholarships

Including all of the College's endowed and annual scholarships, this is by far the largest single source of assistance available to our students. Most of the scholarship money offered is based on need as determined by the FAFSA and PROFILE forms. Union does offer some merit awards ranging from \$10,000 to \$25,000 per year. It is not necessary to complete a separate application to qualify for a merit scholarship.

Loans

These college funded loans normally range from \$1000 to \$5000 and have a fixed interest rate of 6%. The interest does not accumulate while the student is enrolled and repayment begins 6 months after the student has graduated or leaves school. These loans are generally based on need and the standard application procedures apply. Repayment can be deferred for graduate school.

Student Life and Student Services

Student Life

Residential Life

The College's student residences include eight halls with traditional, suite and apartment style housing. They include College Park Hall (upper-class); Davidson (upper-class) and Fox (first-year) Houses, West College (first-year); College Park Apartments (upper-class); Garnet Commons (upper-class apartments); Richmond House (first-year); and Webster House (upper-class). Upper-class students also are eligible to live in Minerva Houses, Greek Housing or Theme Houses.

College Residences

Minerva Houses (2004) - Seven houses make up the student-run Minerva Houses. Up to 45 students live in each of these houses: Beuth House, Golub House, Sorum House, Wold House, Messa House, Green House, and Breazzano House.

College Park (1999) - The College Park neighborhood adjacent to campus offers apartment-style housing for 140 students, including numerous theme houses. College Park Hall, which opened in the Fall of 2004, houses 260 upper-class students.

Davidson House (1968) - Named for Carter Davidson, 13th president of the College (1946- 1965). Houses upper-class men and women in suites and men in double rooms on the lower level. Also the home of the Sigma Phi Society and the Kappa Alpha fraternity.

Edwards House (1948) - Named after theologian Jonathan Edwards, Jr., second president of Union College (1799-1801). Houses Theta Delta Chi fraternity.

Fero House (1896-97) - Named after Franklin L. Fero, Class of 1917, who financed the renovation of the building in 1990. Home of Alpha Delta Phi fraternity.

Fox House (1968) - Named for Dixon Ryan Fox, 12th president of the College (1934-1945). Houses first year men and women in suites, and men in double rooms on the lower level.

Garnet Commons (2015) - Houses 80 upper-class men and women in apartment style housing, with private bedrooms and ample common gathering space.

Hickok House (1957) - Named for Laurens P. Hickok, Union's fifth president (1866-1868). Home of the Gamma Phi Beta sorority.

North College (1814) - Used for classrooms and labs until the late 1920s, when it was converted to a residence and office building. Is now the home for Messa and Wold Houses.

Potter House (1961) - Named for Dr. Eliphalet Nott Potter, grandson of Eliphalet Nott and the seventh president of the College (1871-1884). The Chi Psi fraternity is housed on the north side of Potter and the Delta Phi Epsilon sorority is on the south side of Potter.

Raymond House (1961) - Named for Union's ninth president, Andrew Van Vranken Raymond. The Sigma Chi fraternity is in the south side and the Sigma Delta Tau sorority is on the north side of Raymond.

Richmond House (1960) - Named for Dr. Charles A. Richmond, president of Union from 1909-1928. Richmond houses first-year coed students.

South College (1814) - Oldest residence hall still in use as a residence in New York, South College was home to Chester Arthur, William Seward, and most of Union's oldest alumni. Sorum and Green Houses are located in South College.

Smith House (1894) - Named for Rev. John Blair Smith, first president of Union (1795-1799). Houses upper-class coed students in a theme house focused on supporting multicultural issues on campus.

Webster House (1920) - Named for Harrison E. Webster, Class of 1868 and president of Union from 1888 to 1894. Webster House used to serve as the Schenectady Public Library and is now a residence hall for upper-class students.

Wells House (1908) - Named for Professor William Wells, whose family lived in the house until 1930. Renovated in 1994 as a theme house that emphasizes community service.

West College (1951) - Named for the original West College, the College's first home in the Stockade area of Schenectady, West was built to house the post-World War II expansion of student enrollment. Houses first-year students as well as one of the College dining halls.

Theme Houses: Union gives students autonomy in creating the community atmosphere in which they live. The College recognizes 13 student-initiated theme houses. *ARTS House* is a home to students who seek to express themselves through the visual and performing arts. *Bronner House* is dedicated to furthering multicultural understanding among all students. *Cinematic House* is dedicated to watching, critiquing and learning about movies and cinema. *Dance House* is a community committed to expression of creativity through movement. *Dickens House* celebrates the literary mind and holds events focused on literature. *Entrepreneurship House* is a space that invites new and diverse perspectives necessary to drive change in the world through innovation. *Iris House* focuses on creating a supportive environment and educational events for issues in the gay, lesbian, bisexual, and transgender communities. *Maker House* encourages innovation, values creativity, and promotes collaborative problem solving. *Ozone House* is an environmentally-focused community designed to reduce waste and promote a more sustainable way of living. *Serenity House* promotes mindfulness, wellness, and seeks to create a refuge from everyday stressors. *Symposium House* seeks to heighten intellectual discourse outside the classroom. *Tech House* creates a space for the discussion and appreciation of technology and innovation in a social and cultural context. *Wells House* seeks to strengthen the relationship between Union and the local community through volunteer service.

Minerva Houses: Union's Minerva Houses are designed to give all students an opportunity to make rewarding connections and to blend the campus social, academic and cultural life. Every student is assigned to a house, which can be a focus for social activities, dinners and discussion, making new friends, or simply a welcoming place. Up to 45 students live in each house; all houses are equipped with a kitchen, a great room, an office, and a seminar room for meetings and classes. Non-resident members may take advantage of house gathering space and activities even though they live elsewhere. Each house has an activities budget to be used at the discretion of the membership. All faculty and some staff are affiliated with one of the houses and join in many of the house events, giving students an enriched out-of-class experience.

Fraternities and Sororities: Eight national fraternities and four national sororities and one co-ed fraternity, have chapters in good standing at Union. The Alpha chapters of six national fraternities were founded at Union, starting with the famed Union Triad - Kappa Alpha (1825), Sigma Phi Society (1827), and Delta Phi (1827)*. The others formed at the College are Psi Upsilon (1833)*, Chi Psi (1841), and Theta Delta Chi (1847). The national fraternities also include Alpha Phi Alpha Fraternity, Inc., Alpha Delta Phi, Phi Iota Alpha Fraternity, Inc. and Sigma Chi. The national sororities are Gamma Phi Beta, Sigma Delta Tau, Delta Phi Epsilon and Kappa Delta Phi National Affiliated Sorority. We also have a co-educational service fraternity, Alpha Phi Omega.

*No longer on campus.

Student Activities

Union believes that a student's life outside the classroom is an important part of their total education. The vision of Student Activities is to support and empower students in shaping their own journey, both within and beyond the classroom.

Through Student Activities, students are able to engage in unique leadership opportunities that challenge students to think critically and be empowered to take ownership for their experience.

The student government (Student Forum) funds, organizes, and supervises a variety of clubs and organizations; students are responsible for the planning and implementation of these student-funded activities with the support of the Office of Student Activities. The College requires students to have individual health insurance in effect as partial protection from the consequences of engaging in various activities and advises discretion while participating in these activities.

There are about 120 clubs and organizations that fall in the following categories; Academic Clubs, Student Governance, Club Sports, Cultural Clubs, Religious Clubs and Organizations, Art Clubs, Service Clubs and Organizations and Media Clubs. Student clubs are groups recognized by the Student Forum and funded by Student Activity fees. Student clubs must be open to all students paying the activity fee. Organizations are groups recognized by the Student Forum but not funded from Student Activity fees. Organizations may be selective as they are not funded by the Student Activity fee.

Students lead a rich array of programs and activities including but not exclusive to cultural programs, academic programs, concerts, lectures, service opportunities, and much more.

The Office of Religious and Spiritual Life

An important and fundamental dimension of all individuals is their spiritual and ethical nature. The Office of Religious and Spiritual Life at Union is served by the Assistant Dean of Diversity and Inclusion and eight other advisors who are professionals in their traditions.

It is the mission of this office to:

- Increase religious understanding across traditions.

- Engage and empower students' exploration of faith.
- Provide for worship and observance of religious holidays.
- Provide opportunities for community service that integrates religious understanding with action.
- Offer pastoral counseling and spiritual direction.
- Develop and nurture student leadership skills.
- Offer a religious perspective to the academic community.
- Support the mission of the College.
- Foster interfaith dialogues.

The Office of Intercultural Affairs

At Union, we appreciate and value the richness of diversity that our students, faculty and staff bring to our community. We believe our cultures, worldviews, experiences and identities can enrich our campus community as a whole, and that we can learn from each other through our differences and similarities. Leading by the Assistant Dean of Diversity and Inclusion, the Office of Intercultural Affairs aims to:

- Enhance cross-cultural understanding across cultural differences through purposeful programs and dialogues
- Provide opportunities for students, faculty and staff to engage and learn from each other
- Challenge our Union community members to serve as active allies and change agents
- Promote an inclusive and equitable learning environment for all
- Develop students' inclusive leadership skills
- Support and mentor underrepresented student populations
- Collaborate with campus partners in support of the mission of Union College

Athletics

The College believes that every student should be encouraged to take part in sports activities at a level commensurate with his or her abilities and interest. Each student should have the opportunity to improve skills and to learn new sports that will carry over later in their lives. Thus, Union offers an extensive program of intercollegiate, intramural, club, and recreational sports, along with a wellness program that provides students, faculty and staff the opportunity to learn the skills of lifetime sports while promoting healthy lifestyles. The College ensures that athletics be kept in harmony with the essential educational purpose of Union. Union College student-athletes, like those engaged in all extracurricular activities, are an integral part of the campus community and are students first.

Intercollegiate competition is offered in 26 sports; for men, in baseball, basketball, crew, cross-country, football, ice hockey, lacrosse, soccer, swimming, tennis, and indoor and outdoor track; and for women, in basketball, crew, cross-country, field hockey, golf, ice hockey, lacrosse, soccer, softball, swimming, tennis, indoor and outdoor track, and volleyball. Union is a member of the National Collegiate Athletic Association (NCAA), the Eastern College Athletic Conference Hockey League (ECAC Hockey), and the Liberty League. Men's and women's ice hockey compete at the NCAA Division I level; all other sports compete at the NCAA Division III level.

All club sports are administered through the Student Activities office. The most active and popular club sports are skiing, ice hockey, basketball, and baseball. An extensive intramural program is offered in a wide range of sports along with noncredit wellness/activity classes as part of the wellness program.

Facilities include Messa Rink at Achilles Center (hockey, recreational skating, and intramurals as well as locker rooms and athletic training facilities); Viniar Athletic Center, (basketball and volleyball); Frank Bailey Field, at Bertagna - Class of 1985 Stadium, multipurpose, all-weather, lighted field with a 400-meter track, stadium seating for 1,500 and press box (field hockey, football, lacrosse, outdoor track, and intramurals); Breazzano Fitness Center at Alumni Gymnasium (fitness center, swimming, racquetball, squash, and athletics administration and coaches' offices); Garis Field (outdoor track - field events, club sports); College Park Field, a multipurpose, all-weather, lighted field (soccer, intramurals and club sports); College Boathouse (crew); Memorial Field House (intramurals, recreation, indoor track, indoor facility for tennis and spring sports, locker rooms); Alexander Field (softball); Travis J. Clark Strength and Conditioning Center (varsity strength training) and eight outdoor tennis courts (7 are lighted) and an outdoor basketball/street hockey court, all used for intercollegiate competition, intramurals, clubs and open recreation. Women's Golf competes at the Mohawk Golf Club in Niskayuna and Baseball competes at Shuttleworth Park in Amsterdam.

Student Services

Campus Safety

Union College is committed to assisting all members of the Union College community in providing for their own safety and security. Campus Safety main business office is located at the Williams Center for Campus Community Safety (645 Nott St.). Parking permits, vehicle registration, and ID card services are in the front lobby of College Park Hall.

Important Phone Numbers:

Emergency: 911

Non-Emergency: (518) 388-6911

Escort Service: (518) 388-6386

Union College's Campus Safety Department provides 24-hour, year-round security and safety programs. Members of the department are employees of the College who report to the Director of Campus Safety. Officers work eight-hour shifts to perform their duties, which include:

- Preventive patrol of grounds and buildings
- Emergency medical assistance
- Incident investigation and reporting
- Hazard control
- Crime prevention
- Parking and traffic management
- Emergency Management and Training

Special services, including lockout assistance, noise and nuisance control, security escorts, lost and found, and other needs associated with quality of life, safety, and security.

Members of the department have portable radios and are centrally dispatched by control operators in the Campus Safety Building who monitor telephone and emergency lines as well as fire and security alarms. Every College building is linked to the Control Center for fire alarm monitoring, video surveillance and a number of buildings have security alarm systems and access control.

The Campus Safety Department is a private security force empowered by the College and the State of New York to enforce its rules, regulations, policies and the laws of the State of New York. Enforcement procedures include issuing parking tickets, issuing summary fines, filing conduct charges, and making arrests.

The Campus Safety Department works closely with federal, state, county, and local authorities in the investigation and prosecution of crimes and in fire, safety, and health-related issues.

Information regarding campus security and personal safety including topics such as, crime prevention, Campus Safety law enforcement authority, crime reporting policies, crime statistics for the most recent three year period, and disciplinary procedures is available from the Director of Campus. Access to crime data reported to the U.S. Department of Education may be found through the following Web site:

<http://www.union.edu/offices/safety/reports/clery/>

Counseling

The Counseling Center provides services for students to address personal/psychological concerns with a licensed professional counselor. Typical concerns of students range from interpersonal issues, family concerns, academic problems, etc., to problems such as anxiety, depression, and addictions. Most students are seen in individual counseling sessions. Group and couples sessions are arranged when appropriate. All communications with the Counseling Center are confidential. All Counseling Center services are free of charge for enrolled undergraduate students. The Counseling Center also collaborates with Health Services in regards to psychotropic medication.

International Advising Office

The International Advising Office is involved in international student services and wants to serve students in the best way possible. We consider each international student a valuable member of the community with specific and unique needs. The Director assists individual international students by advising them concerning federal immigration, tax and labor regulations, and by providing counseling on personal, academic and cultural matters. In

addition, the office promotes cross-cultural awareness in the community through educational programming, such as orientation, support groups, and the yearly international festival.

Please contact International Advisor, Michelle Pawlowski at (518) 388-8003, should you have any questions.

Disability Services

The Disability Services Office is committed to providing students with disabilities equal opportunities to benefit from all services, programs, and activities offered. We are in compliance with Section 504 of the Rehabilitation Act of 1973 and the Americans with Disabilities Act. The Director determines eligibility for services, authorizes appropriate academic accommodations, provides academic advising and counseling, assists faculty with regard to disability, issues and questions, and helps assist students with self-advocacy in locating additional resources on or off campus.

Please contact Shelly Shinebarger, Director of Disability Services Office, at (518) 388-8785 should you have any questions.

Health Services

We are staffed with 2 Nurse Practitioners, a Physician's Assistant, 6 Registered Nurses, an Administrative Assistant, a part time Office Manager, and a collaborating physician. We have a dietitian on site one day a week, and a Psychiatric Nurse Practitioner on site three afternoons a week. Our hours are Monday from 8:30 AM to 8 PM, Tuesday- Friday from 8:30 AM to 5 PM. We are closed on weekends. Local hospitals and urgent care facilities are available nearby for emergencies after hours with transportation provided by campus safety. Visits are by appointment only. Walk-in visits will not be allowed during the current pandemic. There is no charge to be seen by any of our staff. We offer immunizations, blood draws, and various in house laboratory tests. We have a formulary of medications on site for a nominal fee. Charges for medications, x-rays, laboratory procedures, hospital visits, or specialists are the direct responsibility of each student. We are unable to honor insurance prescription cards for medications dispensed at Health Services. Students may request a written prescription and have it filled at a local pharmacy. Lange's Pharmacy delivers to Health Services daily, Monday- Friday. If you would like to have your prescription card and a credit card registered with Lange's, please call (518) 374-3324. If you have a concern about the school health insurance plan, please contact the Bursar's Office bursar@union.edu or at (518) 388-6106.

Students should present insurance cards (medical and prescription) to Health Services to verify if needed. Please refer to our immunization policy in the student handbook. Students requesting religious or medical exemptions should submit a letter according to the Dept. of Health regulation 10NYCRR, Section 66.13 (d). This consists of either: 1. a certificate from a physician, licensed to practice medicine in this State, that one or more of the required immunizations may be detrimental to the student's health. This certificate must specify which immunizations may be detrimental, or 2. A written and signed statement from the parent, parents or guardian of the student, stating that the parent, parents or guardian objects to their child's immunization due to sincere and genuine religious beliefs which prohibit the immunization of their child, in which case the principal or person in charge of the school may require supporting documents. All health forms are available on our website at: <https://www.union.edu/health-services/incoming-student-health-forms>

Stanley R. Becker Career Center

The Becker Career Center is committed to teaching students how to develop and achieve their career goals so that they are able to secure opportunities that invoke their passion and manage their career for a lifetime in a dynamic, diverse, and global environment. The Career Center empowers students to take personal responsibility for shaping their future. This is accomplished by encouraging self-assessment, exploration and reflection, providing opportunities to apply learning and begin careers, educating students about the world of work, and providing resources to advance students through all phases of their career development.

Students are encouraged to take advantage of the Career Center during all four college years. A recommended first step is to learn about oneself by engaging in all aspects of college life including academics, student organizations, activities, and events. As students reflect upon these and other life experiences, their interests, values, and skills will become increasingly apparent and begin to serve as a foundation for developing their career plans.

Career Center staff helps students develop five core career competencies: Career Decision Making (including self-assessment, exploration, and reflection), Resume Writing, Cover Letter Writing, Interviewing, and Networking. By mastering these competencies, students equip themselves with the lifetime ability of finding and securing positions for which they are well suited. Becker Career Center programs are designed to facilitate student growth in these areas and prepare students to find and connect with opportunities and graduate school programs consistent with their interests. In addition, the Career Center houses a number of online career research tools that allow students to research potential career fields, locate employers by industry and/or geographic area, and connect with Union College alumni working in their targeted career fields. Handshake, the Career Center's web based database, provides students with access to internship and job opportunities from employers specifically looking to hire Union College students.

Academic Program and Policies

The Academic Program

Union College offers studies in the humanities, the social sciences, the sciences, and engineering. The curriculum, which has a wide range and balance across areas of study, offers breadth and depth as students explore particular disciplines and interdisciplinary subjects. Union's curriculum and student life are designed to educate students to live and work in a global, diverse, and technologically-complex society.

Union has a tradition of curricular innovation dating back to its founding in 1795. In the 19th century, Union pioneered the introduction of science, modern languages and engineering into the undergraduate curriculum. More recently, the College has made important advances in general education, interdisciplinary study, international programs, and undergraduate research. Our tradition of curricular innovation continues as Union pioneers ways to conceive of engineering as an integral component of the liberal arts and as we introduce students to computational methods, community-based learning, entrepreneurship, and ethical understanding in courses across the curriculum. At Union, we bring together faculty from diverse academic backgrounds so that students can gain mastery of a wide range of disciplines as well as an understanding of how different disciplines approach particular questions. Students thus prepared are ready to communicate, work, and think within and beyond their area of specialty. Many students study abroad as part of their Union education, often in programs led by Union faculty as well as programs of their own design.

A major may be centered in one of the College's academic departments or a student may choose an interdepartmental major involving work in two or more departments, a formal interdisciplinary major, or a personally-designed "organizing theme major" that defines a central, unifying topic cutting across disciplinary lines. Students may also elect to take up to two minors.

The College is committed to ensuring that all students become good writers. The College's program of Writing Across the Curriculum constitutes a systematic way of ensuring that students pay close attention to writing in courses located throughout the curriculum. The First-Year Preceptorial is the foundation of Union's writing requirements. The Sophomore Research Seminar provides a foundation of research skills for upper-class work.

Degree Requirements

Union offers the following undergraduate degrees: Bachelor of Arts, Bachelor of Science, and Bachelor of Science degrees in Biomedical Engineering, Computer Engineering, Electrical Engineering and Mechanical Engineering.

A Union education is a four-year integrated living and learning experience. Our curriculum is designed to enable a student to achieve the breadth and depth that mark the graduate of a liberal arts college. There is a structure in the movement of our curriculum from first to senior year, a structure that ensures the intellectual sophistication and maturity that we want our graduates to have. To qualify for a degree, a student must:

1. Satisfactorily complete 11 terms of study at Union (most students will complete 12), including 36 term courses plus any additional courses taken as electives or to satisfy program requirements. The engineering program requires 40 courses. For two-degree programs refer to the section, "Combined Degree Programs."
2. Satisfactorily complete requirements in the Common Curriculum;
3. Satisfactorily complete requirements in the major field, degree program, or interdepartmental major, including senior capstone requirements such as a senior thesis, as applicable;
4. Attain minimum cumulative indices of 1.80 overall and 2.00 in the major (and 2.0 in the minor if a minor has been declared).

To graduate, a student also must have paid all sums due to the Bursar's Office, must have made satisfactory provision for payment of any other financial obligations assumed while in college, and must have returned all books and materials borrowed from the library. The individual student is solely responsible for assuring that the program presented for graduation fulfills all requirements, both in general and in specialized study. The Office of the Registrar should be consulted when questions arise about the satisfaction of graduation requirements. Notice of intent to graduate must be provided to the Registrar as per the deadline specified by the Registrar's Office.

Academic Calendar and Enrollment Requirements

Union divides the academic year into three terms of 10 weeks plus a week of exams. A full course unit may be equated to five quarter-credit hours, or three and one-third semester credit hours. The normal course load for a full-time student is three courses in each of the three terms, or nine courses a year. Taking laboratory and other extra class hours into account, the average time per week spent in class is approximately 4.5 hours and the expected average time spent outside of class on course work is approximately 10.5 hours per week. To complete the entire curriculum in four years, engineering students should expect, on occasion, to take more than three courses per term, once per academic year. For additional information on course registration policies, refer to "Academic Program and Policies."

Normally, students will be enrolled full-time for 12 terms (at least 36 courses) through the spring term prior to graduation, except in the two circumstances noted below.

- Students that accumulate three or more credits from pre-matriculation credits or Union College fourth courses, practicum credit, summer courses, or mini-terms may graduate one term early or be unenrolled from Union for a term during the junior or senior year, provided that these credits have not been used to compensate for deficiencies incurred during their time at the College. Students cannot utilize transfer course credit earned at other colleges or universities after matriculation at Union College to graduate early.
- Students in the Union Scholars and Seward Interdisciplinary Fellows programs may use any additional course credits they earn at Union to accelerate their graduation or to be unenrolled for a term or more.

Any student seeking early graduation must obtain approval from the Office of the Registrar. Students seeking to be unenrolled for a term must inform the Office of the Dean of Students. For guidelines regarding transfer credits, refer to Transfer Credit Policy.

The Common Curriculum (General Education)

As a liberal arts college, Union is devoted to educating students to flourish in this rapidly changing world, a world with fluid geographic, intellectual and cultural boundaries. The Common Curriculum seeks to nurture in students a commitment to learning as central to one's development over the course of a lifetime. Union starts with the assumption that college represents a beginning and not an end of one's education. Union's approach, ensuring that students learn much of what the College deems important and at the same time develop and satisfy a taste for exploration, combines elements of choice within a structure of requirements.

Union's Common Curriculum ensures that students analyze and integrate knowledge from a wide variety of areas, communicate the results of their learning and, most important, continue to learn, an essential skill in today's world. To accomplish this, we start with a First-year Preceptorial that emphasizes critical reading and writing using the perspectives of multiple disciplines, and a Sophomore Research Seminar that focuses on learning research skills necessary to assess through informed reflection the enormous varieties of information to which we have access today. Union's Common Curriculum provides the foundational breadth that defines a liberal arts education through requirements in humanities, social sciences, linguistic and cultural competency, quantitative reasoning, and science and technology. The Common Curriculum is designed to enable students to become life-long learners by learning to analyze, synthesize, integrate, and communicate effectively, and obtain an appreciation of different disciplines and areas of knowledge, as well as interdisciplinary study. A detailed description of the Common Curriculum is under "Common Curriculum."

The Major

The major should be viewed as a coherent series of courses providing a solid background in the area of study as well as an introduction to advanced study. Depth of knowledge and understanding in a particular field of study is provided by the major. Courses in this area of special study may also count toward meeting some Common Curriculum requirements, but the prescribed program of study for a major is primarily intended to develop competence in the scholarship represented by an academic department or a group of departments. In addition to majors offered through academic departments, Union offers majors in interdisciplinary programs and individually designed "organizing theme" majors.

Students can pursue an interdepartmental major that combines study in two departments or interdisciplinary programs that offer an interdepartmental major (ID) by completing the ID requirements specified by each. Students must review particular department and interdisciplinary program terms and conditions for interdepartmental majors and then consult with the necessary Chairs and Directors in order to carry out an ID. Departments and interdisciplinary programs specify the terms and conditions for interdepartmental majors. Students should consult each department or program section in Majors, Minors, and Other Programs for descriptions of available options and requirements. Biomedical Engineering, Computer Engineering, Electrical Engineering, and Mechanical Engineering may not be used as a component of interdepartmental majors. Senior Writing Experience requirements vary among areas of study. Where appropriate, students can do one two-term thesis to satisfy both departments' writing requirements.

Students may pursue a "double major" by satisfying all requirements of two majors, neither of which can be an interdepartmental major or an organizing theme major. Except as indicated under "Combined Degree Programs," a student satisfactorily completing two majors earns one rather than two degrees. A student in such a program will be eligible for his or her degree whenever the requirements for both majors, along with those in the Common Curriculum program, are satisfied and a minimum of thirty-six course credits has been earned. Normally an overlap of at most three courses is allowed for the two majors.

The student who enters college with a fairly firm notion about a proposed field of concentration will find it advantageous to test his or her interest in the proposed major field during the first year. In many programs, a student need not begin a major during the first year in order to complete that major by the end of the fourth year. In engineering and science, however, it can be extremely difficult to complete a major in four years unless course sequences are begun in the first year. Students in pre-medicine also need to consider taking the requisite courses in their first year. At the end of the first year, the major may be declared or changed without penalty in the form of lost time and credit. Soon thereafter, and certainly by the end of the second year, the student should make a serious commitment to a focus of study. Every student is required to file with the Registrar a declaration of major no later than the mid-point of the spring term of the sophomore year ("Liberal Arts" and unspecified "Engineering" are not considered majors). Students majoring in an unspecified engineering program must declare their major by the end of their first year of study. This decision may be altered subsequently, although late change of major may require extra courses or terms. Requirements for majors appear at the head of each departmental listing. Some areas require additional courses from related disciplines.

Students may change their major program upon application to the Registrar. The change must have the consent of the Department Chair or Program Director. A request for a change of major submitted after the first week of the final term of study at the College may not be possible to accommodate without delaying the student's graduation.

The Minor

Students who wish to pursue a secondary field of concentration may select and declare up to two academic minors. A minor normally consists of six courses. Requirements for the minor may be found in the course listings by department and program. Students are normally expected to declare a minor in the sophomore or junior year. They must obtain the approval of the department chairperson or program director.

For students who wish to declare one minor, those courses used to satisfy the major field requirement plus those used to satisfy the minor field requirement may in no case total fewer than 18. For students who wish to declare two minors, the minimum is 23. A minimum cumulative index of 2.00 must be attained in courses used to satisfy the minor requirement. All students are responsible for verifying the accuracy of their declared minor at the time of their senior year audit review. Minors cannot be added once the degree has been conferred.

Combined Degree Programs

Union College offers programs in which a student may earn two baccalaureate degrees in the following combinations: engineering and bachelor of science or bachelor of arts, or two engineering degrees.

Nine courses beyond the requirements for the professional degree are required, and normally five years are required to complete them. Certain combinations of curricula within five-year programs may involve carrying an occasional course overload. If a student cannot fulfill all requirements for the two degrees, modification of the program is permitted only with the concurrence of the department.

Also offered are two-degree programs in cooperation with other area colleges, leading to a bachelor of arts or bachelor of science degree from Union and a law degree from Albany Law School; or to a bachelor of science degree from Union, an M.S. or M.B.A. degree from Clarkson University - Capital Region Center, and an M.D. from Albany Medical College; to a bachelor of arts or bachelor of science and a master of business administration in healthcare management; or to a bachelor of arts or bachelor of science and a master of teaching; or to a bachelor of science in a science or engineering field and a master of science in electrical or mechanical engineering, or energy studies. For more information on two-degree programs, please refer to the following sections under Majors, Minors, and Other Programs:

3+3 Accelerated Law Program (6-year program)

Leadership in Medicine/Healthcare Program (8-year program)

Master of Arts in Teaching (5-year program)

Master of Business Administration in Healthcare Management Programs (5-year program)

Master of Science in Electrical Engineering, Master of Science in Mechanical Engineering and Master of Science in Energy Studies

International Programs

The College considers its commitment to international programs to be a central part of its identity. In addition to broadening perspective and deepening knowledge, study abroad often energizes and challenges students so that they are motivated to a higher level of commitment to the enterprise of learning. Students studying away from Union do so through Union College terms abroad programs and exchanges. Students may apply for "non-Union" programs through Union's International Programs office to study abroad on programs run by other colleges and universities. Independent Study Abroad programs allow students the opportunity to design their own study abroad experience. Mini-term programs are offered over winter and summer breaks as well. Refer to "**International Programs**" under Majors, Minors, and Other Programs for more information, including eligibility criteria, application procedures and withdrawal policies.

Academic Policies

Registration for Courses

Registration Confirmation: Each term the Registrar conducts online prescheduling for continuing students who, with the help of their advisors, select three courses for the coming term. Prescheduling must be completed during the announced periods. Students who do not intend to preschedule should notify the Dean of Students of their intended withdrawal from the College. After prescheduling, a request for a change of course ordinarily must be filed with the Registrar no later than the fifth academic day of the term; such changes should be recommended by the advisor. Students who fail to finalize their course schedule after the end of the first week of the term will be assessed a late charge on their bill. With written permission from the instructor, a student may enter a course as late as the second week of the term. Students not enrolled in courses by the end of the second week of classes may be subject to withdrawal from the College for the term and will have to reapply for admission to the Dean of Students.

All full-time matriculated students are expected to be enrolled in no fewer than three courses at the start of each term, unless an exception is approved by the Dean of Studies. **This does not include practicum courses.** For withdrawals after the start of the term, please refer to the section "Withdrawal from Courses." All regular undergraduate students are charged each term's full tuition, which covers enrollment in three courses during that term. Tuition is not prorated until after the student has been in attendance for 12 full terms (or, for five-year programs, 15 terms).

Students must attend those sections of courses to which they have been scheduled by the Registrar. A change of section should be made with the Registrar's Office provided that seats are available or permission is obtained from the professor.

Fourth Courses

Students are allowed to enroll in one fourth course in each academic year at no charge, provided they have a cumulative grade point average (GPA) of at least 3.30, are making satisfactory progress in their program of study, and are not behind in credits. Students who are behind in credits due to course withdrawals or course failures - after taking into account any pre-or post-matriculation transfer credits and credits from Union College practicums, fourth courses, summer courses, and mini-terms- may take up to two fourth courses at no extra charge. These policies apply to all students, including engineering majors, who, in addition, are required to take 40 classes for their degree and are therefore permitted to register for four fourth courses at no additional charge, normally one fourth course per academic year. In all other circumstances, registration for a fourth course incurs an additional fee. Refer to Costs and Financial Aid for the relevant fee. Refer to "Special Curricular Opportunities" for information regarding extra courses for Union Scholars and Seward Fellows. Registration in a fourth course is not available to students in their first term of study at Union. Students who have below a 2.5 GPA or wish to register for their second or third overload course of the academic year, require approval from the Dean of Studies to enroll in a fourth course.

With the exception of students in the Scholars and Leadership in Medicine programs as well as first-and second-year engineering majors, all students, are required to complete and submit the "Petition to Enroll in a Fourth Course" form at the time of registration.

Practicum: An enrollment in a zero-credit practicum does not count as one of a student's three regular course registrations for the term (see above: Registration Confirmation). After successfully completing a practicum sequence, a student may request that one course equivalent be recorded. An aggregated practicum course credit of this sort typically requires registration in a zero-credit practicum in each of three separate terms; requirements specific to each practicum sequence should be confirmed in the Academic Catalog entry for the practicum. Accumulated practicum course credit may be counted toward no more than two of the thirty-six course credits required for graduation, though all practicum registrations will be recorded on a student's record, and may be used to satisfy program requirements if allowed by a student's major or minor.

Auditing Courses: A matriculated full-time student in good standing may audit a course if the instructor gives permission. An audit is not recorded on the student's permanent record.

Pass-Fail Option

In order to encourage students to explore the curriculum, students may take up to four electives to be recorded as "pass" or "fail."

1. No course registered as "pass/fail" may be used in fulfilling a requirement for the major, for a minor, for the Common Curriculum (General Education) or Writing Across the Curriculum, or for a term abroad.
2. The "pass/fail" option is not open to students in their first two terms.
3. A student may take no more than one "pass/fail" course per academic year (defined as the fall, winter, and spring) in the first three years.
4. A student may take up to two "pass/fail" courses in the senior year (defined as the fall, winter, and spring), but may register for no more than one "pass/fail" course per academic term.
5. A student may register for no more than one of the four "pass/fail" courses in any academic department and no more than two of the four "pass/fail" courses in any academic division (Refer to "Divisions" under Common Curriculum).
6. Independent study courses and those taken on a Term Abroad, may not be taken Pass/Fail.
7. A grade of "pass" will be equivalent to the lowest passing grade or better.

A grade of "pass" will not be calculated in the term or cumulative index; a grade of "fail," however, will count as any other failing grade. A course is registered as "pass/fail" by means of a form provided by the Registrar and the option must be exercised (or revoked) no later than the end of the third week of the term. The instructors (who will be informed of this choice by a particular student only by request) will submit regular letter grades, which will be appropriately converted to "pass" or "fail." Later reconversion to the letter grade will be done only if required by a student's official change of major or minor and only upon the specific request of the student.

Students who plan to pursue studies in Graduate or Professional schools should discuss with their advisors the effect of "pass/fail" grades on admission to such programs. Some graduate schools regard a grade of "pass" as a weak grade.

Attendance and Completion of Courses

Classroom Absences: The College expects students to attend classes and laboratories regularly, but it leaves to each instructor his or her statement of policy with respect to absence. It is the student's responsibility to be aware of the policy and to inform instructors in advance of unavoidable absences. An instructor may lower a grade or assign a failing grade for excessive absence.

Withdrawal from Courses

With proper notice to the Office of the Registrar, a student may drop a course during the first eight weeks of a term after consulting with his or her advisor and getting that advisor's approval. Withdrawal from FPR-100, FPR-100H, or SCH-150 requires the approval of the Dean of Studies. Withdrawal from SRS-200 requires the approval of the Director of General Education.

During the first two weeks of the term, a student must add a class to replace the dropped class; exceptions to this policy must be approved by the Dean of Studies. After the end of the second week of classes and until the end of the eighth week, a grade of "W" will be assigned for dropped classes. Dropping a course after the end of the eighth week will result in a grade of "F" unless there are extraordinary circumstances beyond the student's control that prevented him or her from completing the course. The Dean of Studies must approve the withdrawal. In such a case the grade shall be "WP" or "WF," depending on whether the student was passing or failing at the time the course was dropped. A "Failure" ("F") shall be posted to a student's record if proper notice of withdrawal from a course is not given to the Registrar. For information on how this would affect tuition, please see "Withdrawal Deadlines, Refunds and Obligations" in the "Costs" section. Students receiving financial aid who elect or are permitted to drop a course may be ineligible for such aid in subsequent terms. See the chapter on "Costs and Financial Aid" for details.

Three Final Exam Advisory: Students with three final exams scheduled for the same day should speak with their professors to make arrangements to reschedule one of the exams. If arrangements cannot be made with individual faculty members, the student should consult with the Dean of Studies.

Absence from Final Examinations: Students are required to appear for scheduled final examinations. Absence from a final examination produces an automatic grade of "Failure" on the exam. In cases of a student's absence caused by verified personal misfortune, the Dean of Studies may allow a grade of "Incomplete," and the student must arrange with the instructor to take a makeup examination not later than two weeks after the last day of the examination period of the term in which the "Incomplete" was given.

Incomplete Course Work: Students must submit all course work no later than the closing hour of the last scheduled final examination period of each term, unless the instructor has set an earlier deadline. Graduating seniors cannot be issued a grade of "Incomplete." A grade of "Incomplete" may be assigned only for extraordinary circumstances beyond the student's control. The instructor must complete the incomplete form provided by the Registrar's Office and obtain the student's signature. An incomplete grade form must be submitted to the Registrar's Office after submitting the final grades online. When an "Incomplete" is granted, the course work must be completed no later than two weeks after the last day of the

examination period of the term in which the "Incomplete" was given. Course work not completed within the allotted period of time will be assigned a failing grade unless the Dean of Studies, in consultation with the instructor, grants an extension of the incomplete.

Repeating Courses: Students who repeat a course that they previously failed will have both grades listed on their transcripts. All credits attempted and total quality points earned will be used in calculating the cumulative grade point average. Students who repeat a course that they have previously passed (grade of "D" or better) will have both grades listed on their transcripts, but neither the quality points nor the credit associated with the second grade will be factored into their cumulative grade point average. The one exception to this policy is when the course is a required prerequisite that the department has stipulated must be completed with a minimum grade of either a "C" or "C-." If a student retakes a prerequisite course that they have previously passed but without satisfying the minimum grade requirement, both grades will be equally factored into their GPA but they will only receive credit for taking the course once.

Making up Credits: There are many options for students to get caught up if they are behind in credits due to course withdrawals or course failures. Students can take a fourth course at Union, a summer course at Union, an internship or independent study over the summer for a full course credit, or a pre-approved summer course at another College (a maximum of three course credits can be earned at schools other than Union after matriculation to make up for credit deficiencies resulting from course withdrawals or course failures). Students can also go on a mini-term, or earn a practicum credit by taking three terms of the same practicum with a passing grade. For more information, as well as the costs and procedures associated with each option, please click here.

Withdrawal from College: Withdrawal from the College at any time is considered official only upon written notice to the Dean of Students. The withdrawal date is considered the date on which written notification is received. Notification to another office or person, failure to preschedule or confirm registration, nonpayment of the term bill, or a request for a transcript are not considered notice of withdrawal. A student who wishes to withdraw permanently or take a voluntary leave of absence should notify the Dean of Students as far in advance as possible to avoid or reduce financial penalties.

Suspension: Students cannot transfer credits to Union for courses taken at other institutions while under suspension from Union College. This applies to both academic and social suspension.

Readmission: All applications for readmission or return from absence must be made in writing to the Dean of Students, normally at least one month before registration for the term. Readmission becomes official only if or when the admission and security deposit is on hand or has again been paid.

Academic Standing

Academic Ratings: Instructors submit grades at the end of each term. A report of a student's term grades is available to the student at <https://webadvising.union.edu>. Grade reports will only be mailed to the parent or guardian if the student requests one in writing at the Office of the Registrar. No other grade notices will be mailed to the student's home address. The grades of scholarship and their associated quality points are A (4.0), A- (3.7), B+ (3.3), B (3.0), B- (2.7), C+ (2.3), C (2.0), C- (1.7), D (1.0), P (pass), and F (failure). A course in which a student receives the grade of "F" does not count toward graduation. If the course is required to complete a sequence in the major or otherwise required for graduation, a student must repeat this course and obtain a satisfactory mark. Some courses do not carry graduation credit and a few earn double credit.

Academic Good Standing: Union College regards a student to be "in good standing" academically if he or she is permitted to enroll for a subsequent term. To graduate, a student must present an overall cumulative grade point index of at least 1.80 and an index of at least 2.00 in the major.

The Subcouncil on the Academic Standing of Students will review the status of any student whose cumulative grade point index or immediate prior term grade point index falls below 2.00 or of any student for whom other considerations, particularly standing in the major, suggest questions of satisfactory progress toward graduation. If, after such a review, it is felt warranted, the Sub council may adopt one of the following actions:

Academic Warning: The student may remain in college, but unless the record improves, he or she will be subject to subsequent action. (This action is the minimum that will occur if either the cumulative grade point index or the prior term grade point index is below 2.00).

Special Academic Warning: Normally, the student must achieve a 2.00 or better index in the next term to remain in college. To be removed from Special Academic Warning, the student must achieve two consecutive term indexes of 2.00 or higher while carrying a full course load, with at least two graded courses in both terms. If the student's cumulative index is still below 2.00, he or she remains on special academic warning.

Suspension: An exceptionally weak record in a single term or a failure to improve after warning may result in suspension when, in the judgment of the Subcouncil on the Academic Standing of Students, a student's record makes it inadvisable to continue in college. The Subcouncil may recommend a one- or two- term suspension.

Dismissal: In certain cases, the Subcouncil may dismiss a student permanently.

Requests for reconsideration of the Subcouncil's decisions must be submitted in writing to the Subcouncil through the Office of the Dean of Students. Reconsideration will occur only when information not previously available to the Subcouncil is submitted and, in the judgment of the Subcouncil, could have affected its decision. Such reconsideration in no way implies that the Subcouncil will subsequently reverse its original decision. Appeals (as opposed to requests for reconsideration) should be directed to the Dean of the Faculty. Such appeals will be considered only with respect to procedural issues.

Academic Honesty

The College does not tolerate dishonest academic behavior. Any academic work that students represent as their own must be their own. Students must take responsibility to seek advice from faculty members and academic deans if they have questions about what constitutes academic honesty. Students must not resort to plagiarism, theft and mutilation of library books and periodicals, or any other form of academic dishonesty. Any student found guilty of academic dishonesty will be subject to disciplinary action. Procedures regarding charges of academic dishonesty are described in the Faculty Manual. Additional information can be found at: [Union College Academic Honor Code](#) and [Union College Statement on Plagiarism](#)

Transfer Credit Policy

Matriculated Students (Transfer students see "Transfer Students Only" section below)

Credits received prior to matriculation at Union College, including Advanced Placement and International Baccalaureate courses

A matriculating first-year student can transfer in a maximum of six course credits to use towards graduation credit requirements through any combination of Advanced Placement (AP) examinations, the International Baccalaureate Program (IB), or college courses taken at other post-secondary institutions. Credit can be granted for similar high-level examinations from other countries, such as A-level examinations, in consultation with academic departments (references to AP and IB examinations below should be understood to apply to approved examinations from other countries as well.) Students must elect a more advanced course if they study in a department in which credit has been granted. Repetition of work for which credit has been granted will not be permitted. Please refer to department and program pages for specific guidelines. Please note: [Online courses are not eligible for transfer credit.](#)

Students with AP examination scores of three or higher in calculus and four or five in other subject areas may be eligible to receive college course credit. Credit for IB courses may be awarded for higher-level examination scores of six or better; economics will accept a score of five at the higher level. Aside from AP and IB courses, Union College will consider granting credit for a course taken while the student is enrolled in high school only if the course is taken on the campus of the college or university offering the course, the course is available for enrollment by the students of that college or university, and the final grade is a C or better.

Any number of AP, IB or college courses may be used to determine course placement with the approval of the appropriate department chair in each instance. Only one AP, IB or college course may be used to fulfill a HUM, HUL, SOCS, QMR, SCLB, or SET requirement in the Common Curriculum (General Education).

Credits received at other institutions after matriculation at Union College

A student may transfer in a maximum of three course credits for courses taken at other colleges or universities. Permission is granted for such courses to count towards the total number of courses required for graduation only when a student has failed or withdrawn from courses started at Union and as a result is behind in credits after taking into account any "extra" credits such as pre- or post-matriculation transfer credits and credits from practicum, fourth, or summer courses at Union, or Union mini-terms. Students who must miss a term due to substantial medical or personal hardship can, with documentation, request permission through their Class Dean and the Dean of Studies Office to transfer in up to three non-term abroad credits from an outside institution. Students in such hardship situations may only be allowed to complete the equivalent of one Union course credit per academic session depending on the circumstances. Pre-approval will be required, and decisions will be made on a case-by-case basis. Students behind in credits who wish to receive credit for courses taken at other colleges must have those courses approved by the appropriate department chair(s) and by the Dean of Studies. A form for this purpose is available at the Office of the Registrar's forms and guidelines webpage and should be submitted to request approval in advance of taking the relevant courses. Please note: [Online courses are not eligible for transfer credit.](#)

Students who are not behind in credits may wish to enhance their education by taking courses at other colleges, particularly during the summer. Although credit towards the courses required for graduation will not be granted in such circumstances, up to three such courses may be used with the permission of the appropriate department chair(s) and the Dean of Studies to fulfill particular course requirements and to satisfy course prerequisites. Such permission must be obtained in writing and filed with the Registrar's office in advance of taking such courses.

Normally, course work at other colleges will be recognized only if a minimum grade of "C" is achieved. The credit value of a course must be at least three semester-hour credits or five quarter-hour credits to earn one full course credit at Union. Students with 18 or more credits towards graduation may receive degree credit for courses taken at a two-year college only if approved by the Dean of Studies. The grades for course work accepted from other colleges will not be recorded on a student's Union College transcript nor will these grades be factored into a student's cumulative academic average.

Selected graduate courses at Clarkson University - Capital Region Center are open to advanced undergraduates with the approval of the student's advisor. Students matriculated in a five year combined degree program may take up to three graduate level courses as an undergraduate. All other students will be limited to two graduate courses. The first two graduate courses (or three for matriculated combined degree students) that a student takes automatically count towards this limit. No substitutions may be made at a later date. For a list of eligible courses, please refer to the Clarkson University - Capital Region Center's Supplemental Listing, which is available on the Registrar's Office "Course and Exam Schedule" website during prescheduling. If the graduate course is cross-listed with an undergraduate course, Union students must enroll in the undergraduate course. For course descriptions, please consult the course catalog of Clarkson University - Capital Region Center.

For cross-registration at participating colleges of the Hudson-Mohawk consortium, please refer to the relevant heading in this catalog under the "Special Curricular Opportunities" section for rules and restrictions. Students with 18 or more credits toward graduation may not cross-register for courses at a two-year college unless specifically approved by the Dean of Studies.

Transfer Students Only

Transfer students may bring in up to two full years of college course credit and must complete two years of study at Union to qualify for a Union degree. At most, six of these transfer course credits can come from any combination of Advanced Placement (AP) examinations or the International Baccalaureate Program (IB). Refer to the catalog entry on Transfer Credit Policy for Matriculated Students for required courses for AP and IB courses. Characteristics of courses for transfer credit must meet the requirements for transfer credit for all students at Union, including a minimum grade of C, credit for online courses is not given, and courses must have three semester credit hours or five quarter credit hours. Courses without Union equivalents can be transferred at the discretion of the Dean of Studies.

Students who are awarded 15 credits or fewer may, after matriculating at Union, transfer in three additional course credits for courses taken at other institutions to make up for deficiencies: courses for which the student received a grade lower than "C" before matriculation, course withdrawals or failed courses at Union, or pre-matriculation courses that did not transfer because they were not equivalent to a Union course. Students who are awarded 16 credits may transfer in up to two additional credits to make up for deficiencies; those with 17 credits may transfer in one additional credit from another institution to make up for a deficiency. Prior approval for all transfer credits must be obtained from the appropriate department chair and the Dean of Studies. Permission is normally granted only if the student is to make up for a deficiency (as described above or to fulfill Common Curriculum (General Education) or departmental requirements. If the student is not making up for a deficiency transfer credits cannot count toward the total number of credits required for graduation or towards accelerated graduation. Please note: Online courses are not eligible for transfer credit.

Proficiency Examinations

With the approval of the relevant department and notification to the Registrar, proficiency examinations covering the substance of courses listed in this Academic Catalog, except independent study, may be taken by matriculated undergraduate students in good standing at a cost of \$250 for each examination. Credit may be obtained from proficiency examinations to allow for placement out of certain courses, but cannot be used toward accelerated graduation.

Any proficiency examination may be taken only once. It will be graded "pass" or "fail," but failures will not be recorded. In the Department of Modern Languages, credit may normally be earned by proficiency examination only for courses in literature and civilization numbered 300 and above. Students may not take proficiency examinations in subjects in which they have already taken courses at a higher level for credit.

Participation in Graduation

At Commencement, the College is pleased to recognize the accomplishments of students who have nearly completed their graduation requirements. Students who have completed all degree requirements except for one course by the end of spring term may participate fully in the Commencement ceremony, except that they will not receive their diplomas. They will process with the graduating class in alphabetical order and will cross the stage.

Students who are short more than one course but who are within six courses of completing degree requirements by the end of spring term have the option of marching in with their class if they meet all of the following criteria:

1. They have started their fourth year of College,

2. They have earned 27 course credits by the end of winter term,
3. They are signed up for a full course load spring term, and,
4. They will be within six courses of completing their degree by the end of spring term.

This last group of students will march in following their classmates and be seated behind the last group of graduating seniors. **Their names will be read by the Dean of the Faculty after the graduating class has finished crossing the stage. Please note that their names will not appear in the commencement program; however, they will be allowed to cross the stage.**

All students in the Commencement procession are invited, along with their families, to attend the department and program receptions immediately following the ceremony.

Students that complete their studies by the following December 15th, will receive their diplomas by mail provided there are no financial holds on their record.

Academic Honors and Recognition

Dean's List: A student achieves Dean's List standing for an academic year, which is defined as the fall, winter, and spring term, by meeting the following requirements:

1. An academic index of at least 3.50 for the year.
2. Students with first year, sophomore or junior status at the end of the academic year must have a total of nine completed courses, at least eight of which are graded. Students with senior status at the end of the academic year must have completed eight courses, at least seven of which are graded. For seniors graduating early, this rule will be applied to their last three terms at Union College.
3. No grades of "D" or "WF" or "F."

A student who spends part of an academic year at the College may be admitted to the Dean's List by the Dean of Studies if extraordinary circumstances prevent full-time attendance and the academic index for the courses taken is at least 3.50 with no grades of D or F.

Graduation with Distinction: Union College recognizes academic distinction by awarding some degrees summa cum laude, magna cum laude, and cum laude. These Latin honors signify various levels of the graduates' cumulative grade point averages. The faculty has the responsibility and authority for setting the levels necessary to attain the various honors. Standards are summa cum laude (3.80 or better), magna cum laude (3.65 or better), and cum laude (3.50 or better). To be eligible, students must have taken at least eighteen courses toward their undergraduate degree while enrolled at Union.

Departmental Honors: In general, students become eligible for departmental honors provided that they (1) have achieved a cumulative index of 3.3 or better; (2) have an index of 3.3 or better in courses taken in the major with grades of A- or better in at least three such courses, exclusive of the senior thesis; (3) completed their Senior Writing Experience on which a grade not lower than A- has been earned (4) satisfy any other requirements set by the major department, and (5) have taken the final six terms of their program at Union or elsewhere in a study program approved by Union. Students should consult their departments for complete information. In the case of interdepartmental majors, students must satisfy the above for each department, except that for (2), they need to have at least two (not three) grades of A- or better in each department. Interdepartmental majors also must complete independent work of substance and distinction, in the form of a thesis or some other written or documented work on which a grade not lower than A- has been earned, and they must be nominated by both of the major departments. Leadership in Medicine students and double majors may earn departmental honors by fulfilling the requirements listed above in at least one of their majors.

Academic Honor Societies

Alpha Kappa Delta: Omega chapter of New York of Alpha Kappa Delta, the national honor society of sociology, was established at Union in 1979. Juniors and seniors who have done outstanding work in sociology are eligible.

Eta Kappa Nu: Phi chapter of the national honor society of Eta Kappa Nu for electrical engineers was established at Union in 1926. Students of outstanding academic achievement who show admirable qualities of character are invited to become members during their junior and senior years

Eta Sigma Phi: Eta Phi chapter of Eta Sigma Phi, the national honor society for Classics, was established at Union in 2005. Students who demonstrate high achievement in the study of Greek or Latin are eligible for election to full membership.

Nu Rho Psi: Alpha chapter in New York, the national honor society for Neuroscience, was founded in 2006 under the auspice of the Faculty for Undergraduate Neuroscience and through the joint efforts of faculty and students at Baldwin-Wallace College, Baylor University and Johns Hopkins University.

Omicron Delta Epsilon: Alpha Beta chapter of New York of Omicron Delta Epsilon, the international honor society in economics, was established at Union in 1973. Juniors and seniors who have shown outstanding achievement in the study of economics are invited to become members.

Phi Alpha Theta: Alpha Iota Chi chapter of Phi Alpha Theta, the national honor society for history, was established at Union in 2001. Students who have compiled outstanding academic records in history are eligible.

Phi Beta Kappa: Juniors and seniors of academic distinction who are candidates for the B.A. or general B.S. degree are eligible for membership in Phi Beta Kappa. Election is based on scholarship and character, with particular attention given to intellectual maturity and breadth. Union's Phi Beta Kappa chapter, Alpha of New York, was established in 1817 and is the fifth oldest in the country. Election to membership is one of the highest distinctions to be gained by academic achievement.

Pi Mu Epsilon: Alpha Tau chapter in New York, a national undergraduate honors society in mathematics, was established at Union in 2013. Students who have compiled outstanding records in mathematics and who work to promote mathematics are eligible to apply for membership.

Pi Sigma Alpha: The Union chapter of Pi Sigma Alpha, the national honor society in political science, was established in 1974. Students who have compiled outstanding academic records in political science are eligible.

Pi Tau Sigma: Established in 1915, Pi Tau Sigma is the national honorary mechanical engineering fraternity. Juniors and seniors with high academic achievement and character are eligible.

Psi Chi: Psi Chi is the national honor society founded to encourage, stimulate, and maintain scholarship in and advance the science of psychology.

Sigma Delta Pi: Established at Union in 1993, the Tau Mu chapter of Sigma Delta Pi honors juniors and seniors for outstanding achievement in the study of Spanish language and literature.

Sigma Pi Sigma: Founded in 1975, the Union chapter of the national honor society Sigma Pi Sigma recognizes outstanding scholarship in physics.

Sigma Tau Delta: Established at Union in 2009, Sigma Tau Delta is the international English honor society.

Sigma Xi: The Society of Sigma Xi is an honorary organization dedicated to the encouragement of scientific research pure and applied. The Union chapter, the third in the nation, was begun in 1887. Annually, the society elects to associate membership selected students in science or engineering who have demonstrated, usually by a written report, marked aptitude for scientific research. In addition, students and faculty who have demonstrated noteworthy research achievement may be elected.

Tau Beta Pi: Established at Union in 1964, Tau Beta Pi annually elects as members a rigorously-selected group of juniors and seniors who have achieved outstanding records in engineering studies and have demonstrated excellence of character.

College Policy Resources

The Student Handbook and the Faculty Manual are resources, available on the College's web site, that outline College policies, including those regarding academic dishonesty, intellectual property, grades, and use of computing resources.

Students' Rights and Confidentiality of Student Records (FERPA)

One of the goals of a Union College education is to enable students to gain the maturity, independence, and confidence to function as responsible adults. According to New York State law, students who have reached the age of 18 are considered to be adults and are accorded the full rights that such status entails. Because of this, it is the policy of Union College to communicate directly with students on all academic matters, such as grades, academic standing and issues of credit.

The 1974 Family Educational Rights and Privacy Act (FERPA) stipulates that in the case of students who are dependents of their parents in the eyes of the Internal Revenue Service, the College is allowed to disclose information from the student's educational records without obtaining the student's consent. It is the policy of the College to notify both students and parents in writing of formal academic warnings, probationary status and dismissal. Additionally, the College will notify the parents of a student in connection with a health or safety emergency as expressly permitted under FERPA.

In other communications with parents, the College will normally respect the privacy of the student. Information from the student's educational records will not be disclosed without the student's formal written consent. Grades are considered to be part of the student's educational record and will not be disclosed to parents without the student's formal written consent. Upon obtaining such written consent, the College will provide information to parents (or guardians).

All students will be required to declare their tax status at the commencement of each academic year. Any student who claims not to be a legal dependent must provide appropriate evidence to the College in writing within the first month of each academic year.

Student Right-to-Know Act

In compliance with the federal Student Right-to-Know Act requiring institutions of higher education to make available graduation rates, Union has calculated a six-year graduation rate of 86% based on the first-time, first-year student cohort entering in September 2014. This calculation does not include students who have transferred into the College from other institutions. The complete graduation rate report is available on line at <https://www.union.edu/institutional-research/retention> or by contacting the Office of Institutional Research, (518)388-6607.

Academic Support and Services

Academic Affairs

Vice President for Academic Affairs and Dean of the Faculty: Strom Thacker, Feigenbaum Hall, (518) 388-6102

Dean of Academic Departments and Programs: Jennifer Fredricks, Olin Center 210 (518) 388-6233

Dean of Studies: Michele Angrist, Olin Center 210 (518) 388-6234

Director of Academic Planning and Finance: Greta Donato, Feigenbaum Hall, (518) 388-6033

Academic Affairs is responsible for the formulation of educational policy, matters involving the faculty, and all academic related processes. The Academic Affairs Office includes the Dean of the Faculty and Vice President for Academic Affairs, the Dean of Academic Departments and Programs, the Dean of Studies and the Director of Academic Planning and Finance.

The Dean of the Faculty and Vice President for Academic Affairs has responsibility for all Academic Affairs areas, including academic matters related to faculty and students, the curriculum and academic budgeting. Supervisory responsibilities include the College Grants and Sponsored Programs, Institutional Research, International Programs, Learning Technologies and Environments, Registrar's Office, Schaffer Library, the Union College Academy for Lifelong Learning (UCALL), the Director of Assessment, the Director of Diversity, Equity & Inclusion/Chief Diversity Officer, the Director of Engineering and the Director of General Education.

The Dean of Academic Departments and Programs oversees all academic departments and interdisciplinary programs, playing a key role in faculty recruiting, faculty development, curriculum development and advising the Dean of the Faculty and Vice President for Academic Affairs on matters associated with the review and promotion of faculty. Supervisory duties include Common Curriculum (General Education), Interdisciplinary Programs, Faculty Development, the Leadership in Medicine program and department chairs and program directors.

The Dean of Studies has responsibility for the implementation of the Honor Code and has academic policies and has supervisory responsibilities of the Academic Achievement program, Academic Advising, the Academic Opportunity Program, Class Deans, the Health Professions Program, the 3+3 Accelerated Law Program, National Fellowships & Scholarships, the Scholars Program, Undergraduate Research, and the Writing Center.

The Director of Academic Planning and Finance manages academic finances and facilities, supervises the Engineering Machine Lab and supports the Dean of Faculty and Vice President for Academic Affairs, faculty members, administrators and staff within Academic Affairs on various resource matters.

Academic Achievement Office

Director: Kristen Fanfarelli, Olin 101, (518) 388-6493

The office provides academic support for all students at Union to help them reach their full academic potential. A variety of programs are available to assist students in becoming stronger, more independent learners. Supplemental Instruction (SI) provides academic support for some of our traditionally challenging courses by offering optional, collaborative, peer-led study sessions.

Academic Opportunity Program/Higher Education Opportunity Program

Director: Philip Poczik, Olin Center 112, (518) 388-6115
aop@union.edu

The Academic Opportunity Program (AOP) and the Arthur O. Eve Higher Education Opportunity Program (HEOP) have a long and proud tradition of academic excellence, serving students for over fifty years. These talent search programs offer support services to ensure academic success for a select group of students. Services include: an intensive five-week pre-first year summer program; individualized and group tutoring; academic, career, and financial counseling; and a peer mentoring program.

Advising

Dean Michele Angrist, Olin Center 210, (518) 388-6234

Academic advising is central to the mission of a liberal arts college such as Union and is a key faculty responsibility. Union students enjoy a close working relationship with the faculty advisors who encourage and assist their advisees to make informed choices that maximize the benefits of a liberal arts education. First-year students are assigned advisors by the Dean of Studies while upper-class advisors are chosen by the student. Students may request a change of advisor at any time through the Dean of Studies office. Additional information on advising can be obtained on the advising website.

Accommodative Services

Students interested in support services for learning disabilities should refer to "Accommodative Services" in the Student Services section for additional information. Students are also encouraged to consult with the Director of Accommodative Services in the Dean of Students office.

Health Professions Advising

Director of Health Professions Advising: Professor Carol Weisse (Psychology), Olin Center 110, (518) 388-6300

Director of Leadership in Medicine & Combined Health Degree Program: Joanne Fitzgerald, Olin Center 212, (518) 388-6836

The Health Professions Advising Office at Union College is designed to advise students who are planning a career in medicine (including osteopathy, dentistry, podiatry, veterinary medicine, pharmacy, and other health professions such as nursing, PA). In addition to academic advising, advisors works closely with students to help them identify the kinds of experiences on campus and in the community that will foster personal growth and the development of interpersonal skills necessary for a successful career in healthcare delivery.

Professional schools give no preference to any particular major when seeking candidates; therefore, Union College does not offer a "premedical" major. Although many major in the natural sciences, students are encouraged to choose a major in any field in which they are interested. Today more than ever, professional schools are searching for students who have not only mastered the sciences but who also have backgrounds that are well-rounded and diverse. Please consult with the directors on requirements for various professional schools. Most professional schools require students to complete and do well in the following courses:

- Two English courses (satisfied by First-Year Preceptorial and at least one English elective)
- Calculus course (through MTH 102 or MTH 112 or MTH 113)
- Three biology courses (BIO 103 and BIO 104 or BIO 205)

- Four chemistry courses (CHM 101 and CHM 102 or CHM 110H ; CHM 231 and CHM 232)
- Biochemistry course (BIO 335 or BCH 380 or CHM 382)
- Two physics courses (PHY 110 and PHY 111)

Note: Introductory Psychology or Sociology and statistics are also recommended. Some health professions programs (e.g., physical therapy, occupational therapy, nursing) also require additional courses such as Microbiology and Developmental Psychology as well as Human Anatomy and Physiology.

Learning Technologies and Environments

Director of Learning Technologies and Environments: Denise Snyder, Steinmetz Hall 108B, (518) 388-6661

Union College and Information Technology Services make computing resources available to all students. Through Union's G Suite environment, students have access to Google Mail, Calendar and Drive. Wireless network access is available in all buildings on campus in addition to outside wireless access in Library Plaza and the College's outdoor classroom. Union College has partnered with Apogee to provide high-speed internet access through the residential network with 24/7 customer support. There are also many other resources dedicated to assist students. Assistance with hardware and software problems is provided by USTAR, the student-run technical support program providing assistance to students by students. Full-time Help Desk personnel are also available to provide assistance. Additional information including network access, assistance, training, computing policies & forms can be obtained from the Learning Environment website.

Language Center

Director: Audrey Sartiaux; Schaffer Library 217, (518) 388-6216

Reception desk: Schaffer Library 222, (518) 388-8363

The Language Center is open to all students with a valid Union ID. The Center is divided into a main lab/classroom, a collaborative workspace, and a reception/social space. The main lab contains a Smartboard, 10 PC's and USB headsets with microphones. The collaborative workspace area contains 2 iMacs and 2 multi-zone DVD players. Language methods for self-study are available for the languages taught at the college (to be used in the center only). All computers have East Asian, Slavic, and Arabic languages enabled as well as Romance Languages. Language Assistants and Language Mentors (skilled in Chinese, French, German, Japanese, Portuguese, Russian, and Spanish) are available during their office hours to answer questions and to help with practicing your language skills, reviewing vocabulary etc. This is a complimentary service for all Union Students. Conversation Partners are available for students registered in an Intermediate Spanish course (see your syllabus). The center is open during Union College academic terms. Consult the Language Center website for more information (such as opening hours and Mentors hours).

Prelaw Advising

Advisor: Associate Professor Bradley Hays (Political Science), (518) 388-6227

Union College provides prelaw advising to students interested in graduate legal education. As a general rule, law schools do not require a specific major but instead look for academic success in a student's chosen academic discipline. Given the many available academic paths to law school, prelaw advising is inclusive of general curricular and extracurricular guidance, insight into the Law School Admission Test and the application process, and aid in targeting appropriate law schools for admissions.

National Fellowships and Scholarships

Director and Class Dean: Lynn Evans, Old Chapel, 201C, (518) 388-6643

The Office of National Fellowships and Scholarships provides support to students and alumni applying for prestigious, external undergraduate and postgraduate awards. Students are recruited to apply for fellowships and scholarships months before their national deadline. During the recruitment period, the director works closely with students to understand their goals and to match opportunities to their strengths and needs. The office then oversees the application process for the appropriate awards. Union regularly supports students for awards such as the Rhodes Scholarship, the Marshall Scholarship, the Fulbright programs, the Watson Fellowship and many more.

Permanent Collection and Mandeville Gallery

Director and Curator of Art Collections and Exhibitions: Julie Lohnes, Schaffer Library 212, (518) 388-8360

<https://muse.union.edu/mandeville>

The *Union College Permanent (Art) Collection* and *Mandeville Gallery* are responsible for stewarding over 3,100 artworks and items of material culture held in the collection, and for producing contemporary art exhibitions in three campus locations.

The *Union College Permanent Collection (UCPC)* holds significant visual art resources from internationally recognized artists, as well as Eastern and ancient cultures. Our strongest collections consist of contemporary art, historic 19th century scientific instruments, ancient Asian ceramics, fine art prints on paper, and 19th century portrait paintings. Many artworks from the UCPC are installed around campus in departmental buildings, administration offices, and throughout the library, and include informational labels. Images and details of a number of sub-collections can be found on our website.

The Galleries are comprised of the *Mandeville Gallery* on the 2nd floor of the Nott Memorial, the *Wikoff Student Gallery* on the 3rd floor of the Nott, and the *Castrucci Gallery* located in the Peter Irving Wold Center. Additionally, the annual *Art Installation Series*, featured in the library's first floor Learning Commons, is curated and produced by our staff. All exhibitions, as well as our events programming, which includes artist talks, receptions, and demonstrations, are free and open to the campus and the community during academic terms. Information about exhibitions can be found on our website.

The offices are located on the second floor of Schaffer Library in rooms 212, 239 and 241.

Registrar's Office

Silliman Hall, (518) 388-6109
www.union.edu/offices/registrar

The Office of the Registrar is responsible for overseeing the functions of online registration, maintenance of student schedules, creation of each term's course and final exam schedules, creation of the academic calendar, assignment of classrooms, grade entry, Self Service (a new student planning module), rank in class, Dean's List, academic records, certification for graduation, transcript processing, certification of eligibility for veterans' benefits, and the maintenance of the online Academic Catalog. The Registrar's Office also coordinates the reporting of student enrollment status and degree verification to the National Student Clearinghouse, which in turn, reports to the National Student Loan Data System.

Schaffer Library

College Librarian: Frances Maloy, (518) 388-6739
www.union.edu/Library

Schaffer Library provides print and electronic information resources in a comfortable environment for reading, writing and research. The library is open extended hours during the term and 24 hours per day, 7 days per week during exams. The friendly and knowledgeable staff assist students with all phases of their research. The library provides a variety of spaces for quiet study, collaborative learning as well as production areas furnished with both Apple and Windows workstations, software, scanners, printers, and other hardware. The Adirondack Research Library, located 4 miles from campus in the Kelly Adirondack Center, houses an extensive collection on the 20th century wilderness movement in New York State's Adirondack Park. The Special Collections and Archives Department houses rare and unique materials that document the College's history along with rare books and prints available for research upon request. Refer to the Schaffer Library website for additional information.

Undergraduate Research

Director: Associate Professor Heather Watson, Science and Engineering N319, (518) 388-6829

Students are encouraged to explore the many different ways that student-faculty collaborative scholarly activity is promoted at Union. All students complete a Sophomore or Scholars Research Seminar as part of the Common Curriculum. There are generous funds available to students for research opportunities including the Summer Undergraduate Research Fund, which provides funds to students who work on independent projects with a sponsoring faculty member. The Student Research Grant program provides financial support for students for sophomore research project, practicum

and senior thesis/project expenses. In addition, Union annually sends students to professional society meetings and to local and national undergraduate research conferences to present their research results. More than 500 students take part in the annual Steinmetz Symposium, a celebration of student scholarly work, held in early May. Students communicate the results of their scholarly efforts through oral presentations, exhibits, posters, and performances.

Writing Center

Director: Joseph Johnson, Schaffer Library 221, (518) 388-6680

Located in Schaffer Library Rooms 226 & 227, the Writing Center helps Union students with all forms of writing: essays, reports, research papers, theses, personal statements, etc. Trained Union undergraduates are available to help students plan, organize, revise, or edit their writing to improve its structure, style, clarity, or overall effectiveness. Supporting the College's mission to improve students' writing and critical thinking skills, the Writing Center provides assistance to students of all ability levels and within all disciplines. Open Sunday through Thursday, 3-11pm. Closed Friday and Saturday. Make an appointment online at the Writing Center.

Special Curricular Opportunities

Scholars Program

Director: scholarsdirector@union.edu

The Union Scholars Program offers selected students an enriched educational experience. The Admissions Office, in conjunction with the Director of the Scholars Program, selects the candidates for the Scholars Program. Specific features of the Scholars Program are a two-term sequence of honors courses beginning with a special Scholars Preceptorial (FPR 100H) followed by a Research Seminar (SCH 150), which is also taken in the first year; a one term (297H) or two-term (295H-296H) sophomore independent study project (one course credit) with a professor of the student's choosing; and, in the senior year, an optional Scholars Colloquium (SCH 400). To graduate as a Union Scholar a minimum of 38 courses is required. AP, IB and transfer courses which are accepted by Union College (see "Transfer Credit Policy") may be used toward the total number of courses. Union Scholars may take one extra course each term at no extra cost, starting in the winter term of their first year, provided they maintain the minimum 3.40 GPA for the Scholars Program. These courses can be used to accelerate graduation. New opportunities for scholars, such as summer research fellowships, a summer internship, and special classes, are available in selected years. Please note that Seward Interdisciplinary Fellows and NSF-STEM Scholars are also members of the Scholars Program and must adhere to these policies unless an explicit exception is made.

Seward Interdisciplinary Fellows

Director: scholarsdirector@union.edu

The Seward Interdisciplinary Fellows Program gives students an opportunity to join the Union College Scholars Program in their sophomore year and develop their own program of study exploring connections among disciplines. The program is open to students from any discipline who have demonstrated excellence in their first year at Union College. Students apply for the Seward Fellows Program during the fall term of their sophomore year. Applicants must have at least a 3.5 grade point average at the time of application. Seward Fellows are required to design and implement a Seward Organizing Theme minor. Seward Fellows adhere to all requirements and policies of the Union College Scholars Program except that they do not have to take the first year courses associated with the Scholars Program (FPR 100H and SCH 150).

Community-based learning

Community-based learning involves courses and study off campus that have a service learning or civic engagement component. Union College has developed many courses that offer students an opportunity to apply the knowledge they are learning in the classroom beyond Union's campus and in doing so both serve and learn from our community. Opportunities include experiences within the mini-term in New Orleans and the National Health Systems term abroad, along with courses in sociology, economics, modern languages, political science and engineering that have significant

community service components. The Kenney Community Center offers many programs that provide students with community-based opportunities beyond the classroom.

Independent Study

With the approval of a professor, a student who has shown the requisite depth of interest and the necessary intellectual skills may register for an independent study course which will allow the student to research into a specific topic that is not offered through the Union course offering. The precise form of independent study projects varies with the student and the subject; the most common are research projects in the sciences and engineering, and substantial investigative papers of "thesis" caliber in the humanities and social sciences. Appropriate credit is granted for all independent study courses that are successfully completed. Independent study courses cannot be taken Pass/Fail.

Academic Credit for Internships

Director: scholarsdirector@union.edu

Students are eligible to receive academic credit for internship experiences that are substantial in nature (clerical and other types of routine work are not appropriate). Internships that take place within the context of a full-credit course can receive pay from the relevant employer. Internships undertaken outside the context of a full-credit course must be unpaid and should involve a minimum of 100 hours of work experience. Students requesting credit for an internship must apply for credit prior to beginning their internship. Students may receive credit for up to two internship experiences, but the second internship needs to be substantially different in nature from the first in order for credit to be granted. Students looking for help finding an internship should contact the Becker Career Center. Full guidelines and the costs of course credits are available by emailing the Director.

Cross Registration

Hudson-Mohawk Agreement (HMA)

As a member of the Hudson-Mohawk Agreement of Colleges and Universities, Union participates in programs of cross-registration permitting students to take courses at other colleges and universities.

Cross-registrations are subject to several conditions. In general, students are advised to confer with the instructor of the course proposed to be taken, and they must fulfill the prerequisites set by the institution giving the course, including permission of the instructor if that is a normal condition for entering the course. A separate Cross Registration Form (HMA), obtainable on the registrar's website, must be completed for each course. When institutional calendars do not coincide, as will be the case in most instances, the individual student will be responsible for making the necessary accommodations, including food and lodging if the home institution is closed during the course. Cross-registering students will be expected to abide by all regulations, including attendance, parking, honor systems, and the like, at the host institution.

Cross-registrations will be approved only for courses not offered at the home institution; in general, they will be limited to a maximum of half the normal course load in any one term. Further, students must have their academic advisor's permission to cross-register for the course(s) in question. Cross-registration will be permitted only in courses that Union normally would consider for transfer credit. Please note: online courses are not eligible for cross-registration.

Through the agreement, Union students may enroll in Reserve Officer Training Corps programs of the Navy and Air Force at Rensselaer Polytechnic Institute, in Troy, and in the Army ROTC program at Siena College, in Loudonville. The Reserve Officers Training Corps (ROTC) are elective programs for students who desire commissions in the armed forces; ROTC courses do not carry credit toward Union College graduation, although the grades earned through these courses will be recorded on the Union transcript. The objective is to develop professional officers who have varied educational backgrounds in major fields of interest and have the professional knowledge and standard needed for future growth. Such ROTC students may be eligible for scholarships and other benefits available under two- and three-year programs of the several services. Interested students should contact the respective branches of ROTC. Students must work the scheduling of these courses around their course work at Union College.

Members of the agreement, in addition to Union College, are Adirondack Community College, Albany College of Pharmacy, The College of Saint Rose, Clarkson University - Capital Region Center, Empire State College, Hudson Valley Community College, Maria College, Rensselaer Polytechnic Institute, The Sage Colleges, Schenectady County Community College, Siena College, Skidmore College, the State University of New York at Albany, and the State University of New York at Cobleskill.

Students with 18 or more credits toward graduation may not cross-register for courses at a two-year college without permission from the Dean of Studies.

New York Six Liberal Arts Consortium and the Cross Registration Initiative

The New York Six Cross-Registration Initiative was designed to facilitate the availability of selected course offerings for students attending any one of the NY 6 member institutions. A separate Cross Registration Form (NY6), obtainable on the registrar's website, must be completed for each course. The New York Six Liberal Arts Consortium consists of the following colleges, in addition to Union College: Colgate University, Hamilton College, Hobart and William Smith Colleges, Skidmore College, and St. Lawrence University.

More information on the cross registration initiative.

Part-Time Undergraduate Study

Union College allows qualified students to enroll in undergraduate programs of study, on a part-time basis. The majority of these courses are taught by full-time Union College faculty and regularly enroll full-time undergraduate students. Part-time students may register for courses from these departments on a non-degree basis as well. Registration is handled for all part-time students by the Registrar's Office in Silliman Hall.

Members of UCALL and senior citizens aged 65 and over are entitled to audit one course per academic year at no tuition cost with the written permission of the instructor. Courses taken for credit by UCALL members and senior citizens will be charged the normal per course fee.

Students wishing to matriculate in a program on a part-time basis are required to meet with the appropriate department chair. Before registering for their first course, all degree seeking part-time students must complete an application form and submit it to the Registrar's Office along with a non-refundable **\$25 application fee**. Application forms are available from the Registrar's website at <https://www.union.edu/registrar/forms>. Students intending to pursue a degree are allowed to register for up to three courses before a final decision is made on their application. Union employees, their spouses/partners/dependents are allowed to register for up to six courses before a final decision is made on their application.

Degree status is granted on the basis of transcripts from high school and/or previous college work, adequate performance in courses taken at Union College as a non-matriculated student (2.3 minimum grade point average), letters of recommendation, and a written recommendation from the departmental program advisor. Financial aid based on demonstrated need is available to matriculated part-time students. Information, assistance, and application forms for financial aid are available through the Office of Financial Aid in Grant Hall.

College credits earned at other institutions may be transferred for full or partial credit toward a Union degree if the student's advisor and the Dean of Studies certify that they are equivalent to Union's requirements. The credit value of a course must be at least three semester-hour credits or five quarter-hour credits to earn full Union course credit.

Registration for courses normally occurs during the tenth week of the term for part-time students. Course schedules are available online during the sixth week of the term. Students must register in person at the Registrar's Office and should meet with an academic advisor prior to registration. In most instances, the department chair is responsible for advising part-time students. Proof of immunization must be on file at the Health Services Office prior to registration. Continuing, part-time students may register by completing the Part-Time Registration form on our website.

Relatively few courses are offered in the evening, so matriculated part-time students will need to take most of their courses during the daytime in order to complete degree requirements. Most day time courses have restricted enrollments and in some cases, it may be necessary to obtain permission from the academic department offering the course in advance of registration. These courses, referred to as "petition courses," require the student to request a space from the department offering the course during the seventh week of the term preceding the registration period. For more information about deadlines and procedures, please refer to the current course schedule. **Refer to "Costs and Financial Aid" for the cost per course for "part-time and non-degree course fees".**

Part-time students must satisfactorily complete all requirements for their degree within 12 years after matriculating at Union. They are subject to the same program requirements as full-time students. Students intending to graduate by June of the current academic year must submit a letter of intent to the Union College Registrar's Office as per the deadline specified by the office.

Additional information about baccalaureate degree requirements, course descriptions, grading policies, and financial aid may be found elsewhere in this *Academic Catalog*.

Union University

Union College, Albany Medical College, Albany Law School, Albany College of Pharmacy, and the Dudley Observatory of the City of Albany are united and recognized by the New York State Board of Regents as "Union University." The purpose of Union University, created in 1873, is to promote learning and the development of the component institutions in the interest of higher education while retaining and continuing the respective and distinctive organizations, rights, powers, and corporate existence. The President of Union College, David R. Harris, serves as Chancellor of Union University.

Common Curriculum

Director: Professor Mark Walker (History), walkerm@union.edu

The Common Curriculum embodies Union's commitment to build intellectual foundations, explore the liberal arts, and create dynamic connections across boundaries as students discover new interests and contribute to humanity. The courses in the Common Curriculum create the essential foundation of a Union Education in the liberal arts. Through them students begin to find the creative intersections of ideas that contribute to society and touch lives.

Students take at least ten courses in completing the Common Curriculum. Students may satisfy any of the requirements except FPR/FPR-H and SRS/SCH-150 and WAC (Writing Across the Curriculum) with appropriate courses taken on international programs. Courses other than FPR/FPR-H and SRS/SCH-150 may be used to meet the requirements of a major or minor unless specifically prohibited by a particular program or department. Academic policies and administrative procedures for the Common Curriculum can be found in the Common Curriculum Advising Guide located in the Resources Section of the Common Curriculum website. Advisers and students should study the information carefully.

Courses that Build Intellectual Foundations

First-Year Preceptorial (FPR 100) engages students in the exploration of ideas and diverse perspectives through critical reading, thinking, and writing. Note that students in the Scholars Program take Scholars Preceptorial (FPR 100H).

Sophomore Research Seminar (SRS 200) ensures that students have an early hands-on experience thinking and working as an academic researcher. Note that students in the Scholars Program take the Scholars Research Seminar (SCH 150) after the Scholars Preceptorial.

Literature (HUL) expands the moral imagination needed to understand one's self and fellow human beings through literary analysis, interpretation, and reflection. Complete any one course listed in the course schedule as HUL from English (EGL), Modern Literature in Translation (MLT), or another department

Natural Science with Lab (SCLB) changes the way students think about the natural world when students understand the scientific method and put it to work. Complete any one Lab course in Astronomy (AST), Biochemistry (BCH), Biological Sciences (BIO), Chemistry (CHM), Geosciences (GEO), Physics (PHY), certain Psychology courses (PSY 310, PSY 312 , PSY 313, PSY 330, PSY 351) or any courses listed in the course schedule as SCLB.

Quantitative and Mathematical Reasoning (QMR) equips students with unique insights and skills necessary to solve complex problems. Complete any one course from Mathematics (MTH) except MTH 100 or any courses listed in the course schedule as QMR.

Courses that Explore the Liberal Arts

Arts and Humanities (HUM) courses enable students to find themselves and voice in creative expression and exploration of the works of the imagination. Complete any one course in Art History (AAH), Dance (ADA), Music (AMU), Theatre (ATH), Studio Arts (AVA), Classics (CLS), English (EGL), Film Studies (FLM), Gender, Sexuality, and Women's Studies (GSW), Philosophy (PHL), Religious Studies (REL), or courses offered by the Department of Modern Languages and Literatures.

Social Sciences (SOCS) courses confront students with the complexity and challenges of our world by analyzing the societies we create. Complete any one course in Anthropology (ANT), Economics (ECO), Gender, Sexuality, and Women's Studies (GSW), History (HST), Political Science (PSC), Sociology (SOC), or PSY 100.

Science, Engineering, and Technology (SET) introduce students to Union's unique commitment to teaching Science and Engineering as Liberal Arts and examining their impact on our humanity. Complete any one science in Science (with or without lab, including a second SCLB), Engineering, or Computer Science (CSC), certain Psychology courses (PSY 210, PSY 311 , PSY 315 , PSY 410), or any course listed in the course schedule as SET.

Courses that Create Connections across Boundaries

Languages and Cultures (LCC) courses empower students as citizens of a global community to contribute across cultural boundaries and shape our shared future. Complete the LCC requirement in one of these ways:

- **OPTION A Language Sequence:** complete a sequence of two language courses in the same language at the 101 level or higher. PLEASE NOTE: for Latin or Greek, you must complete LAT 102 and LAT 103 or GRK 102 and GRK 103 ; LAT 101 and GRK 101 do not count for LCC language sequence credit.
- **OPTION B: Cultural Analysis Sequence:** complete any two non-language courses at Union that carry the LCC code.
- **OPTION C Study Abroad:** complete a full term abroad that deals with a cultural tradition outside of the US. This satisfies both courses of the LCC requirement. Complete a mini-term that deals with a cultural tradition outside of the US. This satisfies one course of the LCC requirement. If the mini-term is associated with approved pre-departure and/or post-return coursework equivalent to a 1.0 academic credit course it satisfies the two-course LCC requirement.

Writing Across the Curriculum

The Writing Across the Curriculum (WAC) program is designed to promote the development of students' writing and critical thinking skills. Every student will have opportunities to improve these skills by completing the following requirements:

1. First-Year Preceptorial
2. Sophomore Research Seminar
3. Five courses from at least two different academic divisions (refer to "Divisions" below) that have been certified as WAC courses
4. A Senior Writing Experience such as a senior thesis or a senior seminar paper.

The First-Year Preceptorial and Sophomore Research Seminar, required of all students, focus on developing critical reading, analytic writing, and research skills. The WAC courses that fulfill the second requirement fall within the normal disciplinary offerings and provide students with feedback on their writing while incorporating writing as an important and clearly evaluated part of the coursework.

Courses currently certified by the College Writing Board as meeting WAC requirements are listed in the course schedule posted on-line each term. As courses and course syllabi frequently change, additional courses are certified each year by the College Writing Board and the roster of WAC courses changes over time.

The form of the senior writing experience that meets the third requirement is determined by the Writing Board and the student's major department(s). In most departments, this requirement is fulfilled by completing a thesis, another research project, or a senior seminar. Courses that satisfy this requirement are designated as WS courses.

WAC: course certified by the Writing Board

WS: fulfills senior writing requirement

WAC/S: fulfills WAC or Senior Writing

Divisions

Departments of instruction are grouped into divisions as follows. For courses in interdisciplinary programs not listed below, students should consult with their advisor or with the Director of Interdisciplinary Studies.

Arts and Humanities (Division I)

Classics

English

Film Studies

Modern Languages and Literatures

Music
Philosophy
Religious Studies
Theater and Dance
Visual Arts

Social Sciences (Division II)

Africana Studies
Anthropology
Economics
History
Political Science
Sociology

Science and Mathematics (Division III)

Biochemistry
Biological Sciences
Chemistry
Geosciences
Mathematics
Neuroscience
Physics and Astronomy
Psychology*

Engineering and Computer Science (Division IV)

Computer Science
Electrical, Computer and Biomedical Engineering
Mechanical Engineering

* Beginning in 2018-19, courses in the Psychology Department will count in Division III for the requirement that students have WAC courses from at least two division.

Degrees Offered

Degree Program	Degrees	HEGIS
Africana Studies	B.A.	0305
American Studies	B.A.	0313
Anthropology	B.A.	2202
Asian Studies	B.A.	0301
Astronomy	B.A.	1911
Biochemistry	B.S.	0414
Biomedical Engineering	B.S.	0905
Biology	B.S.	0401
Chemistry	B.S.	1905
Chinese Studies	B.A.	1107

Classics	B.A.	1504
Computer Engineering	B.S.	0909
Computer Science	B.S.	0701
Economics	B.A.	2204
Electrical Engineering	B.S.	0909
English	B.A.	1501
Environmental Policy	B.A.	1999.10
Environmental Science	B.S.	1999.20
French and Francophone Studies	B.A.	1102

Visual Arts	B.A.	1001

Joint Programs in Conjunction with Other Institutions

Eight-Year Leadership in Medicine B.S. 0499

- Health Management or Clinical Leadership in Health Care Management (with Albany Medical College and Clarkson University - Capital Region Campus)

Majors, Minors, and Other Programs

Departments and interdisciplinary programs are described below in alphabetical order. Please refer to the detailed sections on each area of study for more information. Requirements to fulfill a major or minor appear within each program or area of study.

Africana Studies

Director: L. Marso (Political Science)

Faculty: K. Aslakson (History), D. Hill Butler (Sociology), L. Cox (Visual Arts), R. Hislope (Political Science), K. Lynes (English), D. Mosquera (Modern Languages and Literatures), M. Moutillet (Theater and Dance), C. Ndiaye (Modern Languages), T. Olsen (Music), B. Peterson (History), R. Reed (Library)

Africana Studies offers a full major, an interdepartmental major and a minor involving the study of interdisciplinary connections of the history, culture, intellectual heritage, and political and social contexts of people of African descent. The program features a variety of approaches to intellectual, creative, and practical interests, and draws upon the arts, humanities, and social and behavioral sciences.

Africana Studies Approved Courses

For the Major, Minor, and ID Major, completing AFR 100 before taking junior-level classes is strongly recommended, although the introductory course can be completed up to senior year in consultation with and after formal approval from the program director.

Division 1: Arts & Humanities

Art History

- AAH 163 - Latin American and Caribbean Art of the 19th and 20th Century

Classics

- CLS 110 - Ancient Egypt: History and Religion

English

- EGL 233 - African-American Literature: Beginnings to 1900
- EGL 237 - Reclamation & Renaissance: Black Literary Arts 1900 to 1968, "Dark Like Me - That is my Dream!"
- EGL 248 - Introduction to Black Poetry

- EGL 266 - Black Women Writers
Note: A student must take EGL 100 ; EGL 101 ; or EGL 102 as a prerequisite for any 200-level course in the English Department. A student must take two 200-level courses before enrolling in a 300-level course and four 200-level courses before enrolling in a 400-level course.
Note: Junior and Senior Seminars: Not listed here because topics vary year to year, but in order to earn Africana Studies credit, the topic must cover Africana topics, such as Black Nature Writing, writers of the Harlem Renaissance, and others.

Modern Languages and Literatures

- FRN 304 - Studies in the French Caribbean
- FRN 307 - Negritude Movement: Point of Departure in Black African and Afro-Caribbean Literatures in French
- FRN 431 - Voices of Francophone Literature from French-Speaking Countries and Territories other than France
- MLT 213 - West African Oral Literature
- MLT 284 - Popular Religion and Politics in Latin America
- SPN 332 - An Introduction to Afro-Hispanic Literatures and Cultures
- SPN 431 - Latin America in Colonial Times
- SPN 432 - Islands Adrift: Race, Politics, and Diasporas in the Hispanic Caribbean
- SPN 433 - Latin American Colonial Crossroads at the Movies

Music

- AMU 131 - Music of Black America
- AMU 132 - The History of Jazz
- AMU 133 - Music of Latin America
- AMU 134 - Music and Culture of Africa
- AMU 235 - Latin Percussion Workshop

Theater and Dance

- ADA 140 - American Musical Theatre and Dance
- ADA 142 - Dance in America

Division 2: Social Sciences

Anthropology

- ANT 181 - Anthropology of Sub-Saharan Africa

History

- HST 108 - Africa since 1800
- HST 131 - African-American History 1
- HST 132 - African-American History 2
- HST 172 - Reform and Revolution in Latin America and the Caribbean
- HST 173 - History of the Caribbean and Central America
- HST 201 - Contemporary Africa
- HST 209 - Race, Gender, and Nationalism in American Sports
- HST 231 - The Civil Rights Movement

- HST 232 - History of New Orleans
- HST 257 - Modern France and Its Empire
- HST 272 - History of Brazil
- HST 274 - Social and Political Movements in Latin America
- HST 302 - Comparing Muslim Cultures
- HST 304 - Cold War in Africa
- HST 315 - Race and Constitution
- HST 323 - Race and Revolution
- HST 324 - Race in American Memory
- HST 401 - Seminar in Africa/Middle East
- HST 402 - Seminar in Africa/Middle East: French Empire
- HST 412 - Seminar in US History: The Old South

Political Science

- PSC 216 - Politics in Africa
- PSC 235 - African American Political Thought
- PSC 284 - Political Sociology

Sociology

- SOC 212 - The American Family and Cross-Cultural Perspectives
- SOC 230 - Sociology of the Black Community
- SOC 233 - Race, Class, Gender, and Sexuality
- SOC 240 - Political Sociology
- SOC 387T - Community Service Miniterm

Division 3: Sciences and Mathematics

Psychology

- PSY 260 - Culture and Psychology

Africana Studies, B.A.

Requirements for the Major

Twelve Courses including:

- AFR 100 - Introduction to Africana Studies
- AFR 498 - Africana Studies Senior Thesis 1
- AFR 499 - Africana Studies Senior Thesis 2

• Nine courses selected from the Africana Studies Associated Course list offered in a variety of departments and crossing at least two of the College's three divisions.

Requirements for Honors in Africana Studies:

Candidates for honors must meet College requirements, have a cumulative grade point average of 3.3 in Africana Studies, at least three "A" or "A-minus" grades in Africana Studies courses, and have earned an "A" or "A-minus" on the senior thesis. Departmental honors are formally awarded at the discretion of the director of Africana Studies in consultation with Africana Studies faculty.

Africana Studies (ID), B.A.

Requirements for the Interdepartmental Major:

Eight courses including:

- AFR 100 - Introduction to Africana Studies

Two-term thesis which includes Africana Studies in conjunction with other departmental major:

- IDM 498 - Interdepartmental Senior Thesis 1
- IDM 499 - Interdepartmental Senior Thesis 2

Six courses selected from the Africana Studies Associated Courses list from crossing at least two of the college's three divisions

Two-term senior thesis that examines issues prominent in Africana Studies.

Africana Studies Minor

Requirements for the Minor:

Six courses including:

- AFR 100 - Introduction to Africana Studies

Five courses selected from the Africana Studies Associated Course list offered in a variety of departments and crossing at least two of the college's three divisions

American Studies

Director: Professor Lori Marso (Political Science)

Faculty: Professors B. Lewis, Stephen Schmidt (Economics), J. Murphy, J. Smith (English), A. Feffer (History), W. Garcia (Modern Language and Literature), J. Matsue, T. Olsen (Music), C. Brown, Z. Oxley (Political Science), D. Cotter, M. Goldner (Sociology); Associate Professors R. Samet (Anthropology), K. Lynes, J. Troxell, B. Tuon (English), K. Aslakson, A. Foroughi, A. Morris (History), B. Hays (Political Science), D. Butler, T. Stablein (Sociology), L. Cox (Visual Arts); Senior Lecturer: T. Lobe (Political Science)

American Studies is an interdisciplinary field of concentration in the liberal arts relating to the United States as a geographical area and a cultural and political space. Drawing on courses from fourteen departments, students learn to move among and connect history, art, politics, religion, popular culture, literature and other features of American life. Students are encouraged to explore the diverse character of the American experience, shaped by gender, race, class, sexuality, geography and ethnicity, and to situate that experience in a context of global economic, cultural and political relationships. Students are asked, however, to develop a coherent approach to the study of American culture, politics and society, past and present. To accomplish these tasks, students in the American Studies program collaborate closely with an academic advisor to work out a thematic core around which to build a unique and innovative course of study that knits together the methods and perspectives of several disciplines. Themes may be

centered on a specific era (e.g., antebellum America or the United States since the Cold War) or a topic (e.g., the emergence of mass culture or ethnicity and race in American life).

The American Studies program offers an individualized program of study that allows each student to tailor his or her course work to personal interests and needs. There is no one way to complete the major or minor. A student is urged to meet with the Program Director as soon as he or she becomes interested in the program, preferably by the end of the sophomore year. Course planning forms can be found at the American Studies website.

American Studies Approved Courses

The following courses, from fourteen different departments, have American Studies approval to count towards the major, ID major, and minor. Descriptions of the courses can be found in the Academic Register under the respective departments that offer them. Those marked with an asterisk (*) are American Studies approved courses that meet the race and ethnicity or gender requirement. Those marked with a pound sign (#) are American Studies approved courses that meet the pre-1900 requirement. Note that some American Studies approved courses require prerequisites, which can be found under the department course descriptions. New courses not listed may be granted American Studies approval as determined by the Program Director. All courses counted towards the major or minor must have American Studies course approval.

Course Selection Guidelines: A student must meet with his or her American Studies academic advisor prior to registration. It should be noted that some courses, notably in English and Economics, require prerequisites, so a student needs to make plans early in his or her studies to complete these planning to take an upper-level course in these departments. A student must consult with the American Studies Program Director and the Registrar for approval of AP or IB credits for the major.

Division I Arts and Humanities Courses

Art History

- AAH 160 - Art and Architecture of the United States #
- AAH 208 - The Business of Visual Art and Contemporary Entrepreneurship
- AAH 222 - History of Photography
- AAH 265 - Environmentalism and Globalization in Contemporary Art
- AAH 360 - Seminar: Visual Culture, Race and Gender *
- AAH 363 - Early American Modernism, 1900-1945
- AAH 366 - From Pollock to Post-Modern: European and American Art 1940-2000

Classics

- CLS 151 - The Ancient World in Film and Literature

English

Note: A student must take EGL 100 , EGL 101 , or EGL 102 as a prerequisite for any 200-level course in the English Department. A student must take two 200-level courses before enrolling in a 300-level course and four 200-level courses before enrolling in a 400-level course.

- EGL 213 - American Literature in Historical Context: Beginnings to 1800 #
- EGL 230 - Seduction in Early American Republic *#
- EGL 231 - Nineteenth-Century American Literature #
- EGL 232 - The American Renaissance #
- EGL 233 - African-American Literature: Beginnings to 1900 *#
- EGL 236 - American Realism and Naturalism #
- EGL 237 - Reclamation & Renaissance: Black Literary Arts 1900 to 1968, "Dark Like Me - That is my Dream!" *

- EGL 246 - Modern Poetry
- EGL 248 - Introduction to Black Poetry *
- EGL 249 - Contemporary Poetry
- EGL 250 - The Beats and Contemporary Culture
- EGL 253 - Narratives of Haunting in US Ethnic Literature *
- EGL 254 - Discourses on the Viet Nam War *
- EGL 255 - Asian American Literature and Film *
- EGL 256 - Southeast Asian-American Experience
- EGL 266 - Black Women Writers *
- EGL 275 - Autobiography
- EGL 278 - Science Fiction
- EGL 279 - Literature and Science
- EGL 280 - Nature and Environmental Writing
- EGL 281 - Environmental Psychology and the American Literary Landscape #
- EGL 288 - Film as Fictive Art: American Independent Cinema
- EGL 289 - Studies in a Major Film Director
- EGL 290 - Studies in Film Genre/Style: Documentary
- EGL 293 - Workshop in Poetry

Music

- AMU 130 - American Music
- AMU 131 - Music of Black America *
- AMU 132 - The History of Jazz *
- AMU 221 - From Rhythm and Blues to Radiohead: The History of Rock & Roll
- AMU 230 - Musical Theater & Opera Scenes Workshop

Modern Languages

- MLT 203 - Asian American Film and Performance *
- MLT 289 - Literature of the Mexican-American Border *
- MLT 293 - Made in New York: Puerto Rican and Dominican Transnational Identities in American Literature & Cinema *
- SPN 352 - Imagining Latinx Identities *
- SPN 406 - Film of the Mexican American Border *

Philosophy

- PHL 341 - The Contemporary Crisis of Truth

Theater & Dance

- ADA 140 - American Musical Theatre and Dance
- ATH 140 - American Musical Theatre and Dance
- ADA 142 - Dance in America

Division II Social Science Courses

Africana Studies

- AFR 100 - Introduction to Africana Studies

Anthropology

- ANT 210 - The Anthropology of Poverty
- ANT 237 - Gangs and Youth Violence
- ANT 245 - Sport, Society, and Culture

Economics

Note: Students must take ECO 101 as a prerequisite for any 200 level or above course in the Economics Department.

- ECO 225 - Economics of Sin
- ECO 226 - Financial Markets
- ECO 231 - Urban Redevelopment
- ECO 237 - Women, Men, Work and Family *
- ECO 339 - Public Finance
- ECO 344 - Economics of Education
- ECO 355 - Monetary Economics
- ECO 374 - Sports Economics
- ECO 387 - Seminar in Labor

Gender, Sexuality, and Women's Studies

Note: The following GSW courses must be approved annually by the American Studies Program Director.

- GSW 100 - Introduction to LGBTQ+ Studies *
- GSW 495 - Capstone Course on Theories of Gender, Sexuality, and Women

History

- HST 101 - History of the United States to the Civil War #
- HST 102 - History of the United States Since the Civil War
- HST 113 - The Origins of American Society #
- HST 114 - The American Revolution #
- HST 116 - Age of Jackson #
- HST 118 - Civil War and Reconstruction #
- HST 120 - The Emergence of Modern America, 1877-1918
- HST 121 - The Depression and New Deal
- HST 123 - Postwar America and the Origins of the Cold War
- HST 124 - Monuments, Museums, and Movies: Introduction to Public History
- HST 125 - Coming Apart?: America in the Sixties *
- HST 126 - Since Yesterday: United States History, 1974-2000 *
- HST 128 - The American Jewish Experience *
- HST 129 - History of Sports in America
- HST 131 - African-American History 1 * #
- HST 132 - African-American History 2 *
- HST 135 - Latinos In/As U.S. History *

- HST 209 - Race, Gender, and Nationalism in American Sports *
- HST 211 - American Indian History * #
- HST 212 - "Remember the Ladies": American Women to 1900 * #
- HST 213 - The New Woman: American Women from 1900 *
- HST 216 - The Writing and Ratification of the Constitution #
- HST 221 - Popular Culture and American History
- HST 222 - Other Voices: Women in the History of American Ideas *
- HST 223 - Twentieth Century American Intellectual History
- HST 225 - American Environmental History
- HST 226 - A Novel View of US History
- HST 227 - Interviews with History: An Introduction to Oral History
- HST 228 - History of Union College
- HST 229 - The Adirondacks and American Environmental History
- HST 231 - The Civil Rights Movement *
- HST 232 - History of New Orleans
- HST 289 - Global Indians: South Asian Identity in the United States *
- HST 310 - Special Topics in United States History
- HST 312 - "Bonds of Womanhood": History of Women's Rights in the United States *
- HST 315 - Race and Constitution *
- HST 322 - Slavery and Freedom * #
- HST 323 - Race and Revolution * #
- HST 324 - Race in American Memory *
- HST 325 - War in American Memory
- HST 331 - Representing America: United States History in Film
- HST 224 - Transnational America
- HST 333 - Hollywood Film
- HST 336 - The Roosevelt Era
- HST 411 - Seminar in US History: History of New York City
- HST 412 - Seminar in US History: The Old South
- HST 413 - Seminar in US History: Disasters in American History
- HST 414 - Seminar in US History: Lincoln: Politician to Pop Icon #

Political Science

- PSC 111 - Introduction to US Politics
- PSC 160 - Presidential Elections
- PSC 235 - African American Political Thought *
- PSC 237 - Music and Politics
- PSC 239 - American Political Thought To World War I #
- PSC 240 - Comparative Ethnic and Racial Politics *
- PSC 246 - Asian Development: Industrialization Beyond the West
- PSC 251 - American Foreign Policy
- PSC 260 - Policy Making and American Society
- PSC 261 - Public Opinion
- PSC 264 - Congressional Politics
- PSC 266 - Women and Politics *
- PSC 268 - Electoral Politics
- PSC 269 - Media and Politics
- PSC 270 - CIA and the Art of Intelligence
- PSC 272 - The Environment, Energy, and US Politics
- PSC 273 - The Supreme Court and Judicial Politics

- PSC 277 - Capital Region Political Internships
- PSC 280T - Washington, DC Internship Program
- PSC 281 - Issues in American Education
- PSC 282 - Health Politics and Policy
- PSC 283 - Social Movements, the Environment and Society
- PSC 284 - Political Sociology
- PSC 286 - The Modern Presidency
- PSC 287 - The Contemporary Presidency
- PSC 289T - New Hampshire Primary Mini-Term
- PSC 333 - Twenty-First Century American Political Thought *
- PSC 340 - Politics and Film
- PSC 355 - Defense Policy
- PSC 364 - Law and Film
- PSC 365 - Law, Society, and the Wire
- PSC 369 - Seminar: US Politics
- PSC 370 - Constitutional Law
- PSC 371 - Civil Rights and Civil Liberties
- PSC 434 - Feminist Film *

Sociology

- SOC 212 - The American Family and Cross-Cultural Perspectives
- SOC 222 - Schools and Societies
- SOC 223 - Sociology of Religion
- SOC 224 - Sociology of Community
- SOC 230 - Sociology of the Black Community *
- SOC 231 - Sex and Gender in American Society *
- SOC 233 - Race, Class, Gender, and Sexuality *
- SOC 240 - Political Sociology
- SOC 270 - Social Movements, the Environment, and Society
- SOC 284 - Sociology of Women & Health *
- SOC 290 - Personality, Media, and Society
- SOC 314 - America's War on Drugs: Culture, Conflict, & Social Policy
- SOC 340 - Inequality and Mobility: From Penthouse to Poorhouse
- SOC 346 - Sociology of Black Women's Culture *
- SOC 364 - Sex and Motherhood *
- SOC 387T - Community Service Miniterm

American Studies, B.A.

Requirements for the Major:

Thirteen courses including:

Note: One of the thirteen courses must cover issues of race and ethnicity or gender in America. One of the thirteen courses must focus predominantly on the pre-1900 time period. At least four of the thirteen courses must be from Division I (Arts and Humanities), and at least four from Division II (Social Sciences.) No course can double towards the student's minor if one is being pursued.

Three core courses

Note: At least one core course must be from English and one from History), which should be completed by the end of a student's junior year. The choices for core courses are any 200-level English class on American Literature (must take a 100-level class as prerequisite) and the following:

- HST 101 - History of the United States to the Civil War
- HST 102 - History of the United States Since the Civil War
- HST 113 - The Origins of American Society
- HST 124 - Monuments, Museums, and Movies: Introduction to Public History
- HST 128 - The American Jewish Experience
- HST 129 - History of Sports in America
- HST 131 - African-American History 1
- HST 132 - African-American History 2
- HST 135 - Latinos In/As U.S. History
- HST 209 - Race, Gender, and Nationalism in American Sports
- HST 211 - American Indian History
- HST 212 - "Remember the Ladies": American Women to 1900
- HST 213 - The New Woman: American Women from 1900
- HST 226 - A Novel View of US History

Five courses of intensive study around a specific theme centered on either an era (see Thematic Concentration)

Note: One of the five theme courses must come from Division I (Arts and Humanities) and one from Division II (Social Sciences).

One American Studies approved seminar or an upper level American Studies approved course that is a WAC in the junior year.

Note: If possible, the course should be related to the student's thematic concentration. If not taken in the junior year, this course must be completed by the end of the student's first senior thesis term.

Two American Studies approved courses, which can be at any level and may be outside the student's thematic concentration.

Two-term written thesis or two-term senior project related to his or her thematic concentration in the senior year.

Note: If a student is completing a senior project in a non-text medium (such as audio, video, or multi-media), he or she must have a written component in the form of a journal that results in a final paper of at least fifteen pages, to fulfill the Writing Across the Curriculum (WS) requirement. A student will work with a primary, or first, thesis advisor and a second thesis advisor from a different department whom the student must consult early during the research portion of the project to better ensure the interdisciplinary focus of the thesis. Both thesis advisors will participate in the oral defense of the thesis at the completion of the project. A student must consult with the American Studies program director during the winter term of his or her junior year and submit a thesis proposal listing preferred first and second thesis advisors.

Thematic Concentration

In consultation with his or her American Studies academic advisor, a student must complete five (5) courses of intensive study around a specific theme centered on either an era (such as antebellum America or the United States since the Cold War) or a topic (such as the emergence of mass culture or ethnicity and race in American life).

One of the five theme courses must come from Division I (Arts and Humanities) and one from Division II (Social Sciences). In addition, the thematic courses must come from at least three different departments. Every student must complete an American Studies course selection list with his or her American Studies advisor to determine which courses would best fit the chosen theme and to find out how often the courses are offered. All courses counted towards the major must have American Studies course approval.

The following are possible thematic concentrations for an American Studies major, interdepartmental major or minor (these are only suggestions; there are many more possibilities): The Colonial Era; The American Revolution through the Civil War; 19th Century America; Contemporary America: c. 1960-present; Latino(as) in U.S. History & Culture; Comparative American Ethnic Studies; America in the World; American Identity: Race, Class & Gender; American Modernism; American Creativity in the 20th-21st Century; Progressive America: Civil Rights and Social Justice; American Industrialization: The Environment, Society and Labor; American Media & Popular Culture; Visual Culture and Social Justice. See program website for a list of additional possible themes and supporting courses.

A concentration on 19th Century America might include:

- AMU 130 - American Music
- EGL 232 - The American Renaissance
- HST 118 - Civil War and Reconstruction
- PHL 341 - The Contemporary Crisis of Truth
- PSC 239 - American Political Thought To World War I

Or a thematic concentration on progressive America; civil rights and social justice might include:

- AAH 360 - Seminar: Visual Culture, Race and Gender
- EGL 248 - Introduction to Black Poetry
- HST 231 - The Civil Rights Movement
- HST 312 - "Bonds of Womanhood": History of Women's Rights in the United States
- PSC 266 - Women and Politics
- PSC 371 - Civil Rights and Civil Liberties
- SOC 270 - Social Movements, the Environment, and Society

Additional Requirements

During the junior year, a student must take an American Studies approved seminar or an upper level American Studies approved course that is a WAC. If possible, the course should be related to the student's thematic concentration. If not taken in the junior year, this course must be completed by the end of the student's first senior thesis term.

A student must take an additional two (2) American Studies approved courses, which can be at any level and may be outside the student's thematic concentration.

One of the thirteen (13) courses must cover issues of race and ethnicity or gender in America. One of the thirteen (13) courses must focus predominantly on the pre-1900 time period. At least four (4) of the 13 courses must be from Division I (Arts and Humanities), and at least four (4) from Division II (Social Sciences). No course can double towards the student's minor if one is being pursued.

During the senior year, a student must complete a two-term written thesis or two-term senior project (AMS 498 & AMS 499) related to his or her thematic concentration. If a student is completing a senior project in a non-text medium (such as audio, video, or multi-media), he or she must have a written component in the form of a journal that results in a final paper of at least fifteen pages, to fulfill the Writing Across the Curriculum (WS) requirement. A student will work with a primary, or first, thesis advisor and a second thesis advisor from a different department whom the student must consult early during the research portion of the project to better ensure the interdisciplinary focus of the thesis. Both thesis advisors will participate in the oral defense of the thesis at the completion of the project. A student must consult with the American Studies program director during the winter term of his or her junior year and submit a thesis proposal listing preferred first and second thesis advisors.

Requirements for Honors in American Studies:

To receive honors as an American Studies major or an ID major, a student must (1) have a cumulative grade point average of 3.3; (2) maintain a grade point average of 3.3 in his or her American Studies approved courses; (3) successfully complete a two term senior thesis with a grade of A or A-; (4) receive a high pass or pass with distinction for the oral thesis defense; (5) give an oral presentation at The Steinmetz Symposium in the spring of his or her senior year; and (6) place a copy of the thesis in the library archives. Further guidelines for the senior thesis and honors are available from the program director.

American Studies (ID), B.A.

The purpose of the American Studies Interdepartmental major is to allow students the opportunity to cultivate a multi-dimensional picture of our culture as a complement to or in relation to another area of concentration, be it Middle Eastern history or an area of interest outside the humanities and social sciences. As with the full American Studies major, interdepartmental majors must focus their coursework around a coherent topic, either chronologically or thematically. (See possible concentrations under requirements for major.)

Requirements for the Interdepartmental Major:

Eight courses including:

Note: One of the eight courses must cover issues of race and ethnicity or gender in America. One of the eight courses must focus predominantly on the pre-1900 time period. At least three courses must be from Division I (Arts and Humanities), and at least three from Division II (Social Sciences). The eight required courses must be from at least three different departments and have American Studies course approval. No course can double count towards the student's minor if one is being pursued.

One English core course

One History core course

Four courses with either an historic or thematic concentration, in consultation with their American Studies academic adviser.

Note: One of the four must come from Division I (Arts & Humanities) and one from Division II (Social Sciences).

One American Studies approved seminar or an upper level American Studies approved course that is a WAC in the junior year.

Note: If possible, the course should be on a topic related to the thematic concentration. If not taken in the junior year, this course must be completed by the end of the student's first senior thesis term.

Two-term written thesis or two-term senior project related to the student's thematic concentration, or a WAC (WS) course with American Studies approval, in the senior year.

Note: The ID thesis should combine work on the student's American Studies theme with work in the other ID program or department. If a student is completing a senior project in a non-text medium (such as audio, video, or multi-media), he or she must have a written component in the form of a journal that results in a final paper of at least fifteen pages, to fulfill the Writing Across the Curriculum (WS) requirement. A student will work with a primary, or first, thesis advisor and a second thesis advisor from a different department whom the student must consult early during the research portion of the project to better ensure the interdisciplinary focus of the thesis. Both thesis advisors will participate in the oral defense of the thesis at the completion of the project. The other department or program may also assign the student a thesis advisor. A student must consult with the American Studies program director during the winter term of his or her junior year and submit a thesis proposal listing preferred first and second thesis advisors.

- AMS 498 - American Studies Senior Thesis 1
- AMS 499 - American Studies Senior Thesis 2
- IDM 498 - Interdepartmental Senior Thesis 1

- IDM 499 - Interdepartmental Senior Thesis 2

Requirements for Honors in American Studies:

To receive honors as an American Studies major or an ID major, a student must (1) have a cumulative grade point average of 3.3; (2) maintain a grade point average of 3.3 in his or her American Studies approved courses; (3) successfully complete a two term senior thesis with a grade of A or A-; (4) receive a high pass or pass with distinction for the oral thesis defense; (5) give an oral presentation at The Steinmetz Symposium in the spring of his or her senior year; and (6) place a copy of the thesis in the library archives. Further guidelines for the senior thesis and honors are available from the program director.

American Studies Minor

Requirements for the Minor:

Six courses including:

One English core course

One History core course

Four courses with either an historic or thematic concentration, in consultation with their American Studies academic adviser.

Note: These courses must have either a historic or thematic concentration (see possible concentrations under requirements for major). One of the four must come from Division I (Arts & Humanities) and one from Division II (Social Sciences). One course must cover issues of race and ethnicity or gender in America. No course for the minor can double count towards a student's major or second minor.

Anthropology

Chair: K. Brison

Faculty: Professors K. Brison, G. Gmelch (on leave fall, spring 2021-22), S. Gmelch (on leave winter, spring 2021-22), S. Leavitt; Associate Professors; R. Samet, J. Witsoe; Assistant Professor A. Khan.

Staff: L. Pelish (Administrative Assistant)

Anthropology, B.A.

Requirements for the Major:

We strongly encourage majors to go on a full term abroad, preferably one of the anthropology field terms.

Twelve courses, including the following four foundation courses:

- ANT 110 - Introduction to Cultural Anthropology
- ANT 214 - Language and Culture
- ANT 390 - Thinking about Culture
- ANT 363 - Research Methods and Design

A two-term senior thesis in Cultural Anthropology:

- ANT 498 - Anthropology Senior Thesis 1
- ANT 499 - Anthropology Senior Thesis 2

Six Elective Anthropology Courses

Requirements for Honors in Anthropology:

For departmental honors, a major must fulfill the following requirements: (1) a minimum overall G.P.A. of 3.50; (2) a minimum G.P.A. of 3.70 in all anthropology courses; (3) completion of all requirements for the anthropology major or interdepartmental major; (4) A or A- grades in at least 5 anthropology courses.

Course Selection Guidelines:

The department accepts appropriate AP and transfer credits as electives or in place of ANT 110 . In most cases we prefer that students take other required anthropology courses at Union. Students with no previous background in anthropology may take any 100 or 200 level courses, although ANT 110 is a good first course; 200 level courses generally involve more intensive examination of a particular topic while 100 level courses offer more general surveys of particular sub-fields of anthropology. Students intending to major in anthropology should take ANT 214 and ANT 390 in their sophomore or junior year. Students undertaking an ID major in anthropology should take ANT 390 in their sophomore or junior year. ANT 363 should normally be taken in the spring of the junior year; students anticipating going on a term abroad in spring are strongly encouraged to take ANT 363 in their sophomore year. We strongly encourage students to go on a full term abroad, preferably one of the two anthropology field schools.

Field Program in Anthropology:

The anthropology field schools in Fiji and India, offered in alternate years, give students an intensive, firsthand experience studying another culture. Students live with local families and intern in local schools and non-profit organizations. Students also design and conduct an independent research project.

Anthropology (ID), B.A.

Requirements for the Interdepartmental Major

Eight courses, including the following three foundation courses:

- ANT 110 - Introduction to Cultural Anthropology
- ANT 390 - Thinking about Culture
- ANT 363 - Research Methods and Design

An Interdepartmental senior thesis and four electives

- IDM 498 - Interdepartmental Senior Thesis 1
- IDM 499 - Interdepartmental Senior Thesis 2

Or an Anthropology thesis and three electives

- ANT 498 - Anthropology Senior Thesis 1
- ANT 499 - Anthropology Senior Thesis 2

Requirements for Honors in Anthropology:

For departmental honors, a major must fulfill the following requirements: (1) a minimum overall G.P.A. of 3.50; (2) a minimum G.P.A. of 3.70 in all anthropology courses; (3) completion of all requirements for the anthropology major or interdepartmental major; (4) A or A- grades in at least 5 anthropology courses.

Course Selection Guidelines:

The department accepts appropriate AP and transfer credits as electives or in place of ANT 110. In most cases we prefer that students take other required anthropology courses at Union. Students with no previous background in anthropology may take any 100 or 200 level courses, although ANT 110 is a good first course; 200 level courses generally involve more intensive examination of a particular topic while 100 level courses offer more general surveys of particular sub-fields of anthropology. Students intending to major in anthropology should take ANT 214 and ANT 390 in their sophomore or junior year. Students undertaking an ID major in anthropology should take ANT 390 in their sophomore or junior year. ANT 363 should normally be taken in the spring of the junior year; students anticipating going on a term abroad in spring are strongly encouraged to take ANT 363 in their sophomore year. We strongly encourage students to go on a full term abroad, preferably one of the two anthropology field schools.

Field Program in Anthropology:

The anthropology field schools in Fiji and India, offered in alternate years, give students an intensive, firsthand experience studying another culture. Students live with local families and intern in local schools and non-profit organizations. Students also design and conduct an independent research project.

Anthropology Minor

Requirements for the Minor

Six courses including:

- ANT 110 - Introduction to Cultural Anthropology

Four Electives and

- ANT 363 - Research Methods and Design
- or
- ANT 390 - Thinking about Culture

Asian Studies

Director: Associate Professor M. Dallas (Political Science)

Faculty: Professors B. Lewis (Economics), J. Madancy (History), M. Ferry (Modern Languages), J. Matsue (Music), E. Motahar (Economics); Associate Professors B. Tuon (English), J. Ueno (Modern Languages), J. Witsoe (Anthropology), Z. Zhang (Modern Languages), S. Lullo (Visual Arts); Assistant Professor A. Khan (Anthropology)

The Asian Studies program provides a broad, interdisciplinary liberal arts education focusing on the language, culture, and the arts of Asia (with emphasis on China and Japan). The courses taken in this program equip students to pursue interest and careers that require exposure to global issues, particularly pertaining to Asia. The major leads to a bachelor of arts degree and our graduates have gone on to careers in business, government service, law, education, the arts, journalism, or further study in graduate school.

Asian Studies Approved Humanities Courses

Art History

- AAH 101 - Islamic Art and Architecture
- AAH 104 - Arts of China
- AAH 105 - Arts of Japan
- AAH 106 - Arts of India
- AAH 194 - Visual Culture of Communist China, 1919 to Present
- AAH 286 - Art and Religion of the Silk Road

Chinese

- CHN 100 - Basic Chinese 1
- CHN 101 - Basic Chinese 2
- CHN 102 - Basic Chinese 3
- CHN 200 - Intermediate Chinese 1
- CHN 201 - Intermediate Chinese 2
- CHN 202 - Intermediate Chinese 3
- CHN 300 - Advanced Intermediate Chinese 1
- CHN 301 - Advanced Intermediate Chinese 2
- CHN 302 - Advanced Intermediate Chinese 3
- CHN 400 - The Changing Face of China
- CHN 401 - Media China

English

- EGL 254 - Discourses on the Viet Nam War
- EGL 255 - Asian American Literature and Film
- EGL 256 - Southeast Asian-American Experience

Japanese

- JPN 100 - Basic Japanese 1
- JPN 101 - Basic Japanese 2
- JPN 102 - Basic Japanese 3
- JPN 200 - Intermediate Japanese 1
- JPN 201 - Intermediate Japanese 2
- JPN 202 - Intermediate Japanese 3
- JPN 300 - Advanced Intermediate Japanese 1
- JPN 301 - Advanced Intermediate Japanese 2
- JPN 302 - Advanced Intermediate Japanese 3

Modern Languages and Literatures

- MLT 200 - Modern Chinese Literature
- MLT 201 - Chinese Cinema
- MLT 202 - Gender and Sexuality in Modern China
- MLT 203 - Asian American Film and Performance
- MLT 204 - Literary Traditions in East Asia *
- MLT 205 - Perspectives in Modern East Asian Literature *

- MLT 209 - The New Wall of China
- MLT 250 - Language, Identity, and Power in Japan
- MLT 254 - Explore Japanese Manga and Anime

Music

- AMU 012 - Union College Japanese Drumming Ensemble (3 terms required to earn 1 credit)
- AMU 233 - Japanese Drumming Workshop
- AMU 234 - Balinese Gamelan Workshop
- AMU 320 - Encounters with East Asian Music Cultures *

Asian Studies Approved Social Sciences Courses

Anthropology

- ANT 184 - Contemporary Japanese Society
- ANT 222 - Childhood in Anthropological Perspective
- ANT 232 - Bombs to Buddhism: Fatalism, Technology, and Modern Japanese Culture
- ANT 243 - Anthropology and International Development
- ANT 256 - Anthropology of Islam
- ANT 272 - Psychological Anthropology
- ANT 280 - Contemporary India

Economics

- ECO 235 - Chinese Economy
- ECO 354 - International Economics
- ECO 376 - Seminar in Global Economic Issues

History

- HST 181 - Confucians and Conquerors: East Asian Traditions
- HST 182 - Rebels, Reds, and Regular Folks: The Turbulent History of Modern Asia
- HST 281 - Samurai to Salarymen: Modern Japanese History
- HST 282 - The Mongols: Terror, Trade and Tolerance
- HST 283 - The Mao Years
- HST 284 - Hobbled and Heroic: Women in China and Japan
- HST 285 - The Samurai: Lives, Loves, and Legacies
- HST 380 - Special Topics in East Asian History
- HST 382 - World War II in Asia (not offered in 2016-17)
- HST 383 - The Last Dynasty: The Glory and Fall of the Qing Empire, 1644-1911
- HST 481 - Seminar in East Asian History: Remembering World War II in Asia

Political Science

- PSC 213 - Contemporary China: Politics, Economy and Society
- PSC 246 - Asian Development: Industrialization Beyond the West
- PSC 253 - International Relations of East Asia *

Asian Studies Term Abroad Programs

Courses

- CHN 204T - Chinese Language Studied Abroad
- CHN 205T - Chinese Language Studied Abroad
- JPN 250T - The Japanese Language Studied Independently Abroad 1
- JPN 251T - The Japanese Language Studied Independently Abroad 2
- JPN 252T - The Japanese Language Studied Independently Abroad 3
- JPN 253T - Japanese Language Studies Abroad
- WMC 354T - Balinese Performing Arts Mini-term

Asian Studies, B.A.

Requirements for the Major

Fourteen courses including:

Six courses in either Chinese or Japanese language:

Two courses devoted to a senior project:

Three courses from AIS offerings in either the Humanities or the Social Sciences:

Two additional courses in the opposite division:

Note: One of those five courses must deal entirely with an Asian country outside the student's language concentration. (For example, a student who takes a year of Japanese language must take one course that deals solely with China or another Asian country)

One core course is required from the following:

- AMU 320 - Encounters with East Asian Music Cultures
- HST 181 - Confucians and Conquerors: East Asian Traditions
- HST 182 - Rebels, Reds, and Regular Folks: The Turbulent History of Modern Asia
- MLT 204 - Literary Traditions in East Asia
- MLT 205 - Perspectives in Modern East Asian Literature
- PSC 246 - Asian Development: Industrialization Beyond the West
- PSC 253 - International Relations of East Asia

Note: A core course is designed to give students more breadth in their study of Asia by dealing with both China and Japan over a substantial period of time. Majors must pass a comprehensive examination in the form of an oral defense of their senior project.

Term abroad to China or Japan, or in a mini-term to Asia:

Note: If necessary, accommodations will be made.

Requirements for Honors in Asian Studies:

To be eligible for honors in the program, the student must fulfill the following requirements: (1) a minimum index of 3.30 in the program; (2) a cumulative index of 3.30 or better; (3) a grade of "A minus" or higher on the senior project; and (4) superior performance in an oral exam based on the senior project.

Asian Studies (ID), B.A.

Requirements for the Interdepartmental Major

Eight courses including:

Note: Students are strongly encouraged to apply for the terms abroad to China and Japan.

Three courses in either Chinese or Japanese language:

One course devoted to a senior project:

One core course is required from the following:

- AMU 320 - Encounters with East Asian Music Cultures
- HST 181 - Confucians and Conquerors: East Asian Traditions
- HST 182 - Rebels, Reds, and Regular Folks: The Turbulent History of Modern Asia
- MLT 204 - Literary Traditions in East Asia
- MLT 205 - Perspectives in Modern East Asian Literature
- PSC 253 - International Relations of East Asia

Note: A core course is designed to give students more breadth in their study of Asia by dealing with both China and Japan over a substantial period of time.

Three AIS courses:

Note: One must deal entirely with an Asian country outside the student's language concentration. (For example, a student who takes a year of Japanese language must take one course that deals solely with China or another Asian country.)

Requirements for Honors in Asian Studies:

To be eligible for honors in the program, the student must fulfill the following requirements: (1) a minimum index of 3.30 in the program; (2) a cumulative index of 3.30 or better; (3) a grade of "A minus" or higher on the senior project; and (4) superior performance in an oral exam based on the senior project.

Asian Studies Minor

Requirements for the Minor

Six courses including:

Three courses in either Chinese or Japanese language:

One core course is required from the following:

- AMU 320 - Encounters with East Asian Music Cultures
- HST 181 - Confucians and Conquerors: East Asian Traditions
- HST 182 - Rebels, Reds, and Regular Folks: The Turbulent History of Modern Asia
- MLT 204 - Literary Traditions in East Asia
- MLT 205 - Perspectives in Modern East Asian Literature
- PSC 253 - International Relations of East Asia

Two additional AIS courses:

Astronomy

Chair: Associate Professor S. Amanuel

Faculty: Professors R. Koopmann, S. Maleki, M. Vineyard (on leave, Fall); Associate Professors C. Orzel, N. Mann, H. Watson; Assistant Professor C. Bores Quijano; Senior Lecturers S. LaBrake, J. Marr, F. Wilkin; Visiting Assistant Professor C. Gleason

Staff: J. Sheehan (Technician), L. Stec (Administrative Assistant)

The Physics and Astronomy Department offers a bachelor of arts degree in Astronomy as well as minors in Astronomy and in Astrophysics. The astronomy major is appropriate for students interested in careers such as teacher of earth science, planetarium director, science museum educator, science writing, and historian of science. Students interested in pursuing advanced degrees in astronomy are advised to major in Physics and minor in Astrophysics. Example 4-year schedules are available on the Department of Physics & Astronomy website.

Common Curriculum (CC) Courses

Courses numbered in the 050's are designed particularly for non-science majors seeking to satisfy Common Curriculum requirements, and all of these courses carry Common Curriculum credit. These courses may count toward the major in astronomy or the interdepartmental major (see requirements for the Astronomy, B.A. major and Astronomy (ID), B.A. ID major), but they may not be counted toward the major in physics or toward any other science or engineering major.

Course Selection Guidelines

Placement: Students who score a grade of 4 or 5 on the Advanced Placement C-exam (mechanics and/or electromagnetics), an A on the physics A-levels, a 5 or above on the Higher Level or a 6 or above on the standard exam of the International Baccalaureate (provided they earn the IB diploma), may be given credit for up to a maximum of two courses (PHY 120 and/or PHY 121). If a student does not earn the IB diploma, they will be given credit only if they pass the higher level exam with a grade of 6 or above. Students who score a grade of 4 or 5 on both the Physics 1 and Physics 2 AP exams will earn one SET credit in Physics.

Courses Suitable for Non-Majors: The following courses are designed to fulfill the Science and Technology Common Curriculum requirement (some of these courses have labs and some do not): AST 050 , AST 051 , AST 052 , and AST 058 . Other courses suitable for selected non-majors include, AST 150 (105), AST 200 , AST 210 , AST 220 , AST 230 , and AST 240 .

Prerequisites: There are no placement test requirements for courses in the Department of Physics and Astronomy. All courses numbered above 100 have prerequisites. Please review the course descriptions below and listed under Physics to identify the requirements.

Astronomy, B.A.

Requirements for the Astronomy Major:

Two-course sequence in introductory physics:

- PHY 120 - Matter in Motion
- PHY 121 - Principles of Electromagnetics

OR

- PHY 110 - Physics for the Life Sciences 1
- PHY 111 - Physics for the Life Sciences 2

Two-course sequence in science

- PHY 122 - Relativity, Quantum, and Their Applications
- PHY 123 - Heat and Light

OR

- BIO 103 - Diversity of Life: Heredity, Evolution, and Ecology
- BIO 104 - Cellular Foundations of Life

OR

- CHM 101 - Introductory Chemistry 1
- CHM 102 - Introductory Chemistry 2

OR

- GEO 110 - Physical Geology
- GEO 120 - The Story of Earth and Life

Core astronomy courses:

Take one of the following:

- AST 051 - Introduction to Astronomy
- AST 100 - Introduction to Astrophysics

Take one of the following:

- AST 050 - The Solar System
- AST 150 - (105) Introduction to Planetary Science
- GEO 303 - Earthquakes and the study of the Earth's Interior

Take one of the following:

- AST 230 - Observational Astronomy
- AST 240 - Radio Astronomy

Three courses selected from the following:

*Courses must be chosen in consultation with department advisor; courses must be unique, no double counting permitted.

- PHY 230 - Intermediate Classical Mechanics
- AST 052 - Relativity, Black Holes, and Quasars
- AST 058 - Astrobiology: Life in the Universe
- AST 200 - Stellar Structure and Evolution
- AST 210 - Galaxies
- AST 220 - Cosmology and General Relativity
- AST 230 - Observational Astronomy
- AST 240 - Radio Astronomy

***Three-term Astronomy practicum option (one-credit earned upon completion of AST-292)**

- AST 290 - Astronomy Practicum 1
- AST 291 - Astronomy Practicum 2
- AST 292 - Astronomy Practicum 3

Physics 010 Requirement

A passing grade in PHY 010 (zero credit) is required for **all** students completing their WS requirement.

Senior Writing (WS) Requirement

Astronomy majors may fulfill the Senior Writing (WS) requirement in the following options: completing a physics one-term or the physics two-term senior thesis option; thesis research in **another department** if an ID or double major may also satisfy this requirement; or by special permission of the instructor and department through an additional writing component added to an upper-level course.

One-Term Thesis Option:

- PHY 493 - Physics Senior Writing Project

Two-Term Thesis Option:

- PHY 490 - Physics Two-Term Senior Thesis 1
- PHY 491 - Physics Two-Term Senior Thesis 2

Additional Requirements

- MTH 113 - Accelerated Single-Variable Calculus
- One science course outside the department (if all other requirements are fulfilled only in Physics and Astronomy Department).
- Students are expected to attend the weekly departmental colloquium series to gain an appreciation for current research in physics related areas.

**Students wishing to pursue graduate work in astronomy are advised to major in physics and minor in astrophysics.*

Requirements for Honors in Physics and Astronomy:

In addition to the requirements for the major, the student must take PHY 491 , submit an honors thesis, and satisfy College requirements for departmental honors.

Astronomy (ID), B.A.

Requirements for the Interdepartmental Major:

Students taking physics or astronomy as part of an 8-6 interdepartmental major program can choose from either a conceptual or a calculus track. Suitable choices of courses numbered in the 50s, as well as independent study courses 495-498, can count toward the *conceptual track* ID major (such as Arts and Astronomy or History of Astronomy). Suitable choices of courses numbered 100 or greater can count toward a *calculus track* ID major (such as Astrobiology or Geophysics). For any of these ID majors, a written proposal must be submitted by the student, in consultation with their faculty advisor, for approval by the Department of Physics and Astronomy.

Astronomy Minor

Requirements for the Minor:

The Department of Physics and Astronomy offers academic minors in physics, astronomy, and astrophysics.

Note: Physics majors are recommended to minor in Astrophysics rather than Astronomy.

Students wishing to minor in Astronomy should take:

Required core course:

- AST 051 - Introduction to Astronomy

Choose a core physics group sequence

- PHY 120 - Matter in Motion
- PHY 121 - Principles of Electromagnetics

OR

- PHY 110 - Physics for the Life Sciences 1
- PHY 111 - Physics for the Life Sciences 2

Choose one from the following:

- AST 050 - The Solar System
- AST 150 - (105) Introduction to Planetary Science
- GEO 303 - Earthquakes and the study of the Earth's Interior

Choose two additional courses:

- AST 052 - Relativity, Black Holes, and Quasars
- AST 058 - Astrobiology: Life in the Universe
- AST 200 - Stellar Structure and Evolution
- AST 210 - Galaxies
- AST 220 - Cosmology and General Relativity
- AST 230 - Observational Astronomy
- AST 240 - Radio Astronomy
- PHY 122 - Relativity, Quantum, and Their Applications
- PHY 123 - Heat and Light
- PHY 495 - Physics Independent Study 1
- ***Three-term Astronomy practicum option (one-credit is earned upon completion of AST-292)**
- AST 290 - Astronomy Practicum 1
- AST 291 - Astronomy Practicum 2
- AST 292 - Astronomy Practicum 3

Astrophysics Minor

Requirements for the Minor:

The Department of Physics and Astronomy offers academic minors in physics, astronomy, and astrophysics.

Students wishing to minor in Astrophysics should take

- AST 150 - (105) Introduction to Planetary Science
- or
- GEO 303 - Earthquakes and the study of the Earth's Interior

And five courses selected from

- AST 100 - Introduction to Astrophysics
- AST 200 - Stellar Structure and Evolution
- AST 210 - Galaxies
- AST 220 - Cosmology and General Relativity
- AST 230 - Observational Astronomy
- AST 240 - Radio Astronomy

Biochemistry

Directors: Senior Lecturer B. Cohen (Biology); Professor J. Kehbeck (Chemistry)

Faculty: Professors S. Horton (Biology) K. Fox (Chemistry); Associate Professor N. Theodosiou (Biology); Assistant Professor C. Connelly (Chemistry)

Course Selection Guidelines

Courses for non-majors:

BCH 335 is a survey course for non-biochemistry majors who have fulfilled the necessary prerequisites as listed below. It is not appropriate for non-science majors looking to fulfill Common Curriculum requirements. Students who have completed BCH 335 cannot enroll in BCH 380 or BCH 382 and vice-versa.

Senior Writing Requirement:

The senior writing requirement may be fulfilled in several ways:

1. By completing a senior thesis in conjunction with senior research (BCH 491 , BCH 492 , BCH 493).
2. By selecting the biology senior seminar that emphasizes cellular/molecular topics, BIO 489 .
3. Only in the event that neither of the above options is available, a student could satisfy the WS requirement by writing a research paper requiring extensive background reading in conjunction with taking BIO 380 , CHM 382 or one of the upper level, molecularly-based biochemistry electives, in addition to the regular course work. Students pursuing this option must consult the Director of Biochemistry before the beginning of the senior year to make arrangements.

Requirements for the Minor and Interdepartmental Majors:

It is not permitted to minor in biochemistry. The ID major in which biochemistry is a component is not normally available.

Biochemistry, B.S.

Requirements for the Major

Nine courses in Biology and Chemistry:

Biology

Introductory Biology

- BIO 103 - Diversity of Life: Heredity, Evolution, and Ecology
- BIO 104 - Cellular Foundations of Life
- BIO 205 - Topics in Molecular Biology

Chemistry

Introductory Chemistry

- CHM 101 - Introductory Chemistry 1
- CHM 102 - Introductory Chemistry 2

or

- CHM 110H - Honors Introductory Chemistry

Organic Chemistry

- CHM 231 - Organic Chemistry 1
- CHM 232 - Organic Chemistry 2

Upper Level Chemistry

- CHM 240 - Analytical Chemistry
- CHM 351 - Kinetics and Thermodynamics

A two- term biochemistry sequence for biochemistry majors and can be taken in any order:

- BCH 380 - Biochemistry: Nucleic Acids, Carbohydrates, and Lipids
- BCH 382 - Biochemistry: Structure and Catalysis

In addition, students must have:

Math through and including

- MTH 115 - Calculus 3: Differential Vector Calculus and Matrix Theory

Physics

- PHY 110 - Physics for the Life Sciences 1
 - PHY 111 - Physics for the Life Sciences 2
- or
- PHY 120 - Matter in Motion
 - PHY 121 - Principles of Electromagnetics

Note: Typically, students complete introductory biology, chemistry and math courses in their first year.

In addition to the courses above, students are required to take 3 electives.

Two of these must be taken from either:

- BIO 354 - Developmental Biology
- BIO 355 - Immunology
- BIO 363 - Cellular Neurosciences
- BIO 368 - Advanced Molecular Biology
- BIO 378 - Cancer Cell Biology
- BIO 384 - Genetics and Molecular Biology

The third elective may be taken from any 300-level courses in the subcellular or organismal biology areas, or:

- BIO 243 - Bioinformatics: Information Technology in the Life Sciences
 - BIO 370 - Endocrinology
 - CHM 330 - Medicinal Chemistry
 - CHM 340 - Chemical Instrumentation
- **Note:** For detailed advising suggestions see the advising website at <http://www.union.edu/advising> under Department-Specific Advising Tips.
 - **Placement:** AP credit is awarded as per current Biology and Chemistry Department guidelines.
 - **Note:** Acceptance to graduate school may require additional courses and/or undergraduate research experience.

Requirements for Honors in Biochemistry

Students eligible for honors in biochemistry must fulfill the College-wide criteria and satisfactorily complete a thesis, traditionally based on the results of original research, that receives the approval of the subcommittee for biochemistry and the appropriate College committee. It is customary, but not required, that students enroll in three honors research courses, typically during the senior year.

Biological Sciences

Chair: Professor S. Rice

Faculty: Professors Q. Chu-LaGraff, J. Corbin, B. Danowski, L. Fleishman, S. Horton, R. Lauzon, K. LoGiudice; Associate Professors S. Kirkton, J. Salvo, N. Theodosiou, R. Yukilevich; Assistant Professor K. Feller; Senior Lecturers J. Bishop, B. Cohen, B. Pytel; Visiting Assistant Professor A. Sweger

Staff: L. Andonie (Life Science Technician), C. Geren (Administrative Assistant), A. Kelly (Life Sciences Lab Coordinator),

Biological Sciences, B.S.

Requirements for the Major:

Ten courses in biology, including BIO 103 , BIO 104 , BIO 205 and BIO 206 Students who have Advanced Placement credit for biology will receive credit for BIO 050 , which does not count toward the major or minor, but fulfills the CC Science with Laboratory requirement. The remaining courses must include at least one 300-level laboratory courses in each of the following areas:

Sub-cellular

- BIO 352 - Microbiology
- BIO 354 - Developmental Biology
- BIO 355 - Immunology
- BIO 363 - Cellular Neurosciences
- BIO 368 - Advanced Molecular Biology
- BIO 378 - Cancer Cell Biology
- BIO 380 - Biochemistry: Nucleic Acids, Carbohydrates, and Lipids
- BIO 384 - Genetics and Molecular Biology

Organismal

- BIO 314 - Ornithology
- BIO 315 - Biology of Plants
- BIO 317 - Entomology
- BIO 319 - Vertebrate Natural History
- BIO 321 - Herpetology: Biology of Amphibians and Reptiles

- BIO 330 - Comparative Animal Physiology
- BIO 332 - Comparative Vertebrate Anatomy
- BIO 362 - Experimental Neurobiology
- BIO 375 - Exercise Physiology

Population or community

- BIO 320 - Ecology
- BIO 322 - Conservation Biology
- BIO 324 - Plant Ecology
- BIO 325 - Animal Behavior
- BIO 350 - Evolutionary Biology
- BIO 350T - Terrestrial Ecology of Australia
- BIO 352T - Marine Ecology of Australia

Additional Requirements

Of the ten courses, five must be numbered 300 or above; only one of the ten may be an independent study, research, or honors course. In addition, all biology majors are required to take CHM 101 (or CHM 110) AND at least four additional courses in math and the sciences. These should be chosen in consultation with your academic adviser(s), and may include courses in mathematics, statistics, chemistry, geosciences, physics, and computer science. Please note that acceptance to many graduate and professional schools and programs often requires two terms of calculus, two terms of physics, two terms of intro chemistry, and one or two terms of organic chemistry. We recommend that all majors start their intro chemistry (CHM 101/102 or CHM110) and calculus sequences (MTH 110/112 or MTH 113) in their first year. For some students' interests and future plans, Intro to Computer Science (CSC 10x) or statistics may be an alternative to calculus. Students should consult with their advisor.

See relevant listings for requirements for a major in biochemistry, environmental science, policy & engineering, biomedical engineering, or neuroscience.

Requirements for Honors in Biological Sciences:

Students eligible for departmental honors must fulfill the College-wide criteria and satisfactorily complete a thesis, usually based on the results of original biological research, which receives the approval of the department and appropriate College committee. It is customary, but not required, that research students enroll in three honors research courses, typically during the senior year. Interdepartmental majors must consult with their advisors in both disciplines during their junior year to receive approval for an interdepartmental thesis. The biology component of an interdepartmental thesis will normally incorporate at least one term of biological research.

Course Selection Guidelines

Placement: Students who received a score of 4 or 5 on the Advanced Placement exam may receive credit for BIO 050. The BIO 050 credit received from the Advanced Placement (AP) exam does not count as one of the biology courses toward the major or minor.

Courses Suitable for Non-Majors: BIO 050, BIO 055, BIO 058, BIO 064, BIO 065, BIO 077, and BIO 094 are designed for the general college community and may not be counted toward the biology major nor toward interdepartmental majors that include biology.

Senior Writing Requirement: Biology majors can satisfy the Senior Writing requirement (WS) by conducting research under the direction of a faculty member and writing a thesis (see BIO 497) or by taking one of the Senior Seminar courses in their senior year (see BIO 487, BIO 488, or BIO 489).

Biological Sciences (ID), B.S.

Requirements for the Interdepartmental Majors:

Students wishing to declare an interdepartmental major must submit a proposal to the department chair outlining their proposed program of study no later than the second term of their junior year. This program, which must be approved by the chair of the Biology Department, should be written in consultation with advisors from both departments to form a cohesive and integrated major; appropriate courses in mathematics and physical sciences should be included in the proposal. Students who wish to have their interdepartmental major listed as Biology/Other are required to take eight biology courses with at least three 300-level or above. Those wishing to have their interdepartmental major listed as Other/Biology are required to take six biology courses. All of the Biology courses must count for Biology major credit and only one of these may be a research course or independent study. Interdepartmental majors are not required to take one subcellular, one organismal and one population course, although they are strongly encouraged to do so.

Requirements for Honors in Biological Sciences:

Students eligible for departmental honors must fulfill the College-wide criteria and satisfactorily complete a thesis, usually based on the results of original biological research, which receives the approval of the department and appropriate College committee. It is customary, but not required, that research students enroll in three honors research courses, typically during the senior year. Interdepartmental majors must consult with their advisors in both disciplines during their junior year to receive approval for an interdepartmental thesis. The biology component of an interdepartmental thesis will normally incorporate at least one term of biological research.

Biological Sciences Minor

Requirements for the Minor:

Six courses in biology, including:

- BIO 103 - Diversity of Life: Heredity, Evolution, and Ecology
- BIO 104 - Cellular Foundations of Life

Additional Requirements

The remaining courses must be selected from among those designated for credit toward the biology major. Students are cautioned that many upper-level biology courses require prerequisites (in biology or other science departments) beyond BIO 103 (110) and BIO 104 (112). Therefore, any student who contemplates a biology minor must register at the Biology Department Office and be assigned a departmental advisor. Biology has significant curricular overlap with the interdisciplinary majors that intersect with it (Biochemistry, Neuroscience, Biomedical Engineering, Environmental Science), therefore one cannot major in one of these interdisciplinary majors and minor in Biology. Students with majors outside Division III or in psychology may count one biology CC course toward the minor if it is their first course in the minor.

Biomedical Engineering

Directors: Associate Professor T. Buma

Faculty: Professors J. Spinelli, C. Traver; Associate Professors S. Cotter, J. Currey, L. Dosiek, H. Hanson; Assistant Professors S. Khetan, C. Pappu; Senior Lecturer J. Hedrick; Visiting Assistant Professors A. Loya, Z. Yang

Staff: L. Galeo (Administrative Assistant)

Biomedical Engineering is an interdisciplinary engineering major designed for students interested in exploring the interface between engineering and the life sciences. In Biomedical Engineering, students learn to apply engineering principles and analytical approaches to the study of biological systems and seek to understand the benefits and constraints of engineered materials, devices and control systems in life science and biomedical applications.

Students in the Biomedical Engineering major share common foundation and core courses in biology, biomechanics, biomaterials, electrical engineering, and choose among upper-level electives in biomechanics, biomaterials, and bioelectrical engineering. Courses in biomechanics and

biomaterials focus on approaches to understanding the structural properties and dynamics of biological cells, tissues and systems, and of engineered devices with biological and biomedical applications. The bioelectrical engineering courses explore the interfaces among sensory physiology, neuroscience and electrical engineering and students focus on techniques to acquire, analyze and interpret neurological, biomedical and other biological signals and images. During senior year, students engage in a two term Biomedical Engineering capstone design course and may elect to conduct research under the guidance of a faculty member as part of a senior thesis.

The Biomedical Engineering program is accredited by the Engineering Accreditation Commission of ABET <http://www.abet.org>.

Educational objectives and program outcomes are listed on the program website.

Biomedical Engineering, B.S.

Requirements for the Major:

A total of 40 courses including the following:

Required courses in math, science, and general engineering:

Calculus through:

- MTH 115 - Calculus 3: Differential Vector Calculus and Matrix Theory
- MTH 130 - Ordinary Differential Equations
- PHY 120 - Matter in Motion
- PHY 121 - Principles of Electromagnetics
(Note: Students considering the IMP 121/121 sequence should consult with their advisor.)

One from:

- CHM 101 - Introductory Chemistry 1
- CHM 110H - Honors Introductory Chemistry

One from:

- CSC 103 - Taming Big Data: Introduction to Computer Science
- CSC 104 - Robots Rule! Introduction to Computer Science
- CSC 105 - Game Development: Introduction to Computer Science
- CSC 106 - Can Computers Think? Introduction to Computer Science
- CSC 107 - Creative Computing: Introduction to Computer Science
- CSC 108 - Scientific Computing: Introduction to Computer Science

- ESC 100 - Exploring Engineering

Required foundation and core courses for Biomedical Engineering:

- BIO 104 - Cellular Foundations of Life
- BIO 205 - Topics in Molecular Biology
- BIO 206 - Topics in Physiology
- BME 101 - Graphics and Image Processing for Biomedical Systems
- BME 201 - Biomechanics 1

- BME 202 - Biomechanics 2
- BME 210 - Statistical Methods in Biomedical Engineering
- BME 225 - Electric Circuits
- BME 240 - Circuits and Systems
- BME 241 - Discrete Systems
- BME 311 - Advanced Biomechanics
- BME 331 - Cell-Tissue-Material Interaction
- BME 386 - Introduction to Biomedical Instrumentation

Biomedical Engineering electives

Four courses from BME, ECE or other engineering and computer science courses subject to approval. All must be at the 200-level or higher, with at least three at the 300 level or higher. At least one course must have a BME designation.

Biology Elective: One 300-Level BIO course.

Capstone design:

- BME 495 - Biomedical Engineering Capstone Design 1
- BME 496 - Biomedical Engineering Capstone Design 2

Requirements for Honors

The criteria for graduating with honors in Biomedical Engineering are: (1) a cumulative index of at least 3.3; (2) a cumulative index in major courses of at least 3.3, with an A or A- in at least three of those courses; (3) a cumulative index of at least 3.5 in the two courses of capstone design; (4) final six terms of courses at Union. The major courses are listed above under "Foundation and core courses for Biomedical Engineering," "Biomedical Engineering electives" and "Capstone design".

Course Selection Guidelines

Placement. Students will receive credit for AP or IB courses following the guidelines of the appropriate supporting department.

Course Sequence. Students should consult with their academic advisor and the following yearly requirements when scheduling courses. Some 300 level courses are not offered every year, and some of these courses will be taken outside of the year indicated.

Senior Projects. Students interested in working with a faculty member on a two-term Senior Project should meet with potential faculty advisors during their junior year to identify a project; students should notify one of the Program Directors when this process is complete. The first course (BME 497) will count as a Free Elective and BME 498 will count as a BME Elective.

Sample schedule starting with MTH 110:

Students with different math and science backgrounds will have slightly different course sequences.

First Year:

- FPR 100 - First-Year Preceptorial
- ESC 100 - Exploring Engineering
CSC 10X - Introduction to Computer Science
- MTH 110 - Calculus 1: Differential Calculus
- MTH 112 - Calculus 2: Integral Calculus
- MTH 115 - Calculus 3: Differential Vector Calculus and Matrix Theory i

- PHY 120 - Matter in Motion i
- PHY 121 - Principles of Electromagnetics i
- BME 101 - Graphics and Image Processing for Biomedical Systems
- Elective ii

Second Year:

- BIO 104 - Cellular Foundations of Life
- CHM 101 - Introductory Chemistry 1
- MTH 130 - Ordinary Differential Equations
- SRS 200 - Sophomore Research Seminar
- BME 201 - Biomechanics 1
- BME 202 - Biomechanics 2
- BME 210 - Statistical Methods in Biomedical Engineering
- BME 225 - Electric Circuits or (ECE-225 Electric Circuits)
- BME 240 - Circuits and Systems or (ECE-240 Circuits and Systems)
- Elective ii

Third Year:

- BIO 205 - Topics in Molecular Biology
- BIO 206 - Topics in Physiology
- BME 241 - Discrete Systems
- BME 331 - Cell-Tissue-Material Interaction
- BME 386 - Introduction to Biomedical Instrumentation
- BME Elective iv
- BME Elective iv
- Elective ii
- Elective ii
- Elective ii

Fourth Year:

- BIO 3XX
- BME 311 - Advanced Biomechanics
- BME 495 - Biomedical Engineering Capstone Design 1
- BME 496 - Biomedical Engineering Capstone Design 2
- BME Elective iv
- BME Elective iv
- Elective ii
- Elective ii
- Elective ii
- Elective ii

Note(s):

i Alternative mathematics and physics sequences are possible depending on the preparation of the student.

ii The nine Electives are typically distributed among five Common Curriculum (CC) courses and four "free electives". Students planning to attend medical school should take PSY 100 as their "Social Sciences" CC course and BIO 103, CHM 102, CHM 231, and CHM 232 as free electives.

Students interested in the health professions (e.g. medical school, physician assistant) should contact the Health Professions Office for specialized advising and other services.

iii The Linguistic and Cultural Competency (LCC) component of the Common Curriculum is recommended to be satisfied in the third year through a Term Abroad (typically during Fall or Spring term), or a mini term.

iv The BME Elective courses include any four courses from BME, ECE or other engineering and computer science courses subject to approval. All must be >200-level with at least three at the >300 level. At least one must have a BME prefix.

Biomedical Engineering Minor

Requirements for the Minor:

A minimum of six courses taken outside the major department organized around the following:

Core Course Requirements:

- BIO 104 - Cellular Foundations of Life
- ESC 100 - Exploring Engineering
- MTH 112 - Calculus 2: Integral Calculus
or
- MTH 113 - Accelerated Single-Variable Calculus
or equivalent
- PHY 110 - Physics for the Life Sciences 1
or
- PHY 120 - Matter in Motion

Upper-Level Course Requirements:

Engineering and Computer Science Majors:

Four courses from the following: 200 level or above biology courses, Biomedical Engineering courses, PHY 200 and PHY 210. Mechanical engineering students may not take BME 201, BME 202, or BME 311.

Biological Sciences Majors:

Four courses from the following: 200 level or above engineering (BME, MER, ECE) courses, CSC 243, PHY 200 or PHY 210. Third and fourth year students entering the Minor may opt to take an additional 200 level or above course instead of ESC 100.

Other Majors:

Four 200 level or above courses in biology, engineering, PHY 200 and PHY 210 with approval by the Program Directors.

Chemistry

Chair: Professor J. D. Kehlbeck

Faculty: Professors J. Adrian, M. Carroll, K. Fox, L. Tyler; Associate Professor L. MacManus-Spencer; Assistant Professors C. Connelly, E. Robertson; Lecturers B. Schabes, J. Vedad; Visiting Assistant Professors L. Pedzisa, M. Reardon

The Chemistry Department is certified by the American Chemical Society. Bachelors' degrees with a major in chemistry may be either certified by the American Chemical Society or not, according to requirements listed below. The certified degree is not necessary for the furtherance of any professional goals. Union College strongly supports terms abroad but careful planning is required. For sample four-year schedules, please see the Chemistry Department website.

Chemistry, A.C.S., B.S.

Requirements for the A.C.S. Chemistry Major:

There are four different tracks that build on a common core of courses.

Each track includes

- CHM 110H - Honors Introductory Chemistry *
- CHM 231 - Organic Chemistry 1
- CHM 232 - Organic Chemistry 2
- CHM 240 - Analytical Chemistry
- CHM 260 - Inorganic Chemistry
- CHM 351 - Kinetics and Thermodynamics
- CHM 382 - Biochemistry: Structure and Catalysis

Note:

* Students not placed into CHM 110H may substitute the two-course CHM 101/CHM 102 sequence.

Four in-depth courses (as outlined below) in chemistry and related areas**

Three terms of thesis research in chemistry

- CHM 491 - Chemical Research 1
- CHM 492 - Chemical Research 2
- CHM 493 - Chemical Research 3

Additional Requirements

Mathematics through:

- MTH 115 - Calculus 3: Differential Vector Calculus and Matrix Theory

and two terms of introductory physics

- PHY 110 - Physics for the Life Sciences 1
and
- PHY 111 - Physics for the Life Sciences 2
or
- PHY 120 - Matter in Motion
and

- PHY 121 - Principles of Electromagnetics

In-depth course requirements for each track follow:

Chemistry Track:

Three required in-depth courses

- CHM 340 - Chemical Instrumentation
- CHM 352 - Quantum Chemistry
- CHM 360 - Advanced Inorganic Chemistry: Materials & Catalysis

One elective course chosen from

- CHM 330 - Medicinal Chemistry
- CHM 332 - Synthetic Methods
- CHM 354 - Chemical Applications of Group Theory
- BIO 380 - Biochemistry: Nucleic Acids, Carbohydrates, and Lipids

Also recommended

Additional courses in chemistry, physics, computer science, and/or engineering.

Chemical Biology Track:

Two required in-depth courses

- BIO 380 - Biochemistry: Nucleic Acids, Carbohydrates, and Lipids
- CHM 340 - Chemical Instrumentation

Two elective courses chosen from

- CHM 330 - Medicinal Chemistry
- CHM 332 - Synthetic Methods
- CHM 352 - Quantum Chemistry
- BIO 378 - Cancer Cell Biology
- BIO 384 - Genetics and Molecular Biology

Also recommended

Additional courses in biology, chemistry, physics, computer science, and/or engineering.

Environmental Chemistry Track:

Two required courses

- CHM 245 - Environmental Chemistry
- CHM 340 - Chemical Instrumentation

Two elective in-depth courses chosen from

- BIO 320 - Ecology
- CHM 352 - Quantum Chemistry
- GEO 203 - Lakes and Environmental Change
- GEO 220 - Mineral Science
- GEO 302 - Geochemical Systems and Modeling
- GEO 305 - Global Biogeochemical Cycles

Also recommended

Additional upper-level chemistry courses, additional selections from the in-depth course electives for this track, courses in environmental ethics, history, literature and/or policy.

Materials Chemistry Track:

Two required courses

- CHM 352 - Quantum Chemistry
- CHM 360 - Advanced Inorganic Chemistry: Materials & Catalysis

Two elective courses chosen from

- CHM 224 - Frontiers of Nanotechnology and Nanomaterials
- CHM 340 - Chemical Instrumentation
- ESC 324 - Advanced Topics in Nanoscience
- GEO 220 - Mineral Science
- GEO 302 - Geochemical Systems and Modeling
- MER 213 - Material Science
- MER 214 - Strength of Materials
- MER 354 - Advanced Materials
- PHY 311 - Advanced Topics in Physics 2

Also recommended

Additional courses in biology, chemistry, physics, computer science, and/or engineering.

Note:

** Some of the elective choices for these tracks are offered by other academic departments. There is no expectation that other departments will guarantee space in their courses for chemistry students. In addition, there is no expectation that those departments will waive any prerequisites for their courses.

Requirements for Honors in Chemistry:

Candidates for honors in chemistry must have a cumulative index of at least 3.5 and an index of at least 3.5 in the courses of their major, excluding cognates, and must have at least three A or A- grades in such courses (not including any given in connection with the writing of their Senior Thesis). They must submit evidence of independent work in chemistry of substance and distinction in the form of a thesis that shall have been awarded a grade of at least A-. Candidates must fulfill the College-wide criteria for honors and they must be formally nominated by the Chemistry Department.

Course Selection Guidelines

Placement: Any student interested in taking introductory chemistry is required to take a placement examination to determine the appropriate course. Exception: a student wishing to take chemistry who has scored 4 or 5 on the AP chemistry exam will be automatically placed into CHM 110H and cannot take CHM 101. Students who have scored 4 or 5 on the AP chemistry exam or who successfully complete CHM 110H will also receive AP credit for CHM 101. CHM 110H is offered only in the fall term. [Note: occasionally a student who places out of CHM 101 may find it more appropriate to take CHM 102 instead of CHM 110H. This decision must be made in consultation with the chair of the Chemistry Department.]

Common Curriculum Courses: CHM 060 and CHM 080 and CHM 090 are designed for the general college community. They do not count toward the chemistry major nor for interdepartmental majors that include chemistry. CHM 101, CHM 102, and CHM 110H are also appropriate courses for students wishing to complete their Common Curriculum requirements.

Prerequisites: There is a strict prerequisite structure for the chemistry curriculum, so it is very important to review individual course descriptions when planning when to take the various courses. Every 200-level course has at least one 100-level chemistry course prerequisite, and some have other 200-level chemistry courses and/or cognate courses as prerequisites. Every 300-level course has at least one 200-level chemistry course prerequisite, and some have other 300-level chemistry courses and/or cognate courses as prerequisites.

Repeating Chemistry Courses: Chemistry courses may be repeated according to the college policy, if space permits, with the following exception: a student cannot repeat a chemistry course that is a prerequisite for another chemistry or biochemistry course that the student has successfully completed. Students who want to repeat a chemistry course should consult with the chair of the Chemistry Department.

Chemistry, Basic, B.S.

Requirements for the Basic Chemistry Major:

Eight core courses in the department

- CHM 110H - Honors Introductory Chemistry *
- CHM 231 - Organic Chemistry 1
- CHM 232 - Organic Chemistry 2
- CHM 240 - Analytical Chemistry
- CHM 260 - Inorganic Chemistry
- CHM 340 - Chemical Instrumentation
- CHM 351 - Kinetics and Thermodynamics
- CHM 352 - Quantum Chemistry

Note:

*Students not placed into CHM 110H may substitute the two-course CHM 101/CHM 102 sequence.

One course in biochemistry

selected from

- BCH 335 - Survey of Biochemistry
- BCH 380 - Biochemistry: Nucleic Acids, Carbohydrates, and Lipids
- BCH 382 - Biochemistry: Structure and Catalysis

And one chemistry-related elective

chosen from

- CHM 224 - Frontiers of Nanotechnology and Nanomaterials
- CHM 245 - Environmental Chemistry

- CHM 330 - Medicinal Chemistry
- CHM 332 - Synthetic Methods
- CHM 354 - Chemical Applications of Group Theory
- CHM 360 - Advanced Inorganic Chemistry: Materials & Catalysis
- ESC 324 - Advanced Topics in Nanoscience
- GEO 302 - Geochemical Systems and Modeling

Additional Requirements

Chemistry majors may fulfill their WS requirement through a two- or three-term senior research thesis under the supervision of a faculty member in the Chemistry Department (CHM 491, CHM 492, CHM 493), through performing thesis research in another department (if a double major or ID major), or through an additional writing component added to an upper-level chemistry course (with permission of the instructor and the chair of the Chemistry Department).

Additional requirements in Math and Physics

Mathematics through and including:

- MTH 115 - Calculus 3: Differential Vector Calculus and Matrix Theory
and
Two terms of introductory physics reflected below (AP Physics credit acceptable):

- PHY 110 - Physics for the Life Sciences 1
and
- PHY 111 - Physics for the Life Sciences 2

or

- PHY 120 - Matter in Motion
and
- PHY 121 - Principles of Electromagnetics

Requirements for Honors in Chemistry:

Candidates for honors in chemistry must have a cumulative index of at least 3.5 and an index of at least 3.5 in the courses of their major, excluding cognates, and must have at least three A or A- grades in such courses (not including any given in connection with the writing of their Senior Thesis). They must submit evidence of independent work in chemistry of substance and distinction in the form of a thesis that shall have been awarded a grade of at least A-. Candidates must fulfill the College-wide criteria for honors and they must be formally nominated by the Chemistry Department.

Course Selection Guidelines

Placement: Any student interested in taking introductory chemistry is required to take a placement examination to determine the appropriate course. Exception: a student wishing to take chemistry who has scored 4 or 5 on the AP chemistry exam will be automatically placed into CHM 110H and cannot take CHM 101. Students who have scored 4 or 5 on the AP chemistry exam or who successfully complete CHM 110H will also receive AP credit for CHM 101. CHM 110H is offered only in the fall term. [Note: occasionally a student who places out of CHM 101 may find it more appropriate to take CHM 102 instead of CHM 110H. This decision must be made in consultation with the chair of the Chemistry Department.]

Common Curriculum Courses: CHM 060 and CHM 080 and CHM 090 are designed for the general college community. They do not count toward the chemistry major nor for interdepartmental majors that include chemistry. CHM 101, CHM 102, and CHM 110H are also appropriate courses for students wishing to complete their Common Curriculum requirements.

Prerequisites: There is a strict prerequisite structure for the chemistry curriculum, so it is very important to review individual course descriptions when planning when to take the various courses. Every 200-level course has at least one 100-level chemistry course prerequisite, and some have other 200-level chemistry courses and/or cognate courses as prerequisites. Every 300-level course has at least one 200-level chemistry course prerequisite, and some have other 300-level chemistry courses and/or cognate courses as prerequisites.

Repeating Chemistry Courses: Chemistry courses may be repeated according to the college policy, if space permits, with the following exception: a student cannot repeat a chemistry course that is a prerequisite for another chemistry or biochemistry course that the student has successfully completed. Students who want to repeat a chemistry course should consult with the chair of the Chemistry Department.

Chemistry (ID), B.S.

Requirements for Interdepartmental Majors:

Students seeking an interdepartmental major must submit a proposal to the department chair outlining their proposed program of study no later than the second term of their junior year. This program must be written in consultation with advisors from both departments to form a cohesive and integrated major. A specific plan including all appropriate courses in mathematics and physical sciences or other required prerequisites, as well as a plan to fulfill the senior writing requirement should be included in the proposal. Approval of this plan by both departments is required prior to declaring an interdepartmental major. Students who wish to have their interdepartmental major listed as Chemistry/Other are required to take at least seven chemistry courses at the 200-level or higher.

Students in the Leadership in Medicine program whose science emphasis is in chemistry should take the following 6 courses:

- CHM 110H - Honors Introductory Chemistry *
- CHM 231 - Organic Chemistry 1
- CHM 232 - Organic Chemistry 2
- CHM 240 - Analytical Chemistry
- CHM 382 - Biochemistry: Structure and Catalysis

Take one additional 200-level CHM course with lab

OR

Take a 300-level CHM course (CHM 335 excluded)

Note(s):

* Students without sufficient preparation for CHM 110H may substitute the two-course CHM 101/CHM 102 sequence.

Requirements for Honors in Chemistry:

Candidates for honors in chemistry must have a cumulative index of at least 3.5 and an index of at least 3.5 in the courses of their major, excluding cognates, and must have at least three A or A- grades in such courses (not including any given in connection with the writing of their Senior Thesis). They must submit evidence of independent work in chemistry of substance and distinction in the form of a thesis that shall have been awarded a grade of at least A-. Candidates must fulfill the College-wide criteria for honors and they must be formally nominated by the Chemistry Department.

Course Selection Guidelines

Placement: Any student interested in taking introductory chemistry is required to take a placement examination to determine the appropriate course. Exception: a student wishing to take chemistry who has scored 4 or 5 on the AP chemistry exam will be automatically placed into CHM 110H and cannot take CHM 101. Students who have scored 4 or 5 on the AP chemistry exam or who successfully complete CHM 110H will also receive AP credit for CHM 101. CHM 110H is offered only in the fall term. [Note: occasionally a student who places out of CHM 101 may find it more appropriate to take CHM 102 instead of CHM 110H. This decision must be made in consultation with the chair of the Chemistry Department.]

Common Curriculum Courses: CHM 060 and CHM 080 and CHM 090 are designed for the general college community. They do not count toward the chemistry major nor for interdepartmental majors that include chemistry. CHM 101, CHM 102, and CHM 110H are also appropriate courses for students wishing to complete their Common Curriculum requirements.

Prerequisites: There is a strict prerequisite structure for the chemistry curriculum, so it is very important to review individual course descriptions when planning when to take the various courses. Every 200-level course has at least one 100-level chemistry course prerequisite, and some have other 200-level chemistry courses and/or cognate courses as prerequisites. Every 300-level course has at least one 200-level chemistry course prerequisite, and some have other 300-level chemistry courses and/or cognate courses as prerequisites.

Repeating Chemistry Courses: Chemistry courses may be repeated according to the college policy, if space permits, with the following exception: a student cannot repeat a chemistry course that is a prerequisite for another chemistry or biochemistry course that the student has successfully completed. Students who want to repeat a chemistry course should consult with the chair of the Chemistry Department.

Chemistry Minor

Requirements for the Minor:

CHM 101 and CHM 102 or CHM 110H, and CHM 231 and any three other chemistry courses.

Classics

Chair: Professor S. Raucci

Faculty: Professor H-F. Mueller; Associate Professor T. Gazzarri (on leave Winter 2022); Lecturer A. Commito (on leave Fall 2021); Visiting Assistant Professor L. Winters

Staff: L. Pelish (Administrative Assistant)

Classics, B.A.

Requirements for the Major:

At least 12 courses in the department, consisting of:

- At least four courses in one ancient language (Greek, Latin, or Biblical Hebrew).
- Six to seven additional courses, which, depending on track, may be in Classics, Greek, Latin, and/or Biblical Hebrew. (Students who opt for a two-term senior thesis take 6 additional courses; students who opt for a one-term senior project take 7 additional courses.)
- Either a senior project (1-term) or a senior thesis (2-terms). Both the project and thesis require a public performance or an oral examination.

Students are encouraged to study more than one ancient language. Students will, in consultation with the chair, choose their area of focus or track (e.g. ancient civilization, ancient history, ancient religion, classical archaeology, Greek, Latin, etc.). Students who intend to do graduate work in Classics should also consult the department chair about additional requirements for advanced study

Requirements for Honors in Classics:

To be eligible for departmental honors, the student must fulfill the following requirements:

1. A minimum index of 3.35 in departmental courses; completion of one language course at the 230-level or higher with a grade of "B plus" or better.
2. The student must achieve a grade of at least "A minus" on the senior thesis and present a distinctive performance in an oral examination based on the senior thesis. In addition, the student must satisfy College requirements for departmental honors.

Course Selection Guidelines

Course Numbering: Courses in ancient history, classical literature in translation, and ancient civilization have the prefix "CLS." These courses, including all reading assignments, are conducted entirely in English, and have no pre-requisites. These courses serve as excellent options for students interested in exploring the ancient world, satisfying Common Curriculum (CC) requirements (HUL, LCC, WAC), or building clusters, minors, and majors.

Language Placement: Language courses have their own prefixes: Greek: GRK; and Latin: LAT. Because secondary programs vary, the department is happy to assist students find the proper course level. The department grants AP Latin credit if the student has scored a "4" or better. This credit may be counted toward the major or minor. We also consider IB and other transfer credits on a case-by-case basis.

Classics (ID), B.A.

Requirements for Interdepartmental Major:

At least eight courses in the department, including at least four courses in one of the ancient languages. All majors must have their program approved by the chair.

Requirements for Honors in Classics:

To be eligible for departmental honors, the student must fulfill the following requirements:

1. A minimum index of 3.35 in departmental courses; completion of one language course at the 230-level or higher with a grade of "B plus" or better.
2. The student must achieve a grade of at least "A minus" on the senior thesis and present a distinctive performance in an oral examination based on the senior thesis. In addition, the student must satisfy College requirements for departmental honors.

Course Selection Guidelines

Course Numbering: Courses in ancient history, classical literature in translation, and ancient civilization have the prefix "CLS." These courses, including all reading assignments, are conducted entirely in English, and have no pre-requisites. These courses serve as excellent options for students interested in exploring the ancient world, satisfying Common Curriculum (CC) requirements (HUL, LCC, WAC), or building clusters, minors, and majors.

Language Placement: Language courses have their own prefixes: Greek: GRK; and Latin: LAT. Because secondary programs vary, the department is happy to assist students find the proper course level. The department grants AP Latin credit if the student has scored a "4" or better. This credit may be counted toward the major or minor. We also consider IB and other transfer credits on a case-by-case basis.

Classical Civilization Minor

Requirements for the Minor in Classical Civilization:

Six courses in Classics; Greek, Latin, and Biblical Hebrew language courses may be counted.

Greek or Latin Minor

Requirements for the Minor in Greek or Latin:

Five courses in either Greek or Latin and an additional course in history, which should be CLS 121 (History of Greece) or the study of a Greek historian in Greek, if the minor is in Greek, or CLS 126 (Roman Republic), CLS 129 (Roman Empire), or the study of a Latin historian in Latin, if the minor is in Latin.

Computer Engineering

Chair: Associate Professor S. Cotter

Faculty: Professors J. Spinelli; C. Traver; Associate Professors T. Buma, L. Dosiek, H. Hanson; Assistant Professor C. Pappu; Visiting Assistant Professor Z. Yang; Senior Lecturer J. Hedrick

Staff: G. Davison (Engineering Assistant), L. Galeo (Administrative Assistant)

The Computer Engineering program provides students with a solid basis in computer engineering and its underlying mathematics and science within the framework of a liberal arts education. We prepare students for immediate professional employment, graduate study, and entry into related professions. We believe that the rigor and depth of a computer engineering education combined with a broad study of the liberal arts provides an excellent background for students who wish to enter professions such as medicine, law, and business administration as well as engineering itself. Through our required international component, our emphasis on undergraduate research, and the personal attention that we give to each student, we educate well-rounded members of society who are prepared to excel in an increasingly multicultural and technological world.

The Computer Engineering program is offered by the Electrical, Computer, and Biomedical Engineering Department, with significant parts of the curriculum supported by the Computer Science Department. The Computer Engineering program is accredited by the Engineering Accreditation Commission of ABET, <http://www.abet.org>.

Educational objectives and student outcomes are listed on the department website.

Computer Engineering Approved Courses

Computer Science Courses

- CSC 055 - Working with the Web
- CSC 080 - History of Computing
- CSC 103 - Taming Big Data: Introduction to Computer Science
- CSC 104 - Robots Rule! Introduction to Computer Science
- CSC 105 - Game Development: Introduction to Computer Science
- CSC 106 - Can Computers Think? Introduction to Computer Science
- CSC 107 - Creative Computing: Introduction to Computer Science
- CSC 108 - Scientific Computing: Introduction to Computer Science
- CSC 112 - The Processed Pixel
- CSC 118 - Introduction to Computer and Logic Design
- CSC 120 - Programming on Purpose
- CSC 151 - Data Structures
- CSC 206 - Text Analytics
- CSC 233 - Data Analytics
- CSC 234 - Data Visualization
- CSC 235 - Modeling & Simulation

- CSC 236 - Computer Network Protocols
- CSC 237 - Data Communications and Networks
- CSC 240 - Web Programming
- CSC 243 - Bioinformatics: Information Technology in the Life Sciences
- CSC 245 - The Computer Science of Computer Games
- CSC 250 - Algorithm Design and Analysis
- CSC 260 - Large-Scale Software Development
- CSC 270 - Computer Organization
- CSC 281 - Computer Science Practicum 1
- CSC 282 - Computer Science Practicum 2
- CSC 283 - Computer Science Practicum 3
- CSC 290 - Computer Science Independent Study 1
- CSC 291 - Computer Science Independent Study 2
- CSC 292 - Computer Science Independent Study 3
- CSC 295H - Computer Science Honors Project 1
- CSC 296H - Computer Science Honors Project 2
- CSC 318 - Digital Design
- CSC 320 - Artificial Intelligence
- CSC 321 - Data Mining and Machine Learning
- CSC 325 - Robotics
- CSC 329 - Neural Networks
- CSC 385 - Computer Graphics
- CSC 483 - Selected Topics in Computer Science
- CSC 490 - Computer Science Independent Study 1
- CSC 491 - Computer Science Independent Study 2
- CSC 492 - Computer Science Independent Study 3
- CSC 497 - Computer Science Capstone Seminar
- CSC 498 - Computer Science Capstone Project 1
- CSC 499 - Computer Science Capstone Project 2

Electrical Engineering Courses

- ECE 101 - The Joy of Electronics
- ECE 118 - Introduction to Computer and Logic Design
- ECE 218 - Embedded Microcontroller Projects
- ECE 222 - Introduction to Circuits and Electronics
- ECE 225 - Electric Circuits
- ECE 240 - Circuits and Systems
- ECE 241 - Discrete Systems
- ECE 248 - Introduction to Semiconductor Devices and Circuits
- ECE 281 - Electrical and Computer Engineering Practicum 1
- ECE 282 - Electrical and Computer Engineering Practicum 2
- ECE 283 - Electrical and Computer Engineering Practicum 3
- ECE 295H - Electrical and Computer Engineering Honors Independent Project 1
- ECE 296H - Electrical and Computer Engineering Honors Independent Project 2
- ECE 310 - Electronic Devices
- ECE 318 - Digital Design
- ECE 325 - Acoustics of Speech Communication
- ECE 329 - Neural Networks
- ECE 336 - Computer Network Protocols
- ECE 337 - Data Communications and Networks

- ECE 341 - Energy Conversion
- ECE 342 - Power Electronics
- ECE 343 - Introduction to Electromagnetic Engineering
- ECE 344 - Electric Machines and Drives
- ECE 347 - Image Processing
- ECE 350 - Communication Systems
- ECE 351 - Probability and Digital Communications
- ECE 354 - VLSI System Design
- ECE 363 - Analysis and Design of Electronic Circuits
- ECE 366 - Control Systems
- ECE 386 - Introduction to Biomedical Instrumentation
- ECE 420 - Introduction to State Space Analysis and Control
- ECE 463 - Fundamentals of Wireless Electronics
- ECE 481 - Special Topics in Electrical and Computer Engineering
- ECE 482 - Special Topics in Electrical and Computer Engineering
- ECE 483 - Special Topics in Electrical and Computer Engineering
- ECE 487 - Medical Imaging Systems
- ECE 490 - Electrical and Computer Engineering Independent Study 1
- ECE 491 - Electrical and Computer Engineering Independent Study 2
- ECE 492 - Electrical and Computer Engineering Independent Study 3
- ECE 493 - Electrical and Computer Engineering Independent Study 4
- ECE 494 - Electrical and Computer Engineering Independent Study 5
- ECE 495 - Electrical and Computer Engineering Independent Study 6
- ECE 496 - Electrical and Computer Engineering Independent Study 7
- ECE 497 - Electrical and Computer Engineering Capstone Design Project 1
- ECE 498 - Electrical and Computer Engineering Capstone Design Project 2
- ECE 499 - Electrical and Computer Engineering Capstone Design Project 3

Computer Engineering, B.S.

Requirements for the Major:

A total of 40 courses including the following:

Math and Science:

Select One Calculus Sequence

Sequence One

- MTH 113 - Accelerated Single-Variable Calculus *
 - MTH 115 - Calculus 3: Differential Vector Calculus and Matrix Theory
 - PHY 120 - Matter in Motion
 - PHY 121 - Principles of Electromagnetics
- Students considering the IMP-120 & IMP-121 sequence should consult with their advisor.

Sequence Two

- MTH 110 - Calculus 1: Differential Calculus
- MTH 112 - Calculus 2: Integral Calculus

- MTH 115 - Calculus 3: Differential Vector Calculus and Matrix Theory
- PHY 120 - Matter in Motion
- PHY 121 - Principles of Electromagnetics

Sequence Three

- MTH 115 - Calculus 3: Differential Vector Calculus and Matrix Theory
- PHY 120 - Matter in Motion
- PHY 121 - Principles of Electromagnetics

Additional Requirements

- MTH 130 - Ordinary Differential Equations
or
- MTH 234 - Differential Equations
- MTH 197 - Discrete Mathematics for Computer Science
or
- MTH 199 - Introduction to Logic and Set Theory

One math elective from

- STA 104 - Introduction to Statistics
- MTH 117 - Calculus 4: Integral Vector Calculus *
- MTH 127 - Numerical Methods
- MTH 140 - Applied Linear Algebra
- STA 164 - Strategies of Experimentation: Statistical Design and Analysis of Experiments
- MTH 221 - Mathematical Cryptology *
- MTH 235 - Number Theory *
- MTH 238 - Methods of Applied Mathematics *
- STA 264 - Regression Analysis
- MTH 340 - Linear Algebra *
- *These math electives require MTH 199 as a prerequisite.

One Natural Science

One natural science elective numbered 100 or higher: any course (may or may not include a laboratory component) at level 100 or higher in Chemistry, Physics, Astronomy, Biology, Geosciences, or ENS 100 (ENS courses other than 100 do not satisfy this requirement). This major requirement is distinct from the Common Curriculum Natural Science with Laboratory requirement (which engineering majors satisfy by taking PHY 120).

Engineering Science:

- ESC 100 - Exploring Engineering

Computer Engineering Core:

One from

- CSC 103 - Taming Big Data: Introduction to Computer Science

- CSC 104 - Robots Rule! Introduction to Computer Science
- CSC 105 - Game Development: Introduction to Computer Science
- CSC 106 - Can Computers Think? Introduction to Computer Science
- CSC 107 - Creative Computing: Introduction to Computer Science
- CSC 108 - Scientific Computing: Introduction to Computer Science

And

- ECE 118 - Introduction to Computer and Logic Design
- ECE 218 - Embedded Microcontroller Projects
- ECE 225 - Electric Circuits
- ECE 240 - Circuits and Systems
- ECE 241 - Discrete Systems
- ECE 248 - Introduction to Semiconductor Devices and Circuits
- ECE 351 - Probability and Digital Communications
- CSC 120 - Programming on Purpose
- CSC 151 - Data Structures

- CSC 250 - Algorithm Design and Analysis
or
- CSC 260 - Large-Scale Software Development

- CSC 270 - Computer Organization

- CSC 333 - High Performance Computing
or
- CSC 335 - Operating Systems
or
- CSC 375 - Compiler Design
or
- ECE 366 - Control Systems

- ECE 318 - Digital Design
or
- CSC 318 - Digital Design

- ECE 336 - Computer Network Protocols
or
- CSC 236 - Computer Network Protocols
or
- ECE 337 - Data Communications and Networks
or
- CSC 237 - Data Communications and Networks

Computer Engineering Electives:

Three additional CSC or ECE courses numbered 300 or higher. Students may also enroll in EE graduate engineering courses offered through Clarkson Graduate School. Please see the Clarkson Graduate School catalog for course descriptions and joint degree program options.

Capstone Design:

- ECE 497 - Electrical and Computer Engineering Capstone Design Project 1
- ECE 498 - Electrical and Computer Engineering Capstone Design Project 2
- ECE 499 - Electrical and Computer Engineering Capstone Design Project 3

Electives:

Elective courses should be chosen in consultation with the student's advisor to satisfy the Common Curriculum and to enhance individual educational objectives. These elective courses, in addition to the electives in math, science and computer engineering, can be customized to complete a minor and pursue specific interests.

Sample schedule starting with Math 113:

Students with different math backgrounds will have slightly different math sequences.

First Year

- ESC 100 - Exploring Engineering
- FPR 100 - First-Year Preceptorial
- MTH 113 - Accelerated Single-Variable Calculus
- MTH 115 - Calculus 3: Differential Vector Calculus and Matrix Theory
- PHY 120 - Matter in Motion
- Science elective
- PHY 121 - Principles of Electromagnetics
- Electives (2)*
- CSC 103 - Taming Big Data: Introduction to Computer Science **
or
- CSC 104 - Robots Rule! Introduction to Computer Science **
or
- CSC 105 - Game Development: Introduction to Computer Science **
or
- CSC 106 - Can Computers Think? Introduction to Computer Science **
or
- CSC 107 - Creative Computing: Introduction to Computer Science **
or
- CSC 108 - Scientific Computing: Introduction to Computer Science **

Science elective
- CSC 120 - Programming on Purpose

Second Year

- ECE 118 - Introduction to Computer and Logic Design
- MTH 197 - Discrete Mathematics for Computer Science *
or
- MTH 199 - Introduction to Logic and Set Theory *
- ECE 225 - Electric Circuits
- ECE 218 - Embedded Microcontroller Projects

- SRS 200 - Sophomore Research Seminar
- MTH 130 - Ordinary Differential Equations
or
- MTH 234 - Differential Equations
- ECE 240 - Circuits and Systems
- ECE 241 - Discrete Systems ***
- CSC 151 - Data Structures
- Electives*

Third Year****

- CSC 270 - Computer Organization
- CSC 250 - Algorithm Design and Analysis
or
- CSC 260 - Large-Scale Software Development
- ECE 318 - Digital Design
or
- CSC 318 - Digital Design
- ECE 248 - Introduction to Semiconductor Devices and Circuits
- ECE 497 - Electrical and Computer Engineering Capstone Design Project 1 (1/2)
ECE or CSC elective
Electives (5)*

Fourth Year

- Math elective
- ECE 336 - Computer Network Protocols
or
- CSC 236 - Computer Network Protocols
or
- ECE 337 - Data Communications and Networks
or
- CSC 237 - Data Communications and Networks
- ECE 351 - Probability and Digital Communications
- ECE 498 - Electrical and Computer Engineering Capstone Design Project 2 (1/2)
- ECE 499 - Electrical and Computer Engineering Capstone Design Project 3
- CSC 335 - Operating Systems
or
- CSC 333 - High Performance Computing
or
- CSC 375 - Compiler Design
or
- ECE 366 - Control Systems
- ECE or CSC electives (2)
Electives (2)*

Note(s):

* Electives should be chosen to meet Common Curriculum requirements and attain individual educational goals. Students should work with their academic advisor to develop an appropriate plan of study.

** One course from CSC 103 - CSC 108 and either MTH 197 or MTH 199 should be taken before the winter term of the second year.

**** The fall term of the third year is the most common term for going on a full term abroad.

With appropriate planning, students may go on a winter or spring term abroad instead.

Requirements for Honors in Computer Engineering:

In addition to meeting all of the general college requirements for honors, candidates for honors in computer engineering must present their senior project at the Steinmetz Symposium.

Requirements for the Five-Year Combined BS in Computer Engineering and MS in Electrical Engineering:

Union undergraduate students may apply to this program offered in conjunction with Clarkson University Capital Region Campus (formerly Union Graduate College) where both a B.S. and an M.S. degree are earned in five years. Students are encouraged to apply during sophomore year but no later than the end of the fall term of their senior year. A 3.0 overall GPA is expected for admission. Students enrolled in the program may count up to three Electrical or Computer Engineering courses toward both degrees. A petition requesting overlapping degree credit must be approved by the undergraduate and graduate advisors and filed with Clarkson University. The Master of Science program is described in the catalog of Clarkson University at <http://graduate.clarkson.edu/engineering/>

Computer Engineering Minor

Due to significant curricular overlap, Electrical Engineering and Computer Science majors are **not allowed to minor** in Computer Engineering.

Core Requirements

Take all of the following:

- ECE 118 - Introduction to Computer and Logic Design
- ECE 225 - Electric Circuits
- CSC 120 - Programming on Purpose
- CSC 151 - Data Structures

Additional ECE/CSC courses

Take two from the following:

- ECE 218 - Embedded Microcontroller Projects
- ECE 318 - Digital Design
or
- CSC 318 - Digital Design
- ECE 336 - Computer Network Protocols
or
- CSC 236 - Computer Network Protocols

- ECE 337 - Data Communications and Networks
or
- CSC 237 - Data Communications and Networks
- CSC 250 - Algorithm Design and Analysis
- CSC 270 - Computer Organization

Computer Science

Chair: Associate Professor J. Rieffel

Faculty: Associate Professors A. Cass, C. Fernandes, J. Rieffel, K. Striegnitz, N. Webb; Assistant Professors M. Anderson, P. Talkad Sukumar; Visiting Assistant Professor Z. Orhan.

Staff: L. Galeo (Administrative Assistant), M. McClosky (System Administrator)

The department offers a B.S. in Computer Science, supports the B.S. in Computer Engineering offered by the Electrical, Computer, and Biomedical Engineering Department, and supports a program in Digital Art with the Visual Arts department.

The department also participates in offering three minors: a traditional minor in Computer Science, a minor in Data Analytics, and a minor in Digital Media in collaboration with the Visual Arts department.

Introductory Courses

Each CS major or minor program includes one course from the following list: (CSC 103 , CSC 104 , CSC 105 , CSC 106 , CSC 107 , CSC 108) Each course focuses on a distinct application area. The courses all cover the same basic computer science concepts and programming skills and only one may be counted toward a major or minor. These courses are open to non-majors and are prerequisite to certain intermediate courses that are also available to and suitable for non-majors. A grade of C- or better is required in order to take any course that requires an introductory course as a prerequisite. Once one has passed an introductory course with a C- or better, no other introductory course may be taken for credit. All of these courses satisfy SET or QMR of the Common Curriculum.

Computer Science, B.S.

Requirements for the Major:

11 computer science courses: six core + five electives. Plus the capstone project sequence. Additional math and science requirements detailed below.

Six core courses:

An introductory course, chosen from:

- CSC 103 - Taming Big Data: Introduction to Computer Science
 - CSC 104 - Robots Rule! Introduction to Computer Science
 - CSC 105 - Game Development: Introduction to Computer Science
 - CSC 106 - Can Computers Think? Introduction to Computer Science
 - CSC 107 - Creative Computing: Introduction to Computer Science
 - CSC 108 - Scientific Computing: Introduction to Computer Science
- and **all** of the following courses:
- CSC 120 - Programming on Purpose
 - CSC 151 - Data Structures
 - CSC 250 - Algorithm Design and Analysis
 - CSC 260 - Large-Scale Software Development

- CSC 270 - Computer Organization

Five Electives:

Majors choose **five** distinct courses numbered 110 or higher. Four must be at least 300-level, with one from the Theory group, and one from the Systems group.

The Theory group is:

- CSC 350 - Theory of Computing
- CSC 370 - Programming Languages

The Systems group is:

- CSC 333 - High Performance Computing
- CSC 335 - Operating Systems
- CSC 375 - Compiler Design

Capstone sequence

In the capstone sequence students engage in either independent or guided research in computer science. Note that the guided research option is not offered in all years.

Independent research option:

- CSC 497 - Computer Science Capstone Seminar (Normally taken in the spring of Junior year)
- CSC 498 - Computer Science Capstone Project 1 (Normally taken in the fall of Senior year)
- CSC 499 - Computer Science Capstone Project 2 (Normally taken in the winter of Senior year)

Guided research option:

- CSC 497 - Computer Science Capstone Seminar (Normally taken in the spring of Junior year)
- CSC 498 - Computer Science Capstone Project 1 (Normally taken in the winter of Senior year)
- An additional 300-level elective

Two science or engineering courses, both outside of CS:

One must satisfy the Core Curriculum SET requirement, the other must satisfy SCLB. At least one of these must be a major-level (i.e. at least 100-level) course from Biology, Chemistry, Environmental Science, Geology, Physics and Astronomy, Psychology, Electrical Engineering, Mechanical Engineering, Biomedical Engineering, or ESC-100.

Courses cross-listed with CS are not acceptable.

Required Math courses:

A calculus sequence:

- MTH 105 - Differential Calculus with Precalculus
 - MTH 112 - Calculus 2: Integral Calculus
- or**

- MTH 110 - Calculus 1: Differential Calculus
- MTH 112 - Calculus 2: Integral Calculus
- or
- MTH 113 - Accelerated Single-Variable Calculus

Discrete Math:

- MTH 197 - Discrete Mathematics for Computer Science
- or
- MTH 199 - Introduction to Logic and Set Theory

A math elective:

One Math elective chosen in consultation with the advisor. This can be satisfied with any MTH course, Any STA course or one of ECO 243, and PSY 200; suggestions are as follows:

- ECO 243 - Introduction to Econometrics
- MTH 128 - Probability
- MTH 140 - Applied Linear Algebra
- MTH 221 - Mathematical Cryptology
- MTH 340 - Linear Algebra
- PSY 200 - Statistical Methods in Psychology
- STA 104 - Introduction to Statistics
- STA 264 - Regression Analysis

A typical first year major program includes

- A 100-level introductory course
- CSC 120 - Programming on Purpose
- A calculus sequence
- First year Core Curriculum coursework

Requirements for Honors in Computer Science

Candidates for honors in computer science must have a minimum overall grade point average of 3.3, a minimum grade point average of 3.3 in the major with at least 3 grades of A- or better in full credit CSC courses numbered 100 or above, a grade of at least A- for CSC 499 or IDM 499, and must present the senior project at the Steinmetz Symposium.

Course Selection Guidelines

Placement: A score of 4 or 5 on the AP Computer Science "A" exam will count as having satisfied one of the introductory courses (CSC 103, CSC 104, CSC 105, CSC 106, CSC 107, CSC 108). A score of 4 or 5 on the AP Computer Science Principles exam will count as having satisfied a 100-level elective.

Computer Science (ID), B.S.

Requirements for the ID Major:

8 computer science courses: five core + three electives. Plus the capstone project sequence. MTH 197 is also required.

Five core CS courses & Discrete Mathematics:

An introductory course, chosen from:

- CSC 103 - Taming Big Data: Introduction to Computer Science
- CSC 104 - Robots Rule! Introduction to Computer Science
- CSC 105 - Game Development: Introduction to Computer Science
- CSC 106 - Can Computers Think? Introduction to Computer Science
- CSC 107 - Creative Computing: Introduction to Computer Science
- CSC 108 - Scientific Computing: Introduction to Computer Science

All of the following:

- CSC 120 - Programming on Purpose
- CSC 151 - Data Structures
- CSC 250 - Algorithm Design and Analysis
- CSC 260 - Large-Scale Software Development

And

- MTH 197 - Discrete Mathematics for Computer Science
- or
- MTH 199 - Introduction to Logic and Set Theory

Three electives:

ID majors choose three distinct courses numbered 110 or higher, two of which must be numbered 300 or higher.

Capstone project sequence

In the capstone sequence students engage in either independent or guided research in computer science. Note that the guided research option is not offered in all years.

Independent research option:

- CSC 497 - Computer Science Capstone Seminar (Normally taken in the spring of Junior year)
- CSC 498 - Computer Science Capstone Project 1 (Normally taken in the fall of Senior year)
- CSC 499 - Computer Science Capstone Project 2 (Normally taken in the winter of Senior year. CSC 499 satisfies the senior writing requirement.)

Note: The project must be designed to integrate the fields composing the major.

Guided research option:

- CSC 497 - Computer Science Capstone Seminar (Normally taken in the spring of Junior year)
- CSC 489 - Guided Research in Computer Science (Normally taken in the winter of Senior year. CSC 489 satisfies the senior writing requirement.)
- An additional 300-level elective

Requirements for Honors in Computer Science

Candidates for honors in computer science must have a minimum overall grade point average of 3.3, a minimum grade point average of 3.3 in the major with at least 3 grades of A- or better in full credit CSC courses numbered 100 or above, a grade of at least A- for CSC 499 or IDM 499, and must present the senior project at the Steinmetz Symposium.

Course Selection Guidelines

Placement: A score of 4 or 5 on the AP Computer Science "A" exam will count as having satisfied one of the introductory courses (CSC 103, CSC 104, CSC 105, CSC 106, CSC 107, CSC 108). A score of 4 or 5 on the AP Computer Science Principles exam will count as having satisfied a 100-level elective.

Computer Science Minor

Requirements for the Minor:

6 computer science courses: **three core + three additional courses** chosen with the approval of an advisor from Computer Science. MTH 197 or MTH 199 is also required. Computer Engineering majors are not eligible for this minor.

Three Core CS courses and Discrete Mathematics:

An introductory course, chosen from:

- CSC 103 - Taming Big Data: Introduction to Computer Science
- CSC 104 - Robots Rule! Introduction to Computer Science
- CSC 105 - Game Development: Introduction to Computer Science
- CSC 106 - Can Computers Think? Introduction to Computer Science
- CSC 107 - Creative Computing: Introduction to Computer Science
- CSC 108 - Scientific Computing: Introduction to Computer Science

All of the following:

- CSC 120 - Programming on Purpose
- CSC 151 - Data Structures

And

- MTH 197 - Discrete Mathematics for Computer Science
- or
- MTH 199 - Introduction to Logic and Set Theory

Three additional CS courses:

Minors choose **three** additional Computer Science courses, at least one of which is numbered 250 or higher. Only one course numbered below 100 may count towards the minor.

Data Analytics

Director: Associate Professor N. Webb (Computer Science)

The department of Computer Science offers a minor in Data Analytics, the process of analyzing, revealing, interpreting and visualizing information concealed inside data. The analysis of datasets is already revolutionizing our understanding of fields from genetics to Environmental Science, Economics to Engineering, English, History and Political Science. The minor will introduce students to the concepts underlying the acquisition, transformation, analysis and visualization of data and analytical outcomes, and will leverage courses across the college that address analytics in a discipline-specific way.

Data Analytics Minor

Requirements for the Minor

The department of Computer Science offers a minor in Data Analytics, the process of analyzing, revealing, interpreting and visualizing information concealed inside data. The analysis of datasets is already revolutionizing our understanding of fields from genetics to Environmental Science,

Economics to Engineering, English, History and Political Science. The minor will introduce students to the concepts and techniques underlying the acquisition, transformation, analysis and visualization of data and analytical outcomes, and will leverage courses across the college that address analytics in a discipline-specific way. Requires the following six courses, four core courses and two electives. A maximum of **three** courses from the same department as your major may be used for the minor with advisor approval.

Four Core Courses:

An introductory CS course, one of the following:

- CSC 103 - Taming Big Data: Introduction to Computer Science
- CSC 104 - Robots Rule! Introduction to Computer Science
- CSC 105 - Game Development: Introduction to Computer Science
- CSC 106 - Can Computers Think? Introduction to Computer Science
- CSC 107 - Creative Computing: Introduction to Computer Science
- CSC 108 - Scientific Computing: Introduction to Computer Science

A statistics course, one of the following:

- ECO 243 - Introduction to Econometrics
- MER 301 - Engineering Reliability
- PSC 220 - Social Data Analysis
- PSY 200 - Statistical Methods in Psychology
- SOC 300 - Quantitative Methods of Social Research
- STA 104 - Introduction to Statistics
- STA 164 - Strategies of Experimentation: Statistical Design and Analysis of Experiments

A data analytics course, one of the following:

- CSC 233 - Data Analytics
- ECO 364 - Business Analytics
- ENS 215 - Exploring Environmental Data

A data visualization course, one of the following:

- CSC 234 - Data Visualization
- ECO 134 - Data Visualization

Two additional courses:

Minors choose **two** additional courses. Only one course numbered below 100 may count towards the minor. Suggested courses are below. Additional courses may be approved by the minor director. Students may also take an independent study with a faculty member, in consultation with the minor director.

- AST 230 - Observational Astronomy
- AST 240 - Radio Astronomy
- BIO 324 - Plant Ecology
- CHM 240 - Analytical Chemistry
- CHN 301 - Advanced Intermediate Chinese 2
- CHN 401 - Media China
- CSC 206 - Text Analytics
- CSC 243 - Bioinformatics: Information Technology in the Life Sciences
- CSC 235 - Modeling & Simulation
- CSC 321 - Data Mining and Machine Learning
- CSC 340 - Introduction to Databases
- ECE 329 - Neural Networks
- ECE 347 - Image Processing
- ECO 338 - Quantitative Methods in Economics
- ECO 353 - Seminar in Econometrics
- ENS 204 - Geographic Information Systems

- GEO 207 - Stable Isotopes in Environmental Science
- GEO 209 - Paleoclimatology
- GEO 302 - Geochemical Systems and Modeling
- GEO 303 - Earthquakes and the study of the Earth's Interior
- GEO 305 - Global Biogeochemical Cycles
- MTH 140 - Applied Linear Algebra
- MTH 340 - Linear Algebra
- MLT 209 - The New Wall of China
- PHY 122 - Relativity, Quantum, and Their Applications
- PHY 123 - Heat and Light
- PHY 300 - Methods of Modern Experimental Physics
- PHY 310 - Advanced Topics in Physics 1
- PSC 123 - Topics in Mathematical Political Science
- STA 264 - Regression Analysis
- STA 364 - Big Data Analytics

Exceptions

- It is not possible to take both a Statistics minor and a Data Analytics minor

Digital Media

Directors: Associate Professors L. Cox (Visual Arts), K. Striegnitz (Computer Science)

Digital Media Minor

Requirements for the Minor:

The digital media minor allows students to synthesize introductory and intermediate classes from computer science and visual arts that explore the interaction between creative and computational processes. These include basic courses in digital art, traditional studio art, web programming and programming for image and sound processing. Students will explore a range of visual and electronic applications, and learn the basic tools necessary to incorporate visualization mechanisms into work within other fields of study. Requires the following six courses, three from computer science and three from visual arts:

- an introductory CS course: CSC 107 - Creative Computing: Introduction to Computer Science (strongly recommended)
- CSC 234 - Data Visualization
- or CSC 240 - Web Programming
- or CSC 245 - The Computer Science of Computer Games
- An additional CS course numbered above 110, chosen in consultation with the minor advisor.
- AVA 160 - Digital Art
- AVA 262 - Real and Recorded Time - 4D Art
- One non-Digital Visual Arts studio course, chosen in consultation with the minor advisor or AMU 140.

Exceptions:

- Courses cross-listed in both CSC and AVA do not count towards this minor.
- A Computer Science major wishing to achieve this minor may not count the introductory CS course towards it. Instead, the student must take any fourth course in Visual Arts (Visual Arts Studio or Art History course), chosen in consultation with the minor advisor.

- A Visual Arts major wishing to achieve this minor must take a fourth CS course numbered above 110, chosen in consultation with the minor advisor.
- A CS-Art interdepartmental major is not eligible for this minor

Economics

Chair: Professor Lewis Davis

Faculty: Professors L. Davis, B. Lewis, T. McCarty, E. Motahar, Stephen J. Schmidt, Shelton S. Schmidt, M.F. Sener, Y. Song; Assistant Professor K. Raeburn, D. Cheng, H. Dang; Visiting Assistant Professors C. Abraham, F. Dogruer, D. Garrido-Garcia, E. Karadas

Staff: J. Clifford (Administrative Assistant)

Prerequisites: ECO 101 is a prerequisite for all courses in the department, unless otherwise indicated.

Note on 300 and 400-level courses: 300 and 400-level courses carry one or more of the core courses ECO 241 , ECO 242 , or ECO 243 as prerequisites.

Economics, B.A.

Requirements for the Major in Economics:

Twelve courses in the department:

- ECO 101 - Introduction to Economics
- ECO 241 - Microeconomic Analysis
- ECO 242 - Macroeconomic Theory and Policy
- ECO 243 - Introduction to Econometrics
- ECO 498 - Economics Senior Thesis 1
- ECO 499 - Economics Senior Thesis 2
- and**
- six others

Majors are required to take a minimum of three 300 or 400-level courses in the department (in addition to ECO 498 and ECO 499). ECO 390 may not be counted as a 300-level course to satisfy these requirements.

Majors are required to take one seminar course as one of their three 300-level electives. The seminar course must be from one of the economics courses listed on the course catalogue with the word "seminar" in its title. Students cannot petition to have courses taken on terms abroad or at other institutions substitute for the seminar course.

Completion of

- MTH 105 - Differential Calculus with Precalculus
or
- MTH 110 - Calculus 1: Differential Calculus
or
- MTH 113 - Accelerated Single-Variable Calculus
(or equivalent advanced placement credit) is required prior to enrolling in ECO 241 or ECO 242

Additional Requirements

Majors and Interdepartmental majors should normally complete the core sequence of ECO 241 , ECO 242 , and ECO 243 by the beginning of the junior year. This will allow sufficient time to take upper-level courses prior to the senior thesis. Majors and Interdepartmental majors who have reached the junior year may not enroll in courses numbered below 240, except ECO 123 or ECO 134 . Students may not count toward the major more than one elective that does not list ECO 101 as a prerequisite. Also, students may not count toward the major more than one internship-related course.

Majors and Interdepartmental majors must have a minimum grade of C in each of the courses in the core sequence of ECO 241, ECO 242, and ECO 243 before taking ECO 498 -ECO 499 , or IDM 498 -IDM 499 with Economics as one component. Students receiving a grade lower than C in any of the core sequence of ECO 241, ECO 242, and ECO 243 may repeat the core course only once.

Majors and Interdepartmental majors must complete a seminar course as a prerequisite for enrollment in ECO 498 or IDM 498; concurrent enrollment would be allowed.

Majors and Interdepartmental majors taking ECO 498-ECO 499, or IDM 498-IDM 499 with Economics as one component, must pass an oral defense of their senior thesis proposal before enrolling in ECO 499 or IDM 499.

Students interested in economics might also consider the Quantitative Economics track or a major in Managerial Economics. Students planning graduate study in economics or business are advised to take additional courses in mathematics or consider the Quantitative Economics track as their advisors recommend.

Requirements for Honors in Economics:

Departmental honors require that a student enroll in and successfully complete the Honors Program. The eligibility requirements for the honors program in economics are, in addition to the college-wide requirements, (1) a minimum grade average of 3.3 in Economics 241, 242, and 243, (2) nomination for honors at the end of the first term of thesis work by the advisor and first-term oral examiner, (3) presentation in the honors poster session in the second term of thesis work, (4) a minimum grade of "A minus" on the senior thesis; and (5) a presentation in the Steinmetz Symposium in the Spring term.

Course Selection Guidelines

Course Sequence: Students intending to major in economics should take ECO 101 in the first year, and complete MTH 101 or MTH 105 or MTH 110 in the first year if possible, early in the sophomore year if not. They should also take one or more 200-level electives in the first or second year, since these courses are not open to junior and senior majors. In the sophomore year they should take the core ECO 241 , ECO 242 , ECO 243 sequence; the sequence need not be taken in numerical order but ECO 243 should normally not be taken first. Majors should complete several 300-level elective courses as juniors prior to enrolling in senior thesis, including where possible courses in the area of economics in which the thesis will be written; interdepartmental majors should complete at least one such course in the junior year, and preferably more.

Placement: The economics department gives credit for ECO 101 to students receiving a score of 5, 6, or 7 on the Higher Level International Baccalaureate exam, a grade of A or B on the economics A-levels, and a score of 4 or 5 on both the AP Microeconomics and Macroeconomics exam, but does not give credit for ECO 101 to students who have taken only one of the two AP exams, regardless of the score received.

Prerequisites: ECO 101 is a prerequisite for all courses in the department, unless otherwise indicated.

Economics, Managerial Economics, B.A.

- See Managerial Economics, B.A.

Economics, Quantitative Economics Track, B.A.

Requirements for the Quantitative Economics Track:

Quantitative Economics permits students who have a strong interest in mathematics to enhance their understanding of economic theory by concentrating on course work where the use of mathematics is especially productive. It is designed primarily for those who expect to go to graduate school, particularly in economics. Advisors: Professors Stephen J. Schmidt and Shelton S. Schmidt.

Mathematics courses should be selected in consultation with your economics advisor. The senior thesis, ECO 498-ECO 499, should make use of the quantitative nature of the track.

- ECO 101 - Introduction to Economics
- ECO 241 - Microeconomic Analysis

- ECO 242 - Macroeconomic Theory and Policy
- ECO 243 - Introduction to Econometrics
At least one seminar course.
- ECO 498 - Economics Senior Thesis 1
- ECO 499 - Economics Senior Thesis 2

As well as three courses from among:

- ECO 338 - Quantitative Methods in Economics
 - ECO 341 - Current Topics in Microeconomics
 - ECO 352 - Seminar: Contemporary Problems in Macroeconomics
 - ECO 353 - Seminar in Econometrics
- two additional economics courses; and
 - three mathematics courses above the level of MTH 110

Requirements for Honors in Economics:

Departmental honors require that a student enroll in and successfully complete the Honors Program. The eligibility requirements for the honors program in economics are, in addition to the college-wide requirements, (1) a minimum grade average of 3.3 in Economics 241, 242, and 243, (2) nomination for honors at the end of the first term of thesis work by the advisor and first-term oral examiner, (3) presentation in the honors poster session in the second term of thesis work, (4) a minimum grade of "A minus" on the senior thesis; and (5) a presentation in the Steinmetz Symposium in the Spring term.

Course Selection Guidelines

Course Sequence: Students intending to major in economics should take ECO 101 in the first year, and complete MTH 101 or MTH 105 or MTH 110 in the first year if possible, early in the sophomore year if not. They should also take one or more 200-level electives in the first or second year, since these courses are not open to junior and senior majors. In the sophomore year they should take the core ECO 241, ECO 242, ECO 243 sequence; the sequence need not be taken in numerical order but ECO 243 should normally not be taken first. Majors should complete several 300-level elective courses as juniors prior to enrolling in senior thesis, including where possible courses in the area of economics in which the thesis will be written; interdepartmental majors should complete at least one such course in the junior year, and preferably more.

Placement: The economics department gives credit for ECO 101 to students receiving a score of 5, 6, or 7 on the Higher Level International Baccalaureate exam, a grade of A or B on the economics A-levels, and a score of 4 or 5 on both the AP Microeconomics and Macroeconomics exam, but does not give credit for ECO 101 to students who have taken only one of the two AP exams, regardless of the score received.

Prerequisites: ECO 101 is a prerequisite for all courses in the department, unless otherwise indicated.

Economics (ID), B.A.

Requirements for the Interdepartmental Major in Economics:

Interdepartmental majors

Interdepartmental majors in economics and another field are required to take at least eight courses in economics, including

- ECO 101 - Introduction to Economics
- ECO 241 - Microeconomic Analysis
- ECO 242 - Macroeconomic Theory and Policy
- ECO 243 - Introduction to Econometrics
- at least one *seminar course.

and either

- ECO 498 - Economics Senior Thesis 1
- ECO 499 - Economics Senior Thesis 2 or
- a senior thesis drawing on both economics and the other discipline.
ECO 390 may not be counted as a 300-level course to satisfy these requirements.

Additional Requirements

Majors and Interdepartmental majors should normally complete the core sequence of ECO 241 , ECO 242 , and ECO 243 by the beginning of the junior year. This will allow sufficient time to take upper-level courses prior to the senior thesis. Majors and Interdepartmental majors who have reached the junior year may not enroll in courses numbered below 240, except ECO 123 or ECO 134 . Students may not count toward the major more than one elective that does not list ECO 101 as a prerequisite. Also, students may not count toward the major more than one internship-related course.

Majors and Interdepartmental majors must have a minimum grade of C in each of the courses in the core sequence of ECO 241, ECO 242, and ECO 243 before taking ECO 498 -ECO 499 , or IDM 498 -IDM 499 with Economics as one component. Students receiving a grade lower than C in any of the core sequence of ECO 241, ECO 242, and ECO 243 may repeat the core course only once.

Majors and Interdepartmental majors must complete a seminar course as a prerequisite for enrollment in ECO 498 or IDM 498; concurrent enrollment would be allowed.

Majors and Interdepartmental majors taking ECO 498-ECO 499, or IDM 498-IDM 499 with Economics as one component, must pass an oral defense of their senior thesis proposal before enrolling in ECO 499 or IDM 499.

Students interested in economics might also consider the Quantitative Economics track or a major in Managerial Economics. Students planning graduate study in economics or business are advised to take additional courses in mathematics or consider the Quantitative Economics track as their advisors recommend.

Requirements for Honors in Economics:

Departmental honors require that a student enroll in and successfully complete the Honors Program. The eligibility requirements for the honors program in economics are, in addition to the college-wide requirements, (1) a minimum grade average of 3.3 in Economics 241, 242, and 243, (2) nomination for honors at the end of the first term of thesis work by the advisor and first-term oral examiner, (3) presentation in the honors poster session in the second term of thesis work, (4) a minimum grade of "A minus" on the senior thesis; and (5) a presentation in the Steinmetz Symposium in the Spring term.

Course Selection Guidelines

Course Sequence: Students intending to major in economics should take ECO 101 in the first year, and complete MTH 101 or MTH 105 or MTH 110 in the first year if possible, early in the sophomore year if not. They should also take one or more 200-level electives in the first or second year, since these courses are not open to junior and senior majors. In the sophomore year they should take the core ECO 241 , ECO 242 , ECO 243 sequence; the sequence need not be taken in numerical order but ECO 243 should normally not be taken first. Majors should complete several 300-level elective courses as juniors prior to enrolling in senior thesis, including where possible courses in the area of economics in which the thesis will be written; interdepartmental majors should complete at least one such course in the junior year, and preferably more.

Placement: The economics department gives credit for ECO 101 to students receiving a score of 5, 6, or 7 on the Higher Level International Baccalaureate exam, a grade of A or B on the economics A-levels, and a score of 4 or 5 on both the AP Microeconomics and Macroeconomics exam, but does not give credit for ECO 101 to students who have taken only one of the two AP exams, regardless of the score received.

Prerequisites: ECO 101 is a prerequisite for all courses in the department, unless otherwise indicated.

Economics Minor

Requirements for the Minor:

Six economics courses including:

- ECO 101 - Introduction to Economics
- ECO 241 - Microeconomic Analysis
- ECO 242 - Macroeconomic Theory and Policy
- ECO 243 - Introduction to Econometrics

(unless waived by the department chair based on an equivalent course in the student's major. Requirement can be waived for Economics minors who passed STA 264 , MER 301 or PSY 200)

and

- at least one course at the 300 or 400-level

Additional notes:

Economics minor does not have a minimum grade of C requirement for the core sequence ECO 241, ECO 242 and ECO 243.

Electrical Engineering

Chair: Associate Professor S. Cotter

Faculty: Professors J. Spinelli, C. Traver; Associate Professors T. Buma, L. Dosiek, H. Hanson; Assistant Professor C. Pappu; Visiting Assistant Professor Z. Yang; Senior Lecturer J. Hedrick

Staff: G. Davison (Engineering Assistant), L. Galeo (Administrative Assistant)

The Electrical Engineering program provides students with a solid basis in electrical engineering and its underlying mathematics and science within the framework of a liberal arts education. We prepare students for immediate professional employment, graduate study, and entry into related professions. We believe that the rigor and depth of an electrical engineering education combined with a broad study of the liberal arts provides an excellent background for students who wish to enter professions such as medicine, law, and business administration as well as engineering itself. Through the required international component, our emphasis on undergraduate research, our flexible curriculum, and the personal attention that we give to each student, we educate well-rounded members of society who are prepared to excel in an increasingly multicultural and technological world.

The Electrical Engineering program is offered by the Electrical, Computer and Biomedical Engineering department, and is accredited by the Engineering Accreditation Commission of ABET, <http://www.abet.org>.

Educational objectives and student outcomes are listed on the department website.

Electrical Engineering, B.S.

Requirements for the Major:

A total of 40 courses including the following:

Math and Science:

Select One Calculus Sequence

Sequence One

- MTH 113 - Accelerated Single-Variable Calculus
- MTH 115 - Calculus 3: Differential Vector Calculus and Matrix Theory
- MTH 117 - Calculus 4: Integral Vector Calculus
- PHY 120 - Matter in Motion
- PHY 121 - Principles of Electromagnetics

Sequence Two

- MTH 113 - Accelerated Single-Variable Calculus
- IMP 120 - Integrated Math/Physics
- IMP 121 - Integrated Math/Physics

Sequence Three

- MTH 110 - Calculus 1: Differential Calculus
- MTH 112 - Calculus 2: Integral Calculus
- MTH 115 - Calculus 3: Differential Vector Calculus and Matrix Theory
- MTH 117 - Calculus 4: Integral Vector Calculus
- PHY 120 - Matter in Motion
- PHY 121 - Principles of Electromagnetics

Sequence Four

- MTH 100 - Calculus with Precalculus 1
- MTH 101 - Calculus with Precalculus 2
- MTH 102 - Calculus with Precalculus 3
- MTH 115 - Calculus 3: Differential Vector Calculus and Matrix Theory
- MTH 117 - Calculus 4: Integral Vector Calculus
- PHY 120 - Matter in Motion
- PHY 121 - Principles of Electromagnetics

Additional Requirements

- MTH 130 - Ordinary Differential Equations
or
- MTH 234 - Differential Equations

One natural science elective numbered 100 or higher: any course (may or may not include a laboratory component) at level 100 or higher in Chemistry, Physics, Astronomy, Biology, Geosciences, or ENS 100 (ENS courses other than 100 do not satisfy this requirement).

This major requirement is distinct from the Common Curriculum Natural Science with Laboratory requirement (which engineering majors satisfy by taking PHY 120).

One Math or Science elective numbered 100 or higher (if a science elective is chosen, it must meet the same requirements as outlined for the natural science elective above).

Engineering and Computer Science:

- ESC 100 - Exploring Engineering

One from

- CSC 103 - Taming Big Data: Introduction to Computer Science
- CSC 104 - Robots Rule! Introduction to Computer Science
- CSC 105 - Game Development: Introduction to Computer Science
- CSC 106 - Can Computers Think? Introduction to Computer Science
- CSC 107 - Creative Computing: Introduction to Computer Science
- CSC 108 - Scientific Computing: Introduction to Computer Science

Electrical Engineering Core:

- ECE 101 - The Joy of Electronics
- ECE 118 - Introduction to Computer and Logic Design
- ECE 218 - Embedded Microcontroller Projects
- ECE 225 - Electric Circuits
- ECE 240 - Circuits and Systems
- ECE 241 - Discrete Systems
- ECE 248 - Introduction to Semiconductor Devices and Circuits
- ECE 343 - Introduction to Electromagnetic Engineering
- ECE 350 - Communication Systems
- ECE 351 - Probability and Digital Communications
- ECE 363 - Analysis and Design of Electronic Circuits
- ECE 366 - Control Systems

Electrical Engineering Electives:

Three additional ECE courses numbered 300 or higher. Students may also enroll in graduate engineering courses offered through Clarkson Graduate School, Capital Region Campus. Please see the Clarkson Graduate School catalog for course descriptions and joint degree program options.

Capstone Design:

- ECE 497 - Electrical and Computer Engineering Capstone Design Project 1
- ECE 498 - Electrical and Computer Engineering Capstone Design Project 2
- ECE 499 - Electrical and Computer Engineering Capstone Design Project 3

Electives:

Electives should be chosen in consultation with the student's advisor to meet the Common Curriculum requirements and enhance educational objectives. These elective courses, in addition to the five electives in math, science and electrical and computer engineering, can be customized to complete a double-major or one/or more minors.

Sample schedule starting with Math 113:

Students with different math backgrounds will have slightly different math sequences.

First Year

- ESC 100 - Exploring Engineering
- ECE 101 - The Joy of Electronics
- FPR 100 - First-Year Preceptorial
- MTH 113 - Accelerated Single-Variable Calculus
- MTH 115 - Calculus 3: Differential Vector Calculus and Matrix Theory
- PHY 120 - Matter in Motion
- PHY 121 - Principles of Electromagnetics
- Electives (2)*

One of

- CSC 103 - Taming Big Data: Introduction to Computer Science

- CSC 104 - Robots Rule! Introduction to Computer Science
- CSC 105 - Game Development: Introduction to Computer Science
- CSC 106 - Can Computers Think? Introduction to Computer Science
- CSC 107 - Creative Computing: Introduction to Computer Science
- CSC 108 - Scientific Computing: Introduction to Computer Science

Second Year

- ECE 118 - Introduction to Computer and Logic Design
- ECE 218 - Embedded Microcontroller Projects
- ECE 225 - Electric Circuits
- ECE 240 - Circuits and Systems
- ECE 241 - Discrete Systems **
- SRS 200 - Sophomore Research Seminar
- MTH 130 - Ordinary Differential Equations
or
- MTH 234 - Differential Equations
- ECE 248 - Introduction to Semiconductor Devices and Circuits
- Math / Science elective
- Electives (1)*

Third Year***

- MTH 117 - Calculus 4: Integral Vector Calculus
- ECE 343 - Introduction to Electromagnetic Engineering
- ECE 366 - Control Systems
- ECE 350 - Communication Systems
- ECE 497 - Electrical and Computer Engineering Capstone Design Project 1
- ECE elective
- Science elective
- Electives (4)*

Fourth Year

- ECE 351 - Probability and Digital Communications
- ECE 363 - Analysis and Design of Electronic Circuits
- ECE 498 - Electrical and Computer Engineering Capstone Design Project 2
- ECE 499 - Electrical and Computer Engineering Capstone Design Project 3
- ECE electives (2)
- Electives (4)*

Note(s):

* Electives should be chosen to meet the remaining common curriculum requirements, and to attain each student's educational goals which may, include double-majors or minors. Students should work with their academic advisor to develop an appropriate plan of study.

*** The fall term of the third year is the most common term for going on a full term abroad. With appropriate planning, students may go on a winter or spring terms abroad instead.

Requirements for Honors:

In addition to meeting all of the general college requirements for honors, candidates for honors in electrical engineering must present their senior project at the Steinmetz Symposium.

Requirements for the Five-Year Combined BS/MS in Electrical Engineering:

Union undergraduate students may apply to this program offered in conjunction with Clarkson University Capital Region Campus where both a B.S. and an M.S. degree in electrical engineering are earned in five years. Students are encouraged to apply during sophomore year but no later than the end of the fall term of their senior year. A 3.0 overall GPA is expected for admission. Students enrolled in the program may count up to three Electrical Engineering courses toward both degrees. A petition requesting overlapping degree credit must be approved by the undergraduate and graduate advisors and filed with Clarkson University. The Master of Science program is described in the catalog of Clarkson University at <http://graduate.clarkson.edu/engineering/>

Electrical Engineering Minor

Requirements for the Minor:

- ECE 118 - Introduction to Computer and Logic Design
- ECE 225 - Electric Circuits (ME majors may substitute ECE 222)
- ECE 240 - Circuits and Systems (ME majors may substitute MER 322)
- ECE 248 - Introduction to Semiconductor Devices and Circuits

- Two ECE electives numbered 100 or higher

Students with interests in a particular area of ECE may select an alternate sequence of six ECE courses numbered above 100, subject to approval from the ECE department chair.

Energy Studies

Director: Professor Ann Anderson (Mechanical Engineering)

Energy Studies Minor

This program of study is available to students as a minor. Students take two core technical courses, two core policy courses and then choose two additional courses from a list of electives. This minor is designed for students in any major who are interested in energy related issues. Students completing this minor will gain both a technical and policy background which will help them to understand the technical, economic, sociological and policy issues surrounding energy and energy usage. Students are encouraged to participate in the New Zealand mini-term abroad as part of this program.

Please note: Some of the required courses have pre-requisites. Students are encouraged to plan their schedules accordingly.

Requirements for the Minor:

The course requirements are organized around a technical core (2 courses), a policy core (2 courses) and upper level electives (2 courses). No more than two courses may count towards a major in another discipline.

Required Technical Core Course (2):

- CHM 101 - Introductory Chemistry 1 offered every term, multiple sections
- one of the following:
- MER 231 - Thermodynamics 1

or

- PHY 123 - Heat and Light

Required Policy Core Course: (2)

(alternative courses must be approved by minor advisor):

- ECO 228 - Environmental and Natural Resource Economics
- one of the following:
- ANT 241 - Environmental Anthropology
- or
- HST 225 - American Environmental History
- or
- PHL 273 - Environmental Ethics
- or
- PSC 272 - The Environment, Energy, and US Politics
- or
- SOC 270 - Social Movements, the Environment, and Society
- or
- SOC 359 - Environmental Policy and Resource Management

Elective Courses:

pick any 2 in consultation with minor advisor, alternative courses must be approved by minor advisor:

Engineering Courses:

- ECE 341 - Energy Conversion
- ECE 342 - Power Electronics
- ECE 344 - Electric Machines and Drives
- ENS 200 - Energy
- ENS 209 - Renewable Energy Systems
- ENS 253 - Environmentally Friendly Buildings
- MER 232 - Thermodynamics 2
- MER 471 - Solar Energy Analysis and Design

Science Courses:

- GEO 112 - Environmental Geology
- GEO 120 - The Story of Earth and Life

Social Science/Humanities Courses:

- ANT 241 - Environmental Anthropology
- EGL 280 - Nature and Environmental Writing
- HST 225 - American Environmental History
- MLT 209 - The New Wall of China
- PHL 273 - Environmental Ethics
- PSC 272 - The Environment, Energy, and US Politics
- SOC 270 - Social Movements, the Environment, and Society

- SOC 359 - Environmental Policy and Resource Management
- TAB 333T - New Zealand Mini-Term Abroad (offered every year)

Engineering

Bachelor of Science degrees are offered in biomedical engineering, computer engineering, electrical engineering, and mechanical engineering. All four engineering programs are accredited by the Engineering Accreditation Commission of ABET (<http://www.abet.org>). Other major and minor programs that include engineering components are energy studies, environmental science, environmental engineering, and nanotechnology. Please see the relevant sections of the Academic Register for descriptions of these areas of study.

Course Selection Guidelines

Course Sequence: The first year in engineering begins with ESC 100 (Exploring Engineering), a course that introduces students to engineering disciplines through interdisciplinary design projects, presentations by engineering professionals, and a hands-on team design project. First year engineering students also take three terms of calculus and two terms of physics (PHY 120 , PHY 121). There are different calculus sequences that can be taken based on the high school math background of the student; students take a placement exam in the summer before their first year to determine their calculus sequence. An Integrated Math/Physics sequence (IMP 120 , IMP 121) that roughly spans the content of MTH 115 , MTH 117 and PHY 120 , PHY 121 is an option for some first year students. Students are encouraged to choose an engineering major early in the first year since program curricula begin to diverge in the winter term; however, students do not need to declare their major until the spring term of the first year.

Engineering students complete the College's Common Curriculum requirements; details of these requirements can be found in the Common Curriculum section of the Academic Register. Students are strongly encouraged to satisfy the Common Curriculum linguistic and cultural competency requirement by going abroad; they may go on any of the terms abroad listed in the International Programs section of the Academic Register by notifying their academic advisor early of their interest in a particular program and working closely with their advisor on course selection.

Engineering Science Courses

Courses listed in this section are general engineering courses common to more than one program.

English

Chair: Associate Professor J. Lewin

Faculty: Professors K. Doyle, H. Jenkins (term abroad Fall), J. Murphy (on leave Spring 2022), J. Smith; Associate Professors C. Bracken, A. Burkett (on leave Fall), B. Kuhn (on leave Fall 2021-Winter 2022), K. Lynes, J. Mitchell, J. Troxell, B. Tuon (on leave Fall 2021-Winter 2022), P. Wareh; Assistant Professors S. McAuliffe (on leave Fall); Affiliated Faculty Assistant Professor D. Venning (also in Theater & Dance); Senior Lecturer A. Pease (also in Modern Languages-Russian.)

Staff: Debora Catharine (Administrative Assistant)

Course Selection Guidelines

Placement: Incoming students should enroll in any English 100-level course (all 100-level courses are equal difficulty) unless they scored a 5 on either the AP English Literature or AP English Language test (see below); alternatively, students may choose a non-writing-intensive EGL course numbered 0-99 (see below, "Courses Suitable for Non-Majors").

Scores of "5" on AP English Exams: The English Department recognizes an AP English Literature or Language score of 5 as sufficient preparation for intermediate 200- level coursework; students with these scores may enroll in 200-level English courses without the 100-level prerequisite by securing a waiver from the registrar. AP5 credit does not reduce the number of courses to be taken in order to complete a major or minor: English majors with an AP 5 still need 12 courses (7 for minors/ 8 for IDs). With AP credit offsetting one 100-level prerequisite, the number of required 100-levels is reduced to one for majors, and zero for minors and IDs; therefore, *de facto*, majors, minors and IDs with an AP 5 get to take an extra elective.

Currently at Union College, a grade of 4 or 5 on an AP English Literature or AP English Language test earns an unspecified course credit toward graduation. Nonetheless, all students still must fulfill the requirements of the Common Curriculum. AP credit does not fulfill or substitute for HUL or WAC requirements; students with an AP 5 may choose to fulfill these CC requirements in English with an intermediate 200-level EGL course instead of a 100-level course.

Courses Suitable for Non-Majors: The English department occasionally offers Common Curriculum courses intended for non-majors. These courses have numbers between 0 and 99, and are lecture-exam-style rather than writing-intensive (WAC) courses, yet they carry HUL credit. Students may enroll in a 100-level course after taking a course numbered 0-99, or vice-versa. **Note:** Common Curriculum courses (0-99) do not count toward the English major, ID major or minor.

All students are welcome to enroll in English 100-level courses.

Only majors should take more than one 100-level course.

Having completed a 100-level English course any student may enroll in any 200-level EGL course (see also AP 5 information above).

All 200-level courses are equal in difficulty.

Junior and senior (300 and 400-level) EGL seminars are by permission (via waitlist) mainly for majors, IDs and minors, who have priority. Some seats may be available for interested non-majors at the discretion of the instructor.

Prerequisites:

- One 100-level course is a prerequisite for any 200-level course. (See AP5 information above)
- To enroll in a 300-level EGL course, a student must have taken either one 100-level course and two 200-level EGL courses for a total of *at least three* English courses.
- To enroll in a 400-level EGL course, a student must have taken two 100-level courses and four 200-level EGL courses for a total of *at least six* English courses. IDs or minors may be admitted at the instructor's discretion.

In June 2020, the English department approved a statement in support of Black Lives Matter, which pledged: "We will restructure our curriculum, so as to include and make visible the experiences of underrepresented students. We pledge to do more to center the lives and experiences of those who are Black, Indigenous, and People of Color in our scholarship, teaching, and service both within and beyond the Union College community." In order to put this pledge into practice, we will embed the lives and experiences that are explored in texts by BIPOC authors into the undergraduate study of literature.

We have developed a new, two-course sequence: a 100-level course, "Confronting the Canon," and a BIPOC course requirement. These courses need not be taken in a specific order, but together they will ensure that students engage with critical race theory and BIPOC-authored literary texts at multiple points in their time as English majors or minors.

As of Fall 2021, those considering English should begin by taking any course between EGL 100 - EGL 189. These courses introduce the basic skills of English study. The student then qualifies to take intermediate coursework or take a second, 100-level course between 190-199: Confronting the Canon.

"Confronting the Canon" courses are designed to do as follows: introduce English majors and minors to some of the foundational questions raised when interrogating and reconfiguring what has long been considered the traditional, Western literary canon. They will emphasize that English courses, in many different educational settings, have an extensive history of asserting the "greatness" of texts by white, male authors, often at the expense of those works written by, among others, women, writers of color, and queer writers. By confronting those choices and their implications, the "Confronting the Canon" course will explore what it means to intentionally reimagine the canon. We will ask questions like the following: Who decided on the canon? What does the canon perpetuate? Who is included and who is excluded from it? What is at stake in our upholding of it or our dismantling of it? What do we value as English students and faculty? What do we envision as our role in the field of English literary and cultural studies?

What follows is a summary of the English requirements that have been retained for Class Years 2022, 2023, and 2024 and the newly-revised requirements for the Class of 2025. Further description is available at the links below "Programs".

Requirements for the Major (for Classes of '22, '23, and '24)

Twelve courses, including two introductory-level courses (100s); seven intermediate courses (200-level) including at least one course on Shakespeare (200 or 201), one pre-1700 course (202-215) and one pre-1900 course (216-236); and three seminars in total: one or two junior seminars (300-level) and one or two senior seminar (400-level).

Students seeking Honors in the Department of English have a 14-course requirement, the additional two beyond the requirements for the English major being the two-term Honors thesis seminar, EGL 402-3, a two-term thesis writing workshop available by application and invitation, to be written during Fall-Winter of their senior year.

No English major is required to write a thesis but all are still eligible for college distinction based on GPA.

All English majors, including students who write a thesis, must take one senior seminar (WS Common Curriculum requirement).

Interdepartmental majors must pay particular attention to the requirements of both departments and meet the CC requirement that all students complete a senior seminar/project (WS).

Requirements for Interdepartmental Majors (for Classes of '22, '23, and '24)

All proposals for interdepartmental majors involving English must be approved by the department; the student should consult the department chair.

English I.D. Majors have an 8-course requirement, which includes one 100-level course and seven others, with at least one pre-1700 course (202-215), one Shakespeare course (200 or 201), four 200-level courses of choice, and one seminar of choice.

Students seeking an I.D. Honors degree including English have a 10-course requirement, the additional two beyond the requirements for the English I.D. major being the two-term Honors thesis seminar. For their junior seminar, ID Honors students should take EGL 302 Literary Theory in Winter of their Junior year.

Requirements for the Minor (for Classes of '22, '23, and '24)

English Minors have a 7-course requirement, which includes one 100-level course and six others, with at least one pre-1700 course (202-215), one Shakespeare course (200 or 201), three 200-level courses of choice, and one 300-level course of choice.

Revised Requirements for the Class of 2025

Full and double majors must take a "Confronting the Canon" course (EGL 190-199) as one of their two 100-level courses, and must take a 200-level BIPOC lit course as one of their 200-level electives.

ID majors will take one 100-level (100-189) and a "Confronting the Canon" (190-199), then choose between either a pre-1700 (202-215), or Shakespeare (200-201). Like full and double majors, ID majors must take a 200-level BIPOC lit course as one of their 200-level electives.

Minors will take one 100-level (100-189) course and then choose two out of the following three coverage requirements: a "Confronting the Canon" (190-199), a pre-1700 (202-215), or a Shakespeare (200-201). They may satisfy the BIPOC literature course requirement at either the 200, 300, or 400 level.

* No student may use an AP English score of 5 to opt out of taking "Confronting the Canon" and/or fulfilling the BIPOC requirement.

For detailed information about English department courses and activities, consult bulletins issued by the English department office, or see the English Department's website, Facebook page (Union College English Department), Twitter account (@UnionCollegeEGL), or Instagram account (@unioneagl).

English, B.A.

Requirements beginning with the Class of 2025

Full and double majors must take a "Confronting the Canon" course (EGL 190-199) as one of their two 100-level courses, and must take a 200-level BIPOC lit course as one of their 200-level electives.

Two Introductory Courses chosen from the following:

One course between 100-189:

- EGL 100 - The Study of Literature: Poetry
- EGL 101 - The Study of Literature: Fiction
- EGL 102 - The Study of Literature: Drama

- EGL 110 - The Poetic Process
- EGL 150 - Film Form, and Analysis

Note: These courses emphasize close reading of primary texts and help students acquire the vocabulary to speak and write clearly and intelligently about literature. The texts are chosen by the instructor of each section.

Detailed descriptions of the various sections are available the week before pre-enrollment each term on the English Department website.

One Confronting the Canon course (between 190-199)

- EGL 190 - Confronting Canon: Beowulf

Note: Majors must complete both 100-level courses no later than the winter term of their junior year

Seven Intermediate Courses:

At least one Introductory Course is a prerequisite to courses at the Intermediate level (see exception for students who received a 5 on their AP exam in either English language or literature). In this group, majors must complete the following required courses:

One course on Shakespeare (200 or 201):

- EGL 200 - Shakespeare to 1600
- EGL 201 - Shakespeare after 1600

One course on literature from a period before 1700 (202-215):

- EGL 202 - Amazons, Saints and Scholars: Women's Writing in the Middle Ages and Renaissance
- EGL 203 - The Age of Heroes
- EGL 204 - Plague, Revolt, Religion, and Nation: The Fourteenth Century
- EGL 205 - The Road to Canterbury
- EGL 210 - British Literature: Seventeenth-Century Literature
- EGL 211 - Milton
- EGL 212 - The Restoration
- EGL 213 - American Literature in Historical Context: Beginnings to 1800
- Note: The pre-1700 and the Shakespeare requirements must be fulfilled with two separate courses. A second Shakespeare course may count as an elective, but this practice does not substitute for a pre-1700 course.

One course on eighteenth to nineteenth-century literature (216-236):

- EGL 217 - Enlightenment and Romanticism
- EGL 219 - Rise of the Novel
- EGL 220 - The Romantic Revolution
- EGL 223 - Jane Austen
- EGL 224 - 19th-Century Novel
- EGL 225 - The Bronte Sisters
- EGL 226 - Victorian Detective Fiction
- EGL 230 - Seduction in Early American Republic
- EGL 231 - Nineteenth-Century American Literature
- EGL 232 - The American Renaissance
- EGL 233 - African-American Literature: Beginnings to 1900

- EGL 236 - American Realism and Naturalism

One course focused predominantly on literature by authors who are Black, Indigenous, or People of Color (BIPOC) from the following:

- EGL 233 - African-American Literature: Beginnings to 1900
- EGL 237 - Reclamation & Renaissance: Black Literary Arts 1900 to 1968, "Dark Like Me - That is my Dream!"
- EGL 248 - Introduction to Black Poetry
- EGL 253 - Narratives of Haunting in US Ethnic Literature
- EGL 254 - Discourses on the Viet Nam War
- EGL 255 - Asian American Literature and Film
- EGL 256 - Southeast Asian-American Experience
- EGL 266 - Black Women Writers
- EGL 268 - Staging Black Feminisms

Three more intermediate courses of choice (any course between 200-299):

In addition to the courses listed above, these include the following:

- EGL 244 - The Contemporary British Imagination
- EGL 245 - Experimental Texts
- EGL 246 - Modern Poetry
- EGL 247 - Studies in Modern Poets: Bob Dylan and Leonard Cohen
- EGL 249 - Contemporary Poetry
- EGL 250 - The Beats and Contemporary Culture
- EGL 251 - World Literatures in English
- EGL 258 - Changing Ireland
- EGL 259 - Irish Literature and Film
- EGL 260 - James Joyce
- EGL 261 - Modernism and Modernity
- EGL 262 - Global Modernisms
- EGL 263 - Literature and Sexuality
- EGL 264 - Women Writers, 18th to 20th Century
- EGL 265 - Jewish Women Writers
- EGL 271 - Dark Deeds: Crime in the Adirondacks
- EGL 274 - Uncanny Texts: Literature and Psychoanalysis
- EGL 275 - Autobiography
- EGL 276 - Literature of the Manor House
- EGL 277 - Philosophical Fiction
- EGL 278 - Science Fiction
- EGL 279 - Literature and Science
- EGL 280 - Nature and Environmental Writing
- EGL 281 - Environmental Psychology and the American Literary Landscape
- EGL 282 - The Theory of Things: Objects, Emotions, Ideas
- EGL 283 - Pilgrims, Flaneurs, & Pranksters: The Walk in Literature
- EGL 286 - Transnational Literature, Film, and Theory
- EGL 287 - Gender and Sexuality in Film
- EGL 288 - Film as Fictive Art: American Independent Cinema
- EGL 289 - Studies in a Major Film Director
- EGL 290 - Studies in Film Genre/Style: Documentary
- EGL 291 - From the Drama Desk: Performance, Culture & Creativity

- EGL 292 - Special Topics in Theater: Contemporary American Theater
- EGL 293 - Workshop in Poetry
- EGL 294 - Workshop in Fiction
- EGL 295 - Workshop in Creative Non-Fiction
- EGL 296H - English Honors Independent Project 2
- EGL 299 - Literary Research Practicum 3

Three Advanced Courses:

Advanced courses, or Junior and Senior Seminars, are writing intensive and research oriented. Majors must complete three advanced courses, including one Junior and one Senior Seminar, and a third seminar of choice. Students must take at least two Intermediate Courses before enrolling in a Junior Seminar. Students must take at least four Intermediate Courses and both Introductory Courses before enrolling in a Senior Seminar. Students are strongly advised to take Junior Seminar before enrolling in a Senior Seminar.

Junior Seminars (topics change each year, 300-)

- EGL 300 - Jr. Seminar: Poetry Workshop
- EGL 301 - Jr. Seminar: Fiction Workshop: Writing Activist Fiction
- EGL 302 - Jr. Seminar: Literary Theory
- EGL 304 - Jr. Seminar (Fall): The Faerie Queene
- EGL 306 - Jr. Seminar (Spring): Collecting Ourselves: Women Writers of the Harlem Renaissance

Senior Seminars (topics change each year, 400-401; 404-):

- EGL 400 - Sr. Seminar: Poetry Workshop
- EGL 401 - Sr. Seminar: Fiction Workshop
- EGL 405 - Sr. Seminar (Winter): Hardy's Women
- EGL 406 - Sr. Seminar (Spring): The Lyric Essay

Requirements for the Major (for Classes of '22, '23, and '24)

Twelve courses, including two introductory-level courses (100s); seven intermediate courses (200-level) including at least one course on Shakespeare (200 or 201), one pre-1700 course (202-215) and one pre-1900 course (216-236); and three seminars in total: one or two junior seminars (300-level) and one or two senior seminar (400-level).

Students seeking Honors in the Department of English have a 14-course requirement, the additional two beyond the requirements for the English major being the two-term Honors thesis seminar, EGL 402-3, a two-term thesis writing workshop available by application and invitation, to be written during Fall-Winter of their senior year.

No English major is required to write a thesis but all are still eligible for college honors based on GPA.

All English majors, including students who write a thesis, must take one senior seminar (WS Common Curriculum requirement).

Two Introductory Courses chosen from the following:

- EGL 100 - The Study of Literature: Poetry
- EGL 101 - The Study of Literature: Fiction
- EGL 110 - The Poetic Process
- EGL 102 - The Study of Literature: Drama
- EGL 150 - Film Form, and Analysis

- EGL 190 - Confronting Canon: Beowulf

Note: These courses emphasize close reading of primary texts and help students acquire the vocabulary to speak and write clearly and intelligently about literature. The texts are chosen by the instructor of each section.

Detailed descriptions of the various sections are available the week before pre-enrollment each term and on the English Department website.

Majors must complete their second Introductory Course no later than the winter term of their junior year.

Seven Intermediate Courses:

At least one Introductory Course is a prerequisite to courses at the Intermediate level (see exception for students who received a 5 on their AP exam in either English language or literature). In this group, majors must complete the following required courses:

One course on Shakespeare (200 or 201):

- EGL 200 - Shakespeare to 1600
- EGL 201 - Shakespeare after 1600

One course on literature from a period before 1700 (202-215):

- EGL 202 - Amazons, Saints and Scholars: Women's Writing in the Middle Ages and Renaissance
- EGL 203 - The Age of Heroes
- EGL 204 - Plague, Revolt, Religion, and Nation: The Fourteenth Century
- EGL 205 - The Road to Canterbury
- EGL 210 - British Literature: Seventeenth-Century Literature
- EGL 211 - Milton
- EGL 212 - The Restoration
- EGL 213 - American Literature in Historical Context: Beginnings to 1800

The pre-1700 and the Shakespeare requirements must be fulfilled with two separate courses. A second Shakespeare course may count as an elective, but this practice does not substitute for a pre-1700 course.

One course on eighteenth to nineteenth-century literature (216-236):

- EGL 217 - Enlightenment and Romanticism
- EGL 219 - Rise of the Novel
- EGL 220 - The Romantic Revolution
- EGL 223 - Jane Austen
- EGL 224 - 19th-Century Novel
- EGL 225 - The Bronte Sisters
- EGL 226 - Victorian Detective Fiction
- EGL 230 - Seduction in Early American Republic
- EGL 231 - Nineteenth-Century American Literature
- EGL 232 - The American Renaissance
- EGL 233 - African-American Literature: Beginnings to 1900
- EGL 236 - American Realism and Naturalism

Four more intermediate courses of choice (any between 200-299):

- EGL 200 - Shakespeare to 1600

- EGL 201 - Shakespeare after 1600
- EGL 202 - Amazons, Saints and Scholars: Women's Writing in the Middle Ages and Renaissance
- EGL 203 - The Age of Heroes
- EGL 204 - Plague, Revolt, Religion, and Nation: The Fourteenth Century
- EGL 205 - The Road to Canterbury
- EGL 210 - British Literature: Seventeenth-Century Literature
- EGL 211 - Milton
- EGL 212 - The Restoration
- EGL 213 - American Literature in Historical Context: Beginnings to 1800
- EGL 217 - Enlightenment and Romanticism
- EGL 219 - Rise of the Novel
- EGL 220 - The Romantic Revolution
- EGL 223 - Jane Austen
- EGL 224 - 19th-Century Novel
- EGL 225 - The Bronte Sisters
- EGL 226 - Victorian Detective Fiction
- EGL 230 - Seduction in Early American Republic
- EGL 231 - Nineteenth-Century American Literature
- EGL 232 - The American Renaissance
- EGL 233 - African-American Literature: Beginnings to 1900
- EGL 236 - American Realism and Naturalism
- EGL 237 - Reclamation & Renaissance: Black Literary Arts 1900 to 1968, "Dark Like Me - That is my Dream!"
- EGL 244 - The Contemporary British Imagination
- EGL 245 - Experimental Texts
- EGL 246 - Modern Poetry
- EGL 247 - Studies in Modern Poets: Bob Dylan and Leonard Cohen
- EGL 248 - Introduction to Black Poetry
- EGL 249 - Contemporary Poetry
- EGL 250 - The Beats and Contemporary Culture
- EGL 251 - World Literatures in English
- EGL 253 - Narratives of Haunting in US Ethnic Literature
- EGL 254 - Discourses on the Viet Nam War
- EGL 255 - Asian American Literature and Film
- EGL 256 - Southeast Asian-American Experience
- EGL 258 - Changing Ireland
- EGL 259 - Irish Literature and Film
- EGL 260 - James Joyce
- EGL 261 - Modernism and Modernity
- EGL 262 - Global Modernisms
- EGL 263 - Literature and Sexuality
- EGL 264 - Women Writers, 18th to 20th Century
- EGL 265 - Jewish Women Writers
- EGL 266 - Black Women Writers
- EGL 268 - Staging Black Feminisms
- EGL 271 - Dark Deeds: Crime in the Adirondacks
- EGL 274 - Uncanny Texts: Literature and Psychoanalysis
- EGL 275 - Autobiography
- EGL 276 - Literature of the Manor House
- EGL 277 - Philosophical Fiction
- EGL 278 - Science Fiction
- EGL 279 - Literature and Science

- EGL 280 - Nature and Environmental Writing
- EGL 281 - Environmental Psychology and the American Literary Landscape
- EGL 282 - The Theory of Things: Objects, Emotions, Ideas
- EGL 283 - Pilgrims, Flaneurs, & Pranksters: The Walk in Literature
- EGL 286 - Transnational Literature, Film, and Theory
- EGL 287 - Gender and Sexuality in Film
- EGL 288 - Film as Fictive Art: American Independent Cinema
- EGL 289 - Studies in a Major Film Director
- EGL 290 - Studies in Film Genre/Style: Documentary
- EGL 291 - From the Drama Desk: Performance, Culture & Creativity
- EGL 292 - Special Topics in Theater: Contemporary American Theater
- EGL 293 - Workshop in Poetry
- EGL 294 - Workshop in Fiction
- EGL 295 - Workshop in Creative Non-Fiction
- EGL 295H - English Honors Independent Project 1
- EGL 296H - English Honors Independent Project 2
- EGL 299 - Literary Research Practicum 3

Three Advanced Courses:

Advanced courses, or Junior and Senior Seminars, are writing intensive and research oriented. Majors must complete three advanced courses, including one Junior and one Senior Seminar, and a third seminar of choice. Students must take at least two Intermediate Courses before enrolling in a Junior Seminar. Students must take at least four Intermediate Courses and both Introductory Courses before enrolling in a Senior Seminar. Students are strongly advised to take Junior Seminar before enrolling in a Senior Seminar.

Junior Seminars (topics change each year, 300-)

- EGL 300 - Jr. Seminar: Poetry Workshop
- EGL 301 - Jr. Seminar: Fiction Workshop: Writing Activist Fiction
- EGL 302 - Jr. Seminar: Literary Theory
- EGL 304 - Jr. Seminar (Fall): The Faerie Queene
- EGL 306 - Jr. Seminar (Spring): Collecting Ourselves: Women Writers of the Harlem Renaissance

Senior Seminars (topics change each year, 400-401; 404-):

- EGL 400 - Sr. Seminar: Poetry Workshop
to
- EGL 401 - Sr. Seminar: Fiction Workshop
- EGL 405 - Sr. Seminar (Winter): Hardy's Women
- EGL 406 - Sr. Seminar (Spring): The Lyric Essay

Requirements for English Honors: Thesis (402-3):

Fourteen courses are required for honors, which includes the usual twelve plus a two-term honors thesis seminar, EGL 402 and EGL 403.* The two-term thesis does not replace the required senior seminar. Other qualifications to be eligible to apply to write an honors thesis include a 3.3 GPA both cumulatively and in the English major; the Literary Theory seminar; an accepted proposal (submitted during fourth week of Spring Term, students' junior year). See the English Department website for a more complete description.

In this seminar, students are expected to learn research methods, discuss their subjects and approaches to them, and share ideas and writing, as they work toward completing their individual theses under the direction of the seminar instructor. Prospective Honors thesis writers are required to take the Literary Theory Seminar EGL 302 in Winter of their Junior year, prior to applying to write a thesis, whether proposing a creative or an analytical thesis. Students proposing creative theses are strongly encouraged to have already participated in a creative writing workshop in the proposed genre.

Interested students should discuss possible thesis subjects with their advisor and other departmental members in order to develop an appropriate thesis topic. Prospective Honors students submit a two-to three-page thesis proposal and writing sample for review by the department's Honors selection committee.

*Note: Double major Honors thesis students whose thesis combines both fields of study register for IDM 487-488 (with signatures from a director in each department) yet participate in the Honors thesis workshop class, EGL402-403.

English (ID), B.A.

Requirements for the Interdepartmental (ID) Major:

Students wishing to declare an ID major should confer with both Department Chairs to explain how their intellectual interests or plan of study might integrate the two disciplines.

SUMMARY:

Classes of '22, '23, and '24

English I.D. Majors have an 8-course requirement, which includes one 100-level course and seven others, with at least one pre-1700 course (202-215), one Shakespeare course (200 or 201), four 200-level courses of choice, and one seminar of choice.

Class of 2025

ID majors will take one 100-level (100-189) and a "Confronting the Canon" (190-199), then choose between either a pre-1700 (202-215), or Shakespeare (200-201). Like full and double majors, ID majors must take a 200-level BIPOC lit course as one of their 200-level electives.

Class of 2025

English ID majors take eight courses, including the required courses below:

One Introductory Course

- EGL 100 - The Study of Literature: Poetry
- EGL 101 - The Study of Literature: Fiction
- EGL 102 - The Study of Literature: Drama
- EGL 110 - The Poetic Process
- EGL 150 - Film Form, and Analysis

Note: These courses emphasize close reading of primary texts and help students acquire the vocabulary to speak and write clearly and intelligently about literature. The texts are chosen by the instructor of each section.

Detailed descriptions of the various sections are available the week before pre-enrollment each term on the English Department website.

One Confronting the Cannon course (between 190-199)

- EGL 190 - Confronting Canon: Beowulf

Note: ID Majors must complete both 100-level courses no later than the winter term of their junior year.

One Shakespeare OR pre-1700 course (between 190-199)

- EGL 200 - Shakespeare to 1600
- EGL 201 - Shakespeare after 1600
- EGL 202 - Amazons, Saints and Scholars: Women's Writing in the Middle Ages and Renaissance
- EGL 203 - The Age of Heroes
- EGL 204 - Plague, Revolt, Religion, and Nation: The Fourteenth Century
- EGL 205 - The Road to Canterbury
- EGL 210 - British Literature: Seventeenth-Century Literature
- EGL 211 - Milton
- EGL 212 - The Restoration
- EGL 213 - American Literature in Historical Context: Beginnings to 1800

*Given their subject matter, in 2021-22, either EGL 190 *Beowulf* and EGL 304 *The Faerie Queene* may be used to fulfill the pre-1700 requirement - but not more than one requirement (not both pre-17 and Confronting the Canon or pre-17 and Jr. seminar).

One course focused predominantly on literature by authors who are Black, Indigenous, or People of Color (BIPOC) from the following:

- EGL 233 - African-American Literature: Beginnings to 1900
- EGL 237 - Reclamation & Renaissance: Black Literary Arts 1900 to 1968, "Dark Like Me - That is my Dream!"
- EGL 248 - Introduction to Black Poetry
- EGL 253 - Narratives of Haunting in US Ethnic Literature
- EGL 254 - Discourses on the Viet Nam War
- EGL 255 - Asian American Literature and Film
- EGL 256 - Southeast Asian-American Experience
- EGL 266 - Black Women Writers
- EGL 268 - Staging Black Feminisms

Three more intermediate courses of choice (all 200-levels are the same difficulty):

- EGL 200 - Shakespeare to 1600
- EGL 201 - Shakespeare after 1600
- EGL 202 - Amazons, Saints and Scholars: Women's Writing in the Middle Ages and Renaissance
- EGL 203 - The Age of Heroes
- EGL 204 - Plague, Revolt, Religion, and Nation: The Fourteenth Century
- EGL 205 - The Road to Canterbury
- EGL 210 - British Literature: Seventeenth-Century Literature
- EGL 211 - Milton
- EGL 212 - The Restoration
- EGL 213 - American Literature in Historical Context: Beginnings to 1800
- EGL 217 - Enlightenment and Romanticism
- EGL 219 - Rise of the Novel
- EGL 220 - The Romantic Revolution
- EGL 223 - Jane Austen
- EGL 224 - 19th-Century Novel
- EGL 225 - The Bronte Sisters
- EGL 226 - Victorian Detective Fiction
- EGL 230 - Seduction in Early American Republic
- EGL 231 - Nineteenth-Century American Literature
- EGL 232 - The American Renaissance
- EGL 233 - African-American Literature: Beginnings to 1900
- EGL 236 - American Realism and Naturalism

- EGL 237 - Reclamation & Renaissance: Black Literary Arts 1900 to 1968, "Dark Like Me - That is my Dream!"
- EGL 244 - The Contemporary British Imagination
- EGL 245 - Experimental Texts
- EGL 246 - Modern Poetry
- EGL 247 - Studies in Modern Poets: Bob Dylan and Leonard Cohen
- EGL 249 - Contemporary Poetry
- EGL 250 - The Beats and Contemporary Culture
- EGL 251 - World Literatures in English
- EGL 258 - Changing Ireland
- EGL 259 - Irish Literature and Film
- EGL 260 - James Joyce
- EGL 261 - Modernism and Modernity
- EGL 262 - Global Modernisms
- EGL 263 - Literature and Sexuality
- EGL 264 - Women Writers, 18th to 20th Century
- EGL 265 - Jewish Women Writers
- EGL 271 - Dark Deeds: Crime in the Adirondacks
- EGL 274 - Uncanny Texts: Literature and Psychoanalysis
- EGL 275 - Autobiography
- EGL 276 - Literature of the Manor House
- EGL 277 - Philosophical Fiction
- EGL 278 - Science Fiction
- EGL 279 - Literature and Science
- EGL 280 - Nature and Environmental Writing
- EGL 281 - Environmental Psychology and the American Literary Landscape
- EGL 282 - The Theory of Things: Objects, Emotions, Ideas
- EGL 283 - Pilgrims, Flaneurs, & Pranksters: The Walk in Literature
- EGL 286 - Transnational Literature, Film, and Theory
- EGL 287 - Gender and Sexuality in Film
- EGL 288 - Film as Fictive Art: American Independent Cinema
- EGL 289 - Studies in a Major Film Director
- EGL 290 - Studies in Film Genre/Style: Documentary
- EGL 291 - From the Drama Desk: Performance, Culture & Creativity
- EGL 292 - Special Topics in Theater: Contemporary American Theater
- EGL 293 - Workshop in Poetry
- EGL 294 - Workshop in Fiction
- EGL 295 - Workshop in Creative Non-Fiction
- EGL 296H - English Honors Independent Project 2
- EGL 299 - Literary Research Practicum 3

One 300-level Junior Seminar (topics vary each year):

- EGL 300 - Jr. Seminar: Poetry Workshop
- EGL 301 - Jr. Seminar: Fiction Workshop: Writing Activist Fiction
- EGL 302 - Jr. Seminar: Literary Theory
- EGL 304 - Jr. Seminar (Fall): The Faerie Queene
- EGL 306 - Jr. Seminar (Spring): Collecting Ourselves: Women Writers of the Harlem Renaissance

Interdepartmental majors must pay particular attention to the requirements of both departments and meet the CC requirement that all students complete a WS. Be attentive to whether the other part of the ID Major requires a thesis since English does not; English admits Honors thesis students by application (see below).

Classes of '22, '23, and '24

English ID majors take eight courses, including the required courses below:

One Introductory Course:

- EGL 100 - The Study of Literature: Poetry
- EGL 101 - The Study of Literature: Fiction
- EGL 102 - The Study of Literature: Drama
- EGL 110 - The Poetic Process
- EGL 150 - Film Form, and Analysis
- Note: These courses emphasize close reading of primary texts and help students acquire the vocabulary to speak and write clearly and intelligently about literature. The texts are chosen by the instructor of each section.
- Detailed descriptions of the various sections are available the week before pre-enrollment each term on the English Department website.

One Shakespeare course:

- EGL 200 - Shakespeare to 1600
- EGL 201 - Shakespeare after 1600

One pre-1700 course:

*The pre-1700 and the Shakespeare requirements must be fulfilled with two separate courses. A second course in Shakespeare may count as an elective, but the department wishes to clarify that this practice should not substitute for taking a pre-1700 course.

- EGL 202 - Amazons, Saints and Scholars: Women's Writing in the Middle Ages and Renaissance
- EGL 203 - The Age of Heroes
- EGL 204 - Plague, Revolt, Religion, and Nation: The Fourteenth Century
- EGL 205 - The Road to Canterbury
- EGL 210 - British Literature: Seventeenth-Century Literature
- EGL 211 - Milton
- EGL 212 - The Restoration
- EGL 213 - American Literature in Historical Context: Beginnings to 1800

*Given their subject matter, in 2021-22, either EGL 190 *Beowulf* and EGL 304 *The Faerie Queene* may be used to fulfill the pre-1700 requirement - but not more than one requirement (not both pre-17 and Intro or pre-17 and Jr. seminar).

Four intermediate courses of choice (all 200-levels are the same difficulty):

- EGL 200 - Shakespeare to 1600
- EGL 201 - Shakespeare after 1600
- EGL 202 - Amazons, Saints and Scholars: Women's Writing in the Middle Ages and Renaissance
- EGL 203 - The Age of Heroes
- EGL 204 - Plague, Revolt, Religion, and Nation: The Fourteenth Century
- EGL 205 - The Road to Canterbury

- EGL 210 - British Literature: Seventeenth-Century Literature
- EGL 211 - Milton
- EGL 212 - The Restoration
- EGL 213 - American Literature in Historical Context: Beginnings to 1800
- EGL 217 - Enlightenment and Romanticism
- EGL 219 - Rise of the Novel
- EGL 220 - The Romantic Revolution
- EGL 223 - Jane Austen
- EGL 224 - 19th-Century Novel
- EGL 225 - The Bronte Sisters
- EGL 226 - Victorian Detective Fiction
- EGL 230 - Seduction in Early American Republic
- EGL 231 - Nineteenth-Century American Literature
- EGL 232 - The American Renaissance
- EGL 233 - African-American Literature: Beginnings to 1900
- EGL 236 - American Realism and Naturalism
- EGL 237 - Reclamation & Renaissance: Black Literary Arts 1900 to 1968, "Dark Like Me - That is my Dream!"
- EGL 244 - The Contemporary British Imagination
- EGL 245 - Experimental Texts
- EGL 246 - Modern Poetry
- EGL 247 - Studies in Modern Poets: Bob Dylan and Leonard Cohen
- EGL 248 - Introduction to Black Poetry
- EGL 249 - Contemporary Poetry
- EGL 250 - The Beats and Contemporary Culture
- EGL 251 - World Literatures in English
- EGL 253 - Narratives of Haunting in US Ethnic Literature
- EGL 254 - Discourses on the Viet Nam War
- EGL 255 - Asian American Literature and Film
- EGL 256 - Southeast Asian-American Experience
- EGL 258 - Changing Ireland
- EGL 259 - Irish Literature and Film
- EGL 260 - James Joyce
- EGL 261 - Modernism and Modernity
- EGL 262 - Global Modernisms
- EGL 263 - Literature and Sexuality
- EGL 264 - Women Writers, 18th to 20th Century
- EGL 265 - Jewish Women Writers
- EGL 275 - Autobiography
- EGL 276 - Literature of the Manor House
- EGL 277 - Philosophical Fiction
- EGL 278 - Science Fiction
- EGL 279 - Literature and Science
- EGL 281 - Environmental Psychology and the American Literary Landscape
- EGL 280 - Nature and Environmental Writing
- EGL 282 - The Theory of Things: Objects, Emotions, Ideas
- EGL 283 - Pilgrims, Flaneurs, & Pranksters: The Walk in Literature
- EGL 286 - Transnational Literature, Film, and Theory
- EGL 287 - Gender and Sexuality in Film
- EGL 288 - Film as Fictive Art: American Independent Cinema
- EGL 289 - Studies in a Major Film Director
- EGL 290 - Studies in Film Genre/Style: Documentary

- EGL 291 - From the Drama Desk: Performance, Culture & Creativity
- EGL 292 - Special Topics in Theater: Contemporary American Theater
- EGL 293 - Workshop in Poetry
- EGL 294 - Workshop in Fiction
- EGL 295 - Workshop in Creative Non-Fiction
- EGL 295H - English Honors Independent Project 1
- EGL 296H - English Honors Independent Project 2
- EGL 299 - Literary Research Practicum 3

One 300-level Junior Seminar (topics vary each year):

- EGL 300 - Jr. Seminar: Poetry Workshop
- EGL 301 - Jr. Seminar: Fiction Workshop: Writing Activist Fiction
- EGL 302 - Jr. Seminar: Literary Theory
- EGL 304 - Jr. Seminar (Fall): The Faerie Queene
- EGL 306 - Jr. Seminar (Spring): Collecting Ourselves: Women Writers of the Harlem Renaissance

Requirements for Honors in English (ID):

Students seeking interdepartmental honors in English have a 10-course requirement, the usual eight and the two-term thesis seminar. Be advised that Honors ID majors, like full Honors majors, must take the Literary Theory course EGL 302 in their Junior year and meet the other qualifications for honors.

In the two-term honors thesis seminar* students are expected to learn research methods, discuss their subjects and approaches to them, and share ideas and writing, as they work toward completing their individual theses under the direction of the seminar instructor. Prospective Honors thesis and Honors ID thesis writers take EGL 302 prior to applying to write a thesis, whether proposing a creative or an analytical thesis. Students proposing creative theses should have already participated in a creative writing workshop in the proposed genre. Interested students should discuss possible thesis subjects with their advisor and other departmental members in order to develop an appropriate thesis topic. Prospective Honors thesis students apply by submitting a two-to three-page thesis proposal with a writing sample in the appropriate genre for review by the department's Honors thesis selection committee. Acceptance is competitive and not guaranteed.

Note: ID Honors thesis students enroll in IDM 498-499 (by application) yet participate in the Honors thesis workshop class, EGL 402-403.

English Minor

Requirements for the Minor:

Class of 2025

English minors take seven courses, including the required courses below:

One Introductory Course

- EGL 100 - The Study of Literature: Poetry
- EGL 101 - The Study of Literature: Fiction
- EGL 102 - The Study of Literature: Drama
- EGL 110 - The Poetic Process
- EGL 150 - Film Form, and Analysis

Note: These courses emphasize close reading of primary texts and help students acquire the vocabulary to speak and write clearly and intelligently about literature. The texts are chosen by the instructor of each section.

Detailed descriptions of the various sections are available the week before pre-enrollment each term on the English Department website.

Take any two courses from the following:

One Confronting the Canon course (between 190-199)

- EGL 190 - Confronting Canon: Beowulf

Shakespeare course:

- EGL 200 - Shakespeare to 1600
- EGL 201 - Shakespeare after 1600

Pre-1700 course:

- EGL 202 - Amazons, Saints and Scholars: Women's Writing in the Middle Ages and Renaissance
- EGL 203 - The Age of Heroes
- EGL 204 - Plague, Revolt, Religion, and Nation: The Fourteenth Century
- EGL 205 - The Road to Canterbury
- EGL 210 - British Literature: Seventeenth-Century Literature
- EGL 211 - Milton
- EGL 212 - The Restoration
- EGL 213 - American Literature in Historical Context: Beginnings to 1800

*Given their subject matter, in 2021-22, either EGL 190 *Beowulf* and EGL 304 *The Faerie Queene* may be used to fulfill the pre-1700 requirement - but not more than one requirement (not both pre-17 and Constructing the Canon or pre-17 and Jr. seminar).

One course focused predominantly on literature by authors who are Black, Indigenous, or People of Color (BIPOC) from the following (200, 300, or 400 levels):

- EGL 233 - African-American Literature: Beginnings to 1900
- EGL 237 - Reclamation & Renaissance: Black Literary Arts 1900 to 1968, "Dark Like Me - That is my Dream!"
- EGL 248 - Introduction to Black Poetry
- EGL 253 - Narratives of Haunting in US Ethnic Literature
- EGL 254 - Discourses on the Viet Nam War
- EGL 255 - Asian American Literature and Film
- EGL 256 - Southeast Asian-American Experience
- EGL 266 - Black Women Writers
- EGL 268 - Staging Black Feminisms
- EGL 306 - Jr. Seminar (Spring): Collecting Ourselves: Women Writers of the Harlem Renaissance

Two other intermediate courses of choice (all 200-levels are the same difficulty):

- EGL 200 - Shakespeare to 1600
- EGL 201 - Shakespeare after 1600
- EGL 202 - Amazons, Saints and Scholars: Women's Writing in the Middle Ages and Renaissance
- EGL 203 - The Age of Heroes
- EGL 204 - Plague, Revolt, Religion, and Nation: The Fourteenth Century
- EGL 205 - The Road to Canterbury
- EGL 210 - British Literature: Seventeenth-Century Literature
- EGL 211 - Milton
- EGL 212 - The Restoration
- EGL 213 - American Literature in Historical Context: Beginnings to 1800
- EGL 217 - Enlightenment and Romanticism

- EGL 219 - Rise of the Novel
- EGL 220 - The Romantic Revolution
- EGL 223 - Jane Austen
- EGL 224 - 19th-Century Novel
- EGL 225 - The Bronte Sisters
- EGL 226 - Victorian Detective Fiction
- EGL 230 - Seduction in Early American Republic
- EGL 231 - Nineteenth-Century American Literature
- EGL 232 - The American Renaissance
- EGL 233 - African-American Literature: Beginnings to 1900
- EGL 236 - American Realism and Naturalism
- EGL 237 - Reclamation & Renaissance: Black Literary Arts 1900 to 1968, "Dark Like Me - That is my Dream!"
- EGL 244 - The Contemporary British Imagination
- EGL 245 - Experimental Texts
- EGL 246 - Modern Poetry
- EGL 247 - Studies in Modern Poets: Bob Dylan and Leonard Cohen
- EGL 248 - Introduction to Black Poetry
- EGL 249 - Contemporary Poetry
- EGL 250 - The Beats and Contemporary Culture
- EGL 251 - World Literatures in English
- EGL 253 - Narratives of Haunting in US Ethnic Literature
- EGL 254 - Discourses on the Viet Nam War
- EGL 255 - Asian American Literature and Film
- EGL 256 - Southeast Asian-American Experience
- EGL 258 - Changing Ireland
- EGL 259 - Irish Literature and Film
- EGL 260 - James Joyce
- EGL 261 - Modernism and Modernity
- EGL 262 - Global Modernisms
- EGL 263 - Literature and Sexuality
- EGL 264 - Women Writers, 18th to 20th Century
- EGL 265 - Jewish Women Writers
- EGL 266 - Black Women Writers
- EGL 268 - Staging Black Feminisms
- EGL 271 - Dark Deeds: Crime in the Adirondacks
- EGL 274 - Uncanny Texts: Literature and Psychoanalysis
- EGL 275 - Autobiography
- EGL 276 - Literature of the Manor House
- EGL 277 - Philosophical Fiction
- EGL 278 - Science Fiction
- EGL 279 - Literature and Science
- EGL 280 - Nature and Environmental Writing
- EGL 281 - Environmental Psychology and the American Literary Landscape
- EGL 282 - The Theory of Things: Objects, Emotions, Ideas
- EGL 283 - Pilgrims, Flaneurs, & Pranksters: The Walk in Literature
- EGL 286 - Transnational Literature, Film, and Theory
- EGL 287 - Gender and Sexuality in Film
- EGL 288 - Film as Fictive Art: American Independent Cinema
- EGL 289 - Studies in a Major Film Director
- EGL 290 - Studies in Film Genre/Style: Documentary
- EGL 291 - From the Drama Desk: Performance, Culture & Creativity

- EGL 292 - Special Topics in Theater: Contemporary American Theater
- EGL 293 - Workshop in Poetry
- EGL 294 - Workshop in Fiction
- EGL 295 - Workshop in Creative Non-Fiction
- EGL 296H - English Honors Independent Project 2
- EGL 297 - Literary Research Practicum 1
- EGL 299 - Literary Research Practicum 3

One 300-level Junior Seminar (topics vary each year):

- EGL 300 - Jr. Seminar: Poetry Workshop
- EGL 301 - Jr. Seminar: Fiction Workshop: Writing Activist Fiction
- EGL 302 - Jr. Seminar: Literary Theory
- EGL 304 - Jr. Seminar (Fall): The Faerie Queene
- EGL 306 - Jr. Seminar (Spring): Collecting Ourselves: Women Writers of the Harlem Renaissance

Classes of '22, '23, and '24

English minors take eight courses, including the required courses below:

One introductory course:

- EGL 100 - The Study of Literature: Poetry
- EGL 101 - The Study of Literature: Fiction
- EGL 110 - The Poetic Process
- EGL 102 - The Study of Literature: Drama
- EGL 150 - Film Form, and Analysis

Note: These courses emphasize close reading of primary texts and help students acquire the vocabulary to speak and write clearly and intelligently about literature. The texts are chosen by the instructor of each section.

Detailed descriptions of the various sections are available the week before pre-enrollment each term on the English Department website.

One Shakespeare course:

- EGL 200 - Shakespeare to 1600
- EGL 201 - Shakespeare after 1600

One pre-1700 course:

*The pre-1700 and the Shakespeare requirements must be fulfilled with two separate courses. A second course in Shakespeare may count as an elective, but the department wishes to clarify that this practice should not substitute for taking a pre-1700 course.

- EGL 202 - Amazons, Saints and Scholars: Women's Writing in the Middle Ages and Renaissance
- EGL 203 - The Age of Heroes
- EGL 204 - Plague, Revolt, Religion, and Nation: The Fourteenth Century
- EGL 205 - The Road to Canterbury
- EGL 210 - British Literature: Seventeenth-Century Literature
- EGL 211 - Milton

- EGL 212 - The Restoration
- EGL 213 - American Literature in Historical Context: Beginnings to 1800

*Given their subject matter, in 2021-22, either EGL 190 *Beowulf* and EGL 304 *The Faerie Queene* may be used to fulfill the pre-1700 requirement - but not more than one requirement (not both pre-17 and Intro or pre-17 and Jr. seminar).

Three intermediate courses of choice (all 200-levels are the same difficulty):

- EGL 200 - Shakespeare to 1600
- EGL 201 - Shakespeare after 1600
- EGL 202 - Amazons, Saints and Scholars: Women's Writing in the Middle Ages and Renaissance
- EGL 203 - The Age of Heroes
- EGL 204 - Plague, Revolt, Religion, and Nation: The Fourteenth Century
- EGL 205 - The Road to Canterbury
- EGL 210 - British Literature: Seventeenth-Century Literature
- EGL 211 - Milton
- EGL 212 - The Restoration
- EGL 213 - American Literature in Historical Context: Beginnings to 1800
- EGL 217 - Enlightenment and Romanticism
- EGL 219 - Rise of the Novel
- EGL 220 - The Romantic Revolution
- EGL 223 - Jane Austen
- EGL 224 - 19th-Century Novel
- EGL 225 - The Bronte Sisters
- EGL 226 - Victorian Detective Fiction
- EGL 230 - Seduction in Early American Republic
- EGL 231 - Nineteenth-Century American Literature
- EGL 232 - The American Renaissance
- EGL 233 - African-American Literature: Beginnings to 1900
- EGL 236 - American Realism and Naturalism
- EGL 237 - Reclamation & Renaissance: Black Literary Arts 1900 to 1968, "Dark Like Me - That is my Dream!"
- EGL 244 - The Contemporary British Imagination
- EGL 245 - Experimental Texts
- EGL 246 - Modern Poetry
- EGL 247 - Studies in Modern Poets: Bob Dylan and Leonard Cohen
- EGL 248 - Introduction to Black Poetry
- EGL 249 - Contemporary Poetry
- EGL 250 - The Beats and Contemporary Culture
- EGL 251 - World Literatures in English
- EGL 253 - Narratives of Haunting in US Ethnic Literature
- EGL 254 - Discourses on the Viet Nam War
- EGL 255 - Asian American Literature and Film
- EGL 256 - Southeast Asian-American Experience
- EGL 258 - Changing Ireland
- EGL 259 - Irish Literature and Film
- EGL 260 - James Joyce
- EGL 261 - Modernism and Modernity
- EGL 262 - Global Modernisms
- EGL 263 - Literature and Sexuality
- EGL 264 - Women Writers, 18th to 20th Century
- EGL 265 - Jewish Women Writers

- EGL 266 - Black Women Writers
- EGL 268 - Staging Black Feminisms
- EGL 271 - Dark Deeds: Crime in the Adirondacks
- EGL 274 - Uncanny Texts: Literature and Psychoanalysis
- EGL 275 - Autobiography
- EGL 276 - Literature of the Manor House
- EGL 277 - Philosophical Fiction
- EGL 278 - Science Fiction
- EGL 279 - Literature and Science
- EGL 280 - Nature and Environmental Writing
- EGL 282 - The Theory of Things: Objects, Emotions, Ideas
- EGL 287 - Gender and Sexuality in Film
- EGL 288 - Film as Fictive Art: American Independent Cinema
- EGL 289 - Studies in a Major Film Director
- EGL 290 - Studies in Film Genre/Style: Documentary
- EGL 291 - From the Drama Desk: Performance, Culture & Creativity
- EGL 293 - Workshop in Poetry
- EGL 292 - Special Topics in Theater: Contemporary American Theater
- EGL 294 - Workshop in Fiction
- EGL 295 - Workshop in Creative Non-Fiction
- EGL 299 - Literary Research Practicum 3

One 300-level Junior seminar (topics vary each year):

- EGL 300 - Jr. Seminar: Poetry Workshop
- EGL 301 - Jr. Seminar: Fiction Workshop: Writing Activist Fiction
- EGL 302 - Jr. Seminar: Literary Theory
- EGL 304 - Jr. Seminar (Fall): The Faerie Queene
- EGL 306 - Jr. Seminar (Spring): Collecting Ourselves: Women Writers of the Harlem Renaissance

Entrepreneurship

Courses in a variety of departments at Union examine ways in which entrepreneurs think and act. As students identify how people, in many times and places, have succeeded in attaining their visions for change, they will develop an ability to do the same themselves. In addition to department-based courses, several interdisciplinary courses described below provide multidisciplinary approaches to skills including critical analysis and communication that will enable students to put their own ideas and inspiration into action in their chosen fields and areas of interest.

Entrepreneurial Courses

Visual Arts

- AAH 208 - The Business of Visual Art and Contemporary Entrepreneurship

Anthropology

- ANT 232T - Fiji Culture & Entrepreneurship

Classics

- CLS 151 - The Ancient World in Film and Literature
- CLS 157 - Entrepreneurship in the Ancient World

Economics

- ECO 332 - Economics of Technological Change
- ECO 232T - Fiji Culture and Entrepreneurship

History

Political Science

- PSC 351 - Global Organized Crime

Interdisciplinary Courses

Courses that take multidisciplinary approaches to entrepreneurship

- ISC 260 - Social Entrepreneurship
- ISC 299 - Developing a Vision
- ISC 325 - Entrepreneurship Seminar

Environmental Science, Policy and Engineering

Director: D. Gillikin (Geosciences)

Faculty: Professors J. Corbin (Biological Sciences), H. Frey (Geosciences), J. Garver (Geosciences), A. Ghaly (Engineering), D. Gillikin (Geosciences), K. Hollocher (Geosciences), I. Kaplan (Sociology), K. LoGiudice (Biological Sciences), M. Mafi (Engineering), J. Murphy (English), S. Rice (Biological Sciences), D. Rodbell (Geosciences), R. Wilk (Mechanical Engineering); Associate Professors K. Bidoshi (Modern Languages), L. Cox (Visual Arts), L. Dosiak (Electrical and Computer Engineering), K. Lynes (English), L. MacManus-Spencer (Chemistry), A. Morris (History); Assistant Professor M. Stahl (Engineering); Senior Lecturer J. Bishop (Biological Sciences); Lecturer A. Verheyden (Geosciences)

The Environmental Science, Policy and Engineering (ESPE) program is focused on students with an interest in the science and policy behind the myriad environmental problems that face our world, the political policy mechanisms that may provide solutions to these issues, and the interface between the environment and the human condition. Students in the ESPE program choose either a BS degree in Environmental Science or a BA degree in Environmental Policy. The BS degree emphasizes the biological, chemical, and geological sciences, as well as physics and engineering, while the BA degree emphasizes the social sciences and humanities. A common set of core courses links the two programs. All students take a common introductory course, a core of 8-11 required courses, and 4-6 courses that define an area of concentration. During the senior year, students typically complete two terms of independent research, and participate in a common ESPE senior seminar.

Environmental Policy, B.A.

Requirements for the Major in Environmental Policy

Includes ENS 100, four core policy/humanities courses, one quantitative method or spatial analysis course; three required science courses; four upper level policy/humanities courses in an area of concentration; one environmental seminar; one senior seminar; and two thesis credits for a total of 17 courses. Specific requirements are listed below: (Please note that students may not develop an ID major with Environmental Policy, nor minor in Environmental Engineering)

A. Introductory course

- ENS 100 - Introduction to Environmental Studies

B. Four required policy courses

- ECO 228 - Environmental and Natural Resource Economics

and three from:

- AAH 260 - Nature, Art, and the Environment
- AAH 265 - Environmentalism in Contemporary Art
- ANT 241 - Environmental Anthropology
- CLS 153 - The Environment in the Ancient World
- EGL 280 - Nature and Environmental Writing
- EGL 281 - Environmental Psychology and the American Literary Landscape
- HST 225 - American Environmental History
- HST 229 - The Adirondacks and American Environmental History
- MLT 300T - Irkutsk, Russia Internship
- PHL 272 - Sustainability Theory & Practice
- PHL 273 - Environmental Ethics
- PSC 260 - Policy Making and American Society
- PSC 283 - Social Movements, the Environment and Society
- SOC 260 - Population and Society: Demographic Trends
- SOC 270 - Social Movements, the Environment, and Society
- SOC 271 - Sociology of Disaster
- SOC 359 - Environmental Policy and Resource Management

C. One quantitative methods and spatial analysis course

one course from

- ECO 243 - Introduction to Econometrics
- ENS 204 - Geographic Information Systems
- ENS 215 - Exploring Environmental Data
- PSC 220 - Social Data Analysis
- PSY 200 - Statistical Methods in Psychology
- SOC 201 - Social Data Analysis
- SOC 300 - Quantitative Methods of Social Research
- STA 104 - Introduction to Statistics
- STA 164 - Strategies of Experimentation: Statistical Design and Analysis of Experiments
- STA 264 - Regression Analysis

D. Three required science courses

Required Course:

- BIO 103 - Diversity of Life: Heredity, Evolution, and Ecology

Choose one from the following:

- BIO 320 - Ecology
- BIO 322 - Conservation Biology
- BIO 324 - Plant Ecology
- GEO 305 - Global Biogeochemical Cycles

- BIO 350T - Terrestrial Ecology

Choose one from the following:

- GEO 106 - Introduction to Oceanography
GEO 108 - Earth Resources
- GEO 109 - Geologic Perspectives on Global Warming
- GEO 110 - Physical Geology
- GEO 112 - Environmental Geology
- GEO 117 - Natural Disasters
- GEO 120 - The Story of Earth and Life

E. Four upper level policy/humanities courses in an area of concentration

(No double counting from A-D, above). The following are suggested areas of concentration; alterations must be approved in writing by the ESPE Director.

Please Note: Up to two internships may be counted toward any of the tracks below, provided the subject of the internship is selected with that track in mind and approved in writing by both the relevant internship director and the ESPE Director; specific internships include:

- ANT 232T / ECO 232T - Fiji Culture and Entrepreneurship
- ANT 490T - Anthropology Independent Study Abroad
- ECO 390 - Economics Internships
- LAS 200T - Women, Environment, Social Change
- MLT 300T - Irkutsk, Russia Internship
- PSC 277 - Capital Region Political Internships
- PSC 279T - Term in Washington D.C. Project
- SOC 385 - Internships for Community Outreach

Environmental Law and Management

- CLS 153 - The Environment in the Ancient World
- ENS 208 - Waste Management and Recycling
- ENS 210 - Groundwater Hydrology
- ENS 215 - Exploring Environmental Data
- ENS 299 - Environmental Forensics
- GEO 109 - Geologic Perspectives on Global Warming
- GEO 209 - Paleoclimatology
- GEO 210 - Groundwater Hydrology
- GEO 355T - Living on the Edge
- HST 109 - History of Sustainability
- HST 138 - Big History
- HST 206 - Environmental Histories of Empire
- HST 225 - American Environmental History
- HST 229 - The Adirondacks and American Environmental History
- HST 299 - The Nuclear Age
- PHL 273 - Environmental Ethics
- PSC 260 - Policy Making and American Society
- PSC 264 - Congressional Politics
- PSC 272 - The Environment, Energy, and US Politics
- PSC 273 - The Supreme Court and Judicial Politics
- SOC 240 - Political Sociology
- SOC 260 - Population and Society: Demographic Trends

- SOC 270 - Social Movements, the Environment, and Society

Environmental Problems and Response

- AAH 260 - Nature, Art, and the Environment
 - AAH 265 - Environmentalism in Contemporary Art
 - ANT 241 - Environmental Anthropology
 - AVA 345 - The Illustrated Organism
 - CLS 153 - The Environment in the Ancient World
 - EGL 271 - Dark Deeds: Crime in the Adirondacks
 - EGL 280 - Nature and Environmental Writing
 - EGL 281 - Environmental Psychology and the American Literary Landscape
 - ENS 208 - Waste Management and Recycling
 - ENS 210 - Groundwater Hydrology
 - ENS 215 - Exploring Environmental Data
 - ENS 222 - The New Wall of China

 - REE 300T - History and Environment of Siberia
 - SOC 202 - Social Problems, Policy and Pop Culture
 - SOC 260 - Population and Society: Demographic Trends
 - SOC 270 - Social Movements, the Environment, and Society
 - SOC 271 - Sociology of Disaster
 - SOC 370 - Public Health
 - SPN 334 - Cartographies of Disasters
 - SOC 387T - Community Service Miniterm
 - TAB 321T - Buenos Aires Mini -Term*
 - TAB 333T - New Zealand Mini-Term Abroad
 - TAB 344T - Egypt Mini-Term*
 - TAB 358T - Sustainability Down Under
- *Provided term paper is written on an environmental topic

Energy and Sustainability

- BIO 322 - Conservation Biology
- ENS 200 - Energy
- ENS 208 - Waste Management and Recycling
- ENS 209 - Renewable Energy Systems

- ENS 222 - The New Wall of China
- ENS 247 - Sustainable Infrastructure
- ENS 253 - Environmentally Friendly Buildings
- ENS 277 - The Water Paradox
- ENS 291 - Construction for Humanity
- ENS 299 - Environmental Forensics
- HST 109 - History of Sustainability
- HST 206 - Environmental Histories of Empire
- HST 291 - Construction for Humanity
- HST 299 - The Nuclear Age
- MLT 209 - The New Wall of China
- MLT 300 - Environmental History: Siberia
- PSC 272 - The Environment, Energy, and US Politics
- TAB 333T - New Zealand Mini-Term

F. Environmental Services and Policy

(Junior seminar for Environmental Policy majors)

- SOC 450 - Environmental Services and Policy

G. ESPE Senior Seminar

- ENS 460 - Environmental Science & Policy Senior Seminar

H. Two terms of thesis research

- ENS 498 - Environmental Science & Policy Research 1
- ENS 499 - Environmental Science & Policy Research 2

Requirements for Honors in Environmental Science, Policy, and Engineering:

The major requirements as specified above are required, as are the GPA requirements of Union College described elsewhere in this catalog. A senior research thesis is required, consisting of at least two terms of ENS 498 and ENS 499 (independent research with a faculty member) and presentation at Steinmetz symposium or other conference as approved by the advisor.

Environmental Science, B.S.

Requirements for the Major in Environmental Science

Includes ENS 100, 11-13 science courses; two math/statistics courses; two policy courses; senior seminar, and one or two thesis (research) or senior writing credits, for a total of 17-20 courses. Specific requirements are listed below. Please note that students may not develop an ID major with Environmental Science, nor minor in Environmental Engineering.

A. Seven to nine required core courses

Required Courses:

- ENS 100 - Introduction to Environmental Studies
- ENS 204 - Geographic Information Systems
- BIO 103 - Diversity of Life: Heredity, Evolution, and Ecology

Choose one from the following:

- BIO 320 - Ecology
- BIO 322 - Conservation Biology
- BIO 324 - Plant Ecology
- GEO 305 - Global Biogeochemical Cycles
- BIO 350T - Terrestrial Ecology of Australia

Chemistry Requirement:

- CHM 101 - Introductory Chemistry 1
and
- CHM 102 - Introductory Chemistry 2

OR

- CHM 110H - Honors Introductory Chemistry

Choose one from the following:

- GEO 110 - Physical Geology
- GEO 112 - Environmental Geology
- GEO 117 - Natural Disasters
- GEO 120 - The Story of Earth and Life

Choose from the following (note that it is recommended to use the Calculus option MTH 110/112 or 113):

- MTH 110 - Calculus 1: Differential Calculus
and
- MTH 112 - Calculus 2: Integral Calculus

OR

- MTH 113 - Accelerated Single-Variable Calculus
- ECO 243 - Introduction to Econometrics
- ENS 215 - Exploring Environmental Data
- PSY 200 - Statistical Methods in Psychology
- STA 164 - Strategies of Experimentation: Statistical Design and Analysis of Experiments
- STA 264 - Regression Analysis

B. Two environmental policy/humanities courses

- AAH 260 - Nature, Art, and the Environment
- AAH 265 - Environmentalism in Contemporary Art
- ANT 241 - Environmental Anthropology
- AVA 345 - The Illustrated Organism
- CLS 153 - The Environment in the Ancient World
- ECO 228 - Environmental and Natural Resource Economics
- EGL 280 - Nature and Environmental Writing
- EGL 281 - Environmental Psychology and the American Literary Landscape
- ENS 222 - The New Wall of China
- ENS 291 - Construction for Humanity
- HST 138 - Big History
- HST 109 - History of Sustainability
- HST 206 - Environmental Histories of Empire
- HST 225 - American Environmental History
- HST 229 - The Adirondacks and American Environmental History

- HST 299 - The Nuclear Age
- MLT 209 - The New Wall of China
- PHL 273 - Environmental Ethics
- PSC 260 - Policy Making and American Society
- PSC 272 - The Environment, Energy, and US Politics
- REE 300T - History and Environment of Siberia
- SOC 260 - Population and Society: Demographic Trends
- SOC 270 - Social Movements, the Environment, and Society
- SOC 271 - Sociology of Disaster
- SOC 450 - Environmental Services and Policy

C. Six upper level science courses and area of concentration

(no more than four courses from any one department except for Environmental Engineering and Technology students; no double counting from A-B, above. The following are suggested areas of concentration; alterations should be approved in writing by the ESPE Director):

Ecology

- BIO 257T - Tropical Rainforest Ecology
- BIO 314 - Ornithology
- BIO 315 - Biology of Plants
- BIO 319 - Vertebrate Natural History
- BIO 320 - Ecology
- BIO 321 - Herpetology: Biology of Amphibians and Reptiles
- BIO 322 - Conservation Biology
- BIO 324 - Plant Ecology
- BIO 325 - Animal Behavior
- BIO 350 - Evolutionary Biology
- BIO 350T - Terrestrial Ecology of Australia
- BIO 352T - Marine Ecology of Australia
- ENS 210 - Groundwater Hydrology
- ENS 215 - Exploring Environmental Data
- GEO 202 - Geomorphology
- GEO 203 - Lakes and Environmental Change
- GEO 207 - Stable Isotopes in Environmental Science
- GEO 208 - Paleontology, Paleobiology, and Paleoecology
- GEO 209 - Paleoclimatology
- GEO 210 - Groundwater Hydrology
- GEO 300 - Glacial and Quaternary Geology
- GEO 305 - Global Biogeochemical Cycles
- GEO 355T - Living on the Edge

Environmental Geosciences

- BIO 235 - Global Biogeochemical Cycles
- BIO 314 - Ornithology
- BIO 315 - Biology of Plants
- BIO 320 - Ecology
- BIO 321 - Herpetology: Biology of Amphibians and Reptiles
- BIO 324 - Plant Ecology
- BIO 350T - Terrestrial Ecology of Australia

- BIO 352T - Marine Ecology of Australia
- CHM 231 - Organic Chemistry 1
- CHM 240 - Analytical Chemistry
- CHM 245 - Environmental Chemistry
- CHM 340 - Chemical Instrumentation
- ENS 210 - Groundwater Hydrology
- ENS 215 - Exploring Environmental Data
- GEO 201 - Stratigraphy and Depositional Environments of New York
- GEO 202 - Geomorphology
- GEO 203 - Lakes and Environmental Change
- GEO 205 - Tectonics
- GEO 206 - Volcanology
- GEO 207 - Stable Isotopes in Environmental Science
- GEO 208 - Paleontology, Paleobiology, and Paleoecology
- GEO 209 - Paleoclimatology
- GEO 210 - Groundwater Hydrology
- GEO 300 - Glacial and Quaternary Geology
- GEO 302 - Geochemical Systems and Modeling
- GEO 305 - Global Biogeochemical Cycles
- Any Geology mini-term.

Energy and Environmental Physics

- PHY 110 - Physics for the Life Sciences 1
and
- PHY 111 - Physics for the Life Sciences 2

OR

- PHY 120 - Matter in Motion
and
- PHY 121 - Principles of Electromagnetics

OR

- IMP 120 - Integrated Math/Physics
and
- IMP 121 - Integrated Math/Physics

and four from the following:

- ENS 200 - Energy
- ENS 209 - Renewable Energy Systems
- MER 231 - Thermodynamics 1
- MER 471 - Solar Energy Analysis and Design
- PHY 122 - Relativity, Quantum, and Their Applications
- PHY 123 - Heat and Light
- PHY 220 - Relativity and Introduction to Quantum Mechanics
- PHY 300 - Methods of Modern Experimental Physics
- PHY 310 - Advanced Topics in Physics 1

Environmental Engineering and Technology

- PHY 120 - Matter in Motion

and five from the following:

- ENS 200 - Energy
- ENS 207 - Hydrology
- ENS 208 - Waste Management and Recycling
- ENS 209 - Renewable Energy Systems
- ENS 210 - Groundwater Hydrology
- ENS 215 - Exploring Environmental Data
- ENS 222 - The New Wall of China
- ENS 234 - No Nonsense Sensors
- ENS 247 - Sustainable Infrastructure
- ENS 252 - Geoenvironmental Applications
- ENS 253 - Environmentally Friendly Buildings
- ENS 277 - The Water Paradox
- ENS 291 - Construction for Humanity
- ENS 299 - Environmental Forensics
- ESC 370 - Engineering Economics
- GEO 210 - Groundwater Hydrology
- HST 291 - Construction for Humanity
- MER 231 - Thermodynamics 1
- TAB 333T - New Zealand Mini-Term

D. Senior Seminar

- ENS 460 - Environmental Science & Policy Senior Seminar

E. One or Two-Term Senior Research Project

One-Term Option:

- ENS 497 - Environmental Science & Policy Senior Research

OR

Two-Term Option:

- ENS 498 - Environmental Science & Policy Research 1
- ENS 499 - Environmental Science & Policy Research 2

Requirements for Honors in Environmental Science, Policy, and Engineering:

The major requirements as specified above are required, as are the GPA requirements of Union College described elsewhere in this catalog. A senior research thesis is required, consisting of at least two terms of ENS 498 and ENS 499 (independent research with a faculty member) and presentation at Steinmetz symposium or other conference as approved by the advisor.

Environmental Engineering Minor

Requirements for the Minor in Environmental Engineering:

This program of study is only available to students as a minor and requires a minimum of six courses, including one core course and five elective courses. This minor is for students who are interested in the engineering and technical aspects of environmental issues. Completion of this minor will introduce the students to the environmental issues involved in several aspects of human endeavor (energy, water, waste, shelter, etc.); and will prepare them to contribute to design teams working to assess and mitigate environmental impacts.

Please Note: Environmental Science and Environmental Policy majors **are not** allowed to minor in Environmental Engineering.

1. Students must complete the following prerequisites for this minor.

- Choose one from the following:
- MTH 112 - Calculus 2: Integral Calculus
- MTH 113 - Accelerated Single-Variable Calculus

Choose one from the following:

- PHY 110 - Physics for the Life Sciences 1
- PHY 120 - Matter in Motion

2. Core course

- ENS 100 - Introduction to Environmental Studies

3. Five courses from the following list of electives.

- ENS 200 - Energy
- ENS 204 - Geographic Information Systems
- ENS 208 - Waste Management and Recycling
- ENS 209 - Renewable Energy Systems
- ENS 210 - Groundwater Hydrology
- ENS 215 - Exploring Environmental Data
- ENS 234 - No Nonsense Sensors
- ENS 247 - Sustainable Infrastructure
- ENS 252 - Geoenvironmental Applications
- ENS 253 - Environmentally Friendly Buildings
- ENS 277 - The Water Paradox
- ENS 299 - Environmental Forensics
- GEO 210 - Groundwater Hydrology
- MER 231 - Thermodynamics 1

Environmental Science and Policy Minor

Requirements for the Minor in Environmental Science and Policy:

1. Required course:

- ENS 100 - Introduction to Environmental Studies

2. Elective courses:

Two science courses and two policy/humanities courses, and a fifth course in either science or policy/humanities. Courses must be selected from the following lists. No more than two courses may be taken from any one department, and no more than one course may be taken at the 100 level (not including ENS 100).

Please Note: Environmental Science and Environmental Policy majors are not allowed to minor in Environmental Science and Policy.

Science Courses

Biology:

- BIO 103 - Diversity of Life: Heredity, Evolution, and Ecology
- BIO 235 - Global Biogeochemical Cycles
- BIO 319 - Vertebrate Natural History
- BIO 320 - Ecology
- BIO 322 - Conservation Biology
- BIO 324 - Plant Ecology
- BIO 350 - Evolutionary Biology

Chemistry:

- CHM 101 - Introductory Chemistry 1
- CHM 245 - Environmental Chemistry

Environmental Science, Policy, and Engineering:

- ENS 200 - Energy
- ENS 204 - Geographic Information Systems
- ENS 208 - Waste Management and Recycling
- ENS 209 - Renewable Energy Systems
- ENS 210 - Groundwater Hydrology
- ENS 215 - Exploring Environmental Data
- ENS 222 - The New Wall of China
- ENS 234 - No Nonsense Sensors
- ENS 247 - Sustainable Infrastructure
- ENS 252 - Geoenvironmental Applications
- ENS 253 - Environmentally Friendly Buildings
- ENS 277 - The Water Paradox
- ENS 291 - Construction for Humanity
- ENS 299 - Environmental Forensics

Geosciences:

- GEO 106 - Introduction to Oceanography
- GEO 109 - Geologic Perspectives on Global Warming
- GEO 110 - Physical Geology
- GEO 112 - Environmental Geology
- GEO 117 - Natural Disasters
- GEO 120 - The Story of Earth and Life
- GEO 201 - Stratigraphy and Depositional Environments of New York
- GEO 202 - Geomorphology
- GEO 203 - Lakes and Environmental Change

- GEO 206 - Volcanology
- GEO 207 - Stable Isotopes in Environmental Science
- GEO 209 - Paleoclimatology
- GEO 210 - Groundwater Hydrology
- GEO 300 - Glacial and Quaternary Geology
- GEO 302 - Geochemical Systems and Modeling
- GEO 305 - Global Biogeochemical Cycles
- GEO 355T - Living on the Edge

Policy/Humanities Courses

Art History:

- AAH 260 - Nature, Art, and the Environment
- AAH 265 - Environmentalism and Globalization in Contemporary Art

Visual Arts:

- AVA 345 - The Illustrated Organism

Anthropology:

- ANT 241 - Environmental Anthropology

Classics:

- CLS 153 - The Environment in the Ancient World

Economics:

- ECO 228 - Environmental and Natural Resource Economics

English:

- EGL 271 - Dark Deeds: Crime in the Adirondacks
- EGL 280 - Nature and Environmental Writing
- EGL 281 - Environmental Psychology and the American Literary Landscape

Environmental Science, Policy, and Engineering:

- ENS 222 - The New Wall of China
- ENS 291 - Construction for Humanity

History:

- HST 109 - History of Sustainability
- HST 138 - Big History

- HST 206 - Environmental Histories of Empire
- HST 225 - American Environmental History
- HST 229 - The Adirondacks and American Environmental History
- HST 291 - Construction for Humanity
- HST 299 - The Nuclear Age

Philosophy:

- PHL 273 - Environmental Ethics
- PHL 274 - (174) Biomedical Ethics

Political Science:

- PSC 272 - The Environment, Energy, and US Politics

Sociology:

- SOC 260 - Population and Society: Demographic Trends
- SOC 271 - Sociology of Disaster
- SOC 359 - Environmental Policy and Resource Management
- SOC 370 - Public Health
- SOC 450 - Environmental Services and Policy

Spanish

- SPN 334 - Cartographies of Disasters

Terms Abroad:

- REE 300T - Internship (Irkutsk, Russia)*
 - SOC 387T - Community Service Miniterm
 - TAB 321T - Buenos Aires Mini-Term*
 - TAB 333T - New Zealand Mini-Term
 - TAB 344T - Egypt Mini-Term*
- * Provided research project involves an environmental topic

Ethics Across the Curriculum

Director: Professor B. Baker (Philosophy)

Ethics Across the Curriculum, funded by alumnus Michael Rapaport ('59), is a college-wide initiative that provides support for faculty to incorporate teaching about everyday ethics into their course curricula. Everyday ethics is about integrity and cheating, honesty and dishonesty, justice and injustice. Courses incorporating an Ethics Across the Curriculum segment help students learn what everyday ethics is and how its principles are incorporated into many disciplines that deal with substantive issues other than ethics, such as anthropology, chemistry, engineering, and literature.

Art History

AAH 208 - The Business of Visual Art and Contemporary Entrepreneurship

Chemistry

CHM 260 - Inorganic Chemistry

Classics

CLS 146 - Sex and Gender in Classical Antiquity

CLS 178 - Ancient World Mythology

Computer Science

CSC 106 - Can Computers Think? Introduction to Computer Science

(ethics component included when taught by K. Striegnitz)

Economics

ECO 101 - Introduction to Economics

ECO 225 - Economics of Sin

ECO 226 - Financial Markets

ECO 230 - Mind of the Entrepreneur

ECO 331 - E-Commerce Economics

ECO 334 - Introduction to Financial Analysis

ECO 375 - Seminar in Efficient Management of Technology

Engineering

SMT 123 - Ethics, Technology & Society

English

EGL 101 - The Study of Literature: Fiction

EGL 231 - Nineteenth-Century American Literature

EGL 237 - Reclamation & Renaissance: Black Literary Arts 1900 to 1968, "Dark Like Me - That is my Dream!"

EGL 279 - Literature and Science

EGL 254 - Discourses on the Viet Nam War

EGL 296 - Screenwriting Workshop

Environmental Science

ENS 110 - Introduction to Environmental Science

History

HST 124 - Monuments, Museums, and Movies: Introduction to Public History

Psychology

PSY 300 - Research Methods in Psychology

Sociology

SOC 360 - Domestic Violence

Film Studies

Director: Professor A. Feffer (History); Associate Professor M. Chilcoat (Modern Languages and Literatures)

Faculty: Senior Lecturer and Filmmaker in Residence J. de Sève

Interdisciplinary and inclusive, the Film Studies program raises students' conscious awareness of film as a prime art and popular form of mass communication, and develops students' abilities to recognize and navigate the discourse particular to this medium as both consumers and producers. Course offerings span an array of languages, geographies, and time periods, and cover theory, history and critical analysis of films that allow students to train their critical eye on film representations of race and ethnicity, gender, sexuality, class, age and ability. Students gain experience analyzing,

evaluating, and critiquing film in light of diverse cinematic cultures, traditions, histories, and ideologies. This knowledge both enriches and is enriched by screenwriting and hands-on film production courses. Film Studies minors thus hone soft and hard skills including critical thinking, speaking, writing, and listening; technical production, social awareness, and teamwork which readily transfer to a wide range of professional, creative and academic pathways within and beyond the film industry.

Film Studies Minor

Requirements for the Minor:

A minimum of six approved courses from at least two of the following categories: I. Film History and Culture, II. Film: Disciplines, Theory, Criticism, and III. Film Technologies (see listings below; consult home department or program catalogue listings for course descriptions). In some cases, film courses entail prerequisite requirements; please consult catalogue for prerequisite information. Most Film Studies courses are taught in English, though not all. Consult catalogue for prerequisites for Film Studies courses not conducted in English. All courses for the Film Studies Minor must be approved by the Film Studies Program Directors. If you think a course should count for the Film Studies Minor but is not listed below, contact the Program Directors.

Courses

I. Film History and Cultures

- AAH 222 - History of Photography
- CLS 151 - The Ancient World in Film and Literature
- EGL 255 - Asian American Literature and Film
- EGL 258 - Changing Ireland
- EGL 259 - Irish Literature and Film
- FRN 312 - What is French Cinema?/Qu'est-ce que le cinema francais?
- GER 402 - German Film Studies
- HST 333 - Hollywood Film
- HST 366 - British Cinema
- MLT 201 - Chinese Cinema
- MLT 203 - Asian American Film and Performance
- MLT 265 - Soviet and Russian Film Revolutions: Political, Social, Cultural
- MLT 273 - Introduction to Spanish Cinema
- MLT 281 - Screening Identities in Latin American Cinema
- MLT 286T - Gender and Identity in Contemporary Brazilian Cinema
- MLT 293 - Made in New York: Puerto Rican and Dominican Transnational Identities in American Literature & Cinema

II. Film: Disciplines, Theory, Criticism

- ANT 240 - Technology, Culture & Society
- EGL 286 - Transnational Literature, Film, and Theory
- EGL 288 - Film as Fictive Art: American Independent Cinema
- EGL 289 - Studies in a Major Film Director
- EGL 290 - Studies in Film Genre/Style: Documentary
- FRN 402 - Sex Lives and Videotape: Casting Sexuality in French and Francophone Film
- HST 331 - Representing America: United States History in Film
- MLT 287 - Filming Margins: Cinema Verite and Social Realism in Latin America
- MLT 339 - The Holocaust in Film: Cinematic Treatments of Violence, Trauma and Memory
- PSC 340 - Politics and Film
- PSC 364 - Law and Film
- PSC 434 - Feminist Film

- SPN 311 - Otherness and Citizenship in Contemporary Spanish Theater and Cinema
- SPN 415 - What Remains: Waste in Latin American Cinema, Literature, Media, and Art
- SPN 433 - Latin American Colonial Crossroads at the Movies

III. Film Technologies

- ATH 117 - Fundamentals of Stage Lighting Design
- AVA 120 - Photography 1 - Aesthetics, Film, Chemistry & Printing
- AVA 160 - Digital Art
- AVA 220 - Photography 2 - Intermediate Photography
- AVA 262 - Real and Recorded Time - 4D Art
- AVA 320 - Photography 3 - Color Digital Photography
- AVA 363 - 3D Computer Modeling
- CSC 385 - Computer Graphics
- EGL 296 - Screenwriting Workshop
- ECE 241 - Discrete Systems
- ECE 347 - Image Processing
- FLM 201 - Documentary Filmmaking
- FLM 202 - Digital Filmmaking
- FLM 303 - Cinematic Montage

IV. Film Project or Internship

- FLM 490 - Film Project or Internship 1
- FLM 491 - Film Project or Internship 2
- FLM 492 - Film Project or Internship 3

Gender, Sexuality, & Women's Studies

Director: Professor J. Murphy (English)

Faculty: Professors C. Batson (Modern Languages & Literatures), J. Cramsie (History), K. Doyle (English), A. Feffer (History), M. Ferry (Modern Languages & Literatures), W. Garcia (Modern Languages & Literatures), M. Goldner (Sociology), L. Marso (Political Science), J. Matsue (Music), Z. Oxley (Political Science), S. Raucci (Classics), M.F. Sener (Economics), G. Seri (Political Science), J. Smith (English); Associate Professors A. Burkett (English), C. Bracken (English), D. Butler (Sociology), L. Cox (Visual Arts), A. Foroughi (History), T. Gazzarri (Classics), J. Lewin (English), K. Lynes (English), J. Mitchell (English), E. Nelson (Modern Languages & Literatures), L. Nemett (Visual Arts), D. Ogawa (Visual Arts), K. Scheiter (Philosophy), B.K. Tuon (English), J. Troxell (English), P. Wareh (English); Assistant Professors A. Khan (Anthropology), E. McGrath (History), S. McAuliffe (English), S. Mueller (Modern Languages & Literature), D. Venning (Theater & Dance/English), D.C. Walker (Psychology); Senior Lecturer M. Osuna (Modern Languages & Literatures)

Gender, Sexuality, and Women's Studies (GSWS) is an interdisciplinary program that includes a wide variety of courses offered in arts and humanities and social sciences. Offering a critical perspective that places gender at the center of analysis, GSWS reexamines traditional beliefs, supports new research methods, explores feminist and queer theories, and enables students to better understand the societal positions and global processes affecting all genders throughout the world. GSWS courses probe the way cultures construct concepts of gender and sexuality, introducing students to differences of class, race, ethnicity, and life cycle in a range of societies. Students are encouraged to become aware of intersectionality and unexamined assumptions about sexual and gender differences.

Gender, Sexuality, and Women's Studies Approved Courses

Division 1: Arts and Humanities

Art History

- AAH 223 - The Nude
- AAH 360 - Seminar: Visual Culture, Race and Gender

Classics

- CLS 146 - Sex and Gender in Classical Antiquity
- CLS 147 - Women in Ancient Rome

English

- EGL 202 - Amazons, Saints and Scholars: Women's Writing in the Middle Ages and Renaissance
- EGL 219 - Rise of the Novel
- EGL 223 - Jane Austen
- EGL 224 - 19th-Century Novel
- EGL 225 - The Bronte Sisters
- EGL 230 - Seduction in Early American Republic
- EGL 236 - American Realism and Naturalism
- EGL 244 - The Contemporary British Imagination
- EGL 250 - The Beats and Contemporary Culture
- EGL 253 - Narratives of Haunting in US Ethnic Literature
- EGL 257 - Irish American Literature
- EGL 258 - Changing Ireland
- EGL 259 - Irish Literature and Film
- EGL 261 - Modernism and Modernity
- EGL 262 - Global Modernisms
- EGL 263 - Literature and Sexuality
- EGL 264 - Women Writers, 18th to 20th Century
- EGL 265 - Jewish Women Writers
- EGL 266 - Black Women Writers
- EGL 267 - Virginia Woolf
- EGL 268 - Staging Black Feminisms
- EGL 274 - Uncanny Texts: Literature and Psychoanalysis
- EGL 276 - Literature of the Manor House
- EGL 282 - The Theory of Things: Objects, Emotions, Ideas
- EGL 287 - Gender and Sexuality in Film
- EGL 292 - Special Topics in Theater: Contemporary American Theater

Note: Junior and Senior Seminars: Not listed here because topics vary year to year, but in order to earn GSWS credit, the topic must cover GSWS topics, such as Queer Theory, Toni Morrison, Virginia Woolf, and others.

Modern Languages and Literatures

- FRN 308 - Women on Top: Great Women Writers and Characters of French Narrative Fiction
- FRN 317 - France after #metoo
- FRN 400 - Whose Enlightenment?
- FRN 402 - Sex Lives and Videotape: Casting Sexuality in French and Francophone Film
- MLT 202 - Gender and Sexuality in Modern China
- MLT 203 - Asian American Film and Performance

Argentina

- TAB 321T Buenos Aires Mini-Term

Gender, Sexuality, and Women's Studies, B.A.

Requirements for the Major:

Twelve courses, including either GSW 100 or GSW 101. If a student takes both introductory courses, one course will count toward a GSWS elective, GSW 495, and a two-term senior thesis. The remaining eight courses must be selected from more than 50 GSW courses offered in a variety of departments and crossing at least two of the College's four divisions. Completing GSW 100 before the student's senior year is required, or by permission of the program director. A one-term internship at a designated locale in the Capital District is highly recommended and can be counted as one of the eight required courses (see director for details). Students should confer with the program director in designing and fulfilling their requirements.

Requirements for Honors:

Candidates for honors must meet College requirements, have a cumulative grade point average of 3.3 in Gender, Sexuality, and Women's Studies, at least three "A" or "A-minus" grades in Gender, Sexuality, and Women's Studies courses, and have earned an "A" or "A-minus" on the senior thesis. Departmental honors are formally awarded at the discretion of the director of Gender, Sexuality, and Women's Studies in consultation with GSWS faculty.

Gender, Sexuality, and Women's Studies (ID), B.A.

Requirements for the Interdepartmental Major:

Eight courses, including GSW 100 or GSW 101 [if a student takes both Introductory courses, one course will count toward a GSWS elective], GSW 495, five remaining courses with GSW designation from at least two divisions, and a senior thesis on a subject that examines gender, sexuality, and women, and/or feminism. One term of the senior thesis counts towards the GSW major. Completing GSW 100 before the student's senior year is required, or by permission of the program director. A one-term internship is recommended (see major requirements). Students should confer with the program director in designing and fulfilling their requirements.

Gender, Sexuality, and Women's Studies Minor

Requirements for the Minor:

Six courses, including GSW 100, or GSW 101 [if a student takes both introductory courses, one course will count toward a GSWS elective], GSW 495, and four remaining courses with GSW designation from at least two divisions, selected in consultation with the program director. Completing GSW 100 before the student's senior year is required, or by the permission of the program director.

Geosciences

Chair: Professor H. Frey

Faculty: Professors J. Garver, D. Gillikin, K. Hollocher, D. Rodbell; Lecturers M. Manon, A. Verheyden-Gillikin; Adjunct J. Smith

Staff: C. Angley (Administrative Assistant)

Course Selection Guidelines: None of the 100-level courses in Geosciences have prerequisites and any may serve as an entry point into upper level courses. ENS 100 may also serve as an entry point. Preference for 100-level courses is given to first-year students and sophomores. GEO 120 should be taken as soon as possible. Students should take a 200-level geoscience course after taking an introductory course, ideally in the second year. The 200 and 300 level geoscience courses may be taken in any order, with one exception. Students should have completed CHM 101 before taking GEO 220; GEO 220 is a prerequisite for GEO 320. All Geosciences majors are required to take GEO 405 in the senior year. All Geosciences majors are required to complete a senior thesis, which may be either 1 term (GEO 498) or 2-3 terms (GEO 495, GEO 496 and GEO 497); GEO 496 and GEO 498 satisfy the senior writing requirement (WS).

Geosciences, B.S.

Requirements for the Major:

A minimum of eleven courses in the department including:

Choose one from the following:

- ENS 100 - Introduction to Environmental Studies
- GEO 106 - Introduction to Oceanography
- GEO 109 - Geologic Perspectives on Global Warming
- GEO 110 - Physical Geology
- GEO 112 - Environmental Geology
- GEO 117 - Natural Disasters

Take the following courses:

- GEO 120 - The Story of Earth and Life
- GEO 201 - Stratigraphy and Depositional Environments of New York
- GEO 202 - Geomorphology
- GEO 220 - Mineral Science
- GEO 307 - Structural Geology
- GEO 320 - Petrology of Igneous and Metamorphic Rocks
- GEO 405 - Geosciences Senior Seminar

Senior Writing (WS) Requirement: (Choose one option below)

One-Term Option:

- GEO 498 - Geosciences Research and Writing

Two-Term Option:

- GEO 495 - Geosciences Thesis Research 1
- GEO 496 - Geosciences Thesis Research 2

Students in the Traditional Geosciences Track must choose two courses from the following:

- GEO 205 - Tectonics
- GEO 206 - Volcanology
- GEO 208 - Paleontology, Paleobiology, and Paleoecology
- GEO 210 - Groundwater Hydrology
- GEO 302 - Geochemical Systems and Modeling
- GEO 303 - Earthquakes and the study of the Earth's Interior

Students in the Environmental Geosciences Track must choose two courses from the following:

- GEO 203 - Lakes and Environmental Change
- GEO 207 - Stable Isotopes in Environmental Science
- GEO 209 - Paleoclimatology
- GEO 210 - Groundwater Hydrology
- GEO 300 - Glacial and Quaternary Geology
- GEO 305 - Global Biogeochemical Cycles
- GEO 302 - Geochemical Systems and Modeling

All students must complete two courses from the following list:

- **Any elective courses from the geosciences curriculum**
or
- ENS 204 - Geographic Information Systems
or
- ENS 215 - Exploring Environmental Data
- BIO 320 - Ecology
or
- BIO 350T - Terrestrial Ecology of Australia
Or
- AST 150 - (105) Introduction to Planetary Science

- CHM 231 - Organic Chemistry 1
or
- CHM 240 - Analytical Chemistry

Of these, no more than one may be at the 100-level.

Also required are two terms each of the following:

Mathematics

Any two courses numbered 100 or higher, or equivalent such as:

- MTH 113 - Accelerated Single-Variable Calculus

Chemistry

The following is required, and any CHM course numbered 102 or higher.

- CHM 101 - Introductory Chemistry 1

Biology or Physics

(any two courses numbered 100 or higher).

Note: Advanced work or a minor is encouraged in chemistry, physics, biology, mathematics, economics, or engineering.

All Geosciences courses at the 100 level are introductory and have no prerequisites. All serve as an entry point to the major. Preference will be given to first and second year students

Additional Requirements

Senior Geosciences majors may not take any introductory course for major credit. A senior thesis is required, and theses may either be 1 term (GEO 498) or 2-3 terms (GEO 495, GEO 496, GEO 497). Completion of a two-term senior thesis (GEO 495 and GEO 496) is required for honors, and only one senior level research credit may count toward the two geosciences electives. Students who intend on going to graduate school are strongly encouraged to do a research thesis and to take two courses in physics rather than biology, unless specifically interested in paleontology or geobiology, because most graduate programs require physics. A summer field course in the junior year is strongly recommended, particularly for those going on to graduate school or geological consulting work.

Requirements for Honors in Geosciences:

The major requirements as specified above are required, as are the GPA requirements of Union College described elsewhere in this catalog. A senior research thesis is required, consisting of at least two terms of GEO 495, GEO 496 or GEO 497 (independent research with a faculty member). Theses involving GEO 497 must be completed by the end of the 6th week of the Spring term. An oral public presentation and defense in the spring term is also required. Successful defense of the thesis is determined by a vote of the geosciences faculty. An oral public presentation and defense in the spring term is also required. Successful defense of the thesis is determined by a vote of the geosciences faculty.

Geosciences (ID), B.S.

Requirements for Interdepartmental Majors:

Interdepartmental majors will follow the guidelines as described in Academic Program and Policies section in this catalog.

The interdepartmental geosciences major must be approved by the chair of the Geosciences Department and should include a plan written in consultation with advisors from both departments to form a cohesive and integrated major.

There are two options as follows:

Option 1 (Geosciences / Other)

Students who wish to have their interdepartmental major listed as Geosciences / Other (i.e. Geosciences / Physics, Geosciences / Biology), etc.) are required to take eight geology courses.

The 8 required geosciences courses include:

- a GEO 100-level course
- GEO 120 - The Story of Earth and Life
- GEO 405 - Geosciences Senior Seminar
- and 5 200-level (or higher) geosciences courses or electives

Option 2 (Other / Geosciences)

Students who wish to have their interdepartmental major listed as Other / Geosciences (i.e. Physics / Geosciences, Biology / Geosciences) are required to take six geosciences courses.

The 6 required geosciences courses include:

- a GEO 100-level course
- GEO 120 - The Story of Earth and Life
- and 4 200-level (or higher) geosciences courses or electives

Requirements for Honors in Geosciences:

The major requirements as specified above are required, as are the GPA requirements of Union College described elsewhere in this catalog. A senior research thesis is required, consisting of at least two terms of GEO 495, GEO 496 or GEO 497 (independent research with a faculty member). Theses involving GEO 497 must be completed by the end of the 6th week of the Spring term. An oral public presentation and defense in the spring term is also required. Successful defense of the thesis is determined by a vote of the geosciences faculty. An oral public presentation and defense in the spring term is also required. Successful defense of the thesis is determined by a vote of the geosciences faculty.

Geosciences Minor

Requirements for the Minor:

The 6 required courses:

- any introductory 100-level geosciences course
- ENS 100 - Introduction to Environmental Studies
- and any five geosciences required courses or electives numbered 200 or higher

History

Chair: Associate Professor A. Foroughi

Faculty: Professors S. Berk, J. Cramsie, A. Feffer, J. Madancy, M. Walker; Associate Professors K. Aslakson, A. Morris, B. Peterson; Assistant Professor E. McGrath

Staff: L. McGill (Administrative Assistant)

History, B.A.

Requirements for the Major:

Twelve courses including the core and distribution requirement as follows:

- Four or five courses toward the core (The number depends on which core a student chooses.)
- At least one course on the period before 1700.
- One course approved under Inter-Continental Connections.
(This requirement is for students entering the college in Fall 2018 and after.)
- Two-300 level courses.
- One-400 level seminar.
- Two-term senior project.

Students will choose a core of Africa/Middle East, Asia, Europe, Latin America, US, Public History, or a thematic concentration. Examples of thematic concentrations include "Africana," "Women and Gender," "Revolution," "Empires," etc. In close cooperation with their advisors, history majors will select the courses for a thematic concentration and submit their proposal to the Department Chair for written approval by the start of Winter Term of the Junior year. If students select a US, European, or Public History core, they must complete at least four courses in US, European, or Public History, respectively. If they select Africa/Middle East, Asia, or Latin America, they must complete either (1) four courses in the respective field, or (2) at least three history courses in the core geographical area they have chosen, along with at least two other approved courses in relevant interdisciplinary programs, such as Africana Studies, Asian Studies, and Latin American Studies. These are generally not language courses.

Note: Students entering the college in Fall 2018 or after may count no more than five 100-level courses toward the major.

Pre-1700 Approved Courses:

Topics on United States:

- HST 113 - The Origins of American Society

Topics on Europe:

- HST 141 - Medieval Europe
- HST 142 - Renaissance and Reformation Europe
- HST 145 - Early Modern Europe
- HST 161 - The Peoples of Britain
- HST 195 - From Abraham to Mohamed and Beyond: The Early History of the Jews
- HST 240 - The Crusades: Christianity and Islam in Conflict
- HST 241 - Mystics, Magic, and Witchcraft in Medieval and Early Modern Europe
- HST 245 - Occult Sciences and Societies
- HST 247 - Men, Women, and Gender in Early Modern Europe
- HST 261 - Medieval Britain 1000-1509
- HST 262 - The Age of Henry VIII
- HST 263 - The Tudor and Stewart Queens

- HST 264 - The Stuart Wars 1603-1660
- HST 340 - Special Topics in European History
- HST 431 - Seminar in European History: Nazism
- HST 461 - Seminar in European History: Discovery of Britain and Ireland

Topics on Asia:

- HST 181 - Confucians and Conquerors: East Asian Traditions
- HST 282 - The Mongols: Terror, Trade and Tolerance
- HST 284 - Hobbled and Heroic: Women in China and Japan
- HST 285 - The Samurai: Lives, Loves, and Legacies

Topics on Latin America:

- HST 171 - Europe, Africa, and the Americas in the Era of Columbus
- HST 271 - History of Mexico

Topics on Africa/Middle East:

- HST 107 - Africa to 1800

Other:

- HST 105 - Comparative Global History to 1800
- HST 138 - Big History

Inter-Continental Connections Approved Courses:

- HST 105 - Comparative Global History to 1800
- HST 106 - Comparative Global History from 1800
- HST 108 - Africa since 1800
- HST 109 - History of Sustainability
- HST 113 - The Origins of American Society
- HST 135 - Latinos In/As U.S. History
- HST 138 - Big History
- HST 171 - Europe, Africa, and the Americas in the Era of Columbus
- HST 172 - Reform and Revolution in Latin America and the Caribbean
- HST 173 - History of the Caribbean and Central America
- HST 204 - Wine: A Global History
- HST 205 - Clash of Civilizations?
- HST 219 - Revolutions in the Global South
- HST 224 - Transnational America
- HST 257 - Modern France and Its Empire
- HST 270 - History of Latin American Popular Culture
- HST 275 - United States Foreign Relations and Modern Latin America
- HST 289 - Global Indians: South Asian Identity in the United States
- HST 302 - Comparing Muslim Cultures
- HST 323 - Race and Revolution
- HST 367 - The British Empire
- HST 372 - Sex, Race and Gender in Latin America
- HST 402 - Seminar in Africa/Middle East: French Empire

Those pursuing the Public History Core

- HST 124 - Monuments, Museums, and Movies: Introduction to Public History
- A Public History internship (department-approved)

or

- HST 265 - The Museum: Theory and Practice

At least two of the following in addition:

- HST 118 - Civil War and Reconstruction
- HST 211 - American Indian History
- HST 226 - A Novel View of US History
- HST 227 - Interviews with History: An Introduction to Oral History
- HST 265 - The Museum: Theory and Practice
- HST 270 - History of Latin American Popular Culture
- HST 278T - South Africa Mini-Term
- HST 285 - The Samurai: Lives, Loves, and Legacies
- HST 287 - Film and Modern India
- HST 289 - Global Indians: South Asian Identity in the United States
- HST 324 - Race in American Memory
- HST 325 - War in American Memory
- HST 331 - Representing America: United States History in Film
- HST 414 - Seminar in US History: Lincoln: Politician to Pop Icon
- HST 481 - Seminar in East Asian History: Remembering World War II in Asia
- REE 341T - Holocaust History Mini-Term * Note that this course DOES NOT meet a 300-level requirement.

Additional Requirements

Students will also fulfill a distribution requirement. If students select a US, European, or Public History core, they must complete at least two courses each in two of the following areas: Africa/Middle East, Asia, and Latin America. If they select an Africa/Middle East, Asia, or Latin America core, they must complete at least two courses each in two of the following areas, excluding the area of the core: Africa/Middle East, Asia, Europe, Latin America, and US history. These requirements apply to students who entered Union in the fall of 2013 and after.

400-level seminars are normally limited to 15 students and are designed to teach research skills. The 300-level courses are specifically designed for history majors and include bibliographical and historiographical components. 400-level seminars and 300-level courses may be used to meet the core requirements. Senior projects normally must pertain to a topic in the core, but cannot count toward courses in the core. Students must complete a 400-level seminar before beginning the thesis. 400-level seminars are normally offered in the winter and spring terms. If a student does not complete a 400-level seminar by the end of their junior year, then they may not be able to graduate by the spring of the following year. Double majors must do a separate two-term senior project in History. Students who want to do an interdepartmental senior project should declare an interdepartmental major.

Two of the following classics courses may be counted toward the history major, but not toward a core:

- CLS 110 - Ancient Egypt: History and Religion
- CLS 111 - Ancient Iraq: History and Religion
- CLS 121 - The History of Greece to the Death of Alexander the Great
- CLS 125 - History of Rome
- CLS 126 - The Rise of the Roman Republic
- CLS 129 - History of the Roman Empire

Note: Students entering the college in Fall 2018 or after may not count any Classics courses towards the major.

Requirements for Honors in History:

To be eligible for departmental honors, a student must fulfill the following requirements: (1) a minimum index of 3.30 in history; (2) a grade of "A minus" or higher on the senior project; and (3) a grade of "distinction" or "high pass" in an oral examination based on the senior project. In addition, the student must satisfy College requirements for departmental honors.

Course Selection Guidelines:

Placement: We accept the following AP courses: World History, United States History, and European History. If the score is 4 or 5, then we assign credit for one of our introductory courses, HST 106 for World History, HST 102 for United States History, and HST 147 for European History, all of which will count towards the major.

Courses Suitable for Non-Majors: Although 300 and 400 level courses are designed with History majors and minors in mind, all History courses are suitable for non-majors.

Course Numbering: 300- and 400-level courses have as a prerequisite any 100- or 200-level course or permission of the instructor.

History (ID), B.A.

Requirements for the Interdepartmental Major:

Eight courses, including the core and distribution requirement for majors, one 300-level course, the 400-level seminar, and the senior project. Students must complete a 400-level seminar before beginning the senior project. 400-level seminars are normally offered in the winter and spring terms. If a student does not complete a 400-level seminar by the end of their junior year, then they may not be able to graduate by the spring of the following year. Interdepartmental majors may count one term of the senior project toward the field requirements.

Note: For students entering the College in Fall 2018 or after, the following requirements apply: eight courses, including three courses in the core, one course each in two of the approved areas outside the core, one pre-1700 course, one Inter-Continental Connections course, one 300-level course, and the 400-level seminar (to be completed by the end of their junior year before beginning their senior project). The senior project may not count toward the field requirement.

Requirements for Honors in History:

To be eligible for departmental honors, a student must fulfill the following requirements: (1) a minimum index of 3.30 in history; (2) a grade of "A minus" or higher on the senior project; and (3) a grade of "distinction" or "high pass" in an oral examination based on the senior project. In addition, the student must satisfy College requirements for departmental honors.

Course Selection Guidelines:

Placement: We accept the following AP courses: World History, United States History, and European History. If the score is 4 or 5, then we assign credit for one of our introductory courses, HST 106 for World History, HST 102 for United States History, and HST 147 for European History, all of which will count towards the major.

Courses Suitable for Non-Majors: Although 300 and 400 level courses are designed with History majors and minors in mind, all History courses are suitable for non-majors.

Course Numbering: 300- and 400-level courses have as a prerequisite any 100- or 200-level course or permission of the instructor.

History Minor

Requirements for the History Minor:

Six history courses, including at least one 300-level course; at least three of the six must belong to one of the following core areas: Africa/Middle East, Asia, Europe, Latin America, or US.

Public History Minor

For information about approved public history internships, contact Melinda Lawson at (518) 388-8041 or lawsonm@union.edu.

Requirements for the Public History Minor:

Seven courses including:

- HST 124 - Monuments, Museums, and Movies: Introduction to Public History
- a department-approved Public History internship
or
- HST 265 - The Museum: Theory and Practice
and
- at least one 300-level course

In addition, one course from the list below:

- HST 118 - Civil War and Reconstruction
- HST 211 - American Indian History
- HST 226 - A Novel View of US History
- HST 227 - Interviews with History: An Introduction to Oral History
- HST 265 - The Museum: Theory and Practice
- HST 270 - History of Latin American Popular Culture
- HST 285 - The Samurai: Lives, Loves, and Legacies
- HST 287 - Film and Modern India
- HST 289 - Global Indians: South Asian Identity in the United States
- HST 324 - Race in American Memory
- HST 325 - War in American Memory
- HST 331 - Representing America: United States History in Film
- HST 414 - Seminar in US History: Lincoln: Politician to Pop Icon
- HST 481 - Seminar in East Asian History: Remembering World War II in Asia
- HST 278T - South Africa Mini-Term

And either an additional course drawn from the previous list or one course drawn from the following:

- any Art History course
- AVA 262 - Real and Recorded Time - 4D Art
- CLS 141T - Classical Greek Archaeology
- CSC 055 - Working with the Web
- EGL 290 - Studies in Film Genre/Style: Documentary
- FLM 201 - Documentary Filmmaking
- MLT 339 - The Holocaust in Film: Cinematic Treatments of Violence, Trauma and Memory
- PSC 260 - Policy Making and American Society
- PSC 340 - Politics and Film
- REE 341T - Holocaust History Mini-Term

Interdepartmental

Interdisciplinary Studies

Interdisciplinary creates educational opportunities through combining two or more academic disciplines. Indeed, often boundaries are pushed and new discoveries made at the margins of established field and research methods. Union College recognizes the rich possibilities of interdisciplinary studies by offering many opportunities for both faculty and students to engage with multiple disciplines - and each other - in collaborative classroom settings, innovative majors and unique research initiatives.

Vibrant interdisciplinary studies (IS) can be pursued through a variety of designated degree programs at Union College. Students are able to major and/or minor in our many Interdisciplinary Studies Programs (ISP) in wide ranging topics from Film Studies to Neuroscience.

International Programs

Director: L. Atkins

Staff: G. Casper (Assistant Director)

Union College considers its commitment to international programs to be a central part of its identity. In addition to broadening a student's perspective and deepening their knowledge of other cultures, international programs often energize and challenge a student to a higher level of commitment to the enterprise of learning. Students wishing to study away from Union College may do so through the following international programs:

- Study Abroad
- Exchanges
- Independent Study Abroad
- Non-Union Programs
- Mini-Term Programs

Updated information on the timing, details, and course descriptions for each international program listed below, are available from the International Programs office. The application, application instructions, policies, and waiver and liability forms are available on the International Programs website. Please refer to the "Costs, Fees" section for charges related to International Programs.

Applicants to Union College international programs must:

- Be a matriculated student in residence at Union College with an overall Union cumulative average of 2.5 at the time of application.
- Have fewer than five disciplinary points as verified by the Dean of Students.
- Have a clear account balance, as verified by the Financial Services Office.
- Be in good academic standing, as verified by the Dean of Studies.
- Meet the minimum language requirement (if any), as specified in the program description.
- Complete the application process, which includes an essay.

Maintenance of Eligibility *after* Acceptance to Program:

- Maintain an overall Union cumulative GPA of at least 2.5 up to the date of departure for the program.
- Successfully complete at least two courses in residence as a full-time matriculated student at Union College the term prior to the study abroad program.
- Shortly prior to departure, all participant names will be reviewed again to determine that students:
 - Have a clear account balance, as verified by the Financial Services Office.
 - Have fewer than five disciplinary points, as verified by the Dean of Students.
 - Are in good academic standing, as verified by the Dean of Studies.
- For the duration of the study abroad program, the student must be a full-time matriculated student at Union College.
- *2.7 for London, England full-term abroad, 2.75 for NY6 in Madrid and NY6 in New Zealand, 2.8 for Kenya, Belgium and France (Lille), 3.0 for Cambodia, Independent Study Abroad, Ireland, Japan, NY6 in Germany and Turkey, and a 3.2 for the Klemm Fellow Internship.

Students seeking to study away must demonstrate that they are well-prepared to do so, academically and in terms of overall maturity. Participation in the programs is limited and competitive. Students should apply for particular opportunities that are well-integrated with the student's academic work at Union. Please consult the Common Curriculum section on how international programs relate to various requirements. Attendance at a program's informational meeting is essential. Selection criteria include the student's essay, GPA, faculty recommendations, course of study, certification by the Dean of Students, and the selection committee's assessment of the student's capability of adapting to the program's social and academic environment. Should there be additional selection criteria, they will be announced at the informational meeting. In addition, some international programs have academic prerequisites.

Academic Policy While on an International Program

Policy Regarding Early Departure, Early Exams, Pass/Fail and Incomplete Grades

Students on Union College international programs are prohibited from requesting early departure, early exams, taking courses pass/fail, withdrawal from courses, or incomplete grades. In extraordinary circumstances, a request for special arrangements such as early departure, early exams or incomplete grades must be submitted in writing to the study abroad office at the host institution, the Dean of Studies at Union College and the International Programs Office at Union College. If the host institution approves the request, the matter will be reviewed by the Director of International Programs Office and the Dean of Studies at Union College, who will advise the study abroad office at the host institution and the student of its decision. If the request is approved, the study abroad office at the host institution will advise the Student whether it will make the arrangements on behalf of the student or whether the student is expected to make the arrangements.

Any special arrangements agreed upon, including remaining work and deadlines, should be documented in writing by instructors and by the study abroad office at the host institution. Copies of these arrangements must be sent to the Dean of Studies and the Director of International Programs at Union College.

Failure to follow these procedures may result in the student receiving no credit or a failing grade. A student may appeal Union College's decision by contacting the Dean of Studies at Union College to find out about the process.

Changes to Courses for Independent Study Abroad or Non-Union Programs Made after Student's Arrival at Site Abroad

Union College students must request in writing changes to course selections and equivalencies directly through the Dean of Studies at Union College by the end of the first full week of classes. Copies of all changes will be sent by the Dean of Studies' office to the Director of the International Programs office to ensure that the course equivalencies are posted correctly upon the student's return. Failure to follow these procedures may result in the student receiving no credit or a failing grade.

Grades Earned Abroad

Grades received from any of Union College's international programs will be entered into student's academic record and calculated into his/her GPA.

Grade Appeal Policy for Courses Taken While on Study Abroad Programs

1. Procedure for students taking courses taught by Union faculty (see online Academic Program and Policies)
2. Procedure for students on study abroad experiences (excluding mini-terms)

Union College will allow students to appeal grades awarded by non-Union faculty in accordance with the procedures listed below. The Dean of Studies' review of a student's petition may be limited or not allowed due to circumstances beyond the Dean's control in assessing the petition. Such circumstances may include, but are not limited to when the non-Union faculty member does not have a syllabus that adheres to Union College standards. The Dean's decision will be communicated to the student. There will be no further appeal.

Students wishing to appeal a grade must:

1. Initiate an appeal through the host institution no later than two weeks following the date of posting of their final grades to their Union transcript. Students must follow the host institution's procedures for grade appeals.
2. If the outcome of the initial appeal to the host institution is unsatisfactory, the student may petition the Dean of Studies at Union College for a grade appeal. This must be done within two weeks upon receipt of the final determination from the host institution. The Union College appeal is limited to the three conditions listed above in "End of Term Grade Changes".

Costs

Full Terms

Except for those programs listed below, the base cost of a full term abroad is one-third of Union's comprehensive fee, which may differ from the fees of program providers. The College charges an additional fee of \$650 for each faculty-led term abroad to cover several guided study excursions to

enhance the cultural and academic experience, as well as mandated health insurance. Students are responsible for coordinating and paying for their own airfare and visa fees (if a visa is necessary). With the exception of work-study, all financial aid a student receives applies to the study abroad program.

- The exchange program to Japan is tuition-only. Students pay for their room and board in Japan. There are no group excursions in this program. A \$50 study abroad fee will be charged towards mandated health insurance.
- The engineering exchange to METU in Turkey is tuition-only. Students pay for their room and board in Turkey. There are no group excursions in this program. A \$50 study abroad fee will be charged towards mandated health insurance.
- The Antwerp, Belgium and the Lille, France economics exchanges are tuition-only programs. Students pay for their room and board in Belgium and France. There are no group excursions on this program. A \$50 study abroad fee will be charged towards mandated health insurance.

Mini-Terms

The fee for all mini-terms, with the exception of the U.S. domestic mini-terms, is \$3,530. This fee covers all tuition, room, board, health insurance, and group excursions. Financial aid does not apply to mini-terms, but loans are available. Students are responsible for coordinating and paying for their own airfare.

The fee for the Community Engagement mini-term charged at cost. This fee covers airfare between Schenectady and New Orleans, all room and board, both in Louisiana and for days on campus before and after the trip, plus all fees and local transportation in Louisiana. The participants fly to Louisiana as a group so plans should be made accordingly. The exact mini-term fee may change due to variability in transportation costs.

The fee for the Civil Rights, Mexican-American Border, and New Hampshire Presidential Primary mini-terms is \$3,500. This fee covers all tuition, room, board, and group excursions.

Non-Union Study Abroad Programs

Students are billed Union College's comprehensive fee for the winter and/or spring terms, which may differ from the fees of program providers. In the case of the William Cady Stone Fellowship academic year program students are billed a full year's comprehensive fee which may differ from the fees of the program providers. In both cases, Union College will pay the tuition, room, and board to the host institution. The total amount paid to the other institution, including course waivers or any fees for additional courses (if the host institution will allow a fifth course for an additional fee, Union College will pay that fee) shall not exceed the cost of the Union comprehensive fee for each term. Students are responsible for paying any amount that exceeds the Union comprehensive fee for the applicable number of terms abroad.

Independent Study Abroad

Students are billed Union College's comprehensive fee for the winter and/or spring terms and Union College will cover any tuition, room, and board costs. In some cases, Union College may issue checks to students going on Independent Study Abroad program, so that they can make payments or partial payments, for tuition, room, and board when they are in-country. The total amount paid shall not exceed the cost of the Union comprehensive fee for those terms that the student is abroad. Students are responsible for paying any amount that exceeds the Union comprehensive fee for the applicable number of terms abroad.

Union College International Programs (Study Away) Withdrawal Policy

The success of study away programs from the Union campus requires student commitment well in advance of the anticipated dates of the term of study. When a student withdraws after having made a commitment to such a program, it may be too late to offer the spot to another student who was willing and able to participate. Also, Union College incurs expenses well before a program begins that cannot be recovered when students withdraw. In the case of mini-terms, withdrawals can jeopardize the viability of the program. The International Programs Withdrawal Policy is designed to prompt students to consider their commitment to the program to which they have applied in light of the financial consequences of withdrawal. This policy applies to all Union-and non-Union study away programs, including mini-terms.

Item	Prior to Program Start Date	On / After Program Start Date
------	-----------------------------	-------------------------------

\$600 Study Abroad Fee, if applicable	Credited to student account	Pro-rated based on percentage of time abroad
\$50 (\$30) Health Insurance Fee for full-term (mini-term)	Credited to student account	No Reimbursement
Allowance (meals, internal transportation, cellphone, etc.), if applicable	Credited to student account	Pro-rated based on percentage of time abroad

If you withdraw from the program or do not complete it in its entirety and have received a fellowship, you may be responsible for re-paying it. Contact Financial Aid if you have taken loans from Union.

Withdrawal Fee

Unless one of the exceptions listed below applies, a student who withdraws from participation in a program or is no longer allowed to participate because of Union College disciplinary sanctions will be charged a withdrawal fee, which is based on the date of official withdrawal, as indicated in the table below. Official withdrawal occurs when a student informs the International Programs office of the withdrawal in writing or the International Programs office informs the student of his or her ineligibility to participate.

When Official Withdrawal Occurs: Withdrawal Fee:

After Commitment	\$350 - all programs
59-31 days before the start*	\$2500 - all programs
30 days before the start*	\$3500 (mini-term), \$4000 (all other programs)
During the program	\$3500 (mini-term), \$5000 (all other programs)

*If a student withdraws 1-59 days before the start of a program, Union College will make a good faith effort to replace the student with another qualified student or to obtain a refund from its overseas providers; the withdrawal fee will not apply if a replacement student is found or to the extent that the College obtains a refund.

Exceptions to Withdrawal Fee:

Students will not be charged the withdrawal fee if any of the following occurs:

- Student withdraws from Union College for medical reasons during the program in accordance with Union College's medical withdrawal policy.
- A documented medical situation occurs before the start of the program that prevents the student from participating in the program.
- Student becomes ineligible to participate because of insufficient overall GPA.
- A student becomes ineligible to participate if, in spite of following the proper procedures in a timely manner, the student was denied a visa by the host country.

Policy on Travel Restrictions for International Programs

Union College makes available to qualified students the opportunity to participate in the wide variety of programs that can be conducted in a manner that addresses health, safety and security concerns. The Travel Advisory Policy outlines this process in detail.

Study Abroad Programs

The most extensive of the College's formal arrangements for foreign study are the term-length study abroad programs. Most programs involve credit in Common Curriculum (General Education) and language study, as well as regular course credit for additional study performed abroad. Currently, terms abroad are offered through a variety of programs designed by Union College faculty. The College is also part of the New York Six Liberal Arts Consortium and the Partnership for Global Education. The New York Six Liberal Arts Consortium broadens off campus study opportunities to Union students through pre-approved programs offered by New York Six member schools (i.e. Colgate University, Hamilton College, Hobart and William Smith Colleges, St. Lawrence University, Skidmore College, and Union College). The Partnership for Global Education is, a consortium with Hobart & William Smith Colleges, whereby students can study abroad in Australia, Brazil, Ireland and Vietnam.

Unless otherwise noted, students take three courses while on a term abroad; normally, these are the official program courses, unless the Director of International Programs grants permission to substitute one non-program course. Please consult the Common Curriculum (General Education) section on how international programs relate to various requirements.

The following study abroad programs are offered at Union College and include three courses, unless otherwise indicated:

Argentina (Córdoba): Fall, Offered even years. Faculty Member in Residence

Australia (Brisbane): Fall, 4 courses. Offered as part of the Partnership in Global Education. Faculty Member in Residence

Brazil (Sao Paolo): Fall, Offered odd years, 4 courses. Offered as part of the Partnership in Global Education. Faculty Member in Residence

Cambodia (Siem Reap): Winter.

China (Shanghai): Fall.

England (London): Spring.

Fiji: Fall. Offered in odd years. Faculty Member in residence.

France (Rennes): Fall, 4 courses. Faculty Member in Residence.

Germany (Freiburg & Berlin): Spring. Faculty Member in Residence.

Greece (Athens): Fall, 4 courses.

India (Jaipur): Winter, Offered odd years. Faculty Member in Residence.

Ireland (Galway): Fall, 4 courses. Offered as part of the Partnership in Global Education. Faculty Member in Residence.

Italy (Florence): Spring, Faculty Member in Residence.

Italy (Sicily): Spring, Offered odd years. Faculty Member in Residence.

National Health Systems (USA, Canada, Netherlands, Scotland & England): Summer, Faculty Member in Residence.

Russia (Irkutsk): Spring, Faculty Member in Residence.

Spain (Seville): Fall, Offered odd years. Faculty Member in Residence.

Vietnam: Fall, 4 courses. Offered as part of the Partnership in Global Education. Faculty Member in Residence.

Study Abroad/Exchange

England (York): Fall, Faculty Member in Residence.

Domestic Program

Silicon Valley (San Francisco): Winter, 3 courses. Faculty Member in Residence.

Exchanges

The College has the following exchange programs:

Belgium (Antwerp): Fall, 4 courses/4 Union credits, at the University of Antwerp in Belgium, for Economics majors.

France (Lille): Winter, 6 courses/3 Union credits, at the IESEG School of Management in Lille, France, for Economics majors.

Japan (Akita): Fall, 4-courses totaling 12 credit hours/4 Union credits, at the Akita International University of in Japan.

Turkey (Ankara): Fall and Winter/Spring, 4 courses/4 Union credits at Middle East Technical University (METU).

Union College reserves the right to preclude travel to a country if, after a risk assessment is completed, it is the judgment of the Vice President for Academic Affairs and Dean of the Faculty, with input from the Director of International Programs, travel to the country is deemed too risky.

Non-Union Study Abroad

Non-Union Study Abroad programs allow students who are primarily juniors the opportunity to participate in study abroad programs through other colleges and universities, provided that the program addresses a curricular need that cannot be met by a Union program. Normally these programs take place in countries where Union does not have an existing term abroad or exchange program.

Detailed proposals for non-Union programs must be submitted no later than the third week of spring term the year prior to the time when the study abroad would take place. Students should refer to the International Programs website for deadlines. The Liaison Committee on Study Abroad approves non-Union proposals. The student must demonstrate readiness and preparation to undertake the proposed course of study and provide details of a feasible plan of study that is well-integrated with the student's academic work at Union. There are two options for non-Union study abroad programs: winter/spring non-union study abroad and the full year William Cady Stone Fellowship.

The more common non-Union study abroad option, this opportunity takes place during winter and spring terms with the student enrolling in Spring semester course offerings from other colleges and universities.

Non-Union programs are generally semester programs that give credit for four or five courses. Students who fall behind in credits as a direct result of participating in a non-Union program during Winter and Spring terms will have to complete the additional credits (to total six) through any of the following methods:

- If the host institution for the program will allow a fifth course for an additional fee, Union will pay that fee.
- If a student is ahead in credits, then he/she may count one or two of these credits toward graduation at no cost.
- The student may take one or two fourth courses without charge upon returning to Union.
- Students may take one or two summer school courses, whether at Union or another institution. Union will pay tuition for the course, but not room and board. Courses cannot be taken at a community college unless approved by the Dean of Studies.
- Students who meet the eligibility requirements may apply to a Union mini-term, and if accepted, the mini-term fee is waived.

Additional options to obtain the required number of credits may be discussed with the Dean of Studies. If progress toward a degree is not affected by participation in a non-Union program during Winter and Spring terms and the student does not fall behind in credits toward the degree, then the above options are not available.

Fellowships

Full Year William Cady Stone

The William Cady Stone Fellowship allows only one student per year to participate in a full year abroad. Students applying for this fellowship should be able to explain the benefits of a full year study abroad program at an accredited institution of his or her choice over a semester/trimester program. Additional information can be obtained from the International Programs office and on its website.

Students are billed Union College's comprehensive fee for fall, winter and spring terms and Union College will pay the tuition, room, and board to the host institution.

Three Week Klemm Fellow International Internship Program

The Klemm Fellow International Internship Program is a highly selective program which places Union students in a foreign country where they work as an intern in a local organization and stay with a local host family for three weeks during the winter break. Projects Abroad is Union's partner organization and arranges the internships and host families for Union. Additional information can be obtained from the International Programs office and on its website.

All program costs are covered by the Klemm Fellow International Internship Program, except for incidentals and informal weekend excursions.

Independent Study Abroad

The Independent Study Abroad Program allows one Union College student per academic year to study abroad at an international college, university, or institute during his/her junior or senior year. The proposed program of study must meet a curricular need that cannot be met by a Union or Non-Union term abroad; it must also take place in a location that cannot be covered by a Union or Non-Union term abroad. A student applying for an ISA must directly enroll in an international college, university or institute. The ISA student must enroll in one or two courses at a university, college or institute in the host country (the equivalent of three courses per term). A student may also arrange with a Union College faculty member to do a course or courses (depending on total number of courses taken) as an approved independent study, research project, service-learning project or internship. The student must identify a Union College faculty member who has agreed to supervise and grade the academic work and to serve as a resource for the student while on the ISA.

An ISA must take place during the winter and/or spring term. Detailed proposals for ISAs must be submitted no later than the fifth week of winter term the year before ISA study would take place. Students should refer to the International Programs website for deadlines. The Liaison Committee on Study Abroad approves ISA proposals

Mini-Term Programs

Every year Union College offers a variety of mini-terms. A mini-term is a three week program running either over winter break or at the beginning of summer break. Mini-terms have been offered in Argentina, Bali, China, Egypt, England, Ethiopia, France, India, Italy, New Zealand, Russia, Senegal, South Africa, Spain, and domestic locations such as the Adirondacks, New Hampshire, New Orleans (Community Engagement), on the Mexican-American border and a Civil Rights Public History program in the South. Mini-terms carry an additional tuition charge and yield one course credit. They cannot be combined with two courses in another term as one term's tuition.

Jewish Studies

Director: Professor P. Bedford (Religious Studies)

Jewish Studies Minor

Requirements for the Minor:

The Jewish Studies Minor allows students to examine aspects of Jewish history, culture, and Hebrew language in an interdisciplinary manner, drawing on relevant classes taught in various departments and programs. Students require seven classes to complete the Minor, which must include three classes in either Biblical Hebrew (HBR 111 , HBR 112 , or HBR 113) or Modern Hebrew (HEB 100 , HEB 101 , or HEB 102) and at least two classes at the 200-level or above taken from the list below. Independent Study classes can be counted towards the Minor with the permission of the Director.

- AMU 125 - World Religions and Music
- EGL 099 - The Bible: An Introduction
- EGL 265 - Jewish Women Writers
- GER 403 - Shoah: Literary, Artistic and Filmic Representations of the Holocaust
- HBR 111 - Biblical Hebrew 1
- HBR 112 - Biblical Hebrew 2
- HBR 113 - Biblical Hebrew 3
- HEB 100 - Basic Hebrew 1
- HEB 101 - Basic Hebrew 2
- HEB 102 - Basic Hebrew 3
- HST 128 - The American Jewish Experience
- HST 157 - Modern Jewish History
- HST 158 - The Holocaust
- HST 194 - The Modern History of the Middle East
- HST 195 - From Abraham to Mohamed and Beyond: The Early History of the Jews
- MLT 339 - The Holocaust in Film: Cinematic Treatments of Violence, Trauma and Memory
- GER 339 - The Holocaust in Film: Cinematic Treatments of Violence, Trauma and Memory
- PSC 249 - Middle East Politics
- PSC 254 - Politics of the Arab-Israeli Conflict
- REL 203 - Judaism/Christianity/Islam: Comparative Perspectives
- REL 230 - Judaism and Christian Origins

Latin American and Caribbean Studies

Director: R. Samet (Anthropology)

Faculty: Professors W. Garcia (Modern Languages), D. Mosquera (Modern Languages), T. Olsen (Music); Associate Professors L. Cox (Visual Arts), R. Samet (Anthropology), G. Seri (Political Science); Assistant Professors E. McGrath (History), S. Yi (Modern Languages); Senior Lecturer M. Osuna (Modern Languages); Francophone Studies faculty: Professor C. Batson; Associate Professors C. Ndiaye; M. Chilcoat.

This program offers a major, an interdepartmental major, and a minor in the study of the history, culture, language, and politics of the countries of the Latin American and Caribbean region. In addition, students may focus their study on the Atlantic world, on the interaction between the Americas and Africa, and on the experiences of people of Latin American descent in the United States. Latin American and Caribbean Studies courses are a part of the Common Curriculum (CC), fulfilling literature/ civilization, diversity, and writing requirements.

Latin American and Caribbean Studies Approved Courses

LACS Courses in Humanities and Arts

Art History

- AAH 163 - Latin American and Caribbean Art of the 19th and 20th Century
- AAH 360 - Seminar: Visual Culture, Race and Gender

Modern Languages and Literatures

French

- FRN 304 - Studies in the French Caribbean
- FRN 307 - Negritude Movement: Point of Departure in Black African and Afro-Caribbean Literatures in French

Spanish

- SPN 325 - Staging Conflict: Studies in One-Act Mexican Theater
- SPN 327 - The Nation at Home: Family and Nationhood in Spanish American Theater
- SPN 328 - Inquiring Latin American Identities: Reading Context, Space and Cultural Artifacts
- SPN 329 - TRADITION AND INTERRUPTION IN SPANISH AMERICAN POETRY
- SPN 330 - Contemporary Hispanic Women's Short Fiction
- SPN 332 - An Introduction to Afro-Hispanic Literatures and Cultures
- SPN 334 - Cartographies of Disasters
- SPN 351 - Border Identities
- SPN 352 - Imagining Latinx Identities
- SPN 375 - Reality Interrupted in Hispanic Narratives
- SPN 376 - Down to Earth: Cross-Cultural Explorations of the Hispanic World
- SPN 380 - What's Love Got to Do with It: Gender and Nation in Hispanic and US Latino Literatures
- SPN 381 - Hauntings in Hispanic Fiction
- SPN 401 - Bodies and Power in Latin American Narrative
- SPN 406 - Film of the Mexican American Border
- SPN 408 - Digital Storytelling in the Hispanic World
- SPN 417 - Death and Revenge in the Southern Cone

- SPN 418 - Readings on Contemporary Mexican Theater
- SPN 431 - Latin America in Colonial Times
- SPN 432 - Islands Adrift: Race, Politics, and Diasporas in the Hispanic Caribbean
- SPN 433 - Latin American Colonial Crossroads at the Movies

Modern Languages in Translation

- MLT 281 - Screening Identities in Latin American Cinema
- MLT 283 - Beyond the Sunny Paradise: Caribbean literature and politics
- MLT 284 - Popular Religion and Politics in Latin America
- MLT 286T - Gender and Identity in Contemporary Brazilian Cinema
- MLT 287 - Filming Margins: Cinema Verite and Social Realism in Latin America
- MLT 288 - Torture and Dictatorship in Latin American Literature
- MLT 289 - Literature of the Mexican-American Border
- MLT 293 - Made in New York: Puerto Rican and Dominican Transnational Identities in American Literature & Cinema
- MLT 297 - Performing Masculinities in Literature, Cinema, and Popular Culture

Music

- AMU 133 - Music of Latin America

LACS Social Sciences Courses

Africana Studies

- AFR 100 - Introduction to Africana Studies

Anthropology

- ANT 227 Policing the Americas
- ANT 237 - Gangs and Youth Violence
- ANT 283 - Peoples and Cultures of Latin America

History

- HST 135 - Latinos In/As U.S. History
- HST 171 - Europe, Africa, and the Americas in the Era of Columbus
- HST 172 - Reform and Revolution in Latin America and the Caribbean
- HST 173 - History of the Caribbean and Central America
- HST 270 - History of Latin American Popular Culture
- HST 271 - History of Mexico
- HST 272 - History of Brazil
- HST 274 - Social and Political Movements in Latin America
- HST 275 - United States Foreign Relations and Modern Latin America
- HST 323 - Race and Revolution
- HST 370 - Special Topics in Latin American History
- HST 372 - Sex, Race and Gender in Latin America
- HST 471 - Seminar in Latin America: The Cuban Revolution

Political Science

- PSC 236 - Police, Security and Biopower
- PSC 243 - Latin American Politics
- PSC 245 - Populisms in Latin America & Beyond
- PSC 358 - Wealth and Power Among Nations

Term Abroad & Mini-Terms

- MLT 286T - Gender and Identity in Contemporary Brazilian Cinema
 - TAB 321T Buenos Aires Mini-Term
- Note:** With approval of Director, these courses can count toward the Gender, Sexuality & Women's Studies major or the Environmental Policy major, in place of LACS.

Latin American and Caribbean Studies, B.A.

Requirements for the Major:

Twelve courses with LACS credit, including:

- LAS 101 - Latin American and Caribbean Studies Intro
- One 300-level language course in Spanish or French (an equivalent-level language course in Portuguese or any other official language of Latin America is or any other official language of Latin America, or the successful completion of Portuguese during a full term abroad (subject to the approval of the LACS Director))
- Three courses from a concentration
- Two courses from other areas
- Two-term senior thesis

Note: No course from languages and humanities/social science can be counted twice to meet these requirements.

Note: LACS Majors can choose between the following concentrations: 1. Humanities and Arts; 2. Social Sciences; 3. Student Designed Concentration (e.g., Biology, Environmental Studies, Geosciences, to be designed in consultation with the LACS Director and the student's academic adviser). Students must take at least three courses for their chosen concentration, and at least two courses from the others.

Students must participate in a full-length Term Abroad program in Latin America. Union College offers faculty-run study abroad options, and there are also Independent Study and non-Union programs. Consult with the LACS director for possibilities.

Requirements for Honors in Latin American and Caribbean Studies:

To be eligible for honors, a student must (1) attain a minimum index of 3.50 in courses counted toward the major; (2) a cumulative index of 3.30 or better; (3) a grade of "A minus" or higher on the senior project thesis (a two-term Senior Project Thesis for LACS Majors); and (4) oral exam based on the Senior Project Thesis before LACS faculty or a presentation of the work at Steinmetz or another public academic venue.

Five-Year Cooperative Degree Program with Georgetown:

Union has entered into an agreement with Georgetown University that enables qualified undergraduate students majoring in Latin American & Caribbean Studies to receive a master's degree from Georgetown's Latin American Studies program in one academic year and a summer, rather than in the normal three or four semesters. Students interested in this option should contact the Director of LACS for more information.

Course Selection Guidelines:

Students seeking to double major in LACS and another subject that also requires a two-term thesis must present a proposal and obtain written permission from LACS director and the other department chair.

Latin American and Caribbean Studies (ID), B.A.

Requirements for the Interdepartmental Major:

Eight courses from at least two concentrations: 1. Humanities and Arts; 2. Social Sciences; 3. Student Designed Concentration (e.g., Biology, Environmental Studies, Geosciences, to be designed in consultation with the LACS Director and the student's academic adviser), including:

- LAS 101 - Latin American and Caribbean Studies Intro
- SPN 203 - Advanced Spanish
- **or**
- FRN 300 - Modern France/La France actuelle
- **or**
- Successful completion of Portuguese during a full term abroad, (subject to the approval of the LACS Director) or (an equivalent-level language course in Portuguese or any other official language of Latin America is subject to the approval of the LACS Director)
- **and**
- One-term senior thesis

Requirements for Honors in Latin American and Caribbean Studies:

To be eligible for honors, a student must (1) attain a minimum index of 3.50 in courses counted toward the major; (2) a cumulative index of 3.30 or better; (3) a grade of "A minus" or higher on the senior project thesis (a two-term Senior Project Thesis for LACS Majors); and (4) oral exam based on the Senior Project Thesis before LACS faculty or a presentation of the work at Steinmetz or another public academic venue.

Course Selection Guidelines:

Students seeking to double major in LACS and another subject that also requires a two-term thesis must present a proposal and obtain written permission from LACS director and the other department chair.

Latin American and Caribbean Studies Minor

Requirements for the Minor:

Six courses including:

- LAS 101 - Latin American and Caribbean Studies Intro
 - Two LACS courses (from any concentration)
 - Three courses in French, Portuguese* or Spanish (or any other official language of Latin America) above the introductory level
- *The Portuguese option for the minor in LACS is only available to students participating in the full-length term abroad program to São Paulo, Brazil.
- Note:** No course can be counted twice.

Law and Humanities

Director: Professor L. Zaibert (Philosophy)

Law and Humanities Minor

The Law and Humanities minor is designed for students considering law school. Satisfying the requirements for the minor would ensure that students have a deep understanding of the foundations of legal systems in general. Moreover, the minor provides students with the unusual opportunity to learn about law from multi-disciplinary and cross-cultural perspectives which highlight the rich and varied ways in which the law interacts with the

liberal arts and humanistic disciplines. Many of the courses that count for the minor are courses that highlight the connections between law and other disciplines, such as classics, philosophy, political science, and religious studies.

Requirements for the Minor:

Six of the following courses, at least three of which are in the Humanities.

Anthropology

- ANT 246 - Anthropology of Human Rights

Classics

- CLS 186 - Roman Law and Society

Philosophy

- PHL 105 - Introduction to Ethics
- PHL 231 - Symbolic Logic
- PHL 237 - Introduction to Political Philosophy
- PHL 250 - Ethical Theory
- PHL 205 - Relativism

Political Science

- PSC 113 - Introduction to Political Thought
- PSC 232 - Violence and Politics
- PSC 273 - The Supreme Court and Judicial Politics
- PSC 364 - Law and Film
- PSC 370 - Constitutional Law
- PSC 371 - Civil Rights and Civil Liberties

Sociology

- SOC 240 - Political Sociology
- SOC 261 - Crime and Justice in Society
- SOC 265 - Sociology of Human Rights

3+3 Accelerated Law Program

Advisor: Associate Professor B. Hays (Political Science)

The Union College-Albany Law School combined program allows students to complete a full Union B.S. or B.A. degree in three years and subsequently progress to Albany Law School. The program provides opportunities to earn undergraduate credit through law-related internships and participate as undergraduates in Albany Law School activities designed for combined degree program students. Students in this program, who will be known as Law Scholars, will be admitted to Albany Law School early (upon admission to Union) with entry to law school contingent on their undergraduate GPA, but not their LSAT score. Students are still required to take the LSAT prior to matriculation at Albany Law School, with high scores providing access to scholarship opportunities.

3+3 Accelerated Law Program

Notes:

- Applications accepted for first-year fall term enrollment at Union College with a cap of 20 students at any one time at Union.
- SAT or ACT scores will be required as part of the application.
- Students accepted to the program will be offered a spot in the Law Scholars Program, which like the Union Scholars program, includes the ability to take a fourth course free of charge each term and to take Scholars FYP and SRS courses. Unlike the Union Scholars, the Law Scholars will graduate from Union with 36 credits rather than 38.
- Students will be encouraged to earn their Union B.A. or B.S. in 3 years, through a combination of their coursework over this time, any advanced credit from their high school experience, the use of the aforementioned fourth courses, and summer courses (up to three pre-approved courses can be taken at colleges other than Union.) Students will stay in the program by maintaining a 3.4 GPA. Students have the option of spending four years at Union, should they choose to do so.
- Students will be encouraged to contact Albany Law School to be assisted with obtaining at least one summer internship after their first, second or third year. Academic credit will be an option for the internship(s) with an additional fee.
- Students will begin their law degree coursework as soon as they have completed their Union College degree requirements.
- Students will take their LSAT during their third year at Union. Continuing to Albany Law School will not be contingent on the score, though a student's merit scholarship to Albany Law School will be contingent on academic criteria, which includes the LSAT score.

Leadership in Medicine/Health Care Management Program

Advisor: J. Fitzgerald

Staff: S. Bruno (Program Assistant)

The Leadership in Medicine/Health Systems Program is offered jointly by Union College, Clarkson University - Capital Region Campus, and Albany Medical College. The goal of the Leadership in Medicine/Health Systems Program is to prepare physicians who will be leaders capable of addressing the managerial, ethical, multicultural, and international challenges facing American medicine in the 21st century. Students complete an enriched curriculum of coursework to attain the B.S., M.S. or M.B.A., and M.D. degrees in eight calendar years, bypassing the requirement of the Medical College Admission Test. Admission into the program leads automatically to entrance into Albany Medical College after four calendar years of study at Union and Clarkson University - Capital Region Campus, provided that the student maintains satisfactory standards of academic achievement as defined below and that the Union College-Clarkson University-Albany Medical College Policy and Promotions Committee determines that the student has demonstrated sufficient personal and professional development for the profession of medicine.

The curriculum at Union stresses thorough preparation in the sciences, humanities, and social sciences. When combined with coursework in health care management at Clarkson University, students are provided with a breadth of knowledge and understanding not typically found in premedical programs. Each year, about 15 highly-qualified secondary school seniors are enrolled in the program.

Leadership in Medicine/Healthcare Management, B.S.

Program Requirements:

Over four full 3-term academic years and one summer (two for students who opt for the M.B.A.), students take 31-32 courses that count towards a B.S. degree at Union College (roughly half in the sciences and half in the social sciences and humanities) and another 10 graduate courses at Clarkson University - Capital Region Campus to earn an M.S. degree in Healthcare Management or 14 graduate courses to earn the M.B.A. degree in Healthcare Management (Note: 10 of the courses count toward either graduate degree.)

Important curricular requirements include:

- An interdepartmental major, one part of which is in the natural sciences (Biology, Chemistry, Biochemistry, Math, Physics) and the other part of which is in the social sciences (including Psychology) or humanities;
- An international experience
- The program in healthcare management through the School of Business at Clarkson University (either the M.S. or the M.B.A.).
- Independent Study, Independent Research, Special Projects (usually numbered 400+) cannot be substituted for LIM Math/Science coursework. However, students may complete a thesis in their non-Math/Science ID major.

All students enrolled in the program will take a minimum of 16 Union College Math/Science courses. Without AP credits, students usually take the following:

- BIO 103 - Diversity of Life: Heredity, Evolution, and Ecology
- BIO 104 - Cellular Foundations of Life
- BIO 205 - Topics in Molecular Biology
- BIO 206 - Topics in Physiology
- BIO 210 - Neuroscience: Mind & Behavior
- CHM 101 - Introductory Chemistry 1
- CHM 102 - Introductory Chemistry 2
- CHM 231 - Organic Chemistry 1
- CHM 232 - Organic Chemistry 2
- MTH 110 - Calculus 1: Differential Calculus
- MTH 112 - Calculus 2: Integral Calculus
- PHY 110 - Physics for the Life Sciences 1
- PHY 111 - Physics for the Life Sciences 2

and one of the following upper level biology courses

- BIO 330 - Comparative Animal Physiology
- BIO 332 - Comparative Vertebrate Anatomy
- BIO 352 - Microbiology
- BIO 354 - Developmental Biology
- BIO 355 - Immunology
- BIO 362 - Experimental Neurobiology
- BIO 363 - Cellular Neurosciences
- BIO 368 - Advanced Molecular Biology
- BIO 378 - Cancer Cell Biology
- BIO 384 - Genetics and Molecular Biology

plus 3 or more additional courses designated by their science ID major:

Chemistry ID:

- CHM 240 - Analytical Chemistry
 - CHM 382 - Biochemistry: Structure and Catalysis
- plus**
- CHM elective ≥ 200 level with lab or any ≥ 300 level

Biology ID:

- BCH 335 - Survey of Biochemistry
or
- CHM 382 - Biochemistry: Structure and Catalysis
or
- BIO 380 - Biochemistry: Nucleic Acids, Carbohydrates, and Lipids
plus
- 2 BIO electives ≥ 200 w/ lab

Math ID:

see Math ID requirements in consultation with math advisor. Must include one of the following:

- BCH 335 - Survey of Biochemistry
or
- CHM 382 - Biochemistry: Structure and Catalysis
or
- BIO 380 - Biochemistry: Nucleic Acids, Carbohydrates, and Lipids
plus
- MTH 115 - Calculus 3: Differential Vector Calculus and Matrix Theory
- MTH 117 - Calculus 4: Integral Vector Calculus
- MTH 199 - Introduction to Logic and Set Theory
3 MTH $\geq 200+$ electives
1 MTH ≥ 300 elective

Physics ID:

see Physics ID requirements in consultation with physics advisor. Must include one of the following:

- BCH 335 - Survey of Biochemistry
or
 - CHM 382 - Biochemistry: Structure and Catalysis
or
 - BIO 380 - Biochemistry: Nucleic Acids, Carbohydrates, and Lipids
plus
 - PHY 122 - Relativity, Quantum, and Their Applications
 - PHY 123 - Heat and Light
 - PHY 200 - Molecular Biophysics
 - PHY 210 - The Physics of Modern Medicine: Applications in Imaging, Surgery and Therapy
- one PHY elective:
- PHY 220 - Relativity and Introduction to Quantum Mechanics
 - PHY 230 - Intermediate Classical Mechanics
 - PHY 270 - Intermediate Electromagnetism
 - PHY 310 - Advanced Topics in Physics 1
or
 - PHY 311 - Advanced Topics in Physics 2

Biochemistry ID (ID only open to LIM students)

see Biochemistry ID requirements in consultation with Biochemistry advisor. Must include all of the following:

- BCH 380 - Biochemistry: Nucleic Acids, Carbohydrates, and Lipids

- BCH 382 - Biochemistry: Structure and Catalysis
 - CHM 240 - Analytical Chemistry
- plus**
One of the following courses:
- CHM 330 - Medicinal Chemistry
 - CHM 332 - Synthetic Methods
 - CHM 340 - Chemical Instrumentation
 - CHM 351 - Kinetics and Thermodynamics
- and**
One of the following courses:
- BIO 352 - Microbiology
 - BIO 354 - Developmental Biology
 - BIO 355 - Immunology
 - BIO 368 - Advanced Molecular Biology
 - BIO 378 - Cancer Cell Biology
 - BIO 384 - Genetics and Molecular Biology

In addition, students must take 15 Social Science and Humanities courses including:

LRS 150, Statistics*, HC 630, HC 633, three non-science electives, plus 8 additional courses to fulfill an ID major in Social Sciences or Humanities. LIM students are not required to complete the full Common Curriculum (General Education), the sophomore research seminar, or Writing Across the Curriculum (WAC) requirements unless they leave the program. Students must complete a minimum of 15 social science and humanities courses.

*The LIM statistics requirement usually is met with AP statistics credit, in which case students replace the statistics course with a humanities or social science elective. Some social science departments have a designated statistics course that is required for majors. If the second major requires a statistics course, students should take that course. Otherwise, students may choose from the following courses: STA 501, ECO 243, SOC 300, PSC 220, PSY 200 or STA 104.

PLEASE NOTE: STA 104 counts as a social science course, **not as a math course.**

Students take the following courses toward the M.S. and M.B.A. degree in Healthcare Management:

M.S. in Healthcare Management:

- **HC 630** - Introduction to Health Systems (**cross-counts as an undergraduate course**)
- **HC 633** - Health Care Leadership (**cross-counts as an undergraduate course**)
- **HC 635** - Health Economics
- **HC 651** - Health Systems Management
- **AC 604** - Financial and Managerial Accounting for Decision Making
- **HC 650** - Structural Dynamics in Healthcare
- **HC 656** - Group Practice Management
- **HC 605** - Health Operations Management
- **HC 637** - Clinical Leadership Program
- **HC 617** - Health Care Finance
- **HC 674** - Legal Aspects of Health Care
- **HC 684** - Strategic Issues for Healthcare Organizations (Capstone)

MBA in Healthcare Management students will take the following additional 4 courses:

- **HC 647** - Statistical Models for Management
- **HC 626** - Health Systems Marketing
- **HC 648** - Health Informatics
- **HC 680** - Health Policy and Managerial Epidemiology

Note: For course descriptions, consult the graduate course catalog of Clarkson University - Capital Region Campus.

Advanced Placement

Students who enter the program with advanced placement credit have greater flexibility of course selection, but AP credits do not reduce the number of required courses or allow a student to take a term off. Students must compete a minimum of 16 math/science and 15 humanities/social science courses. When advanced placement credit is given for a course specifically designated in the curriculum, students can take elective courses. Union will grant advanced placement and course credit in accordance with its normal procedures. Student with scores of 4 or 5 on the AP examinations in biology, chemistry or physics or on either of the AP Calculus exams are encouraged to take more advanced courses at the College. Other AP courses will be considered such as Statistics or a course in the second major.

Additional Requirements

Students must maintain minimum cumulative grade point averages of 3.50 both in overall course work (including graduate courses) and in their mathematics and science courses. Students falling below the required overall and mathematics/science grade point averages at the end of any term may be put on formal probation or asked to leave the program by the Policy and Promotions Committee, which oversees the program and reviews student records regularly. A grade of "D" or "F" in any course will most likely lead to dismissal from the program.

Required course work may not be taken on a pass/fail basis and must normally be taken at the home institution. Students may take a science course pass/fail after all science and math program requirements are completed. Students may take one social science or humanities elective pass/fail, however, it cannot be a course required for the ID major. Grades of "I" (Incomplete) or "W" (withdrawal) will not be acceptable without justification involving illness or extenuating circumstances.

As long as a student is enrolled in the Leadership in Medicine program, the Health Professions Advisory Committee at Union College will not support his or her application to other medical schools. Students may transfer into the regular four-year undergraduate program at any time during the premedical portion of the combined degree programs. Once withdrawn from the eight-year combined degree program, students may request the support of the Health Professions Advisory Committee if they choose to apply to medical school in the traditional manner.

Requirements for Honors:

Leadership in Medicine students are not subject to the restrictions for ID majors and may receive departmental honors in one department if they satisfy the requirements of that major. The thesis does not need to integrate both majors as it must for non-program students.

Managerial Economics

Director: Professor L. Davis (Economics)

Faculty: Professors L. Davis, T. Dvorak, B. Lewis, T.A. McCarty, E. Motahar, Shelton S. Schmidt, Stephen J. Schmidt, M.F. Sener, Y. Song, Assistant Professor D. Cheng, H. Dang, K. Raeburn; Visiting Assistant Professors C. Abraham, F. Dogruer, D. Garrido-Garcia, E. Karadas

Managerial Economics, B.A.

The Managerial Economics major focuses on the tools and techniques of financial and quantitative analysis essential to the modern manager. In addition to the standard intermediate economic theory courses, students must complete courses in managerial economics, financial analysis, accounting, computer science, mathematics, and an internship with a local organization.

Requirements for the Major in Managerial Economics:

- ECO 101 - Introduction to Economics
- ECO 241 - Microeconomic Analysis
- ECO 242 - Macroeconomic Theory and Policy
- ECO 243 - Introduction to Econometrics
- ECO 334 - Introduction to Financial Analysis
- ECO 390 - Economics Internships
- ECO 445 - Managerial Economics
- ECO 498 - Economics Senior Thesis 1
- ECO 499 - Economics Senior Thesis 2
- and **two** other courses in economics

- ECO 364 - Business Analytics
or
- CSC 103 - Taming Big Data: Introduction to Computer Science
(or other versions of Introduction to Computer Science with advisor's consent)

- ACC 100 - Survey of Accounting
or
- ACC 604 - Financial and Managerial Accounting for Decision Making (**offered through Clarkson**)

- MTH-101 - Calculus with Precalculus 2
or
- MTH 105 - Differential Calculus with Precalculus
or
- MTH 110 - Calculus 1: Differential Calculus
or
- MTH 113 - Accelerated Single-Variable Calculus

Additional Requirements

Majors should consider taking additional courses in computer science, especially CSC 151 . Majors are also encouraged to participate in a term abroad. Majors should normally complete the core sequence of ECO 241 , ECO 242 , and ECO 243 by the beginning of the junior year. Majors who have reached the junior year may not enroll in courses numbered below 240, except ECO 123 and ECO 134 . Majors must have a minimum grade of C in each of the courses in the core sequence of ECO 241 , ECO 242 , and ECO 243 by the beginning of the senior year before taking ECO 498 - ECO 499 . Students receiving a grade lower than C in any of the core sequence of ECO 241, ECO 242, and ECO 243 may repeat the core course only once.

Requirements for Honors in Economics:

Departmental honors require that a student enroll in and successfully complete the Honors Program. The eligibility requirements for the honors program in economics are, in addition to the college-wide requirements, (1) a minimum grade average of 3.3 in Economics 241, 242, and 243, (2) nomination for honors at the end of the first term of thesis work by the advisor and first-term oral examiner, (3) presentation in the honors poster session in the second term of thesis work, (4) a minimum grade of "A minus" on the senior thesis; and (5) a presentation in the Steinmetz Symposium in the Spring term.

Course Selection Guidelines

Course Sequence: Students intending to major in economics should take ECO 101 in the first year, and complete MTH 101 or MTH 105 or MTH 110 in the first year if possible, early in the sophomore year if not. They should also take one or more 200-level electives in the first or second year, since these courses are not open to junior and senior majors. In the sophomore year they should take the core ECO 241 , ECO 242 , ECO 243 sequence; the sequence need not be taken in numerical order but ECO 243 should normally not be taken first. Majors should complete several 300-

level elective courses as juniors prior to enrolling in senior thesis, including where possible courses in the area of economics in which the thesis will be written; interdepartmental majors should complete at least one such course in the junior year, and preferably more.

Placement: The economics department gives credit for ECO 101 to students receiving a score of 5, 6, or 7 on the Higher Level International Baccalaureate exam, a grade of A or B on the economics A-levels, and a score of 4 or 5 on both the AP Microeconomics and Macroeconomics exam, but does not give credit for ECO 101 to students who have taken only one of the two AP exams, regardless of the score received.

Prerequisites: ECO 101 is a prerequisite for all courses in the department, unless otherwise indicated.

Master of Arts in Teaching (MAT)

Catherine Snyder, Chair, Department of Education

Clarkson University

Students at Union College can become certified to teach at the secondary school level through a graduate program with the Department of Education at Clarkson University's Capital Region Campus. Students can be certified to teach grades 7-12 in the following academic areas: English, languages (Chinese, French, German, Greek, Latin, Russian and Spanish), mathematics, science (biology, chemistry, earth science, physics, and general science), and social studies. Students can be certified to teach grades K-12 in the following academic areas: technology, business, and computer science. Students can also take additional coursework to extend their certification to the fifth and sixth grade school level, or, in the case of foreign languages, the elementary level. Starting in 2020, students will also be able to obtain teaching certification and an MAT in business or computer science.

Also available is a Master of Arts in Teaching English to Speakers of Other Languages (MAT ESOL). Similar to the MAT in secondary disciplines, this degree program may be completed in one or two years, is offered at the Clarkson Capital Region campus, and includes a full year residency. This certification allows the teacher to teach across all grade levels, kindergarten to 12th grade. The coursework for this MAT is all online, with the residency taking place in a school. For this reason, the Clarkson Department of Education could also support a candidate if they wanted to pursue this degree in a different part of New York State.

Students complete a Master of Arts in Teaching (MAT) degree from the Department of Education at Clarkson University's Capital Region Campus. The cost of the graduate program is significantly lower than the cost of each year in the undergraduate school.

Undergraduate Component: Students complete the traditional undergraduate major, PSY 246 ; at least one term of a foreign language for the MAT in secondary disciplines, 30 credits in foreign language for the MAT in a foreign language, or 12 credits of foreign language for the MAT ESOL; and the structured field experience, ED 500. Students with questions about the prerequisites, or concerns about meeting them should reach out to the Clarkson's Graduate Admissions office by email at graduate@clarkson.edu or by phone at 518-631-9831.

Details about the Department of Education teaching programs.

Admission to the MAT Program

Students should declare their interest in applying to this program by completing an application to the Department of Education at Clarkson University's Capital Region Campus. Applications to the MAT program require submission of GRE or Miller Analogies Test scores as well as a minimum GPA of 3.0. The Miller Analogies Test is offered at the Clarkson Capital Region Campus monthly. Candidate questions can be directed to Clarkson's Graduate Admissions office by email at graduate@clarkson.edu or by phone at 518-631-9831. The graduate application form can be obtained from at <https://gradapp.clarkson.edu/apply>

Scholarship

Union students with a GPA of 3.2 or higher automatically qualify for a scholarship for the MAT programs at Clarkson. Additional scholarship related to specific disciplines, locations, or academic success are also available. For more information go to <https://www.clarkson.edu/graduate-admissions/admissions/financial-aid-costs-scholarships>.

Courses to be Completed During the Undergraduate Program:

Students complete the regular requirements for their college academic major in addition to Education Psychology (PSY 246) and required foreign language coursework (see above). Candidate questions can be directed to Clarkson's Graduate Admissions office by email at graduate@clarkson.edu or by phone at 518-631-9831.

Required prerequisite courses related to education include:

- PSY 246 (In order to take PSY 246, Union undergraduates must take the pre-requisite PSY 100);
- Structured Field Experiences (ED 500 a non-credit course) before graduating from the undergraduate college. Students spend two consecutive school days on each of two site visits observing classes and meeting with secondary school teachers in the discipline for which they seek certification. At least one experience must be in a junior high or middle school and at least one must be a high school experience. One visit must be either in an urban or rural high-needs district. Visitations will be arranged during term breaks in the student's sophomore, junior or senior years. In unusual cases, exceptions can be made for observations to take place during the MAT year, but it is strongly discouraged. Students can obtain information and arrangement forms from the Department of Education prior to arrangement of these experiences.
- At least one term of one foreign language (including American Sign Language) is required of all teachers seeking NYS certification in secondary disciplines. In the case of candidates seeking certification in a foreign language, a full major in that language is required. Candidates pursuing the MAT ESOL degree must complete 12 credits in a foreign language or combination of foreign languages (including American Sign Language).

Overview of the MAT Program:

For students interested in the secondary disciplines: In the summer between their senior and graduate year, students will complete Psychology of Teaching (ED 540), Curriculum and Methods (one of the following: ED 511, 512, 513, 514, 515, 516, 517 or 518), a Micro teaching Lab (ED 540L), and ED 541 Literacy for Secondary Teachers. In the fall, term students will complete the Effective Teaching for All Learners (ED 550), Writing Literacy (ED 544), and one graduate level discipline-specific course, and begin a year-long teaching residency (ED 551-552). In the spring term, students will complete the teaching residency, the Modern Teacher seminar (ED 560), the MAT Project class (ED 580), and one graduate level discipline-specific course. It may be recommended that students take an additional discipline-specific class if there is a gap in content knowledge.

Insert TESOL paragraph from Karen here by June 10.

Other program requirements include the New York State mandated workshops, e.g., SAVE school violence prevention, DASA, bullying.

It is also possible for interested candidates to complete the MAT over two years.

New York State Certification

Program and faculty advisors will meet with students throughout their program to plan how to best meet these criteria through a variety of courses and experiences. Upon successful completion of the MAT program and verification of meeting the criteria for certification, students will be recommended by Clarkson University for New York State certification (many other states have reciprocity agreements with New York).

Each applicant for an initial teaching certificate must also achieve a satisfactory level of performance on the:

Educating All Students (EAS) exam, the Education Teacher Performance Assessment (edTPA), and the Content Specialty Test (CST).

Clarkson University's MAT degree provides graduates with the master's degree functionally related to their field of teaching and qualifies them for Professional Certification once they have completed three years of successful teaching (which does NOT have to be in New York State or in a public school). The MAT is a national award-winning program with a 100% job placement rate over the last three years. Union College students interested in careers in teaching are strongly encouraged to stop by the Clarkson University Capital Region Campus (one block from Union) to learn more about the program. Candidate questions can be directed to Clarkson's Graduate Admissions office by email at graduate@clarkson.edu or by phone at 518-631-9831.

Master of Business in Healthcare Management

Dean: Kerop Janoyan

Clarkson University offers accelerated MBA programs for Union College students. Union College undergraduates are able to take selected graduate courses through the Clarkson University School of Business at the Capital Region Campus. These courses count for credit toward the MBA programs

and count toward the bachelor's degree, with approval from their Union adviser. All Union College academic majors provide a suitable foundation for the Clarkson University MBA programs.

Please note: Union College students may take up to two MBA courses without matriculating into the MBA program.

For more detailed information about these Clarkson programs, please visit their website at: <https://www.clarkson.edu/clarkson-catalog>

Master of Science in Electrical Engineering, Mechanical Engineering, or Energy Systems

For information about these graduate programs at Clarkson University, Capital Region Campus, please consult their college catalog at www.clarkson.edu

Mathematics

Chair: L. Khatami

Faculty: Professors D. Cervone, B. Johnson, K. Lesh, A. Taylor, C. Tønnesen-Friedman; Associate Professors E. Gasparovic, R. Hoerl, J. Jauregui, K. Plofker, J. Wang; Assistant Professors J. Hatley, P. Mariano; Senior Lecturer P. Friedman; Visiting Assistant Professors L. Catalano, G. Malen

Staff: J. Higgins (Administrative Assistant)

Course Selection Guidelines

Placement: Students who earn a score of 5 on the AB Advanced Placement exam, or a score of 4 or 5 on the BC Advanced Placement exam may receive credit for MTH 110 and MTH 112. Students who earn a score of 3 or 4 on the AB Advanced Placement exam, or a score of 3 on the BC Advanced Placement exam, or a 6 or 7 on the Higher Level Math IB (International Baccalaureate) exam may receive credit for MTH 110. Students with a 4 or a 5 on the Advanced Placement Statistics exam may receive credit for STA 104.

Mathematics Placement Exam: All incoming students are required to take a Mathematics Placement Exam (MPE). Students receive a recommendation concerning their first mathematics course based on the information they provide and their performance on the MPE. Students should consult this recommendation and their academic advisor before enrolling in a mathematics course

Common Curriculum Courses

Calculus continues to be the most common way for both science and non-science majors to meet the Quantitative and Mathematical Reasoning (QMR) requirement at Union. Courses numbered (MTH 051 through MTH 061 and STA 064) represent alternatives that also fulfill that requirement. These courses normally are not open to students who have passed a college calculus course. Note that there also are courses in computer science, philosophy, and political science that can be used to fulfill the QMR requirement.

Mathematics, B.S.

Requirements for the Major:

Twelve courses in the Mathematics Department (MTH or STA) numbered 101 or higher including the following courses:

- **One of the following single-variable calculus sequences:**
 - MTH 113 - Accelerated Single-Variable Calculus
- OR
- MTH 110 - Calculus 1: Differential Calculus
and
 - MTH 112 - Calculus 2: Integral Calculus

OR

- MTH 105 - Differential Calculus with Precalculus
and
MTH-112 - Calculus 2: Integral Calculus

All of the following required courses:

- MTH 115 - Calculus 3: Differential Vector Calculus and Matrix Theory
 - MTH 117 - Calculus 4: Integral Vector Calculus
 - MTH 199 - Introduction to Logic and Set Theory
 - MTH 336 - Real Analysis
 - MTH 340 - Linear Algebra
-
- At least five MTH-coded courses that do not satisfy the WS requirement and are numbered 200-level or higher.
 - A course in the department that satisfies the senior writing (WS) requirement
and
 - PHY 120 - Matter in Motion *PHY-120 is required in order to provide students with an opportunity to apply the mathematical knowledge learned in the calculus sequence and to learn about the intimate historical connections between calculus and physics.

Advanced placement credit may be used to satisfy at most two of the twelve required math courses. MTH 297 can be counted toward the major pending approval of the department chair.

It is recommended that two courses with substantial mathematical content be taken outside the department. In particular, it is recommended that students take at least one computer science course with a programming component.

It is recommended that students who are considering graduate work in mathematics should study at least one of the foreign languages used in international mathematics research journals and /or required by graduate programs in mathematics (typically French, Russian, German, and/or Chinese). Faculty members in the Math Department can advise on what language(s) to choose, if desired.

Those considering a master's program in teaching are advised to incorporate MTH 128 or MTH 228 , MTH 224, and Computer Science into their undergraduate program.

Requirements for Honors in Mathematics:

Candidates for departmental honors in Mathematics, or in any interdisciplinary program of which Mathematics is a part, must fulfill the college-wide criteria for honors. In addition, they must have a grade point average of at least 3.5 in courses in the Mathematics Department numbered 199 and above, take at least two MTH courses at the 400-level that do not satisfy the WS requirement, and either complete a two-term honors thesis in the Mathematics Department with a grade of A or A-, or complete a one-term honors thesis in the Mathematics Department with a grade of A or A- and take a third 400-level MTH course that does not satisfy the WS requirement.

Mathematics (ID), B.S.

Mathematics Requirements for any Interdepartmental Major having Mathematics as a Component:

A student seeking an interdepartmental major with mathematics as a component must submit a proposal for approval by the department chair. The proposal will give a rationale for the choice of an interdepartmental major and indicate the list of courses in both departments that are to be part of the major. Before submitting a proposal, please contact the department chair (mathchair@union.edu) so they can advise you and supply you with the correct form.

An interdepartmental major with mathematics as a component requires seven courses in the department numbered 115 or higher, including the following courses:

- MTH 115

- At least one of the following: MTH 117, MTH 130 or MTH 234
- MTH 199
- Four courses from the lists below, including at least **one** from List 1. (One-time course offerings can be substituted for courses on these lists at the discretion of the chair).

List 1:

- MTH 336 - Real Analysis
- MTH 340 - Linear Algebra
- MTH 430 - Complex Analysis
- MTH 432 - Abstract Algebra 2
- MTH 436 - Topology
- MTH 437 - Real Analysis 2
- MTH 448 - Differential Geometry
- MTH 480 - Foundations of Mathematics

List 2:

- MTH 219 - Topics in Discrete Mathematics
- MTH 221 - Mathematical Cryptology
- MTH 224 - Geometry
- MTH 228 - Probability Theory
- MTH 235 - Number Theory
- MTH 248 - Intermediate Topics in Mathematics
- MTH 325 - Knot Theory
- MTH 334 - Partial Differential Equations

Requirements for Honors in Mathematics:

Candidates for departmental honors in Mathematics, or in any interdisciplinary program of which Mathematics is a part, must fulfill the college-wide criteria for honors. In addition, they must have a grade point average of at least 3.5 in courses in the Mathematics Department numbered 199 and above, take at least two MTH courses at the 400-level that do not satisfy the WS requirement, and either complete a two-term honors thesis in the Mathematics Department with a grade of A or A-, or complete a one-term honors thesis in the Mathematics Department with a grade of A or A- and take a third 400-level MTH course that does not satisfy the WS requirement.

Mathematics Minor

Requirements for a Minor in Mathematics:

Five courses in the department (MTH or STA) numbered 115 or higher, including MTH 199 and at least two courses having MTH 199 as a prerequisite.

Statistics Minor

The Statistics minor is intended for students who are interested in developing broad statistical skills, and also for students who may be considering graduate work in statistics, analytics, actuarial science, or a related discipline. Students will develop foundational understanding of probability and statistics, learn how to produce high-quality data from randomized scientific studies, analyze data using regression and more advanced machine learning methods, and develop software skills, including statistical programming languages.

For students who transfer credit for STA 104 , such as through AP Statistics, the minor will require the other four core courses and one elective. Students with strong quantitative backgrounds who skip STA 104 can substitute a second elective for STA 104.

Listed courses may not be taught each year, requiring some degree of advance planning to complete the minor. Students will be able to complete the Statistics minor in a timely fashion if they declare a Statistics minor, having completed calculus through MTH 115 and also STA 104, by the end of their sophomore year. (Completion of calculus up to MTH 115 is a prerequisite for STA 264)

Requirements for the minor:

1. Required courses for all minors (five courses):

One of the following:

- STA 104 - Introduction to Statistics
or
- ECO 243 - Introduction to Econometrics
or
- MER 301 - Engineering Reliability
or
- PSY 200 - Statistical Methods in Psychology
or
- **Advanced Placement credit for Statistics (at least a 4 on the AP exam).**

All of the following:

- MTH 128 - Probability
or
- MTH 228 - Probability Theory
- STA 164 - Strategies of Experimentation: Statistical Design and Analysis of Experiments
- STA 264 - Regression Analysis

One of the following:

- STA 364 - Big Data Analytics
or
- ECO 364 - Business Analytics

2. Electives (one or two courses):

- CSC 234 - Data Visualization
- CSC 321 - Data Mining and Machine Learning
- CSC 329 - Neural Networks
- ECO 353 - Seminar in Econometrics
- MTH 140 - Applied Linear Algebra
- MTH 238 - Methods of Applied Mathematics
- MTH 340 - Linear Algebra
- STA 490 - Statistics Independent Study (subject to faculty availability and chair approval)
- **Senior Thesis** (subject to faculty availability and chair approval).

Mechanical Engineering

Chair: Professor R. Cortez

Faculty: Professors A. Anderson, B. Bruno, R. Cortez, W. Keat, A. Ramasubramanian, A. Rapoff, R. Wilk; Associate Professors R. Bucinell, D. Hodgson; Assistant Professors A. Hamed, Y. Stehle; Visiting Assistant Professors P. Gudlur, S. Wehe

Staff: R. Becker (Administrative Assistant), S. Gorski (Technology Coordinator)

The Mechanical Engineering Department at Union College is committed to thoroughly preparing students in the fundamentals of mechanical engineering and instilling a passion for life-long learning by building on the values of a liberal arts education. The Mechanical Engineering program is accredited by the Engineering Accreditation Commission of ABET Abet.org

Mechanical Engineering, B.S.

Requirements for the Major:

Course requirements with a typical schedule are given for the Class of 2025 below. Students should consult their academic advisor about the scheduling and sequencing of courses.

First Year*

- ESC 100 - Exploring Engineering
- MER 101 - Engineering Graphics
- MTH 113 - Accelerated Single-Variable Calculus **
- MTH 115 - Calculus 3: Differential Vector Calculus and Matrix Theory
- MTH 117 - Calculus 4: Integral Vector Calculus
- PHY 120 - Matter in Motion
- PHY 121 - Principles of Electromagnetics
- CHM 101 - Introductory Chemistry 1
- First Year Preceptorial (FPR 100 or FPR 100H)
- Introductory Computer Science Course ***

Sophomore Year

- ECE 222 - Introduction to Circuits and Electronics
- MER 201 - Statics
- MER 212 - Dynamics
- MER 213 - Material Science
- MER 214 - Strength of Materials
- MER 231 - Thermodynamics 1
- MER 232 - Thermodynamics 2
- MTH 130 - Ordinary Differential Equations
- Sophomore Research Seminar
- Elective****

Junior Year****

- MER 301 - Engineering Reliability
- MER 311 - Advanced Mechanics
- MER 312 - Dynamics and Kinematics
- MER 322 - Dynamics of Physical Systems
- MER 331 - Fluid Mechanics 1
- MER 333 - Heat Transfer Analysis and Design
- Elective****
- Elective****
- Elective****

- Elective****

Senior Year

- MER 419 - Design of Mechanical Systems
- MER 439 - Design of Thermal/Fluid Systems
- Senior Experience***** (two courses/three courses)
- Elective****
- Elective****
- Elective****
- Elective****
- Elective****
- Elective****

Note(s):

1. * Students *must* declare their ME major prior to or during the sixth week of their first year spring term (prior to registering for courses for the following Fall). Students not declared as ME majors will likely not be admitted to 200-level ME courses.
2. ** An alternate mathematics sequence in the first year is possible depending on the math preparation of the student. Consult with your academic advisor.
3. *** ME students fulfill the computer science requirement by satisfactorily completing a CSC 100-level course.
4. **** The 11 electives must be satisfied as follows:
 - Core Curriculum
(1 Social Science, 1 Literature Humanities, 1 additional Humanities, 2 Linguistic and Cultural Competency)
 - 1 Math/Science Elective
(This course is intended to count toward the ABET math/science requirements. This course must be a 100-level or above math/science course and count toward an Astronomy, Biological Sciences, Chemistry, Geosciences or Mathematics major. AP credit can be used to satisfy this requirement.)
 - 1 MER Elective (defined as any MER elective course (or any approved course offered by the ME division of Clarkson University - Capital Region Campus) that has at least one 200 level MER course prerequisite).
 - 1 Engineering Elective (defined as any BME, ECE, ESC or MER course (or any approved course offered by the ME division of Clarkson University - Capital Region Campus) that has at least one 200 level engineering course prerequisite).
 - 3 Free Electives
5. **** STA 104 , STA 164 , or STA 264 may be substituted for MER 301 .
6. ***** The fall term of junior year is the recommended term for satisfying the Linguistic and Cultural Competency component of the Core Curriculum through a term abroad. Students may complete this requirement in other terms as well. Students should determine as early as possible how they will satisfy the requirements of the Linguistic and Cultural Competency Core Curriculum component and should work closely with their academic advisor to develop the appropriate plan of study that will allow them to pursue the desired option.
7.)***** The Senior Experience is satisfied by completing (a) MER 487 plus an additional MER elective or (b) MER 487 plus MER 485 (or free elective with team faculty advisor consent) and MER 486 or (c) MER 497 and MER 498 .

Requirements for the Five-Year Combined BS/MS in Mechanical Engineering:

Union undergraduate students may apply to this program offered in conjunction with Clarkson University where both a B.S. and an M.S. degree in mechanical engineering are earned in five years. Students are encouraged to apply during sophomore year but no later than the end of the fall term of their senior year. A 3.0 overall GPA is expected for admission. Students enrolled in the program may count up to three Mechanical Engineering courses toward both degrees. A petition requesting overlapping degree credit must be approved by the undergraduate and graduate advisors and filed with the graduate office. The Master of Science program is described in the catalog of Clarkson University.

Requirements for Honors:

In addition to the college wide Departmental Honors requirements enumerated in the Academic Catalog, candidates must (1) conduct themselves in a manner consistent with the Union College Academic Honor Code and the National Society of Professional Engineers Code of Ethics for Engineers and attest that they have had no institutional actions related to academic integrity on file; (2) maintain a minimum of 3.5 GPA in these ME courses: MER 101 , MER 201 , MER 212 , MER 213 , MER 214 , MER 231 , MER 232 , MER 301 , MER 311 , MER 312 , MER 322 , MER 331 , MER 333 , MER 419 and MER 439 ; (3) complete a senior project earning a grade of at least B+ in MER 497 and A- in MER 498 or participate on a competition team earning a grade of at least A- in MER 486 and A- in MER 487; (4) present the results of the senior project or competition team at the Steinmetz Symposium or other suitable venue approved by the Department; (5) participate in the ASME student chapter's oral presentation competition and represent the college at the National ASME meeting if selected and (6) complete and submit to the department administrative assistant the honors application form by the first week of the spring term and receive a vote of approval by the Department Faculty.

Course Selection Guidelines

Current Mechanical Engineering Major worksheets can be found in department web repositories. It is strongly suggested that students and their advisers consult with these worksheets prior to selecting courses (even during the first year). Please consult with a Mechanical Engineering faculty member if additional information or clarification is required.

Minimum grades in Prerequisite Courses: In order to qualify to take any mechanical engineering course, a minimum grade of C- must be earned in all mechanical engineering (MER) and mathematics (MTH) courses that are listed as prerequisites for the course. Mathematics courses with the IMP designation are excluded from this requirement.

Clarkson University - Capital Region Campus: Selected graduate courses in engineering mathematics, solid mechanics, and the thermal fluid sciences offered by Clarkson University Capital Region Campus are available to qualified undergraduates. For further information, please consult the catalog of Clarkson University for the MS program in Mechanical Engineering.

Major Courses

(Prerequisites and co-requisites are listed for each of the major courses. Under extraordinary circumstances, a student may petition the instructor and Department Chair to take a prerequisite as a co-requisite for a major course.)

Elective Courses

These may be taken to satisfy the engineering depth or free elective requirements. Consult the Mechanical Engineering Department Chair and course listings for additional MER, BME, ESC, CSC, ECE, and Clarkson University Capital Region Campus courses that satisfy the engineering elective requirement.

Mechanical Engineering Minor

Requirements for the Minor:

The Mechanical Engineering Minor is composed of MER 201, MER 231, and any four additional courses in Mechanical Engineering except MER 010, MER 291, MER 292, MER 293, MER 295H, MER 296H, MER 297H, and MER 490 and higher.

Modern Languages and Literatures

Chair: Professor D. Mosquera

Faculty: Professors C. Batson, M. Ferry, W. Garcia, C. Henseler; Associate Professors K. Bidoshi, M. Chilcoat, C. Ndiaye, E. Nelson-Mukherjee, M. Ricci Bell, J. Ueno, Z. Zhang; Senior Lecturers M. Osuna, A. Pease; Assistant Professors S. Mueller, S. Yi; Visiting Assistant Professors E. Bouhet, D. Collinge

Administration: A. Sartiaux (Director of Language Center)

Staff: F. Li (Administrative Assistant)

All students who begin the study of a new foreign language at Union College are encouraged to pursue it for at least three terms. Students who take 100-level courses in more than one foreign language will receive credit for the second 100-level course only upon completion of the 101-level course

in at least one of the two languages. Students continuing a foreign language previously studied will be assigned to the proper course level by the department. Placement will be made in consultation with the Chair and faculty members of the department on the basis of the secondary school record and testing scores. Students may construct full majors or interdepartmental majors in Chinese, French and Francophone, German and Spanish and Hispanic Studies. Students in Japanese, and Russian have the option of an interdepartmental major with any other field. Minors are possible in Chinese, French, German, Japanese, Russian, and Spanish. Students of Chinese and Japanese have the option of the major or interdepartmental major in Asian Studies. Introductory courses are also offered in Arabic, Hebrew, Italian and Portuguese.

Requirements in All Languages

Requirements for Honors:

- A candidate for honors shall have an index in Departmental courses of not less than 3.5 and an overall cumulative index of not less than 3.3.
- The candidate shall have achieved a grade of "A" in three courses in the department, with at least one at the 300-level or higher.
- *Additional stipulations for full and interdepartmental majors in French, German, and Spanish.* **Majors** shall have achieved a grade of at least "A-" in two 400-level courses (**not including FRN 489 , GER 489 , SPN 489**). **Interdepartmental majors** shall have achieved a grade of at least "A-" in no fewer than three courses at the 300-level or higher, with at least one at the 400-level (**not including FRN 489, GER 489, SPN 489**).
- *Additional stipulations for interdepartmental majors in Chinese, Japanese, and Russian.* **Interdepartmental majors** shall have achieved a grade of at least "A-" in no fewer than three courses at the 300-level or higher, and one in an MLT course.
- For the **major**, the honors candidate shall complete a project of a literary and/or cultural nature. For the **interdisciplinary major**, the candidate may elect to complete a thesis/project relating the candidate's chosen disciplines. **In all cases**, the topic shall have received prior approval from the faculty advisor.
- For the **major**, the honors project is expected to be written in the foreign language studied. For the **interdisciplinary major**, the honors project should be written in the language deemed appropriate by the faculty advisor. For the interdisciplinary major in *Chinese and Japanese*, the project shall normally be written in English.
- The honors project shall have been awarded a grade no lower than "A-."
- When declaring candidacy for honors, a student shall write a statement outlining the nature and scope of the project and present it to the faculty member chosen to supervise the honors project, as well as to the Chair of the Department. The candidate's proposal must meet with the approval of both faculty members. This stipulation is waived when the honors project is written under the direct supervision of a Departmental faculty member in a class setting.

Requirement for taking a course without its prerequisites

In order to be placed at the proper level for their first language course at Union or to be assigned to any other course without having completed its prerequisite, students should contact the Departmental office for an appointment with the appropriate professor to get a signed permission slip or petition on the necessary waiver.

German Studies

Open to all students; no knowledge of the German language required, unless the course is taken for German credit. Students seeking language credit for the German Studies Major should register for the corresponding German course number (see **GER 330-GER 334**) **and must complete a considerable part of their course-work in German. Prerequisite for German credit in the MLT courses is the completion of at least GER 201.**

German Cultural Studies Program

The German Program offers instruction in language, culture, and literature from beginning to advanced levels. Students can complete a minor and a major or interdepartmental major in German Cultural Studies. All students are well served if they combine their study of German with second fields (e.g. another language, the arts, economics, engineering, history, international studies and management, and/or political science). Language study and the experience of the Term Abroad with their resulting linguistic fluency and cultural sensitivity greatly enhance students' opportunities as they pursue careers in their chosen fields.

German Cultural Studies Courses

The study and critical understanding of the literature of Germany, Austria, and Switzerland, in the context of their larger-cultural, social, political, and intellectual history. Prerequisite for 300-level courses listed in this section is GER 201 or another 300-level course. Prerequisite for all 400-level courses is a 300-level course.

Japanese and Russian Requirements

Course Selection Guidelines

Students should be aware that all of the courses in Modern Languages and Literatures carry HUM and LCC credit for Common Curriculum (CC) Requirements, and many of our MLT courses and upper-level literature and culture courses count towards the Humanities Literature requirement.

Students should also be aware that many of our language programs offer the 100 class (Basic 1) only in the Fall term. French is the only exception, offering FRN 100 in both Fall and Winter terms.

Students with previous experience in a language should come to the Department office to make an appointment to see a professor in the appropriate language for proper placement. Our MLT courses do not require such placement, as they are taught in English.

Courses in Modern Literature, Culture, and Cinema in Translation (Taught in English)

Faculty in the Department of Modern Languages & Literatures offer a variety of courses on works of literature, culture, cinema, and media that have been translated into English. "MLT" courses allow English-speaking students to engage with texts and other cultural artifacts from around the world to help them to develop the awareness of cultural diversity that is needed to be a global citizen in the twenty-first century.

Spanish Language and Culture

Literatures and Cultures (300-level courses)

Majors, ID majors, and minors must take two 300-level courses from different clusters; there are four clusters (listed below). Prerequisite for 300-level courses listed in this section is SPN 203 or permission of the instructor.

Literatures and Cultures (400-level courses)

Prerequisites for 400-level courses listed in this section are two 300-level courses.

Chinese, B.A.

Requirements for the Major in Chinese:

A minimum of 10 courses at the 101-level and above, including three 300 level, two 400 level, and 489 (Senior Project). Students have the option of taking one China-related MLT course for Chinese credit in place of one 400-level course. Majors are expected to participate on the China Term Abroad program and are encouraged to improve their language skills by attending the weekly Chinese Table and participating in other extracurricular activities. In addition, majors are urged to take other courses related to Chinese culture and history in academic fields such as history, philosophy, anthropology, art history, and political science.

French and Francophone Studies, B.A.

Requirements for the Major in French and Francophone Studies:

A minimum of 10 courses at the 101-level and above, including two 300-level courses, three 400-level courses, and FRN 489 (Senior Project). Participation in a Union Term Abroad program is normally expected. Courses listed under "Literature in Translation" may or may not count toward the major, interdepartmental major, or minor. One term of related history, one term of philosophy, and one term of English literature are strongly recommended, as well as relevant courses in art history in the major.

German Studies, B.A.

Requirements for the Major in German Studies:

A minimum of 10 courses at the 101-level or above, including three 300 level, and two 400 level, and GER 489 (Senior Project). Majors are normally expected to take one Term Abroad and are encouraged to improve their language skills **by attending the weekly German Table and participating in German Club and other extracurricular activities**. Students have the option of taking one MLT course (Literature in Translation) for German credit. **Students may also take one of these two designated cross-listed courses toward the major: HST258 or AMU284.** In addition, majors are urged to take other courses related to German culture and history in other academic fields such as English, history, philosophy, music, art history, and political science.

Spanish and Hispanic Studies, B.A.

Requirements for the Major in Spanish and Hispanic Studies:

A minimum of 10 courses at the 101-level and above, including two 300-level courses and four 400-level courses, one of which must be taken with WS designation in the Spring term of the senior year. Students who seek and qualify for departmental honors must take SPN 489 (Honors Senior Seminar), which will count as one 400-level course with WS designation. Courses listed under "Literature, Culture, and Cinema in Translation" (those with the MLT prefix) do not count toward the major or interdepartmental major. Majors are expected to participate in a Term Abroad program. Elective courses pertinent to the major/minor in Spanish from other humanities and social sciences areas such as history, philosophy, literature, political science, anthropology, and art history, etc. are strongly recommended.

Chinese (ID), B.A.

Requirements for the Interdepartmental Major in Chinese:

A minimum of seven courses beyond the 101-level, including two courses on the 300-level and one MLT course, or a third course at the 300-level. 4 courses beyond the 101-level are required if combined with participation in a Union Term Abroad to China.

French and Francophone Studies (ID), B.A.

Requirements for the Interdepartmental Major in French and Francophone Studies:

A minimum of seven courses at the 101-level and above, including two 400-level courses and either FRN 489 or a project that integrates the two disciplines.

German Studies (ID), B.A.

Requirements for the Interdepartmental Major in German Studies:

A minimum of seven courses at the 101-level and above, including two courses at the 300 level and one course at the 400 level if the senior project course GER 489 in German is chosen; or it can include, in addition to two 300 level courses, two courses at the 400 level if the thesis (with a considerable German component) is written in the second field. Students have the option of taking one MLT course (Literature in Translation) for German credit. **Students may also take one of these two designated cross-listed courses toward the major: HST258 or AMU284.** Interdepartmental majors are urged to take the Term Abroad and are encouraged to improve their language skills **by attending the weekly German Table and participating in German Club and other extracurricular activities.**

Japanese (ID), B.A.

Requirements for the Interdepartmental Major in Japanese or Russian:

A minimum of seven courses at the 101-level and above, including two courses on the 300 or 400-level and one MLT course, or a third course at the 300-level. 4 courses at the 101-level and above are required if combined with participation in a Union Term Abroad to Japan, or a study abroad in Russia.

Russian (ID), B.A.

Requirements for the Interdepartmental Major in Japanese or Russian:

A minimum of seven courses at the 101-level and above, including two courses on the 300 or 400-level and one MLT course, or a third course at the 300-level. 4 courses at the 101-level and above are required if combined with participation in a Union Term Abroad to Japan, or a study abroad in Russia.

Spanish and Hispanic Studies (ID), B.A.

Requirements for the Interdepartmental Major in Spanish and Hispanic Studies:

A minimum of seven courses at the 101-level and above, including two 300-level courses (and two 400-level courses; one of the 400-level courses must be taken with WS designation in the Spring term of the senior year unless the student writes a thesis in the other department that integrates the two disciplines.) Students who seek and qualify for departmental honors must take SPN 489 (Honors Senior Project), which will count as one 400-level course with WS designation. ID majors seeking honors must fulfill honors requirements in both departments/programs.

Chinese Minor

Requirements for the Minor in Chinese:

A minimum of 6 courses at the 101-level or above. For students not participating in the Term Abroad in China, one of those six courses should be an MLT course. For students participating in the Term Abroad in China, students may complete their minor in Chinese with 3 additional courses (which can include 100). When selecting courses for the term abroad, students should select courses directly related to the host culture, with the approval of the department chair.

French and Francophone Studies Minor

Requirements for the Minor in French:

A minimum of six courses, including two 300-level courses.

German Studies Minor

Requirements for the Minor in German Studies:

A minimum of six courses, including at least two 300-level courses, only one of which may be either GER 300T or the MLT for German credit.

Japanese Minor

Requirements for the Minor in Japanese or Russian:

A minimum of 6 courses at the 101-level or above. For students not participating in the Term Abroad in Japan, or study abroad in Russia, one of those six courses should be an MLT (Japanese or Russian focus) course. For students participating in the Term Abroad in Japan or study abroad in Russia, students may complete their minor in Japanese or Russian with 3 additional courses (which can include 100). When selecting courses for the term abroad, students should select courses directly related to the host culture, with the approval of the department chair.

Russian Minor

Requirements for the Minor in Japanese or Russian:

A minimum of 6 courses at the 101-level or above. For students not participating in the Term Abroad in Japan, or study abroad in Russia, one of those six courses should be an MLT (Japanese or Russian focus) course. For students participating in the Term Abroad in Japan or study abroad in Russia, students may complete their minor in Japanese or Russian with 3 additional courses (which can include 100). When selecting courses for the term abroad, students should select courses directly related to the host culture, with the approval of the department chair.

Spanish Minor

Requirements for the Minor in Spanish:

A minimum of six courses, including two 300-level courses. No more than three 300-level courses can be counted for the minor. In place of one of the 300-level courses, one "Literature, Culture, and Cinema in Translation" (MLT) course (on Peninsular Spanish or Latin American literatures and cultures) can be counted towards the minor.

Music

Chair: Professor J. Matsue

Faculty: Professors D. McMullen, T. Olsen; Assistant Professor C. Chandler; Lecturer, Director of Performance S.P. Liu

Staff: Staff (Office Assistant), V. Rotondi (Program Administrative Coordinator)

Ensembles and Lessons

Students are invited to participate in a variety of faculty-led ensembles and/or take private lessons. A list of approved instrumental and vocal instructors is available from the Director of Performance. There is no fee for participation in the ensembles; music lessons are paid for separately on an individual basis. To gain transcript recognition for participation in these activities, students must register with the registrar early in the term and achieve a passing grade from the teacher, director, or conductor. Requests to register for practicum transcript recognition after the drop-add period will not be honored. Each full music credit is accumulated from three previous passing grades in the same practicum (AMU 010, AMU 012, AMU 014, AMU 015, AMU 016, AMU 017, or AMU 018). There are no limits on how many practicum courses can appear on the student's transcript. However, at most two of these credits can be used towards graduation. Full music majors and ID majors must accumulate at least two years of practicum credit (in one (or more) faculty-led ensemble(s); music minors must accumulate at least one year of practicum credit in a faculty-led ensemble.

Music, B.A.

Requirements for the Major:

Twelve courses, including the theory sequence

- AMU 101 - Theory 1: Diatonic Harmony
- AMU 102 - Theory 2: Chromatic Harmony
- AMU 200 - Theory 3: Phrase and Form

Three music history courses at the 200-level or above.

Chosen from below, (one course **must** be AMU 213 or 214):

- AMU 212 - Bach, Handel, and their Predecessors
- AMU 213 - Haydn, Mozart and Beethoven
- AMU 214 - Romanticism
- AMU 215 - Music in the 20th & 21st Centuries

- AMU 340 - Early Music Seminar

A world music course

- AMU 202 - Musical Thinking: World and Pop
- AMU 220 - Mapping Musical Lives: Ethnography of Performing Arts

Additional Requirements

- Three music electives chosen in consultation with the student's departmental advisor (at least two 200-level or above)
- a two-term senior project and at least
- two years of practicum credit in faculty-led ensembles

Requirements for Honors in Music:

To be eligible for departmental honors, a student must fulfill the following requirements: (1) a minimum index of 3.3 in music; (2) for full Majors: a grade of "A minus" or better in a two-term senior project in composition, performance, research, or analysis (AMU 498-AMU 499); for Interdepartmental Majors: a grade of "A minus" or better in a one-term senior project in composition, performance, research, or analysis (AMU 497). In addition, the student must satisfy College requirements for departmental honors.

Course Selection Guidelines:

Students are required to consult their music faculty advisors when choosing electives. Concentrations are available in composition, music history, music technology, performance, and ethnomusicology. All students should plan to complete the 100-level music theory sequence early in their music studies. Music Theory 3 is strongly recommended as a capstone theory course for students specializing in composition, performance, or music history. The department values performance as an essential component of musical training. The list of ensembles follows the music course descriptions.

Music (ID), B.A.

Requirements for the Interdepartmental Major:

Eight courses:

- AMU 101 - Theory 1: Diatonic Harmony
- AMU 102 - Theory 2: Chromatic Harmony

Two music history courses

Chosen from below, (**one** must be AMU 213 or AMU 214):

- AMU 212 - Bach, Handel, and their Predecessors
- AMU 213 - Haydn, Mozart and Beethoven
- AMU 214 - Romanticism
- AMU 215 - Music in the 20th & 21st Centuries
- AMU 340 - Early Music Seminar

A world music course

- AMU 202 - Musical Thinking: World and Pop
- AMU 220 - Mapping Musical Lives: Ethnography of Performing Arts

Additional Requirements

- Two electives (at least one 200-level or above)
- AMU 497
and
- at least two years of practicum credit in a faculty-led ensemble.

Requirements for Honors in Music:

To be eligible for departmental honors, a student must fulfill the following requirements: (1) a minimum index of 3.3 in music; (2) for full Majors: a grade of "A minus" or better in a two-term senior project in composition, performance, research, or analysis (AMU 498-AMU 499); for Interdepartmental Majors: a grade of "A minus" or better in a one-term senior project in composition, performance, research, or analysis (AMU 497). In addition, the student must satisfy College requirements for departmental honors.

Course Selection Guidelines:

Students are required to consult their music faculty advisors when choosing electives. Concentrations are available in composition, music history, music technology, performance, and ethnomusicology. All students should plan to complete the 100-level music theory sequence early in their music studies. Music Theory 3 is strongly recommended as a capstone theory course for students specializing in composition, performance, or music history. The department values performance as an essential component of musical training. The list of ensembles follows the music course descriptions.

Music Minor

Requirements for the Minor in Music:

Six courses, including the theory sequence

- AMU 101 - Theory 1: Diatonic Harmony
- AMU 102 - Theory 2: Chromatic Harmony

Two music history courses

Chosen from below (must include either AMU 213 or AMU 214)

- AMU 212 - Bach, Handel, and their Predecessors
- AMU 213 - Haydn, Mozart and Beethoven
- AMU 214 - Romanticism
- AMU 215 - Music in the 20th & 21st Centuries
- AMU 340 - Early Music Seminar

A world music course

- AMU 202 - Musical Thinking: World and Pop

- AMU 220 - Mapping Musical Lives: Ethnography of Performing Arts

Minor in World Music and Cultures

For more information on this minor go to World Musics and Cultures Minor.

Additional Requirements

- One music elective chosen in consultation with student's departmental adviser
and
- At least one year of practicum credit in a faculty-led ensemble.

Course Selection Guidelines:

Students are required to consult their music faculty advisors when choosing electives. Concentrations are available in composition, music history, music technology, performance, and ethnomusicology. All students should plan to complete the 100-level music theory sequence early in their music studies. Music Theory 3 is strongly recommended as a capstone theory course for students specializing in composition, performance, or music history. The department values performance as an essential component of musical training. The list of ensembles follows the music course descriptions.

Nanotechnology

Directors: Professors R. Cortez (Mechanical Engineering), Y. Stehle (Mechanical Engineering)

Nanotechnology Minor

The interdisciplinary minor in nanotechnology is primarily aimed at science and engineering majors who wish to become more aware of the properties of matter at the nanoscale, the potential usefulness of those properties, and their social and economic implications. It will also appeal to students interested in science and technology policy who wish to expand their knowledge of science and technology.

Requirements for the minor:

1. Required courses for all minors (Three courses):

- CHM 224 - Frontiers of Nanotechnology and Nanomaterials or
- ESC 224 - Frontiers of Nanotechnology and Nanomaterials
- ESC 324 - Advanced Topics in Nanoscience
- MER 213 - Material Science

2. Elective physical science course:

Any course outside of the student's major department that counts toward that department's major.

3. Elective Social Science or Humanities course:

Any social science or humanities course that focuses on science, technology, and society.

Some examples include:

- ANT 240 - Technology, Culture & Society
- CLS 190 - Science and Technology in the Ancient World
- PHL 232 - Philosophy of Science

4. The student's senior writing, research, or design project should involve elements of nanoscience or nanotechnology.

This senior project should be approved by one of the Nanotechnology program directors.

Neuroscience

Directors: Professors Q. Chu-LaGraff (Biological Sciences), C. Anderson-Hanley (Psychology)

Faculty: Professors L. Fleishman (Biological Sciences), D. Burns, C. Weisse (Psychology); Associate Professors S. Kirkton (Biological Sciences), C. Fernandes, K. Striegnitz, J. Rieffel, N. Webb (Computer Science), T. Buma (Electrical and Computer Engineering), J. Wang (Mathematics), S. Romero (Psychology); Assistant Professors M. Bergamaschi-Ganapini (Philosophy), C. Rogers (Psychology); Visiting Assistant Professor E. Egan (Psychology); Senior Lecturer B. Cohen (Biological Sciences)

The major in neuroscience is designed for students with interests that intersect the fields of biology, psychology, and computer science. Neuroscience focuses on the relationships among brain function, information processing, and behavior. Researchers in this field come from widely disparate backgrounds, including cognitive psychology, clinical neuropsychology, neuroimaging, neurobiology, molecular biology, genetics, neuroethology, biopsychology, physiology, neurology, psychiatry, philosophy, and computer science. Thus, research questions are considered from many different levels, and many different converging methodologies are used.

Neuroscience, B.S.

The neuroscience major consists of three tracks: The Bioscience track, the Cognitive track, and the Computational track.

- The *Bioscience* track focuses on the biological basis of neural development, function, and plasticity. Students will develop an understanding of the nervous system and its role in cognition, perception, and action at the molecular, cellular, and systems level.
- The *Cognitive* track provides students with an understanding of how neural networks and brain mechanisms give rise to specific mental processes and behavior. Students begin with the processes that have been traditionally studied in the area of cognitive psychology, but can tailor the program to include phenomena that are traditionally studied in developmental or clinical psychology as well.
- The *Computational* track focuses on issues related to developing computational models of neuronal and mental processes. Students will develop an understanding of artificial intelligence that uses biologically plausible methods.

Requirements for the Major:

The neuroscience major consists of four parts: (1) a core of required courses that all majors must take; (2) required courses in one of three tracks - bioscience, cognitive, or computational; (3) a general elective; (4) a senior writing requirement. Unless noted below, course descriptions are listed under their home departments. It is not possible to be an interdepartmental major in Neuroscience.

1. Required courses for all neuroscience majors:

Take the following required courses:

- BIO 103 - Diversity of Life: Heredity, Evolution, and Ecology
- BIO 104 - Cellular Foundations of Life
- BIO 205 - Topics in Molecular Biology
- BIO 242 - Neurobiology

- PHL 265 - Minds and Machines
- PSY 200 - Statistical Methods in Psychology
- PSY 210 - Neuroscience: Mind & Behavior
- PSY 220 - Attention and Memory

Take one of the following:

- CSC 103 - Taming Big Data: Introduction to Computer Science
or
- CSC 106 - Can Computers Think? Introduction to Computer Science

2. Required and cognate courses in one of three tracks:

Bioscience Track:

Required Courses:

- BIO 362 - Experimental Neurobiology
or
- BIO 363 - Cellular Neurosciences

In addition:

- CHM 101 - Introductory Chemistry 1
- CHM 102 - Introductory Chemistry 2
or
- CHM 110H - Honors Introductory Chemistry

Take any one of the following courses:

- MTH 110 - Calculus 1: Differential Calculus
- MTH 112 - Calculus 2: Integral Calculus
- MTH 113 - Accelerated Single-Variable Calculus
- MTH 115 - Calculus 3: Differential Vector Calculus and Matrix Theory
- MTH 117 - Calculus 4: Integral Vector Calculus

Any one other of the following:

- BIO 325 - Animal Behavior
- BIO 330 - Comparative Animal Physiology
- BIO 350 - Evolutionary Biology
- BIO 362 - Experimental Neurobiology
- BIO 363 - Cellular Neurosciences
- BIO 370 - Endocrinology
- BIO 384 - Genetics and Molecular Biology
- PSY 310 - Cognitive Neuroscience

Cognitive Track:

Required Courses:

- CHM 101 - Introductory Chemistry 1

- PSY 300 - Research Methods in Psychology
- PSY 310 - Cognitive Neuroscience

In addition:

Take any one of the following math courses:

- MTH 110 - Calculus 1: Differential Calculus
- MTH 112 - Calculus 2: Integral Calculus
- MTH 113 - Accelerated Single-Variable Calculus
- MTH 115 - Calculus 3: Differential Vector Calculus and Matrix Theory
- MTH 117 - Calculus 4: Integral Vector Calculus

Any one of the following:

- BIO 325 - Animal Behavior
- CSC 320 - Artificial Intelligence
- PSY 213 - Clinical Neuropsychology
- PSY 313 - Sensation and Perception
- PSY 410 - Seminar in Brain and Behavior

Computational Track:

Required Courses:

- CSC 120 - Programming on Purpose
- MTH 197 - Discrete Mathematics for Computer Science
- or
- MTH 199 - Introduction to Logic and Set Theory

Take any one of the following math courses:

- MTH 110 - Calculus 1: Differential Calculus
- MTH 112 - Calculus 2: Integral Calculus
- MTH 113 - Accelerated Single-Variable Calculus
- MTH 115 - Calculus 3: Differential Vector Calculus and Matrix Theory
- MTH 117 - Calculus 4: Integral Vector Calculus

Any TWO from the following list:

- CSC 151 - Data Structures
- CSC 206 - Text Analytics
- CSC 234 - Data Visualization
- CSC 235 - Modeling & Simulation
- CSC 243 - Bioinformatics: Information Technology in the Life Sciences
- CSC 320 - Artificial Intelligence
- CSC 321 - Data Mining and Machine Learning
- CSC 325 - Robotics
- CSC 329 - Neural Networks
- PHL 442 - Advanced Logic

- PHL 462 - Philosophy of Language

Additional Courses for All Majors

Any one additional course from the following list:

- BIO 325 - Animal Behavior
- BIO 330 - Comparative Animal Physiology
- BIO 332 - Comparative Vertebrate Anatomy
- BIO 350 - Evolutionary Biology
- BIO 354 - Developmental Biology
- BIO 362 - Experimental Neurobiology
- BIO 363 - Cellular Neurosciences
- BIO 364 - Epigenetics, Development, and Diseases
- BIO 370 - Endocrinology
- BIO 380 - Biochemistry: Nucleic Acids, Carbohydrates, and Lipids
- BIO 384 - Genetics and Molecular Biology
- CSC 206 - Text Analytics
- CSC 234 - Data Visualization
- CSC 235 - Modeling & Simulation
- CSC 243 - Bioinformatics: Information Technology in the Life Sciences
- CSC 320 - Artificial Intelligence
- CSC 321 - Data Mining and Machine Learning
- CSC 325 - Robotics
- CSC 329 - Neural Networks
- ECE 487 - Medical Imaging Systems
- MTH 128 - Probability
- PHL 231 - Symbolic Logic
- PHL 232 - Philosophy of Science
- PHL 365 - Philosophy of Mind
- PHL 447 - Advanced Logic
- PHL 462 - Philosophy of Language
- PSY 213 - Clinical Neuropsychology
- PSY 215 - Health Psychology
- PSY 225 - The Psychology of Language
- PSY 240 - Developmental Psychology
- PSY 250 - Clinical Psychology 1: Disorders
- PSY 300 - Research Methods in Psychology
- PSY 310 - Cognitive Neuroscience
- PSY 313 - Sensation and Perception
- PSY 331 - Psychology of Emotion
- PSY 352 - Psychological Assessment and Testing

*Please note the 3-term PSY practicum only awards **one credit** upon completion of PSY-404.

- PSY 402 - Honors Colloquium 1
- PSY 403 - Honors Colloquium 2
- PSY 404 - Honors Colloquium 3

- PSY 410 - Seminar in Brain and Behavior
- PSY 411 - Seminar in Clinical Neuropsychology
- PSY 420 - Seminar in Cognitive Psychology
- **PSY 421 - Psychology & Neurology: Real World As Laboratory**
- **PSY 422 - Communicating Psychological Science**

4. Senior Writing Requirement (WS):

Senior Seminar Options:

A 2 or 3-term senior thesis or research project (required for Honors; also PSY 300 is required by Psychology supervisors) OR one the following seminars:

- BIO 487 - Senior Writing Seminar: Topics in Ecological and Evolutionary Biology
- BIO 488 - Senior Writing Seminar: Topics in Organismal and Physiological Biology
- BIO 489 - Senior Writing Seminar: Topics in Cellular and Molecular Biology
- PSY 410 - Seminar in Brain and Behavior
- PSY 411 - Seminar in Clinical Neuropsychology
- PSY 420 - Seminar in Cognitive Psychology

Department Thesis Option:

Students must register for senior thesis courses in the department of their thesis advisor:

Biology thesis advisors:

- BIO 497 - Biology Thesis Research 1
- BIO 498 - Biology Thesis Research 2
- BIO 499 - Biology Thesis Research 3

Psychology thesis advisors:

- PSY 498 - Psychology Senior Thesis 1
- PSY 499 - Psychology Senior Thesis 2
- or
- PSY 487 - Psychology 3 Term Thesis 1
- PSY 488 - Psychology 3 Term Thesis 2
- PSY 489 - Psychology 3 Term Thesis 3

Computer Science thesis advisors:

- CSC 497 - Computer Science Capstone Seminar
- CSC 498 - Computer Science Capstone Project 1
- CSC 499 - Computer Science Capstone Project 2

Thesis advisors from other departments:

Contact the Neuroscience program director(s) first.

Requirements for Honors:

In addition to meeting college-wide requirements, honors in Neuroscience requires: (1) a minimum grade point average of 3.30 in the major (including thesis grades, but not including the CHM or MTH cognate courses listed in #2 above); (2) a minimum of three grades of A or A- in the required courses for all majors (see #1 above); (3) satisfactory completion of a senior thesis with a minimum grade of A-; (4) presentation of the student's work, usually at the Steinmetz Symposium. Any non-adjunct professor or lecturer in the Psychology, Biology, or Computer Science departments may advise a senior thesis; faculty members *not* in those departments must be affiliated with the Neuroscience program in order to

advise senior theses. Adjunct faculty members may only advise theses with explicit approval of the Neuroscience program director(s). However, to do a thesis advised by a faculty member not affiliated with the Neuroscience program, students must receive permission from the program director(s) in advance. Students are advised to start the process of finding a thesis topic and advisor as early in the junior year as possible.

Course Selection Guidelines for the Neuroscience Major:

It is recommended that students in this major start with BIO 103, BIO 104, and PSY 210 as these courses are prerequisites for Neuroscience students to take the neuroscience-related courses in the Psychology department without taking PSY 100, which *does not count* toward the Neuroscience major. After completing PSY 210, Neuroscience students may take other Psychology courses without first completing PSY 100. *Students are strongly encouraged to take PSY 200, PSY 210, BIO 205 , BIO 242 and CSC 106 (or CSC 103) as early as possible, preferably in the sophomore year.* CSC 106 is preferred over CSC 103, but both satisfy the same requirement. Students are also advised to take CHM 101 prior to taking BIO 205. Although not required, it is typical that Cognitive Track majors take senior seminars in the Psychology department, and Bioscience Track majors take senior seminars in the Biology department. Normally, courses taken outside of Union College will not be counted toward the major. However, exceptions can be made under extenuating circumstances on an ad-hoc basis. To receive Neuroscience credit for courses taken elsewhere, students must contact the program director(s) to request permission, and the courses must match a Union course or have similar neuroscience content to Union courses that do receive credit.

*MTH 110 may alternatively be satisfied by taking the **first two courses in the MTH 100-101-102** sequence.

Health Professions: doctoral programs (MD/DO/PhD) often require additional courses in chem (orgo), biochem, physics, as well as psychology and sociology (100s); other professional tracks may require Anatomy & Physiology (often taken at a nearby institution alongside Union classes).

Clinical Courses: (required for grad school in therapeutic realm: neuropsychologist, psychologist, psychiatrist, neurologist, counselor/therapist, occupational therapy...) PSY 213 , PSY 250 , PSY 351 , PSY 451 , PSY 352 .

NS Honors Society (Nu Rho Psi): major/minor in NS, 3 terms of college (min cum GPA of 3.20), 3 NS courses (min NS GPA of 3.50)

Neuroscience Minor

Due to significant curricular overlap, **Biology or Psychology majors are not allowed to minor in Neuroscience. Similarly, Neuroscience majors are not allowed to minor in Biology.** They may be allowed to minor in Psychology but only under these conditions:

- A. Psychology chair approval
- B. All requirements must be fulfilled (including PSY 100 , which is otherwise not required of NS majors)
- C. No credits used to satisfy NS requirements may be used to satisfy Psychology requirements (i.e., no double-counting).

For all other majors interested in minoring in Neuroscience: BIO 242 is required in addition to four courses selected from the list below. These courses must be from three different departments. For Computer Science majors, only one of these courses can be double counted.

Requirements for the Minor:

- BIO 205 - Topics in Molecular Biology
- BIO 325 - Animal Behavior
- BIO 350 - Evolutionary Biology
- BIO 362 - Experimental Neurobiology
- BIO 363 - Cellular Neurosciences
- BIO 370 - Endocrinology
- BIO 384 - Genetics and Molecular Biology
- CSC 103 - Taming Big Data: Introduction to Computer Science
- CSC 106 - Can Computers Think? Introduction to Computer Science
- CSC 206 - Text Analytics
- CSC 234 - Data Visualization
- CSC 235 - Modeling & Simulation

- CSC 243 - Bioinformatics: Information Technology in the Life Sciences
- CSC 320 - Artificial Intelligence
- CSC 321 - Data Mining and Machine Learning
- CSC 325 - Robotics
- CSC 329 - Neural Networks
- PHL 265 - Minds and Machines
- PHL 462 - Philosophy of Language
- PSY 200 - Statistical Methods in Psychology
- PSY 210 - Neuroscience: Mind & Behavior
- PSY 213 - Clinical Neuropsychology
- PSY 220 - Attention and Memory
- PSY 225 - The Psychology of Language
- PSY 310 - Cognitive Neuroscience
- PSY 313 - Sensation and Perception

Organizing Theme

Organizing Theme B.S. / B.A.

The Organizing Theme Major is best suited for the self-motivated student who has a well-defined intellectual curiosity for a topic involving multiple disciplines and which cannot be accommodated by the already existing majors, double majors, or interdepartmental majors at Union College. The Organizing Theme Major encourages the exploration of thematically related connections across disciplines, and therefore must incorporate courses from at least three different departments, with no more than four courses from any one department to count toward the major. The student must choose and work with an advisor (or advisors) who is supportive of the student's proposed Organizing Theme Major and has a clear understanding of what the project entails.

The Application Process

The Organizing Theme Major proposal requires the approval of the chosen Organizing Theme advisor(s) and then a faculty committee established by the Dean of Studies. It may be proposed no sooner than the spring term of the freshman year and no later than the sixth week of the spring term sophomore year (in extremely rare cases, this deadline may be extended to the first week of the fall term of junior year). For more information about the Organizing Theme Major and the application process, see the Organizing Theme Web page or contact the Director of Scholars Program, who serves as Chair to the committee.

To propose an Organizing Theme Major, students complete the Organizing Theme Application Form. The Organizing Theme Major proposal must be prepared with the guidance, input and approval of the Organizing Theme Major advisor(s) you have chosen to work with before it is submitted using the online form. It is suggested that prospective candidates meet with the Director of the Scholars Program to discuss their proposal before submitting the application.

The Organizing Theme Major Committee will review the proposal and if necessary, suggest revisions for the student to make in consultation with the advisor(s).

If no revisions are required, the Organizing Theme Major Committee will consider the proposal for final approval. If revisions are required, the student along with the advisor(s) will make them, submitting a revised application form.

The committee reviews and officially approves the proposal, and gives it to the Director of the Scholars Program who forwards it to the Registrar. The student then completes a Declaration of Major form and submits it to the Registrar. If all the paperwork in is order, the Registrar lists the student's major as Organizing Theme.

Please note that this process often takes a month or more.

Requirements for the Major

The approved program must conform to the disciplines already established at Union. Your proposal may be submitted no sooner than spring term of your freshman year, and must be submitted, at the very latest, by week six of spring term of your sophomore year. Exceptions to the timeline must be approved by the Director of the Scholars Program, who serves as Chair to the Organizing Theme Major Committee. The major consists of a total of 12 courses that clearly relate to the organizing theme, at least two of which must be at the 300- or 400-level. In addition, the student must complete a one-term senior thesis or project (ORT 497). Or the student must complete 11 courses (at least two of which must be at the 300- or 400-level) and then a two-term senior thesis or project (ORT 498 and ORT 499). NOTE: When preparing the Organizing Theme Major proposal with the advisor(s), the student must identify these 12 courses, plus several (3-4) more that can stand in as alternates in case some of the courses you choose are not available at the time you wish to take them. It is the student's responsibility to check with departments to verify that the courses are offered in the time frame required. The one-term project (ORT 497) or two-term senior thesis (ORT 498 and ORT 499) must demonstrate an integration of the knowledge and skills gained from the Organizing Theme Major courses that the student has taken. The advisor(s) will direct this senior thesis or project.

Organizing Theme Committee Procedures and Timeline

Procedures:

Initial proposals must be submitted by the end of week 3 of the term when they are to be reviewed, no later than spring term of a student's sophomore year. Exceptions to the timeline must be approved by the Director of the Scholars Program, who serves as Chair to the Organizing Theme Major Committee. Proposals will be reviewed by the Organizing Theme Committee in Week 5 and students will be notified of the committee's decision. The committee may choose to 1) accept the proposal, 2) accept the proposal with revisions, 3) decline the proposal with the option to resubmit, or 4) decline the proposal without the possibility of resubmission. In the case of proposals that are accepted with revisions, revisions must be submitted to the committee chair no later than the end of week 7. Failure to return revisions by the end of week 7 may result in the proposal having to go through another review the following term.

If the proposal is declined with the option to resubmit, the proposal must be resubmitted no later than end of week 3 of the following term. After a 2nd declined attempt, students may ask for a meeting with the committee and their advisor(s) during weeks 8-10 of the term when they receive the 2nd rejection. Students who are not approved twice are strongly encouraged to seek another path for completing their major requirements. Students who are not approved by the end of their junior year may not resubmit their proposals.

Timeline:

- Initial proposals must be submitted no later than spring term of sophomore year
 - Week 3: Proposal deadline
 - Week 5: Proposal review and committee decision
 - Week 7: Deadline for return of revisions to proposals accepted pending revisions
 - Week 8-10: Appeals meetings (if required and requested by the student and advisor after the second rejection of the proposal)
- Students who do not receive final approval by end of junior year must find an alternate route for completing their major requirements.

Changes to an Approved Organizing Theme Major

Any proposed changes to an approved Organizing Theme Major must be approved by the Organizing Theme Major advisor, then by the Organizing Theme Committee. For a revised proposal, use the same online form and be sure to explain the reason for the changes.

If you have any questions or need further information, please contact the Director of the Scholars Program at scholarsdirector@union.edu

Philosophy

Chair: Professor L. Zaibert

Faculty: Associate Professor K. Scheiter; Assistant Professor M. Bergamaschi-Ganapini, Assistant Professor M. Cruz, Assistant Professor D. Friedell

Staff: L. Pelish (Administrative Assistant)

Introductory Courses

Introductory Courses, whether issues-oriented or historically-oriented, do not presuppose any prior acquaintance with philosophy. They may be taken in any order. For more advising information, consult the Philosophy Department website.

Intermediate Courses

Intermediate Courses do not presuppose any prior acquaintance with philosophy. They may be taken in any order; and are pitched at a level that is more appropriate for second and higher year students than for first year students. However, in some cases an order for taking intermediate courses is recommended (for this and other advising information, consult the Philosophy Department website).

Advanced Courses

Advanced courses may be taken in any order, although in some cases certain orders will be recommended. Unlike Introductory and Intermediate courses, most advanced courses presuppose that the student has already taken at least two philosophy courses. Although first and second year students will be allowed to take advanced courses, these courses are pitched at a level that is more appropriate for third and fourth year students.

More advising information

Philosophy, B.A.

Requirements for the Major:

Eleven courses in philosophy, of which two should be 100-level or above, four should be 200-level or above, two should be 300-level or above and 3 should be 400-level or above including PHL 408 / PHL 418 . Three course in the history of philosophy must be taken, that cover at least two different periods or cultures, of which one should be 300-level or above. Three courses that are thematic (H, L, M&E, EVT) must be taken, of which one should be 300-level or above. Thesis is required for only those seeking honors (PHL 498 and PHL 499). The eleven courses should include:

Three courses in History (H):

- PHL 216 - (166) Introduction to Indian Philosophy
- PHL 233 - Early Modern Philosophy
- PHL 245 - Buddhist Ethics
- PHL 251 - (150) Introduction to Ancient Greek Philosophy
- PHL 311 - (244) Plato's Republic
- PHL 338 - Zen and Tibetan Buddhism
- PHL 341 - The Contemporary Crisis of Truth
- PHL 342 - Aristotle
- PHL 388 - (288) Skepticism East and West
- PHL 450 - Seminar in the History of Philosophy

One course in logic (L):

- PHL 125 - Introduction to Logic and Critical Thinking
- PHL 231 - Symbolic Logic
- PHL 447 - Advanced Logic
- PHL 448 - Seminar in Ethics or Value Theory

At least one course in Metaphysics and Epistemology (M&E):

- PHL 232 - Philosophy of Science
- PHL 261 - Philosophy of Religion
- PHL 265 - Minds and Machines
- PHL 266 - Philosophy in Literature
- PHL 341 - The Contemporary Crisis of Truth
- PHL 359 - Postmodernism
- PHL 365 - Philosophy of Mind

- PHL 445 - Seminar in Metaphysics
- PHL 446 - Seminar in Epistemology

At least one course in Ethics & Value (EVT):

- PHL 105 - Introduction to Ethics
- PHL 110 - Moral Problems
- PHL 123 - Values and Economic Justice
- PHL 180 - Theories of the Good Life
- PHL 237 - Introduction to Political Philosophy
- PHL 245 - Buddhist Ethics
- PHL 246 - Art, Media, and Society
- PHL 248 - Philosophy and Current Affairs
- PHL 250 - Ethical Theory
- PHL 255 - On War and Killing
- PHL 263 - Philosophy of Gender and Race
- PHL 274 - (174) Biomedical Ethics
- PHL 297 - The Ethics of Forgiveness and Revenge
- PHL 376 - (476) Philosophy of Law/Jurisprudence
- PHL 448 - Seminar in Ethics or Value Theory

Additional Requirements:

- PHL 408 - New Directions in Philosophy
- PHL 418 - New Directions in Philosophy

Requirements for Honors in Philosophy:

To be eligible for departmental honors, the candidate must (1) complete all requirements for a major in Philosophy, or for an ID major in Philosophy and another discipline; (2) have a minimum grade point average of 3.50 in philosophy; (3) have received at least three "A" or "A-" grades in philosophy courses, excluding the PHL 498 / PHL 499 ; (4) receive a grade of "A" or "A-" on their thesis; (5) publicly defend the thesis; and (6) be voted honors by a committee of three faculty members appointed by the department or, in the case of an ID major, by the Departments. In addition, the candidate must satisfy all College-wide requirements for honors or ID honors.

In satisfying departmental honors requirements, PHL 498 or PHL 499 does not count towards the total number of advanced courses (≥ 400 level) you need to take to fulfill your philosophy major, but both courses do count towards the number of intermediate level courses (≥ 200 level) that you need to take.

Course Selection Guidelines

Course Numbering: While our course numbers reveal levels of difficulty (so that 100-level courses are introductory, 200-level and 300-level courses are intermediate, and 400-level courses are advanced), philosophy courses afford great flexibility. In other words, students, including non-majors, can sometimes take courses at the 200 and 300-level, even if they have not taken an introductory in philosophy. Please contact the professor offering any given course for further information and advice.

Senior Writing Requirement: Students who take Departmental Honors and ID majors who are required to write a senior thesis by their other major Department will satisfy this requirement by writing a senior thesis. All other students will in PHL 408 / PHL 418 significantly develop a paper that they have written.

All students are strongly advised to consult the advising information on the Philosophy Department's Website.

Introductory Courses

Introductory Courses, whether issues-oriented or historically-oriented, do not presuppose any prior acquaintance with philosophy. They may be taken in any order. For more advising information, consult the Philosophy Department website.

Intermediate Courses

Intermediate Courses do not presuppose any prior acquaintance with philosophy. They may be taken in any order; and are pitched at a level that is more appropriate for second and higher year students than for first year students. However, in some cases an order for taking intermediate courses is recommended (for this and other advising information, consult the Philosophy Department website).

Advanced Courses

Advanced courses may be taken in any order, although in some cases certain orders will be recommended. Unlike Introductory and Intermediate courses, most advanced courses presuppose that the student has already taken at least two philosophy courses. Although first and second year students will be allowed to take advanced courses, these courses are pitched at a level that is more appropriate for third and fourth year students. For more advising information, consult <https://www.union.edu/academic/majors-minors/philosophy/>

Philosophy (ID), B.A.

Requirements for the Interdepartmental Major:

Eight courses in philosophy, of which two should be numbered 100-level or above, three should be numbered 200-level or above, one should be numbered 300-level or above and two should be numbered 400-level (including PHL 408 / PHL 418).

Two courses in the history of philosophy must be taken. Two courses that are thematic (H, L, M&E, EVT) must be taken.

Thesis is required only for those seeking honors - PHL 497 or PHL 498 and PHL 499 .

The eight required courses include:

Two courses in the history of philosophy (H):

- PHL 245 - Buddhist Ethics
- PHL 251 - (150) Introduction to Ancient Greek Philosophy
- PHL 311 - (244) Plato's Republic
- PHL 338 - Zen and Tibetan Buddhism
- PHL 341 - The Contemporary Crisis of Truth
- PHL 342 - Aristotle
- PHL 388 - (288) Skepticism East and West
- PHL 450 - Seminar in the History of Philosophy

One course in logic (L):

- PHL 125 - Introduction to Logic and Critical Thinking
- PHL 231 - Symbolic Logic
- PHL 447 - Advanced Logic

At least one course in Metaphysics and Epistemology (M&E):

- PHL 232 - Philosophy of Science
- PHL 261 - Philosophy of Religion
- PHL 265 - Minds and Machines
- PHL 266 - Philosophy in Literature
- PHL 341 - The Contemporary Crisis of Truth

- PHL 359 - Postmodernism
- PHL 365 - Philosophy of Mind
- PHL 388 - (288) Skepticism East and West
- PHL 445 - Seminar in Metaphysics
- PHL 446 - Seminar in Epistemology

At least one course in Ethics & Value (EVT):

- PHL 105 - Introduction to Ethics
- PHL 110 - Moral Problems
- PHL 123 - Values and Economic Justice
- PHL 180 - Theories of the Good Life
- PHL 205 - Relativism
- PHL 237 - Introduction to Political Philosophy
- PHL 245 - Buddhist Ethics
- PHL 246 - Art, Media, and Society
- PHL 248 - Philosophy and Current Affairs
- PHL 250 - Ethical Theory
- PHL 255 - On War and Killing
- PHL 262 - Problem of Evil
- PHL 263 - Philosophy of Gender and Race
- PHL 274 - (174) Biomedical Ethics
- PHL 297 - The Ethics of Forgiveness and Revenge
- PHL 344 - Advanced Political Philosophy
- PHL 374 - Advanced Biomedical Ethics
- PHL 376 - (476) Philosophy of Law/Jurisprudence
- PHL 448 - Seminar in Ethics or Value Theory

Additional Requirements

- PHL 408 - New Directions in Philosophy
- PHL 418 - New Directions in Philosophy

Requirements for Honors in Philosophy:

To be eligible for departmental honors, the candidate must (1) complete all requirements for a major in Philosophy, or for an ID major in Philosophy and another discipline; (2) have a minimum grade point average of 3.50 in philosophy; (3) have received at least three "A" or "A-" grades in philosophy courses, excluding the PHL 498 / PHL 499 ; (4) receive a grade of "A" or "A-" on their thesis; (5) publicly defend the thesis; and (6) be voted honors by a committee of three faculty members appointed by the department or, in the case of an ID major, by the Departments. In addition, the candidate must satisfy all College-wide requirements for honors or ID honors.

In satisfying departmental honors requirements, PHL 498 or PHL 499 does not count towards the total number of advanced courses (≥ 400 level) you need to take to fulfill your philosophy major, but both courses do count towards the number of intermediate level courses (≥ 200 level) that you need to take.

Course Selection Guidelines

Course Numbering: While our course numbers reveal levels of difficulty (so that 100-level courses are introductory, 200-level and 300-level courses are intermediate, and 400-level courses are advanced), philosophy courses afford great flexibility. In other words, students, including non-majors, can sometimes take courses at the 200 and 300-level, even if they have not taken an introductory in philosophy. Please contact the professor offering any given course for further information and advice.

Senior Writing Requirement: Students who take Departmental Honors and ID majors who are required to write a senior thesis by their other major Department will satisfy this requirement by writing a senior thesis. All other students will in PHL 408 / PHL 418 significantly develop a paper that they have written.

All students are strongly advised to consult the advising information on the Philosophy Department's Website.

Introductory Courses

Introductory Courses, whether issues-oriented or historically-oriented, do not presuppose any prior acquaintance with philosophy. They may be taken in any order. For more advising information, consult the Philosophy Department website.

Intermediate Courses

Intermediate Courses do not presuppose any prior acquaintance with philosophy. They may be taken in any order; and are pitched at a level that is more appropriate for second and higher year students than for first year students. However, in some cases an order for taking intermediate courses is recommended (for this and other advising information, consult the Philosophy Department website).

Advanced Courses

Advanced courses may be taken in any order, although in some cases certain orders will be recommended. Unlike Introductory and Intermediate courses, most advanced courses presuppose that the student has already taken at least two philosophy courses. Although first and second year students will be allowed to take advanced courses, these courses are pitched at a level that is more appropriate for third and fourth year students. For more advising information, consult <https://www.union.edu/academic/majors-minors/philosophy/>

Philosophy Minor

Requirements for the Minor:

Six courses in philosophy, of which two should be numbered 100-level or above, three should be numbered 200-level or above, one should be numbered 300-level or above. At least one course must be in the history of philosophy and two must be thematic (EVT, M&E, H, L). PHL 408/418 may be taken by permission only. The six courses should include:

One course in the History (H):

i.e., one of the following:

- PHL 155 - Seventeenth and Eighteenth Century European Philosophy
- PHL 160 - Nineteenth and Twentieth Century Philosophy
- PHL 167 - Chinese Philosophy
- PHL 216 - (166) Introduction to Indian Philosophy
- PHL 245 - Buddhist Ethics
- PHL 251 - (150) Introduction to Ancient Greek Philosophy
- PHL 338 - Zen and Tibetan Buddhism
- PHL 341 - The Contemporary Crisis of Truth
- PHL 450 - Seminar in the History of Philosophy

And one course in Logic (L):

- PHL 125 - Introduction to Logic and Critical Thinking
- PHL 231 - Symbolic Logic
- PHL 447 - Advanced Logic

At least one course in Metaphysics and Epistemology (M&E):

- PHL 232 - Philosophy of Science
- PHL 261 - Philosophy of Religion
- PHL 265 - Minds and Machines
- PHL 266 - Philosophy in Literature
- PHL 341 - The Contemporary Crisis of Truth
- PHL 359 - Postmodernism
- PHL 365 - Philosophy of Mind
- PHL 445 - Seminar in Metaphysics
- PHL 446 - Seminar in Epistemology

At least one course in Ethics & Value (EVT):

- PHL 105 - Introduction to Ethics
- PHL 110 - Moral Problems
- PHL 123 - Values and Economic Justice
- PHL 180 - Theories of the Good Life
- PHL 205 - Relativism
- PHL 237 - Introduction to Political Philosophy
- PHL 245 - Buddhist Ethics
- PHL 246 - Art, Media, and Society
- PHL 248 - Philosophy and Current Affairs
- PHL 250 - Ethical Theory
- PHL 255 - On War and Killing
- PHL 262 - Problem of Evil
- PHL 263 - Philosophy of Gender and Race
- PHL 274 - (174) Biomedical Ethics
- PHL 297 - The Ethics of Forgiveness and Revenge
- PHL 344 - Advanced Political Philosophy
- PHL 374 - Advanced Biomedical Ethics
- PHL 376 - (476) Philosophy of Law/Jurisprudence
- PHL 448 - Seminar in Ethics or Value Theory

Physics

Chair: Associate Professor S. Amanuel

Faculty: Professors R. Koopmann, S. Maleki, M. Vineyard (on Leave, Fall); Associate Professor C. Orzel, N. Mann, H. Watson; Assistant Professor C. Bores Quijano; Senior Lecturer S. LaBrake, J. Marr, F. Wilkin; Visiting Assistant Professor C. Gleason

Staff: J. Sheehan (Technician), L. Stec (Administrative Assistant)

The Physics and Astronomy Department offers a bachelor of science degree in Physics as well as minors in Astronomy, Astrophysics, and Physics. Example 4-year schedules are available on the Department of Physics & Astronomy website. The Physics and Astronomy Department offers a bachelor of science degree in Physics as well as minors in Astronomy, Astrophysics, and Physics.

Common Curriculum (CC) Courses

Courses numbered in the 050's are designed particularly for non-science majors seeking to satisfy Common Curriculum requirements, and all of these courses carry Common Curriculum credit. These courses may count toward the major in astronomy or the interdepartmental major (see requirements for the Astronomy major and Astronomy ID major), but they may not be counted toward the major in physics or toward any other science or engineering major.

Course Selection Guidelines

Placement: Students who score a grade of 4 or 5 on the Advanced Placement C-exam (mechanics and/or electromagnetics), an A on the physics A-levels, a 5 or above on the Higher Level or a 6 or above on the standard exam of the International Baccalaureate (provided they earn the IB diploma), may be given credit for up to a maximum of two courses (PHY 120 and/or PHY 121). If a student does not earn the IB diploma, they will be given credit only if they pass the higher level exam with a grade of 6 or above. Students who score a grade of 4 or 5 on both the Physics 1 and Physics 2 AP exams will earn one SET credit in Physics.

Courses Suitable for Non-Majors: The following courses are designed to fulfill the Science and Technology Common Curriculum requirement (some of these courses have labs and some do not): AST 050 , AST 051 , AST 052 , and AST 058 . Life-science students should take PHY 110 -PHY 111 . Engineering and physical-science students should take PHY 120 -PHY 121 . Other courses suitable for selected non-majors include AST 150 (105), AST 200 , AST 210 , AST 220 , AST 230 , AST 240 , PHY 122 , PHY 123 , PHY 200 and PHY 210 .

Prerequisites: There are no placement test requirements for courses in the Department of Physics and Astronomy. All courses numbered above 100 have prerequisites. Please review the course descriptions to identify the requirements.

Physics, B.S.

Requirements for the Physics Major:

Ten required courses in physics:

- PHY 120 - Matter in Motion
- PHY 121 - Principles of Electromagnetics
- PHY 122 - Relativity, Quantum, and Their Applications
- PHY 123 - Heat and Light
- PHY 220 - Relativity and Introduction to Quantum Mechanics
- PHY 230 - Intermediate Classical Mechanics
- PHY 270 - Intermediate Electromagnetism
- PHY 300 - Methods of Modern Experimental Physics
- PHY 310 - Advanced Topics in Physics 1
- **or**
- PHY 311 - Advanced Topics in Physics 2

Physics 010 Requirement

A passing grade in PHY 010 (zero credit) is required for all students completing their WS requirement.

Including the WS requirement

Physics majors may fulfill the WS requirement through a one-term (PHY 493) thesis or literature review project, through a two-term senior thesis (PHY 490 and PHY 491), through thesis research in another department (if a double major or ID major), or through an additional writing component added to an upper-level course (with permission of the instructor and the Department).

Two Term Thesis Option:

- PHY 490 - Physics Two-Term Senior Thesis 1
- PHY 491 - Physics Two-Term Senior Thesis 2

One Term Thesis Option:

- PHY 493 - Physics Senior Writing Project

Additional Requirements

- MTH 115 - Calculus 3: Differential Vector Calculus and Matrix Theory

and

- MTH 117 - Calculus 4: Integral Vector Calculus
and
- Two other electives selected from any science, engineering, or computer science courses numbered 100 or above; at least one of which must be taken outside of the department.
and
- Students are expected to attend the weekly departmental colloquium series to gain an appreciation for current research in physics and related areas.

Curriculum for those attending graduate school:

For those students wishing to consider graduate work in physics or a closely related discipline (e.g., astronomy, materials science, applied physics), the department advises the following curriculum:

Physics

- PHY 120 - Matter in Motion
- PHY 121 - Principles of Electromagnetics
- PHY 122 - Relativity, Quantum, and Their Applications
- PHY 123 - Heat and Light
- PHY 220 - Relativity and Introduction to Quantum Mechanics
- PHY 230 - Intermediate Classical Mechanics
- PHY 270 - Intermediate Electromagnetism
- PHY 300 - Methods of Modern Experimental Physics
- PHY 310 - Advanced Topics in Physics 1
- PHY 311 - Advanced Topics in Physics 2
- PHY 350 - Advanced Quantum Mechanics
- PHY 490 - Physics Two-Term Senior Thesis 1
- PHY 491 - Physics Two-Term Senior Thesis 2

Math

- MTH 115 - Calculus 3: Differential Vector Calculus and Matrix Theory
- MTH 117 - Calculus 4: Integral Vector Calculus
and
- MTH 130 - Ordinary Differential Equations

Students considering graduate school are also strongly encouraged to take electives from the following:

- PHY 200 - Molecular Biophysics
- PHY 210 - The Physics of Modern Medicine: Applications in Imaging, Surgery and Therapy
- PHY 312 - Advanced Topics in Physics 3

Astronomy

- AST 200 - Stellar Structure and Evolution
- AST 210 - Galaxies
- AST 220 - Cosmology and General Relativity
- AST 230 - Observational Astronomy
- AST 240 - Radio Astronomy

Computer Science

- Any 100-level course

Math

- MTH 127 - Numerical Methods
- MTH 140 - Applied Linear Algebra

Electrical and Computer Engineering

- ECE 225 - Electric Circuits

Possible Substitution Courses

For students interested in pursuing careers that do not require graduate work in physics, some substitutions of courses in engineering will be considered by the department. Students must request formal approval from the Department of Physics and Astronomy for any such substitution. Examples include:

- MER 212 - Dynamics
for
- PHY 230 - Intermediate Classical Mechanics

- ECE 343 - Introduction to Electromagnetic Engineering
for
- PHY 270 - Intermediate Electromagnetism

Requirements for Honors in Physics and Astronomy:

In addition to the requirements for the major, the student must take PHY 491 , submit an honors thesis, and satisfy College requirements for departmental honors.

Requirements for the Leadership in Medicine Program:

Students in the Leadership in Medicine program whose science emphasis is in physics should take the following seven courses: PHY 110 , PHY 111 (both already core courses), PHY 122 , PHY 123 , PHY 200 , PHY 210 , and one additional course from PHY 220 , PHY 230 , PHY 270 , PHY 310 , or PHY 311 in consultation with their physics adviser.

Physics (ID), B.S.

Requirements for the Interdepartmental Major:

Students taking physics or astronomy as part of an 8-6 interdepartmental major program can choose from either a conceptual or a calculus track. Suitable choices of courses numbered in the 50s, as well as independent study courses 495-498, can count toward the *conceptual track* ID major (such as Arts and Astronomy or History of Astronomy). Suitable choices of courses numbered 100 or greater can count toward a *calculus track* ID major (such as Astrobiology or Geophysics). For any of these ID majors, a written proposal must be submitted by the student, in consultation with their faculty advisor, for approval by the Department of Physics and Astronomy.

Requirements for the Leadership in Medicine Program:

Students in the Leadership in Medicine program whose science emphasis is in physics should take the following seven courses: PHY 110 , PHY 111 (both already core courses), PHY 122 , PHY 123 , PHY 200 , PHY 210 , and one additional course from PHY 220 , PHY 230 , PHY 270 , PHY 310 , or PHY 311 in consultation with their physics adviser.

Physics Minor

Requirements for the Minor:

The Department of Physics and Astronomy offers academic minors in physics, astronomy, and astrophysics.

Students wishing to minor in physics should take:

- PHY 120 - Matter in Motion
- PHY 121 - Principles of Electromagnetics
- PHY 122 - Relativity, Quantum, and Their Applications

And three other PHY courses at 100-level or higher in consultation with the Department.

If a life science student:

- PHY 110 - Physics for the Life Sciences 1
- PHY 111 - Physics for the Life Sciences 2
- PHY 200 - Molecular Biophysics
- PHY 210 - The Physics of Modern Medicine: Applications in Imaging, Surgery and Therapy
- And two other PHY courses at 100-level or higher in consultation with the Department

Political Science

Chair: Professor B. Hays

Faculty: Professors M. Angrist, C. Brown, R. Hislope, L. Marso, Z. Oxley, G. Seri (on leave, Spring); Associate Professors C. Cidam, M. Dallas (on leave, 2021-22 academic year), B. Hays, Senior Lecturer T. Lobe; Visiting Assistant Professors, S. Ahmed, S. Wiest.

The Political Science Department helps build within students the knowledge, skills, and desire to be lifelong public and global citizens. Students are challenged to think critically about their beliefs and understandings of the world around them, while developing the language, analytical and writing skills necessary for them to present these ideas effectively to others. Beyond the classroom we hope to provide students with the inspiration and opportunities to engage with politics in its multiple forms and locations. We offer instruction in the four traditional subfields of the discipline of Political Science: Political Theory, Comparative Politics, International Politics, and United States Politics.

For a listing of all the Political Science courses broken down by category, please go to Course Listing and select the Prefix PSC.

Political Science, B.A.

Requirements for the Major:

Twelve courses in the department.

- PSC 111 - Introduction to US Politics
or
- PSC 112 - Introduction to Global Politics
and

- PSC 113 - Introduction to Political Thought
- PSC 498 - Political Science Senior Thesis 1
- PSC 499 - Political Science Senior Thesis 2

Of the twelve, no more than two may be internship courses (i.e. PSC 277, PSC 280T).

Eight non-specified courses:

Note: at least three of the four major areas of the discipline must be covered

Political Theory:

- PSC 230 - Ancient Political Thought
- PSC 231 - Theories of Peace and War
- PSC 232 - Violence and Politics
- PSC 233 - Intellectuals and Politics
- PSC 234 - Women Political Theorists
- PSC 235 - African American Political Thought
- PSC 236 - Police, Security and Biopower
- PSC 237 - Music and Politics
- PSC 239 - American Political Thought To World War I
- PSC 330 - Enlightenment and Its Discontents
- PSC 333 - Twenty-First Century American Political Thought
- PSC 334 - Contemporary Continental Theory
- PSC 339 - Seminar: Political Theory
- PSC 434 - Feminist Film

Comparative Politics:

- PSC 201T - Cambodia Study Abroad: Crossing Cultures
- PSC 213 - Contemporary China: Politics, Economy and Society
- PSC 216 - Politics in Africa
- PSC 240 - Comparative Ethnic and Racial Politics
- PSC 243 - Latin American Politics
- PSC 245 - Populisms in Latin America & Beyond
- PSC 246 - Asian Development: Industrialization Beyond the West
- PSC 247 - Human (In) Security in a Comparative Perspective
- PSC 248 - The Politics of the New Europe
- PSC 249 - Middle East Politics
- PSC 340 - Politics and Film
- PSC 341 - Genocide
- PSC 342 - Challenges to Democratization in Latin America
- PSC 343 - Women and Politics in the Muslim World
- PSC 346 - Technologies in Society: Power, Politics and Economy across Industrial Revolutions
- PSC 347 - Comparative Left Politics
- PSC 349 - Seminar: Comparative Politics

International Politics:

- PSC 251 - American Foreign Policy
- PSC 252 - Global Value Chains

- PSC 253 - International Relations of East Asia
- PSC 254 - Politics of the Arab-Israeli Conflict
- PSC 256 - Model United Nations
- PSC 258 - Strategies of WWII
- PSC 350 - Theories of International Politics
- PSC 351 - Global Organized Crime
- PSC 352 - International Organizations
- PSC 353 - Terrorism and Torture
- PSC 354 - Human Rights and Immigration
- PSC 355 - Defense Policy
- PSC 358 - Wealth and Power Among Nations
- PSC 359 - Seminar: International Politics

United States Politics:

- PSC 160 - Presidential Elections
- PSC 260 - Policy Making and American Society
- PSC 261 - Public Opinion
- PSC 264 - Congressional Politics
- PSC 266 - Women and Politics
- PSC 268 - Electoral Politics
- PSC 269 - Media and Politics
- PSC 270 - CIA and the Art of Intelligence
- PSC 272 - The Environment, Energy, and US Politics
- PSC 273 - The Supreme Court and Judicial Politics
- PSC 277 - Capital Region Political Internships
- PSC 280T - Washington, DC Internship Program
- PSC 281 - Issues in American Education
- PSC 282 - Health Politics and Policy
- PSC 283 - Social Movements, the Environment and Society
- PSC 284 - Political Sociology
- PSC 286 - The Modern Presidency
- PSC 287 - The Contemporary Presidency
- PSC 288 - American Constitutional Theory
- PSC 289T - New Hampshire Primary Mini-Term
- PSC 361 - Political Psychology
- PSC 364 - Law and Film
- PSC 365 - Law, Society, and the Wire
- PSC 369 - Seminar: US Politics
- PSC 370 - Constitutional Law
- PSC 371 - Civil Rights and Civil Liberties

Within the eight non-specified courses, beginning with the Class of 2021, two must be at the 300-level.

All students must take at least one "R" course.

Note: The presence of the "R" designation next to a course number in the registration materials (i.e., PSC 272R) denotes that the course will have a major research assignment as a central component of the course.

Students must take an additional "R" course, a seminar, or a research methods course:

Seminars:

- PSC 339 - Seminar: Political Theory
- PSC 349 - Seminar: Comparative Politics
- PSC 359 - Seminar: International Politics
- PSC 369 - Seminar: US Politics

Research methods:

- PSC 220 - Social Data Analysis
- PSC 223 - Critical Comparisons in Politics
- **Note:** Students may request from the political science chair that a research methods course in another department qualify as a methods course for satisfying the requirement

Note:

Both research courses should be taken by the end of the student's junior year as preparation for the senior project (PSC 498 and PSC 499). Students are welcome and encouraged to take more than two research courses; these are simply minimum requirements. Normally, a GPA of 3.0 is required to gain admittance to a seminar.

Two courses in any of the other social sciences (Economics, History, Sociology, and Anthropology) and/or Psychology and Philosophy.

A Foreign Experience Requirement.

Note:

The primary option to fulfill the foreign experience requirement will be the completion of a three-course language sequence. If students begin their language sequence beyond the introductory course, only two language courses are required. We recommend that all political science students begin a language track early in their academic career and do not wait until senior year.

The foreign experience requirement can also be completed by going on a full-length term abroad (mini-terms will not fulfill this requirement). We strongly advise students not to count on acceptance into a term abroad program, as they have highly competitive application processes. If students make the decision not to start a language early and are not admitted to a full-length term abroad, they will not be guaranteed the language of their choice if they must fulfill the language requirement in their senior year. If accepted into the Term in Washington, D.C. program, foreign students (on an F-1 or J-1 visa) can count that term, assuming all three courses are passed, as their foreign experience requirement.

Alternatively, a student may petition the department chair with a proposal that includes a Union mini-term abroad or other organized foreign experience of at least three weeks' length, plus two associated Union courses. These three components must demonstrate regional or thematic coherence. Normally, only one component can be in process or complete at the time of the proposal's submission. Foreign students may submit a proposal that features a domestic mini-term plus two associated courses. For more information on this option, please refer to the guidelines and proposal form, which are posted on the FAQ section of the Political Science Department's website. The department chair makes the final determination regarding proposal approval.

Requirements for Honors in Political Science:

To receive departmental honors the student must fulfill the following requirements: (1) a minimum index of 3.50 in political science; (2) completion of a political science seminar with a grade of "A minus" or better; (3) a grade of "A minus" or higher on the senior project, and (4) delivery of an oral presentation of the senior project research at the Steinmetz Symposium unless exceptional circumstances warrant an alternative forum. Students who do not attain an A minus or better grade in the seminar may still be eligible for honors if their departmental grade point average is 3.70 or higher. In addition the student must satisfy College requirements for departmental honors, which are described in the Academic Policies section of this catalog. **Note:** Students must take a seminar to qualify for honors.

Course Selection Guidelines

Placement: Students who received a score of 4 or 5 on the Advanced Placement exam for U.S. Government and Politics may earn credit for PSC 111. Students who earned a 4 or 5 on the Comparative Government and Politics Advanced Placement exam may earn one unspecified political science course credit. Credits earned from Advanced Placement exams can count toward the Political Science major or minor.

Course Numbering: These guidelines are offered so that students may make informed choices in the selection of courses appropriate to their level of education. 200-level political science courses are oriented towards a wide student audience from across the College whereas 300-level courses are focused more on advanced political science issues and therefore are more appropriate for upper-class political science majors as well as interested juniors and seniors from other majors. For subfield-specific descriptions of 200 and 300-level courses, please go to Course Listings and select the Prefix PSC.

It is important for students to know that 200-level courses are not "easier" than 300-level courses in terms of reading load, course assignments, or the amount of work and effort expected of students. That said, as a general rule, 300-level courses will be more theoretically and/or conceptually dense. Non-majors are welcome, but should understand that such courses typically will demand that students embrace key theories, concepts, frameworks, and/or methods in the discipline.

Political Science (ID), B.A.

Requirements for the Interdepartmental Major:

Eight courses in the department, including:

- PSC 111 - Introduction to US Politics
or
- PSC 112 - Introduction to Global Politics
and
- PSC 113 - Introduction to Political Thought
- IDM 498 - Interdepartmental Senior Thesis 1
- IDM 499 - Interdepartmental Senior Thesis 2

Note: The senior thesis is a two-term project, one term of which counts toward the Political Science portion of the ID major. The Department of Political Science requires its ID majors to choose a senior thesis topic that incorporates elements of both disciplines, and to seek out appropriate guidance regarding the contributions of the second discipline to the project.

Internship courses, such as PSC 277 and PSC 280T, may not be counted toward the eight courses required for the interdepartmental major.

*Beginning with the Class of 2021, at least one 300-level course.

At least one "R" course to fulfill the research requirement.

A Foreign Experience Requirement.

Note: The primary option to fulfill the foreign experience requirement will be the completion of a three-course language sequence. If students begin their language sequence beyond the introductory course, only two language courses are required. We recommend that all political science students begin a language track early in their academic career and do not wait until senior year.

The foreign experience requirement can also be completed by going on a full-length term abroad (mini-terms will not fulfill this requirement). We strongly advise students not to count on acceptance into a term abroad program, as they have highly competitive application processes. If students make the decision not to start a language early and are not admitted to a full-length term abroad, they will not be guaranteed the language of their choice if they must fulfill the language requirement in their senior year. If accepted into the Term in Washington, D.C. program, foreign students (on an F-1 or J-1 visa) can count that term, assuming all three courses are passed, as their foreign experience requirement.

Alternatively, a student may petition the department chair with a proposal that includes a Union mini-term abroad or other organized foreign experience of at least three weeks' length, plus two associated Union courses. These three components must demonstrate regional or thematic coherence. Normally, only one component can be in process or complete at the time of the proposal's submission. Foreign students may submit a proposal that features a domestic mini-term plus two associated courses. For more information on this option, please refer to the guidelines and

proposal form, which are posted on the FAQ section of the Political Science Department's website. The department chair makes the final determination regarding proposal approval.

Requirements for Honors in Political Science:

To receive departmental honors the student must fulfill the following requirements: (1) a minimum index of 3.50 in political science; (2) completion of a political science seminar with a grade of "A minus" or better; (3) a grade of "A minus" or higher on the senior project, and (4) delivery of an oral presentation of the senior project research at the Steinmetz Symposium unless exceptional circumstances warrant an alternative forum. Students who do not attain an A minus or better grade in the seminar may still be eligible for honors if their departmental grade point average is 3.70 or higher. In addition the student must satisfy College requirements for departmental honors, which are described in the Academic Policies section of this catalog.

Note: Students must take a seminar to qualify for honors.

Course Selection Guidelines

Placement: Students who received a score of 4 or 5 on the Advanced Placement exam for U.S. Government and Politics may earn credit for PSC 111. Students who earned a 4 or 5 on the Comparative Government and Politics Advanced Placement exam may earn one unspecified political science course credit. Credits earned from Advanced Placement exams can count toward the Political Science major or minor.

Course Numbering: These guidelines are offered so that students may make informed choices in the selection of courses appropriate to their level of education. 200-level political science courses are oriented towards a wide student audience from across the College whereas 300-level courses are focused more on advanced political science issues and therefore are more appropriate for upper-class political science majors as well as interested juniors and seniors from other majors. For subfield-specific descriptions of 200 and 300-level courses, please go to Course Listings and select the Prefix PSC.

It is important for students to know that 200-level courses are not "easier" than 300-level courses in terms of reading load, course assignments, or the amount of work and effort expected of students. That said, as a general rule, 300-level courses will be more theoretically and/or conceptually dense. Non-majors are welcome, but should understand that such courses typically will demand that students embrace key theories, concepts, frameworks, and/or methods in the discipline.

Political Science Minor

Requirements for the Minor:

Six courses including:

Note: No internships or independent studies may be counted toward the minor without approval of the Chair.

- PSC 111 - Introduction to US Politics
or
- PSC 112 - Introduction to Global Politics
and
- PSC 113 - Introduction to Political Thought

Of the four remaining courses, at least three upper-level courses must all be drawn from one of the following four sub-fields:

Political Theory:

- PSC 230 - Ancient Political Thought
- PSC 231 - Theories of Peace and War
- PSC 232 - Violence and Politics
- PSC 233 - Intellectuals and Politics

- PSC 234 - Women Political Theorists
- PSC 235 - African American Political Thought
- PSC 236 - Police, Security and Biopower
- PSC 237 - Music and Politics
- PSC 239 - American Political Thought To World War I
- PSC 330 - Enlightenment and Its Discontents
- PSC 333 - Twenty-First Century American Political Thought
- PSC 334 - Contemporary Continental Theory
- PSC 339 - Seminar: Political Theory
- PSC 434 - Feminist Film

Comparative Politics:

- PSC 201T - Cambodia Study Abroad: Crossing Cultures
- PSC 213 - Contemporary China: Politics, Economy and Society
- PSC 216 - Politics in Africa
- PSC 240 - Comparative Ethnic and Racial Politics
- PSC 243 - Latin American Politics
- PSC 245 - Populisms in Latin America & Beyond
- PSC 246 - Asian Development: Industrialization Beyond the West
- PSC 247 - Human (In) Security in a Comparative Perspective
- PSC 248 - The Politics of the New Europe
- PSC 249 - Middle East Politics
- PSC 340 - Politics and Film
- PSC 341 - Genocide
- PSC 342 - Challenges to Democratization in Latin America
- PSC 343 - Women and Politics in the Muslim World
- PSC 347 - Comparative Left Politics
- PSC 349 - Seminar: Comparative Politics
- PSC 346 - Technologies in Society: Power, Politics and Economy across Industrial Revolutions

International Politics:

- PSC 251 - American Foreign Policy
- PSC 252 - Global Value Chains
- PSC 253 - International Relations of East Asia
- PSC 254 - Politics of the Arab-Israeli Conflict
- PSC 256 - Model United Nations
- PSC 258 - Strategies of WWII
- PSC 350 - Theories of International Politics
- PSC 351 - Global Organized Crime
- PSC 352 - International Organizations
- PSC 353 - Terrorism and Torture
- PSC 354 - Human Rights and Immigration
- PSC 355 - Defense Policy
- PSC 358 - Wealth and Power Among Nations
- PSC 359 - Seminar: International Politics

United States Politics:

- PSC 160 - Presidential Elections

- PSC 260 - Policy Making and American Society
- PSC 261 - Public Opinion
- PSC 264 - Congressional Politics
- PSC 266 - Women and Politics
- PSC 268 - Electoral Politics
- PSC 269 - Media and Politics
- PSC 270 - CIA and the Art of Intelligence
- PSC 272 - The Environment, Energy, and US Politics
- PSC 273 - The Supreme Court and Judicial Politics
- PSC 277 - Capital Region Political Internships
- PSC 280T - Washington, DC Internship Program
- PSC 281 - Issues in American Education
- PSC 282 - Health Politics and Policy
- PSC 283 - Social Movements, the Environment and Society
- PSC 284 - Political Sociology
- PSC 286 - The Modern Presidency
- PSC 287 - The Contemporary Presidency
- PSC 288 - American Constitutional Theory
- PSC 289T - New Hampshire Primary Mini-Term
- PSC 361 - Political Psychology
- PSC 364 - Law and Film
- PSC 365 - Law, Society, and the Wire
- PSC 369 - Seminar: US Politics
- PSC 370 - Constitutional Law
- PSC 371 - Civil Rights and Civil Liberties
- **Note:** If you are at all unclear regarding which sub-field a course counts towards, please contact the Chair

Psychology

Chair: Professor G. Bizer

Faculty: Professors C. Anderson-Hanley, G. Bizer, D. Burns, K. DeBono, J. Hart, L. Stanhope, C. Weisse; Associate Professor S. Romero; Assistant Professors C. Rogers, D.C. Walker; Visiting Assistant Professors Z. Buchin, T. George, J. Malatras, C. O'Dea

Staff: C. Mennillo (Administrative Assistant)

Course Selection Guidelines

Common Curriculum (CC): In the Common Curriculum, all psychology courses count as if they are courses in the Division of the Social Sciences, except for PSY 210, PSY 212, PSY 310, PSY 313 and PSY 410, which can be counted toward the Common Curriculum science requirement. PSY 200 does not count toward the Quantitative Methods Requirement (QMR).

Courses Suitable for Non-majors. All psychology courses are suitable for non-majors who have taken the prerequisite courses, with the exception of PSY 200 and PSY 300, the required methods courses for the major.

For Neuroscience Majors and Minors only, BIO 103 and BIO 104 may be substituted for PSY 100 as the prerequisite for PSY 210. Upon completion of PSY 210, neuroscience students may take other Psychology courses without first completing PSY 100.

Course Numbering: Psychology 100 or permission of the instructor is a prerequisite for all other psychology courses unless otherwise noted. 200-level courses typically treat basic topics and are appropriate to take with only PSY 100 as background. Courses that are cross-listed with other departments may have additional prerequisites. Most 300- and 400-level courses have PSY 300 as a prerequisite; these courses are appropriate for students in any class year, and for majors or non-majors, as long as they have fulfilled the prerequisites.

Seminars: Some seminars (e.g., PSY 410, PSY 420, PSY 430, PSY 433, PSY 440, PSY 450) may offer different topics in different terms. These may be taken more than once for credit, with the permission of the instructor.

Psychology, B.S.

Requirements for the Major:

The following major requirements apply to students in the class of 2024 and onward, until further notice.

1. Three Foundational Courses

- PSY 100 - Introduction to Psychology
- PSY 200 - Statistical Methods in Psychology
- PSY 300 - Research Methods in Psychology
- **Note:** It is important that, if at all possible, students complete PSY 300 by the junior year.

2. Area Course Requirement

At least one Area Course from each of the following four content areas. Additional courses from each Area may serve as Free Electives:

Area 1:

- PSY 210 - Neuroscience: Mind & Behavior
- PSY 212 - Neurobiology
- PSY 213 - Clinical Neuropsychology

Area 2:

- PSY 220 - Attention and Memory
- PSY 225 - The Psychology of Language

Area 3:

- PSY 230 - Social Psychology
- PSY 240 - Developmental Psychology

Area 4:

- PSY 250 - Clinical Psychology 1: Disorders
- PSY 251 - Personality

3. Laboratory Course Requirement:

One Laboratory Course from the following. Additional Laboratory Courses may serve as Upper-Level Electives or as Free Electives.

- PSY 310 - Cognitive Neuroscience
- PSY 313 - Sensation and Perception
- PSY 330 - Advanced Personality and Social Psychology
- PSY 351 - Clinical Psychology 2: Interventions

4. Seminar Requirement

One Seminar Course from the following. Additional Seminar Courses may serve as Upper-Level Electives or as Free Electives.

- PSY 410 - Seminar in Brain and Behavior
- PSY 411 - Seminar in Clinical Neuropsychology
- PSY 420 - Seminar in Cognitive Psychology
- PSY 430 - Seminar in Social Psychology
- PSY 431 - Seminar in Psychology of Religion
- PSY 432 - Seminar in Love and Death
- PSY 433 - Seminar in Psychology of Sports
- PSY 440 - Seminar in Human Development
- PSY 441 - Seminar in Adolescence
- PSY 450 - Seminar in Clinical Psychology

5. Upper-Level Elective

One additional course numbered PSY 310 through PSY 451. This requirement may be satisfied by completing an additional Lab Course, an additional Seminar Course, or any course with an appropriate course number.

Note that **this requirement applies to the Classes of 2024, 2025, and later**. It does not apply to the Classes of 2022 and 2023; these students will complete three free electives from any level.

6. Two Free Electives

Any two additional psychology courses.

Note that majors in the classes of 2024, 2025, and beyond may not use cognate courses to satisfy psychology requirements as specified in previous catalogs.

7. Senior Writing Requirement:

Students may fulfill the College's senior writing requirement in psychology in one of three ways: (1) by completing a thesis; (2) by completing a seminar (400-level) course designated WS in the senior year (this course must be in addition to any other seminar used to fulfill the basic WAC requirements); or (3) by completing a one- or two-term senior project. Any seminar which fulfills the Senior Writing Requirement also counts toward the requirement of one Seminar Course (see above).

Requirements for Honors in Psychology:

In addition to meeting College-wide requirements, honors in psychology requires:

1. A psychology grade point average of 3.40 or higher

2. Three grades of "A" or "A minus" in psychology "core" courses, which include:

- PSY 200 - Statistical Methods in Psychology
- PSY 210 - Neuroscience: Mind & Behavior
- PSY 212 - Neurobiology
- PSY 213 - Clinical Neuropsychology
- PSY 220 - Attention and Memory
- PSY 225 - The Psychology of Language

- PSY 230 - Social Psychology
- PSY 240 - Developmental Psychology
- PSY 250 - Clinical Psychology 1: Disorders
- PSY 251 - Personality
- PSY 300 - Research Methods in Psychology

3. A two-term thesis with a grade of "A" or "A minus"

4. An oral presentation of the student's work (usually at the Steinmetz Symposium)

Psychology (ID), B.S.

Requirements for the Interdepartmental Major:

Before declaring an interdepartmental major with psychology, students must submit an application, which is available on the department's website.

Eight courses in psychology, including the following:

- PSY 100 - Introduction to Psychology
- PSY 200 - Statistical Methods in Psychology
- Upper-Level Elective: One additional PSY course numbered 300 through 451. Students wishing to conduct an interdepartmental senior thesis will also take, as their Upper-Level Elective, PSY 300 .

General Electives:

- Any additional five PSY courses at any level

Honors in Psychology (ID)

Interdepartmental majors who wish to earn honors will do an interdepartmental thesis. ID majors must also meet the same GPA requirements for psychology courses as full majors, although only two grades of "A" or "A minus" in psychology "core" courses will be required. Please note that PSY 300 is a prerequisite to registering for a thesis.

All proposals for honors theses must be submitted to the department administrative assistant no later than the end of the eighth week of the spring term of the junior year. The proposal should be one typewritten page describing the general area of the project, the student's preparation for the project (e.g., related course work), and the proposed faculty supervisor. Further information is available from the department administrative assistant.

Requirements for Honors in Psychology:

In addition to meeting College-wide requirements, honors in psychology requires:

1. A psychology grade point average of 3.40 or higher

2. Three grades of "A" or "A minus" in psychology "core" courses, which include:

- PSY 200 - Statistical Methods in Psychology
- PSY 210 - Neuroscience: Mind & Behavior

- PSY 212 - Neurobiology
- PSY 213 - Clinical Neuropsychology
- PSY 220 - Attention and Memory
- PSY 225 - The Psychology of Language
- PSY 230 - Social Psychology
- PSY 240 - Developmental Psychology
- PSY 250 - Clinical Psychology 1: Disorders
- PSY 251 - Personality
- PSY 300 - Research Methods in Psychology

3. A two-term thesis with a grade of "A" or "A minus"

4. An oral presentation of the student's work (usually at the Steinmetz Symposium)

Psychology Minor

Requirements for the Minor:

Six courses in Psychology, including:

- PSY 100 - Introduction to Psychology
- PSY 200 - Statistical Methods in Psychology

One course from either Area 1 or Area 2:

Area 1:

- PSY 210 - Neuroscience: Mind & Behavior
- PSY 212 - Neurobiology
- PSY 213 - Clinical Neuropsychology

Area 2:

- PSY 220 - Attention and Memory
- PSY 225 - The Psychology of Language

One course from either Area 3 or Area 4:

Area 3:

- PSY 230 - Social Psychology
- PSY 240 - Developmental Psychology

Area 4:

- PSY 250 - Clinical Psychology 1: Disorders
- PSY 251 - Personality

2 additional PSY courses

- Any 2 additional PSY courses

Religious Studies

Director: Professor P. Bedford

Faculty: Professors K. Brison (Anthropology), H. Mueller (Classics), S. Berk (History), D. McMullen (Music); Associate Professor J. Lewin (English); Assistant Professors A. Khan (Anthropology), K. Wegter-McNelly; Visiting Assistant Professor L. Verchery

Religion in its varied expression informs the lives of most of the world's population, both currently and historically. It has been the inspiration for literature, art, and music, and the source of law, meaning and values, social solidarity, and conflict. Religion-Western, Eastern, and otherwise-is a vast cluster of cultural phenomena (including sacred texts, mythologies and theologies, moral codes, and every conceivable kind of ritual) that is best explored from the perspective of more than one discipline. The program is designed to enable students to gather insights from philosophy, psychology, sociology, anthropology, political science, history, literature and other disciplines by way of illuminating this practically universal form of human behavior. The academic study of religion examines religion from outside the framework of any particular belief system, and it does not aim to promote or undermine any particular religion or worldview. The program offers a major, interdepartmental major, and a minor.

Religious Studies, B.A.

Requirements for the Major:

A minimum of twelve courses including two Core Courses, plus five courses in an Area of Concentration, plus two courses devoted to a Senior thesis (REL 498 & REL 499), plus three other Religious Studies courses of which at least two will be outside the selected Area of Concentration. Relevant intermediate-level language courses can be substituted with the permission of the Director of the program.

Requirements for Honors in Religious Studies:

To be eligible for honors, the student must fulfill the following requirements: (1) a minimum index of 3.3 in courses in the Major; (2) a grade of at least "A minus" on the senior thesis; and (3) a grade of "distinction" or "high pass" in an oral examination based on the senior thesis. In addition, the student must satisfy College requirements for departmental honors.

Religious Studies Courses

The following is only a partial list of the classes counted towards the religious studies major and minor. See the Director of the program for a complete list.

Core Courses

- REL 103 - Introduction to Religious Studies
- REL 300 - Seminar: Theory and Method in the Study of Religion

Areas of Concentration

Judaism

- AMU 125 - World Religions and Music
- EGL 099 - The Bible: An Introduction
- EGL 265 - Jewish Women Writers
- HST 128 - The American Jewish Experience

- HST 157 - Modern Jewish History
- HST 158 - The Holocaust
- HST 195 - From Abraham to Mohamed and Beyond: The Early History of the Jews
- REL 203 - Judaism/Christianity/Islam: Comparative Perspectives
- REL 230 - Judaism and Christian Origins

Christianity

- AAH 300 - Italian Art and Architecture, 14th-15th Century
- AMU 160 - From Chant to Mozart
- AMU 125 - World Religions and Music
- AMU 212 - Bach, Handel, and their Predecessors
- AMU 340 - Early Music Seminar
- ANT 252 - Anthropology of Christianity
- EGL 099 - The Bible: An Introduction
- EGL 211 - Milton
- GRK 243 - New Testament Greek
- HST 171 - Europe, Africa, and the Americas in the Era of Columbus
- HST 240 - The Crusades: Christianity and Islam in Conflict
- HST 241 - Mystics, Magic, and Witchcraft in Medieval and Early Modern Europe
- HST 245 - Occult Sciences and Societies
- HST 372 - Sex, Race and Gender in Latin America
- LAT 358 - Medieval Latin Literature and Culture
- MLT 284 - Popular Religion and Politics in Latin America
- PHL 261 - Philosophy of Religion
- REL 203 - Judaism/Christianity/Islam: Comparative Perspectives
- REL 320 - Early Christian Thought
- REL 230 - Judaism and Christian Origins

Islam

- AAH 101 - Islamic Art and Architecture
- AAH 286 - Art and Religion of the Silk Road
- ANT 256 - Anthropology of Islam
- HST 240 - The Crusades: Christianity and Islam in Conflict
- HST 243 - Ottoman History
- HST 302 - Comparing Muslim Cultures
- HST 401 - Seminar in Africa/Middle East
- PSC 343 - Women and Politics in the Muslim World
- REL 203 - Judaism/Christianity/Islam: Comparative Perspectives
- REL 345 - Classical Islam

Religions of Asia

- AAH 286 - Art and Religion of the Silk Road
- AMU 125 - World Religions and Music
- ANT 232 - Bombs to Buddhism: Fatalism, Technology, and Modern Japanese Culture
- PHL 216 - (166) Introduction to Indian Philosophy
- PHL 167 - Chinese Philosophy
- PHL 180 - Theories of the Good Life
- PHL 245 - Buddhist Ethics

- PHL 338 - Zen and Tibetan Buddhism

Religions of the Ancient Mediterranean

- CLS 110 - Ancient Egypt: History and Religion
- CLS 111 - Ancient Iraq: History and Religion
- CLS 132 - Religion in the Pagan World
- CLS 134 - Classical Art and Architecture
- CLS 143 - Classical Mythology
- CLS 154 - Poetry and the Cosmos
- CLS 161 - The Heroic Journey: Survey of Ancient Epic
- CLS 178 - Ancient World Mythology
- EGL 099 - The Bible: An Introduction
- HST 195 - From Abraham to Mohamed and Beyond: The Early History of the Jews
- REL 230 - Judaism and Christian Origins

Religion, Culture and Society

- AMU 125 - World Religions and Music
- ANT 252 - Anthropology of Christianity
- ANT 254 - Anthropology of Religion
- HST 372 - Sex, Race and Gender in Latin America
- MLT 284 - Popular Religion and Politics in Latin America
- PHL 180 - Theories of the Good Life
- PHL 240 - Contemplative Social Justice Ethics
- PSC 241R - Religion and Politics
- PSC 262 - Damnation, Revolution and the American Experiment
- PSC 337 - Theories of Modern Secularism
- PSC 343 - Women and Politics in the Muslim World
- PSY 431 - Seminar in Psychology of Religion
- REL 170 - Myth, Ritual and Magic
- REL 203 - Judaism/Christianity/Islam: Comparative Perspectives
- REL 250 - Death and Immortality
- REL 271 - Religion and Food
- REL 280 - Religion and Science
- SOC 223 - Sociology of Religion

Religious Studies (ID), B.A.

Requirements of the Interdepartmental Major:

At least eight courses in the program, including REL 103 and REL 300 and a Senior thesis.

Requirements for Honors in Religious Studies:

To be eligible for honors, the student must fulfill the following requirements: (1) a minimum index of 3.3 in courses in the Major; (2) a grade of at least "A minus" on the senior thesis; and (3) a grade of "distinction" or "high pass" in an oral examination based on the senior thesis. In addition, the student must satisfy College requirements for departmental honors.

Russian and East European Studies, B.A.

Requirements for the Major:

Twelve courses including REE 498-499; three courses above RUS 101 ; two courses on the literature or culture of the country in question; and five appropriate courses from anthropology, art history, economics, history, music, political science and religious studies. Students must enter the major by the fall of their junior year, and course selections must be approved by the REE director. Majors must have completed at least three courses in the department most directly related to their senior project and must pass a comprehensive examination in the form of an oral defense of their senior project.

Science, Medicine, and Technology in Culture

Director: Professor A. Burkett (English)

Science, medicine, and technology all play important roles in modern society. Several different populations of students would be interested in studying Science, Medicine, and Technology in Culture (SMT):

- Science or engineering majors who want to place their interests in a social context
- Humanities or social sciences majors who want to include science, engineering, and their social consequences in their education
- Students who want to study science and engineering at a meta-level (philosophy of science, sociology of science, history of science, etc.).

Science, Medicine, and Technology in Culture, B.A.

Requirements for the Major:

The major will consist of twelve courses: all students will take one of five introductory SMT courses, HST 138 , HST 293 , PHL 232 , SMT 123 or SOC 228 , a three course concentration in either history and political science, economics, sociology and anthropology, or philosophy, with all of these classes drawn from the list of SMT courses below, three courses in engineering and science, each of which must count for the major of the respective engineering or science department, three SMT courses from the list below, and a two-term interdisciplinary senior thesis.

SMT Courses

Core Courses (1 course)

- HST 138 - Big History
- HST 293 - History of Medicine
- PHL 232 - Philosophy of Science
- SMT 123 - Ethics, Technology & Society
- SOC 228 - Sociology of Medicine

Capstone Course

- SMT 498 - Science, Medicine & Technology Senior Thesis 1
- SMT 499 - Science, Medicine & Technology Senior Thesis 2

Science, Medicine, and Technology in Culture (ID), B.A.

Requirements for the Interdepartmental Major:

The interdepartmental major will consist of eight courses: all students will take one of five introductory SMT courses, HST 138 , HST 293 , PHL 232 , SMT 123 or SOC 228 , as well as a two-term interdisciplinary senior thesis. If the other half of the interdepartmental major is in Sciences or Engineering, then these students will do a three course concentration in either history and political science, economics, sociology and anthropology, or philosophy, with all of these classes drawn from the list of SMT courses below, as well as three other courses from this list. If the other half of the interdepartmental major is in Humanities or Social Sciences, then these students will take three courses in engineering and science, each of which must count for the major of the respective engineering or science department, as well as three SMT courses from the list below.

SMT Courses

Core Courses (1 course)

- HST 138 - Big History
- HST 293 - History of Medicine
- PHL 232 - Philosophy of Science

Science, Medicine, and Technology in Culture Minor

Requirements for the Minor:

Students wishing to minor in SMT must take six SMT courses from the list below, drawn from at least three different departments and including at least one of the SMT core courses.

SMT Courses

Core Courses (1 course)

- HST 138 - Big History
- HST 293 - History of Medicine
- PHL 232 - Philosophy of Science
- SMT 123 - Ethics, Technology & Society
- SOC 228 - Sociology of Medicine

Capstone Course

Sociology

Chair: Professor M. Goldner (on leave Spring 2021)

Faculty: Professors D. Cotter, I. Kaplan; Associate Professor D. Hill Butler; T. Stablein; Visiting Assistant Professor R. Patterson

Staff: J. Clifford (Administrative Assistant)

Internships and Field Research. The department encourages students to participate in community internships for academic credit under formal supervision by a member of the sociology faculty. Internships include human service organizations and government/policy offices. Students can enroll in SOC 385 , and SOC 450 . In addition, faculty work closely with students who conduct field research; many department majors present research papers at the National Conference on Undergraduate Research and at Union College's Steinmetz Symposium.

Sociology, B.A.

Requirements for the Major:

Students complete a twelve course major and are required to take

- SOC 100 - Introduction to Sociology
- SOC 300 - Quantitative Methods of Social Research
- SOC 305 - History of Sociological Thought

Complete a 2 term senior thesis:

- SOC 498 - Sociology Senior Thesis 1
- SOC 499 - Sociology Senior Thesis 2

Additionally, seven Sociology electives:

- SOC 201 - Social Data Analysis
- SOC 202 - Social Problems, Policy and Pop Culture
- SOC 203 - Social Psychology
- SOC 204 - Social Construction of Deviance
- SOC 205 - Social Work and Human Services
- SOC 206 - Aging and Society
- SOC 207 - Sociology of the Black Religious Experience

- SOC 209 - Staging Black Feminisms
- SOC 212 - The American Family and Cross-Cultural Perspectives
- SOC 221 - School Social Work
- SOC 222 - Schools and Societies
- SOC 223 - Sociology of Religion
- SOC 224 - Sociology of Community
- SOC 228 - Sociology of Medicine
- SOC 230 - Sociology of the Black Community
- SOC 231 - Sex and Gender in American Society
- SOC 233 - Race, Class, Gender, and Sexuality
- SOC 240 - Political Sociology
- SOC 260 - Population and Society: Demographic Trends
- SOC 261 - Crime and Justice in Society
- SOC 262 - Juvenile Delinquency
- SOC 270 - Social Movements, the Environment, and Society
- SOC 271 - Sociology of Disaster
- SOC 284 - Sociology of Women & Health
- SOC 285 - Food, Nutrition and Society
- SOC 290 - Personality, Media, and Society
- SOC 302 - Qualitative Social Research Methods
- SOC 314 - America's War on Drugs: Culture, Conflict, & Social Policy
- SOC 340 - Inequality and Mobility: From Penthouse to Poorhouse
- SOC 346 - Sociology of Black Women's Culture
- SOC 359 - Environmental Policy and Resource Management
- SOC 360 - Domestic Violence
- SOC 362 - Family and Community Services
- SOC 364 - Sex and Motherhood
- SOC 370 - Public Health
- SOC 372 - Global Health
- SOC 374 - Mental Health and Society
- SOC 385 - Internships for Community Outreach
- SOC 387T - Community Service Miniterm
- SOC 450 - Environmental Services and Policy

Note(s):

Majors may include within their seven remaining elective courses up to two cognates from political science, psychology, economics, history, philosophy and/or anthropology with approval of the department advisor. Courses in the Sociology Department include a variety of choices in areas such as community, family, health and medicine, public policy, the environment, diversity and change and crime and justice.

Requirements for Honors in Sociology:

The student must fulfill the following requirements: (1) achieve a cumulative index of 3.30 or better; (2) a minimum index of 3.30 in all sociology courses; (3) completion of requirements for the sociology major or an interdepartmental major; (4) three grades of "A" or "A minus" in the major; and (5) at least a grade of "A minus" on the senior thesis. To be eligible for membership in the Alpha Kappa Delta sociology honor society, the student must fulfill all of the above requirements for honors and also have a class standing in the upper third.

Course Selection Guidelines

Common Curriculum (CC): In the Common Curriculum, all sociology courses count towards fulfillment of the social science requirement. Note that Quantitative Social Research Methods does not count toward the Quantitative and Mathematical Reasoning (QMR) requirement.

Course Sequencing for Majors: Majors are encouraged to fulfill the methods and theory requirements SOC 300 and SOC 305 prior to beginning their senior thesis. Students should note that these courses are generally offered only in the fall (SOC 300) and winter (SOC 305) terms each year.

Courses Suitable for Non-Majors: All upper level elective courses are suitable for non-majors who have completed SOC 100 .

Course Numbering: SOC 100 or the permission of the instructor is a prerequisite for all other courses in the sociology department unless otherwise noted. While 200-level courses are not "easier" than 300-level courses in terms of workload, the 300-level courses generally assume a greater working knowledge of sociological theory and methods.

Sociology (ID), B.A.

Requirements for the Interdepartmental Major:

Eight courses, including:

- SOC 100 - Introduction to Sociology
- SOC 300 - Quantitative Methods of Social Research
- SOC 305 - History of Sociological Thought

An interdepartmental thesis and four sociology electives

Or a two-term Sociology thesis and three electives

Requirements for Honors in Sociology:

The student must fulfill the following requirements: (1) achieve a cumulative index of 3.30 or better; (2) a minimum index of 3.30 in all sociology courses; (3) completion of requirements for the sociology major or an interdepartmental major; (4) three grades of "A" or "A minus" in the major; and (5) at least a grade of "A minus" on the senior thesis. To be eligible for membership in the Alpha Kappa Delta sociology honor society, the student must fulfill all of the above requirements for honors and also have a class standing in the upper third.

Course Selection Guidelines

Common Curriculum (CC): In the Common Curriculum, all sociology courses count towards fulfillment of the social science requirement. Note that Quantitative Social Research Methods does not count toward the Quantitative and Mathematical Reasoning (QMR) requirement.

Course Sequencing for Majors: Majors are encouraged to fulfill the methods and theory requirements SOC 300 and SOC 305 prior to beginning their senior thesis. Students should note that these courses are generally offered only in the fall (SOC 300) and winter (SOC 305) terms each year.

Courses Suitable for Non-Majors: All upper level elective courses are suitable for non-majors who have completed SOC 100 .

Course Numbering: SOC 100 or the permission of the instructor is a prerequisite for all other courses in the sociology department unless otherwise noted. While 200-level courses are not "easier" than 300-level courses in terms of workload, the 300-level courses generally assume a greater working knowledge of sociological theory and methods.

Sociology Minor

Requirements for the Minor:

- SOC 100 - Introduction to Sociology
- SOC 300 - Quantitative Methods of Social Research
- SOC 305 - History of Sociological Thought

And three Sociology electives:

- SOC 201 - Social Data Analysis
- SOC 202 - Social Problems, Policy and Pop Culture
- SOC 203 - Social Psychology
- SOC 204 - Social Construction of Deviance
- SOC 205 - Social Work and Human Services
- SOC 206 - Aging and Society
- SOC 207 - Sociology of the Black Religious Experience
- SOC 209 - Staging Black Feminisms
- SOC 212 - The American Family and Cross-Cultural Perspectives
- SOC 221 - School Social Work
- SOC 222 - Schools and Societies
- SOC 223 - Sociology of Religion
- SOC 224 - Sociology of Community
- SOC 228 - Sociology of Medicine
- SOC 230 - Sociology of the Black Community
- SOC 231 - Sex and Gender in American Society
- SOC 233 - Race, Class, Gender, and Sexuality
- SOC 240 - Political Sociology
- SOC 260 - Population and Society: Demographic Trends
- SOC 261 - Crime and Justice in Society
- SOC 262 - Juvenile Delinquency
- SOC 270 - Social Movements, the Environment, and Society
- SOC 271 - Sociology of Disaster
- SOC 284 - Sociology of Women & Health
- SOC 285 - Food, Nutrition and Society
- SOC 290 - Personality, Media, and Society
- SOC 302 - Qualitative Social Research Methods
- SOC 314 - America's War on Drugs: Culture, Conflict, & Social Policy
- SOC 340 - Inequality and Mobility: From Penthouse to Poorhouse
- SOC 346 - Sociology of Black Women's Culture
- SOC 359 - Environmental Policy and Resource Management
- SOC 360 - Domestic Violence
- SOC 362 - Family and Community Services
- SOC 364 - Sex and Motherhood
- SOC 370 - Public Health
- SOC 372 - Global Health
- SOC 374 - Mental Health and Society
- SOC 385 - Internships for Community Outreach
- SOC 387T - Community Service Miniterm
- SOC 450 - Environmental Services and Policy

Theatre & Dance

Chair: Associate Professor R. Wyatt

Faculty: Senior Artist-in-Residence and Director of the Dance Program M. Moutillet; Lecturer/Technical Director D. Bodd; Artist-in-

Residence/Costume Designer B. Belz; Assistant Professor D. Venning; Lecturer/Scenic Artist A. Mannion; Lecturer L. Zabele-Cawley
Staff: V. Rotondi (Administrative Assistant), L. Goodman (Office Assistant), R. MacDuffie (Shop Foreman)

Theatre, B.A.

Requirements for the Major:

Twelve courses plus one full theatre practicum credit. Students may focus their studies in one of three areas: Performance, Design and Technology or Directing and Theory.

Required courses:

- ATH 110 - Stage Craft 1
- ATH 112 - Acting 1
- ATH 243 - History of Theatre
- ATH 494 - Stage Management: Theatre Independent Study
- a design course
- ATH 497 - Theatre One Term Senior Project
- ATH 498 - Theatre Honors Two Term Senior Project 1
- ATH 499 - Theatre Honors Two Term Senior Project 2

five or six courses

Note: Students choose five or six courses, depending upon whether they take a one or two term senior thesis, from the "menu" of options in consultation with their faculty advisor. Majors are expected to audition for or work on term productions.

Requirements for Honors in Theatre:

ATH 498 and ATH 499 . Candidates must satisfy college qualifications for honors and receive a grade of at least "A minus."

Theatre (ID), B.A.

Requirements for the Interdepartmental Major:

Eight courses plus one full theater practicum credit including and one experience in the Art of Stage Management. Students are encouraged to audition for or work on term productions. The interdepartmental major includes:

- ATH 110 - Stage Craft 1
- ATH 112 - Acting 1
- ATH 113 - Introduction to Stage Design
- ATH 125 - Improvisation 1
- ATH 151 - Directing 1
- ATH 231 - Voice for the Stage
- ATH 342 - Acting 2

- ATH 230 - Movement for Actors
or
- ATH 128 - Stage Combat

Note(s):

Highly recommended are additional electives/dance technique classes.

Requirements for Honors in Theatre:

ATH 498 and ATH 499 . Candidates must satisfy college qualifications for honors and receive a grade of at least "A minus."

Dance Minor

Requirements for the Minor:

A total of 6 credits are required to achieve a minor in dance.

Students must take:

- ADA 130 - The Dance Experience

One History course:

- ADA 140 - American Musical Theatre and Dance
or
- ADA 142 - Dance in America
or
- ADA 153 - Histoire de la danse, Danse de l'histoire/History of Dance, Dance of History

One dance elective (in consultation with the Director of Dance):

- ADA 150 - Staging Exploration in Theatre and Dance
or
- ADA 160 - Dance for the Camera
or
- WMC 354T - Balinese Performing Arts Mini-term

One credit must be pursued from:

- ADA 295H - Choreography Honors 1
and
- ADA 296H - Choreography Honors 2
or
- ADA 350 - Choreography
or
- ADA 490 - Dance Project 1

Two full practicum credits are also required in dance technique over six terms of study

Dance Technique Classes:

For dance minors, students must complete one full year of practicum credit in a specific dance form. For their second full practicum credit, however, minors must pursue two terms of classes in a different dance style as well as the practicum ADA 051, which will be held winter term and entails participation in the Winter Dance Concert series. To gain transcript recognition for dance technique classes, students must register no later than the two-week add/drop period, and achieve a passing grade from the faculty instructor. Requests to register for practicum transcript recognition after the add-drop period will not be honored. If a student registers for more than one dance practicum per term, only one practicum will count towards the three-course sequence, which is required to earn one course credit. Minors are required to complete two full credits of practicum. Such requests are made to the registrar during the senior year transcript audit (or its equivalent for those who plan to graduate early). Each full dance practicum credit is accumulated from three previous passing grades (any combination of theater and dance practicum). No more than two such graduation credits are available, whatever the discipline (music, theater, or dance). Students are advised to select full practicum credits in whichever area best suits their academic program.

Theatre Minor

Requirements for the Minor:

Six courses plus one full theatre practicum credit and one experience in the art of Stage Management. The Theatre minor includes ATH 110, ATH 243, and the choice of one design class and one performance class offered by the Department. Also required are two electives from within the Department of Theatre and Dance chosen in consultation with the student's Minor advisor. Minors are encouraged to audition for or work on term productions.

Visual Arts: Art History and Studio Fine Arts

Chair: Associate Professor L. Cox

Faculty: Professors M. Benjamin, C. Duncan, L. Matthew; Associate Professors L. Cox, S. Lulli, L. Nemett, D. Ogawa, F. Orellana

Staff: F. Rapant (Photography Technician), Victoria Rotondi (Program Administrative Coordinator), C. Fortsch (Office Assistant)

Visual Arts (Art History Concentration), B.A.

Requirements for the Major:

Art History majors take twelve courses, including six 100 or 200 numbered courses which must include three of the four cultural areas: The Americas, Asia, Europe, Middle East/Central Asia; four 300 or 400 numbered courses. Art History majors also take two Studio Art courses. Students planning to do a two-term senior thesis should take a 300 or 400 numbered seminar (preferably a WAC) in the junior year; while those not doing a thesis may take 300 or 400 WAC/WS numbered seminar in the senior year to fulfill the WS (senior writing requirement). Majors concentrating in Art History are encouraged to begin or continue the study of at least one foreign language at Union.

To pursue a senior thesis, Art History majors must have a cumulative grade point average of 3.3 overall and 3.3 in their Art History concentration. The student must have successfully completed a junior qualifying paper ("B plus" or above) in the context of an upper-level (300's or 400's) Art History course, which will be reviewed by the thesis advisor. Art History majors who intend to write a two-term thesis must present a topic proposal and obtain approval from an Art History thesis advisor by spring term registration of the junior year. Because thesis requirements vary between departments, all interdepartmental majors must consult with both major departments before planning to write a senior thesis. One term of thesis can count towards the upper level course requirements.

Requirements for Honors in Art History:

To qualify for departmental honors, a student must fulfill the following requirements: (1) cumulative grade point average of 3.3; (2) a grade point average of 3.3 in the Art History concentration; (3) successful completion of a two-term senior thesis ("A" or "A-minus"); (4) approval by a second faculty reader; (5) an oral presentation at The Steinmetz Symposium in the spring term of senior year; and (6) a copy of the thesis must be left with the department's collection and archives. Having fulfilled the above, the student must then be nominated by the department for honors. Further guidelines for the senior thesis and departmental honors are available from the Art History faculty.

Architecture Track:

Union offers a studio fine arts concentration with a recommended sequence of courses for students who plan to apply for graduate school in architecture as well as related fields of historic preservation, landscape architecture, and urban planning. While graduate schools in these areas don't require a specific major, a thorough and strong Studio Art portfolio is essential and greatly enhanced by specific course work in engineering, art history, math, and science. Those interested should consult any of the studio advisors as early as possible for specific details. Advisors: Professors Benjamin, Duncan, Orellana; Senior Lecturer Wimer

Course Selection Guidelines

Placement: Incoming first-year students who score a 4 or 5 on the AP exam in Art History may receive credit for one of the 100 or 200 numbered introductory Art History courses. Students who plan to major or minor in Art History are nonetheless encouraged to take the introductory courses as a way of deepening their backgrounds.

100-numbered courses: These courses are introductions to the study of Art History. They cover specific geographical and broad historical periods. Many are cross-listed or approved for credit in other disciplines or interdisciplinary programs. These courses are suitable for first-year students, sophomores, juniors, and seniors, and many of them carry General Education LCC credit. They also may serve as the prerequisites for many 300 and 400 numbered courses.

200-numbered courses: These courses are introductions to subfields within Art History. They may be medium-specific or thematic, and will facilitate learning across cultures. They are designed to be introductory and do not carry prerequisites. Many are cross-listed or approved for credit in other disciplines or interdisciplinary programs. These courses are suitable for first-year students, sophomores, juniors, and seniors, and many of them carry General Education LCC credit; two currently carry SET credit.

300-numbered courses: These courses concentrate on specific historical periods, geographic regions, or themes. They generally have prerequisites drawn from the 100 or 200 numbered Art History courses. These courses are generally suitable for sophomores, juniors, and seniors. Some 300 numbered courses may require prerequisites.

400-numbered courses: This will be a rotating seminar taught by different faculty or with a different topic on occasion. It is designed for majors in their junior and senior years, and will involve advanced work in a specific topic or theme.

Internships, Independent Studies, and Thesis: These courses are generally reserved for advanced Art History students, who must consult with the Art History program and arrange for academic sponsorship prior to registering for them.

Visual Arts (Art History/Studio Arts Dual Concentration), B.A.

Requirements for the Art History/Studio Arts Dual Concentration:

Students who wish to major in a combined dual concentration of studio art and art history must take seven courses in each area.

In Studio: Students take one course in three of the disciplines of the studio arts offered by the department (drawing and painting; photography; printmaking and two-dimensional design; sculpture and three-dimensional design; digital arts). Students may not exceed four introductory courses. Two 200-level intermediate-numbered courses are required in at least two studio art disciplines. Two advanced courses are required in a single discipline (300 or above). For honors requirements, see below.

In Art History: Students take four 100 or 200 numbered courses which must include three of the four cultural areas: The Americas, Asia, Europe, Middle East/Central Asia; three courses from the 300 and 400 numbered courses. The WS requirement for combined dual concentration may be fulfilled by an Art History seminar taken in the senior year or a combined senior project. For honors requirements see below.

Requirements for Honors in the Art History/Studio Combined Dual Concentration:

Honors for the combined concentration requires a cumulative grade point average of 3.3; a 3.3 grade point average for all courses counting toward the combined concentration; and one of three project options: 1) Successful completion of a two-term art history thesis ("A" or "A minus"), which also requires successful completion of a paper by the end of the junior year ("B plus" or above), a proposal approved by the advisor, approval of the final product by a second faculty reader, and an oral presentation at The Steinmetz Symposium in the spring term of the senior year; or 2) A two-term independent study project focusing on the student's particular area of interest in the studio arts, culminating in an exhibition ("A" or "A minus"); or 3) a two-term project that combines Art History and Studio Arts, which must be planned in consultation with an advisor from each discipline, and which must be proposed by the end of the junior year. For those doing a written work, a copy must be left with the department's collection and archives. For

those completing a studio project, visual documentation (usually slide reproductions) of the project, a one-page abstract, and one original work must be left with the department. These requirements for project option #3 will be negotiated with the advisors on a case-by-case basis. All students must complete the WS requirement or an equivalent during the senior year.

Course Selection Guidelines

Placement: Incoming first-year students with Studio experience who are interested in placement beyond an introductory course should contact the department chair to arrange for a portfolio review with the appropriate Studio Art faculty.

Enrollment Limits: It is important to note that many introductory Studio Art courses are petition courses. Due to high demand and limited Studio Art facilities, declared Visual Arts majors and minors have priority in registration for all Studio Art courses, unless otherwise noted in the course listing schedule. Students who are interested in a major or a minor are strongly encouraged to meet with a member of the department and to declare as early as is practical. Most introductory courses reserve some openings for incoming first-year students in the fall term.

100-level courses: These courses are designed to introduce students to the fundamental materials and techniques of the various Studio Art disciplines. They do not carry prerequisites, nor do they require any previous Studio Art experience. These courses are suitable for first-year students, sophomores, juniors, and seniors; please note the enrollment priorities as stated above. Non-majors who are interested in these courses are strongly advised to consult with faculty before petitioning for these courses.

200-400-level courses: These courses are designed to build on the introductory courses, and all have introductory courses as their prerequisites. They are suitable for first-year students, sophomores, juniors, and seniors.

Internships, Independent Studies, and Thesis: These courses are generally reserved for advanced Studio Art students, but may be appropriate for other students as well. All students interested in these courses must consult with the Studio Art faculty and arrange academic sponsorship before registering for them.

Visual Arts (Studio Fine Arts Concentration), B.A.

Requirements for the Major:

Students take at least twelve courses in the department, with four required for the core that must be one course from each of the following four areas:

Design Fundamentals or Drawing

- AVA 100 - Design Fundamentals 1
or
- AVA 110 - Drawing 1

Sculpture and Three Dimensional Design

- AVA 130 - Sculpture 1
or
- AVA 140 - Three Dimensional Design 1

Photography

- AVA 120 - Photography 1 - Aesthetics, Film, Chemistry & Printing

Printmaking

- AVA 150 - Printmaking: Relief
or

- AVA 251 - (151) Printmaking: Etching

To complete their studio requirements, students take:

Two additional studio courses

- AVA 210 - Drawing 2
- AVA 215 - Life Drawing
- AVA 220 - Photography 2 - Intermediate Photography
- AVA 230 - Sculpture 2
- AVA 240 - Three-Dimensional Design 2
- AVA 260 - Painting: Oil
- AVA 261 - Painting: Watercolor
- AVA 262 - Real and Recorded Time - 4D Art
- AVA 270 - The Processed Pixel
- AVA 282 - Digital Aesthetics

Two advanced studio courses

- AVA 320 - Photography 3 - Color Digital Photography
- AVA 330 - Sculpture 3
- AVA 345 - The Illustrated Organism
- AVA 350 - Advanced Printmaking
- AVA 360 - Advanced Painting
- AVA 363 - 3D Computer Modeling
- AVA 370 - Robotic Art
- AVA 380 - The Floating World: Edo Prints and Printmaking
- AVA 400 - Special Projects in Photography
- AVA 405 - Special Projects in Painting
- AVA 410 - Drawing Independent Study 1
- AVA 420 - Photography Independent Study 1
- AVA 430 - Sculpture Independent Study 1
- AVA 450 - Printmaking Independent Study 1
- AVA 460 - Painting Independent Study 1
- AVA 470 - Studio Internship 1
- AVA 480 - Digital Art Independent Study

Two art history courses

Two other studio courses chosen in consultation with a visual arts faculty advisor

Additional Requirements

Most majors will do either a two-term senior honors project (AVA 498 - AVA 499) leading to a solo exhibition in the spring term, or a one-term independent senior studio project (with an optional exhibition). These comprise in-depth study in a studio discipline in the senior year. A senior honors project takes the form of a two-term independent study focusing on the student's particular area of interest in the visual arts during consecutive terms (first term, 498, pass/fail; second term, 499, with an overall grade for both terms). Visual arts majors who do not pursue a senior honors project may satisfy the WS requirement either through an art history senior seminar designated WS (for studio concentrators who have the necessary prerequisites in art history) or by obtaining a faculty sponsor for a one-term independent senior studio project with the required WS component.

Requirements for Honors in Studio Fine Arts:

Candidates must meet College qualifications for honors and secure approval from a visual arts faculty sponsor for the two-term project with culminating exhibit. Each honors student keeps a written journal during the two-term project, reflecting on his/her work. There is regular verbal and written input from the faculty sponsor. This journal forms the basis for a final paper of at least 15 pages, which satisfies the College's senior writing (WS) requirement. There are additional requirements for honors in studio fine arts and they should be obtained from your visual arts advisor. Students pursuing a one-term senior project must also secure approval from a studio visual arts faculty sponsor.

Course Selection Guidelines

Placement: Incoming first-year students with Studio experience who are interested in placement beyond an introductory course should contact the department chair to arrange for a portfolio review with the appropriate Studio Art faculty.

Enrollment Limits: It is important to note that many introductory Studio Art courses are petition courses. Due to high demand and limited Studio Art facilities, declared Visual Arts majors and minors have priority in registration for all Studio Art courses, unless otherwise noted in the course listing schedule. Students who are interested in a major or a minor are strongly encouraged to meet with a member of the department and to declare as early as is practical. Most introductory courses reserve some openings for incoming first-year students in the fall term.

100-level courses: These courses are designed to introduce students to the fundamental materials and techniques of the various Studio Art disciplines. They do not carry prerequisites, nor do they require any previous Studio Art experience. These courses are suitable for first-year students, sophomores, juniors, and seniors; please note the enrollment priorities as stated above. Non-majors who are interested in these courses are strongly advised to consult with faculty before petitioning for these courses.

200-400-level courses: These courses are designed to build on the introductory courses, and all have introductory courses as their prerequisites. They are suitable for first-year students, sophomores, juniors, and seniors.

Internships, Independent Studies, and Thesis: These courses are generally reserved for advanced Studio Art students, but may be appropriate for other students as well. All students interested in these courses must consult with the Studio Art faculty and arrange academic sponsorship before registering for them.

Visual Arts (Art History Concentration ID), B.A.

Requirements for the Interdepartmental Major:

A minimum of eight courses in the Visual Arts Department, of which seven must be in Art History including four 100 or 200-numbered courses which must include three of the four cultural areas: The Americas, Asia, Europe, Middle East/Central Asia; three courses from the 300 and 400 numbered upper level courses. Students also take one course in Studio Art. All proposals for interdepartmental majors including Art History must be approved by the Art History faculty.

Requirements for Honors in Art History:

To qualify for departmental honors, a student must fulfill the following requirements: (1) cumulative grade point average of 3.3; (2) a grade point average of 3.3 in the Art History concentration; (3) successful completion of a two-term senior thesis ("A" or "A-minus"); (4) approval by a second faculty reader; (5) an oral presentation at The Steinmetz Symposium in the spring term of senior year; and (6) a copy of the thesis must be left with the department's collection and archives. Having fulfilled the above, the student must then be nominated by the department for honors. Further guidelines for the senior thesis and departmental honors are available from the Art History faculty.

Course Selection Guidelines

Placement: Incoming first-year students who score a 4 or 5 on the AP exam in Art History may receive credit for one of the 100 or 200 numbered introductory Art History courses. Students who plan to major or minor in Art History are nonetheless encouraged to take the introductory courses as a way of deepening their backgrounds.

100-numbered courses: These courses are introductions to the study of Art History. They cover specific geographical and broad historical periods. Many are cross-listed or approved for credit in other disciplines or interdisciplinary programs. These courses are suitable for first-year students, sophomores, juniors, and seniors, and many of them carry General Education LCC credit. They also may serve as the prerequisites for many 300 and 400 numbered courses.

200-numbered courses: These courses are introductions to subfields within Art History. They may be medium-specific or thematic, and will facilitate learning across cultures. They are designed to be introductory and do not carry prerequisites. Many are cross-listed or approved for credit in other disciplines or interdisciplinary programs. These courses are suitable for first-year students, sophomores, juniors, and seniors, and many of them carry General Education LCC credit; two currently carry SET credit.

300-numbered courses: These courses concentrate on specific historical periods, geographic regions, or themes. They generally have prerequisites drawn from the 100 or 200 numbered Art History courses. These courses are generally suitable for sophomores, juniors, and seniors. Some 300 numbered courses may require prerequisites.

400-numbered courses: This will be a rotating seminar taught by different faculty or with a different topic on occasion. It is designed for majors in their junior and senior years, and will involve advanced work in a specific topic or theme.

Internships, Independent Studies, and Thesis: These courses are generally reserved for advanced Art History students, who must consult with the Art History program and arrange for academic sponsorship prior to registering for them.

Visual Arts (Studio Fine Arts Concentration ID), B.A.

Requirements for the Interdepartmental Major:

Eight courses with at least one course in three of the five general disciplines of studio visual arts (drawing/painting; photography; printmaking/two-dimensional design; sculpture/three-dimensional design; digital arts). No more than three 100-level introductory courses; no more than two 200-level intermediate courses; at least two advanced level courses (AVA-300 or above); at least one art history course; senior/honors sequence optional.

A studio art interdepartmental major with a digital arts focus requires four digital art courses, three studio courses in at least two of the four studio disciplines, and one art history course. Those interested should consult Professor Cox (Visual Arts), Professor Orellana (Visual Arts) or Professor Cass (Computer Science) for specific details.

Requirements for Honors in Studio Fine Arts:

Candidates must meet College qualifications for honors and secure approval from a visual arts faculty sponsor for the two-term project with culminating exhibit. Each honors student keeps a written journal during the two-term project, reflecting on his/her work. There is regular verbal and written input from the faculty sponsor. This journal forms the basis for a final paper of at least 15 pages, which satisfies the College's senior writing (WS) requirement. There are additional requirements for honors in studio fine arts and they should be obtained from your visual arts advisor. Students pursuing a one-term senior project must also secure approval from a studio visual arts faculty sponsor.

Course Selection Guidelines

Placement: Incoming first-year students with Studio experience who are interested in placement beyond an introductory course should contact the department chair to arrange for a portfolio review with the appropriate Studio Art faculty.

Enrollment Limits: It is important to note that many introductory Studio Art courses are petition courses. Due to high demand and limited Studio Art facilities, declared Visual Arts majors and minors have priority in registration for all Studio Art courses, unless otherwise noted in the course listing schedule. Students who are interested in a major or a minor are strongly encouraged to meet with a member of the department and to declare as early as is practical. Most introductory courses reserve some openings for incoming first-year students in the fall term.

100-level courses: These courses are designed to introduce students to the fundamental materials and techniques of the various Studio Art disciplines. They do not carry prerequisites, nor do they require any previous Studio Art experience. These courses are suitable for first-year students, sophomores, juniors, and seniors; please note the enrollment priorities as stated above. Non-majors who are interested in these courses are strongly advised to consult with faculty before petitioning for these courses.

200-400-level courses: These courses are designed to build on the introductory courses, and all have introductory courses as their prerequisites. They are suitable for first-year students, sophomores, juniors, and seniors.

Internships, Independent Studies, and Thesis: These courses are generally reserved for advanced Studio Art students, but may be appropriate for other students as well. All students interested in these courses must consult with the Studio Art faculty and arrange academic sponsorship before registering for them.

Visual Arts - Art History Minor

Requirements for the Minor:

Seven courses including:

At least four 100 and 200 level courses (must include three of the four cultural areas: The Americas, Asia, Europe, Middle East/Central Asia)

Two 300 or 400 level courses

One studio course

Visual Arts - Studio Fine Arts Minor

Requirements for the Minor:

Seven courses, including:

Three introductory

- AVA 100 - Design Fundamentals 1
- AVA 110 - Drawing 1
- AVA 120 - Photography 1 - Aesthetics, Film, Chemistry & Printing
- AVA 130 - Sculpture 1
- AVA 140 - Three Dimensional Design 1
- AVA 150 - Printmaking: Relief
- AVA 251 - (151) Printmaking: Etching
- AVA 160 - Digital Art

Two intermediate

- AVA 200 - Design Fundamentals 2
- AVA 210 - Drawing 2
- AVA 220 - Photography 2 - Intermediate Photography
- AVA 230 - Sculpture 2
- AVA 240 - Three-Dimensional Design 2
- AVA 260 - Painting: Oil
- AVA 261 - Painting: Watercolor
- AVA 262 - Real and Recorded Time - 4D Art
- AVA 270 - The Processed Pixel

One advanced course

- AVA 320 - Photography 3 - Color Digital Photography
- AVA 330 - Sculpture 3
- AVA 345 - The Illustrated Organism
- AVA 350 - Advanced Printmaking
- AVA 360 - Advanced Painting
- AVA 363 - 3D Computer Modeling
- AVA 370 - Robotic Art
- AVA 380 - The Floating World: Edo Prints and Printmaking

One art history course is required.

World Musics and Cultures

Director: Professor J. Matsue (Music)

Faculty: Professor T. Olsen (Music)

The World Musics and Cultures Program at Union College is an interdisciplinary program offering courses, concerts and performance opportunities that explore, in a vibrant academic setting, the diversity of the world's people and the music that we make. Grounded in the Departments of Music and Anthropology, students can take a range of courses that reveal the intersection of music and cultural anthropology, develop skills in ethnographic methods, and encounter specific styles through both hands-on performance and academic study of the musics and cultures of Africa and the African Diaspora, Asia (Central, East, South and South East), Europe, Latin America, and North America.

World Musics and Cultures Associated Courses

Anthropology

- ANT 110 - Introduction to Cultural Anthropology

Ensembles

- AMU 012 - Union College Japanese Drumming Ensemble
- AMU 015 - Union College Jazz Ensemble

Independent Work

- WMC 490 - World Music's and Cultures Independent Study

Music

- AMU 101 - Theory 1: Diatonic Harmony
- AMU 120 - Making Music, Shaping Selves: Introduction to World Music
- AMU 131 - Music of Black America
- AMU 132 - The History of Jazz
- AMU 133 - Music of Latin America
- AMU 134 - Music and Culture of Africa
- AMU 202 - Musical Thinking: World and Pop

- AMU 220 - Mapping Musical Lives: Ethnography of Performing Arts
- AMU 232 - Jazz Workshop
- AMU 233 - Japanese Drumming Workshop
- AMU 234 - Balinese Gamelan Workshop
- AMU 235 - Latin Percussion Workshop
- ATH 348 - Non-Western Theatre and Performance Traditions
- WMC 354T - Balinese Performing Arts Mini-term

World Musics and Cultures Minor

Requirements for the Minor

Students may complete both the Music major or minor and the World Musics and Cultures minor (please see Professor Matsue for further clarification).

The World Musics and Cultures minor comprises Six courses, including:

- AMU 220 - Mapping Musical Lives: Ethnography of Performing Arts
- AMU 101 - Theory 1: Diatonic Harmony
- ANT 110 - Introduction to Cultural Anthropology

Two area courses:

- AMU 120 - Making Music, Shaping Selves: Introduction to World Music
- AMU 131 - Music of Black America
- AMU 132 - The History of Jazz
- AMU 133 - Music of Latin America
- AMU 134 - Music and Culture of Africa
- ATH 348 - Non-Western Theatre and Performance Traditions
- AMU 202 - Musical Thinking: World and Pop
- AMU 232 - Jazz Workshop
- AMU 233 - Japanese Drumming Workshop
- AMU 234 - Balinese Gamelan Workshop
- AMU 235 - Latin Percussion Workshop
- AMU 320 - Encounters with East Asian Music Cultures
- WMC 354T - Balinese Performing Arts Mini-term

One-year of practicum credit in a faculty-led ensemble:

- AMU 012 - Union College Japanese Drumming Ensemble
- AMU 015 - Union College Jazz Ensemble

And a capstone experience:

- WMC 490 - World Music's and Cultures Independent Study

Interdepartmental (ID) and Organizing Theme (OT) Major options

Students interested in pursuing further study in this area may complete an interdepartmental major (ID) in Music and Anthropology, or consider designing an Organizing Theme major (OT).

Courses associated with World Musics and Cultures

Several department programs contribute towards the program in World Musics and Cultures

World Musics and Cultures Associated Courses

Course Listing

Courses listed below are grouped together **alphabetically by subject prefix**. To search for a specific course, please follow the instructions in the course filter box below and click on "Filter."

Departments and interdisciplinary programs are described in detail on the Majors, Minors, and Other Programs page within this catalog. Please refer to the detailed sections on each area of study for more information. Requirements to fulfill a major or minor appear within each program or area of study.

All students must also complete the courses in the Common Curriculum (General Education), including Writing Across the Curriculum (WAC) requirements and other requirements that pertain to the undergraduate degree. Courses are numbered as follows.

000-049 - Non-credit courses.

050-099 - Common Curriculum (General Education) courses and others that do NOT count toward the major.

100-199 - Introductory-level courses which count for the major.

200-299 - Sophomore/junior-level courses that can be taken by non-majors. (Some departments may use 200-249 and 250-259 to delineate between sophomore and junior level offerings.)

300-399 - Upper-level courses intended primarily for majors - these are courses representing the depth component of the major.

400-499 - All advanced courses for seniors, including those used to fulfill WS (Senior Writing Experience requirement), small seminars, research, thesis, and independent studies.

Wherever possible, the departments have indicated the instructor and the term during which a course is given. Some courses are offered only occasionally and are so indicated. The College retains the right not to offer a course, especially if enrollment is insufficient.

A few courses are not valued at full course credit, and some carry double credit.

A full course unit may be equated to five quarter-credit hours, or three and one-third semester credit hours.

Art History

AAH 101 - Islamic Art and Architecture

Course Units: 1.0 (**Not Offered this Academic Year**) A broad and select survey of the art and architecture of Islamic cultures from the 7th through the 16th centuries that will stress the religious, social, economic, and historical contexts within which Islamic arts and architecture developed. We will study a variety of arts in addition to the traditional architecture, painting and sculpture familiar to students in Western art history surveys, including calligraphy and book painting, metalwork, ceramics, glass, carpets and textiles, and gardens and landscape design. **CC:** LCC, HUM

AAH 102 - Medieval Art and Architecture of Northern Europe, 5th-15th Century

Course Units: 1.0 (**Not Offered this Academic Year**) An introductory survey of sculpture and decorative arts, manuscripts, painting and architecture from the seventh through fourteenth centuries north of the Alps. Examines the emergence of western medieval culture and attitudes toward the arts, as well as western European views of its Byzantine and Muslim neighbors. In addition to introducing major monuments and patrons, students will be

introduced to the materials and techniques used to produce the art and architecture of the Middle Ages. The art of medieval Italy is covered in a separate course, AAH 300 CC: LCC, HUM

AAH 103 - Introduction to European Painting and Sculpture, 17th-20th century

Course Units: 1.0 (**Not Offered this Academic Year**) Major works of art and artistic traditions from the 17th century to the present, primarily in western Europe. The vocabulary and techniques of painting, sculpture, architecture, the decorative arts, and printmaking; the emergence of modernism, abstraction, new materials, and non-objective art. Emphasis on the institutions of art and historical context as well. Visual analysis, verbal and written interpretation of art. CC: LCC, HUM

AAH 104 - Arts of China

Course Units: 1.0 (**Fall: Lullo**) This survey covers works of art and artistic traditions in China from the Neolithic period to the early 20th century. Lectures will focus on representative works in various media - calligraphy, painting, sculpture, architecture, and decorative arts - within the contexts of the tomb, court production, literati culture, Buddhist and Daoist temples, and interactions with other cultures. CC: LCC, HUM

AAH 105 - Arts of Japan

Course Units: 1.0 (**Winter: Lullo**) This introduction to the arts of Japan from the Neolithic period to the 20th century will focus on key monuments of sculpture, architecture, painting, calligraphy, gardens, printing, and other arts within their historical and cultural contexts. Themes discussed include: materials and technologies, sacred and profane spaces, patrons and viewers, tradition and modernity, and the creation of a distinctly "Japanese" aesthetic. CC: LCC, HUM

AAH 106 - Arts of India

Course Units: 1.0 (**Spring: Lullo**) This course is designed as an introduction to ways of seeing, understanding, and questioning the visual arts in India. You will learn how the visual arts (cities, architecture, monuments, statues and painting) have informed us about the history, culture, and religion of India from the rise of civilization to the colonial period. It is important to approach the works we will study not simply as objects of aesthetic taste, but as meaningful and functional to those who commissioned, used, created, and experienced them. In addition to studying the social and political nature of the arts, a large portion of this course looks at works that served to activate the sacred within and across several religious belief systems, including Buddhism, Hinduism, and Islam. CC: LCC, HUM

AAH 111 - The Art and Architecture of Ancient Greece

Course Units: 1.0 (**Spring: Matthew**) A survey of the art and architecture of ancient Greece and the Hellenistic world which examines origins, development, influences and the contextual meaning of material culture. We will examine its importance to the individual, the state, and other cultures contemporary with Greece and the Hellenistic Kingdoms. We will be considering a variety of art forms including architecture, sculpture, painting, and metalwork. **Cross-Listed:** CLS 164 CC: LCC, HUM

AAH 112 - The Art and Architecture of Ancient Rome

Course Units: 1.0 (**Fall: Matthew**) A survey of the art and architecture of the ancient Roman world which examines origins, development, and the contextual meaning of material culture for the state, the individual and various social groups. Rome's relationship with non-Roman peoples around the Mediterranean basin, Northern Europe and the East will be an important part of the course. We will be considering a wide variety of art forms including architecture, sculpture, painting, glassmaking, ceramics and metalwork. **Cross-Listed:** CLS 165

AAH 114 (214) - The Golden Age of Venice: Art and Architecture in "The Most Serene Republic"

Course Units: 1.0 (**Not Offered this Academic Year**) An introduction to the art and architecture of the Republic of Venice during the period of its economic, political, and artistic "golden age" - from the 14th through the 17th centuries. We will consider the many relationships between the material culture of the city, its maritime and land-based empires, and Venice's role as a commercial and cultural power in Western Europe during a period of great change. Objects and structures ranging from oil paintings to the new invention of printed books, not to mention the building in which they were created and used, will be examined from multiple points of view: materials, fabrication and workshop practice, artistic reputation, patronage and costs, site and functions, innovation and tradition. CC: HUM

AAH 115 (218) - Leonardo da Vinci: Science, Art, and Technology in the Early Modern Era

Course Units: 1.0 (**Not Offered this Academic Year**) This course explores the history of science and technology during a fascinating and complex period when "modern" sciences and engineering are just beginning to emerge in Western Europe. Our focus will be on the artist and thinker Leonardo da Vinci, whose writings, drawings and other works of art provide a vivid picture of the state of imagination, observation, and the pursuit of scientific and technological knowledge, both theoretical and practical, during a time of great change. Leonardo's remarkably varied interests will allow us to study a wide range of subjects, from botany, optics and astronomy to hydraulic, civil and military engineering; from mining and metallurgy to anatomy and medicine; from diving bells to flying machines. This course has no prerequisites. **CC: WAC**

AAH 116 - Rome in the Age of Michelangelo

Course Units: 1.0 (**Winter: Matthew**) The most famous artist and the most famous city in the history of Western culture. How did the much earlier and long-lived fame of Rome affect its most famous artist, and how did both interact with the equally long-lived institution of the Christian papacy? We will examine how culture, language, politics, warfare and religion all intertwined in the art and architecture of the period, particularly as exemplified in the career of Michelangelo, a native of Florence who spent the majority of his working life in Rome.

AAH 117 - Pyramids to Skyscrapers: An Introduction to the History of Architecture

Course Units: 1.0 (**Spring: Matthew**) This course is a wide-ranging survey that will introduce students to the history of humankind's built environment within the Western tradition, with excursions to the Middle East. The course is organized around a series of key monuments that will help organize our approach to each period, and we will proceed chronologically. We will consider design, materials and techniques, patronage, function, and the evolution of the professions of builder and architect. We will also ask what buildings meant to the societies that built them, and how those meanings might have changed, and been manipulated, over time. **CC: HUM**

AAH 160 - Art and Architecture of the United States

Course Units: 1.0 (**Not Offered this Academic Year**) An introductory survey of the visual culture of the United States from colonial times through the present including painting, sculpture, architectural structures, photography, folk traditions and objects more recently defined as "material culture." Artists and media are situated and studied within the context of broader cultural, political and social themes. Emphasis on visual and textual analysis. **CC: HUM**

AAH 163 - Latin American and Caribbean Art of the 19th and 20th Century

Course Units: 1.0 (**Fall: Cox**) An examination of the major aspects of Latin American and Caribbean art from the early 19th through the 20th century. Emphasis is placed on integrating the social and political background of the various cultures with the key artists, artistic issues and movements of particular countries and periods. Topics to be covered include: the influence of the major art academies in Mexico, Brazil and Ecuador, the strong links between art and politics, indigeneity, woman as artist and subject, and the ongoing dialogue with the art of Europe and later the United States. **CC: LCC, HUM**

AAH 194 - Visual Culture of Communist China, 1919 to Present

Course Units: 1.0 (**Spring: Lullo**) This course explores the relationship between ideology and visual culture in China, from the founding of the Communist Party in 1919, to Mao Zedong's prescriptions at the 1942 Yan'an Conference of Literature and Art, to art policy after the founding of the People's Republic of China in 1949. Readings and discussion will cover the range of adherence and resistance to the official party line by art workers. Topics include expressionism, socialist realism, peasant art, "wound art," cynical realism, political pop, and the avant-garde, as seen in painting, sculpture, architecture, posters, advertising, video, performance, and the material culture of quotidian life. **CC: LCC, HUM**

AAH 205 - The Art and Science of Painting

Course Units: 1.0 (**Winter: Matthew**) A historical and chemical grounding in the topic of painting and its impact on society, with a focus on the 14th to the 17th centuries. Topics include inorganic and organic pigments and binders used in late medieval workshops, fresco painting, the tempera tradition, and oil painting in the Renaissance (properties of oil, mixing pigments, glazing, drying). Students will work with primary sources and secondary literature, and engage in laboratory experimentation. **Cross-Listed: CHM 090 CC: SET, HUM**

AAH 208 - The Business of Visual Art and Contemporary Entrepreneurship

Course Units: 1.0 (**Winter: Cox**) In this course students will study and learn the business of the art world and entrepreneurship in the visual arts from the early 20th century through today. Topics to be covered include the economics of the art market and the commodity of art, auction houses, private collectors, art fairs, gallery ownership, art foundations, non-for-profits, and art criticism. Group assignments, field trips and guest lectures form a large component of the course. **CC: LCC, HUM**

AAH 218 - Creative Placemaking and the Social Impact of Art

Course Units: 1.0 (**Spring: Cox**) A study of the theory, and practice of culturally driven community development with a focus on urban renewal, social ecosystems, regenerative communities, equity and diversity. Through the study and analysis of case studies, field research and workshops, students will develop creative placemaking proposals that support and create sustainable and connected communities. Experiential team based learning collaborators will include community partners, organizations, businesses and mentors from the City of Schenectady. Students will see and experience first-hand the transformational impact of creative placemaking and gain skills for successful project management that also support the development of an entrepreneurial mindset. **CC: HUM**

AAH 220 - Reformation, Counter-Reformation, Revolution

Course Units: 1.0 (**Not Offered this Academic Year**) This course will cover the major European art movements of the 17th and 18th centuries. It will be structured chronologically and treat the art of the Catholic Counter-reformation, the "Golden Age" in the Netherlands, the art under the absolute monarchy in France, the Rococo period, and the rise of Neo-classicism during the Enlightenment. We will examine the stylistic characteristics of these major movements, and explore the relationships between art and religious, political, and cultural history. **CC: LCC, HUM**
Note: Course was previously titled "European Baroque Art and Architecture: 17th and 18th Century."

AAH 222 - History of Photography

Course Units: 1.0 (**Fall, Spring: Ogawa**) An introductory survey of the history of photography from its pre-history to the present. We will explore the evolution of photographic expression in the period, and focus on relationships between photography and fine art, photography and popular culture, and photography and theory. We will spend time studying first-hand the original photographic works housed in Special Collections, Schaffer Library and in the Union College Permanent Collection. **CC: HUM**

AAH 223 - The Nude

Course Units: 1.0 (**Not Offered this Academic Year**) The nude in its art historical and social contexts. Traditionally considered shorthand for abstract concepts such as "truth" or "beauty," the nude is in fact a powerful index to ideas about gender, power, and sexuality in any of the historical periods which produced it. Drawing on recent scholarship, we will examine works produced in Ancient Greece, the Renaissance, and the Modern Period in social and historical context, and consider ways in which the human body has been both a stylistic vehicle for artistic expression and a social tool for constructing ideas of masculinity and femininity. **CC: LCC, HUM**

AAH 251T - Visual Culture, Urban Landscape and Politics in Washington, DC

Course Units: 1.0 (**Spring: Staff**) This course focuses on the ways Washington, DC residents, writers, politicians and critics have defined the nation's capital, exploring the dichotomy between Washington as the "lived" city, with that as the nation's public capital (and spectacle). The course examines the racial and class shifts over the last century in its residential space, its recent rapid gentrification, and the dramatic racial and class divide in both living space and working space. Moreover, the public space, such as presidential monuments, war memorials, federal museums, the White House, the Library of Congress, the Supreme Court, and the Mall are contentious political spaces as well as symbolic spaces for tourists viewing the "values" of the United States. **Cross-Listed: AMS 251T CC: Does not get LCC credit; term-abroad not outside the United States.**

AAH 260 - Nature, Art, and the Environment

Course Units: 1.0 (**Not Offered this Academic Year**) This course studies attitudes toward nature in Western Europe and North America from the Middle Ages through the 20th century. We will be examining cultural and artistic ideas related to the natural world, noting both continuity and change. In keeping with the interdisciplinary nature of the course, we will be examining such diverse sources as religion, literature and the printed book, gardens and landscape art, painting and printmaking, the history of botany, botanical art and scientific illustration, exploration and travel, climate and geography, agriculture and industrialization, and the development of "ecology".

AAH 265 - Environmentalism and Globalization in Contemporary Art

Course Units: 1.0 (**Fall: Cox**) This course examines artistic practices that meld science, aesthetics, and politics in imaginative and critical ways as they address environmentalism and globalization. The course primarily focuses on 21st century artists whose work takes on such subjects as pollution, biodiversity, sustainability and climate change. We will consider the blurring of the boundaries between art and activism and the many art genres and strategies used to address these issues from photography and sculpture to community collaborations and public art.

AAH 286 - Art and Religion of the Silk Road

Course Units: 1.0 (**Not Offered this Academic Year**) Central Asia - broadly defined as the area occupied, from East to West, by present-day western China, Mongolia, Russia, Kazakhstan, Kyrgyzstan, northern India, Pakistan, Tajikistan, Afghanistan, Uzbekistan, Turkmenistan, and Iran - has been characterized as both harsh wasteland and cultural crossroads. This course concerns the visual culture of the Silk Road of Central Asia, focusing on the roles visual culture played in establishing modes of religious imagination in medieval culture. **CC: LCC, HUM**

AAH 295H - Art History Honors Independent Project 1

Course Units: 0.0 (**TBD: Staff**)

AAH 296H - Art History Honors Independent Project 2

Course Units: 1.0 (**TBD: Staff**)

AAH 300 - Italian Art and Architecture, 14th-15th Century

Course Units: 1.0 (**Not Offered this Academic Year**) A study of art and architecture in Italy from 1100 to 1400 emphasizing religious, political, and cultural contexts and the role of the Byzantine tradition. Examination of paintings, sculpture, architecture, and the decorative arts in the major urban centers of the Italian peninsula, including Florence, Siena, Pisa, Rome and Milan, as well as the courts of northern Italy. Venetian topics are covered separately in AAH 206 and AAH 305. **Prerequisite(s):** One art history course or permission of the instructor. **CC: HUM, LCC**

AAH 304 - Renaissance Art in Italy: The 16th Century

Course Units: 1.0 (**Not Offered this Academic Year**) A study of the visual arts that emphasizes painting, prints, sculpture, and the decorative arts. Particular attention to the growth of secular art, the role of court patronage, definitions of Mannerism, the cult of the artistic genius, and the emergence of a history of art in this period. **Prerequisite(s):** One art history course or permission of the instructor. **CC: HUM, LCC**

AAH 322 - 19th-Century European Art

Course Units: 1.0 (**Not Offered this Academic Year**) An advanced course examining major artistic movements and developments after 1789. We will examine the stylistic characteristics of these major movements, and consider art-making of this century in the context of the development of industrial capitalism, colonialism, and imperialism. We will also consider the development of such modern art institutions as the art museum and the commercial gallery. **Prerequisite(s):** At least one Art History course, or by permission of the instructor. **CC: HUM, LCC**

AAH 340 - European Modern Art, 1880-1940

Course Units: 1.0 (**Winter: Ogawa**) Major developments in modernism primarily in Europe. Traces the emergence of modernist visual vocabularies in painting, graphic arts, photography, sculpture, architecture, and "decorative arts" ranging from ranging from Van Gogh's post-impressionism, through the cubist art of Picasso and Dali's dream-like surrealism. Topics include the transformations of traditional modes of art making, the proliferation of movements and "-isms," the political functions of art and exhibitions, film as an art, and the rise of abstraction. Visual and textual analysis. **Prerequisite(s):** At least one art history course, or permission of the instructor. **CC: HUM, LCC**

AAH 360 - Seminar: Visual Culture, Race and Gender

Course Units: 1.0 (**Not Offered this Academic Year**) A lecture and discussion-based course concerned with how constructions of race and sexual differentiation are played out across art history and visual culture, focusing on the visual arts of Western Europe and the United States. The first half of the course investigates the constructs of gender and race from antiquity to the middle of the 20th century as expressed in art and visual culture. The second half of the course is a close study of female artists of color living and working in the United States, grouped as African- American, Latina/Chicana, Asian and Middle Eastern and Multi-ethnic. **CC: LCC, HUM**

AAH 363 - Early American Modernism, 1900-1945

Course Units: 1.0 (**Not Offered this Academic Year**) A study of modern art in the United States from 1900-1945. Topics to be covered reflect the divergent styles, movements and influences that gave shape to the art of this period, including the rise of the avant-garde in New York City, important patrons, social realism, the WPA and the Harlem Renaissance to name a few. Art works are studied in relation to the cultural and political context of the period. Verbal and written interpretation of art; emphasis on visual and textual analysis. **CC: HUM, LCC**

AAH 366 - From Pollock to Post-Modern: European and American Art 1940-2000

Course Units: 1.0 (**Not Offered this Academic Year**) Art of the United States and Europe since World War II in critical and historical perspective, emphasizing the influence of social movements on artistic thought and expression. Topics include the impact of technology and popular culture, the subversion of the traditional boundaries between arts, the rejection of the object, and the rise of pluralism. **CC: LCC, HUM**

AAH 380 - The Floating World: Edo Prints and Printmaking

Course Units: 1.0 (**Fall: Lullo**) This course was previously a Studio-Art History mix, but now it is strictly Art History. Ukiyo-e, or "floating-world pictures," depict the urban pleasures and escapes offered in Japan's modern imperial capital of Edo (present-day Tokyo). The course will examine the history, production, and reception of ukiyo-e woodblock prints from the 17th-20th centuries, covering traditional ukiyo-e, updates during the Meiji period (1868-1912), and then Shin Hanga and Sosaku Hanga movements into the 1950s. Themes to be explored include: cityscapes, landscapes and travel; representations of beautiful men and women in bijinga; the theatre and the Kabuki stage; encounters with the west; ghosts and demons; and erotic imagery. **Cross-Listed: AVA 380 CC: LCC, HUM**

AAH 390 - The Art Museum: History, Theory, and Practice

Course Units: 1.0 (**Spring: Ogawa**) This upper-level course takes the art museum as its subject. It will examine the history of the art museum and its roots in late 18th century ideas about knowledge, display, and democratic politics, and trace the growth of the art museum over the course of the 19th and 20th centuries in the context of changing cultural notions of "the public," philanthropy, and modernist and avant-garde art practice. The course will be supplemented by visits to local art museums. This course also serves as a prerequisite to TAB 336T: Three Weeks in the Louvre. **CC: LCC, HUM**

AAH 440 - Seminar: Special Topics in Art History

Course Units: 1.0 (**Not Offered this Academic Year**) Writing-intensive, research-oriented, discussion-based seminar that involves comparative methodologies; designed principally for majors. Topics vary. **CC: HUM**

AAH 490 - Art History Independent Study 1

Course Units: 1.0 (**TBD: Staff**)

AAH 491 - Art History Independent Study 2

Course Units: 1.0 (**TBD: Staff**)

AAH 492 - Art History Independent Study 3

Course Units: 1.0 (TBD: Staff)

AAH 493 - Art History Independent Study 4

Course Units: 1.0 (TBD: Staff)

AAH 495 - Museum Internship 1

Course Units: 1.0 (TBD: Staff) Students who have largely fulfilled the requirements for a concentration in art history may be able to intern at the Albany Institute of History and Art, the Hyde Collection, the Schenectady Museum, other regional museums, or the National Buildings Museum in Washington, D.C. The latter is offered in conjunction with Union's spring term in Washington, D.C. Permission of the Chair required.

AAH 496 - Museum Internship 2

Course Units: 1.0 (TBD: Staff) Students who have largely fulfilled the requirements for a concentration in art history may be able to intern at the Albany Institute of History and Art, the Hyde Collection, the Schenectady Museum, other regional museums, or the National Buildings Museum in Washington, D.C. The latter is offered in conjunction with Union's spring term in Washington, D.C. Permission of the Chair required.

AAH 498 - Art History Senior Thesis 1

Course Units: 0.0 (TBD: Staff) Part 1 of a 2 term thesis; grades pass/fail.

AAH 499 - Art History Senior Thesis 2

Course Units: 2.0 (TBD: Staff) Two term credits when completed.

Accounting

ACC 100 - Survey of Accounting

Course Units: 1.0 (TBD: Staff) A survey of selected topics within various areas of accounting, such as managerial accounting, financial accounting, and tax accounting. Emphasis will be on concepts and not on record-keeping.

Dance

ADA 010 - Ballet 1

Course Units: 0.0 (TBD: Staff) An introduction to the basic techniques of classical ballet. Each class incorporates proper body alignment, balance and self-awareness of the classical form. Students learn ballet technique and style by combining a barre warm-up, centre phrases, and across-the-floor combinations. **Prereq/Corequisite(s):** For beginner level.

ADA 011 - Ballet 2

Course Units: 0.0 (TBD: Staff) This intermediate ballet level is designed for dancers who have been trained in the classical form. Class includes complex combinations at the barre and in the center. Musicality will be stressed as well as progressive combinations, physical control, and variations through turns, jumps, adagios and allegros. **Prereq/Corequisite(s):** For intermediate level.

ADA 012 - Ballet 3

Course Units: 0.0 (**TBD: Staff**) This advanced ballet level emphasizes classical academic training as well as repertoire. Depending on student's ability and strength, pointe work will be added. Variations from contemporary or traditional ballets will be learned in class. Dancers who have a desire to perform are encouraged to attend. **Prereq/Corequisite(s):** For advanced level.

ADA 020 - Jazz Dance 1

Course Units: 0.0 (**TBD: Staff**) An introduction to the basic technique and vocabulary of Jazz dance. Each class will incorporate dynamic body movements, flexibility, strength and coordination through center combinations and across the floor progressions. This class is danced to contemporary music. **Prereq/Corequisite(s):** For beginner level.

ADA 021 - Jazz Dance 2

Course Units: 0.0 (**TBD: Staff**) The intermediate jazz class focuses on different styles such as the classical, funky and contemporary genres. The class offers technical progressions with an increased focus on quality of movement. **Prereq/Corequisite(s):** For intermediate level.

ADA 023 - Broadway Dance

Course Units: 0.0 (**TBD: Staff**) This class focuses on ensemble movements done in musicals. Students will learn a variety of numbers from shows including repertoire from both past and present productions. Broadway styles will include the work of famous choreographers such as Jerome Robbins, Michael Bennett, Bob Fosse and Twyla Tharp. **Prereq/Corequisite(s):** For all levels.

ADA 030 - Modern Dance 1

Course Units: 0.0 (**TBD: Staff**) This contemporary form focuses on gaining an in depth understanding of how the body moves, proper placement, alignment, and flexibility. This class explores different ways of using organic and creative movements, the floor and traveling through space. **Prereq/Corequisite(s):** For beginner level.

ADA 031 - Modern Dance 2

Course Units: 0.0 (**TBD: Staff**) Delve into the dynamics, rhythms, phrasing, and use of space unique to contemporary dance while developing technical strength. This class will reinforce your physical possibilities and build your inner potential towards dance expression. **Prereq/Corequisite(s):** For intermediate level.

ADA 036 - Pilates for Performers

Course Units: 0.0 (**TBD: Staff**) Students learn the basic, intermediate, and advanced exercises of the Pilates workout. Specifically, the class focuses on techniques that strengthen the core, enhance flexibility and body placement. This class is an ideal training base for all performing artists. **Prereq/Corequisite(s):** For all students.

ADA 038 - Yoga Dance

Course Units: 0.0 (**TBD: Staff**) This cross training class consists of Yoga warm ups, stretches and a series of choreographed flows and poses. Dancers will gain flexibility; improve strength and peace of mind in this therapeutic movement class. **Prereq/Corequisite(s):** For all levels.

ADA 040 - Afro-Dance

Course Units: 0.0 (**TBD: Staff**) A class built for everyone who wants to dance to African rhythms. Emphasizes stamina and the learning of exciting dance routines. A cultural dance style and technique welcoming dancers of all levels into a rich range of African dance movements. **Prereq/Corequisite(s):** For all students.

ADA 041 - The Moving Body

Course Units: 0.0 **(TBD: Staff)** This cross training dance class taught to music and contemporary dance vocabulary focuses on the study of muscular elongation and body awareness. Special emphasis on placement, strength, endurance and flexibility will enhance the practitioner's potential. Open to all interested in learning and experiencing the fundamentals of a physical discipline.

ADA 042 - Franklin Method

Course Units: 1.0 **(TBD: Staff)** This movement class analyses daily actions, regiment of exercise and mental training to inform and empower impactful and efficient movement.

ADA 045 - Tap Dance 1

Course Units: 0.0 **(TBD: Staff)** For all students who want to learn tap dance technique. This class focuses on the study of basic footwork, rhythms and combinations. **Prereq/Corequisite(s):** For beginner level.

ADA 046 - Tap Dance 2

Course Units: 0.0 **(TBD: Staff)** This class explores intricate rhythms that will enhance the quality of tap sounds, speed and its vocabulary. Students with previous experience will be able to expand their expertise. **Prereq/Corequisite(s):** For intermediate level.

ADA 051 - Rehearsal and Production

Course Units: 0.0 **(TBD: Staff)** Students are invited to participate in dance productions in a variety of capacities, both on-stage and off-stage. **Prerequisite(s):** By Dance Director's invitation

ADA 060 - Hip Hop 1 Dance Class

Course Units: 0.0 **(TBD: Staff)** This class gives students the opportunity to learn the basics of the hip hop form, based on routines from street jazz, vogueing, social and fundamental hip hop. This style gives students a way to gain strength, body awareness and dance skills to today's hip hop music. **Prereq/Corequisite(s):** For all students.

ADA 061 - Hip Hop 2 Dance Class

Course Units: 0.0 **(TBD: Staff)** This intermediate class provides dancers with a high energy, and innovative dance style. Hip Hop is urban, it's diverse, and it's forever changing. **Prereq/Corequisite(s):** For intermediate level.

ADA 070 - Choreography - Modern

Course Units: 0.0 **(TBD: Staff)** This creative class gives students the opportunity to focus on a particular theme or concept to generate choreographic material. The dance piece will aim to produce a contemporary vision that will be presented as part of the Winter Dance Concert. **Prereq/Corequisite(s):** For intermediate level.

ADA 071 - Choreography - Jazz

Course Units: 0.0 **(TBD: Staff)** This class works toward the composition of innovative dance movements found in the contemporary jazz form. Students explore a wide variety of movements as a mean of self-expression. The finalized choreography will be presented as part of the Winter Dance Concert. **Prereq/Corequisite(s):** For intermediate level.

ADA 072 - Choreography - Ensemble

Course Units: 0.0 **(TBD: Staff)** This class concentrates on creating choreography that allows the opportunity to collaborate and strive for group impact on stage. Choreographic material will be presented as part of the Winter Dance Concert series. **Prereq/Corequisite(s):** For intermediate level.

ADA 073 - Choreography - Rhythms

Course Units: 0.0 (**TBD: Staff**) This practicum focuses on developing various rhythms to create vibrant sounds for a challenging choreography. The exploration of dynamic tap steps will be presented in the Winter Dance Concert series. **Prereq/Corequisite(s):** For intermediate level.

ADA 074 - Choreography - Ballet

Course Units: 0.0 (**TBD: Staff**) This choreography class emphasizes either the traditional or contemporary ballet vocabulary. Dancers will be involved in a creation that embraces their expertise. This piece will be presented in the Winter Dance Concert series. **Prereq/Corequisite(s):** For intermediate level.

ADA 130 - The Dance Experience

Course Units: 1.0 (**TBD: Staff**) This exploratory course introduces the many facets of the art of making dances. Through lectures, workshops and performances, students discover choreographic tools, new dance vocabulary and inner skills. Special emphasis on creative abilities, built on trust, and performances. Students work as choreographers in individual and collective dance pieces to be performed publicly at the Steinmetz Symposium and An Intimate Afternoon with Dancers. **CC:** HUM

ADA 140 - American Musical Theatre and Dance

Course Units: 1.0 (**TBD: Staff**) This course is an introduction to the American Musical from Vaudeville and Minstrel Shows to today's contemporary Broadway shows. Through lectures, video viewing, and workshops, students learn the historical background that focuses on the work of lyricists, composers, dancers, singers, choreographers, directors and producers. This unique American entertainment art form reflects American diversity and culture, changing times, values and trends. **Cross-Listed:** ATH 140 **CC:** LCC, HUM

ADA 142 - Dance in America

Course Units: 1.0 (**TBD: Staff**) An introduction to dance in America from Native American to contemporary diverse styles, approached through lecture, video viewing, and dance workshops. A voyage through time from the French Court with the birth of Classical Dance through the twentieth century with the development of Modern and Post-Modern Dance. Study of the advent of new music and dance with the African American heritage and American contributions towards social dancing. Special emphasis on historical background and international influences, studying the dancers, choreographers, traditions, and trends that influence the making of contemporary dance as an art and form of expression. **CC:** LCC, HUM

ADA 150 - Staging Exploration in Theatre and Dance

Course Units: 1.0 (**TBD: Staff**) This course is based on the close examination of a particular period or theme of multidisciplinary artistic production that offers students an immersion into important developments in performative expressions. This course explores dynamic movements in the artistic avant-garde, its historical background, and its principal creators in theater, dance and associated performing arts, through discussions, lectures, studio work, and collaborative creation. The resulting exploration is produced and performed at the Winter Dance Concert series. **Cross-Listed:** ATH 150 **CC:** HUM

ADA 153 - Histoire de la danse, Danse de l'histoire/History of Dance, Dance of History

Course Units: 1.0 (**TBD: Staff**) Examination of Western European dance and dance texts as revelatory of broader historical and cultural patterns, with special analyses of dance as a key tool of nation building (as with the court of Louis XIV) and/or a central medium of artistic creation (as in 1920's Paris). Primary focus on France as creator, user, and potential abuser of dance's power, but some attention given other European models (Berlin, St. Petersburg, London). Readings from theoreticians, historians, and dance litterateurs (Moliere, Gautier, Cocteau). **Cross-Listed:** FRN 421 and MLT 211 **CC:** HUL, LCC

ADA 160 - Dance for the Camera

Course Units: 0.0 (**TBD: Staff**) This course focuses on the process of making dances for the camera, uniting the various aesthetics of movement and the practical elements of recording visual material. Since the arrival of the digital chip, the light camera, and various computer programs, we have seen a revolution in dances created for the screen, Slideroom, YouTube or Vimeos. Methods will focus on conceptualized movement, phrase

development, compositional tools and framing, as well as design production. Through discussions, decision-making, individual and collaborative work, the designated choreographer/director, crew and cameraperson will develop a sense of craft used in the art of making dances for video viewing. The student challenge will be to invent a unique dance language to communicate ideas, intentions and feelings through the medium of video making. Dance moves - with their complexity, richness, rhythmical and compelling imagery - will be at the core of their creative work. **CC:** HUM

ADA 295H - Choreography Honors 1

Course Units: 0.0 (**TBD: Staff**) This course seeks to develop students' choreographic potential through research and exploratory exercises. Methods focus on concept, phrase development, compositional tools, design and artistic presentation. Through discussions, decision-making, individual and group work, the choreographer develops a sense of craft used in the art of making dances. A weekly dance technique class is required.

Prerequisite(s): ADA 130 Dance Experience or by Dance Director's permission. **CC:** HUM

ADA 296H - Choreography Honors 2

Course Units: 1.0 (**TBD: Staff**) Students create choreography and work in collaboration with dancers, designers or any inter-disciplinary artists to fulfill their creative objectives. The final dance piece is presented publicly in the Dance Concert series (winter) or Steinmetz Dance Performance (spring). A weekly dance technique class is required. **Prerequisite(s):** ADA 295H **CC:** HUM

ADA 350 - Choreography

Course Units: 1.0 (**TBD: Staff**) This course emphasizes the creation of a dance piece in collaboration with selected dancers, designers (costumes, props or projections), musicians or any interdisciplinary artists. Students must create a group choreography that will be innovative, express their own style, a specific theme or concept. Students will act as artistic directors, overseeing their creation and being in charge of their collaborators. Their choreography will be presented either in the Winter Dance Concert series or at the Steinmetz Symposium. A weekly technical dance class is required.

Prerequisite(s): ADA 130 **CC:** HUM

ADA 370 - Dance Internship

Course Units: 1.0 (**TBD: Staff**) As a professional work/study experience, students can elect to pursue a specific area of interest in a one-term internship with a professional dance company. The precise form of this project will vary with the student and area of focus, but may include production, performance, management, or administrative work in the field or other projects approved by the Dance Director. Appropriate credit is granted upon completion of the internship. This course will be taken Pass/Fail. Appropriate advisement and guidance will be available to the student.

Prerequisite(s): Minor in Dance.

ADA 490 - Dance Project 1

Course Units: 1.0 (**TBD: Staff**) Students can elect to pursue a specific area of study. Subjects might include researching dance styles or techniques, a choreographer or dancer's life and achievements, a dance craze as well as creating a specific dance piece. Their research can be presented through workshops, the restaging of a masterpiece or the creation of a dance piece, the making of a dance film or documentary.

ADA 491 - Dance Project 2

Course Units: 1.0 (**TBD: Staff**) Students can continue pursuing a specific area of study. Subjects might include researching dance styles or techniques, a choreographer or dancer's life and achievements, a dance craze as well as creating a specific dance piece. Their research can be presented through workshops, the restaging of a masterpiece or the creation of a dance piece, the making of a dance film or documentary.

ADA 492 - Dance Project 3

Course Units: 1.0 (**TBD: Staff**) Students can create their own dance project that could extend to volunteer work in the community, including workshops in schools and centers and get involved in dance presentations or choreographic work outside Union premises. .

WMC 354T - Balinese Performing Arts Mini-term

Course Units: 1.0 **(TBD: Staff)** This mini-term focuses on the study of the performing Arts of Bali. Students will have daily group instruction with Masters Performers of gamelan (the Balinese orchestra of gongs and xylophones) and dance, as well as additional lessons in an art form one's choosing (e.g. painting, drumming, mask making, etc.). This instruction will culminate in a final performance. Students will also visit many important artistic and ritual locations, attend professional shows and meet with local Balinese people in a variety of contexts. No previous experience is required. **CC:** LCC

Africana Studies

AFR 100 - Introduction to Africana Studies

Course Units: 1.0 **(TBD: Staff)** An interdisciplinary introduction to the field of Africana Studies. This course will examine the issues and perspectives-social, economic, political, historical, and cultural-of the peoples of Africa and the African diaspora. **CC:** LCC

AFR 295H - Africana Studies Honors Independent Study 1

Course Units: 0.0 **(TBD: Staff)**

AFR 296H - Africana Studies Honors Independent Study 2

Course Units: 1.0 **(TBD: Staff)**

AFR 490 - Africana Studies Independent Study 1

Course Units: 1.0 **(TBD: Staff)**

AFR 491 - Africana Studies Independent Study 2

Course Units: 1.0 **(TBD: Staff)**

AFR 498 - Africana Studies Senior Thesis 1

Course Units: 0.0 **(TBD: Staff)**

AFR 499 - Africana Studies Senior Thesis 2

Course Units: 2.0 **(TBD: Staff)** Prerequisite(s): AFR 498

American Studies

AMS 251T - Washington DC: Cultural and Political Spaces in America's Capital

Course Units: 1.0 **(TBD: Staff)** This course focuses on the ways Washington, DC residents, writers, politicians and critics have defined the nation's capital, exploring the dichotomy between Washington as the "lived" city, with that as the nation's public capital (and spectacle). The course examines the racial and class shifts over the last century in its residential space, its recent rapid gentrification, and the dramatic racial and class divide in both living space and working space. Moreover, the public space, such as presidential monuments, war memorials, federal museums, the White House, the Library of Congress, the Supreme Court, and the Mall are contentious political spaces as well as symbolic spaces for tourists viewing the "values" of the United States. **CC:** Does not get LCC credit; term-abroad course not outside the United States.

AMS 498 - American Studies Senior Thesis 1

Course Units: 0.0 **(TBD: Staff)**

AMS 499 - American Studies Senior Thesis 2

Course Units: 0.0 (TBD: Staff)

Asian Studies

AIS 295H - Asian Studies Honors Independent Project 1

Course Units: 0.0 (TBD: Staff)

AIS 296H - Asian Studies Honors Independent Project 2

Course Units: 1.0 (TBD: Staff)

AIS 490 - Asian Studies Independent Study 1

Course Units: 1.0 (TBD: Staff)

AIS 491 - Asian Studies Independent Study 2

Course Units: 1.0 (TBD: Staff)

AIS 492 - Asian Studies Independent Study 3

Course Units: 1.0 (TBD: Staff) Prerequisite(s): AIS 491

AIS 498 - Asian Studies Senior Project 1

Course Units: 0.0 (TBD: Staff) Interdisciplinary investigation of a topic in Asian Studies.

AIS 499 - Asian Studies Senior Project 2

Course Units: 2.0 (TBD: Staff) Interdisciplinary investigation of a topic in Asian Studies.

Music

AMU 010 - Instrumental and Vocal Lessons

Course Units: 0.0 (TBD: Staff) Private lessons are offered in voice, keyboard, guitar, wind, string, brass, percussion and world instruments once a week at a cost of \$500 per term. Scholarships are available by application to music majors, IDs, and minors with demonstrated need to offset the cost of lessons. For registration information and a list of approved instructors see Shou-Ping Liu, Director of Performance.

AMU 012 - Union College Japanese Drumming Ensemble

Course Units: 0.0 (TBD: Staff) The Union College Japanese Drumming Ensemble and Global Fusion Band (Zakuro-Daiko) rehearses weekly on a variety of Japanese drums and other types of global instruments. The ensemble regularly performs both on- and off-campus. No previous musical experience is required, though members need to audition/interview to determine participation at the discretion of the instructor. See Professor Matsue.

AMU 014 - Union College Choir

Course Units: 0.0 (**TBD: Staff**) The Union College Chorale performs works from a broad chronological and stylistic range, including western and non-western traditions. The ensemble performs at least once each term and normally performs at one off-campus venue each year. This ensemble is open by audition to all students and prior experience is not necessary. See Shou-Ping Liu, Director of Performance.

AMU 015 - Union College Jazz Ensemble

Course Units: 0.0 (**TBD: Staff**) The Union College Jazz Ensemble meets weekly and performs throughout the year in both formal and informal settings. Experience in improvisation is desirable but not required. Instrumentalists and vocalists are welcome to audition. See Professor Olsen.

AMU 016 - Union College Chamber Choir

Course Units: 0.0 (**TBD: Staff**) The Union College Camerata Singers is a select vocal ensemble that performs music from a span of five centuries. The ensemble performs one concert a year.

AMU 017 - Union College and Community Orchestra

Course Units: 0.0 (**TBD: Staff**) The Orchestra meets once a week and presents at least one concert each term. The Orchestra is open by audition to all students and members of the community. Section and principal chairs are assigned according to the audition results. See Shou-Ping Liu, Director of Performance.

AMU 018 - Early Music Ensemble

Course Units: 0.0 (**TBD: Staff**) The Early Music Ensemble, open to both singers and instrumentalists, is devoted to the study and performance of music from the Middle Ages through the Early Viennese Era. Participants play on both modern instruments and reproductions of historic instruments, including the harpsichord. Emphasis is placed upon historical performance practices, as described in music treatises and other documents and as understood by scholars and performers today. The Ensemble, open by audition, rehearses twice a week. See Professor McMullen.

AMU 100 - Elements of Music Theory

Course Units: 1.0 (**TBD: Staff**) An introductory survey of the main aspects of music theory and practice including rhythm, intervals, scales and keys, melody, harmony, and form, complemented by hands-on creative work in the Music Technology Studio. Designed for students with a minimal background in music **CC: HUM**

AMU 101 - Theory 1: Diatonic Harmony

Course Units: 1.0 (**TBD: Staff**) Traditional harmony and modulation approached through short written exercises and listening assignments. **Prerequisite(s):** Ability to read (sing/play) music. **CC: HUM**

AMU 102 - Theory 2: Chromatic Harmony

Course Units: 1.0 (**TBD: Staff**) Chromatic harmony: models drawn from late Classical and Romantic composers. **Prerequisite(s):** AMU 101 or permission of the instructor. **CC: HUM**

AMU 110 - Class Piano 1

Course Units: 1.0 (**TBD: Staff**) This course, aimed at students with no experience in piano playing, integrates basics of music theory with learning to play the piano. Students will first learn to read treble and bass clefs at the keyboard and then come to an understanding of keys and basic harmonic principles while learning to play music from a variety of repertoires. **CC: HUM**

AMU 111 - Class Piano 2

Course Units: 1.0 (**TBD: Staff**) A continuation of Class Piano I. Students learn to perform intermediate-level piano works from classical and popular music repertoires, develop sight reading skills, and learn to harmonize melodies with more than three chords. **Prerequisite(s):** AMU 110 or permission of the instructor. **CC:** HUM

AMU 120 - Making Music, Shaping Selves: Introduction to World Music

Course Units: 1.0 (**TBD: Staff**) Introduces music from various world areas including Africa, Latin America, Asia, and Europe through live performance, lecture, video and audio. Students will increase familiarity with a wide range of musical styles while also exploring the relationship between music, identity and society. **Cross-Listed:** ANT 148 **CC:** LCC, HUM

AMU 125 - World Religions and Music

Course Units: 1.0 (**TBD: Staff**) Music, deemed by some to be a gift from the Divine, continues to play an important role in the histories of all religions. Through an examination of three religions - Buddhism, Judaism, and Christianity - students will come to an understanding of the intricate relationships among music, theology, liturgy, ritual, and human religious expressions in different cultures and at different time periods. **CC:** HUM, LCC

AMU 130 - American Music

Course Units: 1.0 (**TBD: Staff**) American music-cultures approached through performance, lecture, video, and audio. Survey samples from popular, classical, and folk traditions. **CC:** HUM

AMU 131 - Music of Black America

Course Units: 1.0 (**TBD: Staff**) Black music in America from its African beginnings to present-day pop styles, approached through live performance, lecture, video, and sound recordings. Special emphasis on gospel, blues, jazz, and rap. **Prereq/Corequisite(s):** Not open to students who have taken AMU 132. **CC:** LCC, HUM

AMU 132 - The History of Jazz

Course Units: 1.0 (**TBD: Staff**) A study of the important personalities and trends in the evolution of jazz, approached through reading, video and sound recordings, and live performance. **Prereq/Corequisite(s):** Not open to students who have taken AMU 131. **CC:** LCC, HUM

AMU 133 - Music of Latin America

Course Units: 1.0 (**TBD: Staff**) Latin American music-cultures approached through live performance, lecture, video, and audio. Survey samples from folk, popular, and classical traditions, with special emphasis on the musics of Cuba and Brazil. **CC:** LCC, HUM

AMU 134 - Music and Culture of Africa

Course Units: 1.0 (**TBD: Staff**) Through an examination of traditional and popular music from across the continent, students will gain a better understanding of the integral role played by music in African culture. **CC:** LCC, HUM

AMU 140 - Music Technology: Transforming Sound, Making Music

Course Units: 1.0 (**TBD: Staff**) An introduction to the tools and techniques of organizing sound in meaningful ways using computers. Students learn basic recording techniques, audio editing, mixing, sequencing, synthetic sound design, and basic compositional techniques in order to facilitate the creation of original, brief compositions. **CC:** HUM

AMU 160 - From Chant to Mozart

Course Units: 1.0 (**TBD: Staff**) A study of compositions from the ninth century through the time of the French Revolution. Among the many topics included are Gregorian chant, music for kings and queens from the Renaissance, the effect of the Reformation and Counter-Reformation on music; the invention of opera (the predecessor of the musical); Vivaldi's concertos, sacred music by Bach and Handel; and symphonies and operas by Haydn and Mozart. **CC:** HUM

AMU 161 - From Beethoven to Bernstein

Course Units: 1.0 (**TBD: Staff**) A study of compositions from the end of the eighteenth century through the present. A few of the composers we study are Beethoven, Chopin, Mendelssohn, Schubert, Clara and Robert Schumann, Wagner, Brahms, Debussy, Stravinsky, Schoenberg, Ives, Copland, Varese, Bernstein, and John Adams. **CC:** HUM

AMU 200 - Theory 3: Phrase and Form

Course Units: 1.0 (**TBD: Staff**) Larger features of music approached through analysis of scores and compositional assignments. **Prerequisite(s):** AMU 102 or permission of the instructor. **CC:** HUM

AMU 202 - Musical Thinking: World and Pop

Course Units: 1.0 (**TBD: Staff**) This course will examine music traditions outside the canon of Western classical music, including American folk, jazz and popular music as well as traditional and popular music from around the world. In order to better understand the theory and practice of these music's, students will pursue topics including the dichotomy between oral tradition and written notation; various ways of organizing pitch, rhythm, and meter; and the process of transcription. **Prerequisite(s):** AMU 100 or AMU 101 or permission of the instructor. **CC:** HUM, LCC

AMU 204 - Introduction to Composition

Course Units: 1.0 (**TBD: Staff**) The creation and notation of freestyle compositions with emphasis on individual instruction. **Prerequisite(s):** AMU 101 or permission of the instructor. **CC:** HUM

AMU 212 - Bach, Handel, and their Predecessors

Course Units: 1.0 (**TBD: Staff**) This course is a study of music composed between 1600 and 1750. A few topics that we study are the origins and development of opera from Monteverdi through Handel; the relationship between opera and the modern-day musical; the influence of dance rhythms in vocal and instrumental music; and sacred and secular music by Bach and Handel. **CC:** HUM

AMU 213 - Haydn, Mozart and Beethoven

Course Units: 1.0 (**TBD: Staff**) Vienna was the center of European art music from the late eighteenth century through the early nineteenth century. This course examines music by Haydn, Mozart, and Beethoven, as well as many less-known figures. Students come to an understanding of Vienna as one of the city's greatest musical heights through a study of symphonies, string quartets, operas, and piano sonatas. **CC:** HUM

AMU 214 - Romanticism

Course Units: 1.0 (**TBD: Staff**) European art music of the nineteenth century saw the development of countless individual musical styles, as opposed to the more homogeneous sounds of previous generations. Through listening exercises, study of scores, and historical documents students learn to distinguish characteristics of music written by composers such as Chopin, Schubert, Clara and Robert Schumann, Verdi, Wagner, and Brahms, among others. **CC:** HUM, HUL

AMU 215 - Music in the 20th & 21st Centuries

Course Units: 1.0 (**TBD: Staff**) The study of significant styles and developments in the music of the last hundred years (both "classical" and popular), approached through analysis, performance, and composition. **Prerequisite(s):** AMU 101 or permission of the instructor. **CC:** HUM

AMU 220 - Mapping Musical Lives: Ethnography of Performing Arts

Course Units: 1.0 (**TBD: Staff**) This seminar explores the relationship between music and culture through live performance, discussion, video and audio, and workshops in a variety of world music areas. Students will also consider how one conducts research on performing arts, culminating in a focused project on music-making in the community. Students thus will encounter diverse peoples and their musical practices in cross-cultural comparison while also exploring research methodology through their own work. **Cross-Listed:** ANT 274 **Prerequisite(s):** AMU 101, AMU 120 / ANT 148 or permission of the instructor. **CC:** LCC, HUM

AMU 221 - From Rhythm and Blues to Radiohead: The History of Rock & Roll

Course Units: 1.0 (**TBD: Staff**) Explores the historical development of Anglo-American rock-and-roll through lecture, video and sound recordings. This course will rely heavily on film, with an accompanying series featuring documentaries, concert films, musicals and more. Students will gain a greater understanding of the socio-cultural contexts that informed stylistic change, as well as consider the continued relevancy of rock today. **Prerequisite(s):** Permission of the instructor. **CC:** HUM

AMU 230 - Musical Theater & Opera Scenes Workshop

Course Units: 1.0 (**TBD: Staff**) This class aims to help students discover their potential for singing, acting, and dancing through the performance of scenes from the opera and musical theater literature. Special emphasis will be given to the improvement of sight-reading. Through a combination of lecture and hands-on performance, students will also learn to understand the basics of voice types, vocal technique, and other performance-related issues in the field. Guest speakers and instructors will be invited to share their experiences with students to further their understanding of the vocal performance industry. **CC:** HUM

AMU 231 - Chamber Music Workshop

Course Units: 1.0 (**TBD: Staff**) Rehearsal and performance of chamber music primarily from Classical and Romantic periods. **CC:** HUM

AMU 232 - Jazz Workshop

Course Units: 1.0 (**TBD: Staff**) Students will perform, analyze, and compose music written in jazz idioms; students will develop skills in improvisation. **CC:** HUM

AMU 233 - Japanese Drumming Workshop

Course Units: 1.0 (**TBD: Staff**) This course introduces Japanese drumming, exploring its origins and subsequent development as a national art form following WWII, and then its ultimate spread globally as a voice of Asian-American activism. The course emphasizes performance on the drums and culminates in a final concert and performance project. No previous musical experience is required. **CC:** LCC, HUM

AMU 234 - Balinese Gamelan Workshop

Course Units: 1.0 (**TBD: Staff**) This course introduces Balinese music and culture, exploring the importance of music, dance, and religion in the everyday life of Balinese people. The course emphasizes performance of Balinese gong kebyar (an orchestral form featuring xylophones, gongs, drums, and cymbals) and culminates in a final concert and performance project. No previous musical experience is required. **CC:** LCC, HUM

AMU 235 - Latin Percussion Workshop

Course Units: 1.0 (**TBD: Staff**) The goal of this course is to give students an in-depth understanding of Afro-Cuban and Afro-Brazilian music through studying genres (rumba, son, mambo, salsa, comparsa, samba, forro) from inside the percussion section. In addition to ensemble work, students will research and transcribe Latin music styles. The course will culminate in a public performance/presentation at the end of the term. Entry to the course by audition; previous instrumental experience desirable but not required.

AMU 295H - Music Honors Independent Project 1

Course Units: 0.0 (**TBD: Staff**)

AMU 296H - Music Honors Independent Project 2

Course Units: 1.0 (**TBD: Staff**) **Prerequisite(s):** AMU 295H

AMU 303 - Conducting

Course Units: 1.0 (**TBD: Staff**) Fundamentals of conducting vocal and instrumental ensembles, including score reading and preparation, beat patterns, gestures, and rehearsal techniques. **Prerequisite(s):** permission of the instructor. **CC:** HUM

AMU 304 - Projects in Composition and Performance

Course Units: 1.0 (**TBD: Staff**) Self-selected group and individual projects in composition or performance or both. Instrumental ability not necessarily a prerequisite. **CC:** HUM

AMU 305 - Vocal Arranging

Course Units: 1.0 (**TBD: Staff**) Writing and arranging for the voice, in folk, classical, jazz, and popular contexts. **Prerequisite(s):** AMU 101 or permission of the instructor. **CC:** HUM

AMU 306 - The Evolution of Popular Song

Course Units: 1.0 (**TBD: Staff**) From minstrelsy and vaudeville through Tin Pan Alley, Motown, the Beatles, Burt Bacharach, and Billy Joel, this course will examine the creation, performance, transmission, and reception of popular song. In addition to analyzing lyrical/musical content as well as historical context, students will compose words and music in the styles of established master songwriters. **Prerequisite(s):** AMU 101 or permission of the instructor. **CC:** HUM

AMU 307 - The Art and Music of Radiohead

Course Units: 1.0 (**TBD: Staff**) This course focuses on the music and art of seminal rock group Radiohead. Formed in the 1980s in Oxfordshire, UK, Radiohead since has released nine critically acclaimed studio albums and more than 40 music videos, topping the charts for decades, and rivaling The Beatles for a top spot in the pantheon of British rock legends. They are widely respected not only for their musical innovation, involving creative modality and rhythmic organization but their ecological mindfulness, political edginess and industry changing approaches to the production of popular music, ever critical of consumer capitalism. This combination has allowed the group to maintain creative autonomy and authenticity, while garnering worldwide recognition and commercial success. The group's emergence from British synth-pop and evolution to contemporary icons will be explored through reading, listening, musical analysis, and video. **Prerequisite(s):** Permission of the instructor. **CC:** HUM

AMU 320 - Encounters with East Asian Music Cultures

Course Units: 1.0 (**TBD: Staff**) Through live performance, discussion, and composition, this course explores key characteristics of East Asian Music Cultures. Particular attention is paid to the processes of cultural exchange between China, Korea, Japan and the rest of the world that have resulted in the rich breadth of performance traditions expressed today. **CC:** LCC, HUM

AMU 340 - Early Music Seminar

Course Units: 1.0 (**TBD: Staff**) While distant in time, music of the Middle Ages and Renaissance resonates with modern times. Students learn how monks, troubadours, jongleurs, street and church musicians, and others dealt with many of the same topics expressed by today's musicians, but using

different musical languages. Students learn to hear, analyze, talk about, and write compositions in some of those musical languages from the ninth through the fifteenth centuries. Emphasis is on listening to a variety of repertoires. **CC:** HUM

AMU 490 - Music Independent Study 1

Course Units: 1.0 (**TBD: Staff**)

AMU 491 - Music Independent Study 2

Course Units: 1.0 (**TBD: Staff**)

AMU 492 - Music Independent Study 3

Course Units: 1.0 (**TBD: Staff**)

AMU 497 - Music One Term Senior Project

Course Units: 1.0 (**TBD: Staff**)

AMU 498 - Music Two Term Senior Project 1

Course Units: 0.0 (**TBD: Staff**)

AMU 499 - Music Two Term Senior Project 2

Course Units: 2.0 (**TBD: Staff**) **Prerequisite(s):** AMU 498 **CC:** WS

WMC 490 - World Music's and Cultures Independent Study

Course Units: 1.0 (**TBD: Staff**)

Anthropology

ANT 110 - Introduction to Cultural Anthropology

Course Units: 1.0 (**Fall, Winter, Spring: Staff**) The basic concepts, methodology, and findings of cultural anthropology. Examines the similarities and diversity of human societies through in-depth case studies and cross-cultural comparisons. **CC:** LCC, SOCS

ANT 111 - Cultures Through Film

Course Units: 1.0 (**Winter: Leavitt**) This course explores other cultures as they are portrayed in ethnographic and documentary film. The course introduces students to ethnographic film and to the broad range of cultures and issues that are the subjects of these films. **CC:** LCC

ANT 130 - Food and the Self

Course Units: 1.0 (**Not Offered this Academic Year**) What is the relationship between food and the body? What are the boundaries of food and the body? Are you what you eat or how you eat? This course looks at anthropological approaches to eating, consumption, identity, the body and food, while also examining current controversies such as obesity, genetically modified foods, and food taboos. While much of the course concerns itself with the cultural and historical construction of the American diet, it also draws examples from other cultures. **CC:** LCC

ANT 148 - Making Music, Shaping Selves: Introduction to World Music

Course Units: 1.0 (**TBD: Staff**) Introduces music from various world areas including Africa, Latin America, Asia, and Europe through live performance, lecture, video and audio. Students will increase familiarity with a wide range of musical styles while also exploring the relationship between music and society. **Cross-Listed:** AMU 120 **CC:** LCC, HUM

ANT 170 - Myth, Ritual and Magic

Course Units: 1.0 (**Winter: Bedford**) This course examines some of the theoretical issues surrounding myth, ritual and magic as well as specific examples of their cultural expression. How do people make sense of themselves, their society and the world through myth and ritual? How do cosmology and belief systems help them gain and organize knowledge about the world and themselves? The course will be examining a number of "occult" and "esoteric" practices, that is, practices that were not commonly known to all members of society, including sufism, kabbalah, alchemy, and shamanism. **Cross-Listed:** REL 170 **CC:** LCC, HUM

ANT 181 - Anthropology of Sub-Saharan Africa

Course Units: 1.0 (**Not Offered this Academic Year**) This course offers an ethnographic and ethnological survey of the diverse peoples and cultures of sub-Saharan Africa. To gain insight into the lives and experiences of peoples from across the region, we will examine both historical and contemporary forces that continue to shape political, economic, and sociocultural development. The course is organized thematically around a series of readings that give students an overview of the continent, its history and key topics in African anthropology. Anthropological approaches will be used to understand many of the challenges and innovations experienced across sub-Saharan Africa, including political conflict and democratization, development dilemmas, disease etiologies and witchcraft, popular culture, urbanization and environmental conservation. Through lectures, course readings, and discussions, students will enhance their knowledge of both Africa and anthropology. **CC:** LCC

ANT 184 - Contemporary Japanese Society

Course Units: 1.0 (**TBD: Staff**) An anthropological introduction to contemporary Japanese society and culture. Provides an historical overview, then explores in greater depth such topics as family structure, education, religious traditions, the work place, women, and contemporary social problems. **CC:** LCC

ANT 210 - The Anthropology of Poverty

Course Units: 1.0 (**Spring: Witsoe**) Why has urban poverty remained so entrenched in the United States, even amidst the unprecedented economic expansion of the postwar period? This course will seek to answer this question by exploring the relationships between race, public institutions, economic change and inequality within American society. In doing so, the course will examine the theoretical and practical dimensions of anthropology's engagement with poverty. We will begin by examining theoretical approaches for understanding the persistence of poverty in the United States, as well as the major policy frameworks that seek to reduce poverty. In addition, the course will cover anthropological critiques of these approaches and anthropological accounts of the everyday realities and struggles of poor people. Students will do internships in local organizations dealing with poverty and will use this experience to reflect on larger debates. **CC:** LCC

ANT 214 - Language and Culture

Course Units: 1.0 (**Winter: Brison**) This course examines the complex relationship between culture and language. Lectures and readings will use case materials drawn from North America, Southeast Asia, the Caribbean, Oceania, and Europe to explore theories about how language is shaped by, and in turn shapes, culture and social relations. We will start by looking at the influence of linguistic categories on the way we view the world around us. We will look at color terminology, racial and ethnic categories, pronoun use, and differences in vocabulary used to talk about men and women. Next, we will turn to cultural differences in communicative behavior. We will examine theories that suggest that males and females, and members of various ethnic groups, use language differently in everyday social interaction. These differences in communicative strategies lead to systematic miscommunication and perpetuate stereotypes. We will then turn to the ways changes in communicative technologies such as the internet and cellphones change social relations. Finally, we will explore the ways that language reflects and supports social class, and the patterning of language use in multilingual nations. **CC:** LCC

ANT 220 - Women's Lives Across Cultures

Course Units: 1.0 (**Not Offered this Academic Year**) Examines women's lives in different cultures through detailed case studies and film, focusing on common experiences (e.g., motherhood, work), gender-based inequality, and sources of women's power and influence. It also examines topics that

exclusively or disproportionately affect women (e.g., female genital cutting, domestic violence, rape, sex tourism) as well as the varied forms feminism takes in other cultures. **CC: LCC**

ANT 221 - Law, Culture, and Society

Course Units: 1.0 (**Spring: Samet**) Law is everywhere but it is not everywhere the same. How do diverse social, cultural and historical contexts shape the workings of law? This course introduces students to a series of critical perspectives about what law is and how it contours the fabric of everyday life. Students will learn how key legal issues such as dispute management, decision-making, and reconciliation are actualized in different settings. The ultimate goal of the class is to equip students with the tools to critically evaluate legal processes in multicultural and plural societies. The course begins with a consideration of customary practices and conflict resolution in non-Western societies and then looks at how anthropology helps us to understand law in contemporary societies. **CC: LCC**

ANT 222 - Childhood in Anthropological Perspective

Course Units: 1.0 (**Fall: Brison**) This course examines childhood across cultures. Lectures and readings will use case materials drawn from North America, Europe, Africa, Oceania, and Asia to explore ways in which culture affects how parents deal with children. We will also examine the acquisition of culture by young children. We will look closely at ways in which different cultural practices shape the experience of childhood from infancy to adolescence. Topics addressed will include: beliefs about infants, language acquisition, cultural differences in theories about learning, the nature of schools in various cultures, the role of play and mass media in shaping children, the cultural shaping of gender identity, and adolescent initiation rites. **CC: LCC**

ANT 223 - Multiculturalism: Race, Religion, and the Nation-State

Course Units: 1.0 (**Fall: Khan**) Cultural diversity in terms of race, ethnicity, and religion is the focus of a great deal of controversy in many nations. This class examines the politics surrounding cultural difference in nation-states and the paradoxes of "multiculturalism," a popular strategy that on the one hand, validates cultural difference, and on the other hand, can be seen as reinforcing divisions and barriers. Does multiculturalism benefit racial, ethnic and religious minorities or does it construct barriers to equal opportunity? How can we get beyond multiculturalism to appreciate the benefits of cultural diversity? **CC: LCC**

ANT 225 - Gender and Society

Course Units: 1.0 (**Winter: Khan**) An examination of the role gender plays in human life. How does being labeled and socialized to be male or female shape peoples' daily life and life chances? How do our culture and others regard people who do not fit mainstream conceptions of maleness or femaleness? The course will discuss the concepts of gender and sex, gendered behavior and expectations, "third genders" (e.g., the North American berdache, the Indian hijra), homosexuality, transgendered individuals and sex-reassignment surgery, and cross-cultural similarities and differences. **CC: LCC**

ANT 226T - Education and Culture

Course Units: 1.0 (**Not Offered this Academic Year**) This course examines the relationship between educational systems, on the one hand, and their cultural and social environment, on the other hand. The course will consider such as issues as: 1) the relationship between schools and ethnic and national identity; how do educational systems attempt to construct national identities? Do they succeed? How are ethnic divisions reinforced or mediated by educational systems? 2) the relationship between imported international educational models and local cultures: how do the assumptions embedded in imported educational models conflict with local understandings about authority, knowledge, and society? 3) the ways that cultural assumptions are implicit in classroom routines; how can we analyze classroom routines to reveal the "hidden curriculum" of assumptions about knowledge, authority, and the qualities needed to be a good and successful person. Students will conduct participant observation in a local school, will read and discuss works on education and society and will analyze local schools in papers. **CC: LCC**

ANT 227 - Policing the Americas: Law and Order in the Western Hemisphere

Course Units: 1.0 (**Winter: Samet**) The Western Hemisphere is a violent place: drug wars in Mexico, street gangs in Central America, mass killings in the United States, and everywhere soaring rates of violent crime. What kinds of responses are emerging to problems of law, order, and public security in the Americas? How are these responses reshaping our societies? To what extent is the current situation the legacy of failed security policies? What is the role of the police and policing in all of this? This class adopts an anthropological perspective on the practice of policing. It looks at policing as the production of law and order-not just by local cops on the beat but also by actors involved in national and international

security. The focus is on the Western Hemisphere and the influence of the United States on the ideals, institutions, and practices of policing. Key topics include: immigration, incarceration, deportation, frontiers, the movement of licit and illicit goods, democratic rights, and the regional impact of U.S. security initiatives including the Cold War, the War on Drugs, and the War on Terrorism. These topics will be grounded in studies of policing and police reform in the United States, Brazil, Colombia, Guatemala, and Mexico. By the end of the semester, students will have a working knowledge of critical issues in contemporary policing as well as the legal, socio-cultural, and economic factors behind the emerging models of police in the Americas. **CC: LCC**

ANT 230 - Medical Anthropology

Course Units: 1.0 (**Winter: Brison**) An examination of beliefs about illness, healing, and the body and how these are shaped by culture and society. Topics include healing practices across cultures, political forces shaping medical practice in the U.S., and birthing practices in different cultures. **CC: LCC**

ANT 232 - Bombs to Buddhism: Fatalism, Technology, and Modern Japanese Culture

Course Units: 1.0 (**TBD: Staff**) An exploration of Japanese culture through critical reading of a variety of texts including classic literature, historical accounts, contemporary fiction, manga (Japanese comics), anime (Japanese animation), and film. Throughout the course, students will question what religious beliefs, natural disasters and historical events have shaped Japanese media, which, in turn, will deepen our understanding of contemporary Japanese society. The importance of such disparate phenomena as Buddhism, the dropping of the nuclear bomb, the 1954 film "Godzilla," and the mega-manga "Akira" will be considered. **CC: LCC**

ANT 233 - Anthropology of Humanitarian Aid

Course Units: 1.0 (**Not Offered this Academic Year**) What does it mean to help others? When is it an imperative and when is it an option? What considerations arise when the subject of assistance is in another country, a member of a different religion, or another culture? This course draws upon global case studies of humanitarian intervention in order to encourage students to engage critically with the complexity of what seems like an unequivocal good: humanitarian aid. Humanitarian aid plays a significant role in today's society, from the United States' recent and very complex engagement with the Ebola outbreak to aid that is dispensed as part of disaster relief. This course explores the ethics and politics of humanitarianism in global perspective. It addresses the cultural specificity of global humanitarian aid and the ways that humanitarianism has been theorized historically. This course examines the growing debate over the philosophical, moral, political, cultural and operational practices of such interventions. **CC: LCC**

ANT 234 - Health and Healing in Africa

Course Units: 1.0 (**Not Offered this Academic Year**) This course will explore the diversity of health-related beliefs and practices across Africa. We will firmly situate perspectives and approaches to health and illness within a broad sociocultural and historical context, also helping to challenge stereotypes associated with the continent. By cultivating a deeper knowledge of how African communities perceive and treat afflictions as well as international responses to health crises (e.g. Ebola), we will develop a cross-cultural perspective that expands our understanding of global, as well as local, health and healing. **CC: LCC**

ANT 237 - Gangs and Youth Violence

Course Units: 1.0 (**Not Offered this Academic Year**) Bloods. Crips. Mara Salvatrucha (MS-13). The 18th St. Gang (M-18). Latin Kings. The names have become synonymous with senseless violence. Both feared and fetishized, the street gang became a focal point of urban politics in the United States and Latin America during the late twentieth century. Beginning with the neoliberal reforms of the 1980s, young, poor, minorities have found themselves at the center of a socio-economic crisis that has been accompanied by the rise of zero-tolerance policing. For the purposes of this class, the youth gang phenomenon will serve as a window in to the experience of racial, ethnic and economic marginalization under late capitalism. We will explore the context that gives rise to gang violence through a combination of anthropological, sociological, and historical approaches. By the end of the quarter, students will be familiar with the macro-social factors that shape both gangs and the politics of urban violence in the Americas. **CC: LCC**

ANT 239 - Family and Kinship

Course Units: 1.0 (**Not Offered this Academic Year**) This course provides an analysis of families in the U.S. and other cultures. The aim is to develop an appreciation for the variety of ways that family life can be organized as well as an understanding of the causes and consequences of different family and kinship patterns. **CC: LCC**

ANT 240 - Technology, Culture & Society

Course Units: 1.0 (**Not Offered this Academic Year**) Examines the role of technology in cultural change and the role of culture in technological change. Particular attention will be given to: the Internet and other so-called "virtual community" formations, graphic design and other media, "reality" TV, cross-cultural advertising, and popular music. **CC: LCC**

ANT 241 - Environmental Anthropology

Course Units: 1.0 (**Not Offered this Academic Year**) This course examines anthropological approaches to the environment and environmentalism. It asks questions such as: How does culture shape our perception of nature? What can conflicts over environmental protection, natural resources and human manipulations of natural materials tell us about contemporary societies? What does it mean to call an issue "political" or "cultural," versus "scientific" or "technical"? Students will develop the critical analysis skills to examine the natural world as a site of cultural politics, using anthropological concepts to examine environmentalism in diverse geographical and historical settings, including the Amazon, the Niger Delta, the suburban mall, and the Union campus. **CC: LCC**

ANT 242 - Economic Anthropology

Course Units: 1.0 (**Not Offered this Academic Year**) This course explores the social and cultural dimensions of production, exchange and consumption. Do all people everywhere seek to accumulate property, and to maximize profits? Is "rationality" the same in every culture? Do all think the same way about debt, bribery, gambling or marriage payments? Do human economies evolve inexorably—for example, from public to private property, from cowrie shells to electronic money, or from gifts and barter to sale and credit? Or is the picture more complex and the direction inconstant? Is there really any such thing as a "free" gift? What does The Godfather have to do with the exchange of necklaces and armbands in the South Pacific? Who wins and losses from "globalization"? Why do people value things? **CC: LCC**

ANT 243 - Anthropology and International Development

Course Units: 1.0 (**Fall: Witsoe**) Faith in twentieth-century development and progress has been severely shaken by the environmental crisis and the failures of the international development assistance. What is development? What is the third world? How was it made? What problems does it face and how is it changing? What are the causes of failure in development / aid programs? Drawing on a variety of ethnographic materials and case studies, this course discusses the nature of economic and social changes in post colonial societies and underdeveloped areas in the West / North, offers a critical analysis of sustainable development, and introduces the students to the practices, anthropological and otherwise, of planning policy interventions. The course shows how anthropological knowledge and understanding can illuminate "development issues" such as rural poverty, environmental degradation and the globalization of trade. **CC: LCC**

ANT 244 - Urban Anthropology

Course Units: 1.0 (**Spring: Samet**) Throughout history cities have been celebrated as spaces of inclusion and diversity, so that it is all too easy to overlook the pervasive reality of exclusion, poverty, and injustice. This class looks at the promise and perils of urbanization in the 20th and the 21st centuries. The approach is anthropological, however the course also draws on materials from geography, urban planning, and political economy to understand the history, development, and everyday experience of urban space **CC: LCC**

ANT 245 - Sport, Society, and Culture

Course Units: 1.0 (**Winter: Witsoe**) The comparative study of the role of sport in society. Topics include the meaning of play and sport; the evolution of sport; sport and socialization; ritual in sport; sport and gender; sport and race; sport and education; sport, conflict and violence; and sport and cultural change.

ANT 246 - Anthropology of Human Rights

Course Units: 1.0 (**Not Offered this Academic Year**) In recent years, anthropological discussions of human rights have gone beyond the traditional debate between universalism and relativism sparked by the 1948 Universal Declaration of Human Rights. Marginalized peoples who are the traditional subjects of anthropological research are increasingly using human rights rhetoric to advance their own causes or draw attention to their plight. This course will examine philosophical and anthropological discussions of human rights and contemporary debates and controversies surrounding human rights. In particular, we will examine the deployment of truth commissions in the aftermath of political violence, the role of human rights NGOs, contested claims of suffering, and human rights interventions.

ANT 247 - Living with Globalization

Course Units: 1.0 (**Not Offered this Academic Year**) In recent decades, technologically-enabled increases in flows of capital, people, things, images and ideas around the world have resulted in the process of global integration and compression commonly called "globalization." In this course we will explore globalization from the perspective of anthropology, tracing its consequences both for the world's economic and political systems, and for the everyday lives of people around the globe. Topics will include: cultural dimensions of changing labor practices and systems of production, the role of globalization in cultural homogenization and differentiation, the ways the migrants, refugees, tourists and others forge new supra-national forms of sociality and identity, and the role of media flows and commodity consumption in the production of global identities. **CC: LCC**

ANT 250 - Humans and Animals

Course Units: 1.0 (**Not Offered this Academic Year**) This course examines representations and practices of human-animal relations across cultures. It will begin with examining beliefs about the nature of animals across cultures, including the ways they are similar to and different from humans. We will then look at the many varying relationships between humans and animals in different cultures and will show how these are shaped by social systems **CC: LCC** **Note:** Electives (only one cross-listed course can count for the major or minor)

ANT 252 - Anthropology of Christianity

Course Units: 1.0 (**Not Offered this Academic Year**) Although Christianity has its historical roots in the Mediterranean world, during its 2000 year history it has migrated to almost every geographical area of the globe giving rise to many vibrant local Christianities with distinct and culturally specific identities. While many people associate contemporary Christianity with Euro- Americans, scholars point to Christian churches dating from the 5th century in North Africa and in India. Scholars argue that the demographic center of Christianity has already shifted to the Global south. This course investigates the ways Christianity has been shaped by contact with different world cultures and the social processes and religious changes implicit in the acculturation of Christianity in diverse geographical regions and cultural contexts. Questions addresses will include: i) how has Christianity been localized in various areas of the world?; ii) what is the appeal to Pentecostalism in the global south? Is it a conservative force directing attention away from social inequalities or does it challenge social inequalities? iii) what kinds of transnational networks are formed by contemporary Christians and how do these shape new kinds of identities?; iv) what is the appeal of apparently patriarchal and conservative forms of Christianity to women, who form the majority of Christians in most areas? **CC: LCC**

ANT 254 - Anthropology of Religion

Course Units: 1.0 (**Winter: Leavitt**) Comparative study of religious behavior and ideology. Examines the ways that a wide array of religions help individuals to cope with life problems and reinforce social groups. Examines debates about the extent to which religion shapes human motivation and about the relationship between religion and society. **CC: LCC**

ANT 255T - Culture and Work

Course Units: 1.0 (**Not Offered this Academic Year**) This course, offered on the India term abroad, takes a broad perspective on the relationship between culture and work. Course readings, assignments and discussions, will prompt students to consider how work activities are shaped by culture and the larger social context by examining: i) institutional cultures involving idiosyncratic authority structures, routines, shared knowledge and so on; ii) how local cultures are influenced by their place in larger international production chains. **CC: LCC**

ANT 256 - Anthropology of Islam

Course Units: 1.0 (**Winter: Khan**) This class provides an anthropological perspective on Islam, one that tries to understand Islam as a living tradition. There are well over a billion Muslims in the world who speak countless languages and reside in dozens of nation-states. The immense diversity of Islamic practice and Muslim life is bewildering and defies any simple generalization. However, this diversity need not blind us to the themes that connect Islam and cut across Muslim life around the world. While not an exhaustive survey of Islamic practice and ways of life, this class

focuses on the themes that connect Islam across diverse regions and peoples. These themes include: Islamic authority, conceptions of gender, the importance of Islamic law, and the value of Islamic community. In this class, we look beyond local variation to understand Islam as a living tradition. **CC: LCC**

ANT 258 - Anthropology of Media

Course Units: 1.0 (**Winter: Samet**) How do communications media reshape ourselves and the worlds we inhabit? This course examines the influence of media on contemporary society. It focuses on identity formation and the different ways that scholars have approached the relationship between media and our taken-for-granted norms, practices, and beliefs. Readings draw from a wide range of disciplines and intellectual traditions, including cultural studies, critical media theory, critical race studies, feminist studies and communication. However, the fundamental approach is anthropological. Our aim is to understand how everyday media practices relate to larger issues of personal, social and cultural identity. To this end, the class moves back and forth between theory and ethnography so that students develop both a sense of key questions in the field and an idea about how to answer them. **CC: LCC**

ANT 260 - Tourists and Tourism

Course Units: 1.0 (**Not Offered this Academic Year**) This course examines the practice of tourism as a way of knowing the world and constituting the self. It also explores the role of tourism in the lives of those who act as hosts to tourists. Topics include the role of tourism in the essentialization and commodification of culture, the emergence, organization, and effects of mass tourism, the cultural dynamics surrounding several kinds of niche tourism, and the possibility of socially and ecologically responsible tourism development. **CC: LCC**

ANT 265 - The Museum: Theory & Practice

Course Units: 1.0 (**Not Offered this Academic Year**) This course is designed to introduce students to the work of museums through an internship at a Schenectady Museum and accompanying seminar. Articles from anthropology and history (including art history) expose you to the range of practical (e.g., exhibit design, collections policy, planning educational programs) and theoretical issues scholars study (e.g., intellectual property, commodifying culture, whose voice and history should be heard). The internship at a Schenectady Museum gives hands-on experience with museum work and the day-to-day issues museum staff confront. Several fieldtrips introduce different types of museums. **Cross-Listed: HST 265**

ANT 270 - Political Anthropology

Course Units: 1.0 (**Not Offered this Academic Year**) The course introduces anthropological approaches to the study of politics. We will examine influential theories of power, democracy and the state and apply them to understanding particular cases in various areas of the world. Topics covered will include: ethnographies of local politics, democratic elections, ethnographies of bureaucracy and other state institutions, ethnographic accounts of the political implications of development practice, and ethnographies in and of the "world system." We end by exploring the implications of globalization for studying politics and the state. **CC: LCC**

ANT 272 - Psychological Anthropology

Course Units: 1.0 (**Fall: Brison**) This course examines the influence of culture and society on individual psychology. Readings and class discussions examine the history of the way anthropologists have thought about the relationship between culture and personality. Issues examined will include: Do cultures produce and favor distinctive personality types? How is mental illness shaped by cultural beliefs and social practices? Are there distinctive "culture bound syndromes" and, if so, what produces them? Do cultures provide tools to help individuals adjust to crises? Do some cultures do this better than others? Are emotions fundamentally the same across cultures or does emotional experience vary significantly with culture? Is there a culture of psychiatry in the US? How do our cultural assumptions and our pharmaceutical industries shape our views of personality and mental illness? Cases will be drawn from Oceania, Asia, North America, and the Middle East. **CC: LCC**

ANT 274 - Mapping Musical Lives: Ethnography of Performing Arts

Course Units: 1.0 (**Winter: Matsue**) This seminar explores the relationship between music and culture through live performance, discussion, video and audio, and workshops in a variety of world music areas. Students will also consider how one conducts research on performing arts, culminating in a focused project on music-making in the community. Students thus will encounter diverse peoples and their musical practices in cross-cultural comparison while also exploring research methodology through their own work. **Cross-Listed: AMU 220 Prerequisite(s): AMU 101 , AMU 120 / ANT 148 , or permission of the instructor. CC: LCC, HUM**

ANT 280 - Contemporary India

Course Units: 1.0 (**Not Offered this Academic Year**) The second-fastest growing major economy in the world, India is also a country with hundreds of millions of people living in extreme poverty. Arguably the most successful democracy in the postcolonial world, Indian politics is also pervaded by corruption and violence. The course will examine recent political developments in India such as the rise of Hindu nationalism, the spread of lower-caste politics, and economic liberalization. We focus on the challenges that India faces in the twenty-first century, including land and water scarcities, the already visible effects of global warming, and growing inequalities between regions and social groups. This will add complexity and balance to the now widespread image of India as a rising economic superpower within an emergent "Asian Century." **CC: LCC**

ANT 283 - Peoples and Cultures of Latin America

Course Units: 1.0 (**Not Offered this Academic Year**) Examines the peoples and cultures of Latin America in historical and contemporary perspectives. Uses case studies, accompanying articles, and a range of media. Themes include: colonialism, identity politics, expressive culture, religion, gender, race, ethnicity, nationalism, and political economy. **CC: LCC**

ANT 285T - Peoples and Cultures of the Pacific

Course Units: 1.0 (**Not Offered this Academic Year**) An overview of the cultures of Polynesia (including Fiji, Tonga and Samoa), focusing particularly on kinship, religious beliefs, economic systems, and the impact of colonization and missionization. Offered on the Fiji Term Abroad. **CC: LCC**

ANT 295H - Anthropology Honors Independent Project 1

Course Units: 0.0 (**TBD: Staff**) (Tutorial for Union Scholars Sophomores; permission of instructor required)

ANT 296H - Anthropology Honors Independent Project 2

Course Units: 1.0 (**TBD: Staff**) (Tutorial for Union Scholars Sophomores; permission of instructor required) **Prerequisite(s):** ANT 295H

ANT 363 - Research Methods and Design

Course Units: 1.0 (**Spring: Witsoe**) An introduction to qualitative research methods in anthropology. The course examines the ways anthropologists collect data through participant observation, non-directive interviewing, questionnaires, examining case studies, and doing symbolic and behavioral analyses. We examine the strengths and weaknesses of these methods and compare them to methods of other social sciences to illuminate the anthropological approach to understanding society and culture. Students learn how to formulate research questions and a research project, apply the best methods to a particular research design, and write a proposal. **Prerequisite(s):** ANT 110

ANT 390 - Thinking about Culture

Course Units: 1.0 (**Fall: Samet**) A broad overview of the history of American and European anthropological approaches to studying individuals and societies. Students examine the strengths and weaknesses of contemporary and historical paradigms through critical reading and analysis papers. **Prerequisite(s):** ANT 110 **CC: LCC**

ANT 490 - Anthropology Independent Study 1

Course Units: 1.0 (**TBD: Staff**) Tutorial for individual students. **Prerequisite(s):** A minimum GPA of 3.2.

ANT 490T - Anthropology Independent Study Abroad

Course Units: 1.0 (**TBD: Staff**) Tutorial for individual students.

ANT 491 - Anthropology Independent Study 2

Course Units: 1.0 (TBD: Staff)

ANT 492 - Anthropology Independent Study 3

Course Units: 1.0 (TBD: Staff)

ANT 498 - Anthropology Senior Thesis 1

Course Units: 0.0 (TBD: Staff) **Prerequisite(s):** ANT 498

ANT 499 - Anthropology Senior Thesis 2

Course Units: 2.0 (TBD: Staff)

Arabic

ARB 100 - Basic Arabic 1

Course Units: 1.0 (TBD: Staff) Basic skills for students who begin with no knowledge of Arabic. **CC:** HUM

ARB 101 - Basic Arabic 2

Course Units: 1.0 (TBD: Staff) A continuation of ARB 100 . **Prerequisite(s):** ARB 100 or permission of the instructor. **CC:** LCCA, HUM

ARB 102 - Basic Arabic 3

Course Units: 1.0 (TBD: Staff) A continuation of ARB 101 . **Prerequisite(s):** ARB 101 or permission of the instructor. **CC:** LCCA, HUM

ARB 200 - Intermediate Arabic 1

Course Units: 1.0 (TBD: Staff) Review and continued development of all skills in Arabic. **Prerequisite(s):** ARB 102 or permission of the instructor. **CC:** LCCA

Astronomy

AST 050 - The Solar System

Course Units: 1.0 (TBD: Staff) An introductory but detailed discussion of the solar system with special emphasis on the application of physics and the measurement of fundamental properties. Topics include the contents of the solar system (earth, moon, sun, planets, asteroids, comets), formation of the solar system, evolutionary processes (cratering, volcanism, tidal effects), extrasolar planetary systems, and possibilities of life on other planets. Labs will be performed in which students learn how to find and observe the planets and measure fundamental properties. No background in mathematics or physics required. **Corequisite(s):** AST 050L **CC:** SCLB

AST 051 - Introduction to Astronomy

Course Units: 1.0 (TBD: Staff) A descriptive review of current knowledge in astronomy, including methods of measurement and the applications of physics to astronomy. Topics include stars (structure, formation, and evolution), galaxies, and the universe. Evening laboratory sessions in which students learn how to use cameras and telescopes. No background in mathematics or physics required. **Corequisite(s):** AST 051L **CC:** SCLB

AST 052 - Relativity, Black Holes, and Quasars

Course Units: 1.0 (**TBD: Staff**) A descriptive introduction to Einstein's theories of Special and General Relativity, with applications to the astrophysical phenomena of black holes and quasars. No background in mathematics or physics required. **CC:** SET

AST 058 - Astrobiology: Life in the Universe

Course Units: 1.0 (**TBD: Staff**) Does life exist elsewhere in the universe, or are we alone? The emerging science of astrobiology attempts to answer this fundamental question using an interdisciplinary approach rooted in biology and astronomy. This course will examine the current state of our scientific knowledge concerning the possibility of life elsewhere in the universe. Topics include: the nature and origin of life on Earth, the possibility of life on Mars and elsewhere in the Solar System, the search for extrasolar planets, the habitability of planets, and the search for extraterrestrial intelligence. **CC:** SET

AST 100 - Introduction to Astrophysics

Course Units: 1.0 (**TBD: Staff**) An introduction to the field of astrophysics, with an emphasis on a scientific understanding of stars and the universe. Topics include stars (structure, formation, and evolution), galaxies (the Milky Way, galaxy types, quasars, and active galaxies), dark matter, and the Big Bang model of the universe. One hour mathematics/computational lab each week. **Prerequisite(s):** PHY 110 or PHY 120 or IMP 120

AST 150 - (105) Introduction to Planetary Science

Course Units: 1.0 (**TBD: Staff**) An introduction to the field of planetary science, with an emphasis on a scientific understanding of the Solar System based on physical principles. Topics include formation and evolution of the Solar System; orbits and Kepler's Laws; physical processes in the Solar System; planetary geology and atmospheres; properties of planets, satellites, asteroids, and comets in the Solar System; planetary habitability; extra solar planets. **Prerequisite(s):** PHY 110 or PHY 120 or IMP 120 or permission of instructor. **Prereq/Corequisite(s):** Not open to students who have passed AST 105.

AST 200 - Stellar Structure and Evolution

Course Units: 1.0 (**TBD: Staff**) An examination of the physical principles governing the structure and evolution of stars. Topics include radiation laws, and the determination of stellar temperature, luminosity, and composition; radiative transfer and the interior structure of stars; nuclear fusion and nucleosynthesis; star clusters and stellar evolution; and stellar remnants (white dwarfs, neutron stars, pulsars, and black holes). **Prerequisite(s):** PHY 111 or PHY 121 or IMP 121

AST 210 - Galaxies

Course Units: 1.0 (**TBD: Staff**) A survey of the physical properties, dynamics, and distribution of galaxies. Topics include the content, formation, and evolution of the Milky Way and other galaxies; the large-scale distribution of galaxies; interactions between galaxies; dark matter; active galactic nuclei; and quasars. **Prerequisite(s):** PHY 111 or PHY 121 or IMP 113 or IMP 121 .

AST 220 - Cosmology and General Relativity

Course Units: 1.0 (**TBD: Staff**) A detailed study of the universe. Topics include an introduction to general relativity; the shape, size, age, and future of the universe; models of the primordial universe, including the Big Bang Theory and the Inflation Theory; the origin of the elements; dark matter; the cosmic background radiation; and the formation of galaxies. **Prerequisite(s):** PHY 111 or PHY 121 or IMP 121 , and MTH 115 . PHY 122 is recommended.

AST 230 - Observational Astronomy

Course Units: 1.0 (**TBD: Staff**) A laboratory-based course dealing with modern astronomical techniques. The course work will involve primarily nighttime observations with a 20-inch telescope and computer analysis of the data. Techniques covered include CCD observations, sky subtraction, spectroscopy, and photometry. Student projects may include determination of the distances and ages of star clusters; measurements of the variability of stars and of quasars; measurements of the masses of Jupiter, binary star systems, and galaxies; and determination of orbits of asteroids. **Prerequisite(s):** PHY 111 or PHY 121 or IMP 113 or IMP 121 or permission of the instructor (with some telescope experience). **CC:** WAC

AST 240 - Radio Astronomy

Course Units: 1.0 (**TBD: Staff**) A laboratory-based course in the observing methods and the astrophysics learned from astronomical studies at radio wavelengths. Topics include the operation of a radio telescope; important emission mechanisms; star formation regions; interstellar gas; interstellar molecular clouds; radio galaxies; and the cosmic microwave background. Student projects will involve observations with Union's 2-meter radio telescope and with the 37-meter radio telescope at the Haystack Observatory in Westford, Massachusetts. **Prerequisite(s):** PHY 111 or PHY 121 or IMP 121 ; Recommended: MTH 115

AST 290 - Astronomy Practicum 1

Course Units: 0.0 (**TBD: Staff**) Available to students on an individual basis, students undertake activities that provide on-the- job experience relevant to possible careers for astronomy majors. The particular set of experiences for each term is chosen by the student in consultation with the academic advisor and Department. The activities available include, but are not limited to: internship with the planetarium at the Schenectady Museum or with the Dudley Observatory; running monthly open houses at the Union College Observatory; writing regular science columns for the college newspaper; giving presentations at the bi-weekly Astronomy News Discussion group in the Physics and Astronomy Department; and undertaking a research-oriented independent study in astronomy under the supervision of a professor. Each term is graded on a pass-fail basis with one course credit granted after completion of three terms. To receive a passing grade, the student is expected to work the equivalent of four hours per week and submit a summary report at the end of each term.

AST 291 - Astronomy Practicum 2

Course Units: 0.0 (**TBD: Staff**) Available to students on an individual basis, students undertake activities that provide on-the- job experience relevant to possible careers for astronomy majors. The particular set of experiences for each term is chosen by the student in consultation with the academic advisor and Department. The activities available include, but are not limited to: internship with the planetarium at the Schenectady Museum or with the Dudley Observatory; running monthly open houses at the Union College Observatory; writing regular science columns for the college newspaper; giving presentations at the bi-weekly Astronomy News Discussion group in the Physics and Astronomy Department; and undertaking a research-oriented independent study in astronomy under the supervision of a professor. Each term is graded on a pass-fail basis with one course credit granted after completion of three terms. To receive a passing grade, the student is expected to work the equivalent of four hours per week and submit a summary report at the end of each term.

AST 292 - Astronomy Practicum 3

Course Units: 0.0 (**TBD: Staff**) Available to students on an individual basis, students undertake activities that provide on-the- job experience relevant to possible careers for astronomy majors. The particular set of experiences for each term is chosen by the student in consultation with the academic advisor and Department. The activities available include, but are not limited to: internship with the planetarium at the Schenectady Museum or with the Dudley Observatory; running monthly open houses at the Union College Observatory; writing regular science columns for the college newspaper; giving presentations at the bi-weekly Astronomy News Discussion group in the Physics and Astronomy Department; and undertaking a research-oriented independent study in astronomy under the supervision of a professor. Each term is graded on a pass-fail basis with one course credit granted after completion of three terms. To receive a passing grade, the student is expected to work the equivalent of four hours per week and submit a summary report at the end of each term.

Theater

ATH 050 - Rehearsal and Production

Course Units: 0.0 (**TBD: Staff**) Students are invited to participate in theatre or dance productions in a variety of capacities, both on-stage and off-stage. Required for Theatre Majors and Minors. To gain transcript recognition for participation in these activities, students must register for the theatre practicum with the registrar and achieve a passing grade from the faculty supervisor. Requests for practicum transcript recognition must be filed with the registrar during the term in which the practicum is undertaken. During the senior year, students may request up to two full practicum credits towards graduation. Such requests are made to the registrar during the senior year transcript audit (or its equivalent for those who plan to graduate early). Each full theatre practicum credit is accumulated from three previous passing grades (any combination of theatre and dance

practicum). No more than two such graduation credits are available, whatever the discipline (theatre or dance). Students are advised to select full practicum credits in whichever area best suits their academic program.

ATH 100 - Public Speaking

Course Units: 1.0 (**TBD: Staff**) A practical introduction to speechmaking. Through varied and increasingly complex speech assignments, students learn to integrate standard skills in public communication: speech concept and content, the organization and support of ideas, audience analysis and involvement, plus physical presentation techniques including personal style and the mastery of multimedia presentational technology. **CC: HUM**

ATH 102 - Introduction to Theatre

Course Units: 1.0 (**TBD: Staff**) The concepts and practices of theatre as an artistic collaboration, a profession and a communal event is the focus of this introductory course. This is an explorative overview of theatre, including a study of the professions relating to the creative process: playwriting, acting, directing and design. A variety of forms and styles of theatre will be reviewed and discussed through the reading and analysis of three significant plays in the dramatic lexicon. We will study the process of theatre production and the demands of theatre as a business. You will gain an ability to critically view theatre productions. **CC: HUM**

ATH 104 - Introduction to Study of Literature: Drama

Course Units: 1.0 (**TBD: Staff**) Plays acted onstage provide both entertainment and a forum for audiences and actors to question their relationship with the people and culture that surround them, as we are encouraged to understand and empathize with texts and characters brought to life through performance. In this course we will survey selected plays central to and representative of the development of major trends in dramatic literature. The principles of dramatic analysis--genre, character, plot, language, style, etc.--will be explored, as well as some of the economic, geographical, political, and intellectual factors that shaped the societies in which these plays were written and thus provide a context for the various plays and playwrights. Course readings will include plays such as Antigone, Pseudolus, Everyman, Doctor Faustus, A Midsummer Night's Dream, The Importance of Being Earnest, Ubu the King, Trifles, Waiting for Godot, and more. **Cross-Listed: EGL 102 CC: HUL, HUM**

ATH 105 - Special Topics in Theatre

Course Units: 1.0 (**TBD: Staff**) Topics chosen from a variety of performance theory design and technical areas according to faculty and student interests. Topics may include, but are not limited to, special studies in theatre, performance art, movement theatre, lighting/sound design and costume construction/design. **CC: HUM Note:** Some topics may be cross-listed with other Departments and Programs.

ATH 108 - Special Topics in Theatre: Stage Make-up

Course Units: 1.0 (**TBD: Staff**) Study of basic techniques and materials used to create theatrical stage makeup. We will cover general facial modification, historic and vintage styles, character specific needs, creature/fantasy inspired, and trauma makeup. We will also explore the use of wigs and facial hair, as well as an introduction to prosthetic appliances. **CC: HUM**

ATH 110 - Stage Craft 1

Course Units: 1.0 (**TBD: Staff**) This course seeks to introduce students to the language and practice of technical theatre. It covers the basics of tools, hardware, theatrical construction, safety practices, lighting, painting and the physical space. Additional weekly lab hours are required for the hands-on experience of building the department production and are scheduled once the term begins at the mutual convenience of student and instructor. **CC: HUM Note:** Required for Theatre Majors and Minors.

ATH 112 - Acting 1

Course Units: 1.0 (**TBD: Staff**) Designed to engage the aspiring actor in developing performance power, technique, and discipline, including self-discovery, in-depth character exploration, and textual analysis. Understanding what goes into actions, objectives, and given circumstances will be part of the process of beginning monologue and scene work. Appreciation of theatre as a profession through learning how to prepare and see other performances. It will require an open heart and mind in order to have the opportunity to take risks, challenge oneself, and be creative. **CC: HUM Note:** Required for Theatre Majors and Minors.

ATH 113 - Introduction to Stage Design

Course Units: 1.0 (**TBD: Staff**) This studio course is an introduction to the principles and practices of theatrical scenic design. Students will explore theatrical design techniques and how these contribute to the collaborative storytelling process and the relationship of theatrical design to film, architecture and animation. The course will include introduction to design fundamentals, script analysis, visual research, architecture, hand drafting, fast rendering techniques, perspective rendering and model building **CC: HUM Note:** Satisfies design requirement for Theatre Majors and Minors.

ATH 117 - Fundamentals of Stage Lighting Design

Course Units: 1.0 (**TBD: Staff**) This course seeks to introduce students to the world of stage lighting design and technology. Initial emphasis will be on electrical theory, photometrics and the wide variety of fixtures and control boards in use in the modern theater. The class will then progress to basic lighting theory and analysis of lighting techniques. In the final weeks, the class will actively participate in the design, hang, focus and programming of the lighting for a departmental production. **CC: HUM Note:** Satisfies design requirements for Theatre Majors and Minors.

ATH 118 - Costume Construction

Course Units: 1.0 (**TBD: Staff**) This course studies the basics of garment construction and costume shop procedures primarily as they relate to the theatrical world. The focus is on practical application of construction techniques, and will include introduction to and use of hand and machine sewing as well as use of self-made and commercial patterns to create wearable garments. **CC: HUM**

ATH 119 - Computer Drafting for Theatre

Course Units: 1.0 (**TBD: Staff**) Drafting for the Theatre, is an introduction to the terminology, tools, techniques and software used in technical and design planning for stage scenery and lighting. It is primarily a lecture-style course but also includes collaborative time to work on projects in a group and share tips and tricks for more efficient drafting. Upon successful completion of this class, students will have a solid foundation in VectorWorks, know how to convey information graphically, know how to read shop drawings, and how to find graphical solutions to geometric and trigonometric problems. **CC: HUM**

ATH 122 - Introduction to Costume Design

Course Units: 1.0 (**TBD: Staff**) An exploration into the principles and practice of stage costume design including an historical survey of clothes and fashion. The course will be geared toward practical application of design theory and collaboration in conjunction with directors and other designers. **CC: HUM Note:** Satisfies design requirement for Theatre Majors and Minors.

ATH 123 - History of Fashion and Dress

Course Units: 1.0 (**TBD: Staff**) A study of the evolution of Western fashions from ancient to modern times with a focus on clothing as a reflection of self-expression and relationship to one's society. The class will explore the history of dress through visual examples, practical examination of historical costume items, and individual research into specific fashion topics. **CC: HUM**

ATH 125 - Improvisation 1

Course Units: 1.0 (**TBD: Staff**) This class allows the individual and the group to explore through intuitive creative ways a physical, emotional and spontaneous form of approaching theatre. This course prepares the performer for advanced training techniques by focusing attention on freeing the body to communicate. Emphasis will be placed on spatial awareness and control, physical characterization and developing performing skills in gestural relationships, kinesthetic response, tempo and character dynamics. Theatre games and a variety of improvisation methodologies will be used in the practice of performance discipline, risk taking and collaboration on stage. **CC: HUM**

ATH 128 - Stage Combat

Course Units: 1.0 (**TBD: Staff**) An exploration of physical violence on the stage from the classical to the contemporary. The basic techniques of unarmed Stage Combat will be introduced as well the use of the Medieval Quarterstaff and Elizabethan Rapier. Students at the conclusion of the course will be expected to be able choreograph a safely executed fight for the stage from an existing play. **CC: HUM**

ATH 140 - American Musical Theatre and Dance

Course Units: 1.0 (**TBD: Staff**) This course is an introduction to the American Musical from Vaudeville and Minstrel Shows to today's contemporary Broadway shows. Through lectures, video viewing and workshops students will learn an historical background focusing on the work of lyricists, composers, choreographers, directors and producers. This unique American entertainment art form reflects American diversity and culture, changing times, values and trends. **Cross-Listed: ADA 140 CC: LCC, HUM**

ATH 150 - Staging Exploration in Theatre and Dance

Course Units: 1.0 (**TBD: Staff**) This course is based on the close examination of a particular period of theme of multidisciplinary artistic production that will offer students an immersion into important developments in performative expressions. This course explores dynamic movements in the artistic avant-garde, its historical background, and its principal creators in theatre, dance and associated performing arts, through discussions, lectures, studio work, and collaborative creation. The resulting collaboration will be produced and performed at Yulman Theatre. **Cross-Listed: ADA 150 CC: HUM**

ATH 151 - Directing 1

Course Units: 1.0 (**TBD: Staff**) Students explore the process of bringing the script and the director's concept to the stage by working with actors through casting, script analysis, rehearsal, and performance. Previous acting experience (in class or in production) required. **CC: HUM**

ATH 226 - Stage Craft 2

Course Units: 1.0 (**TBD: Staff**) Intermediate level course in the technical aspects of theatrical production. Building on the production information from ATH 110, this course takes a more in-depth exploration of the nuances of stagecraft. In addition, students will take on the role of a production supervisor and be responsible for managing a group of theatre technicians during their lab hours and an approved final construction project, coordinated with the students' areas of production exploration. **Prerequisite(s): ATH 110 and permission of the instructor. CC: HUM**

ATH 230 - Movement for Actors

Course Units: 1.0 (**TBD: Staff**) Development of the actor's body as an expressive instrument. Yoga/centering exercises, acrobatics and circus techniques are explored to achieve a flexible, free, strong and restfully alert body on stage. Contemporary and period character development through movement. **CC: HUM**

ATH 231 - Voice for the Stage

Course Units: 1.0 (**TBD: Staff**) This is a studio performance course in vocal technique for the stage or other performance media. Class work will include daily physical and vocal limbering designed to develop a free and natural speaking voice. Extensive exercises for the breath, resonance and articulation will be given to develop an awareness and appropriate use of the voice. In class presentations of scripted material, extracts from dramatic literature and readings of stories or poetry put into practice the techniques of this performance course. Instruction in dialect work for the stage will be included. Examinations will include presentations of memorized text following a vocal workout program in the Linklater method. **CC: HUM**

ATH 235 - Physical Theatre

Course Units: 1.0 (**TBD: Staff**) This course emphasizes the development of the actor's body as an expressive instrument. Primarily focus is on the actor's physical presence, actions over language, and use of gestures. Actors/dancers will be trained in techniques that focus on the building of strength, flexibility, improvisation targeting relationships and interplay between performers, and visual elements to create scenic imagery. Workshops pursue a wide range of styles, approaches and aesthetics including dance-theatre, movement theatre, mask, use of live camera to project performers' actions and interactions with props and scenery. We review European, Japanese and American styles of physical expression to broaden theatrical actions. The course will culminate in a collaborative creation produced and performed at The Yulman Theatre in the Winter Dance Concert. **CC: HUM**

ATH 240 - From the Drama Desk: Performance, Culture and Creativity

Course Units: 1.0 (**TBD: Staff**) This is an intensive and practical course on reading and writing dramatic criticism. A look at the concepts and practices of theatre criticism in American Theatre begins with a discussion of major theories of Western drama, from Aristotle to Artaud. Through the reading and discussion of contemporary examples of dramatic criticism and directed studies in techniques of journalistic writing students will gain an understanding of the nature and function of a theatre review and an ability to critically view theatre productions. Writing will include research essays, response papers and critical reviews of play scripts as well as performances on campus and at professional theatres. **CC: HUM**

ATH 241 - Contemporary American Theatre

Course Units: 1.0 (**TBD: Staff**) **CC: HUM**

ATH 243 - History of Theatre

Course Units: 1.0 (**TBD: Staff**) An investigation of the development of Western theatre from its roots in Greek tragedy to the contemporary with special focus on the works of Sophocles, Plautus, Medieval Theater, the Commedia dell'arte, Elizabethan theatre, Moliere, Restoration, and 19th century American theatre. This class concentrates on the nature of theatre-in-performance including the physical development of theatre spaces, staging concepts, and the artist-audience relationship") to the following: "This course is an investigation of the development of theatrical history, literature, and theory in the Western world from the ancient Greeks to the present day, focusing particularly on works and traditions that have influenced our own theatrical practice. We will examine the ways performance techniques have changed along with the economic, political, and intellectual factors that have also shaped other aspects of society. This class concentrates on the nature of theatre-in-performance including the physical development of theatre spaces, staging concepts, and the artist-audience relationship. **CC: LCC, HUM**

ATH 295H - Theatre Honors Independent Project 1

Course Units: 1.0 (**TBD: Staff**) For the sophomore scholar student who has demonstrated the ability to work independently, this two-term project may be proposed to a sponsoring faculty member. It is expected that this student-initiated project is designed to allow the student to gain experience through independent research, study or practical studies that could not otherwise be gained in the curriculum. Projects must be proposed at least a term in advance. By permission of sponsoring faculty only.

ATH 296H - Theatre Honors Independent Project 2

Course Units: 1.0 (**TBD: Staff**) For the sophomore scholar student who has demonstrated the ability to work independently, this two-term project may be proposed to a sponsoring faculty member. It is expected that this student-initiated project is designed to allow the student to gain experience through independent research, study or practical studies that could not otherwise be gained in the curriculum. Projects must be proposed at least a term in advance. By permission of sponsoring faculty only.

ATH 305 - American Dream on Stage

Course Units: 1.0 (**TBD: Staff**) **CC: HUM**

ATH 320 - Playwriting

Course Units: 1.0 (**TBD: Staff**) This playwriting course will focus on the creation and development of original and adapted dramatic work. Students will study basic techniques of structure, dialogue, character-development, story-telling, theatricality and creative voice. Students will generate and rework scenes in and out of class. As a playwriting lab, students will workshop, critique and help develop each other's craft through creative writing exercises and prompts. The class will conclude with staged readings of polished work. **CC: HUM**

ATH 325 - Acting Shakespeare

Course Units: 1.0 (**TBD: Staff**) The demands of Shakespeare in performance in this class will include active work on scansion, verse structure, rhetoric, language imagery, as well as text analysis and character analysis in a professional discipline of role preparation and rehearsal process for individual (monologue) and partnered (scene) work. It is assumed that the student taking this course is prepared and willing to challenge him/herself

in order to become an expressive, creative and informed Shakespearean actor. A variety of contemporary methods of actor training will be reviewed and used as a process of performance preparation. **CC:** LCC, HUM, HUL

ATH 342 - Acting 2

Course Units: 1.0 (**TBD: Staff**) Students review skills learned in earlier acting classes with a higher degree of emphasis on performance. Professional workshops in acting technique are offered such as Meisner, Chekhov, or Grotowski techniques. Focus is on in-depth textual analysis - discovering in the inner workings of a play, of scenes and monologues and the making of character choices. Students will gain an understanding the work of a professional actor, and the discipline of the theatre business. **Prerequisite(s):** ATH 112 or permission of the instructor. **CC:** HUM, HUL

ATH 348 - Non-Western Theatre and Performance Traditions

Course Units: 1.0 (**TBD: Staff**) This course is a survey of nonwestern theatrical and performance forms, engaging with practices and traditions from a global perspective. We will examine a variety of traditions, likely including Japanese Noh, Kyogen, Kabuki, and Bunraku; Chinese Xiqu (Chinese opera), Indonesian Wayang and Topeng, Indian Kathakali dance-drama, Persian Ta'ziyeh, Arabian shadow puppetry, Native American Indian Potlatch ceremonies, West African Griot (praise singing), and Caribbean carnival performance and Latin American protest theatre. To conduct our examinations of these diverse traditions, we will read firsthand accounts, critical and theoretical literature, and theatrical texts, and interrogate the intersections between these performance traditions and social culture, including both political structures and religious ceremony and ritual. **CC:** LCC, HUL, HUM

ATH 361 - Advanced Directing

Course Units: 1.0 (**TBD: Staff**) An advanced course in techniques of working with script, actor, and designer in realizing a theatrical event on stage. Final project to be directed for public performance. **Prerequisite(s):** ATH 151 **CC:** HUM, HUL

ATH 366 - Acting Styles

Course Units: 1.0 (**TBD: Staff**) This class is about how an actor can transform poetic and heightened language and make it seem natural. It is designed for the serious student as a continuation of their acting training and to provide a means to understanding classical and highly stylized theatre. The class will include intensive sessions covering a varied range of acting styles across the history of theater. Close analysis of specific theatre texts including Greek Theatre, Shakespeare, French Comedy, and Absurdism, among others. We will be examining both traditional and unconventional approaches to presenting performances. Being prepared, doing work outside of class, seeing other performances, keeping a rehearsal journal, and turning in a written critical analysis will be required. **Prerequisite(s):** ATH 342 or permission of the instructor. **CC:** LCC, HUM

ATH 370 - Theatre Internship

Course Units: 1.0 (**TBD: Staff**) As a professional work/study experience, students can elect to pursue a specific area of interest in a one-term internship with a professional theatre or dance company. The precise form of this project will vary with the student and area of focus within the department, but may include production, performance, management, or administrative work in the field or other projects approved by the faculty. Appropriate credit is granted upon completion of the internship. This course will be taken Pass/Fail. An appropriate Departmental faculty member will be assigned to oversee the internship. Students planning on applying for ATH 370 Theatre Internship or ADA 370 Dance Internship approval will be expected to complete a Departmental form which must be submitted to the Chair ideally no later than the fifth week of the term prior to the internship term. Appropriate advisement and guidance will be available to the student. **Cross-Listed:** ADA 370 **Prerequisite(s):** Sophomore standing and approval of Departmental Chair.

ATH 490 - Theatre Independent Study 1

Course Units: 1.0 (**TBD: Staff**) For the junior or senior student who has demonstrated the ability to work independently, this one term project may be proposed to a sponsoring faculty member. It is expected that this student-initiated project is designed to allow the student to gain experience through independent research, study or practical studies that could not otherwise be gained in the curriculum. Projects must be proposed at least a term in advance. By permission of sponsoring faculty only.

ATH 491 - Theatre Independent Study 2

Course Units: 1.0 (**TBD: Staff**) For the junior or senior student who has demonstrated the ability to work independently, this one term project may be proposed to a sponsoring faculty member. It is expected that this student-initiated project is designed to allow the student to gain experience through independent research, study or practical studies that could not otherwise be gained in the curriculum. Projects must be proposed at least a term in advance. By permission of sponsoring faculty only.

ATH 492 - Theatre Independent Study 3

Course Units: 1.0 (**TBD: Staff**) For the junior or senior student who has demonstrated the ability to work independently, this one term project may be proposed to a sponsoring faculty member. It is expected that this student-initiated project is designed to allow the student to gain experience through independent research, study or practical studies that could not otherwise be gained in the curriculum. Projects must be proposed at least a term in advance. By permission of sponsoring faculty only.

ATH 493 - Theatre Independent Study 4

Course Units: 1.0 (**TBD: Staff**) For the junior or senior student who has demonstrated the ability to work independently, this one term project may be proposed to a sponsoring faculty member. It is expected that this student-initiated project is designed to allow the student to gain experience through independent research, study or practical studies that could not otherwise be gained in the curriculum. Projects must be proposed at least a term in advance. By permission of sponsoring faculty only.

ATH 494 - Stage Management: Theatre Independent Study

Course Units: 1.0 (**TBD: Staff**) For the student who has demonstrated the ability to work independently, this one term project may be proposed or is assigned in conjunction with Stage Management duties for a faculty-directed term production. This course may be repeated up to five times, as independent or interrelated studies. It is expected that this project is designed to allow the student to gain experience through independent research, study or practical studies that could not otherwise be gained in the curriculum. Projects are assigned or must be proposed at least a term in advance. By permission of sponsoring faculty only. **Prerequisite(s):** ATH 110 Instructor permission required. **Note:** Required for Theatre Majors and Minors.

ATH 497 - Theatre One Term Senior Project

Course Units: 1.0 (**TBD: Staff**) As a requirement of the major, students propose this one-term project as a "capstone" study in an area of concentration in theatre studies. This project is designed in consultation with the faculty Coordinator of Senior Projects and must be proposed at least a term in advance. Projects may include research, practical production experience or independent projects in theater. **Prerequisite(s):** By permission of the faculty. **CC:** WS

ATH 498 - Theatre Honors Two Term Senior Project 1

Course Units: 0.0 (**TBD: Staff**) Students seeking to graduate with honors may elect to propose a two-term senior project as a "capstone" study in an area of concentration in theatre studies. This project is designed in consultation with the faculty Coordinator of Senior Projects and must be proposed at least a term in advance. Projects may include research, practical production experience or independent projects in theatre. **Prerequisite(s):** By permission of the faculty. **CC:** WS

ATH 499 - Theatre Honors Two Term Senior Project 2

Course Units: 2.0 (**TBD: Staff**) Students seeking to graduate with honors may elect to propose a two-term senior project as a "capstone" study in an area of concentration in theatre studies. This project is designed in consultation with the faculty Coordinator of Senior Projects and must be proposed at least a term in advance. Projects may include research, practical production experience or independent projects in theatre. **Prerequisite(s):** By permission of the faculty. **CC:** WS

TAB 341T - London Theatre Mini-Term

Course Units: 1.0 (**TBD: Staff**) In this intensive three-week experience in London, students will experience this vibrant, multi-cultural hub of the world. We will see nine or more theatrical productions and other performances in three weeks; while visiting markets, museums, parks, architecture and historic sights. Through backstage tours and professional workshops, students will experience the world of a production from the point of view of

audience, performers, directors, choreographers, and designers. Coursework involves short writing assignments, journal entries, group discussions, and a brief critical review of the productions attended. **CC:** HUM, HUL

Studio Arts

AVA 100 - Design Fundamentals 1

Course Units: 1.0 (**Not Offered this Academic Year**) Introduction to the basic design elements of line, shape, texture, value and color and the organizing principles of composition, unity/harmony, focus, direction, rhythm and contrast, space, intent/content. Problem-solving exercises, studio projects, slide talks, class critiques. **CC:** HUM

AVA 110 - Drawing 1

Course Units: 1.0 (**Winter, Spring: Conley**) Explore ways of responding to and recording perception through a variety of drawing media. Topics include effective use of line, mass, value, perspective, and composition, with an emphasis on observational drawing. Outside work is required; weekly critiques **CC:** HUM

AVA 120 - Photography 1 - Aesthetics, Film, Chemistry & Printing

Course Units: 1.0 (**Fall, Winter: Benjamin**) A course in black and white silver halide film and gelatin silver printing. Students learn the basics of the art's aesthetics, the camera, processing, printing, and evaluation/assessment of photographic prints. Three separate projects lead students through making their own photographic prints in various themes and genres of contemporary fine art photography. Students study important works in photography that relate to each project and have critiques of their work. A 35mm film camera with a light meter and adjustable focus is required. Limited enrollment, by permission of instructor. **CC:** HUM

AVA 130 - Sculpture 1

Course Units: 1.0 (**Fall, Winter: Duncan**) A beginning course that introduces basic sculptural vocabularies and techniques, with an emphasis on the individual student's development. Each project is linked to particular materials, methods and approaches to making sculpture. These include modeling in clay, making life molds and plaster casts, wood construction, and stone carving. Informal slide talks cover important developments in twentieth-century sculpture. We'll take a field trip to New York City, Mass MOCA or Storm King Art Center to see contemporary work up close. Regular work in and outside of class is required. No previous experience necessary. **CC:** HUM

AVA 140 - Three Dimensional Design 1

Course Units: 1.0 (**Fall: Duncan**) An introduction to the essential elements of form, space, structure and materials, with an emphasis on individual creative solutions. Class projects and discussions involve the nature and design of useful or functional objects, architectural form and space, and designing in an existing urban context. Course material moves from abstract design concepts to hands-on interaction with materials and application of principles to real-world situations. Projects for each student include conceiving and constructing a unique chair, and designing and building a proposal model for an imaginary "monument" on campus. We'll use various materials including clay, wood, plaster, and mixed media. Work in and outside class is required; slide talks, field trips to museums or other resources, and class critiques are part of the class. No previous experience necessary **CC:** HUM

AVA 150 - Printmaking: Relief

Course Units: 1.0 (**Fall: Conley**) Introductory course in relief printing (linocut, collograph, monotype, and woodcut). Introduction to materials and process of printmaking. Outside work required and critiques. **CC:** HUM

AVA 160 - Digital Art

Course Units: 1.0 (**Fall, Spring: Orellana**) This introductory course focuses on the fundamentals of using the computer as an art tool in the production of two-dimensional content. Topics covered include essentials of digital imaging, digital printing, and posting information to the Internet. Class lectures and hands-on studio will incorporate technique demonstrations, discussions, technical exploration, aesthetic inquiry and historical information relevant to computer multimedia, hypermedia and telecommunications. Students are encouraged to pursue areas of interest and explore new ideas throughout the course. Outside work required. No previous experience necessary. **CC: HUM**

AVA 200 - Design Fundamentals 2

Course Units: 1.0 (**Not Offered this Academic Year**) A continuation of two-dimensional design investigation with a focus on color. Weekly assignments, problem-solving exercises, studio projects; slide talks; critiques. **Prerequisite(s):** AVA 100 or AVA 110 (recommended), or portfolio review and permission of the instructor. **CC: HUM**

AVA 210 - Drawing 2

Course Units: 1.0 (**Not Offered this Academic Year**) Continuation of work in drawing with a concentration on mark-making, expressiveness, and responses to still-life, figure, space, and interior/exterior environments. Materials used include charcoal, graphite, ink, some pastel. Weekly assignments and outside work required. **Prerequisite(s):** AVA 110 (recommended) or permission of the instructor. **CC: HUM**

AVA 215 - Life Drawing

Course Units: 1.0 (**Not Offered this Academic Year**) An intensive study of the human figure with live models. Students will explore issues of form, structure, anatomy, volume, movement, composition, and expressive possibilities. Outside work will be required; weekly critiques. **Prerequisite(s):** AVA 100 , AVA 110 , AVA 150 , AVA 251 (151), AVA 345 or by instructor permission. **CC: HUM**

AVA 220 - Photography 2 - Intermediate Photography

Course Units: 1.0 (**Winter: Benjamin**) This class experience is two-fold. The first half involves advanced black and white film/chemistry/printing that encourages a refinement of technique and increased sophistication of aesthetics and ideas. The second half involves color digital photography, learning the basics of Photoshop® editing software as used by photographers. Students do "Language of Photography" projects and make printed portfolios. **Prerequisite(s):** AVA 120; limited enrollment, by permission of the instructor. **CC: HUM**

AVA 230 - Sculpture 2

Course Units: 1.0 (**Winter, Spring: Duncan**) A complementary experience to Sculpture I or Three- Dimensional Design I. Includes welded steel, more advanced techniques in wood, and other media. Specific class projects aim to develop fluency with materials and concepts. Individual work expected and encouraged. **Prerequisite(s):** AVA 130, AVA 140, or permission of the instructor. **CC: HUM**

AVA 240 - Three-Dimensional Design 2

Course Units: 1.0 (**Not Offered this Academic Year**) A continuation of Three- Dimensional Design I, with emphasis on design and construction of chairs. The chair as structure; necessity; aesthetic object. Function, decoration, metaphor. Relationship of design to the human body. Each class member will construct three functioning chairs. **Prerequisite(s):** AVA 130 or AVA 140, or permission of the instructor. **CC: HUM**

AVA 251 - (151) Printmaking: Etching

Course Units: 1.0 (**TBD: Staff**) Introduction to intaglio printing. Includes dry point, etching with hard and soft grounds, aquatint, lift ground, white ground. Outside work required and critiques. **CC: HUM**

AVA 260 - Painting: Oil

Course Units: 1.0 (**Fall: Kemp; Winter: Cirmo**) An introduction to oil painting technique, color, and pictorial composition. Initial development of an individual visual vocabulary. Outside work is required; weekly critiques. **Prerequisite(s):** A college-level introductory studio art course, two-dimensional or three-dimensional media, or portfolio review and permission of the instructor. **CC: HUM**

AVA 261 - Painting: Watercolor

Course Units: 1.0 (**Not Offered this Academic Year**) Painting that explores aqueous painting media, emphasizing watercolor techniques. Discussions centering on issues of composition, content, and expression. **Prerequisite(s):** Same as AVA 260. Recommended: AVA 100 or AVA 110. Outside work is required. **CC:** HUM

AVA 262 - Real and Recorded Time - 4D Art

Course Units: 1.0 (**Spring: Orellana**) This course will serve as an introduction to the basic concepts of four-dimensional art or time-based artwork, using a variety of processes and media. Students explore concepts in animation techniques, video and audio production, editing, interactivity, installation, and documentation. Class lectures and hands-on studio time will incorporate technique demonstrations, screenings, readings, discussions, technical exploration, aesthetic inquiry and historical information relevant to the course. Outside work is required. **Prerequisite(s):** Any Studio Art course or permission of instructor. **CC:** HUM

AVA 270 - The Processed Pixel

Course Units: 1.0 (**Winter: Orellana**) Utilizing basic aspects of computer programming, this course will explore how artists can experiment with computer code to communicate a variety of ideas and content. By means of the programming environment processing, students will investigate issues in animation, computational design, physical computing, data visualization, interactivity, and other relevant topics. Class lectures and hands-on studio time will incorporate technique demonstrations, discussions, technical exploration, aesthetic inquiry and historical information relevant to the course. Outside work required. **Cross-Listed:** CSC 112 **Prerequisite(s):** Any Studio Art course or permission of instructor. **CC:** SET, HUM

AVA 282 - Digital Aesthetics

Course Units: 1.0 (**Winter: Orellana**) Through this intensive Digital Art course, students will learn how to navigate the complex and rich world of computer aided graphic design. Using Adobe Illustrator, Adobe After Effect, InDesign and several input and output techniques, students will gain experience in a variety of industry standard topics. These will include logo design, branding, information architecture, package design, webpage aesthetics, kinetic typography and the history of computer aided graphic design. **CC:** HUM

AVA 295H - Visual Arts Honors Independent Project 1

Course Units: 1.0 (**TBD: Staff**)

AVA 296H - Visual Arts Honors Independent Project 2

Course Units: 1.0 (**TBD: Staff**)

AVA 320 - Photography 3 - Color Digital Photography

Course Units: 1.0 (**Spring: Benjamin**) This class is a "Portfolio Project" where each student conceptualizes a project to work on for the whole term resulting in a finished photography portfolio of at least 20 prints and 40 artist's proofs. Students will also do research projects about a group of photographers whose work might inform their own. **Prerequisite(s):** Photography II or permission of instructor; limited enrollment. Digital camera required. **CC:** HUM

AVA 330 - Sculpture 3

Course Units: 1.0 (**Winter, Spring: Duncan**) Advanced exploration of techniques, materials, and concepts of sculpture. Emphasis on development of individual student's work. **Prerequisite(s):** AVA 230, or permission of the instructor. **CC:** HUM

AVA 345 - The Illustrated Organism

Course Units: 1.0 (**Not Offered this Academic Year**) This studio course is the cross-section of common themes found in fine arts and biology, using art as a way of exploring science. The biological question of how evolution influences the relationship between structure and function will

be addressed by exploring the use of color, light and structural logic with the goal of creating a world of your own. The course will culminate in an exhibition of artwork with corresponding texts by the student artists describing the connection between the art and science. Taught jointly by biology and visual arts. Apply through participating departments. **Cross-Listed:** BIO 345 **CC:** HUM, SCLB

AVA 350 - Advanced Printmaking

Course Units: 1.0 (**Not Offered this Academic Year**) Investigation of advanced printmaking techniques, including lithography, woodcut and collagraph. Outside work required, critiques. **Prerequisite(s):** AVA 150, AVA 251 or permission of instructor. **CC:** HUM

AVA 360 - Advanced Painting

Course Units: 1.0 (**Spring: Kemp**) Emphasis on refining individual direction with respect to ideas of composition, content, and media. Stylistic development is stressed. Outside work required, critiques. **Prerequisite(s):** AVA 130, AVA 140, AVA 210, AVA 260 or AVA 261 **CC:** HUM

AVA 363 - 3D Computer Modeling

Course Units: 1.0 (**Fall: Orellana**) This course will introduce students into the world of three-dimensional computer graphics. Through this hands-on-course, students will learn how to use 3D software to realize ideas in sculpture, virtual environments, 3D modeling, installation, and rapid prototyping. Class lectures and hands-on studio time will incorporate technique demonstrations, discussions, technical exploration, aesthetic inquiry and historical information relevant to the course. Software covered: Cinema 4D, Poser, and Adobe After Effects. Outside work required. **Prerequisite(s):** AVA 160 or AVA 320 or permission of instructor. **CC:** HUM

AVA 370 - Robotic Art

Course Units: 1.0 (**Not Offered this Academic Year**) This studio art course will explore the creation of robotic art, interactive art, kinetic sculpture, sound works, light art, and performance environments. Using the Arduino micro-controller and basic electronic techniques, the course will include lectures, hands-on studio time, technique demonstrations, discussions, technical exploration, aesthetic inquiry and historical information relevant to the course. Outside work required. **Prerequisite(s):** Any Visual Arts course or permission of instructor. **CC:** HUM

AVA 380 - The Floating World: Edo Prints and Printmaking

Course Units: 1.0 (**Not Offered this Academic Year**) Students will produce a portfolio of woodblock prints based on an exploration of the history of Japanese prints during the Edo period (1603-1867). Ukiyo-e, or "floating-world pictures," depicted to the urban pleasures offered in the imperial capital Edo (modern-day Tokyo). The themes and individual artistic styles, first studied, then interpreted by the students in their prints, include: cityscapes and landscapes; representations beautiful men and women in bijinga; the exotic encounter with the west; and explicit erotic imagery. **Cross-Listed:** AAH 380 **CC:** LCC, HUM

AVA 400 - Special Projects in Photography

Course Units: 1.0 (**Spring: Benjamin**) Students accepted to this class will propose special project ideas to work on for the term. This is a self-initiated experience working closely with the professor throughout. Work may be in any photographic media or combined with other disciplines or contexts. Students will also research the aesthetics and ideas of relevant historical and contemporary photographers. Digital or film camera required. **Prerequisite(s):** AVA 320 or permission of instructor. **CC:** HUM

AVA 405 - Special Projects in Painting

Course Units: 1.0 (**Spring: Kemp**) Continued study of painting at the advanced level, incorporating exploration of techniques, materials, and expanded concepts. Matters of scale and the evolution of individual direction are emphasized through group and individual critiques. **Prerequisite(s):** AVA 260, AVA 261, or permission of the instructor. Special exclusions: may not be taken simultaneously with AVA 497, AVA 498, or AVA 499. **CC:** HUM

AVA 410 - Drawing Independent Study 1

Course Units: 1.0 (**TBD: Staff**)

AVA 411 - Drawing Independent Study 2

Course Units: 1.0 (TBD: Staff)

AVA 412 - Drawing Independent Study 3

Course Units: 1.0 (TBD: Staff)

AVA 413 - Drawing Independent Study 4

Course Units: 1.0 (TBD: Staff)

AVA 414 - Drawing Independent Study 5

Course Units: 1.0 (TBD: Staff)

AVA 415 - Drawing Independent Study 6

Course Units: 1.0 (TBD: Staff)

AVA 416 - Drawing Independent Study 7

Course Units: 1.0 (TBD: Staff)

AVA 417 - Drawing Independent Study 8

Course Units: 1.0 (TBD: Staff)

AVA 418 - Drawing Independent Study 9

Course Units: 1.0 (TBD: Staff)

AVA 419 - Drawing Independent Study 10

Course Units: 1.0 (TBD: Staff)

AVA 420 - Photography Independent Study 1

Course Units: 1.0 (**Spring: Morton**) Students who have a demonstrated ability to work independently and who propose a specific project may do an independent course of study in photography (either black & white or digital color). A journal, written assignments, weekly meetings and final portfolio are required. Students must submit a written proposal well in advance of pre-registration to be considered. **Prerequisite(s):** At least three photography courses at Union or permission of the instructor.

AVA 421 - Photography Independent Study 2

Course Units: 1.0 (TBD: Staff)

AVA 422 - Photography Independent Study 3

Course Units: 1.0 (TBD: Staff)

AVA 423 - Photography Independent Study 4

Course Units: 1.0 (TBD: Staff)

AVA 424 - Photography Independent Study 5

Course Units: 1.0 (TBD: Staff)

AVA 425 - Photography Independent Study 6

Course Units: 1.0 (TBD: Staff)

AVA 426 - Photography Independent Study 7

Course Units: 1.0 (TBD: Staff)

AVA 427 - Photography Independent Study 8

Course Units: 1.0 (TBD: Staff)

AVA 428 - Photography Independent Study 9

Course Units: 1.0 (TBD: Staff)

AVA 429 - Photography Independent Study 10

Course Units: 1.0 (TBD: Staff)

AVA 430 - Sculpture Independent Study 1

Course Units: 1.0 (TBD: Staff)

AVA 431 - Sculpture Independent Study 2

Course Units: 1.0 (TBD: Staff)

AVA 432 - Sculpture Independent Study 3

Course Units: 1.0 (TBD: Staff)

AVA 433 - Sculpture Independent Study 4

Course Units: 1.0 (TBD: Staff)

AVA 434 - Sculpture Independent Study 5

Course Units: 1.0 (TBD: Staff)

AVA 435 - Sculpture Independent Study 6

Course Units: 1.0 (TBD: Staff)

AVA 436 - Sculpture Independent Study 7

Course Units: 1.0 (TBD: Staff)

AVA 437 - Sculpture Independent Study 8

Course Units: 1.0 (TBD: Staff)

AVA 438 - Sculpture Independent Study 9

Course Units: 1.0 (TBD: Staff)

AVA 439 - Sculpture Independent Study 10

Course Units: 1.0 (TBD: Staff)

AVA 450 - Printmaking Independent Study 1

Course Units: 1.0 (TBD: Staff)

AVA 451 - Printmaking Independent Study 2

Course Units: 1.0 (TBD: Staff)

AVA 452 - Printmaking Independent Study 3

Course Units: 1.0 (TBD: Staff)

AVA 453 - Printmaking Independent Study 4

Course Units: 1.0 (TBD: Staff)

AVA 454 - Printmaking Independent Study 5

Course Units: 1.0 (TBD: Staff)

AVA 455 - Printmaking Independent Study 6

Course Units: 1.0 (TBD: Staff)

AVA 456 - Printmaking Independent Study 7

Course Units: 1.0 (TBD: Staff)

AVA 457 - Printmaking Independent Study 8

Course Units: 1.0 (TBD: Staff)

AVA 458 - Printmaking Independent Study 9

Course Units: 1.0 (TBD: Staff)

AVA 459 - Printmaking Independent Study 10

Course Units: 1.0 (TBD: Staff)

AVA 460 - Painting Independent Study 1

Course Units: 1.0 (TBD: Staff)

AVA 461 - Painting Independent Study 2

Course Units: 1.0 (TBD: Staff)

AVA 462 - Painting Independent Study 3

Course Units: 1.0 (TBD: Staff)

AVA 463 - Painting Independent Study 4

Course Units: 1.0 (TBD: Staff)

AVA 464 - Painting Independent Study 5

Course Units: 1.0 (TBD: Staff)

AVA 465 - Painting Independent Study 6

Course Units: 1.0 (TBD: Staff)

AVA 466 - Painting Independent Study 7

Course Units: 1.0 (TBD: Staff)

AVA 467 - Painting Independent Study 8

Course Units: 1.0 (TBD: Staff)

AVA 468 - Painting Independent Study 9

Course Units: 1.0 (TBD: Staff)

AVA 469 - Painting Independent Study 10

Course Units: 1.0 (TBD: Staff)

AVA 470 - Studio Internship 1

Course Units: 1.0 (TBD: Staff) A student who has largely fulfilled the requirements for a concentration in studio visual arts may apply to the department to pursue an internship with a studio visual arts related professional business, art center, gallery or artist's studio. This is a student-

initiated experience where the student proposes the internship, seeks faculty sponsorship, and obtains the chair's approval. An internship application is required to be completed by the student and approved by the department prior to preregistration for the term of the intern opportunity.

AVA 471 - Studio Internship 2

Course Units: 1.0 (**TBD: Staff**) A student who has largely fulfilled the requirements for a concentration in studio visual arts may apply to the department to pursue an internship with a studio visual arts related professional business, art center, gallery or artist's studio. This is a student-initiated experience where the student proposes the internship, seeks faculty sponsorship, and obtains the chair's approval. An internship application is required to be completed by the student and approved by the department prior to preregistration for the term of the intern opportunity.

AVA 480 - Digital Art Independent Study

Course Units: 1.0 (**TBD: Staff**)

AVA 497 - Studio Senior Project

Course Units: 1.0 (**TBD: Staff**) A one-term project requiring sponsorship by a studio faculty member. A project carried out in the student's area of studio concentration with WAC. **CC: WS** credit possible with completion of an additional written research paper.

AVA 498 - Visual Arts Senior Thesis 1

Course Units: 0.0 (**TBD: Staff**) A two-term studio project requiring faculty sponsorship. (See preceding information on Departmental Honors and WS requirement.)

AVA 499 - Visual Arts Senior Thesis 2

Course Units: 2.0 (**TBD: Staff**) A two-term studio project requiring faculty sponsorship. (See preceding information on Departmental Honors and WS requirement.)

Biochemistry

BCH 335 - Survey of Biochemistry

Course Units: 1.0 (**TBD: Staff**) A survey of topics in biochemistry including the structure, conformation, and properties of the major classes of biomolecules (proteins, nucleic acids, lipids, and carbohydrates); enzyme mechanisms, kinetics, and regulation; metabolic transformations; and bioenergetics and metabolic control. Emphasis will be on the fundamentals of biochemistry and our current understanding in the field. **Cross-Listed:** BIO 335 and CHM 335 **Prerequisite(s):** BIO 205 or BIO 225 and CHM 231 **Prereq/Corequisite(s):** Not open to students who have completed either BCH 380 or BCH 382 .

BCH 380 - Biochemistry: Nucleic Acids, Carbohydrates, and Lipids

Course Units: 1.0 (**TBD: Staff**) An in-depth investigation into some of the macromolecules which are essential to life's processes. The course focuses on non-protein molecules and their unique chemical properties. **Cross-Listed:** BIO 380 **Prerequisite(s):** BIO 205 or BIO 225 and CHM 232 or permission of the instructor. **Corequisite(s):** BCH 380L **Prereq/Corequisite(s):** Not open to students who have completed BCH 335 **Lecture/Lab Hours** Three lab hours each week.

BCH 382 - Biochemistry: Structure and Catalysis

Course Units: 1.0 (**TBD: Staff**) Structure and function of proteins/enzymes including purification, mechanism, kinetics, regulation, metabolism, and a detailed analysis of several classic protein systems. **Cross-Listed:** BIO 382 and CHM 382 **Prerequisite(s):** CHM 232 **Corequisite(s):** BCH 382L **Prereq/Corequisite(s):** Not open to students who have completed BCH 335 . **Lecture/Lab Hours** Four lab hours each week.

BCH 491 - Biochemistry Research 1

Course Units: 1.0 (**TBD: Staff**) Requires a thesis based on original scientific research under the direction of a member of the faculty. May be used to satisfy the departmental component for honors in biochemistry and/or to satisfy WS requirements. Expectations include a minimum of twelve hours per week of lab work and attendance at chemistry or biology weekly seminar, in addition to other requirements to be determined by individual research advisors. **Prerequisite(s)**: Permission of the instructor and third-term junior standing; or permission of the department chair.

BCH 492 - Biochemistry Research 2

Course Units: 1.0 (**TBD: Staff**) Requires a thesis based on original scientific research under the direction of a member of the faculty. May be used to satisfy the departmental component for honors in biochemistry and/or to satisfy WS requirements. Expectations include a minimum of twelve hours per week of lab work and attendance at chemistry or biology weekly seminar, in addition to other requirements to be determined by individual research advisors. **Prerequisite(s)**: Permission of the instructor and third-term junior standing; or permission of the department chair.

BCH 493 - Biochemistry Research 3

Course Units: 1.0 (**TBD: Staff**) Requires a thesis based on original scientific research under the direction of a member of the faculty. May be used to satisfy the departmental component for honors in biochemistry and/or to satisfy WS requirements. Expectations include a minimum of twelve hours per week of lab work and attendance at chemistry or biology weekly seminar, in addition to other requirements to be determined by individual research advisors. **Prerequisite(s)**: Permission of the instructor and third-term junior standing; or permission of the department chair.

Biological Sciences

BIO 050 - Topics in Contemporary Biology

Course Units: 1.0 (**TBD: Staff**) Recent developments in biology are pertinent to human health and to concerns of the nature of life and of human social values. This course will focus on human genetics, human genetic diseases, the genetic component of other diseases, the genetics of cancer, and the immune system. **Corequisite(s)**: BIO 050L **CC: SCLB Lecture/Lab Hours** One lab every other week.

BIO 055 - Evolution of Animal Behavior

Course Units: 1.0 (**TBD: Staff**) Humans have long been fascinated by the complex behavioral interactions of other animals. Non-human animals communicate, fight, mate, and try to stay alive in a complex and dangerous world. The course will provide an introduction to the scientific study of animal behavior, with an emphasis on the processes by which complex and diverse behaviors evolve. In lab, students will observe and quantify behavior of living animals in order to test hypotheses about the function and mechanisms underlying different behaviors. **Corequisite(s)**: BIO 055L **Prereq/Corequisite(s)**: Not open to science majors. **CC: SCLB Lecture/Lab Hours** One lab every other week.

BIO 058 - Astrobiology

Course Units: 1.0 (**TBD: Staff**) Does life exist elsewhere in the universe or are we alone? The emerging science of astrobiology attempts to answer this fundamental question using an interdisciplinary approach rooted in both biology and astronomy. This course will examine the current state of our scientific knowledge concerning the possibility of life elsewhere in the universe. Topics include the nature and origin of life on Earth, the possibility of life on Mars and elsewhere in the solar system, the search for extra solar planets, the habitability of planets, and the search for extraterrestrial intelligence. **Cross-Listed**: AST 058 **CC: SET**

BIO 064 - Biodiversity

Course Units: 1.0 (**TBD: Staff**) Habitat degradation, global change and biodiversity loss threaten natural ecosystems. This course examines our scientific understanding of ecology, genetics and evolution to investigate how these areas of study are applied to develop management strategies to mitigate environmental threats. We will draw upon historical and modern examples from the Albany Pine Bush, Adirondacks, National Parks and endangered species. **Corequisite(s)**: BIO 064L **CC: SCLB Lecture/Lab Hours** One lab every other week.

BIO 065 - Food and Health in the 21st Century

Course Units: 1.0 (**TBD: Staff**) An introduction to multiple aspects of food: basic nutrition; role of our dietary choices on health; modern and traditional food production systems; environmental issues in farming (fossil fuel use, climate change, and pollution); sustainability of our modern food supply system; and causes and remedies of hunger in the world. **CC:** SET

BIO 077 - Technology of Biology

Course Units: 1.0 (**TBD: Staff**) Advances in technology have been utilized by scientists and physicians for many centuries. Today, with the rapid developments in molecular biology, the technology often outpaces the understanding and acceptance of the public. This course will look at technological advances relating to biology from both a historical and modern perspective, with an emphasis on how molecular biology has revolutionized our lives. Medical, environmental, and industrial topics will be included. **Prereq/Corequisite(s):** Not open to students that have already completed BIO 103 or BIO 104 **CC:** SET

BIO 094 - Understanding Cancer

Course Units: 1.0 (**TBD: Staff**) Everyone has been touched at some point in their lives by cancer. This course aims to provide insight into the fundamental concepts involved in the life cycle of a cell, how cancer is related to those processes, and how those fundamental processes have led to advances in cancer treatment. **Prereq/Corequisite(s):** Not open to students who have already completed BIO 103 or BIO 104 **CC:** SET

BIO 103 - Diversity of Life: Heredity, Evolution, and Ecology

Course Units: 1.0 (**TBD: Staff**) More than 3.5 billion years of evolution have resulted in the astonishing diversity of life on earth. This course will explore biodiversity through the lens of ecology, evolution, and heredity, and will investigate various topics, including: the history of life on Earth, evolutionary change, Mendelian & non-Mendelian inheritance, genetic recombination, as well as human impacts on biodiversity and ecological functioning. These processes will be studied in the lab using animal model systems, computer simulations, observations of diversity, and molecular techniques. Students will learn experimental design, data analysis, scientific writing, and various laboratory skills during weekly lab sessions. **Corequisite(s):** BIO 103L **CC:** SCLB **Lecture/Lab Hours** One lab per week. May not be taken simultaneously with BIO 104.

BIO 104 - Cellular Foundations of Life

Course Units: 1.0 (**TBD: Staff**) The cell is the basic unit of life. From single-celled to multicellular organisms, the cell must transform energy to survive, interact with its environment and reproduce itself. Different types of cells have different functions, and those specialized functions are exhibited in the signals they send and receive, the genes they express and ultimately the biochemical reactions they regulate. Thus, the arrangement and actions of biologically important molecules organize into functioning cellular systems and work together to carry out these important life processes. Required weekly laboratory sessions will introduce students to important tools and methods used by biologists and employ them to investigate biochemical and cellular processes and develop skills with scientific investigation including distinguishing theories and hypotheses, generating and testing hypotheses and analyzing data. **Corequisite(s):** BIO 104L **CC:** SCLB **Lecture/Lab Hours** One lab per week. May not be taken simultaneously with BIO 103.

BIO 205 - Topics in Molecular Biology

Course Units: 1.0 (**TBD: Staff**) In this sophomore level course, students will learn the key concepts of the molecular biology of the cell as well as how to integrate the principles of cell structure and function with the underlying molecular mechanism(s). Discussions will focus on gene structure, mechanisms of replication, transcription and translation, mutation and DNA repair, gene regulations, and genomics. Each of these concepts will be discussed in the context of a unifying theme selected by the instructor. Possible examples of these themes include viruses, epigenetics, human diseases, biotechnology and artificial organisms, cell fate determination and differentiation. **Prerequisite(s):** BIO 103 , BIO 104 and CHM 101 , CHM 110H or AP Chemistry credit.

BIO 206 - Topics in Physiology

Course Units: 1.0 (**TBD: Staff**) Cells are organized into tissues, organs, and organ systems, which carry out functions of energy storage and transformation, transport, signaling, and the regulation of internal conditions. These functions arise from activities and interactions that span different levels of the organizational hierarchy. This sophomore level course will focus on how physiological processes arise and are controlled and why these

mechanisms have evolved. This course will also demonstrate how physiology can help bridge understandings between molecular/cellular biology and ecology/evolutionary biology. **Prerequisite(s):** BIO 103 , BIO 104 and CHM 101 , CHM 110H or AP Chemistry credit.

BIO 208 - Paleontology

Course Units: 1.0 (**TBD: Staff**) **Cross-Listed:** GEO 208

BIO 210 - Neuroscience: Mind & Behavior

Course Units: 1.0 (**TBD: Staff**) **Cross-Listed:** PSY 210 CC: SET

BIO 211 - Brain and Behavior

Course Units: 1.0 (**TBD: Staff**) **Cross-Listed:** PSY 410

BIO 231 - Cell-Tissue-Material Interaction

Course Units: 1.0 (**TBD: Staff**) **Cross-Listed:** BME 331

BIO 235 - Global Biogeochemical Cycles

Course Units: 1.0 (**TBD: Staff**) **Cross-Listed:** GEO 305 **Corequisite(s):** BIO 305L

BIO 242 - Neurobiology

Course Units: 1.0 (**TBD: Staff**) This course focuses on fundamental concepts of neurobiology using studies from invertebrate and/or vertebrate model systems. Topics covered will include neural development, synaptic connectivity, neural plasticity, neuronal cell properties, sensory systems, and control of movement. **Cross-Listed:** PSY 212 **Prerequisite(s):** BIO 103 and BIO 104

BIO 243 - Bioinformatics: Information Technology in the Life Sciences

Course Units: 1.0 (**TBD: Staff**) The disciplines of biology and information technology are intersecting with increasing frequency, most notably in the emerging field of bioinformatics. Bioinformatics has been fueled by the advent of large-scale genome sequencing projects, which has generated enormous sets of "mineable" data representing an invaluable resource for biologists. Biology and computer science students in the course will gain a working knowledge of the basic principles of the others' discipline and will then collaborate together in class on bioinformatics projects. Topics include pairwise and multiple sequence alignments, phylogenetic trees, gene expression analysis, and personalized medicine. **Cross-Listed:** CSC 243 **Prerequisite(s):** BIO 205 or one course from CSC 103 , CSC 104 , CSC 105 , CSC 106 , CSC 107 , CSC 109 .

BIO 291 - Biology Research Practicum 1

Course Units: 0.0 (**TBD: Staff**) The Biology Research Practicum is designed to allow students to engage in research in the biological sciences early in their undergraduate careers. Students will work under the direction of a member of the biology faculty, often collaborating with seniors who are completing their research. Expectations include a minimum of four hours per week of lab work and attendance at Biology Department seminars and/or weekly lab meetings. This course requires advance permission of the individual research advisor, who may have additional requirements. To receive Pass/Fail credit equivalent to one course, the student must earn three terms of passing grades for the practicum experience.

Prereq/Corequisite(s): Not open to students currently enrolled in a sophomore scholars projects in the Biology Department or in BIO 490 , BIO 491 , BIO 492 , BIO 493 , BIO 494 , BIO 495 , BIO 496 , BIO 497 , BIO 498 , or BIO 499 . Does not count as a major elective.

BIO 292 - Biology Research Practicum 2

Course Units: 0.0 (**TBD: Staff**) The Biology Research Practicum is designed to allow students to engage in research in the biological sciences early in their undergraduate careers. Students will work under the direction of a member of the biology faculty, often collaborating with seniors who are completing their research. Expectations include a minimum of four hours per week of lab work and attendance at Biology Department seminars

and/or weekly lab meetings. This course requires advance permission of the individual research advisor, who may have additional requirements. To receive Pass/Fail credit equivalent to one course, the student must earn three terms of passing grades for the practicum experience.

Prereq/Corequisite(s): Not open to students currently enrolled in a sophomore scholars projects in the Biology Department or in BIO 490 , BIO 491 , BIO 492 , BIO 493 , BIO 494 , BIO 495 , BIO 496 , BIO 497 , BIO 498 , or BIO 499 . Does not count as a major elective.

BIO 293 - Biology Research Practicum 3

Course Units: 1.0 (**TBD: Staff**) The Biology Research Practicum is designed to allow students to engage in research in the biological sciences early in their undergraduate careers. Students will work under the direction of a member of the biology faculty, often collaborating with seniors who are completing their research. Expectations include a minimum of four hours per week of lab work and attendance at Biology Department seminars and/or weekly lab meetings. This course requires advance permission of the individual research advisor, who may have additional requirements. To receive Pass/Fail credit equivalent to one course, the student must earn three terms of passing grades for the practicum experience.

Prereq/Corequisite(s): Not open to students currently enrolled in a sophomore scholars projects in the Biology Department or in BIO 490 , BIO 491 , BIO 492 , BIO 493 , BIO 494 , BIO 495 , BIO 496 , BIO 497 , BIO 498 , or BIO 499 . Does not count as a major elective.

BIO 295H - Biology Honors Independent Project 1

Course Units: 0.0 (**TBD: Staff**) Two-term sophomore independent study project on a biological topic, under the direction of a biology faculty member. Open to students in the Union Scholars Program. Students receive a Pass/Fail grade for the first term and a letter grade and one course credit upon completion of the second term of the project. **Prerequisite(s):** Requirements are arranged with the faculty mentor. **Note:** Does not count as a major elective.

BIO 296H - Biology Honors Independent Project 2

Course Units: 1.0 (**TBD: Staff**) Two-term sophomore independent study project on a biological topic, under the direction of a biology faculty member. Open to students in the Union Scholars Program. Students receive a Pass/Fail grade for the first term and a letter grade and one course credit upon completion of the second term of the project. **Prerequisite(s):** Requirements are arranged with the faculty mentor. **Note:** Does not count as a major elective.

BIO 314 - Ornithology

Course Units: 1.0 (**TBD: Staff**) Birds are excellent subjects to study all levels of biological organization, from biochemistry and genetics through physiology, ecology, and evolution. This course emphasizes the evolution, anatomy, physiology, ecology, and conservation biology of avifauna. Weekly labs will be split between the field to identify birds through sight and sound and the laboratory to learn dissections and study skins.

Prerequisite(s): BIO 103 or permission of the instructor. **Corequisite(s):** BIO 314L **Lecture/Lab Hours** One lab per week.

BIO 315 - Biology of Plants

Course Units: 1.0 (**TBD: Staff**) Students will learn about the major characteristics and innovations of land plants and evaluate the functional and adaptive significance of variants in their form, physiology and life history. **Prerequisite(s):** BIO 103 and BIO 104 or permission of the instructor.

Corequisite(s): BIO 315L **Lecture/Lab Hours** One lab per week.

BIO 317 - Entomology

Course Units: 1.0 (**TBD: Staff**) Entomology examines the evolution and diversity of the most important and successful animal group, the insects. This course explores all aspects of insect biology (ecology, evolution, anatomy, physiology, behavior, neurobiology, and endocrinology).

Prerequisite(s): BIO 103 and BIO 104 **Corequisite(s):** BIO 317L **Prereq/Corequisite(s):** Students will be expected to attend one laboratory per week and mandatory field trips for collecting insects in diverse habitats. **Lecture/Lab Hours** One lab per week.

BIO 319 - Vertebrate Natural History

Course Units: 1.0 (**TBD: Staff**) This course explores the biology of vertebrate animals with emphasis on understanding the diversity, life history, taxonomy, and unique adaptations of local vertebrate species (exclusive of fish). The laboratory focuses on developing scientifically sound skills in observation and identification of amphibians, reptiles, mammals, and birds. There will be frequent field trips to observe vertebrates in their natural habitats. Additional meetings will be required for regional field excursions, and for morning bird watching. Students must be available for one evening and one morning field trip. Combined lecture and lab course meets twice/week for 3 hours. **Prerequisite(s):** BIO 103 and or permission of the instructor. **Corequisite(s):** BIO 319L

BIO 320 - Ecology

Course Units: 1.0 (**TBD: Staff**) Organisms and their environment, population and community ecology, and the structure and integration of ecosystems will be discussed along with a focus on animal community ecology. **Prerequisite(s):** BIO 103 or permission of the instructor. **Corequisite(s):** BIO 320L **Lecture/Lab Hours** One lab per week. **Note:** There may be field trips requiring scheduling outside of normal class time.

BIO 321 - Herpetology: Biology of Amphibians and Reptiles

Course Units: 1.0 (**TBD: Staff**) An introduction to the study of amphibians and reptiles, both extremely diverse groups. Topics will include structural and functional characteristics, reproductive adaptations, and evolutionary relationships both within the Amphibia and Reptilia groups and among other vertebrate groups. Special emphasis will be given to local fauna. **Prerequisite(s):** BIO 103 and BIO 104 or permission of the instructor. **Prereq/Corequisite(s):** Students must be available for one Saturday field trip.

BIO 322 - Conservation Biology

Course Units: 1.0 (**TBD: Staff**) Natural ecosystems have suffered from declining biodiversity and encroaching human development. In this course, you will examine how these alterations impact populations and ecosystems and will evaluate management strategies designed to facilitate long-term sustainability. Topics include genetics and population biology of rare species, threats to biodiversity and adaptive ecosystems management. **Prerequisite(s):** BIO 103 and BIO 104 or permission of instructor. **Corequisite(s):** BIO 322L **Lecture/Lab Hours** One lab per week.

BIO 324 - Plant Ecology

Course Units: 1.0 (**TBD: Staff**) Examines the factors that affect the distribution and abundance of plants including the availability of water or nutrients, interactions with neighboring plants or animals, and the frequency of disturbances such as fires. Topics also include such environmental issues as climate change, exotic species invasions, the conservation of rare species, and the benefits of urban nature for human health. The weekly lab includes field excursions and quantitative data analysis. **Prerequisite(s):** BIO 103 or permission of the instructor. **Corequisite(s):** BIO 324L **Lecture/Lab Hours** One lab per week.

BIO 325 - Animal Behavior

Course Units: 1.0 (**TBD: Staff**) An introduction to the study of animal behavior. The mechanisms and evolutionary processes underlying animal behavior under natural conditions will be examined. **Prerequisite(s):** BIO 103 or BIO 104 or permission of the instructor. **Corequisite(s):** BIO 325L **Lecture/Lab Hours** One lab per week.

BIO 329 - Advanced Topics in Ecology

Course Units: 1.0 (**TBD: Staff**) An in-depth examination of current areas of research in ecology. Course assumes experience in a course with an ecological focus. **Prerequisite(s):** One of the following: BIO 315 , BIO 320 , BIO 322 , BIO 324 , or BIO 350T.

BIO 330 - Comparative Animal Physiology

Course Units: 1.0 (**TBD: Staff**) A study of internal physiological systems (e.g., respiration, circulation, and muscle systems). Physiological function in a wide variety of animal groups with a strong emphasis on the interaction of organisms with their environment. **Prerequisite(s):** BIO 205 and BIO 206 **Corequisite(s):** BIO 330L **Lecture/Lab Hours** One lab per week.

BIO 332 - Comparative Vertebrate Anatomy

Course Units: 1.0 (**TBD: Staff**) Comparative analysis of vertebrate structure with emphasis on evolution and function. Laboratories examine vertebrate anatomy through dissections of four groups: mammals, fish, amphibians, and birds. **Prerequisite(s):** BIO 103 , BIO 104 and BIO 206 **Corequisite(s):** BIO 332L **Lecture/Lab Hours** One lab per week.

BIO 335 - Survey of Biochemistry

Course Units: 1.0 (**TBD: Staff**) A survey of topics in biochemistry including buffers, protein structure, lipid structure, carbohydrate structure, enzyme mechanism, and enzyme kinetics. The pathways by which biomolecules are synthesized and degraded will be investigated. Specifically we will look at carbohydrate, lipid, and nitrogen metabolism. Medical applications will be emphasized throughout the course. **Cross-Listed:** CHM 335 and BCH 335 **Prerequisite(s):** BIO 205 and CHM 231 **Prereq/Corequisite(s):** Not open to students who have completed either BIO 380 or BIO 382

BIO 345 - The Illustrated Organism

Course Units: 1.0 (**TBD: Staff**) This studio course is the cross-section of common themes found in fine arts and biology, using art as a way of exploring science. The biological question of how evolution influences the relationship between structure and function will be addressed by exploring the use of color, light and structural logic with the goal of creating a world of your own. The course will culminate in an exhibition of artwork with corresponding texts by the student artists describing the connection between the art and science. Taught jointly by biology and visual arts. Apply through participating departments. **Cross-Listed:** AVA 345 **CC:** HUM, SCLB

BIO 350 - Evolutionary Biology

Course Units: 1.0 (**TBD: Staff**) Major concepts and mechanisms of biological evolution, including history of life, population genetics, molecular evolution, Darwinian medicine, and an emphasis on the processes of speciation. **Prerequisite(s):** BIO 103 and BIO 104 or permission of the instructor. **Corequisite(s):** BIO-350L **Lecture/Lab Hours** One lab per week.

BIO 352 - Microbiology

Course Units: 1.0 (**TBD: Staff**) An overview of microbiology with emphasis on bacteria and viruses. Lectures will focus on the structural and functional characteristics of prokaryotes, the diversity, growth, and control of bacteria, and the structure and infectious cycle of DNA and RNA viruses, with special attention to those organisms that cause disease in humans. Particularly recommended for students planning careers in medicine and other health-related professions. **Prerequisite(s):** BIO 205 **Corequisite(s):** BIO 352L **Lecture/Lab Hours** One lab per week. **Note:** Requires 2-3 hours of independent lab work per week.

BIO 354 - Developmental Biology

Course Units: 1.0 (**TBD: Staff**) The study of the developing embryo is the science of the emergence of living order. With an emphasis on experimental design, we examine cell communication, cell fate, tissue patterning and morphogenesis, and gene expression and regulation explored within the context of model systems. **Prerequisite(s):** BIO 205 **Corequisite(s):** BIO 354L **Lecture/Lab Hours** One lab per week.

BIO 355 - Immunology

Course Units: 1.0 (**TBD: Staff**) The cellular and molecular basis of immunological specificity, regulatory and effector mechanisms of the mammalian immune response, and the importance of the innate immune system in the initiation and development of adaptive immunity. Laboratory exercises include basic techniques and concepts emphasizing morphological identification of leukocytes, phagocytosis, agglutination, enzyme-linked immunosorbent assay (ELISA), mouse immunization and antibody titer determination, immune cytolysis, immunofluorescence, and western blotting. **Prerequisite(s):** BIO 205 **Corequisite(s):** BIO 355L **Lecture/Lab Hours** One lab per week.

BIO 362 - Experimental Neurobiology

Course Units: 1.0 (**TBD: Staff**) Function of neurons, nervous system organization, sensory and motor systems, and neural plasticity. Emphasis is placed on the experiments that have led to our current understanding. **Cross-Listed:** PSY 312 **Prerequisite(s):** All majors are required to take BIO 205 and either BIO 206 or BIO 242 . Neuroscience majors are required to take BIO 205 and BIO 242 . **Corequisite(s):** BIO 362L **Lecture/Lab Hours** One lab per week.

BIO 363 - Cellular Neurosciences

Course Units: 1.0 (**TBD: Staff**) This is a discussion-based course that focuses on reading and presenting primary papers on the pathogenesis of neurological diseases and the latest advances in treatments including iPSCs, organoids, and AI interface. Woven into the discussion will be the social and ethical implication of using cutting-edge technology to combat these intractable diseases. Combined lecture and lab course meets twice/week for 3 hours; with additional laboratory time as needed. **Prerequisite(s):** BIO 205 and BIO 242 **Corequisite(s):** BIO 363L

BIO 364 - Epigenetics, Development, and Diseases

Course Units: 1.0 (**TBD: Staff**) This course will focus on the epigenetic phenomena (e.g., RNA interference and genomic imprinting) on development, embryonic stem cells, animal cloning, and heritable human diseases. Epigenetic patterns are changes in gene expression that do not involve changes in DNA sequences. **Prerequisite(s):** BIO 205 or permission of the instructor.

BIO 368 - Advanced Molecular Biology

Course Units: 1.0 (**TBD: Staff**) Many of the advances made in medicine and molecular biology have been based on work done in microbial systems. This integrated laboratory course will focus on the discovery and characterization of antibiotic-producing soil microbes, using microbiological and molecular techniques. As part of Tiny Earth (TE), students will contribute their findings to a database shared by a network of student researchers from over 300 other institutions around the globe. In addition, we will explore gene expression and gene regulation of antibiotic production and resistance, and how bacterial systems have become advanced tools for the study of these processes. Combined lecture and lab course meets twice/week for 3 hours; with additional laboratory time as needed. **Prerequisite(s):** BIO 205 and CHM 231 or permission of the instructor.

BIO 370 - Endocrinology

Course Units: 1.0 (**TBD: Staff**) Principles of endocrine and neuroendocrine regulation of physiological processes, concentrating on metabolism, growth, and reproduction. **Prerequisite(s):** BIO 205

BIO 375 - Exercise Physiology

Course Units: 1.0 (**TBD: Staff**) This course examines how single and repeated bouts of exercise affect the structure and function of tissues, organs, and systems in humans and other animals. This class also utilizes engineering principles to understand and explain locomotory biomechanics. **Prerequisite(s):** BIO 205 and BIO 206 **Lecture/Lab Hours** One lab per week.

BIO 378 - Cancer Cell Biology

Course Units: 1.0 (**TBD: Staff**) This course investigates the molecular basis of cancer by comparing normal cells to cancer cells with respect to growth control mechanisms, signal transduction, and cell-cell and cell-environment interactions. A large percent of the content of the course comes from recent research papers which students read and present to the class. Laboratory exercises include primary tissue culture, immunofluorescence microscopy, immunodetection, and a final research project. **Prerequisite(s):** BIO 205 and BIO 206 **Corequisite(s):** BIO 378L **Lecture/Lab Hours** One lab per week.

BIO 380 - Biochemistry: Nucleic Acids, Carbohydrates, and Lipids

Course Units: 1.0 (**TBD: Staff**) An in-depth investigation into some of the macromolecules that are essential to life's processes. The course focuses on non-protein molecules and their unique chemical properties. **Cross-Listed:** BCH 380 **Prerequisite(s):** BIO 205 and CHM 232, or permission of the instructor. CHM 232, or permission of the instructor. **Corequisite(s):** BIO 380L **Prereq/Corequisite(s):** Not open to students who have completed BIO 335. **Lecture/Lab Hours** One lab per week.

BIO 382 - Biochemistry: Structure & Catalysis

Course Units: 1.0 (**TBD: Staff**) **Cross-Listed:** CHM 382 and BCH 382 **Corequisite(s):** BIO 382L

BIO 384 - Genetics and Molecular Biology

Course Units: 1.0 (**TBD: Staff**) The use of both classical genetics and molecular biology as experimental tools is currently being applied to an extremely diverse array of questions in biology. This course will expose the student to many of the commonly-used techniques in the "toolkit" of the geneticist/molecular biologist. Emphasis will be on recent advances in our understanding of topics of current interest such as development, cellular response to environmental stimuli, tumor formation, human genetic disease, circadian rhythms, and mammalian sex determination, amongst others. Laboratory will emphasize the use of modern molecular biological techniques and will involve group projects of the students' choice. **Prerequisite(s):** BIO 205 and CHM 102 **Corequisite(s):** BIO 384L **Lecture/Lab Hours** One lab per week.

BIO 487 - Senior Writing Seminar: Topics in Ecological and Evolutionary Biology

Course Units: 1.0 (**TBD: Staff**) One of these three courses (BIO-487, 488 or 489) is required by, and limited to, seniors who are not satisfying their WS requirement through either an independent research project or thesis. Each seminar will provide a forum in which a biological topic of current interest and importance is explored in depth. Students will gain experience in giving oral presentations and critically evaluating the written work of both established scientists and fellow students. A paper is required to fulfill the WS requirement. Enrollment is optional for interdepartmental Biology/Other majors. **CC:** WS

BIO 488 - Senior Writing Seminar: Topics in Organismal and Physiological Biology

Course Units: 1.0 (**TBD: Staff**) One of these three courses (BIO-487, 488, 489) is required by, and limited to, seniors who are not satisfying their WS requirement through either an independent research project or thesis. Each seminar will provide a forum in which a biological topic of current interest and importance is explored in depth. Students will gain experience in giving oral presentations and critically evaluating the written work of both established scientists and fellow students. A paper is required to fulfill the WS requirement. Enrollment is optional for interdepartmental Biology/Other majors. **CC:** WS

BIO 489 - Senior Writing Seminar: Topics in Cellular and Molecular Biology

Course Units: 1.0 (**TBD: Staff**) One of these three courses (BIO-487, 488, 489) is required by, and limited to, seniors who are not satisfying their WS requirement through either an independent research project or thesis. Each seminar will provide a forum in which a biological topic of current interest and importance is explored in depth. Students will gain experience in giving oral presentations and critically evaluating the written work of both established scientists and fellow students. A paper is required to fulfill the WS requirement. Enrollment is optional for interdepartmental Biology/Other majors. **CC:** WS

BIO 490 - Biology Research 1

Course Units: 1.0 (**TBD: Staff**) Independent research in consultation with a member of the biology staff. Research students are strongly encouraged to attend departmental seminars. **Prerequisite(s):** Permission of the chair and the instructor.

BIO 491 - Biology Research 2

Course Units: 1.0 (**TBD: Staff**) Independent research in consultation with a member of the biology staff. Research students are strongly encouraged to attend departmental seminars. **Prerequisite(s):** Permission of the chair and the instructor.

BIO 492 - Biology Research 3

Course Units: 1.0 (**TBD: Staff**) Independent research in consultation with a member of the biology staff. Research students are strongly encouraged to attend departmental seminars. **Prerequisite(s):** Permission of the chair and the instructor.

BIO 493 - Biology Research 4

Course Units: 1.0 (**TBD: Staff**) Independent research in consultation with a member of the biology staff. Research students are strongly encouraged to attend departmental seminars. **Prerequisite(s):** Permission of the chair and the instructor.

BIO 494 - Biology Research 5

Course Units: 1.0 (**TBD: Staff**) Independent research in consultation with a member of the biology staff. Research students are strongly encouraged to attend departmental seminars. **Prerequisite(s)**: Permission of the chair and the instructor.

BIO 495 - Biology Research 6

Course Units: 1.0 (**TBD: Staff**) Independent research in consultation with a member of the biology staff. Research students are strongly encouraged to attend departmental seminars. **Prerequisite(s)**: Permission of the chair and the instructor.

BIO 496 - Biology Research 7

Course Units: 1.0 (**TBD: Staff**) Independent research in consultation with a member of the biology staff. Research students are strongly encouraged to attend departmental seminars. **Prerequisite(s)**: Permission of the chair and the instructor.

BIO 497 - Biology Thesis Research 1

Course Units: 1.0 (**TBD: Staff**) A sequence that requires a thesis based on original scientific research. May be used to satisfy WS requirement and departmental component for honors in biology, or for WS requirement alone. Research students are strongly encouraged to attend departmental seminars. **Prerequisite(s)**: Permission of the instructor. **CC**: WS

BIO 498 - Biology Thesis Research 2

Course Units: 1.0 (**TBD: Staff**) A sequence that requires a thesis based on original scientific research. May be used to satisfy WS requirement and departmental component for honors in biology, or for WS requirement alone. Research students are strongly encouraged to attend departmental seminars. **Prerequisite(s)**: Permission of the instructor. **CC**: WS

BIO 499 - Biology Thesis Research 3

Course Units: 1.0 (**TBD: Staff**) A sequence that requires a thesis based on original scientific research. May be used to satisfy WS requirement and departmental component for honors in biology, or for WS requirement alone. Research students are strongly recommended to attend departmental seminars. **Prerequisite(s)**: Permission of the instructor. **CC**: WS

Biomedical Engineering

BME 101 - Graphics and Image Processing for Biomedical Systems

Course Units: 1.0 (**Spring: Cotter, Khetan**) Students will learn how to create objects, assemblies, and engineering drawings using SolidWorks, a solid modeling software. Students will also be introduced to the fundamentals of image acquisition and processing in biomedical systems and the use of block diagrams to construct more complex processing systems. **Corequisite(s)**: BME 101L

BME 201 - Biomechanics 1

Course Units: 1.0 (**Fall: Loya**) A basic biomechanics course concerned with two- and three-dimensional force systems, equilibrium and distributed forces. These topics will be studied in the context of the musculoskeletal system. This course also introduces strength and elastic deflection of biological tissues due to loads applied axially, in torsion, in bending, and in shear. Shear and bending moment diagrams, friction, and area moments of inertia will be introduced. **Prerequisite(s)**: MTH 110 or equivalent and PHY 120

BME 202 - Biomechanics 2

Course Units: 1.0 (**Spring: Loya**) Kinematics and kinetics of particles and rigid bodies in planar motion with applications to human motion analysis. The course includes Newtonian and energy approaches to problem solutions. **Prerequisite(s)**: BME 201 **Corequisite(s)**: BME 202L

BME 210 - Statistical Methods in Biomedical Engineering

Course Units: 1.0 (**Winter: Khetan**) This course will explore basic principles of probability and statistics, with emphasis on applications of statistical methods in Biomedical Engineering. Topics will include descriptive statistics, probability theory, discrete and continuous random variables, hypothesis testing and analysis of variance. **Prerequisite(s):** MTH 112 or MTH 113

BME 225 - Electric Circuits

Course Units: 1.0 (**Fall, Winter: Staff**) Basic electrical circuit concepts and devices such as Ohm's law, Kirchhoff's laws, Thevenin and Norton equivalents, operational amplifiers, analysis methods, capacitors, inductors, ideal transformers, phasors, AC steady state analysis, complex power, frequency response and filters. **Cross-Listed:** ECE 225 **Prerequisite(s):** Take MTH 102 or MTH 112 or MTH 113 or MTH 115 or MTH 115H or IMP 120 **Corequisite(s):** BME 225L **Lecture/Lab Hours** One lab per week.

BME 240 - Circuits and Systems

Course Units: 1.0 (**Winter, Spring: Pappu**) Transient analysis of RLC circuits; modeling of circuits using differential equations; system models and properties; Laplace transforms applied to circuit and system design and analysis; system functions; complex frequency; poles and zeros; stability; frequency response; filter design. **Cross-Listed:** ECE 240 **Prerequisite(s):** BME 225 **Corequisite(s):** BME-240L **Lecture/Lab Hours** One lab per week.

BME 241 - Discrete Systems

Course Units: 1.0 (**Fall, Spring: Pappu**) Discrete signals and systems; classification and properties of systems; difference equations; Z-transform; Fourier series, Fourier transforms, the DFT and FFT; filters and filter design; A/D and D/A converters; applications to audio signal processing. **Cross-Listed:** ECE 241 **Prerequisite(s):** BME 240 **Corequisite(s):** BME 241L **Lecture/Lab Hours** One lab per week.

BME 281 - Biomedical Engineering Practicum 1

Course Units: 0.0 (**Fall, Winter, Spring: Staff**) Under the supervision of a Biomedical Engineering faculty member, students may participate in undergraduate research or a design project. To receive pass/fail credit equivalent to one free elective course, a student must receive a passing grade in three terms of the practicum course. Up to two credits may be earned in this way. **Prerequisite(s):** Permission of the faculty supervisor.

BME 282 - Biomedical Engineering Practicum 2

Course Units: 0.0 (**Fall, Winter, Spring: Staff**) Under the supervision of a Biomedical Engineering faculty member, students may participate in undergraduate research or a design project. To receive pass/fail credit equivalent to one free elective course, a student must receive a passing grade in three terms of the practicum course. Up to two credits may be earned in this way. **Prerequisite(s):** Permission of the faculty supervisor.

BME 283 - Biomedical Engineering Practicum 3

Course Units: 1.0 (**Fall, Winter, Spring: Staff**) Under the supervision of a Biomedical Engineering faculty member, students may participate in undergraduate research or a design project. To receive pass/fail credit equivalent to one free elective course, a student must receive a passing grade in three terms of the practicum course. Up to two credits may be earned in this way. **Prerequisite(s):** Permission of the faculty supervisor.

BME 311 - Advanced Biomechanics

Course Units: 1.0 (**Fall: Currey**) Advanced biomechanics topics in stress analysis, deflection and stiffness, failure analysis, fracture mechanics, fatigue. **Prerequisite(s):** BME 201 **Corequisite(s):** BME 311L **Lecture/Lab Hours** One lab per week.

BME 331 - Cell-Tissue-Material Interaction

Course Units: 1.0 (**Spring: Khetan**) This course studies interactions between living cells, tissues and implant biomaterials, with a focus on molecular and cellular level phenomena in the initiation and generation of tissue and systemic responses. **Cross-Listed:** BIO 231 **Prerequisite(s):** BIO 104

BME 335 - Polymeric Biomaterials

Course Units: 1.0 (**TBD: Staff**) This course focuses on the use of polymeric biomaterials for biomedical applications. Topics include, but are not limited to, basic polymer theory and characterization, the design and functionalization of novel polymers, processing techniques to fabricate polymeric biomaterials (e.g., meshes or hydrogels) with desired micro- and macroscopic properties, the interactions of human cells and tissues with these materials, and the use of synthetic polymers to control the delivery of therapeutic molecules and as scaffolding materials for regenerative medicine applications. The course will also include an ethics module to discuss topical regulatory and/or ethical issues related to the field (e.g., the use of human embryonic stem cells in combination with polymeric scaffolds for regenerative applications). **Prerequisite(s):** CHM 101

BME 336 - Biological Transport

Course Units: 1.0 (**Not Offered this Academic Year**) Basic principles of mass, heat and fluid transport, including derivation of basic equations and simplification techniques. Applications to physiological systems, pharmacokinetics and artificial organs. **Prerequisite(s):** CHM 101

BME 338 - Mechanobiology

Course Units: 1.0 (**Winter: Currey**) This course will focus on the mechanical regulation of biological systems. The topics covered include principles and concepts of mechanobiology; embryogenesis and histogenesis of tissues with a focus on the skeletal system; physical forces at the cellular, tissue, and organ level; mechanical regulation of cellular behavior, tissue growth and organ development. **Prerequisite(s):** BME 201 or equivalent.

BME 345 - Orthopaedic Biomechanics

Course Units: 1.0 (**Winter: Loya**) This course will examine issues in the field of Orthopaedic Biomechanics. We will explore the current state of knee, dental, spinal, and other orthopaedic implants. We will also look at treatments available for fracture healing. **Prerequisite(s):** BME 202 or equivalent.

BME 386 - Introduction to Biomedical Instrumentation

Course Units: 1.0 (**Winter: Buma**) Introduction to the theory and application of instruments in medicine. Measurements of the major systems in the body are covered. A weekly laboratory provides an opportunity to perform measurements and use biomedical instruments. **Cross-Listed:** ECE 386 **Prerequisite(s):** BME 240 , ECE 240 **Corequisite(s):** BME 386L **Lecture/Lab Hours** One lab per week.

BME 487 - Medical Imaging Systems

Course Units: 1.0 (**Fall: Buma**) The basic physics, instrumentation, system design, and image reconstruction algorithms are covered for the following imaging modalities: ultrasound, radiography, x-ray computed tomography (CT), magnetic resonance imaging (MRI), planar scintigraphy, and positron emission tomography (PET). **Cross-Listed:** ECE 487 **Prerequisite(s):** BME 241 , ECE 241

BME 490 - Biomedical Engineering Independent Study 1

Course Units: 0.0 (**Fall, Winter, Spring: Staff**)

BME 491 - Biomedical Engineering Independent Study 2

Course Units: 0.0 (**Fall, Winter, Spring: Staff**)

BME 492 - Biomedical Engineering Independent Study 3

Course Units: 0.0 (**Fall, Winter, Spring: Staff**)

BME 495 - Biomedical Engineering Capstone Design 1

Course Units: 1.0 (**Fall: Cotter, Currey**) A capstone design experience in which students work in teams on biomedical Engineering design problems. Each team will use design methodologies and techniques to produce a complete and detailed design for a designated biomedical Engineering client. **Prerequisite(s):** BME 311 and BME 241 **CC:** WAC

BME 496 - Biomedical Engineering Capstone Design 2

Course Units: 1.0 (**Winter: Cotter, Loya**) A continuation of the capstone design experience in which students work in teams where they apply design methodologies and techniques to produce a complete and detailed design for a designated biomedical engineering client. **Prerequisite(s):** BME 495 **CC:** WS

BME 497 - Biomedical Engineering Senior Project 1

Course Units: 1.0 (**Fall, Winter, Spring: Staff**) Research or design project, performed either independently or as a team, under the supervision of one or more faculty participating in the Biomedical Engineering program.

BME 498 - Biomedical Engineering Senior Project 2

Course Units: 1.0 (**Fall, Winter, Spring: Staff**) Continuation of the capstone research or design project, performed either independently or as a team, under the supervision of one or more faculty participating in the Biomedical Engineering program. **Prerequisite(s):** BME 497 **CC:** WAC

Chemistry

CHM 060 - Meals to Molecules

Course Units: 1.0 (**Not Offered this Academic Year**) What is a healthy diet? This course will discuss human nutrition from a molecular perspective. Readings from the textbook and laboratory exercises will familiarize the student with the components of foods and how these components are used by the human body. In addition, the course will examine the benefits and pitfalls of supplementation of the diet with vitamins, etc., and discuss how to interpret health claims. **Corequisite(s):** CHM 060L **Prereq/Corequisite(s):** Not open to students who have completed CHM 101 or CHM 110H , or have AP credit in chemistry. **CC:** SCLB

CHM 080 - Culinary Chemistry

Course Units: 1.0 (**Not Offered this Academic Year**) This culinary-themed course is an introduction to the chemistry involved in food preparation and cooking. The course will include lecture and a laboratory experience with inquiry-based exercises in both the traditional chemical laboratory setting and a typical kitchen setting. Topics include the chemical make-up of the food we eat, the relationship between structure and flavor, and how chefs exert exquisite control over chemical reactions to create the flavor and texture of a gourmet meal. **Prereq/Corequisite(s):** Not open to students who have completed CHM 101 or CHM 110H , or have AP credit in chemistry. **CC:** SCLB

CHM 090 - The Art & Science of Painting

Course Units: 1.0 (**Winter: Staff**) A historical and chemical grounding in the topic of painting and its impact on society, with focus on the 14th to 17th centuries. Topics include inorganic and organic pigments and binders used in the late medieval workshop, fresco, the tempera tradition, and oil painting in the Renaissance (properties of oil, mixing with pigments, glazing, drying). Students will work with primary sources and the secondary literature, and engage in laboratory experimentation. **Cross-Listed:** AAH 205 **CC:** SET, HUM

CHM 101 - Introductory Chemistry 1

Course Units: 1.0 (**Fall, Winter, Spring: Staff**) This is an introductory course that focuses on atomic and molecular structure, chemical bonding, stoichiometry, aqueous chemical reactions, and the properties of gases, liquids, solids and solutions. **Prerequisite(s):** Not open to students who have scored 4 or 5 on the AP Chemistry Exam or who have completed CHM 110H . All students who wish to enroll in an introductory chemistry course must take a placement examination to determine the appropriate course. See Course Selection guidelines for more information on placement. **Corequisite(s):** CHM 101L **CC:** SCLB **Lecture/Lab Hours** Three lab hours each week.

CHM 102 - Introductory Chemistry 2

Course Units: 1.0 (**Fall, Winter: Staff**) A continuation of CHM 101, focusing on thermodynamics, chemical kinetics, chemical equilibrium, acids and bases, electrochemistry, and an introduction to organic chemistry. **Prerequisite(s):** CHM 101 or placement via the placement exam.

Corequisite(s): CHM 102L **Prereq/Corequisite(s):** Not open to students who have taken CHM 110H. **CC: SCLB Lecture/Lab Hours** Three lab hours each week.

CHM 110H - Honors Introductory Chemistry

Course Units: 1.0 (**Fall: Fox, Robertson**) A laboratory-intensive course that will deal with the main topics of CHM 101 and CHM 102 and is meant to replace those courses for students who have strong backgrounds in introductory chemistry. **Prerequisite(s):** Students who have scored 4 or 5 on the AP chemistry exam will be automatically placed into CHM 110H; see Course Selection guidelines for more information on placement. **Note:** Students who have scored 4 or 5 on the AP chemistry exam or who successfully complete CHM 110H will also receive AP credit for CHM 101.

CHM 224 - Frontiers of Nanotechnology and Nanomaterials

Course Units: 1.0 (**Not Offered this Academic Year**) An overview of nanotechnology and nanomaterials including interdisciplinary perspectives from engineering, materials science, chemistry, physics, and biology with emphases in sensors and actuators, nanoelectronics, alternative energy, nanocomposites, polymers, biomaterials and drug delivery. **Cross-Listed:** ESC 224 **Prerequisite(s):** PHY 111 or PHY 121 or IMP 113; MTH 115; and CHM 101 or CHM 110H; or permission of instructor.

CHM 231 - Organic Chemistry 1

Course Units: 1.0 (**Fall, Winter: Staff**) A mechanistic approach to the chemistry of carbon compounds organized around the reactions of functional groups. We cover alkanes, cycloalkanes, alcohols, alkyl halides (nucleophilic substitution and elimination), alkenes (addition and elimination), alkynes, spectroscopy (IR and NMR) and computer molecular modeling. **Prerequisite(s):** CHM 102 or CHM 110H **Corequisite(s):** CHM 231L **Lecture/Lab Hours** Four lab hours each week.

CHM 232 - Organic Chemistry 2

Course Units: 1.0 (**Winter, Spring: Adrian**) A continuation of CHM 231 including an emphasis on synthesis, and the chemistry of conjugated and aromatic compounds, carbonyl compounds, and an introduction to important classes of biomolecules. **Prerequisite(s):** CHM 231 **Corequisite(s):** CHM 232L **Lecture/Lab Hours** Four lab hours each week.

CHM 240 - Analytical Chemistry

Course Units: 1.0 (**Spring: MacManus-Spencer**) A course that focuses on the quantitative analysis of samples. Classroom and laboratory emphasis on statistical treatment of data, classical and instrumental methods of chemical analysis, and chemical equilibrium. **Prerequisite(s):** CHM 231 **Corequisite(s):** CHM 240L **Lecture/Lab Hours** Six lab hours each week.

CHM 245 - Environmental Chemistry

Course Units: 1.0 (**Not Offered this Academic Year**) A course focused on the role of chemical principles such as chemical equilibrium, kinetics and chemical structure in understanding natural environmental cycles and the impacts of human activity on those cycles. Topics covered include: aquatic chemistry and water pollution, atmospheric chemistry and air pollution, energy and climate change, and toxic organic chemicals in the environment. **Prerequisite(s):** CHM 231

CHM 260 - Inorganic Chemistry

Course Units: 1.0 (**Fall: Staff**) Foundations of inorganic chemistry with key focus on structure and symmetry, bonding, acid/base properties, reactivity, and physical characterization of inorganic compounds. Laboratory emphasis will focus on the synthesis and characterization of inorganic

compounds and investigation of their physical properties. **Prerequisite(s):** CHM 231 or permission of the instructor. **Corequisite(s):** CHM 260L
Lecture/Lab Hours Four lab hours each week.

CHM 291 - Chemistry Research Practicum 1

Course Units: 0.0 (**Fall, Winter, Spring: Staff**) This course is designed for students who want to gain research experience in chemistry or biochemistry under the direction of a member of the chemistry faculty. Expectations include a minimum of four hours per week of lab work, in addition to other requirements to be determined by individual research advisors. To receive Pass/Fail credit equivalent to one course, the student must earn 3 terms (normally in a row) of passing grades for the practicum experience. **Prereq/Corequisite(s):** Not open to students currently enrolled in CHM 491 , CHM 492 , CHM 493 or in a sophomore scholar's project in the Chemistry Department.

CHM 292 - Chemistry Research Practicum 2

Course Units: 0.0 (**Fall, Winter, Spring: Staff**) This course is designed for students who want to gain research experience in chemistry or biochemistry under the direction of a member of the chemistry faculty. Expectations include a minimum of four hours per week of lab work, in addition to other requirements to be determined by individual research advisors. To receive Pass/Fail credit equivalent to one course, the student must earn 3 terms (normally in a row) of passing grades for the practicum experience. **Prereq/Corequisite(s):** Not open to students currently enrolled in CHM 491 , CHM 492 , CHM 493 or in a sophomore scholar's project in the Chemistry Department.

CHM 293 - Chemistry Research Practicum 3

Course Units: 0.0 (**Fall, Winter, Spring: Staff**) This course is designed for students who want to gain research experience in chemistry or biochemistry under the direction of a member of the chemistry faculty. Expectations include a minimum of four hours per week of lab work, in addition to other requirements to be determined by individual research advisors. To receive Pass/Fail credit equivalent to one course, the student must earn 3 terms (normally in a row) of passing grades for the practicum experience. **Prereq/Corequisite(s):** Not open to students currently enrolled in CHM 491 , CHM 492 , CHM 493 or in a sophomore scholar's project in the Chemistry Department.

CHM 295H - Chemistry Honors Independent Project 1

Course Units: 0.0 (**Fall, Winter, Spring: Staff**) Two-term sophomore independent study project on a chemistry- or biochemistry-related project under the direction of a member of the chemistry faculty, for students in the Union Scholars Program. Expectations include a minimum of six hours per week of lab work, in addition to other requirements to be determined by individual research advisors. Student receives a Pass/Fail grade in the first term of the project, and a letter grade and one course credit upon completion of the second term of the project. **Prereq/Corequisite(s):** Not open to students currently enrolled in CHM 491 , CHM 492 , or CHM 493

CHM 296H - Chemistry Honors Independent Project 2

Course Units: 1.0 (**Fall, Winter, Spring: Staff**) Two-term sophomore independent study project on a chemistry- or biochemistry-related project under the direction of a member of the chemistry faculty, for students in the Union Scholars Program. Expectations include a minimum of six hours per week of lab work, in addition to other requirements to be determined by individual research advisors. Student receives a Pass/Fail grade in the first term of the project, and a letter grade and one course credit upon completion of the second term of the project. **Prereq/Corequisite(s):** Not open to students currently enrolled in CHM 491 , CHM 492 , or CHM 493

CHM 330 - Medicinal Chemistry

Course Units: 1.0 (**Spring: Kehlbeck**) This course focuses on medicinal chemistry and the underlying principles of organic chemistry. Topics to be covered might include drug discovery, lead modification, drug-receptor interactions, structure-activity relationships (SAR), pro-drugs and biomimetics. Physicochemical properties and synthetic approaches to drug families will be especially emphasized. **Prerequisite(s):** CHM 232

CHM 332 - Synthetic Methods

Course Units: 1.0 (**Not Offered this Academic Year**) This course focuses on developing the common laboratory techniques used in modern synthetic organic chemistry and the underlying principles of organic chemistry covered. Topics to be covered will be in the form of three synthetic projects. **Prerequisite(s):** CHM 232 **Lecture/Lab Hours** Six lab hours each week plus additional instrumentation time outside of lab.

CHM 335 - Survey of Biochemistry

Course Units: 1.0 (**Spring: Connelly**) **Cross-Listed:** BIO 335 and BCH 335

CHM 340 - Chemical Instrumentation

Course Units: 1.0 (**Fall: Carroll**) Theory and practice of modern methods of analysis with emphasis on spectroscopic, chromatographic, electrochemical, and surface science techniques, as well as electronic measurements. **Prerequisite(s):** CHM 231 , CHM 240 , and one course in physics or permission of the instructor. **Corequisite(s):** CHM 340L **Lecture/Lab Hours** Four lab hours each week.

CHM 351 - Kinetics and Thermodynamics

Course Units: 1.0 (**Winter: Robertson**) Properties of gases; chemical kinetics; fundamentals of thermodynamics including heats of reactions and phase and chemical equilibria. **Prerequisite(s):** CHM 240 , PHY 110 or PHY 120 and MTH 115 **Corequisite(s):** CHM 351L **Lecture/Lab Hours** Four lab hours each week.

CHM 352 - Quantum Chemistry

Course Units: 1.0 (**Spring: Staff**) Fundamentals of quantum mechanics and its application to chemical bonding and spectroscopy. **Prerequisite(s):** CHM 351 and PHY 111 or PHY 121 **Corequisite(s):** CHM 352L **Lecture/Lab Hours** Four lab hours each week.

CHM 354 - Chemical Applications of Group Theory

Course Units: 1.0 (**Not Offered this Academic Year**) A course on the role of molecular symmetry in chemistry. Topics include symmetry point groups, bonding in organic, inorganic, and organometallic compounds, orbital symmetry control of chemical reactions, and spectroscopy. **Prerequisite(s):** CHM 232 and CHM 352 , MTH 115 , and PHY 111 or PHY 121 **Prereq/Corequisite(s):** CHM 352 may be taken concurrently.

CHM 360 - Advanced Inorganic Chemistry: Materials & Catalysis

Course Units: 1.0 (**Winter: Tyler**) Structure/property relationships in solids, organometallics, homogeneous and heterogeneous catalysis, materials chemistry and inorganic nanomaterials. **Prerequisite(s):** CHM 260 and CHM 351 or permission of the instructor.

CHM 382 - Biochemistry: Structure and Catalysis

Course Units: 1.0 (**Winter: Fox**) Structure and function of proteins/enzymes including purification, mechanism, kinetics, regulation, metabolism and a detailed analysis of several classic protein systems. **Cross-Listed:** BCH 382 and BIO 382 **Prerequisite(s):** CHM 232 Not open to students who have completed CHM 335 , BIO 335 or BCH 335 **Corequisite(s):** CHM 382L **Lecture/Lab Hours** Four lab hours each week.

CHM 491 - Chemical Research 1

Course Units: 1.0 (**Fall, Winter, Spring: Staff**) Chemical research under the direction of a member of the faculty. Thesis required. Expectations include a minimum of twelve hours per week of lab work, in addition to other requirements to be determined by individual research advisors. **Prerequisite(s):** CHM 232 , CHM 240 (CHM 340 and CHM 351 are recommended), third-term junior standing, and/or permission of the department chair. **CC:** WS

CHM 492 - Chemical Research 2

Course Units: 1.0 (**Fall, Winter, Spring: Staff**) Chemical research under the direction of a member of the faculty. Thesis required. Expectations include a minimum of twelve hours per week of lab work, in addition to other requirements to be determined by individual research advisors. **Prerequisite(s):** CHM 232 , CHM 240 (CHM 340 and CHM 351 are recommended), third-term junior standing, and/or permission of the department chair. **CC:** WS

CHM 493 - Chemical Research 3

Course Units: 1.0 (**Fall, Winter, Spring: Staff**) Chemical research under the direction of a member of the faculty. Thesis required. Expectations include a minimum of twelve hours per week of lab work, in addition to other requirements to be determined by individual research advisors.

Prerequisite(s): CHM 232 , CHM 240 (CHM 340 and CHM 351 are recommended), third-term junior standing, and/or permission of the department chair. **CC:** WS

Chinese

CHN 100 - Basic Chinese 1

Course Units: 1.0 (**TBD: Staff**) Basic skills for students who begin with no knowledge of Mandarin. **CC:** HUM

CHN 101 - Basic Chinese 2

Course Units: 1.0 (**TBD: Staff**) A continuation of CHN 100 . **Prerequisite(s):** CHN 100 or permission of instructor. **CC:** LCCC, HUM

CHN 102 - Basic Chinese 3

Course Units: 1.0 (**TBD: Staff**) A continuation of CHN 101 . **Prerequisite(s):** CHN 101 or permission of instructor. **CC:** LCCC, HUM

CHN 103 - Chinese for the Term Abroad

Course Units: 1.0 (**TBD: Staff**) An introduction to Chinese language, combining Basic Chinese I and culture components. Open to students going on the term abroad or those with general interest in learning Chinese. Students who took CHN 100 / CHN 102 sequence cannot take this course. **CC:** LCCC

CHN 200 - Intermediate Chinese 1

Course Units: 1.0 (**TBD: Staff**) Review, and continued development of all skills in Mandarin. **CC:** LCCC

CHN 201 - Intermediate Chinese 2

Course Units: 1.0 (**TBD: Staff**) Continuation of CHN 200 **Prerequisite(s):** CHN 200 or permission of instructor. **CC:** LCCC

CHN 202 - Intermediate Chinese 3

Course Units: 1.0 (**TBD: Staff**) Continuation of CHN 201 **Prerequisite(s):** CHN 201 or permission of instructor. **CC:** LCCC

CHN 204T - Chinese Language Studied Abroad

Course Units: 1.0 (**TBD: Staff**) See International Programs. **CC:** LCCC **Note:** Fall term in China.

CHN 205T - Chinese Language Studied Abroad

Course Units: 1.0 (**TBD: Staff**) See International Programs. **CC:** LCCC **Note:** Fall term in China.

CHN 250T - Chinese Language Studied Independently Abroad 1

Course Units: 1.0 (**TBD: Staff**) **CC:** LCCC

CHN 251T - Chinese Language Studied Independently Abroad 2

Course Units: 1.0 (**TBD: Staff**) CC: LCCC

CHN 295H - Chinese Honors Independent Project 1

Course Units: 0.0 (**TBD: Staff**)

CHN 296H - Chinese Honors Independent Project 2

Course Units: 1.0 (**TBD: Staff**)

CHN 300 - Advanced Intermediate Chinese 1

Course Units: 1.0 (**TBD: Staff**) Continued formal study of the Chinese language. **Prerequisite(s):** CHN 202 or equivalent. CC: LCCC, HUM

CHN 301 - Advanced Intermediate Chinese 2

Course Units: 1.0 (**TBD: Staff**) A continuation of CHN 300 **Prerequisite(s):** CHN 300 or permission of instructor. CC: LCCC, HUM

CHN 302 - Advanced Intermediate Chinese 3

Course Units: 1.0 (**TBD: Staff**) A continuation of CHN 301 **Prerequisite(s):** CHN 301 or permission of instructor. CC: LCCC, HUM

CHN 320T - Chinese Civilization

Course Units: 1.0 (**TBD: Staff**) CC: LCCC

CHN 400 - The Changing Face of China

Course Units: 1.0 (**TBD: Staff**) This course is designed for students who have completed three years of Chinese at the college level or the equivalent. More advanced authentic texts of diverse topics will be introduced to students that cover the sociopolitical, economic, and cultural dimensions of a drastically changing China sitting in the whirlwind of commercialization and globalization. Students will gain insight into contemporary China and develop a higher level of Chinese proficiency through class discussions, written compositions, TV news clips and film analyses. Class will be conducted entirely in Chinese. **Prerequisite(s):** CHN 302 or equivalent. Enrollment with the consent of the instructor. CC: LCCC, HUM

CHN 401 - Media China

Course Units: 1.0 (**TBD: Staff**) The course is designed for students who have completed three years of Chinese at the college level or the equivalent. Through analysis of more advanced and up-to-date authentic materials from China's mass media, students will not only develop a higher level of Chinese proficiency through class discussions, written compositions, research presentations, but also gain insight into contemporary China, as well as develop strong media literacy skills. Class will be conducted entirely in Chinese. **Prerequisite(s):** CHN 302 or equivalent. Enrollment with consent of the instructor. CC: LCCC, HUM

CHN 489 - Chinese Senior Project

Course Units: 1.0 (**TBD: Staff**) This project serves as a required, capstone course in the Chinese major. The project is designed in consultation with the faculty coordinator of senior projects. **Prerequisite(s):** Intermediate-High to Advanced-Low proficiency or permission of the faculty coordinator. CC: LCCC, WS

MLT 200 - Modern Chinese Literature

Course Units: 1.0 **(TBD: Staff)** An introduction to Chinese literature in the 20th Century. The publishing industry, and especially literature, played an influential role in shaping China's modern development. Students will study the origins of the New Culture movement's "new literature," analyze "revolutionary romanticism" and art for the masses, as well as examine contemporary works of popular fiction. The course relates China's literary and cultural trends within the local and global dimensions of modernity. All works in English. **CC:** HUL, LCC

MLT 201 - Chinese Cinema

Course Units: 1.0 **(TBD: Staff)** From the glitzy production studios of 1930's Shanghai to the contemporary hinterlands of China, the backstreets of Hong Kong, and the towns of Taiwan, this course examines the development and transformation of Chinese cinema. It explores questions of aesthetics, Chinese identity, transnationalism, and representation. All films subtitled. **CC:** HUM, LCC

MLT 202 - Gender and Sexuality in Modern China

Course Units: 1.0 **(TBD: Staff)** The course examines gender and sexuality in 20th-century China as a gateway to understanding the political, cultural, and economic realities of China today. We consider the figure of the "New Woman" during China's civil war and World War II, the androgynous ideal after the founding of the People's Republic, the "Successful Man" during China's economic reform, and the articulations of "Comrades" as part of local, national, and international conversations. Readings in English. All films subtitled. **CC:** HUL, LCC

MLT 203 - Asian American Film and Performance

Course Units: 1.0 **(TBD: Staff)** An examination of topics in Asian American studies through film and performance by and about Asian Americans. Class material draws from independent filmmakers, theatrical and artistic performances, as well as theoretical and critical texts on culture and diversity, gender, the diaspora, and ethnicity. **CC:** HUM, LCC

MLT 204 - Literary Traditions in East Asia

Course Units: 1.0 **(TBD: Staff)** Literary developments in East Asia, looking closely at the aesthetic and philosophic foundations of its varied literature through poetic genres, story forms, oral storytelling, travel literature, and drama. **CC:** HUL, LCC

MLT 205 - Perspectives in Modern East Asian Literature

Course Units: 1.0 **(TBD: Staff)** The literary and artistic developments in East Asia since the mid-19th century. The course considers questions of tradition, culture, modernity, globalism, and technology by examining cultural artifacts - novels, short stories, plays, paintings, architecture, music, and film. **CC:** HUL, LCC

MLT 209 - The New Wall of China

Course Units: 1.0 **(TBD: Staff)** An interdisciplinary overview of dams and development, with specific attention to the socio-cultural, historical, economic, and environmental attributes of a region in China whose geo-political landscape has been dramatically impacted by the construction of the Three Gorges Dam. In providing a context to the dam's construction, students will be introduced to the intricate connections between all the above factors and engineering, technology, and the environment. **Cross-Listed:** ENS 222 **CC:** LCC, SET

Classics

CLS 099 - The Bible: An Introduction

Course Units: 1.0 **(TBD: Staff)** This course is a basic survey of the most historically and culturally important book in the world. Actually, the Bible is not a single book, but a complex anthology of many different genres, including history, legend, myth, law, poetry, prophecy, philosophy, and an astonishing variety of religious texts, from passionate prayers to bitter complaints against God, composed over the course of something like a thousand years. In addition to reading the most essential parts of the Old and New Testaments, we will also examine some of the countless ways that the Bible has left an imprint on modern western and American life. No previous acquaintance with the Bible is required. **Cross-Listed:** EGL 099 **CC:** HUL

CLS 110 - Ancient Egypt: History and Religion

Course Units: 1.0 (**TBD: Staff**) This course offers an overview of the history of ancient Egypt from the rise of the state under the first pharaohs (3200 BC) to its incorporation into the Hellenistic and Roman empires. Attention is given to political and social organization, foreign relations, and religion based on a study of relevant ancient texts (in translation) and archaeological evidence. **CC: LCC, HUM**

CLS 111 - Ancient Iraq: History and Religion

Course Units: 1.0 (**TBD: Staff**) Ancient Iraq is often termed 'the cradle of civilization' since it is here that agriculture, urbanism, and writing first occurred. This course examines the early history of Iraq (ancient Mesopotamia) from the development of agriculture and permanent settlements through to the establishment of the first cities and states, down to about 1600 BCE. The class examines the social and economic contexts in which early Mesopotamian culture emerged, and it also gives attention to religious and religion-political ideas **Cross-Listed: REL 111 CC: LCC, HUM**

CLS 121 - The History of Greece to the Death of Alexander the Great

Course Units: 1.0 (**Fall: Winters**) Investigation of the circumstances that led to history's first democracy, the buildings on the Acropolis and the development of Greek literature from Homer to Sophocles and Plato; the invention of the "Western way" of war; the evolution of the Greek poleis and the confrontation with the emerging nation-state of Macedonia; the epochal wars of the Greek states with Persia and the disastrous conflict of Athens and Sparta in the Peloponnesian War; and Alexander's conquest of the "world" from the Mediterranean Sea to the rivers of India in a little over ten years. Readings include Homer's *Odyssey*, selected lives of Plutarch, and Thucydides. **CC: LCC, HUM**

CLS 125 - History of Rome

Course Units: 1.0 (**TBD: Staff**) The history of Rome, its rise from earliest times through the Republic and its decline under the Empire to disaster in A.D. 410. **CC: HUM**

CLS 126 - The Rise of the Roman Republic

Course Units: 1.0 (**Spring: Mueller**) The rise of Rome from its foundation (traditionally 753 BC) to the assassination of Caesar in 44 BC and the rise of his adopted son Octavian. How did a remote backwater of the Mediterranean rise to imperial power? Why did its constitutional machinery collapse? Was military dictatorship unavoidable? **CC: LCC, HUM**

CLS 129 - History of the Roman Empire

Course Units: 1.0 (**TBD: Staff**) The Roman Empire from the rise of Octavian (later called Augustus) to decline, conversion, and final collapse circa AD 476. Augustus established Roman rule on the basis of his legions, a monarchy cloaked as republican government, and religious innovations that included formal worship of the emperor as a god on Earth. This system endured for centuries, but faced increasingly violent threats both from outside (Germanic tribes, Persians, Parthians) and from within (revolts, rebellions, Christians). How did Rome manage to endure as long as it did and why did Rome fail? **CC: HUL, HUM, LCC**

CLS 132 - Religion in the Pagan World

Course Units: 1.0 (**Fall: Mueller**) An examination of particular cults and the performance of cult in ancient Greek and Roman societies, and consideration of the relationship of the individual and the state to deity in the pre-Christian world. Emphasis on ancient sources. **CC: LCC, HUM**

CLS 134 - Classical Art and Architecture

Course Units: 1.0 (**TBD: Staff**) An introductory survey of the arts of Greece and Rome, including painting, sculpture, architecture, and decorative arts. Emphasis will be placed upon learning art historical and archaeological terminology and methods, the place of art and architecture in ancient society and culture, and contacts with other cultures, in addition to becoming familiar with the most important monuments, artists, and patrons. **Cross-Listed: AAH 110 CC: LCC, HUM**

CLS 135 - In Search of the Past: Greek and Roman Historiography

Course Units: 1.0 (**TBD: Staff**) An introduction to the origins, purpose, and methodology of the writing of history in the classical world. **CC:** HUL, LCC, HUM

CLS 137 - Greek and Roman Biography

Course Units: 1.0 (**TBD: Staff**) A study of the origin and development of the genre of biography from the fourth century B.C. to the second century A.D., with extensive readings (all in English) of Nepos, Suetonius, and Plutarch. **CC:** HUL, LCC, HUM

CLS 138 - Introduction to Roman Archaeology

Course Units: 1.0 (**TBD: Staff**) This course introduces students to the archaeology of the ancient Roman world. We explore major themes in the study of that world, such as urbanism, the economy, identity, and religion, by examining the main categories of archaeological evidence for the reconstruction of Roman society. Along the way, we investigate material culture through the eyes of people of varied backgrounds and experiences - enslaved captives of war, powerful matriarchs, the urban poor, megalomaniacal emperors, and more - and discuss recent developments in archaeological research methods **CC:** HUM, LCC

CLS 139 - City of Rome

Course Units: 1.0 (**TBD: Staff**) This course examines the city of Rome, addressing sites in their historical and cultural contexts. The focus is the ancient city, but we also examine the city at various periods in history, including World War II and the present day. We consider how and why a city gets built, what it means to live in a city, and who we can "read a city." Topics covered include venues of spectatorship, religious sites, the city of the emperors, water systems and roads, the political city, and travel and tourism. All readings are in English. **CC:** LCC, HUM

CLS 140 - Introduction to Greek Archaeology

Course Units: 1.0 (**Winter: Committo**) For thousands of years, the Aegean has been home to dynamic societies whose complex interactions with each other and with the broader region produced some of the most distinctive cultural and political achievements of the ancient world. This course introduces students to the physical remains these societies left behind. We study key concepts of Greek archaeology, including issues of chronology and ethics, as well as major themes in the study of the ancient Greek world, such as religion and the emergence of the city-state. Special attention is paid to new developments in archaeological research methods. We begin around 3000 BCE with the rise of the region's first complex civilizations, and end around 100 BCE with the transformations brought about by Alexander the Great. Along the way, we explore how archaeological investigations reveal the distinctiveness of ancient Greece and help us reconstruct the daily lives of people in antiquity. **CC:** HUM, LCC

CLS 141T - Classical Greek Archaeology

Course Units: 1.0 (**TBD: Staff**) An introduction to the study of archaeology with field trips to various sites in and near Athens. Four hours per week. Offered only as part of the Term Abroad in Greece. **CC:** LCC

CLS 142 - Special Topics in Classics

Course Units: 1.0 (**TBD: Staff**) **CC:** HUM

CLS 143 - Classical Mythology

Course Units: 1.0 (**TBD: Staff**) Greek and Roman myths, with emphasis on the ancient sources. All readings will be in English. **CC:** LCC, HUL, HUM

CLS 146 - Sex and Gender in Classical Antiquity

Course Units: 1.0 (**Spring: Gazzarri**) The representations and realities of sexuality and gender in classical Greece and Rome. Primary focus on how ancient writers formulated the categories of "feminine" and "masculine" in discussions of ethics, nationality, education, politics, and science. This will enable students to think critically about some of the central literary works in the Western tradition through the socially charged categories of gender. Attention will also be directed to how literary representations compare with the actual social experience of ancient women, insofar as we may reconstruct it through the reading of literary, archaeological, and artistic evidence in social, familial, legal, and religious contexts. **CC:** LCC, HUM

CLS 150 - Ancient Philosophy

Course Units: 1.0 (**TBD: Staff**) An examination of issues debated by ancient Greek and Roman philosophers that became central to western philosophy, including the nature of reality, the criteria for knowledge, the difference between good and pleasure, and the principles of political justice. Discussion of readings from the Pre-Socratics, Plato, Aristotle, the Epicureans and the Stoics **Cross-Listed:** PHL 251 (150)

CLS 151 - The Ancient World in Film and Literature

Course Units: 1.0 (**Fall: Raucci**) Greco-Roman antiquity has been a favorite topic of Hollywood for years. This fascination continues today, with the recent appearance of major blockbusters as well as TV productions. Why do the Greeks and Romans appeal to a modern audience? This course will consider ancient texts in translation alongside their modern film representations. Our goal will not be to consider where the films went "wrong." Instead, we will question how these films recast and reinterpret classical texts to reflect modern interests. This course will include an "entrepreneurship module." We will question what is entrepreneurship and if Hollywood's commodification of the ancient world is entrepreneurial. **CC:** LCC, HUL, HUM

CLS 153 - The Environment in the Ancient World

Course Units: 1.0 (**Winter: Committo**) Students will discover how ancient Mediterranean societies interacted with the natural world, as revealed by history, art and literature, and archaeology. Some of the questions we will investigate include: how did the Mediterranean environment affect and determine everyday life, both in cities and in rural areas? How did ancient societies manage their food supply? What was their view of nature? How did they react to ecological crisis? And, finally, how can we use their outlook on and treatment of the environment to inform our own approach? **CC:** HUM, LCC

CLS 154 - Poetry and the Cosmos

Course Units: 1.0 (**TBD: Staff**) An examination of Greek and Roman poets' attempts to understand the origin and development of the universe, and of human beings' place in it. Readings (all in English) will include Hesiod, the pre-Socratic philosophers, and Lucretius. **CC:** HUL, LCC, HUM

CLS 157 - Entrepreneurship in the Ancient World

Course Units: 1.0 (**TBD: Staff**) "Entrepreneurship" (or seizing upon and exploiting opportunity) is a mindset that has existed at various times and places. Through a variety of ancient sources, including legal, historical, and literary works, students will use the ancient world as a laboratory in which to observe and to assess what may or may not have constituted opportunity in the past and to examine strategies employed (as well as opportunities missed) for taking advantage of available resources in a variety of situations: economic, political, and religious. **CC:** HUM, LCC

CLS 158 - The Ancient "Other": Greeks, Romans, and Barbarians

Course Units: 1.0 (**TBD: Staff**) Investigates the concept of the barbarian in ancient Greek and Roman culture, how the image of the barbarian was "constructed" by the Greeks and Romans and in turn defined their identity. The course will look at depictions both literary and visual of the peoples living on the edges of the Greco-Roman world and discuss the ways in which the barbarian came to invert, reflect, and criticize the Greeks and Romans themselves. Readings in English translation from historians, geographers, poets, philosophers, ancient novelists, and medical writers. **CC:** LCC, HUM

CLS 160 - The Individual in Ancient Society

Course Units: 1.0 (**TBD: Staff**) A study of the evolving concept of the individual in antiquity and the changing relationship of the individual and the family, state, and nature. Readings in English of major ancient authors. **CC:** HUL, LCC, HUM

CLS 161 - The Heroic Journey: Survey of Ancient Epic

Course Units: 1.0 **(TBD: Staff)** An examination of four great epics of classical antiquity: Homer's Iliad and Odyssey, Virgil's Aeneid, and Ovid's Metamorphoses. All readings in English. **CC:** HUL, LCC, HUM

CLS 162 - Greek and Roman Tragedy in Translation

Course Units: 1.0 **(TBD: Staff)** Readings in classical Greek tragedy and the tragedies of Seneca and selections from other Roman works. **CC:** HUL, LCC, HUM

CLS 163 - Greek and Roman Comedy in Translation

Course Units: 1.0 **(TBD: Staff)** Readings from the Greek comedies of Aristophanes and Menander, the Roman comedies of Plautus and Terence. **CC:** HUL, LCC, HUM

CLS 168 - Ancient Novel

Course Units: 1.0 **(TBD: Staff)** A survey of the novel and its development in antiquity. Readings include a selection of complete and fragmentary Greek romances by Chariton, Xenophon of Ephesus, Achilles Tatius, Longus, Heliodorus, and Lucian. The Roman comic novels will be Petronius's Satyricon and Apuleius's Metamorphoses. All readings in English. **CC:** HUL, LCC, HUM

CLS 178 - Ancient World Mythology

Course Units: 1.0 **(TBD: Staff)** The myths of Greece, Rome, and the Ancient Near East, Egypt, Sumer, Babylonia, India, et al. reveal surprising similarities and startling differences. A comparative approach illuminates the peculiar characteristics of the various traditions. No culture exists in isolation. These societies were all subject to manifold political (and sometimes even violent) "multicultural" pressures. Rome itself, whose poet Ovid composed the "Bible" of the Western mythological tradition, stood at the head of a vast amalgam of peoples from the cold forests of Northern Europe across the god-infested lands of Greece to the ancient sands of Egypt and beyond. Everywhere we look we will find the interactions and conflicts of differing peoples, traditions, gods. We will listen to their sacred stories, their myths, and, through active comparison and investigation, strive to gain a general overview of the facts, a general understanding of their differing religious conceptions, and perhaps, we may hope, a glimpse into their ancient wisdom. The course will cover broad mythical themes: creation, gods, the underworld, and heroes. Other topics will include the nature of sacrifice and ritual, ancestor-worship, the afterlife, divine kingship, the role of myth in political propaganda, the role of politics and religion in myth, gender issues, and related themes. Given the vast range of the material, our journey will of necessity be selective. Lectures will range, for example, from general presentations of one cultural system to detailed examination of one particular type of god across several cultures. Although much of the focus will be on the ancient myths of Greece, Rome, Egypt, the Near East, and India, we will examine some (relatively) more recent myths from Africa and the Americas as well. **CC:** LCC, HUM

CLS 186 - Roman Law and Society

Course Units: 1.0 **(TBD: Staff)** A survey of Roman law with special attention to constitutional history in the context of the conceptual development of civil law. Basic concepts of Rome's civil law include "person" (who qualified and under what conditions?), "property" (at the end of the day, what else was there?), "succession" (i.e., who inherited property when the owner died?), "contract" (the fine print has been important for a long time!), and "delict" (wrong-doing, damages, and remedies or, failing that, punishments). We will look, in other words, at the Roman constitution and its intersections with basic civil rights and the procedures for conducting one's affairs legally. Crimes and their punishments will hold our interest too, as will the influence of Roman legal thinking on European and American jurisprudence. **CC:** LCC, HUM

CLS 190 - Science and Technology in the Ancient World

Course Units: 1.0 **(TBD: Staff)** This course is an introduction to the scientific and technological developments during the Greek and Roman periods. Students will deepen their understanding of the scientific method, acquire skills in its application in the evaluation of evidence, and learn about the impact of science and technology on ancient civilization. The time periods covered in this class will stretch from Bronze Age of Greece to the Late Roman Empire. This course will discuss a broad range of scientific and technological topics. Students will learn about this crucial aspect of antiquity predominantly through the reading of original sources in translation. Because of the diverse nature of the topics, the authors will range greatly, including such authors as Hesiod, Pliny the Elder, and Frontinus. Students will be expected to draw conclusions from the primary source material as well as connect the ancient texts to other scholarly readings. The secondary reading will be drawn from a variety of academic disciplines, including classics and history of science. Ultimately, students will gain a better understanding of the role that ancient technological and scientific developments have had in their own world. **CC:** HUM

CLS 192 - Ancient Medicine

Course Units: 1.0 (**TBD: Staff**) This course explores the Greek and Roman roots of Western medicine. How did the Hippocratic writers, Galen, and other physicians understand and treat the ailments of patients? And what did it mean, in the first place, to be a physician or a patient two millennia ago. **CC: HUM**

CLS 230 - Judaism and the Origins of Christianity

Course Units: 1.0 (**Fall: Bedford**) We know that Jesus of Nazareth was Jewish, so how is it that Christianity and Judaism became separate religions? This course attempts to answer this question by investigating the nature of the relationship between earliest Christianity and Rabbinic Judaism, drawing out their shared roots in the religion and literature of ancient Israel, and exploring the diverse expressions of second temple Judaism among which the two religious traditions emerged. It also explores their distinctive religious teachings and scriptural interpretations with a particular interest in understanding how and why Christianity and Judaism, despite their commonalities, parted ways and became independent religions. **Cross-Listed: REL 230 CC: LCC, HUM**

CLS 242 - The Philosophy of Aristotle

Course Units: 1.0 (**TBD: Staff**) Students explore the philosophical ideas of Aristotle, perhaps the most celebrated and influential thinker in the history of philosophy. Particular attention will be paid to Aristotle's theory of being, which addresses the organic structure of both living things (plants and animals) and entities whose complex articulation is similarly "organic" (human political communities, works of art and other human artifacts). Readings will be from a variety of Aristotle's writings and may include Physics, Metaphysics, On the Soul, On the Parts of Animals, Politics, Poetics, and Aristotle's writings on logic, ethics, and rhetoric. **Cross-Listed: PHL 342 CC: HUM**

CLS 250 - Death in the West

Course Units: 1.0 (**TBD: Staff**) An introduction to the "history of death" that has emerged from the fields of anthropology, archaeology, sociology, and history in the last 25 years. Through readings that present the death rituals of such different societies as eighth century B.C. Greece, the South Pacific islands, medieval Europe, and modern America, the course will examine the problems associated with composing a coherent account of how and why cultures respond to the threat that death presents to the social order, why that response can change over time, and the problems involved in a "history of death" and how this relates to the areas and methods of "traditional" history. **CC: LCC, HUM**

CLS 295H - Classics Honors Independent Project 1

Course Units: 0.0 (**TBD: Staff**)

CLS 296H - Classics Honors Independent Project 2

Course Units: 1.0 (**TBD: Staff**)

CLS 320 - Early Christian Thought

Course Units: 1.0 (**TBD: Staff**) Christianity emerged in the context of late antique Greco-Roman culture with its roots in ancient Judaism. It drew on both of these in developing distinctive teachings regarding Christ, God, salvation, the church, ethics, and society. This course examines how over the period 50-450 CE debates around these topics led to the articulation of the normative Christian tradition. **CC: HUM**

CLS 361 - Seminar in Classical Studies

Course Units: 1.0 (**TBD: Staff**) **CC: HUM**

CLS 490 - Classics Independent Study 1

Course Units: 1.0 (**Fall, Winter, Spring: Staff**) Advanced individual study for qualified students. Periodic reports on a period of Greek or Roman history or a problem in Greco-Roman civilization. **Prerequisite(s):** Permission of the department chair.

CLS 491 - Classics Independent Study 2

Course Units: 1.0 (**Fall, Winter, Spring: Staff**) Advanced individual study for qualified students. Periodic reports on a period of Greek or Roman history or a problem in Greco-Roman civilization. **Prerequisite(s):** Permission of the chair.

CLS 492 - Classics Independent Study 3

Course Units: 1.0 (**Fall, Winter, Spring: Staff**) Advanced individual study for qualified students. Periodic reports on a period of Greek or Roman history or a problem in Greco-Roman civilization. **Prerequisite(s):** Permission of the department chair.

CLS 497 - Classics Senior Project

Course Units: 1.0 (**Fall, Winter, Spring: Staff**) One-term senior project. **CC:** WS

CLS 498 - Classics Senior Thesis 1

Course Units: 0.0 (**Fall, Winter, Spring: Staff**) Independent reading and thesis in a subject in the field of Greek or Roman history or Greco-Roman civilization. **Prerequisite(s):** Permission of the department chair.

CLS 499 - Classics Senior Thesis 2

Course Units: 2.0 (**Fall, Winter, Spring: Staff**) Independent reading and thesis in a subject in the field of Greek or Roman history or Greco-Roman civilization.

Computer Science

CSC 033 - Programming Practicum: Introduction to R

Course Units: 0.0 (**Winter: Striegnitz**) An introduction to the programming language R and how it can be used for statistical analysis and visualization of data. Students will learn how to write basic R programs that can read, write, and manipulate data. They will make use of R functions for executing common statistical analysis and learn how to display the results using graphs and charts. Through a series of projects, students will get experience with writing their own functions, learn how to make use of R documentation and how to extend their own knowledge of the language. A student can receive a pass/fail credit equivalent to one elective course, if they receive a passing grade in this course as well as in two terms (normally in a row) of the CS practicum course (CSC 281, 282).

CSC 055 - Working with the Web

Course Units: 1.0 (**Not Offered this Academic Year**) Design, writing, and publishing of WWW pages; creation of graphical images; study of the underlying Web technologies such as communication protocols, digital encoding and compression; programming of Web pages. **CC:** SET

CSC 080 - History of Computing

Course Units: 1.0 (**Not Offered this Academic Year**) A survey of tools for computation, from number systems and the abacus to contemporary digital computers. The course focuses on the development of modern electronic computers from ENIAC to the present. Study of hardware, software, and the societal effects of computing. **Cross-Listed:** HST 292 **CC:** SET

CSC 103 - Taming Big Data: Introduction to Computer Science

Course Units: 1.0 (**Fall: Orhan; Winter: Orhan, Striegnitz; Spring: Webb**) Introduction to the field of computer science with the theme of natural and social science applications. Introduces students to algorithms, basic data structures, and programming techniques. Includes development of programs and use of existing applications and tools for computational applications including simulation, data analysis, visualization, and other computational experiments. **Prereq/Corequisite(s):** A grade of C- or better is required in order to take any course that requires an introductory course as prerequisite. Once one has passed an introductory course with a C- or better, no other introductory course may be taken for credit. **CC:** QMR, SET

CSC 104 - Robots Rule! Introduction to Computer Science

Course Units: 1.0 (**Not Offered this Academic Year**) Introduction to the field of computer science with a robotics theme. Introduces students to algorithms, basic data structures, and programming techniques. Students will build and program robots, exploring mobility, navigation, sensing, and inter-robot communication. Additional class topics include: history of robotics, social and ethical issues, emotionally intelligent behavior and other current topics in robotics. **Prereq/Corequisite(s):** A grade of C- or better is required in order to take any course that requires an introductory course as prerequisite. Once one has passed an introductory course with a C- or better, no other introductory course may be taken for credit. **CC:** QMR, SET

CSC 105 - Game Development: Introduction to Computer Science

Course Units: 1.0 (**Fall: Fernanades, Talkad Sukumar; Winter: Talkad Sukumar**) Introduction to the field of computer science with a computer games theme. Introduces students to algorithms, basic data structures, and programming techniques. Computer game development is used as an example application area and students implement their own games throughout the course. **Prereq/Corequisite(s):** A grade of C- or better is required in order to take any course that requires an introductory course as prerequisite. Once one has passed an introductory course with a C- or better, no other introductory course may be taken for credit. **CC:** QMR, SET

CSC 106 - Can Computers Think? Introduction to Computer Science

Course Units: 1.0 (**Spring: Rieffel, Talkad Sukumar**) Introduction to the field of computer science with an artificial intelligence theme. Introduces algorithms, basic data structures, programming techniques, and basic methods from artificial intelligence. Includes discussion of questions in the philosophy of artificial intelligence. **Prereq/Corequisite(s):** A grade of C- or better is required in order to take any course that requires an introductory course as prerequisite. Once one has passed an introductory course with a C- or better, no other introductory course may be taken for credit. **CC:** QMR, SET

CSC 107 - Creative Computing: Introduction to Computer Science

Course Units: 1.0 (**Winter: Webb**) Introduction to the field of computer science with a media computation theme. Introduces students to algorithms, basic data structures, and programming techniques. Media computation is used as an application area, focusing on image manipulation, sound splicing, animations, HTML generation and automated reading of web pages. **Prereq/Corequisite(s):** A grade of C- or better is required in order to take any course that requires an introductory course as prerequisite. Once one has passed an introductory course with a C- or better, no other introductory course may be taken for credit. **CC:** QMR, SET

CSC 108 - Scientific Computing: Introduction to Computer Science

Course Units: 1.0 (**Fall: Webb**) Computers are used as tools in analyzing and solving scientific problems as well as being embedded in many applications and experimental equipment used by today's scientists. This course is designed to introduce students to computer programming and problem solving through the use of Python. Python is a language commonly used by the scientific community, and we will focus on using it to address scientific problems, using extensions that facilitate scientific computing. **CC:** QMR, SET **Note:** A grade of C- or better is required in order to take any course that requires an introductory course as prerequisite. Once one has passed an introductory course with a C- or better, no other introductory course may be taken for credit.

CSC 112 - The Processed Pixel

Course Units: 1.0 (**TBD: Staff**) **Cross-Listed:** AVA 270 **CC:** SET, HUM **Note:** This course does not count as an Introduction to Computer Science the way CSC 103 , CSC 104 , CSC 105 , CSC 106 , and CSC 107 and CSC 108 do.

CSC 118 - Introduction to Computer and Logic Design

Course Units: 1.0 (**TBD: Staff**) **Cross-Listed:** ECE 118 **Corequisite(s):** CSC 118L **CC:** SET **Note:** This course does not count as an Introduction to Computer Science the way CSC 103 , CSC 104 , CSC 105 , CSC 106 , CSC 107 and CSC 108 do.

CSC 120 - Programming on Purpose

Course Units: 1.0 (**Fall: Cass; Winter: Fernandes; Spring: Cass**) An introduction to software design principles aimed at making software more efficient, robust, readable, maintainable, and reusable. An introduction to object-oriented programming and design, including classes, objects, methods, and sub-typing. **Prerequisite(s):** CSC 103 , CSC 104 , CSC 105 , CSC 106 , or CSC 107 or CSC 108 **Prereq/Corequisite(s):** A grade of C- or better is required to continue with any course that requires CSC 120 as a pre-requisite. **CC:** SET

CSC 151 - Data Structures

Course Units: 1.0 (**Winter: Orhan; Spring: Fernandes**) Basic concepts of data organization and abstraction, software design, stacks, queues, trees, and their implementation with linked structures. Programming in Java. **Prerequisite(s):** MTH 197 and a C- or higher in CSC 120 . MTH 199 can be substituted for MTH 197 **Prereq/Corequisite(s):** A grade of C- or better is required in order to continue with any course that requires CSC 151 as a prerequisite.

CSC 206 - Text Analytics

Course Units: 1.0 (**Not Offered this Academic Year**) This course introduces computational techniques for extracting information from unstructured text. This includes reading in different types of text, preparing text for further processing, summarizing and visualizing basic descriptive statistics, as well as applications, such as sentiment analysis, information retrieval, information extraction, summarization, and topic modeling. **Prerequisite(s):** C- or higher in one course from CSC 103 , CSC 104 , CSC 105 , CSC 106 , CSC 107 , CSC 108 **CC:** SET

CSC 233 - Data Analytics

Course Units: 1.0

(**Not Offered this Academic Year**) Data analytics, the process of analyzing, revealing, interpreting, and visualizing information concealed inside big data, is revolutionizing daily life, as used by companies such as Amazon, Google and Facebook, for the diagnosis of medical conditions or the way medical claims are handled, for investment strategies and real estate pricing, and in academia, with the analysis of historical texts, understanding the deliberations of the Supreme Court or the European Commission, or processing large amounts of genomics data.

In this class, students will be introduced to techniques to acquire data from the web, manipulate and pre-process data into manageable forms, perform analyses from a description and predictive standpoint, and learn the basics of visualizing the results, all with a focus on story telling through data, enhancing data literacy. **Prerequisite(s):** C- or higher in one course from CSC 103 , CSC 104 , CSC 105 , CSC 106 , CSC 107 , CSC 108 . **CC:** SET

CSC 234 - Data Visualization

Course Units: 1.0 (**Not Offered this Academic Year**) Data has a story which has to be told! Data visualization is all around us, in print and in electronic media. Some of it is accurate and effective, while some is extremely unclear, confusing, or misleading. In this course we will study various approaches to information visualization and associated data analysis techniques. How do we take a lot of data, or very complex data, and present it in ways that allow it to communicate information clearly and effectively? The course will explore applications from science, medicine, social science, and humanities. **Prerequisite(s):** C- or higher in one course from CSC 103 , CSC 104 , CSC 105 , CSC 106 , CSC 107 , CSC 108 . **CC:** SET

CSC 235 - Modeling & Simulation

Course Units: 1.0 (**Not Offered this Academic Year**) This course will study modeling and simulation as they occur in and apply to a number of different disciplines. It will cover system dynamics models which address major systems that change with time, and cellular automaton simulations that look more narrowly at individuals affecting individuals. Other topics will include rate of change, errors, simulation techniques, empirical modeling, and an introduction to high performance computing. **Prerequisite(s):** C- or higher in one course from CSC 103 , CSC 104 , CSC 105 , CSC 106 , CSC 107 , CSC 108 **CC:** SET

CSC 236 - Computer Network Protocols

Course Units: 1.0 (**TBD: Staff**) **Cross-Listed:** ECE 336

CSC 237 - Data Communications and Networks

Course Units: 1.0 (**TBD: Staff**) **Cross-Listed:** ECE 337

CSC 240 - Web Programming

Course Units: 1.0 (**Not Offered this Academic Year**) This course addresses the standards in programming applications for the Web. It covers the client-side technologies HTML, CSS, and JavaScript as well as server-side technologies PHP and MySQL. **Prerequisite(s):** C- or higher in one course from CSC 103 , CSC 104 , CSC 105 , CSC 106 , CSC 107 , CSC 108 **CC:** SET

CSC 243 - Bioinformatics: Information Technology in the Life Sciences

Course Units: 1.0 (**Spring: Fernandes, Horton**) Biology and computer science students will gain a working knowledge of the basic principles of the others' discipline, and will collaborate together on bioinformatics projects. Topics include pairwise and multiple sequence alignments, phylogenetic trees, gene expression analysis, and protein structure prediction. Additional topics will be presented by invited speakers. **Cross-Listed:** BIO 243 **Prerequisite(s):** BIO 225 or C- or higher in one course from CSC 103 , CSC 104 , CSC 105 , CSC 106 , CSC 107 , CSC 108 . **CC:** SET

CSC 245 - The Computer Science of Computer Games

Course Units: 1.0 (**Not Offered this Academic Year**) This course surveys the field of computer science from the perspective of computer games. Topics explored include: rendering of graphics to a screen, implementation of realistic simulation, use of artificial intelligence in games, handling user input, game physics, collaborative development. Final course project is a complete computer game. **Prerequisite(s):** C- or higher in one course from CSC 103 , CSC 104 , CSC 105 , CSC 106 , CSC 107 , CSC 108 . **CC:** SET

CSC 250 - Algorithm Design and Analysis

Course Units: 1.0 (**Spring: Cass, Talkad Sukumar**) Fundamental algorithms used in a variety of applications. Includes algorithms on list processing, string processing, geometric algorithms, and graph algorithms. **Prerequisite(s):** MTH 197 and a C- or higher in CSC 151 **Prereq/Corequisite(s):** A grade of C- or better is required in order to continue with any course that requires CSC-250 as a prerequisite.

CSC 260 - Large-Scale Software Development

Course Units: 1.0 (**Winter: Cass**) Strategies for the systematic design, implementation, and testing of large software systems. Design notations, tools, and techniques. Design patterns and implementation idioms. Implementation, debugging, and testing. Includes team and individual software development projects. **Prerequisite(s):** MTH 197 and C- or higher in CSC 151 **Prereq/Corequisite(s):** MTH 197 , MTH 199 can be substituted for MTH 197

CSC 270 - Computer Organization

Course Units: 1.0 (**Winter: Rieffel**) The architecture and operation of the digital computer. CPU design, input/output, computer arithmetic, assembly language. **Prerequisite(s):** C- or higher in CSC 120 **Corequisite(s):** CSC 270L **Lecture/Lab Hours** Includes a laboratory.

CSC 281 - Computer Science Practicum 1

Course Units: 0.0 (**Fall, Winter, Spring: Staff**) Under the supervision of a CSC faculty member, students may participate in undergraduate research or a design project. To receive pass/fail credit equivalent to one elective course, a student must receive a passing grade in three terms (normally in a row) of the practicum course. Up to two credits may be earned in this way. **Prerequisite(s):** Permission of the faculty supervisor and the department chair.

CSC 282 - Computer Science Practicum 2

Course Units: 0.0 (**Fall, Winter, Spring: Staff**) Under the supervision of a CSC faculty member, students may participate in undergraduate research or a design project. To receive pass/fail credit equivalent to one elective course, a student must receive a passing grade in three terms (normally in a row) of the practicum course. Up to two credits may be earned in this way. **Prerequisite(s):** Permission of the faculty supervisor and the department chair.

CSC 283 - Computer Science Practicum 3

Course Units: 0.0 (**Fall, Winter, Spring: Staff**) Under the supervision of a CSC faculty member, students may participate in undergraduate research or a design project. To receive pass/fail credit equivalent to one elective course, a student must receive a passing grade in three terms (normally in a row) of the practicum course. Up to two credits may be earned in this way. **Prerequisite(s):** Permission of the faculty supervisor and the department chair.

CSC 290 - Computer Science Independent Study 1

Course Units: 1.0 (**Fall, Winter, Spring: Staff**) Independent work on a CS topic of interest under the supervision of a CS faculty member. This course should be used for work that the supervising faculty member deems equivalent to a 100-level or 200-level course. For higher level course equivalences, use CSC 490 . **Prerequisite(s):** Permission of the faculty supervisor and the department chair.

CSC 291 - Computer Science Independent Study 2

Course Units: 1.0 (**TBD: Staff**) Independent work on a CS topic of interest under the supervision of a CS faculty member. This course should be used for work that the supervising faculty member deems equivalent to a 100-level or 200-level course. For higher level course equivalences, use CSC 490 . **Prerequisite(s):** Permission of the faculty supervisor and the department chair.

CSC 292 - Computer Science Independent Study 3

Course Units: 1.0 (**Fall, Winter, Spring: Staff**) Independent work on a CS topic of interest under the supervision of a CS faculty member. This course should be used for work that the supervising faculty member deems equivalent to a 100-level or 200-level course. For higher level course equivalences, use CSC 490 . **Prerequisite(s):** Permission of the faculty supervisor and the department chair.

CSC 295H - Computer Science Honors Project 1

Course Units: 0.0 (**Fall, Winter, Spring: Staff**)

CSC 296H - Computer Science Honors Project 2

Course Units: 1.0 (**Fall, Winter, Spring: Staff**)

CSC 318 - Digital Design

Course Units: 1.0 (**TBD: Staff**) **Cross-Listed:** ECE 318 **Corequisite(s):** CSC 318L

CSC 320 - Artificial Intelligence

Course Units: 1.0 (**Spring: Rieffel**) Fundamental concepts used in creating "intelligent" computer systems; semantic representation, logical deduction, natural language processing, and game playing; expert systems, knowledge-based systems, and elementary robotics. **Prerequisite(s):** MTH 197 and a C- or higher in CSC 151 . Recommended: CSC 250 . MTH 199 can be substituted for MTH 197

CSC 321 - Data Mining and Machine Learning

Course Units: 1.0 (**Not Offered this Academic Year**) Introduces Data Mining, where previously unknown and potentially useful information is automatically extracted from data sources, using regularities or patterns of implicit information. Such patterns can be used to make predictions over future data, and be used to explain and understand the nature of that data. Machine Learning is one mechanism by which data mining is achieved. It is used to discover and extract information from raw data. This course will cover tools and techniques of machine learning that are used in practical data mining. **Prerequisite(s):** MTH 197 and a C- or higher in CSC 151 . MTH 199 can be substituted for MTH 197

CSC 325 - Robotics

Course Units: 1.0 (**Winter: Webb**) The course will cover basic algorithms necessary for motor control. Building on these methods we will discuss higher level navigation for mobile robots, as well as the sensing necessary for localization of the robot in its environment. Finally, we will also examine the challenges of motion planning for jointed robots with many degrees of freedom. **Prerequisite(s):** MTH 197 and a C- or higher in CSC 151 . MTH 199 can be substituted for MTH 197

CSC 329 - Neural Networks

Course Units: 1.0 (**TBD: Staff**) **Cross-Listed:** ECE 329

CSC 333 - High Performance Computing

Course Units: 1.0 (**Not Offered this Academic Year**) Synchronization and communication in concurrent programs. Parallel computing with libraries for shared-memory programming and for cluster computing. Introduction to algorithms for parallel scientific computing. **Prerequisite(s):** C- or higher in CSC 270 or C- or higher in CSC 151 or CSC 250 **Prereq/Corequisite(s):** MTH 197 and a C- or higher in CSC 151 . MTH 199 can be substituted for MTH 197

CSC 335 - Operating Systems

Course Units: 1.0 (**Winter: Fernandes**) Selected topics in operating system development including process and thread management, concurrency, memory and file system management, resource allocation, job scheduling, and security. **Prerequisite(s):** MTH 197 and c C- or higher in CSC 151 and CSC 270 **and** Junior standing.

CSC 340 - Introduction to Databases

Course Units: 1.0 (**Not Offered this Academic Year**) Introduction to data models and database design. Coverage of network, hierarchical, and relational architectures with emphasis on the latter. Study of relational algebra, entity-relationship modeling, and data normalization. Study of fourth generation query languages including SQL. Introduction to centralized, distributed, federated, and mediated systems. **Prerequisite(s):** MTH 197 and a C- or higher in CSC 151 . MTH 199 can be substituted for MTH 197

CSC 350 - Theory of Computing

Course Units: 1.0 (**Not Offered this Academic Year**) A discussion of the fundamental ideas and models underlying computing: properties of formal languages, finite automata, regular expressions, pushdown automata, context-free languages, Turing machines, and undecidability. **Prerequisite(s):** MTH 197 and a C- or higher in CSC 151 . MTH 199 can be substituted for MTH 197

CSC 354 - VLSI System Design

Course Units: 1.0 (**TBD: Staff**) **Cross-Listed:** ECE 354 **Corequisite(s):** CSC 354L

CSC 360 - Software Engineering

Course Units: 1.0 (**TBD: Staff**) Strategies for the specification, design, production, testing, and support of computer programs; software development models; programming team structures; documentation; and maintenance. **Prerequisite(s):** C- or higher in CSC 260

CSC 370 - Programming Languages

Course Units: 1.0 (**Fall: Orhan**) An introduction to issues in programming language design and implementation. Major programming language paradigms: functional, logic, and object-oriented, and their use. **Prerequisite(s):** MTH 197 and a C- or higher in CSC 151 and junior standing. MTH 199 can be substituted for MTH 197

CSC 375 - Compiler Design

Course Units: 1.0 (**Spring: Orhan**) Principles and practices for the design and implementation of compilers and interpreters. Will cover the stages of the compilation and execution process: lexical analysis; parsing; symbol tables; type systems; scope; semantic analysis; intermediate representations; run-time environments and interpreters; code generation; program analysis and optimization; and garbage collection. Students will construct a full compiler for a simple object-oriented language. **Prerequisite(s):** MTH 197 and a C- or higher in CSC 151 . MTH 199 can be substituted for MTH 197. Recommended: CSC 260

CSC 380 - User Interfaces

Course Units: 1.0 (**Spring: Talkad Sukumar**) Introduction to the field of human-computer interaction (HCI) through the study of user interfaces. Theory and application of what makes an interface usable. Design principles, empirical studies, and statistical analyses will be employed in team-based projects. Students will make extensive use of equipment for recording and analyzing participants in both laboratory and field settings. **Prerequisite(s):** MTH 197 and a C- or higher in CSC 151 . MTH 199 can be substituted for MTH 197

CSC 385 - Computer Graphics

Course Units: 1.0 (**Not Offered this Academic Year**) Implementation and use of algorithms for computer graphics. Rendering and representation of 3D objects. Lighting, shading and texture mapping surfaces of 3D objects. Programming interactive graphics applications. Constructing 3D models of real-world objects. **Prerequisite(s):** MTH 197 and a C- or higher in CSC 151 . MTH 199 can be substituted for MTH 197

CSC 483 - Selected Topics in Computer Science

Course Units: 1.0 (**Not Offered this Academic Year**) Winter topic: Quantum Computing

Spring topic: Guided Research in Evolutionary Computing **Prerequisite(s):** MTH 197 and a C- or higher in CSC 151 . MTH 199 can be substituted for MTH 197

CSC 489 - Guided Research in Computer Science

Course Units: 1.0 (**Winter: Striegnitz**) This course is required by, and limited to, seniors who are not completing their WS requirement through the CSC 498-CSC 499 sequence. In this course, students will explore current research in one area of computer science (the choice of topic will vary) by reading, discussing, and critically evaluating scholarly publications and by carrying out their own research on a related topic. Students will gain

experience in giving oral presentations and writing conference style papers in computer science. **Prerequisite(s):** CSC 497 and permission of the instructor.

CSC 490 - Computer Science Independent Study 1

Course Units: 1.0 (**Fall, Winter, Spring: Staff**) This course should be used for work that the supervising faculty member deems equivalent to a 300-level or 400-level course. For lower level course equivalences, use CSC 290 **Prerequisite(s):** Permission of faculty supervisor and the department chair.

CSC 491 - Computer Science Independent Study 2

Course Units: 1.0 (**Fall, Winter, Spring: Staff**) This course should be used for work that the supervising faculty member deems equivalent to a 300-level or 400-level course. For lower level course equivalences, use CSC 290 **Prerequisite(s):** Permission of faculty supervisor and the department chair.

CSC 492 - Computer Science Independent Study 3

Course Units: 1.0 (**Fall, Winter, Spring: Staff**) This course should be used for work that the supervising faculty member deems equivalent to a 300-level or 400-level course. For lower level course equivalences, use CSC 290 **Prerequisite(s):** Permission of faculty supervisor and the department chair.

CSC 497 - Computer Science Capstone Seminar

Course Units: 0.5 (**Spring: Webb**) Development of the skills necessary for independent research: Reading scholarly works, designing experiments and empirically evaluating their results. Development of a comprehensive senior capstone project proposal. Investigation of professional ethics, skills and responsibilities. **Prerequisite(s):** MTH 197 and a C- or higher in CSC 151 . MTH 199 can be substituted for MTH 197 **Note:** Normally taken in Spring of the Junior year.

CSC 498 - Computer Science Capstone Project 1

Course Units: 0.75 (**Fall, Winter, Spring: Staff**) Design, implementation, and evaluation of the capstone project. **Prerequisite(s):** CSC 497 **Note:** Normally taken during the Senior year.

CSC 499 - Computer Science Capstone Project 2

Course Units: 0.75 (**Fall, Winter, Spring: Staff**) Design, implementation, and evaluation of the capstone project. **Prerequisite(s):** CSC 498 **CC: WS Note:** Normally taken during the Senior year.

Electrical Engineering

ECE 101 - The Joy of Electronics

Course Units: 1.0 (**TBD: Staff**) Introduction to the tools, skills, and principles of electrical and computer engineering. Emphasis is placed on developing an intuitive understanding while learning quantitative methods to design, test, and analyze electronics. Test and measurement tools include oscilloscopes, multimeters, and function generators. Circuit construction techniques include breadboarding and soldering as well as computer software to simulate circuits. Principles such as power, frequency, and modulation are taught through analog and digital electronics projects. Hands-on projects include an audio amplifier, crystal radio receiver, digital clock, and a microcontroller-operated robotic arm.

ECE 118 - Introduction to Computer and Logic Design

Course Units: 1.0 (**TBD: Staff**) Fundamental material in the area of digital logic circuit analysis and synthesis, and computer organization. The components of digital computers are studied at the gate level, the function level, and the machine organization level. Weekly laboratory exercises are required. **Cross-Listed:** CSC 118 **Corequisite(s):** ECE 118L **CC:** SET

ECE 218 - Embedded Microcontroller Projects

Course Units: 1.0 (**TBD: Staff**) Focuses on the design and implementation of microcontroller systems. Topics include microcontroller architecture, interfacing, programming for control applications, multitasking, and tools used in embedded system design. The course includes a weekly project-based laboratory. **Prerequisite(s):** ECE 118 and one course from the following: CSC 103, CSC 104, CSC 105, CSC 106, CSC 107, or CSC 108 **Corequisite(s):** ECE 218L

ECE 222 - Introduction to Circuits and Electronics

Course Units: 1.0 (**TBD: Staff**) Electrical quantities, circuit principles, analysis and response of basic circuits, semiconductor physics, diodes, transistors, and operational amplifiers. Includes a weekly lab. **Prerequisite(s):** PHY 121 or IMP 120 **Corequisite(s):** ECE 222L
Prereq/Corequisite(s): Not open to Electrical, Computer, or Biomedical Engineering majors, or to students who have taken ECE 225

ECE 225 - Electric Circuits

Course Units: 1.0 (**TBD: Staff**) Basic electrical circuit concepts and devices such as Ohm's law, Kirchhoff's laws, Thevenin and Norton equivalents, operational amplifiers, analysis methods, capacitors, inductors, ideal transformers, phasors, AC steady state analysis, complex power, frequency response and filters. Includes a weekly lab. **Cross-Listed:** BME 225 **Prerequisite(s):** MTH 102 or MTH 112 or MTH 113 or or MTH 115H or IMP 120 **Corequisite(s):** ECE 225L

ECE 240 - Circuits and Systems

Course Units: 1.0 (**TBD: Staff**) Transient analysis of RLC circuits; modeling of circuits using differential equations; system models and properties; Laplace transforms applied to circuit and system design and analysis; system functions; complex frequency; poles and zeros; stability; frequency response; filter design. Includes a weekly lab. Not open to Mechanical Engineering majors **Cross-Listed:** BME 240 **Prerequisite(s):** ECE 225 or BME 225 **Corequisite(s):** ECE 240L

ECE 241 - Discrete Systems

Course Units: 1.0 (**TBD: Staff**) Discrete signals and systems; classification and properties of systems; difference equations; Z-transform; Fourier series, Fourier transforms, the DFT and FFT; filters and filter design; A/D and D/A converters; applications to audio signal processing. Includes a weekly lab. **Cross-Listed:** BME 241 **Prerequisite(s):** ECE 240 or BME 240 **Corequisite(s):** ECE 241L

ECE 248 - Introduction to Semiconductor Devices and Circuits

Course Units: 1.0 (**TBD: Staff**) Semiconductors: theory of operation of diodes and transistors; circuit models; basic electronic circuits and amplifiers; transfer characteristics and inverters. Includes a weekly lab. **Prerequisite(s):** ECE 225 or BME 225 **Corequisite(s):** ECE 248L

ECE 281 - Electrical and Computer Engineering Practicum 1

Course Units: 0.0 (**TBD: Staff**) Under the supervision of an ECE faculty member, students may participate in undergraduate research or a design project. To receive pass/fail credit equivalent to one free elective course, a student must receive a passing grade in three terms of the practicum course. Up to two credits may be earned in this way. **Prerequisite(s):** Permission of the faculty supervisor and the department chair.

ECE 282 - Electrical and Computer Engineering Practicum 2

Course Units: 0.0 (**TBD: Staff**) Under the supervision of an ECE faculty member, students may participate in undergraduate research or a design project. To receive pass/fail credit equivalent to one free elective course, a student must receive a passing grade in three terms of the practicum course. Up to two credits may be earned in this way. **Prerequisite(s):** Permission of the faculty supervisor and the department chair.

ECE 283 - Electrical and Computer Engineering Practicum 3

Course Units: 1.0 (**TBD: Staff**) Under the supervision of an ECE faculty member, students may participate in undergraduate research or a design project. To receive pass/fail credit equivalent to one free elective course, a student must receive a passing grade in three terms of the practicum course. Up to two credits may be earned in this way.

ECE 295H - Electrical and Computer Engineering Honors Independent Project 1

Course Units: 0.0 (**TBD: Staff**) Sophomore project in Electrical and Computer Engineering for students participating in a scholars program.
Prerequisite(s): Permission of the instructor.

ECE 296H - Electrical and Computer Engineering Honors Independent Project 2

Course Units: 1.0 (**TBD: Staff**) Sophomore project in Electrical and Computer Engineering for students participating in a scholars program.
Prerequisite(s): Permission of the instructor.

ECE 310 - Electronic Devices

Course Units: 1.0 (**TBD: Staff**) Introduction to semiconductors and solid-state devices. Electrons and holes, energy bands, carrier transport and dynamics, recombination and generation; p-n junctions and diodes; bipolar junction transistors; field-effect transistors; and optoelectronic devices (light-emitting diodes, photodiodes, and solar cells). **Prerequisite(s):** ECE 248

ECE 318 - Digital Design

Course Units: 1.0 (**TBD: Staff**) The design of digital hardware systems at the module level using modern approaches. Datapath and control unit design, hardware description languages, programmable device implementations. Weekly laboratory exercises using electronic design automation tools and a design project are required. **Cross-Listed:** CSC 318 **Prerequisite(s):** ECE 118 **Corequisite(s):** ECE 318L

ECE 325 - Acoustics of Speech Communication

Course Units: 1.0 (**TBD: Staff**) Acoustics, circuit theory, and signal processing applied to analysis of speech signals; Physiology of speech production; Articulatory phonetics; Acoustical and articulatory description of phonetic features and of prosodic aspects of speech; Perception of speech; Models of speech production and planning; Some applications to recognition and generation of speech by machine, and to the study of speech disorders. **Prerequisite(s):** ECE 241 or BME 241

ECE 329 - Neural Networks

Course Units: 1.0 (**TBD: Staff**) Topics include the biological basic of artificial neural networks, neuron models and architectures, backpropagation, and deep learning models. **Cross-Listed:** CSC 329 **Prerequisite(s):** CSC 151 or CSC 100-level and ECE 240 or permission of the instructor.

ECE 336 - Computer Network Protocols

Course Units: 1.0 (**TBD: Staff**) Design, analysis, and operation of communication protocols for computer networks; TCP/IP, addressing, switching, routing, congestion control, application protocols. **Cross-Listed:** CSC 236 **Prerequisite(s):** CSC 100-level and either ECE 118 / CSC 118 or CSC 120

ECE 337 - Data Communications and Networks

Course Units: 1.0 (**TBD: Staff**) An introduction to the physical and data link layers of data communication networks, including error detection, and local area networks. **Cross-Listed:** CSC 237 **Prerequisite(s):** CSC 100-level and ECE 118 / CSC 118 or CSC 120

ECE 341 - Energy Conversion

Course Units: 1.0 (**TBD: Staff**) Theory of electromechanical energy conversion; characteristics of transformers and DC induction; and synchronous machines. **Prerequisite(s):** ECE 225 or BME 225

ECE 342 - Power Electronics

Course Units: 1.0 (**TBD: Staff**) Rectifying devices and rectifier circuits: device characteristics, waveforms, harmonic content filtering. Controlled rectifiers (thyristors, triacs): device characteristics, single phase and multiphase systems. Snubber circuits and divide limitations. DC-DC converters: design, application, topologies. Energy storage element selection and design: capacitors and inductors. **Prerequisite(s):** ECE 248, ECE 350

ECE 343 - Introduction to Electromagnetic Engineering

Course Units: 1.0 (**TBD: Staff**) Traveling waves: transmission lines; electrostatics; magnetostatics; applications to engineering problems; solutions by analytical and numerical techniques. **Prerequisite(s):** ECE 240, (MTH 117 and PHY 121) or IMP 120 **Corequisite(s):** ECE 343L **Lecture/Lab Hours** One lab per week.

ECE 344 - Electric Machines and Drives

Course Units: 1.0 (**TBD: Staff**) Introduction to electric drives; understanding mechanical system requirements; DC motors and variable speed drives; current, speed, and position controllers; induction machine variable speed drives; space vectors; permanent magnet AC and brushless DC motors; efficiency considerations and applications to alternative energy systems. **Prerequisite(s):** ECE 240

ECE 347 - Image Processing

Course Units: 1.0 (**TBD: Staff**) The course covers the basic operations performed on digital images. These include digitization, image enhancement and restoration, color image processing, and image compression using the discrete cosine transform and wavelets. **Prerequisite(s):** ECE 241 or BME 241

ECE 350 - Communication Systems

Course Units: 1.0 (**TBD: Staff**) Frequency domain analysis, signal space representations, and their application to wireless communications; quality measures; performance in the presence of noise. Includes a weekly lab. **Prerequisite(s):** ECE 241 **Corequisite(s):** ECE 350L

ECE 351 - Probability and Digital Communications

Course Units: 1.0 (**TBD: Staff**) An introduction to probability with an emphasis on applications in digital communications. Digital signaling, coding, probability of error, matched filters, optimum receiver design, source entropy, channel capacity. **Prerequisite(s):** ECE 118, ECE 240

ECE 354 - VLSI System Design

Course Units: 1.0 (**TBD: Staff**) Design of very large-scale integrated systems including standard CMOS and more advanced and emerging technologies in nanoelectronics. Design from logic to physical levels and manufacturing processes. System-on-chip technologies and applications. **Cross-Listed:** CSC 354 **Prerequisite(s):** ECE 118 and (ECE 225 or BME 225 or ECE 222) **Corequisite(s):** ECE 354L **Lecture/Lab Hours** Weekly lab

ECE 363 - Analysis and Design of Electronic Circuits

Course Units: 1.0 (**TBD: Staff**) Multiple-stage amplifiers; Differential amplifiers; Frequency response of amplifiers; Feedback amplifier; Stability of electronic circuits; Analysis and design of operational amplifiers. **Prerequisite(s):** ECE 248 **Corequisite(s):** ECE 363L **Lecture/Lab Hours** Weekly lab

ECE 366 - Control Systems

Course Units: 1.0 (**TBD: Staff**) Modeling of control systems by block diagrams and flow graphs. Analysis of control systems response, error and stability, Root-Locus method, and frequency domain methods (Nyquist, Bode, and Nichols). **Prerequisite(s):** ECE 240 **Corequisite(s):** ECE 366L **Lecture/Lab Hours** One lab per week.

ECE 371 - High Resolution Radar

Course Units: 1.0 (**TBD: Staff**) An introduction to the basic theory for design and analysis of radar systems; range equation; signal design and models; signal processing; high resolution imaging; range and Doppler information **Prerequisite(s):** ECE 241

ECE 386 - Introduction to Biomedical Instrumentation

Course Units: 1.0 (**TBD: Staff**) Introduction to the theory and application of instruments in medicine. Measurements of the major systems in the body are covered. A weekly laboratory provides an opportunity to perform measurements and use biomedical instruments. **Cross-Listed:** BME 386 **Prerequisite(s):** ECE 240 or BME 240 **Corequisite(s):** ECE 386L

ECE 420 - Introduction to State Space Analysis and Control

Course Units: 1.0 (**TBD: Staff**) Formulations of state equations. State space representation of linear systems. Dynamic characteristics of linear systems. Eigenvalues and eigenvectors. Solution of state equations. Controllability and Observability. Pole placement. Linear observers. **Prerequisite(s):** ECE 366

ECE 463 - Fundamentals of Wireless Electronics

Course Units: 1.0 (**TBD: Staff**) Review of phasor analysis; inductance and coupling networks; resonance; complex power and power transfer; transmission line theory and applications; introduction to matching network design. Includes a weekly studio/lab session. **Prerequisite(s):** ECE 241 **Corequisite(s):** ECE 463L

ECE 481 - Special Topics in Electrical and Computer Engineering

Course Units: 1.0 (**TBD: Staff**) Topics chosen from the current literature according to faculty and student interest. Each of these special topics courses has variable content addressing specific current areas of interest to students. They will be offered whenever the need arises.

ECE 482 - Special Topics in Electrical and Computer Engineering

Course Units: 1.0 (**TBD: Staff**) Topics chosen from the current literature according to faculty and student interest. Each of these special topics courses has variable content addressing specific current areas of interest to students. They will be offered whenever the need arises.

ECE 483 - Special Topics in Electrical and Computer Engineering

Course Units: 1.0 (**TBD: Staff**) Topics chosen from the current literature according to faculty and student interest. Each of these special topics courses has variable content addressing specific current areas of interest to students. They will be offered whenever the need arises.

ECE 487 - Medical Imaging Systems

Course Units: 1.0 (**TBD: Staff**) The basic physics, instrumentation, system design, and image reconstruction algorithms are covered for the following imaging modalities: ultrasound, radiography, x-ray computed tomography (CT), magnetic resonance imaging (MRI), planar scintigraphy, and positron emission tomography (PET). **Cross-Listed:** BME 487 **Prerequisite(s):** ECE 241

ECE 490 - Electrical and Computer Engineering Independent Study 1

Course Units: 1.0 (**TBD: Staff**)

ECE 491 - Electrical and Computer Engineering Independent Study 2

Course Units: 1.0 (**TBD: Staff**)

ECE 492 - Electrical and Computer Engineering Independent Study 3

Course Units: 1.0 (**TBD: Staff**)

ECE 493 - Electrical and Computer Engineering Independent Study 4

Course Units: 1.0 (**TBD: Staff**)

ECE 494 - Electrical and Computer Engineering Independent Study 5

Course Units: 1.0 (**TBD: Staff**)

ECE 495 - Electrical and Computer Engineering Independent Study 6

Course Units: 1.0 (**TBD: Staff**)

ECE 496 - Electrical and Computer Engineering Independent Study 7

Course Units: 1.0 (**TBD: Staff**)

ECE 497 - Electrical and Computer Engineering Capstone Design Project 1

Course Units: 0.5 (**TBD: Staff**) Topics in the seminar include professional and ethical responsibilities; the historical and societal context of electrical and computer engineering; contemporary issues, and the specification, analysis, design, implementation, and testing phases of a design project. Research papers, project reports, and oral presentations are required.

ECE 498 - Electrical and Computer Engineering Capstone Design Project 2

Course Units: 0.5 (**TBD: Staff**) The second term of the capstone design project. Students complete the design and begin the implementation of a system under the supervision of one or more faculty members. An oral presentation and design report are required.

ECE 499 - Electrical and Computer Engineering Capstone Design Project 3

Course Units: 1.0 (**TBD: Staff**) Students complete the implementation, testing, and evaluation of a system under the supervision of one or more faculty members. A final presentation and design report are required. **CC:** WS

Economics

ECO 101 - Introduction to Economics

Course Units: 1.0 (**TBD: Staff**) Basic microeconomic model of price determination; impact of market structure on price and output decisions by firms; role of the public sector in an economy; basic macroeconomic model of national income determination; impact of fiscal and monetary policies on employment levels, price stability, and economic growth; international economic relationships. **CC:** SOCS

ECO 122 - Judgment and Decision Making

Course Units: 1.0 (**TBD: Staff**) An introduction to the scientific study of judgment and decision making. Featuring perspectives from cognitive psychology and behavioral economics. Students will learn major theoretical concepts and empirical results from the literature, as well as how they apply to real-world issues. Students should also expect to improve their own ability to evaluate evidence and make rational, well-informed decisions in their own lives. **Cross-Listed:** PSY 222 **Prerequisite(s):** PSY 100 (for Psychology majors); BIO 210 or PSY 210 (for Neuroscience majors); ECO 101 (for Economics majors)

ECO 123 - Values, Norms, and Economic Justice

Course Units: 1.0 (**TBD: Staff**) This class considers the goals economic policy might pursue and how different theories of the good lead to particular choices about desirable or undesirable economic policies. We consider mainstream economic thinking, which has roots in utilitarianism and liberalism, and alternative ideas such as libertarianism, Austrian economics, feminist, communitarian, and religious philosophy and economics. We apply these ideas to relevant policy issues, such as free trade, globalization, unemployment, income distribution, affirmative action, care of the environment, health care, and famine relief. **Cross-Listed:** PHL 123 **CC:** HUM **Note:** ECO 101 is not a prerequisite for ECO 123.

ECO 134 - Data Visualization

Course Units: 1.0 (**TBD: Staff**) The digital world we live in generates vast amounts of data. This data has the potential to help us understand the world and make better decisions. This course is about representing data using the visual domain. We learn how to turn gigabytes of numbers into pictures and interactive displays. We will use the visual domain not only for communicating insights but also as a means of analysis. We will learn about data structures (how to connect to data), data aggregation (how to summarize data), and principles of design (how humans consume visual content). We will apply these concepts to business and economic data, including sales, financial performance, pricing, etc. The emphasis is on hands-on exercises and creation of new visualizations using data visualization software Tableau. **CC:** SOCS

ECO 211 - Consumer Finance

Course Units: 1.0 (**TBD: Staff**) This course examines how consumers make decisions about borrowing, saving, and managing risk. The goal of this course is to learn how to think critically about these decisions. We will learn concepts such as time value of money, risk, and consumption smoothing. We will examine the markets for credit (credit cards, student loans, mortgages), saving/ investment (mutual funds, retirement plans, annuities), insurance and financial advice. We will ask why these markets sometimes fail and how regulation can help. Finally, we will examine how psychological biases influence consumers' financial decisions and how private and public sectors can help in achieving better outcomes. **Prerequisite(s):** ECO 101 or permission of instructor.

ECO 213 - Economics and Race in the US

Course Units: 1.0 (**TBD: Staff**) This course considers the way that race affects economic outcomes in the United States. A person's race has a great deal of influence on that person's economics status, including his or her education, employment, housing, health care, standard of living, and general prospects for life. In this course we'll see how economic forces, social and political forces, and history combine to generate the distribution of goods, services, wealth, and opportunity that we see in the United States. We'll also ask how economic policy could be used to influence these distributions and make them fairer and more just. **Prerequisite(s):** ECO 101 **CC:** LCC

ECO 225 - Economics of Sin

Course Units: 1.0 (**TBD: Staff**) Uses the tools of economic analysis to examine the markets for goods and services the sale of which is subject to public condemnation. Considers the impact and unintended consequences of economic policies toward these goods on market and social outcomes. Topics include the economics of transplantable organs, crime, addiction, intoxicants, marriage and sex. **Prerequisite(s):** ECO 101

ECO 226 - Financial Markets

Course Units: 1.0 (**TBD: Staff**) Study of the historical evolution, economic functions, and efficiency of financial institutions and markets, with an emphasis on the United States. **Prerequisite(s):** ECO 101 **CC:** SOCS

ECO 228 - Environmental and Natural Resource Economics

Course Units: 1.0 (**TBD: Staff**) Economic causes of environmental degradation and natural resource depletion; benefit-cost analyses of public policies for environmental protection and natural resource preservation; specific issues in energy and wilderness resource management, air and water pollution abatement, and solid waste management. **Prerequisite(s):** ECO 101 or permission of instructor. **CC:** SOCS

ECO 229 - Introduction to Behavioral Economics

Course Units: 1.0 (**TBD: Staff**) Human behavior often departs from standard economic reasoning in predictable ways. This course is an introduction to the field of behavioral economics - the endeavor to enrich standard economic theory by incorporating psychological insights into human behavior. In this course you will study how behavioral economists explain a range of psychological and social phenomena and how those explanations differ from standard economic ones. In particular, you will study the various ways in which (apparent) irrationality influences people's judgement and decision-making. Behavioral economics is invaluable to anyone with an interest in human behavior. It is particularly relevant to those with an interest in economics, management, marketing, public policy and the psychology of judgement and decision-making. **Prerequisite(s):** ECO 101 **CC:** SOCS

ECO 231 - Urban Redevelopment

Course Units: 1.0 (**TBD: Staff**) An examination of why the economic fortunes of cities rise and fall and what can be done to redevelop urban areas and improve their long-term vitality. Varied perspectives are considered and recent revitalization efforts in Schenectady, Saratoga Springs, and the Capital Region are analyzed. **Prerequisite(s):** ECO 101 **CC:** SOCS

ECO 235 - Chinese Economy

Course Units: 1.0 (**TBD: Staff**) This course introduces the workings of Chinese economy since its economic reform in 1978. It is about the transformation of China's economy into a market economy with its special characteristics. It covers historical and institutional background, economic growth, economic fluctuations, macroeconomic policies, banking and financial markets, foreign trade, and foreign investment **Prerequisite(s):** ECO 101 **CC:** SOCS

ECO 236 - Comparative Economies

Course Units: 1.0 (**TBD: Staff**) Why are some countries rich and others poor? Geography, economic systems, investment, culture and institutions will be explored as possible explanations. The channels through which these factors affect economic performance will be examined, and their importance will be assessed using relevant data. **Prerequisite(s):** ECO 101

ECO 237 - Women, Men, Work and Family

Course Units: 1.0 (**TBD: Staff**) A critical analysis of gender issues in economics; changing roles of men and women in labor markets; human capital theory; radical-feminist perspectives; earnings differentials and occupational segregation by gender; economics of family; public policy. **Prerequisite(s):** ECO 101

ECO 238 - Women, Technology and Globalization

Course Units: 1.0 **(TBD: Staff)** We explore the effects of technology and globalization on women's economic outcomes. Does increased trade improve the working conditions of women? How does the expansion of the global fertility industry affect the economic opportunities available to women? Why are women underrepresented in high-tech industries? To what extent do women find the opportunity to get involved in the knowledge-creation economy? What is the role of technology in determining the gender wage gap? **CC: SOCS**

ECO 241 - Microeconomic Analysis

Course Units: 1.0 **(TBD: Staff)** Theory of consumer choice; principles of production and analysis of cost phenomena; pricing and output decisions in competitive and noncompetitive markets; theory of distribution; general equilibrium analysis; introduction to welfare economics. **Prerequisite(s):** ECO 101 and MTH 101 , MTH 105 , MTH 110 , or MTH 113 **Prereq/Corequisite(s):** A minimum grade of C in ECO-241 is required to register for ECO 498 **CC: SOCS**

ECO 242 - Macroeconomic Theory and Policy

Course Units: 1.0 **(TBD: Staff)** Aggregate demand theory. Foundations of aggregate consumption, investment, money demand and money supply. Aggregate supply theory. Keynesian, monetarist, and rational expectations models. Economic growth theory. Unemployment, inflation and stabilization policy. **Prerequisite(s):** ECO 101 and MTH 101 , MTH 105 , MTH 110 , or MTH 113 **Prereq/Corequisite(s):** A minimum grade of C in ECO-242 is required to register for ECO 498 **CC: SOCS**

ECO 243 - Introduction to Econometrics

Course Units: 1.0 **(TBD: Staff)** Descriptive statistics, probability, random variables and their distributions, sampling, statistical inference including confidence interval estimation, hypothesis testing, and regression analysis. Introduction to economic research using statistical methods to test theories. **Prerequisite(s):** ECO 101 **Prereq/Corequisite(s):** A minimum grade of C in ECO-243 is required to register for ECO 498 **CC: SOCS**

ECO 290 - Economics Independent Study 1

Course Units: 1.0 **(TBD: Staff)** For projects which do not require use of the material from ECO 241 , ECO 242 , ECO 243

ECO 291 - Economics Independent Study 2

Course Units: 1.0 **(TBD: Staff)** For projects which do not require use of the material from ECO 241 , ECO 242 , ECO 243

ECO 292 - Economics Independent Study 3

Course Units: 1.0 **(TBD: Staff)** For projects which do not require use of the material from ECO 241 , ECO 242 , ECO 243

ECO 293 - Economics Independent Study 4

Course Units: 1.0 **(TBD: Staff)** For projects which do not require use of the material from ECO 241 , ECO 242 , ECO 243

ECO 295H - Economics Honors Independent Project 1

Course Units: 0.0 **(TBD: Staff)**

ECO 296H - Economics Honors Independent Project 2

Course Units: 1.0 **(TBD: Staff)**

ECO 331 - E-Commerce Economics

Course Units: 1.0 **(TBD: Staff)** This course applies economic concepts to analyze the new economy where sellers are able to transfer rights for use of goods and services to buyers through network-communication links. Theories of firm conduct and performance, efficiency and productivity, the role

of information, intellectual property rights of digital products, ethical aspects and policy implications of E-commerce are discussed. **Prerequisite(s):** ECO 241

ECO 332 - Economics of Technological Change

Course Units: 1.0 (**TBD: Staff**) The course will cover both macro and micro aspects of technological change. Topics include: Exogenous growth models, innovation-driven Schumpeterian growth models, creative destruction and the economy, competition and market structure, valuation of Research and Development (R&D) and patents, patent litigation and enforcement of Intellectual Property Rights (IPRs), innovation, technology diffusion in the global economy, and design of IPR regimes and R&D policies. **Prerequisite(s):** ECO 241 or ECO 242 **CC:** SOCS

ECO 334 - Introduction to Financial Analysis

Course Units: 1.0 (**TBD: Staff**) Fundamental concepts of finance (time value of money, risk, and rates of return); analysis of financial statements; bond and stock valuation; capital budgeting; cost of capital, leverage, and optimal capital structure; long-term debt management; dividend policy; mergers and acquisitions; case study of the performance of an enterprise which seeks to maximize shareholder wealth. **Prerequisite(s):** At least one of ECO 241 , ECO 242 , or ECO 243 **CC:** SOCS

ECO 335 - Economics of Health

Course Units: 1.0 (**TBD: Staff**) Examination of demand and supply for medical personnel; analysis of hospital cost, inflation, and health insurance. Discussion of issues in cost benefit analysis of public health and regulation of health care markets. **Prerequisite(s):** ECO 241 and ECO 243 , or permission of the instructor.

ECO 338 - Quantitative Methods in Economics

Course Units: 1.0 (**TBD: Staff**) Application of mathematical models in economics. The use of matrix algebra, dynamic analysis, and optimization techniques in economic model building. Topics covered include theories of the consumer and of the firm, economic growth, international trade and finance, optimal timing, linear programming, and macroeconomic models. **Prerequisite(s):** ECO 241

ECO 339 - Public Finance

Course Units: 1.0 (**TBD: Staff**) Analysis of public sector expenditure and tax policy; efficiency and equity consequences of government spending and taxation; the nature of the public sector in the U.S., especially Social Security, education and the personal income tax; intergovernmental fiscal relationships. **Prerequisite(s):** ECO 241 and ECO 243 **CC:** SOCS

ECO 341 - Current Topics in Microeconomics

Course Units: 1.0 (**TBD: Staff**) A variety of microeconomic models and their applications to economic problems. Topics selected from year to year, possible topics include game theory, general equilibrium models, time and uncertainty, information economics, structure and behavior of firms, and public choice. **Prerequisite(s):** ECO 241 **CC:** SOCS

ECO 344 - Economics of Education

Course Units: 1.0 (**TBD: Staff**) The economics of the education industry and education policy, and the relationship between education and economic performance. Topics include human capital investment, the production of education, the returns to education, financing education (using public or private resources), and school choice and education outcomes (student achievement, completion rates, lifetime achievement). **Prerequisite(s):** ECO 241 and ECO 243

ECO 350 - Seminar in Experimental Economics

Course Units: 1.0 (**TBD: Staff**) This course provides an introduction to experimental methods in economics. Economic theories previously studied will be tested and either confirmed or evidence will be discovered that the theories are incorrect. Those found to be incorrect are usually based on questionable assumptions. Students will also become familiar with state-of-the-art research methodology in experimental economics, and will

participate in and conduct experiments in bargaining, auction markets, and other economic situations. **Prerequisite(s):** ECO 241 and ECO 243 **CC:** SOCS

ECO 352 - Seminar: Contemporary Problems in Macroeconomics

Course Units: 1.0 (**TBD: Staff**) A detailed analysis of some fundamental current macroeconomic issues: growth and productivity, the roots of the current economic and financial crisis, and an examination of policy options designed to address the crisis. We will also conduct some relevant macroeconometric modeling and simulation exercises. **Prerequisite(s):** ECO 241 , ECO 242 , and ECO 243 **CC:** SOCS

ECO 353 - Seminar in Econometrics

Course Units: 1.0 (**TBD: Staff**) Application of econometric methods to economic problems, plus additional topics in econometrics selected from multicollinearity, serially correlated and heteroskedastic disturbance terms, systems of simultaneous equations, seasonal adjustment, distributed lag models, other time series topics. **Prerequisite(s):** ECO 243 , and ECO 241 or ECO 242

ECO 354 - International Economics

Course Units: 1.0 (**TBD: Staff**) Foreign trade and international finance, protectionism, international migration of capital and labor, political economy of trade policy, strategic trade policy, international coordination of macroeconomic policies. **Prerequisite(s):** ECO 241 , ECO 242 , and ECO 243 **CC:** LCC, SOCS

ECO 355 - Monetary Economics

Course Units: 1.0 (**TBD: Staff**) What money has been and is, with study of relevant institutions, including the Federal Reserve and its policies; the bond market and interest rates; asset demand for domestic and foreign currencies; and monetarist, Keynesian, and Modern Monetary Theory (MMT) approaches to the role of money in macroeconomics. **Prerequisite(s):** ECO 241 , ECO 242 , and ECO 243 ; ECO 241 may be taken concurrently. **CC:** SOCS

ECO 356 - Seminar in Health Economics

Course Units: 1.0 (**TBD: Staff**) Designed to help students learn how to do research in the field of health economics. Students will conduct economic analysis on current health-related issues of public concern, ranging from rising health care cost to the prevalence of childhood obesity. Topics may include health care expenditures, Medicaid and Medicare, U.S. healthcare system, risky health behaviors, and healthcare reforms. **Prerequisite(s):** ECO 241 and ECO 243 **CC:** SOCS

ECO 364 - Business Analytics

Course Units: 1.0 (**TBD: Staff**) This course is about creating business insights from big data. The learning objective is to develop three abilities. The first is the ability to manipulate big data. This includes downloading, merging, appending and reshaping data, and creating new variables. Second is the ability to analyze data. This includes exploratory data analysis, visualization, and sophisticated predictive algorithms including nearest neighbor, naive Bayes, decision trees, regression and others. We will pay special attention to validating our predictions using the train and test regimen. Finally, students will develop an ability to formulate questions that can be answered using big data, and lead to better business performance. This includes using data to improve marketing, pricing, investing capital, customer satisfaction, costs, etc. The data manipulation and analysis will be implemented by writing programs in statistical software. **Prerequisite(s):** ECO 101 and ECO 243 (or STA 264) **CC:** SOCS

ECO 369 - Economics of Firm Strategy

Course Units: 1.0 (**TBD: Staff**) This course explores challenging business problems facing managers and develops a set of tools used to analyze a firms competitive environment, perform a comprehensive analysis of its position and make strategic decisions based on economic principles. It enables managers to place their organizations with competitive advantage and to perform better than their competitors. **Prerequisite(s):** ECO 241 **CC:** SOCS

ECO 374 - Sports Economics

Course Units: 1.0 (**TBD: Staff**) The application of economics to issues in sports. Sports topics include player salaries, free agency, discrimination, gambling, the Olympics, the Super Bowl, and the impact of stadiums on local economies. **Prerequisite(s):** ECO 241 and ECO 243

ECO 376 - Seminar in Global Economic Issues

Course Units: 1.0 (**TBD: Staff**) This seminar explores different perspectives on current global economic issues. A review of the recent debate on globalization provides a framework for discussion of a variety of issues related to international trade and the international financial system. Topics covered may include: international trade and the environment, international trade and labor standards, regionalism vs. world trade, international financial crises, reforming the global financial architecture, and international capital flows and developing countries. **Prerequisite(s):** ECO 241 , ECO 242 and ECO 243 **CC:** SOCS

ECO 378 - Labor Economics

Course Units: 1.0 (**TBD: Staff**) Determinants of wages and terms of employment, wage and employment theories and the impact of unions, wage structures, unemployment, poverty, wage legislation. **Prerequisite(s):** ECO 241 **CC:** SOCS

ECO 380 - Seminar in Economic Growth and Development

Course Units: 1.0 (**TBD: Staff**) Reviews the empirical record on economic growth and the resulting division of the world into rich and poor countries; considers the role of accumulation, innovation and institutions in the theory and experience of economic growth; investigates selected topics in the economics and political economy of growth, potentially including international trade, income inequality, international aid, democracy, social conflict, and corruption. **Prerequisite(s):** ECO 241 , ECO 242 and ECO 243

ECO 381 - Seminar in Economics of Culture

Course Units: 1.0 (**TBD: Staff**) Students will read and discuss the emerging literature on the economics of culture, become familiar with commonly used sources of data on cultural values and beliefs, and address the empirical challenges of using this data to evaluate economic theories of culture. Topics will include 1) the measurement of cultural values, 2) theories of socialization, 3) religion and economic outcomes, 4) cultural beliefs, attitudes toward government redistribution and the welfare state, 5) culture as informal institutions: trade and exchange in the absence of law, management of collective goods, and informal risk-sharing arrangements, 6) family and kinship networks as economic institutions, 7) the economic role of trust, 8) trust, social capital and political institutions, 9) immigration and theories of acculturation, 10) cultural values and institutional quality. Students will conduct a significant independent research project on the economics of culture. **Prerequisite(s):** ECO 241 and ECO 243

ECO 382 - Seminar in Finance

Course Units: 1.0 (**TBD: Staff**) Study of important topics in finance, such as capital structure, risk, uncertainty, and portfolio theory; agency costs; market efficiency; options theory, and the effects of financial crises on markets. **Prerequisite(s):** ECO 241 and ECO 334

ECO 383 - Seminar in International Finance

Course Units: 1.0 (**TBD: Staff**) This course is about the financial markets that facilitate trade and investment in today's global economy. We will learn about the balance of payments, exchange rate determination and exchange rate regimes. Emphasis in the course will be placed on understanding the events currently happening around us: including the widening U.S. current account deficit, dollar depreciation against the euro, China's reluctance to float its exchange rate, and the financial crises in Asia and Argentina. **Prerequisite(s):** ECO 241 and ECO 242 **CC:** SOCS

ECO 387 - Seminar in Labor

Course Units: 1.0 (**TBD: Staff**) The objective of this course is to learn how to do empirical research in labor economics using data drawn from the Current Populations Survey (CPS). The CPS is a monthly survey of about 50,000 households conducted by the Bureau of the Census for the Bureau of Labor Statistics and is the primary source of information on the labor force characteristics of the U.S. population. Using the CPS data many economists have written papers on topics such as gender/racial wage discrimination, economic performance of immigrants, labor union, job training, involuntary job loss, computer use, poverty, health insurance, and welfare. Students will write and present an empirical paper using data drawn from

the CPS. In order to process the CPS data for their research, students will learn how to write programs in statistical software Stata. This would be an excellent prep course for students interested in writing a senior thesis on any topics in labor economics or applied microeconomics and analyzing large data sets. The main labor economics topics to be covered in this course include compensating wage differentials, human capital, labor mobility, immigration, and labor market discrimination. **Prerequisite(s):** ECO 241 and ECO 243 **CC:** SOCS

ECO 390 - Economics Internships

Course Units: 1.0 (**TBD: Staff**) Designed to involve students in the operation of various economic agencies, commissions in New York State government and private firms. Interns apply skills to practical problems in economic analysis and gain exposure to the functioning of the agency or firm. **Prerequisite(s):** ECO 241 , ECO 242 , and ECO 243 **CC:** SOCS

ECO 391 - The Income Tax: Policy and Practice

Course Units: 1.0 (**TBD: Staff**) This course integrates theory and practice in addressing income tax policy issues. Students run a Volunteer Income Tax Assistance Site at the College's Kenney Community Center at which income tax forms are filled out for low-income tax payers. Students undergo training and pass an IRS certification test. Students participate in all aspects of running the site, including publicity, electronic filing, and site management. Class sessions are used for training and for study of the economics literature on income tax policy issues, including the Earned Income Tax Credit, policy towards subsidization of child care, tax compliance issues, and tax incentives for saving. **Prerequisite(s):** ECO 241 and ECO 243 , and a minimum GPA of 2.9 **CC:** SOCS

ECO 445 - Managerial Economics

Course Units: 1.0 (**TBD: Staff**) Use of economic and statistical analysis in management decision making and practical problem solving; demand evaluation and sales forecasting; cost and profitability analysis; pricing policy; extensive use of case studies. **Prerequisite(s):** ECO 241 and ECO 243 and senior standing. **CC:** SOCS

ECO 490 - Economics Independent Study 1

Course Units: 1.0 (**TBD: Staff**) For projects which require one or more of the core courses ECO 241 , ECO 242 , or ECO 243 as prerequisites.

ECO 491 - Economics Independent Study 2

Course Units: 1.0 (**TBD: Staff**) For projects which require one or more of the core courses ECO 241 , ECO 242 , or ECO 243 as prerequisites.

ECO 492 - Economics Independent Study 3

Course Units: 1.0 (**TBD: Staff**) For projects which require one or more of the core courses ECO 241 , ECO 242 , or ECO 243 as prerequisites.

ECO 493 - Economics Independent Study 4

Course Units: 1.0 (**TBD: Staff**) For projects which require one or more of the core courses ECO 241 , ECO 242 , or ECO 243 as prerequisites.

ECO 498 - Economics Senior Thesis 1

Course Units: 0.0 (**TBD: Staff**) Independent research thesis. **Prerequisite(s):** A minimum grade of C in each of the courses in the core sequence of ECO 241 , ECO 242 , ECO 243 , at least one course in the area of the thesis and senior standing; ECO 498 is prerequisite to ECO 499 . **CC:** WS

ECO 499 - Economics Senior Thesis 2

Course Units: 2.0 (**TBD: Staff**) Independent research thesis. **Prerequisite(s):** A minimum grade of C in each of the courses in the core sequence of ECO 241 , ECO 242 , ECO 243 , at least one course in the area of the thesis and senior standing; ECO 498 is prerequisite to ECO 499 . **CC:** WS

English

EGL 098 - Tragedy

Course Units: 1.0

(Not Offered this Academic Year) Tragedy is an ancient Greek dramatic art that in its first forms and their later permutations has profoundly shaped the thinking of the western world. Tragedy meditates on the power of the gods, justice and injustice, order and chaos, fate and freedom, and the whole spectrum of human existence.

The first great tragic playwright, Aeschylus, affirms the painful, yet hopeful notion that wisdom comes through suffering; but less than two generations later the plays of Euripides offer much more pain than hope, and the wisdom gained from the tragedies of Elizabethan and Jacobean England (e.g., Shakespeare) tends to be extremely bitter. Tragedy in the 19th and 20th century gets bleaker still, as writers lose faith in both the existence of traditional heroes and any sort of cosmic justice--the very possibility of reconciling oneself with the world as it is. But, despite this dark vision, modern as well as ancient tragedy can also generate a powerful kind of pleasure in audiences and readers - just one of the many paradoxes built into the genre. This course will attempt to make sense of it all. **CC:** HUL, HUM **Note:** This course is open to all students but does not count toward an English major/minor/ID.

EGL 099 - The Bible: An Introduction

Course Units: 1.0 **(Not Offered this Academic Year)** This course is a basic survey of the most historically and culturally important book in the world. Actually, the Bible is not a single book, but a complex anthology of many different genres, including history, legend, myth, law, poetry, prophecy, philosophy, and an astonishing variety of religious texts, from passionate prayers to bitter complaints against God, composed over the course of something like a thousand years. In addition to reading the most essential parts of the Old and New Testaments, we will also examine some of the countless ways that the Bible has left an imprint on modern western and American life. No previous acquaintance with the Bible is required.

Cross-Listed: CLS 099 **CC:** HUL, HUM **Note:** This course is open to all students but does not count toward an English major/minor/ID.

EGL 100 - The Study of Literature: Poetry

Course Units: 1.0 **(Fall: Lynes, Mitchell; Winter: Lynes, Murphy; Spring: Tuon)** Students will explore the art of poetry by examining a selection of poems from at least three cultures and by considering how poetry conveys its complex meanings through voice, image, rhythm, as well as formal and experimental structures. Particular attention will be given to developing reading and writing skills. 100-level courses are open to all students.

CC: HUL, WAC, HUM

EGL 101 - The Study of Literature: Fiction

Course Units: 1.0 **(Fall: Bracken, Doyle, Lewin, Troxell; Winter: Pease; Spring: Jenkins, Kuhn, Bracken)** Students will explore fictional works from at least three cultures. Emphasis will be placed on exploring the art of narrative - considering the ways stories get told and the reasons for telling them. Attention may be paid to such concerns as narrative point of view, storytelling strategies and character development, the relationship between oral and written narrative traditions, and narrative theory. Particular attention will be given to developing reading and writing skills. 100-level courses are open to all students. **CC:** HUL, WAC, HUM

EGL 102 - The Study of Literature: Drama

Course Units: 1.0 **(Fall: Wareh; Winter: Venning; Spring: Wareh)** In this course, we will ask how different representations of disguise help to articulate the themes with which drama is so concerned. Not only do plays acted on the stage abound in examples of characters switching places or mistaken for each other, they also provide a forum for individual characters to question their relationship with the people and culture that surround them. Even as plays stage the most private of feelings in a public setting, they also suggest that human interactions frequently involve playing a role. Throughout our examination of mix-ups, imposters, and identity crises in plays that range from ancient times to the present day, we will pay attention to both the literary and theatrical conventions of drama and the changing social place of the theater. The syllabus will include works by authors such as Euripides, Christopher Marlowe, Henrik Ibsen, Arthur Miller, August Wilson, Yasmina Reza, and David Ives. One of the most important aspects of the course will be the development of your ability to express your insights about the plays we read in your own written work. There will be frequent informal written assignments designed to help you build up to the longer papers. 100-level courses are open to all students. **Cross-Listed:** ATH 104 **CC:** HUL, WAC, HUM

EGL 110 - The Poetic Process

Course Units: 1.0 (**Winter, Spring: Smith**) This course will introduce students to the pleasures of poetry by way of the process of creating it. Students will read and discuss poems by a diverse range of contemporary poets, respond to writing prompts that clarify the structure of these poems while encouraging individual experimentation, and complete a final portfolio of carefully revised assignments. 100-level courses are open to all students. **CC:** HUL, HUM

EGL 150 - Film Form, and Analysis

Course Units: 1.0 (**Winter: Troxell**) In this course we will examine elements of film form such as cinematography, sound, editing, lighting, mise-en-scene, and narrative structure. Considering film an art form, a commercial product, a psychological experience, and a social practice, we will also pay close attention to issues of genre, performance, intertextuality and authorship. 100-level courses are open to all students. **CC:** HUM

EGL 190 - Confronting Canon: Beowulf

Course Units: 1.0 (**Winter: Doyle**) This course explores some of the important questions that scholars have raised about what has long been considered the traditional, Western literary canon. How does any literary text come to be considered "essential" or "fundamental" reading for English majors and minors? Who makes those decisions, and what are their criteria? How do literary authors engage with (revise, challenge, re-translate) "fundamental" texts? How have scholars challenged an all-white literary tradition and an all-white tradition of scholarship? Who gets to study and write about literature? How can we engage with so-called "fundamental" texts today without replicating exclusionary moves? How can engaging with these "fundamental" texts help us better understand, or think through, our own constructions of race and gender? Our case study as we dig into these questions will be the oldest, most "dead white male" text in the English literary tradition: Beowulf. Along the way, we will explore the diversity of English department offerings and requirements, beginning with our own and expanding to other institutions. 100-level courses are open to all students. "Constructing the Canon" courses are cornerstones of the new English curriculum (required beginning with majors/minors in the class of 2025). EGL 190 may alternatively count as a pre-1700 credit for English majors and minors. **CC:** HUM, HUL

EGL 200 - Shakespeare to 1600

Course Units: 1.0 (**Winter, Spring: Wareh**) We'll explore in this course some of the most entertaining, moving, and provocative theater the world has ever known. Focusing mainly on Shakespeare's comedies and histories, we'll discover characters who offer us complicated and engaging perspectives on topics such as love, magic, revenge, family relationships, "outsiders," and political power. We will work together to appreciate both the nuances of Shakespeare's poetry and the excitement of his works in performance (whether on stage or screen). **Cross-Listed:** ATH 256 **Prerequisite(s):** One 100-level English course or a score of 5 on the AP English Language or Literature and Composition test. **CC:** HUL, HUM

EGL 201 - Shakespeare after 1600

Course Units: 1.0 (**Fall: Venning**) In this course we will explore plays written in the second half of Shakespeare's career. We will emphasize Shakespeare's great tragedies-works that retain their ability to astound readers and audiences today-but we'll also explore his later comedies, "problem plays," and tragicomic final works. We will collaborate to appreciate the sounds and meaning of Shakespeare's language, to think about the ways he structures plots and creates vivid characters, to understand the cultural milieu in which his plays were written, to make thematic connections across the plays, and to appreciate the plays as both literature and in performance. Shakespearean drama can be challenging to study, but the rewards are lifelong: revelry in language, a strong grounding in theatrical traditions that remain dominant in our culture, a deeper understanding of the actions and values that motivate human beings in society, and an engagement with dramatic works that continue to be reimagined worldwide. **Cross-Listed:** ATH 257 **Prerequisite(s):** One 100-level English course or a score of 5 on the AP English Language or Literature and Composition test. **CC:** HUL, HUM

EGL 202 - Amazons, Saints and Scholars: Women's Writing in the Middle Ages and Renaissance

Course Units: 1.0 (**Not Offered this Academic Year**) This course explores the medieval and early modern female writers of England and France. We will ask: how did women respond in writing to the male-defined literary traditions and conventions of these eras? The course also provides an introduction to some of the major questions and works of feminist literary criticism, including: Why should we read the works of women? What aesthetic standards should we apply when discussing their works? Is there a difference between "masculine" and "feminine" writing? We will focus on six female writers: Marie de France, Christine de Pizan, Elizabeth Carey, Isabella Whitney, Amelia Lanyer, and Mary Sidney. **Prerequisite(s):** One 100-level English course or a score of 5 on the AP English Language or Literature and Composition test. **CC:** HUL, HUM, WAC

EGL 203 - The Age of Heroes

Course Units: 1.0 (**Not Offered this Academic Year**) In 410 the Romans abandoned Britain, withdrawing to the continent just as pagan Germanic raiders began to challenge the island's native Picts and Celts. In 1066 the Duke of Normandy crossed the Channel and kicked a Danish king off the throne of a fully Christianized England. In between these two events lies the matter of this course: the subtle and sophisticated literature, art, and culture of early medieval England. We will explore its evolution and wrestle with thorny questions about the significance and meaning it has been accorded over the centuries. **Prerequisite(s):** One 100-level English course or a score of 5 on the AP English Language or Literature and Composition test. **CC:** HUL, HUM, WAC

EGL 204 - Plague, Revolt, Religion, and Nation: The Fourteenth Century

Course Units: 1.0 (**Not Offered this Academic Year**) This course explores English literature as it reflects, shapes, and critiques society from the onset of the Hundred Years' War to the overthrow of Richard II (1337- 1400), a turbulent period that includes the Peasants' Revolt, the Black Plague, the rise of English as the language of literature and government, and the proto-Protestant movement known as Lollardy. **Prerequisite(s):** One 100-level English course or a score of 5 on the AP English Language or Literature and Composition test. **CC:** HUL, HUM

EGL 205 - The Road to Canterbury

Course Units: 1.0 (**Not Offered this Academic Year**) Comedy, chivalric adventure, magic, miracles, saints' lives, sermons -- Chaucer's best-known work, *The Canterbury Tales*, runs the gamut from sublime love poetry to slapstick fart jokes. We will study a generous selection of the major Tales, exploring Chaucer's literary sources, his style, his perspective on his own contemporary culture, and his ideas about the purpose of storytelling. Along the way, we will learn to read some Middle English and grapple with some of the questions Chaucer raises: Who defines the term "great literature," anyway? What does it mean when an author writes in someone else's voice? How do a storyteller's social class and choice of genre determine the story's impact? Should literature challenge political and cultural norms? What are the uses of irony? How should texts treat women? What role does an audience have in defining the meaning of a story? **Prerequisite(s):** One 100-level English course or a score of 5 on the AP English Language or Literature and Composition test. **CC:** HUL, HUM

EGL 210 - British Literature: Seventeenth-Century Literature

Course Units: 1.0 (**Spring: Jenkins**) This course will look at seventeenth-century literature and culture through the idea of revenge, which became a dominant form in an age of turmoil, injury, and change. We will begin with the early revenge plays of Shakespeare, Tourneur, Marston, Ford, and Webster, proceed through the cosmic revenge of Satan in *Paradise Lost*, and end with the ironic revenge exacted on moral goodness by the Restoration poets, playwrights, and philosophers. **Prerequisite(s):** One 100-level English course or a score of 5 on the AP English Language or Literature and Composition test. **CC:** HUL, HUM, WAC

EGL 211 - Milton

Course Units: 1.0 (**Spring: Jenkins**) The two sides of Milton - the high humanist poet, author of the greatest epic in English and one of the greatest religious poems in any language, and the Puritan revolutionary, defender of regicide and champion of the English commonwealth. The goal of the course will be to see if the two sides can be held separate, or if they must be seen as complementary. We will read *Paradise Lost* at the rate of one book per week, always trying to relate the two sides of the poet. **Prerequisite(s):** One 100-level English course or a score of 5 on the AP English Language or Literature and Composition test. **CC:** HUL, HUM, WAC

EGL 212 - The Restoration

Course Units: 1.0 (**Not Offered this Academic Year**) This course will closely examine the culture that produced both the first official poet laureate of England, John Dryden, and the most notoriously libertine poet in English, the Earl of Rochester. Also appearing will be the first English woman to make a living from literature, Aphra Behn; the wittiest playwrights in English dramatic history (Wycherley, Etherege, Congreve); John Milton; some very early English novels; and some pretty good philosophers, including Thomas Hobbes, John Locke, and maybe even Sir Isaac Newton. All that and the Great Fire of London, outbreaks of the plague, several wars, and major revolutions in politics and science. **Prerequisite(s):** One 100-level English course or a score of 5 on the AP English Language or Literature and Composition test. **CC:** HUL, HUM

EGL 213 - American Literature in Historical Context: Beginnings to 1800

Course Units: 1.0 (**Not Offered this Academic Year**) This course focuses on beginnings of American literature and culture, with an emphasis on writings prior to 1700. Selections will vary but may include early exploration literature; early Spanish, French and British texts; Native American traditions; Puritan and Pilgrim poetry and essays; writings on witchcraft; the Great Awakening; the rise of science, discovery and invention; the Declaration and the Constitution; and the early sentimental novel. **Prerequisite(s):** One 100-level English course or a score of 5 on the AP English Language or Literature and Composition test. **CC:** HUL, HUM

EGL 217 - Enlightenment and Romanticism

Course Units: 1.0 (**Spring: Kuhn**) Consideration of the relationships between two major currents in modern European thought and culture: Enlightenment and Romanticism. Authors will range from Descartes to Nietzsche and may include Voltaire, Rousseau, Goethe, and Kant. **Prerequisite(s):** One 100-level English course or a score of 5 on the AP English Language or Literature and Composition test. **CC:** HUL, HUM

EGL 219 - Rise of the Novel

Course Units: 1.0 (**Not Offered this Academic Year**) Development of the novel form in its social, cultural, and literary contexts, focusing primarily on the 18th century. We will consider adventure/picaresque, domestic/epistolary and questions of genre, gender, and history. Authors include Chariton, Cervantes, Defoe, Barker, Behn, Richardson, and Burney. **Prerequisite(s):** One 100-level English course or a score of 5 on the AP English Language or Literature and Composition test. **CC:** HUL, HUM

EGL 220 - The Romantic Revolution

Course Units: 1.0 (**Spring: Burkett**) The Romantic period was one of Britain's most "revolutionary" eras in a number of important ways. For England, the age was marked by dramatic social, political, literary, and scientific upheaval and change. In this course we will investigate the various causes that were envisioned, promoted, and enacted during this era and trace their often wide-ranging and revolutionary effects. Readings will likely include selections from the following authors: William Wordsworth, Samuel Taylor Coleridge, William Blake, Mary Shelley, Lord Byron, Percy Bysshe Shelley, and John Keats. **Prerequisite(s):** One 100-level English course or a score of 5 on the AP English Language or Literature and Composition test. **CC:** HUL, HUM

EGL 223 - Jane Austen

Course Units: 1.0 (**Fall: Doyle**) Jane Austen has achieved what few other literary authors can boast: membership in "the canon" of "great authors" and an intensely devoted, energetic modern fan base complete with cosplay, fan fiction, pilgrimages, and a never-ending series of visual adaptations. Students will read Jane Austen's work in chronological order, explore some late 18th and early 19th century contexts (biographical, philosophical, literary, cultural, historical), become familiar with some of the central, current, and ongoing scholarly debates about Austen, and discuss the value of, and consider the insights revealed by, some modern adaptations of Austen's work. **Prerequisite(s):** One 100-level English course or a score of 5 on the AP English Language or Literature and Composition test. **CC:** HUL, HUM, WAC

EGL 224 - 19th-Century Novel

Course Units: 1.0 (**Not Offered this Academic Year**) The golden age of the novel examined in its historical, intellectual, and literary contexts. Topics will include satire and the novel, realism vs. gothicism, fiction and the visual arts (especially book illustration), the impact of Darwin, fiction and the role of women, the city vs. the country, the individual vs. society, the novel and commerce, fiction and imperialism. **Prerequisite(s):** One 100-level English course or a score of 5 on the AP English Language or Literature and Composition test. **CC:** HUL, HUM, WAC

EGL 225 - The Bronte Sisters

Course Units: 1.0 (**Not Offered this Academic Year**) This course will examine five first-person narratives by Charlotte Bronte and her sisters Emily and Anne. Readings will include *The Professor*, *Jane Eyre*, *Villette*, *Wuthering Heights*, *The Tenant of Wildfell Hall*, and Elizabeth Gaskell's 19th-century biography *The Life of Charlotte Bronte*. We will consider biographical, interpersonal, and inter-textual relations alongside questions of gender, class, religious vocation, communal authorship, pseudonymous publication and the cult of genius. **Prerequisite(s):** One 100-level English course or a score of 5 on the AP English Language or Literature and Composition test. **CC:** HUL, HUM

EGL 226 - Victorian Detective Fiction

Course Units: 1.0 (**Not Offered this Academic Year**) This course investigates detective fiction's emergence and popularity in late nineteenth-century English literature and places the birth of the genre in its social and cultural contexts. We read prominent Victorian writers such as Dickens and Collins as well as canonical detective fiction writers such as Conan Doyle and Poe. How does the rise of the detective novel intersect with historical conditions of Empire, gender relations, and social policy? Does the spread of detective fiction signal late Victorian England's need to patrol destabilizing forces, both domestic and foreign? **Prerequisite(s):** One 100-level English course or a score of 5 on the AP English Language or Literature and Composition test. **CC:** HUL, HUM

EGL 230 - Seduction in Early American Republic

Course Units: 1.0 (**Fall: Murphy**) In her seminal study, *Revolution and the Word: The Rise of the Novel in America*, Cathy N. Davidson argues that "literature is not simply words upon a page but a complex social, political, and material process of cultural production" (viii). The eighteenth-century sentimental novel serves to highlight a moment in history lodged among judgments, anxieties and controversies about the direction the newly-formed American Republic would take at the end of the Revolution. Embedded within these narratives are questions about both men's and women's power and authority in the public and private spheres, the negation of the female self, the seductive function of romance and courtship, and the perception of women's bodies as moral, social, and biologic commodities. This course seeks to explore disjunctions between the sentimental structure of the early American novel and its contradictory attitudes toward liberty and self-expression. Through the lens of queer theory, affect theory, and new materialism, students will examine how seduction, homoeroticism, and cross-dressing both reinforce and subvert American values and ideals that are distinct from European standards of morality. The readings will also consider how the cult of "true womanhood," prominent during the first few decades of the nineteenth century, suppressed pleas for women's equality. How do the texts under consideration help to define the new nation, its citizens, and boundaries? In what ways do these texts consolidate nationhood through the formation of a national literature and the narrative structure of a national history, culture, and consciousness? Do these novels construct, conserve, or undermine American cultural institutions? **Prerequisite(s):** One 100-level English course or a score of 5 on the AP English Language or Literature and Composition test. **CC:** HUL, HUM

EGL 231 - Nineteenth-Century American Literature

Course Units: 1.0 (**Not Offered this Academic Year**) This course focuses on the self-conscious development of literary tradition in 19th century America -- its meaning, its implications, its failures -- and its aesthetic and moral possibilities. Writers under consideration may include Emerson, Fuller, Thoreau, Douglass, Hawthorne, Melville, Dickinson, and Twain, and topics will include individualism, transcendentalism, abolition, the coming of war, the aftermath of war, growth, expansion, and power. **Prerequisite(s):** One 100-level English course or a score of 5 on the AP English Language or Literature and Composition test. **CC:** HUL, HUM

EGL 232 - The American Renaissance

Course Units: 1.0 (**Not Offered this Academic Year**) This course will examine major works written during the American Romantic period, as well as some written in the post-Romantic period up to the death of Walt Whitman in 1892. We will begin by discussing some of Emerson's essays and continue with works by authors who reacted, both positively and negatively, to Emerson. Other works will be selected from the following list: at least two of Poe's short stories, Hawthorne's *The Scarlet Letter*, excerpts from Thoreau's *Walden*, Douglass's *Narrative*, excerpts from Melville's *Moby-Dick*, poems by Walt Whitman, excerpts from Margaret Fuller, Louisa May Alcott's satire "Transcendental Wild Oats," and poetry by Emily Dickinson. **Prerequisite(s):** One 100-level English course or a score of 5 on the AP English Language or Literature and Composition test. **CC:** HUL, HUM

EGL 233 - African-American Literature: Beginnings to 1900

Course Units: 1.0 (**Not Offered this Academic Year**) This introductory survey course will trace African American movement towards literary and aesthetic mastery beginning with what Henry Louis Gates calls "oral writing." Readings begin with the first known written poems and progress from slave narratives and autobiography to essays and fiction. Authors include Phillis Wheatley, Harriet Jacobs, Frances Ellen Watkins Harper, Solomon Northup, Charles Chesnut, W.E.B. Du Bois, among others. **Prerequisite(s):** One 100-level English course or a score of 5 on the AP English Language or Literature and Composition test. **CC:** LCC, HUL, HUM

EGL 236 - American Realism and Naturalism

Course Units: 1.0 (**Not Offered this Academic Year**) Realism and naturalism were aesthetic movements that emerged in American fiction between approximately 1865 and 1925. This course examines these two literary movements to show how writers of this era explored the trauma created by war (the Civil War and WWI), the moral consequences of freedom and sexual awareness, rapid urbanization and the Great Northern migration, inconsistencies between wealth and poverty, and innovative discoveries in science and technology. The purpose of this course, then, is to investigate how the authors of this period practiced their art both collectively and individually and the ways in which American social life informed the

ideologies of realism and naturalism. Possible writers we will study include William Dean Howells, Stephen Crane, Frank Norris, Theodore Dreiser, Kate Chopin, Mary Wilkins Freeman, Mark Twain, Edith Wharton, Henry James, and Paul Laurence Dunbar. **Prerequisite(s):** One 100-level English course or a score of 5 on the AP English Language or Literature and Composition test. **CC:** HUL, HUM

EGL 237 - Reclamation & Renaissance: Black Literary Arts 1900 to 1968, "Dark Like Me - That is my Dream!"

Course Units: 1.0 (**Not Offered this Academic Year**) In this course we will read literatures of African diaspora from the United States and from the English-speaking African Diaspora more broadly speaking, written in the early to mid- 20th century. This course is deliberately using the adjective Black instead of African American to highlight our awareness that the literature of the early 20th century is part of a Pan-African movement. Threads we will follow include: issues of identity (being American; being Black; racial and social passing); miscegenation; claims to culture through literature; political and social change through literature (is it possible?); self-representation and activism through literary arts; rise of pride in being part of African diaspora; gender roles in literary and social contexts. Questions we will raise and explore in the course of the term include: What is the relationship between aesthetic production and political action? What are the gendered aspects of the expressions of the writers and artists? How are "folk" forms incorporated into "literary" forms? How does self-representation operate in the reclamation of a sense of self? We will engage with the complexities of cultural diversities within the African diaspora while we contemplate the traditions we follow. We will begin, as the title of the course suggests, around the turn of the 20th century, when Du Bois writes that the "problem of the twentieth century is the problem of the color line" (Souls of Black Folk 45). We will move through what some called the Harlem Renaissance, during which time writers such as Langston Hughes celebrated being Black in a reclamation of the self: "Dark like me-That is my dream!" (Selected Poems 14). We will explore the literature of the pre- and post- WWII era, ending the term with what was known as the Black Arts Movement. The goal, in terms of content, is to provide you with a broad sampling of literature of the African Diaspora literature of the early 20th century, with a particular focus on literature (prose in the form of essays, short stories, novels; poetry; plays) generated from the United States while also reaching toward its more global pan-Africanist roots. I hope you will follow your interests and curiosities, after the course is over, to explore this literature further. (Also counts for Africana and American Studies).

Prerequisite(s): One 100-level English course or a score of 5 on the AP English Language or Literature and Composition test. **CC:** LCC, HUL, HUM

EGL 244 - The Contemporary British Imagination

Course Units: 1.0 (**Not Offered this Academic Year**) This course will examine contemporary British literary works. We will be reading closely, carefully, and critically about gender, sexuality, class, race, love, trauma, narrative, style, history, and more. This course will familiarize students with a sampling of the (often experimental) literature that the global Anglophone world has produced fairly recently; our selections will range from experimental short stories to books-turned-films to so-called "weird fiction," in order to address the following major questions: how does the contemporary British literary imagination develop? And, what, exactly, does it develop into? **Prerequisite(s):** One 100-level English course or a score of 5 on the AP English Language or Literature and Composition test. **CC:** HUL, HUM

EGL 245 - Experimental Texts

Course Units: 1.0 (**Not Offered this Academic Year**) Experiments in writing have a long history and are often some combination of fascinating, weird, complex, risky, and wild. This course will cross genre-boundaries in order to discover what it means to read, write, and experience "experimental" literature, which usually attempts to challenge the traditions, formal devices, and audience expectations of literary engagement. With a focus on the relationship between form and content as well as attention paid to the limitations associated with strict categorical delineations of literary and cultural objects, we will spend the term analyzing and producing experimental texts. We will spend time considering primarily contemporary textual responses to cultural, social, and political shifts and the ways in which such shifts inform and affect our reading practices. Readings will include poetry fiction, theory, and contemporary media. Writing assignments will include interpretive and creative works. Collaborative projects will also be a part of this course. **Prerequisite(s):** One 100-level English course or a score of 5 on the AP English Language or Literature and Composition test. **CC:** HUL, HUM

EGL 246 - Modern Poetry

Course Units: 1.0 (**Not Offered this Academic Year**) Selected poetry from the high modern period (from the turn of the twentieth century to circa 1945) in relation to changing views of the poet's role in culture and the poet's contradictory posture as prophet, exile, romantic, outcast. Authors will include W.B. Yeats, T.S. Eliot, Ezra Pound, Robert Frost, Wallace Stevens, William Carlos Williams, Marianne Moore, Langston Hughes, W. H. Auden, others. **Prerequisite(s):** One 100-level English course or a score of 5 on the AP English Language or Literature and Composition test. **CC:** HUL, HUM

EGL 247 - Studies in Modern Poets: Bob Dylan and Leonard Cohen

Course Units: 1.0 (**Not Offered this Academic Year**) In this class, we'll be checking out the work of two contemporary writers who have used words and music to enliven the possibilities and extend the audience for lyric poetry. At the same time they have explored some of the traditional questions about the connection between poetry and autobiography, the creation of a poetic self, the recycling of cultural materials, and the political and spiritual significance of verse. Because these writers have created such a large range of material, we will concentrate on a few periods in their long professional lives: Dylan's shift from acoustic folk to electric rock and back in the mid-to-late-1960s and the remarkable quartet of albums that Cohen recorded in the last decade of his life (we'll check out earlier Cohen and later Dylan too). And we will read some of their more conventionally literary works as well. The assignments will work on the assumption that the best way to understand a writer is to try to write something similar to their work; there will be several short assignments which will be shared with the class and a final project. **Prerequisite(s):** One 100-level English course or a score of 5 on the AP English Language or Literature and Composition test. **CC:** HUL, HUM

EGL 248 - Introduction to Black Poetry

Course Units: 1.0 (**Not Offered this Academic Year**) We will explore the development of African-American poetic voices in North America. We will look at poems and poets as they constitute a hybrid and composite tradition. We will read poetry in anthologies; we will also read several full books by individual authors, and will listen to performance poetry on CD and DVD. A partial list of poets we will read includes Wheatley, Harper, Dunbar, Hughes, McKay, Helene Johnson, Brooks, Baraka, Clifton, Sanchez, Cortez, Morris, Mullen, Brathwaite, Komunyakaa, Francis, Dungy, among others. **Prerequisite(s):** One 100-level English course or a score of 5 on the AP English Language or Literature and Composition test. **CC:** LCC, HUL, HUM

EGL 249 - Contemporary Poetry

Course Units: 1.0 (**Not Offered this Academic Year**) In this course, we will take a close look at the work of five poets, three whose lives have spanned the American experience from the 1960s to the present (Peg Boyers, Carl Phillips, Frank Bidart) and two younger poets (Chelsea Woodard and Diane Mehta, both Union graduates). We'll take a look at the problem of the speaker in the poems (who may be the poet, more or less, or a mask, or a fiction, or some combination), which is also a way of asking questions about identity, history, and culture, as well as about freedom and restraint, the possibilities and limitations of language. **Prerequisite(s):** One 100-level English course or a score of 5 on the AP English Language or Literature and Composition test. **CC:** HUL, HUM

EGL 250 - The Beats and Contemporary Culture

Course Units: 1.0 (**Winter: Smith**) An examination of the writers of the Beat Generation (including Allen Ginsberg, Jack Kerouac, Gary Snyder, Edward Sanders) and of their lasting influence on American popular culture. **Prerequisite(s):** One 100-level English course or a score of 5 on the AP English Language or Literature and Composition test. **CC:** HUL, HUM

EGL 251 - World Literatures in English

Course Units: 1.0 (**Fall: Pease**) Besides the USA, Canada, the UK and Ireland, there are dozens of countries where English is commonly spoken and written. From Australia to Zimbabwe, Belize to Nigeria, Jamaica to India, New Zealand to Kenya, literature in English is a world-wide phenomenon. In this course, students will read and analyze English-language poems, short stories, personal essays, and novels from a selection of far-flung countries, to learn about the peoples' cultures, histories, struggles, and achievements. **Prerequisite(s):** One 100-level English course or a score of 5 on the AP English Language or Literature and Composition test. **CC:** LCC, HUL, HUM

EGL 253 - Narratives of Haunting in US Ethnic Literature

Course Units: 1.0 (**Not Offered this Academic Year**) This course examines the theme of haunting in contemporary US ethnic literature. With this theme in mind, we will investigate the following questions throughout the trimester: Why is haunting such a prevalent theme in ethnic writing? What do we mean when we say that a text is haunted? What are the causes of haunting? What is possession? What are some ways to dispossess or exorcise ghosts? What are the functions of ghosts? Is there such a thing as a good haunting? What are their messages to us? How do we listen to ghosts? Authors include Lan Cao, Nora Okja Keller, Maxine Hong Kingston, Cynthia Ozick, Toni Morrison, Sandra Cisneros, and Leslie Marmon Silko. **Prerequisite(s):** One 100-level English course or a score of 5 on the AP English Language or Literature and Composition test. **CC:** LCC, HUL, HUM

EGL 254 - Discourses on the Viet Nam War

Course Units: 1.0 (**Not Offered this Academic Year**) This class will examine various perspectives on "The Vietnam War," or, as the people of Viet Nam call it, "The American War." In our archeological exploration into the nature of knowledge about this period in Viet Nam/U.S. history, we will not privilege one perspective over another. Rather, we will examine the diverse political, ideological, and moral positions from which various groups, such as the U.S. government, U.S. soldiers, U.S. citizens, the North Vietnamese people, and the South Vietnamese people, perceive this historic conflict. **Prerequisite(s):** One 100-level English course or a score of 5 on the AP English Language or Literature and Composition test. **CC:** HUL, HUM, WAC

EGL 255 - Asian American Literature and Film

Course Units: 1.0 (**Spring: Tuon**) If you are interested in the diverse history of Asian immigration in the U.S., take this course. Together as a class, we will examine major historical moments in Asian America: the first wave of Asian immigration in the mid-nineteenth century, the anti-Asian laws of the late nineteenth century, the Japanese internment during the Second World War, the emergence of Asian American studies during the 1960s Civil Rights Movement, Southeast Asian refugees after the Viet Nam/American War, and the contemporary turns to the transnational and the pan ethnic. To cover these historical moments, we will read the following texts: *Island: Poetry and History of Chinese Immigrants on Angel Island*, *Eat a Bowl of Tea*, *Farwell to Manzanar*, *When Broken Glass Floats*, *American Born Chinese*, and *American Son*. **Prerequisite(s):** One 100-level English course or a score of 5 on the AP English Language or Literature and Composition test. **CC:** LCC, HUL, HUM

EGL 256 - Southeast Asian-American Experience

Course Units: 1.0 (**Not Offered this Academic Year**) This course examines the diverse literatures, histories, and cultures of the Vietnamese, Cambodian, Hmong and Laotian through the lens of war, migration, and return. Specific attention will be paid to how the War in Vietnam spread to neighboring countries such as Cambodia and Laos, resulting in mass migration of people from Southeast Asia to the West, specifically the United States. We will examine the literatures, oral testimonies, films, and music created by Southeast Asians in America. Possible authors include: Andrew Lam, Bich Minh Nguyen, Le Thi Diem Thuy's, Loung Ung, Chanrithy Him, Kao Kalia Yang, Mai Neng Moua, and Burlee Vang. **Prerequisite(s):** One 100-level English course or a score of 5 on the AP English Language or Literature and Composition test. **CC:** LCC, HUL, HUM

EGL 257 - Irish American Literature

Course Units: 1.0 (**TBD: Staff**) **CC:** HUM, HUL

EGL 258 - Changing Ireland

Course Units: 1.0 (**TBD: Staff**) This course will be looking at the changing nature of Irish society since the economic boom of Celtic Tiger Ireland in the 1990's. EU membership, US investment and the effects of global internationalism have brought about radical culture transformations in the country which in turn are altering conventional meanings of Irishness and Irish identity. We will be looking at representations of this changing Ireland in literature and film, paying attention to issues such as new technologies, post-feminism, sexualities, race and ethnicity. Texts will include Martin McDonagh's *In Bruges*, Anne Enright's novel *The Wig My Father Wore*, and the poetry of Leanne O'Sullivan. **Prerequisite(s):** One 100-level English course or a score of 5 on the AP English Language or Literature and Composition test. **CC:** LCC, HUL, HUM

EGL 259 - Irish Literature and Film

Course Units: 1.0 (**Not Offered this Academic Year**) The aim of this course is to introduce you to the field of Irish Studies, examining how issues relating to language, identity and nationhood are intimately connected in Irish literature and film. In this course we will be studying Irish literary texts from the beginning of the 19th century to the late 20th century, examined alongside a selection of contemporary films. This course will ask you to consider the ways in which cultural concerns of the Irish past continue to haunt the landscape of the present day, paying attention to issues of gender, class, race and sexuality. Texts will include Lady Morgan's *Wild Irish Girl*, Bram Stoker's *Dracula*, Samuel Beckett's *Waiting for Godot* and Neil Jordan's film *Michael Collins*. **Prerequisite(s):** One 100-level English course or a score of 5 on the AP English Language or Literature and Composition test. **CC:** HUL, LCC, HUM

EGL 260 - James Joyce

Course Units: 1.0 (**Not Offered this Academic Year**) This course will focus entirely on Irish writer James Joyce's modernist masterpiece *Ulysses*, published in 1922. This is a complex, challenging and experimental novel (900 pages), which uses stream of consciousness as its primary literary

mode. Set on just one day, June 16th 1904, it tells the story of Leopold Bloom, Stephen Dedalus, and Molly Bloom as we learn of their pasts, presents and hopes for the future. Joyce's novel is a meditation on the lives of these characters, and the modern colonial Dublin they inhabit, however it is also a self-reflective piece of literature which foregrounds issues relating to language, style, and storytelling. In the course, we will successively read all of the chapters of *Ulysses*, analyzing it through a variety of critical paradigms, including post-colonialism, modernism, and feminism. We will also watch a number of films relating to Joyce and his work, such as *Nora, Bloom, and Ulysses*, and at the end of the course we will consider the commodification of Joyce as the 'Great Irish Writer' through the yearly Bloomsday celebrations of June 16th in Dublin. Students are encouraged to read Joyce's *Dubliners* and *A Portrait of the Artist as a Young Man* before the class begins. **Prerequisite(s):** One 100-level English course or a score of 5 on the AP English Language or Literature and Composition test. **CC:** HUL, HUM

EGL 261 - Modernism and Modernity

Course Units: 1.0 (**Not Offered this Academic Year**) This course examines British fiction from the early twentieth-century, a period often referred to as the "modernist" era. The moderns experimented with new, different, and exciting ways of writing that perplexed many readers, yet such changes have come to be seen as important innovations in literary style. In addition to engaging with questions of form and style, the moderns were also interested in subjects that were previously viewed as taboo, questionable, and, as such, often unspeakable. These topics included trauma, the lasting effects of war, sexual experimentation, adultery, insanity, and newly carved out gender and familial roles. Throughout our term together, we will critically consider, discuss, and write about the dynamic between the content of modernist writing and its innovative style and form.

Prerequisite(s): One 100-level English course or a score of 5 on the AP English Language or Literature and Composition test. **CC:** HUL, HUM

EGL 262 - Global Modernisms

Course Units: 1.0 (**Fall: Mitchell**) This course examines global fiction from the early twentieth century, a period often referred to as the "modernist" era. Modernist writers were literary and cultural pioneers, experimenting with prose and poetry in ways that challenged and unsettled readers; yet such changes have come to be seen as important innovations in literary style. In addition to engaging with questions of form and style, writers from this period were also interested in subjects that were previously viewed as taboo, questionable, and, as such, often unspeakable. These topics included, but are not limited to, trauma, war, sexuality, insanity, and newly carved out gender and familial roles. Perhaps most importantly for our class, modernist writers created spaces for themselves and their work all over the world. From writers in exile to writers living under colonial/imperial rule, the relationship between modernism and culture is inherently dialogic. We will interrogate the relationship between modernist experimentation, nation, and identity, focusing on writers from America, the United Kingdom, the Caribbean, Asia, and Europe. Throughout our term together, we will critically consider, discuss, and write about the dynamic between the content of modernist writing, its innovative style and form, and its connection to place and space. **Prerequisite(s):** One 100-level English course or a score of 5 on the AP English Language or Literature and Composition test. **CC:** HUL, HUM

EGL 263 - Literature and Sexuality

Course Units: 1.0 (**Winter: Mitchell**) By examining literary and cultural representations, this course both interrogates the politics and social dynamics of various sexual identities and subjectivities and examines complex representations of both gender and sexuality. This course also focuses on the literary study of important straight, gay, lesbian, queer, bisexual, and transgender writers within their evolving social, historical, and cultural contexts over the last few centuries. We will discuss some of the major critical debates both in literary studies and in gender and sexuality studies, asking and attempting to answer the following questions: How is sexuality represented in literature? How has the relationship between literature and sexuality evolved over time? Who creates the discourses on sexualized bodies and identities? How can we understand the relationship between lived experience and literary/cultural representations? What might be queer about literature? What makes a narrative queer? **Prerequisite(s):** One 100-level English course or a score of 5 on the AP English Language or Literature and Composition test. **CC:** HUL, HUM

EGL 264 - Women Writers, 18th to 20th Century

Course Units: 1.0 (**Not Offered this Academic Year**) Traces the tradition of women's literary writing by "thinking back through our mothers." Authors may include Behn, Burney, Austen, Radcliffe, Shelley, Bronte, Rossetti, Eliot, and Woolf. **Prerequisite(s):** One 100-level English course or a score of 5 on the AP English Language or Literature and Composition test. **CC:** HUL, HUM

EGL 265 - Jewish Women Writers

Course Units: 1.0 (**Winter: Lewin**) A study of Jewish women's writing particularly concerned with how the question of religion complicates women writers' representations of gender, nationality, class, sexual orientation, and ethnicity. Texts range from the 17th-century first recorded autobiography by a Jewish woman to 21st-century novels in English and in translation. Pre-registered participants' interests will influence the final selection of texts. **Prerequisite(s):** One 100-level English course or a score of 5 on the AP English Language or Literature and Composition test. **CC:** HUL, HUM

EGL 266 - Black Women Writers

Course Units: 1.0 (**Fall: Lynes**) This course provides an introduction to the major themes and concerns of twentieth- and twenty-first century African American women writers. We begin in the 18th century and move quickly to the 20th and 21st. We will examine the ways in which black womanhood is characterized through intersecting categories of race, gender, class, sexuality, and empire. We will explore how selected authors wrestle with stereotypical images of African American women, examine the connections between black womanhood, community, and empire, and discuss the benefits and limitations of the concept of "black women's writing." Possible writers include Frances Harper, Maria Stewart, Anne Spencer, Zora Neale Hurston, Gwendolyn Brooks, Toni Morrison, Audre Lorde, Gloria Naylor, Octavia Butler, and others. **Prerequisite(s):** One 100-level English course or a score of 5 on the AP English Language or Literature and Composition test. **CC:** LCC, HUL, HUM

EGL 268 - Staging Black Feminisms

Course Units: 1.0 (**Winter: Venning, Hill-Butler**) This course considers the feminist and anti-racist practices of Black female dramatists, placing their plays within their cultural contexts. We will examine the ways in which these works construct Black feminist histories, genealogies, and cultures while challenging racial and sexual hierarchies in both American society and artistic canons. Each week, students will read a landmark dramatic text by a Black female playwright as well as seminal sociological texts and scholarly studies that contextualize the work within broader artistic and social movements. Through discussions, field trips including attendance at theatrical performances and other cultural events, reading responses, and a final presentation based on individual research, students will hone their thinking about the development of Black female voices in American dramatic literature and society. **Cross-Listed:** SOC 209 and ATH 248 **CC:** SOCS, HUL, HUM

EGL 271 - Dark Deeds: Crime in the Adirondacks

Course Units: 1.0 (**Not Offered this Academic Year**) Merriam Webster defines a crime as an illegal act for which someone can be punished by the government; especially: a gross violation of law. A crime, however, is also defined in moral and ethical terms, as a grave offense, especially against morality; something reprehensible, foolish, or disgraceful. Students in this course will explore a variety of literary and historical illustrations of each of these types of crimes as they have occurred in the Adirondack Mountains throughout history. As we investigate various illegal acts in the Adirondacks, we will also examine underlying moral crimes, such as poverty and economic depression, which have the potential to lead individuals toward a life of crime. We will explore Chester Gillette's 1906 murder of Grace Brown at Big Moose Lake and the highly sensationalized murder trial that ensued, alongside Theodore Dreiser's 1925 novel that was based on the murder and criminal case. We will analyze the prison system in the Adirondacks, and we'll investigate various mobsters who stayed in Saratoga Springs during the Prohibition Era. We will also explore the crime of contagion as we read works written about tuberculosis and various sanatoriums in Saranac Lake. Part of our class time will be held at the Kelly Adirondack Center (KAC), working in the Adirondack Research Library. **CC:** HUL, HUM

EGL 274 - Uncanny Texts: Literature and Psychoanalysis

Course Units: 1.0 (**Not Offered this Academic Year**) By interrogating literary, cultural, and psychoanalytical texts, this course examines the relationship between literature and psychoanalysis; the two have been in close conversation since the early theoretical developments that began to define psychoanalysis. From Freud's use of Hamlet and The Sandman as key cornerstones of his own theories to the way that J.K. Rowling's Harry Potter and the Sorcerer's Stone illustrates Jacques Lacan's notion of the Mirror Stage, literature and psychoanalysis have been dialogically and dynamically intimate bedfellows. During our term, we will look at psychoanalytical writings by Sigmund Freud, Jacques Lacan, and others in conjunction with transhistorical literary and cultural texts. We will examine specific psychoanalytical concepts like the unconscious, desire, sublimation, shame, the uncanny, the death drive, the primal horde, infantile sexuality, and mourning and melancholia. **Prerequisite(s):** One 100-level English course or a score of 5 on the AP English Language or Literature and Composition test. **CC:** HUL, HUM

EGL 275 - Autobiography

Course Units: 1.0 (**Not Offered this Academic Year**) "Who am I and how did I get this way?" This course is a study in the development of autobiography as literary genre from St. Augustine's Confessions to Frank McCourt's Angela's Ashes. We will focus on autobiography as a space for exploring, expressing, and constructing the self as well as an inquiry into the developing relationship between mind and world. We will also examine the various motives behind writing one's life-story from the existential and religious to the political and historical. Related issues to be discussed include the role of imagination, memory, and language in narrating the self, and the particular impact of minority, marginalized, and forbidden

voices. We will also talk about scandals involving fabricated autobiographies. Does an autobiography have to be true? Readings may include Montaigne's Essays, Rousseau's Confessions, Woolf's A Sketch of the Past, Styron's Darkness Visible, Wurtzel's Prozac Nation, Spiegelman's Maus, and Satrapi's Persepolis. **Prerequisite(s):** One 100-level English course or a score of 5 on the AP English Language or Literature and Composition test. **CC:** HUL, HUM, WAC

EGL 276 - Literature of the Manor House

Course Units: 1.0 (**Winter: Burkett**) In this course we will investigate the rich and complex history of the genre of English manor house fiction. Focusing on texts ranging from Jane Austen's Northanger Abbey and E. M. Forster's Howards End to Kazuo Ishiguro's The Remains of the Day, Sarah Waters' The Little Stranger, and Ian McEwan's Atonement, we will explore issues of gender, sexuality, race, and especially class in both course readings and class discussions. Furthermore, we'll examine a number of filmic representations of British country house life, including Robert Altman's Gosford Park and Julian Fellowes's Downton Abbey. In addition to crafting course papers, students will have the option to research, create, and showcase their own multi-media projects exploring virtual manor homes via a range of freely downloadable programs and platforms.

Prerequisite(s): One 100-level English course or a score of 5 on the AP English Language or Literature and Composition test. **CC:** HUL, HUM, WAC

EGL 277 - Philosophical Fiction

Course Units: 1.0 (**Not Offered this Academic Year**) This course will deal with works of fiction in which philosophy or philosophical concepts play a significant role. A key issue is the relationship between ideas and (literary) form. Authors will come from a wide range of traditions and may include Descartes, Rousseau, Wordsworth, Nietzsche, Camus, Dostoevsky, Borges, Calvino, Lem, and Le Guin. **Prerequisite(s):** One 100-level English course or a score of 5 on the AP English Language or Literature and Composition test. **CC:** HUL, HUM

EGL 278 - Science Fiction

Course Units: 1.0 (**Not Offered this Academic Year**) A survey of science fiction, focusing primarily on novels written after World War II. Topics covered may include: visions of dystopia, alternate histories, models of gender, fears of technology, and new views of race and sexuality. Likely authors include Asimov, Clarke, Lem, Dick, Herbert, LeGuin, Delany, Butler, and Gibson. Film may also be a significant component of the course. Possible directors include Kubrick, Spielberg, Cronenberg, Gilliam, and Scott. **Prerequisite(s):** One 100-level English course or a score of 5 on the AP English Language or Literature and Composition test. **CC:** HUL, HUM

EGL 279 - Literature and Science

Course Units: 1.0 (**Not Offered this Academic Year**) An interdisciplinary examination of the interactions between literature and science. Topics will vary from year to year and may include science writing, the representation of science and scientists in literature, literature inspired by science, literature and science as competing ways of knowing the world, the figurative dimension of scientific writing, and speculative fiction.

Prerequisite(s): One 100-level English course or a score of 5 on the AP English Language or Literature and Composition test. **CC:** HUL, HUM

EGL 280 - Nature and Environmental Writing

Course Units: 1.0 (**Spring: Lynes**) This course will focus on the traditions of nature and environmental writing in the American context, with an emphasis on the social and cultural dynamics of the environment and environmental action. Among other questions, we will ask ourselves: How do class, gender, and race enter into the nexus of social interactions that shape our environment? What is the place of literature in community, literacy, and environmental activism? What are the connections between the ways we speak and write about the environment and our actions toward the environment? How does the wilderness concept affect the ways citizens have access to public spaces? We will consider the concept of "nature" as we move through the course, culminating (if you like) with some nature writing of your own. Readings may include Thoreau; Carson; Leopold; Kingsolver, and selections from Reading the Roots: American Nature Writing Before Walden; Colors of Nature; Lauret Savoy, Trace: Memory, History, and the American Landscape; and F. Marina Schaffler, Turning to Earth: Stories of Ecological Conversion. **Prerequisite(s):** One 100-level English course or a score of 5 on the AP English Language or Literature and Composition test. **CC:** HUL, HUM, WAC

EGL 281 - Environmental Psychology and the American Literary Landscape

Course Units: 1.0 (**Not Offered this Academic Year**) Environmental research psychologist Maria Vittoria Giuliani emphasizes that human-to-place attachments "not only permeate our daily life but very often appear also in the representations, idealizations and expressions of life and affect represented [in] literature." Indeed, many literary works emphasize humanity's basic attachment needs and the importance person-to-place bonds have in the development of the human psyche. American fiction writers frequently employ descriptions of American landscapes as inspiration for character and plot development, and American nature writers often emphasize the way in which wilderness environments may influence one's mental and physical health and emotional well-being. In fact, recent studies in the field of cognitive neuroscience provide empirical evidence to substantiate the theory that exposure to a natural environment may actually generate structural changes in the brain by increasing oxygenation and blood flow that occur in response to neural activity. Hence, this course will employ contemporary studies in place attachment, environmental psychology, and cognitive neuroscience to examine the way in which various literary works illustrate the important role environment plays in aiding or obstructing one's ability to think, reason, remember, problem-solve, process information, use language, or be creative. **Prerequisite(s):** One 100-level English course or a score of 5 on the AP English Language or Literature and Composition test. **CC:** HUL, HUM, WAC

EGL 282 - The Theory of Things: Objects, Emotions, Ideas

Course Units: 1.0 (**Not Offered this Academic Year**) Everybody wants things, needs things, likes things, loves things! Things drive economies, incite wars, save lives; things help us communicate, work, play, move, talk, not talk, and so much more. The theory of things derives from humanity's interest in material culture studies and the connections that can be made between people and physical objects. But there is so much more to consider when discussing 'things,' such as those things that are not physical objects-love, hate, desire, thoughts, feelings, moods, pain, concepts, ideas, and words, just to name a few. In this course, students will discuss both material and immaterial 'things' and in particular how 'things' affect people, predominantly marginalized individuals and groups. *Course developed with support from the Byron A. Nichols Fellowship for Faculty Development. **Prerequisite(s):** One 100-level English course or a score of 5 on the AP English Language or Literature and Composition test. **CC:** HUL, HUM, WAC

EGL 283 - Pilgrims, Flaneurs, & Pranksters: The Walk in Literature

Course Units: 1.0 (**Spring: McAuliffe**) From the poems of William Wordsworth to contemporary novels such as Teju Cole's *Open City*, literary narratives often feature journeys taken on foot. Among other things, a walk, in literature, can structure plot, serve as metaphor, or anchor a stream-of-consciousness narrative within a physical setting. A walker, like a reader, is a consumer of sights. But she is also a producer of thoughts, words, and creative pathways through the world. In this course we will investigate the relationships between walking, thinking, reading, and writing, considering the ways we move through spaces (natural, urban, public, solitary) and the forces and questions that shape our experiences in those spaces. Our texts will include standard novels and essays, as well as work by walking artists like Richard Long, audio-video artist Janet Cardiff, and street artists, for whom the world is the page and the walker is the reader. You will write traditional academic papers, but we will also walk, and some assignments will encourage you to create walking texts of your own. **Prerequisite(s):** One 100-level English course or a score of 5 on the AP English Language or Literature and Composition test. **CC:** HUL, HUM

EGL 286 - Transnational Literature, Film, and Theory

Course Units: 1.0 (**Not Offered this Academic Year**) While modern colonialism dating back to the 18th century brought the entire globe into contact, the nation-state remained the relevant unit of culture. Unprecedented levels of migration and technological development in the past century, however, have made it impossible to ignore the fact that we are now living in a thoroughly transnational world-a new world order whose contours we yet barely grasp. How do social identity formations shift when nation-state boundaries are challenged? What sorts of new ethical dilemmas and self-other relations are engendered? Is anti-colonialism, staged as it was in the theater of national liberation, de-fanged or enabled by transnationalism? What new aesthetic forms and modes are generated by transnationalism; and how do cosmopolitans, exiles, diasporics, hybrids, and long-distance nationalists affect the field of culture? These are among the questions we will examine over the course of the term through the complementary lenses of film, literature, and theory. **Prerequisite(s):** One 100-level English course or a score of 5 on the AP English Language or Literature and Composition test. **CC:** HUL, HUM, WAC

EGL 287 - Gender and Sexuality in Film

Course Units: 1.0 (**Not Offered this Academic Year**) This course examines the intersecting roles played by gender and sexuality in our media, with particular emphasis placed on film and video. Over the course of the semester, we will investigate the ways in which various media texts transmit and construct gender and sexuality and how viewers interpret and integrate these representations into their daily lives. As we analyze films by such directors as Alfred Hitchcock, Douglas Sirk, Julie Dash, Trinh T. Minh-ha, and Jonathan Caouette we will explore the ways in which conceptions of gender and sexuality are facilitated and constrained by legal, medical, and ethical discourses that emerge from specific historical and geographic contexts. **Prerequisite(s):** One 100-level English course or a score of 5 on the AP English Language or Literature and Composition test. **CC:** HUM, WAC

EGL 288 - Film as Fictive Art: American Independent Cinema

Course Units: 1.0 (**TBD: Staff**) What exactly does the designation "indie" mean when both filmmakers who disseminate their work online and specialized divisions within Hollywood studios claim this term as their own? In this course we will trace the development of the independent cinema from the late 1960s when first-time directors challenged Hollywood norms to create the New American Cinema, through its heyday the 1990s, into the present era-where many argue it has become thoroughly institutionalized. In examining the enormously flexible characterization "independent" we will draw on a variety of code systems (cultural, artistic, narrative, cinematic, and intertextual) to analyze the work of such directors as George Romero, Julie Dash, Todd Haynes, Mira Nair, Jim Jarmusch, Spike Lee, and Kelly Reichardt. Counts for: Film Studies, AMS. **Prerequisite(s):** EGL 100 or EGL 101 or EGL 102 or a grade of 5 on the AP English Literature or Language test. **CC:** HUL, HUM, WAC

EGL 289 - Studies in a Major Film Director

Course Units: 1.0 (**Not Offered this Academic Year**) This course provides a close viewing of a variety of films from across a single director's career, paying particular attention to continuities of theme, style, and structure. Each incarnation of the course will feature a different director. **Prerequisite(s):** One 100-level English course or a score of 5 on the AP English Language or Literature and Composition test. **CC:** HUM

EGL 290 - Studies in Film Genre/Style: Documentary

Course Units: 1.0 (**Not Offered this Academic Year**) Documentary films and reality television shows have become more prevalent than ever. Documentary images pervade intimate spheres of our lives through cellphones, YouTube, and a variety of other screen interfaces, engendering powerful affective forces driving everything from humanitarian aid to global political agendas. Why this increased interest in the documentary form? Traditionally, the documentary has tended to emerge during crisis situations, often reflecting and commenting on past and present social and political unrest. Over the course of the term we will examine documentarians' search for appropriate forms to provoke discussion of social content. We will investigate the myth of documentary authenticity as well as controversial epistemological and ethical claims bound up with the genre. **Prerequisite(s):** One 100-level English course or a score of 5 on the AP English Language or Literature and Composition test. **CC:** HUM

EGL 291 - From the Drama Desk: Performance, Culture & Creativity

Course Units: 1.0 (**TBD: Staff**) This is an intensive and practical course on reading and writing dramatic criticism. A look at the concepts and practices of theatre criticism in American Theatre begins with a discussion of major theories of Western drama, from Aristotle to Artaud. Through the reading and discussion of contemporary examples of dramatic criticism and directed studies in techniques of journalistic writing students will gain an understanding of the nature and function of a theatre review and an ability to critically view theatre productions. Writing will include research essays, response papers and critical reviews of play scripts as well as performances on campus and at professional theatres. **Cross-Listed:** ATH 240 **CC:** HUM, LCC

EGL 292 - Special Topics in Theater: Contemporary American Theater

Course Units: 1.0 (**Not Offered this Academic Year**) This course examines trends and notable works visible today in the American theatre. We will read plays that have had major successes on Broadway and American regional theatres, as well as study avant-garde works and theatrical and performance artists engaging with new forms and techniques in order to transform theatrical performance in our culture today. Through class discussions and assignments including student presentations, seeing professional theatrical performances, research projects, and critical essays, students will develop their ability to engage critically with theatrical art and artists of our present moment. **Cross-Listed:** ATH 105 **CC:** HUM

EGL 293 - Workshop in Poetry

Course Units: 1.0 (**Fall: Smith**) This is a course for students with a serious interest in writing poetry. Classes will be divided between discussions of literary technique, workshop critiques of student writing, and consideration of the work of several contemporary poets. Students will prepare a final portfolio of ten to fifteen pages. **Prerequisite(s):** One 100-level English course or a score of 5 on the AP English Language or Literature and Composition test. **CC:** HUL, HUM, WAC

EGL 294 - Workshop in Fiction

Course Units: 1.0 (**Winter: McAuliffe**) This is a course for students with a serious interest in writing fiction and imaginative prose. We'll read and discuss plenty of contemporary fiction, with a particular focus on the short story, considering each piece from a writer's perspective: How is it put together? What makes it unique and interesting? How and what can we learn or steal from it for our own writing? Students will put into practice what we discover in our reading, developing skills at building characters, exploring narrative form, and honing their use of image and voice. Students will complete and revise a variety of exercises and creative pieces, including three short stories. Much of class time will be devoted to workshop discussion of student stories. **Prerequisite(s):** One 100-level English course or a score of 5 on the AP English Language or Literature and Composition test. **CC:** HUL, HUM, WAC

EGL 295 - Workshop in Creative Non-Fiction

Course Units: 1.0 (**Not Offered this Academic Year**) A first course in the writing of nonfiction prose, emphasizing critiques of student work and workshop-like critiques of such nonfiction stylists as Didion, Dillard, Emerson, D'Agata, Sebald, Montaigne. We will focus on point of view, pacing, tone, and other such prose techniques. Students will write and revise several short pieces, only one of which may be autobiographical.

Prerequisite(s): One 100-level English course or a score of 5 on the AP English Language or Literature and Composition test. **CC:** HUL, HUM, WAC

EGL 295H - English Honors Independent Project 1

Course Units: 0.0 (**TBD: Staff**) Requires faculty approval - credit earned upon completion of EGL 296H

EGL 296H - English Honors Independent Project 2

Course Units: 1.0 (**TBD: Staff**) **Prerequisite(s):** EGL 295H

EGL 297 - Literary Research Practicum 1

Course Units: 0.0 (**TBD: Staff**) The English research practicum is designed to allow students to engage in advanced literary research during their undergraduate careers. Students will work on the research project of a faculty member, under that faculty member's direction. This course requires advance permission of the instructor, who sets the course requirements. To receive Pass/Fail credit equivalent to one course, the student must earn passing grades for three terms of the practicum experience. **Prerequisite(s):** One 100-level English course or a score of 5 on the AP English Language or Literature and Composition test.

EGL 298 - Literary Research Practicum 2

Course Units: 0.0 (**TBD: Staff**) The English research practicum is designed to allow students to engage in advanced literary research during their undergraduate careers. Students will work on the research project of a faculty member, under that faculty member's direction. This course requires advance permission of the instructor, who sets the course requirements. To receive Pass/Fail credit equivalent to one course, the student must earn passing grades for three terms of the practicum experience. **Prerequisite(s):** One 100-level English course or a score of 5 on the AP English Language or Literature and Composition test.

EGL 299 - Literary Research Practicum 3

Course Units: 0.0 (**TBD: Staff**) The English research practicum is designed to allow students to engage in advanced literary research during their undergraduate careers. Students will work on the research project of a faculty member, under that faculty member's direction. This course requires advance permission of the instructor, who sets the course requirements. To receive Pass/Fail credit equivalent to one course, the student must earn passing grades for three terms of the practicum experience. **Prerequisite(s):** One 100-level English course or a score of 5 on the AP English Language or Literature and Composition test.

EGL 300 - Jr. Seminar: Poetry Workshop

Course Units: 1.0 (**Spring: Smith**) A workshop course for students with some experience and a serious interest in the writing of poetry.

Prerequisite(s): It is strongly recommended, although not required, that students have already taken EGL 293 . One 100-level and two 200-level English courses or instructor's permission. **CC:** HUL, HUM, WAC

EGL 301 - Jr. Seminar: Fiction Workshop: Writing Activist Fiction

Course Units: 1.0 (**Not Offered this Academic Year**) "It seems to me," writes Toni Morrison, "that the best art is political, and you ought to be able to make it unquestionably political and irrevocably beautiful at the same time." In this section of fiction workshop, Morrison's statement will serve as our central challenge. We'll read and write fiction that considers issues of social and environmental justice and/or aims to inspire social change. How do fiction writers use their work to address the issues most important to them? What moves, excites, or incites readers in unquestionably political, irrevocably beautiful fiction? How do we integrate our personal viewpoints, knowledge, experiences, and politics with artful expression and entertainment? Why and when does such writing sometimes earn the dismissive labels of "one-dimensional" or "didactic?" This workshop course is intended for students with some experience and an interest in writing fiction, including that which addresses social and environmental issues. Most of the course will be devoted to workshop critiques of students' stories. Students will be asked to write at least three stories outside of class, as well as several in-class exercises; to write one or more essays on published works of fiction; and to provide both written and oral critiques of classmates' work. **Prerequisite(s):** It is strongly recommended that students have already taken EGL 294. One 100-level and two 200-level English courses or instructor's permission. **CC:** HUL, WAC, HUM

EGL 302 - Jr. Seminar: Literary Theory

Course Units: 1.0 (**Winter: Mitchell**) Reading involves more than just the reader and the text; when we read, our cultural and personal experiences inform our reading. This course considers different critical approaches to literature—from the history of English as a discipline onward - in an attempt to help contextualize reading practices. We will read primary critical texts, primary literary texts, and examples of literary criticism. We will discuss various schools of literary criticism, including (but not limited to) Structuralism, Post-structuralism, Marxism, Psychoanalysis, Feminism, Queer Theory, Disability Studies, Postcolonial Theory, and Critical Race Theory. By the end of the semester, students will be able to use appropriate terminology, produce critically informed readings, and speak authoritatively about different critical approaches to literature. This course prepares majors and ID majors to apply to write Honors theses. **Prerequisite(s):** It is strongly recommended that petitioning students have GPA's of 3.3 or above. One 100-level and two 200-level English courses. **CC:** HUL, HUM, WAC

EGL 304 - Jr. Seminar (Fall): The Faerie Queene

Course Units: 1.0 (**Fall: Wareh**) This course will explore Edmund Spenser's wild and wacky epic poem, *The Faerie Queene*. Published in 1596, *The Faerie Queene* is full of powerful women, knights, dragons, monsters, and more; its rich cast includes both Queen Elizabeth I and a young King Arthur. In depicting a world full of chivalry and adventure, this poem offers striking insights into how Shakespeare's contemporaries understood their society and themselves. Full of beautiful lyrics, comedy, and tragedy, *The Faerie Queene* shows the many different possibilities for thinking about how Renaissance readers viewed the relationship between poetry and social identity. This poem is thus a fascinating window into Renaissance society even as it explores issues still relevant today, from questions about female agency to religious prejudice to class and social conflict. Students will be offered guidance in developing their own projects to explore *The Faerie Queene*, and the focus of the class discussions will be determined by student interests. Note: This particular seminar may alternatively count as pre-1700 credit. **Prerequisite(s):** One 100-level and two 200-level English courses or instructor's permission. **CC:** HUL, HUM, WAC

EGL 305 - Jr. Seminar (Winter)

Course Units: 1.0 (**Not Offered this Academic Year**) **CC:** HUL, HUM, WAC

EGL 306 - Jr. Seminar (Spring): Collecting Ourselves: Women Writers of the Harlem Renaissance

Course Units: 1.0 (**Spring: Lynes**) We will examine the literature and social context of women writers of the Harlem Renaissance (~1918-1940), using ethnographic and museum theories of the early 20th century. We will explore the relationships between literature and social politics, cultural collection, community, and representation as we research editorial decisions about and framework of literature in a collection of literature; claims to culture and social change through literature; the dynamics of gender roles in the construction and re-construction of the culture concept; and representations of self and community in public art forms. **Cross-Listed:** GSW 495 **Prerequisite(s):** One 100-level and two 200-level English courses or instructor's permission. **CC:** HUL, HUM, WAC

EGL 400 - Sr. Seminar: Poetry Workshop

Course Units: 1.0 (**Not Offered this Academic Year**) An advanced workshop course in the writing of poetry. **Prerequisite(s):** It is strongly recommended that students have already taken EGL 293 , EGL 300 . Six English courses or instructor's permission. **CC:** HUL, HUM, WS

EGL 401 - Sr. Seminar: Fiction Workshop

Course Units: 1.0 (**Not Offered this Academic Year**) An advanced workshop course in the writing of fiction. **Prerequisite(s):** It is strongly recommended that students have already taken EGL 293 , EGL 301 . Six English courses or instructor's permission. **CC:** HUL, WS

EGL 402 - English Honors Thesis Seminar 1

Course Units: 0.0 (**Fall: Bracken**) A two-term course required for all English majors who are writing an honors senior thesis. The course is conducted mainly as a writing workshop to guide students through the process of writing a thesis. Workshops focus on developing the research and writing skills needed to complete a successful thesis. There will be weekly individual meetings with the instructor as well as weekly group meetings. The course instructor will direct your thesis. Credit depends on completing both 402 and 403. **CC:** HUL, WS

EGL 403 - English Honors Thesis Seminar 2

Course Units: 2.0 (**Fall: Bracken**) A two-term course required for all English majors who are writing an honors senior thesis. The course is conducted mainly as a writing workshop to guide students through the process of writing a thesis. Workshops focus on developing the research and writing skills needed to complete a successful thesis. There will be weekly individual meetings with the instructor as well as weekly group meetings. The course instructor will direct your thesis. **CC:** HUL, WS

EGL 404 - Sr. Seminar (Fall)

Course Units: 1.0 (**Not Offered this Academic Year**) **Prerequisite(s):** Six English courses or instructor's permission. **CC:** HUL, WS

EGL 405 - Sr. Seminar (Winter): Hardy's Women

Course Units: 1.0 (**Winter: Murphy**) According to Thomas Hardy biographer, Claire Tomalin, Hardy's relationship with "strong-minded and intelligent women" began with his mother, Jemima Hand Hardy. As Tomalin argues, Jemima and both of Hardy's grandmothers "had flouted the rules on sexual behavior laid down by the Church and gentry." In this course we will trace the way in which Hardy's early encounters with these fundamentally important maternal figures affected his life and work, his two marriages, and his fictional representations of women and male and female relationships. We will employ several theoretical approaches- intersectionality, masculinity studies, queer theory, and affect theory- in our readings of three of Hardy's novels, *Far from the Madding Crowd* (1874), *Tess of the d'Urbervilles* (1891), and *Jude the Obscure* (1895), as well as a variety of poems Hardy wrote after the death of his first wife, Emma, in 1912. We will also consider feminist approaches to film analysis, as we view scenes from various cinematic adaptations of the novels under discussion. *This particular seminar may alternatively count as pre-1900 credit for English majors. **Prerequisite(s):** Six English courses or instructor's permission. **CC:** HUL, HUM, WS

EGL 406 - Sr. Seminar (Spring): The Lyric Essay

Course Units: 1.0 (**Spring: McAuliffe**) In this seminar, we will read and write creative nonfiction, a broad category that includes memoir and personal essay, literary journalism, travel writing, micro-essays (or flash nonfiction). Our focus will be particularly on lyric essays, a contemporary form that draws from and combines poetry, memoir, research writing, and the personal essay and plays inventively with fragments, juxtaposition, and association to artfully build narrative and argument. Readings will include texts such as Claudia Rankine's *Citizen*, Maggie Nelson's *Bluets*, Valeria Liusselli's *Tell Me How It Ends*, and essays by Anne Carson, Dinty Moore, and Eula Biss. Assignments will include writing exercises and research that will lead to complete essays, and much of our class time will be spent discussing student work. **Prerequisite(s):** Six English courses or instructor's permission. **CC:** HUL, HUM, WS

EGL 490 - English Independent Studies 1

Course Units: 1.0 (**TBD: Staff**) Directed reading and research on arranged topics. By permission of department chair, after a petition submitted in the fifth week of the previous term.

EGL 491 - English Independent Studies 2

Course Units: 1.0 (**TBD: Staff**) Directed reading and research on arranged topics. By permission of department chair, after a petition submitted in the fifth week of the previous term.

EGL 496 - English Senior Thesis 1

Course Units: 0.0 (**TBD: Staff**) Two-term senior thesis. For use by ID English majors who do not meet the requirements for an English Honors thesis but who are required to complete a two-term interdepartmental thesis by their other ID department.

EGL 497 - English Senior Thesis 2

Course Units: 2.0 (**TBD: Staff**) Two-term senior thesis. For use by ID English majors who do not meet the requirements for an English Honors thesis but who are required to complete a two-term interdepartmental thesis by their other ID department. **CC: WS**

Environmental Science, Policy and Engineering

ENS 100 - Introduction to Environmental Studies

Course Units: 1.0 (**TBD: Staff**) An introduction to environmental studies from a scientific, policy, and engineering perspective. This course covers human-environment interactions, with a focus on the impacts of human activities on natural systems such as climate, air, water, and species diversity and the ensuing environmental injustice. The course discusses sustainable solutions for how we can build systems that will support billions of humans and the natural world. Fieldwork during lab periods involves the investigation of local environmental problems and solutions. This course is intended for first- and second-year Environmental Science and Environmental Policy majors, but it is open to all students. **Corequisite(s):** ENS 100L **CC: SCLB**

ENS 200 - Energy

Course Units: 1.0 (**TBD: Staff**) Designed to acquaint the student with the many societal and technological problems facing the United States and the world due to the ever increasing demand for energy. **Corequisite(s):** ENS 200L **Lecture/Lab Hours** One lab per week.

ENS 204 - Geographic Information Systems

Course Units: 1.0 (**TBD: Staff**) An introduction to Geographic Information Systems (GIS) technology and its practical uses. Topics include history of GIS, geographic data types, primary data structures, system design, map coordinate systems, data sources, metadata, census data, geographic coding and address matching, digitizing, remote sensing imagery, measures of data quality, and needs assessment. An emphasis will be on hands-on instruction using GIS software (ArcView). Students will work with ArcView throughout the term to complete assignments and a class project. Focus areas include archeology, electric and gas utilities, surveying, health and human services, insurance, law enforcement and criminal justice, media and telecommunications, transportation, water and wastewater, and natural resources. The ultimate goal is to use the spatial component of data in conducting analysis and making decisions. **Prerequisite(s):** A good background in the use of modern computer software. **Corequisite(s):** ENS 204L **CC: SET Lecture/Lab Hours** Two class hours and two lab hours weekly.

ENS 208 - Waste Management and Recycling

Course Units: 1.0 (**TBD: Staff**) This course will introduce students to various sources of solid waste materials including hazardous and nonhazardous waste, and biodegradable and non-biodegradable waste. Focus areas are overview of landfill systems, geosynthetics, geotextiles, geomembranes, geonets, single clay liner, single geomembrane liner, composite liner systems, leak detection and leachate collection, removal and treatment of leachate, and capping and closure systems. The recycling segment will explore natural resources of raw materials including origin and use. It will also investigate the potential and limitation for recycling of materials. The focus area will be various applications of recycling recyclable and nonrecyclable materials especially non-biodegradable waste. Discussion of methods of manufacture and compositions of such materials will concentrate on advanced industrial applications for the reuse of non-recyclable waste materials. Application areas include production of new materials, materials with superior qualities for special purposes, and materials with high level of resistance against certain environmental conditions. The course will also touch on the political aspect of recycling including consumer attitude and government incentives to encourage recycling. **Prerequisite(s):** ENS 100 or GEO 110 **CC: SET**

ENS 209 - Renewable Energy Systems

Course Units: 1.0 (**TBD: Staff**) The study of renewable energy resources and the conversion technologies available to utilize them to meet society's energy needs. Topics include forms of energy; First and Second Laws of Thermodynamics; energy conversion and efficiency; sustainability; energy storage. Historical perspective on world and U.S. energy usage, conversion technologies, and energy resources. Fundamentals of the conversion processes and systems involved in the use of solar thermal and photovoltaic, wind, bioenergy, geothermal, thermoelectric, hydro and ocean technologies. The use of hydrogen as a fuel and technologies to produce and use it. Economic and environmental issues relevant to renewable energy resources. Class will be supplemented with laboratory demonstrations and field trips to visit existing renewable energy systems. **Prerequisite(s):** MER 231 or PHY 122 **Corequisite(s):** ENS 209L **CC:** SET

ENS 210 - Groundwater Hydrology

Course Units: 1.0 (**TBD: Staff**) Groundwater accounts for 97% of the available freshwater on earth and is a vital source of water for household, industrial, and agricultural uses worldwide. The well-being and prosperity of human civilization requires the sound stewardship and sustainable use of our groundwater supplies. In addition to serving as an essential resource for humanity, groundwater plays a central role in many environmental and geologic processes, including the maintenance of river flows between rainfall events, the occurrence of earthquakes, and the genesis of certain types of ore deposits and landforms. Groundwater is also a key consideration in many engineering operations such as the construction of dams and tunnels and the assessment of landslide and land subsidence risk. Groundwater hydrology is a highly interdisciplinary field that brings together the geologic and environmental sciences with engineering. This course will begin by exploring the physical properties of groundwater and the geologic media through which it flows, the physical laws that govern groundwater flow and transport, and techniques for modeling groundwater flow patterns. The mid-part of the course will focus on the engineering aspects of groundwater, covering topics such as the hydraulics of pumping wells, the transport of contaminants within aquifers, the remediation of contaminated aquifers, and well-drilling technology. Later we will cover the role groundwater plays in geologic processes and the role of geology in determining groundwater chemistry and quality. We will also discuss the connections between groundwater and human health and the importance of groundwater in the global food supply. Students will leave this course with the fundamental knowledge needed to begin answering scientific and engineering questions in the fascinating world of groundwater hydrology. **Cross-Listed:** GEO 210 **Prerequisite(s):** ENS 100 or any GEO course numbered 110 or higher. **CC:** SCLB **Lecture/Lab Hours** One lab per week.

ENS 215 - Exploring Environmental Data

Course Units: 1.0 (**TBD: Staff**) Understanding how the Earth and environment works requires the careful analysis and interpretation of scientific data. Increasingly, the limitations to our understanding lie not in the availability of data, but rather in our ability to analyze and find meaning in it. Deriving insight from environmental data, in particular large and complex datasets, requires new tools, methods, and ways of thinking. In this class we are going to learn how to code in the programming language R and use it to analyze environmental data in order to better understand the Earth's systems. This course will feature a hands-on classroom with programming and data analysis occurring interactively during the class. Students will learn how to analyze and visualize large datasets and how to write code, while also covering interesting components of environmental and Earth sciences. **Prerequisite(s):** Any SET or SCLB. **CC:** SCLB, QMR **Lecture/Lab Hours** Lecture/Lab Hours Weekly lab required.

ENS 222 - The New Wall of China

Course Units: 1.0 (**TBD: Staff**) **Cross-Listed:** MLT 209 **CC:** LCC, SET, HUM

ENS 247 - Sustainable Infrastructure

Course Units: 1.0 (**TBD: Staff**) Infrastructure is the backbone of nations. It is a society's inventory of systems and facilities that allow it to function properly and smoothly. This includes, but is not limited to, roads, bridges, tunnels, dams, transit, waterways, ports, aviation, pipelines, transmission lines, rail, parks, and public buildings such as schools, courts, hospitals, and recreational and sport facilities. Infrastructure involves also services such as energy, water supply, wastewater treatment, power and gas distribution grids, waste collection, and sewer disposal. Major advances in technology resulted in digital infrastructure that includes communication networks, signal transmission towers, data centers, information repositories, servers/computers, and the Internet. This course explores the progress humanity achieved in developing infrastructure facilities and the present move towards sustainability. Methods, materials, processes, technologies, practices, and operations required to maintain a healthy environment and efficient infrastructure will be examined. The intersection between policies necessary for sustainable infrastructure and political, economic, social, societal, and cultural factors will be emphasized. **CC:** SET **Lecture/Lab Hours** Four class hours weekly.

ENS 252 - Geoenvironmental Applications

Course Units: 1.0 **(TBD: Staff)** This course introduces field applications related to soil and water. It explores the natural characteristics and testing of soil as a construction material and as a bearing layer. It covers seepage analysis, aquifers, and well fields. It details the components of containment systems for waste disposal to alleviate environmental pollution and contamination. It also presents the basics of water movement in closed conduits and in open channels, and the development of supply networks. For labs, students gain experience in utilizing industry-standard testing methods of the American Society for Testing and Materials (ASTM). Tests include soil classification, composition, flow and permeability, compaction, compressibility, strength, slope stability, and environmental geotechnology with focus on the Environmental Protection Agency's (EPA) design specifications. **Prerequisite(s):** MTH 112 or higher, and PHY 120 or higher. **Corequisite(s):** ENS 252L **CC:** SCLB **Lecture/Lab Hours** Three class hours and a weekly lab.

ENS 253 - Environmentally Friendly Buildings

Course Units: 1.0 **(TBD: Staff)** A large percentage of energy consumption and negative effect on environment is attributable to buildings and their use. In this course, through hands-on experience, computer simulation and research, the students will become acquainted with the inner-workings of the subsystems in buildings, such as: Structures, lighting and appliances, heating/air-conditioning, plumbing, basement/crawl space/attic, water and moisture management; enclosure, interior, exterior. The students will become aware of indoor and outdoor environmental and life cycle costs of the existing systems and will learn the latest science and technology to reduce the negative effect of these subsystems on the environment. Laboratory: hands-on experience with the above subsystems, site visits, Computer simulations, research, projects, presentations. **Corequisite(s):** ENS 253L **CC:** SET

ENS 277 - The Water Paradox

Course Units: 1.0 **(TBD: Staff)** Fresh water is tasteless, odorless, and colorless. These characteristics make water one of the most intriguing materials. It is a necessity for life. A paradox involves features or qualities of contradictory nature. Water is notorious with such qualities. Water is one of the cheapest materials yet it is the most precious commodity known to humanity. Water could be the source of peace and development yet it could be a reason for war and conflict. Water could be a force for good to generate hydropower yet unchecked or unregulated this force could be in the form of destructive floods. Water could be a weapon to combat desertification yet too much thereof could cause erosion and failures. Floods come with loads of mud and silt that charge river deltas and keep them fertile yet weaker floods result in lesser deposits that could threaten river deltas with sea attacks. Water has always been a main reason for people to settle the land yet a shortage thereof could force people to migrate and leave their homeland. This course shows the role water played in the past, is presently playing, and will play in the future in defining communities and societies. **CC:** SET

ENS 291 - Construction for Humanity

Course Units: 1.0 **(TBD: Staff)** An interdisciplinary introduction to the technology of construction and the social uses of building by humans. The course will consider types of building materials and their application to domestic housing, castles, cathedrals, palaces, monuments, dams, bridges, tunnels, factories, and office buildings. **Cross-Listed:** HST 291 **CC:** SET

ENS 295H - Environmental Science & Policy Two Term Honors Independent Project 1

Course Units: 0.0 **(TBD: Staff)** **Prerequisite(s):** Union Scholar.

ENS 296H - Environmental Science & Policy Two Term Honors Independent Project 2

Course Units: 1.0 **(TBD: Staff)** **Prereq/Corequisite(s):** ENS 295H

ENS 299 - Environmental Forensics

Course Units: 1.0 **(TBD: Staff)** An interdisciplinary course that will present topics detailing the intersection between the environment, ethics, law, society, litigation, policy, economics, pollution/contamination, cleanup, testing, standards, and sustainability. Sources of environmental problems are usually related to emissions, pollution, contamination, and/or waste disposal. Whether the cause is intentional or non-intentional, natural factors or a man-made disaster, or due to normal operation or accident, a crisis ensues and cleanup becomes necessary. This inevitably leads to legal actions and litigations that rely on experts in conducting scientific investigations to establish the facts surrounding potential controversies. Topics discussed in the course include liability, environmental site assessment, insurance litigation, toxic torts, science tools, sampling & measurements, statistical analysis, chemical fingerprinting, contaminant transport models, and environmental forensic microscopy. The course will illustrate the above points using case studies. **CC:** SET

ENS 460 - Environmental Science & Policy Senior Seminar

Course Units: 1.0 (**TBD: Staff**) This capstone course for the environmental science and policy program brings together the expertise and experience of all environmental science and policy seniors to study contemporary environmental issues, usually related to a single topic or small number of topics. Issues may include legal cases, legislation and regulation, application of technology to social problems, and national and global environmental policy. Class time may include discussion, debate, field trips, class presentations, and outside speakers. Research and presentation of findings will be stressed. **Prerequisite(s):** Senior standing; Environmental Policy or Environmental Science Major

ENS 490 - Environmental Science & Policy Independent Study 1

Course Units: 1.0 (**TBD: Staff**) Independent work on an environmental topic of particular interest under the direction of a faculty advisor. **Prerequisite(s):** Permission of the instructor.

ENS 491 - Environmental Science & Policy Independent Study 2

Course Units: 1.0 (**TBD: Staff**) Independent work on an environmental topic of particular interest under the direction of a faculty advisor. **Prerequisite(s):** Permission of the instructor.

ENS 497 - Environmental Science & Policy Senior Research

Course Units: 1.0 (**TBD: Staff**) Senior-level independent research on an environmentally related topic. Substantial writing is required for ENS 497 (must satisfy WAC-WS requirements, for which WS credit is awarded). Topics are chosen in consultation with, and conducted under the direction of the student's senior research advisor. The results of senior research are presented to an audience of faculty members and peers. **Please note: This option is not open to environmental policy majors. Prerequisite(s):** Senior standing in the environmental science program and permission of the project advisor. **CC:** WS

ENS 498 - Environmental Science & Policy Research 1

Course Units: 0.0 (**TBD: Staff**) Senior-level research on an environmentally-related topic. Work may take the form of two independent study term projects, or as a two-term senior thesis. Topics are chosen in consultation with and conducted under the direction of the student's advisor. Thesis research must follow the guidelines of the host department. The results of senior research are presented in the senior seminar. **Prerequisite(s):** Senior standing in the environmental studies program and permission of the instructor.

ENS 499 - Environmental Science & Policy Research 2

Course Units: 2.0 (**TBD: Staff**) Senior-level research on an environmentally-related topic. Work may take the form of two independent study term projects, or as a two-term senior thesis. Topics are chosen in consultation with and conducted under the direction of the student's advisor. Thesis research must follow the guidelines of the host department. The results of senior research are presented in the senior seminar. **Prerequisite(s):** Senior standing in the environmental studies program and permission of the instructor. **CC:** WS **Note:** Substantial writing is required (must satisfy WAC-WS requirements, for which WS credit is awarded).

Engineering

ESC 100 - Exploring Engineering

Course Units: 1.0 (**TBD: Staff**) An introduction to engineering including fundamental topics core to engineering. The course includes a weekly design studio that emphasizes engineering design, teamwork, technical writing and ethics through several individual and team design projects. Not available to junior or senior engineering students. **Corequisite(s):** ESC 100L **CC:** SET **Note:** General engineering course common to more than one program.

ESC 224 - Frontiers of Nanotechnology and Nanomaterials

Course Units: 1.0 (**TBD: Staff**) An overview of nanotechnology and nanomaterials including interdisciplinary perspectives from engineering, materials science, chemistry, physics, and biology with emphases in sensors and actuators, nanoelectronics, alternative energy, nanocomposites, polymers, biomaterials and drug delivery **Prerequisite(s):** PHY 111 or PHY 121 or IMP 121; MTH 115; and CHM 101 or CHM 110H; or permission of instructor. **CC:** SET

ESC 324 - Advanced Topics in Nanoscience

Course Units: 1.0 (**TBD: Staff**) In-depth coverage of micro and nanoscale microscopy, including scanning electron microscopy and atomic force microscopy and their related modes and diagnostics methods. The course will feature special topics in nanoscience/nanotechnology, such as nanochemistry and structure/property relationships in select nanomaterial systems and/or biological nanomachines, self-assembly of bionanomaterials, and use of nanomaterials for biological sensors. **Prerequisite(s):** PHY 111 or PHY 121 or IMP 121 ; MTH 115; and CHM 101 or CHM 110; CHM 224 or ESC 224 or MER 213 ; or permission of instructor.

Film Studies

FLM 201 - Documentary Filmmaking

Course Units: 1.0 (**TBD: Staff**) For beginners to advanced, Documentary Filmmaking presents the foundations of non-fiction filmmaking: from camera and equipment use to interviewing techniques and storytelling strategies. While creating a short documentary on a subject of the student's choosing, participants will come to understand the interface between them and world around them through the filter of the camera. Students can work in a variety of documentary styles which are explained in class. These forms include the poetic, expository, observational and participatory form. The skills learned in this class are valuable across many disciplines and jobs which involve interpersonal relationships, media skills, research and working with subjects. The course counts toward the 6-course minor in Film Studies. **CC:** HUM

FLM 202 - Digital Filmmaking

Course Units: 1.0 (**TBD: Staff**) For beginners to advanced, Digital Filmmaking presents the foundations of fiction filmmaking: from lighting and camera work to editing, sound and working on set. In the first part of the course, students recreate scenes from well-known films. In the second part, students script and shoot their own short films. This class is appropriate for filmmaking newbies as well as for those who wish to deepen their understanding and practice of the craft. The skills learned in this class will help students gain a foundation in media skills increasingly in demand across many majors and in the job market. The course counts toward the 6-course minor in Film Studies. **CC:** HUM

FLM 303 - Cinematic Montage

Course Units: 1.0 (**TBD: Staff**) For beginners to advanced, Cinematic Montage explores the inner workings of fiction and non-fiction films. What are the elements that create a film's style or genre? How is rhythm employed in filming and editing? What are the techniques Hollywood uses to get, as they put it, "butts in seats?" In this class we deconstruct and reconstruct the mechanics of the filmmaking craft as students practice filmmaking elements in fun, weekly assignments. No prior experience needed. This class is helpful to develop analytical and media-critical tools useful across many majors and increasingly important in the media-connected job market. The course counts toward the 6-course minor in Film Studies. **CC:** HUM

FLM 490 - Film Project or Internship 1

Course Units: 1.0 (**TBD: Staff**) Film Studies Independent Study. May take form of independent film project. **Prerequisite(s):** At least two other film courses from the lists above and project proposal approved by the Program Directors. Also, upon consultation with Program Directors, a Film Studies-related internship may be arranged for credit toward the minor.

FLM 491 - Film Project or Internship 2

Course Units: 1.0 (**TBD: Staff**) Film Studies Independent Study. May take form of independent film project. **Prerequisite(s):** At least two other film courses from the lists above and project proposal approved by the Program Directors. Also, upon consultation with Program Directors, a Film Studies-related internship may be arranged for credit toward the minor.

FLM 492 - Film Project or Internship 3

Course Units: 1.0 (**TBD: Staff**) Film Studies Independent Study. May take form of independent film project. **Prerequisite(s):** At least two other film courses from the lists above and project proposal approved by the Program Directors. Also, upon consultation with Program Directors, a Film Studies-related internship may be arranged for credit toward the minor.

First-Year Preceptorial

FPR 100 - First-Year Preceptorial

Course Units: 1.0 (**TBD: Staff**) First-Year Preceptorial engages students in the exploration of ideas and diverse perspectives through critical reading, thinking, and writing. Note that students in the Scholars Program take Scholars Preceptorial (FPR 100H).

FPR 100H - Scholars Preceptorial

Course Units: 1.0 (**TBD: Staff**) Engages students in the exploration of ideas and diverse perspectives through critical reading, thinking, and writing.

French

FRN 100 - Basic French 1

Course Units: 1.0 (**Fall, Winter: Staff**) Basic skills for students who begin with no knowledge of French. **CC:** HUM

FRN 101 - Basic French 2

Course Units: 1.0 (**Winter, Spring: Staff**) A continuation of FRN 100 **Prerequisite(s):** FRN 100 or two years of secondary school French. **CC:** LCCF, HUM

FRN 102 - Basic French 3

Course Units: 1.0 (**Fall, Spring: Staff**) A continuation of FRN 101 , with introduction of readings. **Prerequisite(s):** FRN 101 or three years of secondary school French. **CC:** LCCF, HUM

FRN 200 - Intermediate French 1

Course Units: 1.0 (**Fall, Winter: Staff**) Intensive review and development of all language skills, with emphasis on vocabulary building, conversation, and composition. **Prerequisite(s):** FRN 102 or equivalent. **CC:** LCCF, HUM

FRN 201 - Intermediate French 2

Course Units: 1.0 (**Winter, Spring: Staff**) Continuation of extensive review and development, vocabulary building, conversation, and composition. **Prerequisite(s):** FRN 200 or equivalent. **CC:** LCCF, HUM

FRN 204T - The French Language Studied Abroad

Course Units: 1.0 (**Fall: Staff**) CC: LCCF **Note:** Fall term in Rennes

FRN 205T - The French Language Studied Abroad

Course Units: 1.0 (**Fall: Staff**) CC: LCCF **Note:** Fall term in Rennes.

FRN 206T - The French Language Studied Abroad

Course Units: 1.0 (**Fall: Staff**) CC: LCCF **Note:** Fall term in Rennes.

FRN 207T - The French Language Studied Abroad

Course Units: 1.0 (**Fall: Staff**) CC: LCCF **Note:** Fall term in Rennes.

FRN 208T - Contemporary France

Course Units: 1.0 (**Fall: Staff**) See Terms Abroad program. CC: LCCF **Note:** Fall term in Rennes.

FRN 250T - The French Language Studied Independently Abroad

Course Units: 1.0 (**TBD: Staff**) CC: LCCF

FRN 251T - The French Language Studied Independently Abroad

Course Units: 1.0 (**TBD: Staff**) CC: LCCF

FRN 295H - French Honors Independent Project 1

Course Units: 0.0 (**TBD: Staff**)

FRN 296H - French Honors Independent Project 2

Course Units: 1.0 (**TBD: Staff**)

FRN 300 - Modern France/La France actuelle

Course Units: 1.0 (**Spring: Ndiaye**) Studies of contemporary French culture through authentic material, texts, films, radio, and television broadcasts dealing with current historical, political, sociological, and aesthetic issues. CC: LCCF, HUM

FRN 301 - A Survey of French Literature 1

Course Units: 1.0 (**Not Offered this Academic Year**) The evolution of French literature from the earliest writings through the age of Enlightenment. Readings of major works from each period to illustrate trends. CC: HUL, LCCF, HUM

FRN 302 - A Survey of French Literature 2

Course Units: 1.0 (**Not Offered this Academic Year**) Selected works representing literature and society from the late eighteenth century to the present. Readings of works from each period to illustrate cultural, historical, and artistic trends. **Prerequisite(s):** FRN 201 , any 300-level or permission of instructor. CC: HUL, LCCF, HUM

FRN 303 - Advanced French

Course Units: 1.0 (**Not Offered this Academic Year**) Advanced language training for students who have completed the term abroad in Rennes or who have had similar experience. Examination of finer points of grammar, stylistics, and phonetics. **Prerequisite(s):** FRN 204T or equivalent. **CC:** LCCF, HUM

FRN 304 - Studies in the French Caribbean

Course Units: 1.0 (**Not Offered this Academic Year**) Exploration of how French colonialism has informed artistic expression in the French Antilles. Taking Martinique as a point of departure, we will examine how colonial and post-colonial subjects represent and are represented through literary, theatrical, and musical productions. Themes to include notions of negritude, creolite, and bilingualism, as well as issues of class and gender. **CC:** HUL, LCCF, HUM

FRN 305T - Mini-term in Martinique

Course Units: 1.0 (**Not Offered this Academic Year**) See Terms Abroad Program. Continuation of the themes of FRN 304, studied and experienced on the island of Martinique. **Prerequisite(s):** FRN 304 **CC:** LCCF

FRN 306T - Readings in French and Francophone Culture

Course Units: 1.0 (**Fall: Chilcoat**) See Terms Abroad Program. France and the French of today as reflected in selected literary works from various genres and periods. **CC:** LCCF **Note:** Fall term in Rennes.

FRN 307 - Negritude Movement: Point of Departure in Black African and Afro-Caribbean Literatures in French

Course Units: 1.0 (**Not Offered this Academic Year**) This study of the Black diaspora in French in the 1930s examines a variety of political and literary strategies developed in reaction to French colonial policies before the era of official independences. We consider authors such as Césaire, Damas, Senghor, Fanon, and Sartre to better understand how these writers represent influences on the literatures of decolonization and post-colonial identity. **Prerequisite(s):** FRN 201 , any 300-level or permission of instructor. **CC:** LCCF, HUM

FRN 308 - Women on Top: Great Women Writers and Characters of French Narrative Fiction

Course Units: 1.0 (**Fall: Bouhet**) French language women writers and the women they write about in their novels and short stories. Authors may include Claire de Duras, George Sand, Colette, Anne Hebert, Marguerite Yourcenar, Simone de Beauvoir, Marguerite Duras, Andrée Chédeville and Mariama Ba. Focus on cultural, historical and political positioning of both writers and their subjects. **CC:** HUL, LCCF, HUM

FRN 309 - Identifying Desire, Desiring Identity: French and Francophone Non-Narrative Literature

Course Units: 1.0 (**Not Offered this Academic Year**) This course will explore French and Francophone theatre and poetry through the lenses of identity and desire. We will in particular examine notions of self and of other as they are set in play through various dramatic and poetic texts, including, but not limited to, those of Labe, Racine, Baudelaire, Tremblay, Césaire, and Schwartz-Bart. **CC:** HUL, LCCF, HUM

FRN 311 - Studies in Francophone North America: Quebec

Course Units: 1.0 (**Spring: Batson**) Exploration of the cultural, literary, and linguistic expressions from the province of Quebec, situating it in the historical and social context of the French-speaking Americas. Focusing on artistic expression from novels to film, we will examine the multiplicities of identities at play in the spaces of Francophone North America as we explore such themes as colonialism, bilingualism, and culturally informed demonstrations of self-determination, revolt, and accommodation. **CC:** HUL, LCCF, HUM

FRN 312 - What is French Cinema?/Qu'est-ce que le cinéma français?

Course Units: 1.0 (**Not Offered this Academic Year**) This course moves from an introduction to the earliest examples of French and world cinema, to an in-depth study of widely recognized classics of French cinema, considered in chronological order from 1933 to 1985, so as to develop an appreciation for the history, genre, and particular theme(s) of each film, as well as its originality. Students will learn how to talk about and write analytical papers on the films according to critical, cultural, and technological considerations, in order to determine what, if anything, is particularly

"French" about French cinema. The course is taught in English, but students taking the course for French credit will read all materials in French, and assignments will be written in French. **Cross-Listed:** MLT 215 **CC:** HUM, LCCF

FRN 400 - Whose Enlightenment?

Course Units: 1.0 (**Not Offered this Academic Year**) Eighteenth-century France's philosophical tradition, focusing on debates over sex, race, class, education and revolution. Writers may include: Rousseau, Toussaint Louverture, Voltaire, Louise d'Epainay, Olympe de Gouges, Condorcet, Marie Antoinette, and Sade. **CC:** HUL, LCCF, HUM

FRN 401 - The Writers of Romanticism

Course Units: 1.0 (**Not Offered this Academic Year**) Writers of personal and imaginative prose, poetry, and drama following the French Revolution. The beginning of Realism. **CC:** HUL, LCCF, HUM

FRN 402 - Sex Lives and Videotape: Casting Sexuality in French and Francophone Film

Course Units: 1.0 (**Not Offered this Academic Year**) Analysis and critique of films whose focus is the "sexual orientation" of its characters. Films may include *La Cage aux folles*, *Les Diaboliques*, *French Twist*, *Sitcom*, *Ma Vie en rose*, *Woubi Cheri*. Theoretical and critical works by authors such as Michel Foucault, Monique Wittig, Simone de Beauvoir, Susan Hayward, Laura Mulvey, Sigmund Freud, and Kate Bornstein will inform our study of these films. Readings in both French and English. All films subtitled. **CC:** LCCF, HUM

FRN 403 - Studies in French Theater

Course Units: 1.0 (**TBD: Staff**) *Amours et Amities!* Studies of French-language theatre, tracing themes of multiple amours et amities as conceived for performance from the classical period to the present. How do loves and relationships take form; indeed, do we need a stage in order to show them? What limitations or possibilities related to loves and relationships do we take on as we give them expression and form, and what does the stage reveal about our own expressions? On our way to some answers, we will also work out the staging of some of these important and revelatory scenes. Course conducted in French. **CC:** HUL, LCCF, HUM

FRN 410 - War Stories; 100 Years of French Literature

Course Units: 1.0 (**Not Offered this Academic Year**) This course focuses on works in French about war, from memories of the Napoleonic wars to World War II. We will examine the impact of war and conflict on the development of French history and culture, and we will analyze texts (literary, films, novels, short stories, comic books) in their historical and sociocultural context, so as to develop a comparative approach to textual analysis through the connecting theme of war and conflict. **CC:** HUL, LCCF, HUM

FRN 411 - The 20th Century Novel

Course Units: 1.0 (**Not Offered this Academic Year**) *Scandale!* Exploration of significant writings from twentieth-century France that have been considered scandalous and scandal-making. Examination of these novels, particular blending of content and form, and interrogation of the various re-evaluations of identity and expression that they ask their reader to engage in. Explorations of these novels, questions of class, race, nationality, species, sex, and gender. Representative authors: Gide, Proust, Colette, Vian, Dariesuseq. **CC:** HUL, LCCF, HUM

FRN 421 - Histoire de la danse, Danse de l'histoire/History of Dance, Dance of History

Course Units: 1.0 (**Not Offered this Academic Year**) Examination of Western European dance and dance texts as revelatory of broader historical and cultural patterns, with special analyses of dance as a key tool of nation-building (as with the court of Louis XIV) and/or a central medium of artistic creation (as in 1920's Paris). Primary focus on France as creator, user, and potential abuser of dance's power, but some attention given other European models (Berlin, St. Petersburg, London). Readings from theoreticians, historians, and dance litterateurs (Moliere, Gautier, Cocteau). **Cross-Listed:** ADA 153 and MLT 211 **CC:** HUL, LCCF, HUM

FRN 430 - West African Oral Literature

Course Units: 1.0 (**Not Offered this Academic Year**) West-African oral genres with a focus on tales and epics in their form and ideologies. Through a study of the oral literature of the region, we will explore the socio-cultural structures of ancient West Africa, their collapse through religious and colonial implications, and their vestiges in today's Africa. **Cross-Listed:** MLT 213 **CC:** HUL, LCCF, HUM

FRN 431 - Voices of Francophone Literature from French-Speaking Countries and Territories other than France

Course Units: 1.0 (**Fall: Ndiaye**) The ways contemporary writers from former French colonies in West and North Africa and from the French-speaking Caribbean stress local, social, political, religious, and gender matters in their novels and short-stories. We also examine these writers' particular use of the French language according to local meanings and other strategies they develop to redefine post-colonial societies. Among selected writers we have Calixthe Beyala, Mariama Ba, Assia Djebar, Rachid Minouni, Patrick Chamoiseau, and Maryse Conde. **CC:** HUL, LCCF, HUM

FRN 489 - French Senior Project

Course Units: 1.0 (**Winter: Chilcoat**) The seminar will provide a forum in which a French or Francophone topic of current interest and importance is explored in depth. Students will gain experience in giving oral presentations and critically evaluating the written work of both established scholars and fellow students, and they must submit a paper to fulfill the senior writing requirement. **CC:** WS

FRN 490 - French Independent Study 1

Course Units: 1.0 (**Fall, Winter, Spring: Staff**) Individual directed readings in French literature. **Prerequisite(s):** At least one course at the 400-level and permission of the instructor.

FRN 491 - French Independent Study 2

Course Units: 1.0 (**Fall, Winter, Spring: Staff**) Individual directed readings in French literature. **Prerequisite(s):** At least one course at the 400-level and permission of the instructor.

FRN 492 - French Independent Study 3

Course Units: 1.0 (**Fall, Winter, Spring: Staff**) Individual directed readings in French literature. **Prerequisite(s):** At least one course at the 400-level and permission of the instructor.

MLT 211 - Histoire de la danse, Danse de l'histoire/History of Dance, Dance of History

Course Units: 1.0 (**TBD: Staff**) Examination of Western European dance and dance texts as revelatory of broader historical and cultural patterns, with special analyses of dance as a key tool of nation-building (as with the court of Louis XIV) and/or a central medium of artistic creation (as in 1920's Paris). Primary focus on France as creator, user, and potential abuser of dance's power, but some attention given other European models (Berlin, St. Petersburg, London). Readings from theoreticians, historians, and dance litterateurs (Moliere, Gautier, Cocteau). **Cross-Listed:** FRN 421 and ADA 153 **CC:** HUL, LCC

MLT 212 - Sex Lives and Videotape: Casting Sexuality in French and Francophone Film

Course Units: 1.0 (**TBD: Staff**) Analysis and critique of films whose focus is the "sexual orientation" of its characters. Films may include La Cage aux folles, Les Diaboliques, French Twist, Sitcom, Ma Vie en rose, Woubi Cheri. Theoretical and critical works by authors such as Michel Foucault, Monique Wittig, Simone de Beauvoir, Susan Hayward, Laura Mulvey, Sigmund Freud, and Kate Bornstein will inform our study of these films. Readings in both French and English. All films subtitled. **Cross-Listed:** FRN 402 **CC:** HUL, LCC

MLT 213 - West African Oral Literature

Course Units: 1.0 (**TBD: Staff**) West-African oral genres with a focus on tales and epics in their form and ideologies. Through a study of the oral literature of the region, we will explore the socio-cultural structures of ancient West Africa, their collapse through religious and colonial implications, and their vestiges in today's Africa. **Cross-Listed:** FRN 430 **CC:** HUL, LCC

MLT 215 - What is French Cinema?/Qu'est-ce que le cinéma français?

Course Units: 1.0 (**TBD: Staff**) This course moves from an introduction to the earliest examples of French and world cinema, to an in-depth study of widely recognized classics of French cinema, considered in chronological order from 1933 to 1985, so as to develop an appreciation for the history, genre, and particular theme(s) of each film, as well as its originality. Students will learn how to talk about and write analytical papers on the films according to critical, cultural, and technological considerations, in order to determine what, if anything, is particularly "French" about French cinema. The course is taught in English, but students taking the course for French credit will read all materials in French, and assignments will be written in French. **Cross-Listed:** FRN 312 **CC:** HUM, LCC

Geosciences

GEO 106 - Introduction to Oceanography

Course Units: 1.0 (**TBD: Staff**) The oceans cover 71% of the planet, 97% of the earth's available water, and 50% of the planet's species, but more than 95% of the ocean remains unexplored. This course covers physical, chemical, and biological oceanography. The course involves an examination of plate tectonics, ocean currents and the forces driving them, the role of the oceans in climate change, coastal processes and sea level change, biological productivity, and the ocean fishing industries. **CC:** SET

GEO 109 - Geologic Perspectives on Global Warming

Course Units: 1.0 (**Not Offered this Academic Year**) Global climate change is one of the defining issues of our time. This course covers the basics of the climate system; topics include: the radiation balance of Earth, the role of greenhouse gases on Earth's surface temperature, atmospheric and oceanic circulation, and natural oscillators in the climate system. A significant portion of the course is dedicated to understanding natural climatic variability on Ice Age and postglacial timescales, and the perspective that this understanding gives us when predicting future temperature trends on Earth and the likely impact that these trends will have on human society. **CC:** SET

GEO 110 - Physical Geology

Course Units: 1.0 (**TBD: Staff**) Examination of Earth materials and processes: How our dynamic planet works including plate tectonics, geologic age determination, processes that form the rocks we see at the Earth's surface, development of the stunning variety of landscapes we see, and other topics of contemporary interest including floods, underground water resources, coastal erosion, earthquakes, landslides, volcanoes, and climate change. **Prerequisite(s):** Preference given to first and second year students. **Corequisite(s):** GEO 110L **CC:** SCLB

GEO 112 - Environmental Geology

Course Units: 1.0 (**TBD: Staff**) The increasing interplay between the environment and human activity has profound effects on our landscape and society. This course focuses on anthropogenic issues such as climate change, soil and groundwater contamination, solid-waste disposal, and resource extraction and dependence. To understand how humans have perturbed the natural environment, it is critical to understand geologic principles and processes. The course also explores natural phenomena including earthquakes, volcanoes, hurricanes, landslides, floods, and coastal erosion and their effects on different segments of society, as the impacts of natural disasters are affected by various socio-economic factors. **Prerequisite(s):** Preference given to first and second year students. **Corequisite(s):** GEO 112L **CC:** SCLB

GEO 117 - Natural Disasters

Course Units: 1.0 (**TBD: Staff**) An introduction to the geologic processes causing floods, earthquakes, volcanoes, landslides, and other natural hazards and how hazards affect people and society. The course will include discussion of major events in the geologic and historical record as well as future hazard potential. We will assess the risks humans face in different regions, including local hazards, our contribution to geologic hazards, and how we can minimize and cope with future events. **Prerequisite(s):** Preference given to first and second year students. **Corequisite(s):** GEO 117L **CC:** SCLB

GEO 120 - The Story of Earth and Life

Course Units: 1.0 (**Not Offered this Academic Year**) An investigation of Earth's dynamic history and evolutionary changes over the past 4.5 billion years. Topics include impacts of climate change, the evolution of life, major changes in the nature of Earth's atmosphere and oceans, and for major mountain building events that have affected the continents as well as the evolutionary development of plant and animal life as recorded in the geologic record. Specific topics include the origin of life, mass extinctions of dinosaurs and other organisms, paleoclimate, and the geologic history of New York State. The link between geology, chemical cycles and life is highlighted, as is the relation of past biogeochemical changes to current global environmental change. Field trips during lab investigate local geologic history and the course may require a weekend field trip.

Prerequisite(s): Preference given to first and second year students. **Corequisite(s):** GEO 120L CC: SCLB

GEO 201 - Stratigraphy and Depositional Environments of New York

Course Units: 1.0 (**Not Offered this Academic Year**) Tectonic events revealed through the stratigraphy and inferred depositional environments of the lower Paleozoic sedimentary rock sequences in eastern New York. Stratigraphic and sedimentologic concepts are explored through weekly field studies and comparison with modern depositional systems. **Prerequisite(s):** Any 100-level geosciences course or ENS 100 **Corequisite(s):** GEO 201L **Lecture/Lab Hours** One lab per week.

GEO 202 - Geomorphology

Course Units: 1.0 (**Not Offered this Academic Year**) Processes operating on and near the Earth's surface are responsible for the development of landforms, and the evolution of these landforms through time. This course covers erosional and depositional processes of glaciers, rivers, hillslopes, and wind, and the geochemical reactions responsible for the formation of soils and caves. These topics are covered within the context of the geologic evolution of the Mohawk Valley since the end of the last Ice Age. **Prerequisite(s):** Any 100-level geosciences course or ENS 100 **Corequisite(s):** GEO 202L **Lecture/Lab Hours** One lab per week.

GEO 203 - Lakes and Environmental Change

Course Units: 1.0 (**Not Offered this Academic Year**) Modern limnology and the record of environmental change as recorded in the physical and chemical properties of lake water and lake sediments. Includes a term-long research project on two local lakes, and the interpretation of the proxy paleoenvironmental indicators contained in sediment cores from these lakes. **Prerequisite(s):** Any 100-level geosciences or biology course or ENS 100 **Corequisite(s):** GEO 203L

GEO 205 - Tectonics

Course Units: 1.0 (**Not Offered this Academic Year**) This course explores the dynamics of active plate boundaries and plate motions as revealed in plate margin deformation, earthquakes, volcanic activity, and metamorphism. Includes an introduction to stress and strain, deformation mechanisms, faults and folds, geochronology, and petrology of distinct rocks in convergent settings. **Prerequisite(s):** Any 100-level geosciences course or ENS 100

GEO 206 - Volcanology

Course Units: 1.0 (**Not Offered this Academic Year**) Volcanic eruptions showcase the beauty, complexity, and destructive forces of nature. This course tackles the questions of why volcanoes erupt (a fundamental question without universal agreement!), where they erupt, how they erupt, how we predict eruptions, and the effects of eruptions on societies. Case studies include famous eruptions such as Vesuvius, Yellowstone, Hawaii, and Mt. St. Helens, as well as some volcanoes being researched by Union faculty and students in the Caribbean, Pacific Northwest, and Mexico. Students learn the different ways that volcanoes are monitored (seismic, gas emissions, hydrothermal waters, deformation). The course highlights ongoing current volcanic activity and monitoring and students engage in multiple role-playing exercises using data to forecast eruptions and deal with a volcanic crisis. Students will become more proficient in science communication and how to convey information to the public through videos, infographics, and other forms of media. **Prerequisite(s):** Any 100-level geosciences course or ENS 100 **Corequisite(s):** GEO 206L

GEO 207 - Stable Isotopes in Environmental Science

Course Units: 1.0 (**TBD: Staff**) Stable isotopes have become a fundamental tool in many biogeoscientific studies, from reconstructing past climates to tracking animal migration or unraveling foodwebs and even to study the origin of life on Earth and possibly other planets. This course highlights the applications of stable isotopes in biological, ecological, environmental, archeological, and geological studies. Students learn the fundamentals of stable isotope biogeochemistry in order to understand the uses and limitations of this tool. This course starts with an introduction to the fundamentals of stable isotope geochemistry and then moves on to applied topics such as paleoceanography and paleoclimatology proxies, hydrology, sediments

and sedimentary rocks, biogeochemical cycling, the global carbon cycle, photosynthesis, metabolism, ecology, organic matter degradation, pollution, and more. **Prerequisite(s):** Any geosciences, biology, or chemistry course or ENS 100, or permission of the instructor. **Corequisite(s):** GEO 207L

GEO 208 - Paleontology, Paleobiology, and Paleoecology

Course Units: 1.0 (**TBD: Staff**) Nearly all species that have existed on Earth are now extinct and are only known through the fossil record. This course examines the evolution and history of life on Earth as interpreted from the fossil record. Topics include fossil preservation, taphonomy, ontogeny, diversity trajectories through geologic time, evolutionary mechanisms, extinction, paleobiology, paleoecology, and paleoclimate. Special emphasis will be placed on using fossils to interpret ancient environments as well as deciphering past climates. The course focuses on the fossil record of marine invertebrates, but major groups of vertebrates (such as dinosaurs) and plants are also covered. **Cross-Listed:** BIO 208
Prerequisite(s): Any geosciences or biology course or ENS 100 **Corequisite(s):** GEO 208L

GEO 209 - Paleoclimatology

Course Units: 1.0 (**Not Offered this Academic Year**) Climate is fundamentally relevant to modern and ancient societies. Global warming is occurring today, and whether it is driven by human activities (e.g., CO₂, CH₄ emissions) or by natural climate cycles can only be determined by understanding natural climatic variability. Fortunately, there are many tools, and natural climatic records that can provide us with information on past climate (e.g. tree rings, ice cores from glaciers, and sediment cores from lakes and oceans). Obtaining, documenting and interpreting these records is the field of paleoclimatology, and it is the focus of this course. Past climate variability is used to highlight possible scenarios of future climate change. **Prerequisite(s):** Any 100-level geosciences course or ENS 100 **Corequisite(s):** GEO 209L

GEO 210 - Groundwater Hydrology

Course Units: 1.0 (**TBD: Staff**) Groundwater accounts for 97% of the available freshwater on Earth and serves as a vital resource that supports the economies and ecosystems of the world - including providing much of the irrigation water that grows our food, supplying drinking water to over 2 billion people, and sustaining surface water bodies and groundwater dependent ecosystems. With the world's groundwater resources threatened by intensive groundwater pumping, environmental and climate change, and the release of contaminants into the environment, there is a pressing need to better understand and manage this resource. Groundwater hydrology is a highly interdisciplinary field that brings together the geologic and environmental sciences with engineering. This course will begin by exploring the environmental and geologic factors that influence the occurrence and movement of groundwater. We will then delve into the physical laws that govern groundwater flow and learn how to model these flows. Later in the course we will cover the role of groundwater in a range of geologic and ecological processes. We will also cover engineering applications of groundwater such as the hydraulics of pumping wells, land subsidence, and the movement of contaminants within aquifers. Students will leave this course with the fundamental knowledge needed to begin answering the scientific and engineering challenges related to our groundwater resources. **Cross-Listed:** ENS 210 **Prerequisite(s):** Any 100-level geosciences course or ENS 100 **Corequisite(s):** GEO 210L

GEO 220 - Mineral Science

Course Units: 1.0 (**TBD: Staff**) Mineral science is foundational for other geology and environmental science courses, as well as many other scientific disciplines that encounter crystalline solids. This class provides students with a solid understanding of minerals, which are the building blocks of all rocks on this and every other planet, and provide most of our industrial resources, many building materials and precious gems. A successful student leaving this class will be able to identify most common minerals when they occur "in the wild" and be familiar with their internal structure and crystal chemistry. The practical use of state-of-the-art analytical techniques common to the study of solid materials is emphasized to elucidate the links between internal crystalline structure and macroscopic physical properties. Students will use the scanning electron microscope, the x-ray diffractometer and the polarizing light microscope. In addition to learning the fundamentals of mineral science, students will gain appreciation for the beauty and symmetry present in the natural world. **Prerequisite(s):** CHM 101 or equivalent and any 100-level geosciences course. **Corequisite(s):** GEO 220L

GEO 295H - Geosciences Honors Independent Project 1

Course Units: 0.0 (**TBD: Staff**)

GEO 296H - Geosciences Honors Independent Project 2

Course Units: 1.0 (**TBD: Staff**)

GEO 300 - Glacial and Quaternary Geology

Course Units: 1.0 (**Not Offered this Academic Year**) The transformation of snow to ice, the mass balance of glaciers, types of glaciers, and the processes that control glacier sliding, erosion, and deposition. Includes techniques commonly employed to date Quaternary deposits and an examination of the geologic record of the Ice Ages as recorded in glaciers, glacial deposits, and marine and lake sediments of the Quaternary period. Weekly labs document the geologic record of the last glaciation in exposures in the southern Adirondacks, central Hudson Valley, eastern Mohawk Valley, and northern Schoharie Valley. **Prerequisite(s):** Any 200-level geosciences course, or permission of the instructor. **Corequisite(s):** GEO 300L

GEO 302 - Geochemical Systems and Modeling

Course Units: 1.0 (**Not Offered this Academic Year**) Investigation of the Earth as a chemical system and using chemical tools to understand geologic processes. Topics include origin of the elements, formation and differentiation of the Earth, igneous processes, radioactive isotopes and radiometric dating, and geochemistry of near-surface waters and the oceans. Work includes theory, sample collection, sample preparation, chemical analysis using in-house equipment, and computer modeling of the using the acquired data. Includes readings and discussions of the contemporary geochemical literature. **Prerequisite(s):** CHM 101 or equivalent **Corequisite(s):** GEO 302L

GEO 303 - Earthquakes and the study of the Earth's Interior

Course Units: 1.0 (**TBD: Staff**) In this course students will learn about the various geophysical methods used to probe the Earth's interior. With a heavy focus on earthquakes and seismology, the course explores the question of how we learn about the Earth beneath our feet. Through the hands-on use of modern geophysical field equipment we will explore the deep and shallow structure of the whole earth. We will learn about finding geological resources and about the physical explanations for plate tectonics. We will also examine how radioactivity and heat flow within the earth can tell us about our warming climate. A common thread throughout the course is computer modeling, data acquisition, signal processing and associated uncertainties. By the end of the course, students will have a familiarity with the differences between the many geophysical surveying methods and the different cases in which they could be employed. **Prerequisite(s):** Any 100-level geosciences or physics course or ENS 100 **Corequisite(s):** GEO 303L

GEO 305 - Global Biogeochemical Cycles

Course Units: 1.0 (**Not Offered this Academic Year**) Biology, geology and chemistry are intricately linked to form the world around us. Biogeochemical cycles set the stage for life on Earth. This course explores the carbon, nitrogen, water, phosphorus, and sulfur cycles at the surface of the Earth. We investigate how biological (e.g., primary production, respiration), anthropogenic (e.g., urbanization, pollution) and geological processes (e.g., tectonics, rock weathering) influence these chemical cycles and in turn how these cycles influence the climate and the oceans. Field studies focus on tropical marine biogeochemistry of coral reefs, mangrove forests, seagrass meadows, lagoons and estuaries. Course includes a required week-long field trip to a remote field station in Panama. There are additional costs associated with field trip expenses. All students must meet basic term abroad requirements and submit an application. This course is open to all students, but preference will be given to those with a declared major in geosciences, environmental science, chemistry or biology. **Cross-Listed:** BIO 235 **Corequisite(s):** GEO 305L

GEO 307 - Structural Geology

Course Units: 1.0 (**TBD: Staff**) In Structural Geology we study the geometry and dynamics of deformed rocks, using detailed descriptions and kinematic analysis of field sites. If we wish to understand the formation of mountain belts, or their climatically controlled destruction, the relationship of one rock unit to another, or one mineral grain to the next is of fundamental importance. Students will acquire the tools necessary to describe and understand the geometry and dynamics of deformed rocks and the larger-scale orogenies they are a part of, with a practical focus on field work to understand the structural evolution of eastern New York. We will explore stress and strain, folding, faulting, cleavage formation, map interpretation, and the relationships between plate tectonic settings and crustal structure. There is a major emphasis on developing and sharpening of multi-dimensional reasoning skills. Students will also gain experience writing scientific reports which integrate observational data, field measurements, and the existing literature. In addition to several local field trips during lab, the course includes a weekend trip to explore key localities from the Taconic Orogeny in Massachusetts and Vermont. **Prerequisite(s):** Any geosciences course numbered 200 or higher, or permission of the instructor. **Corequisite(s):** GEO 307L

GEO 320 - Petrology of Igneous and Metamorphic Rocks

Course Units: 1.0 (**TBD: Staff**) Petrology is the study of rocks and the conditions under which they form and evolve. This course will explore how the processes of melting and subsequent crystallization creates igneous rocks in different tectonic environments and how heat, pressure, and strain create metamorphic rocks. Emphasis will be on integrating different types of data (e.g. field observations, mineral assemblages, whole-rock geochemistry, mineral compositions) to understand the origin and evolution of rocks in igneous and metamorphic systems. Students will examine and characterize minerals, textures, and compositions of rocks in thin sections using a polarizing microscope, scanning electron microscope, and laser ablation inductively-coupled mass spectrometer. Rock sample suites studied could include those from Iceland, Montserrat, Mexico, New England, the Stillwater Complex (MT), and Dutchess County, NY. The course includes local field trips to see outcrops and collect samples on 2-3 weekend days to the Adirondacks, Catskills, and/or Vermont and Massachusetts. **Prerequisite(s):** GEO 220 **Corequisite(s):** GEO 320L

GEO 355T - Living on the Edge

Course Units: 1.0 (**Not Offered this Academic Year**) This course is a mini-term abroad. The field study of earthquakes, volcanoes, glaciers, and other hazards where tectonic plates collide and mountains form. Field studies focus on understanding the science behind geologic hazards that lead to catastrophic events and subsequent loss of life. Fieldwork is aimed at recognizing hazards, understanding the processes behind the hazards, and to see the role that society plays in mitigating these hazards. The study area alternates around the Pacific Rim between locations that include Peru (June), Alaska (June), and New Zealand (December). Fieldwork is preceded by organizational sessions on campus to prepare for field projects.

Prerequisite(s): Any 100-level geosciences course or ENS 100

GEO 405 - Geosciences Senior Seminar

Course Units: 1.0 (**TBD: Staff**) Senior capstone course required of all geosciences majors that integrates concepts from all disciplines of geology and requires students to engage in scientific discussions. The course covers current developments in the geosciences as reported in the primary literature. Students will critically read, present, and discuss recently-published articles. Students will also give oral presentations of their original thesis research. To improve their presentation skills, students will do extensive peer review and self-assessment. **Prerequisite(s):** Geosciences major and senior standing **CC:** WS

GEO 490 - Geosciences Independent Study 1

Course Units: 1.0 (**TBD: Staff**) A program of independent study in a particular area of geology, not available through regular courses, under the supervision of a faculty member. **Prerequisite(s):** Permission of the instructor.

GEO 491 - Geosciences Independent Study 2

Course Units: 1.0 (**TBD: Staff**) A program of independent study in a particular area of geology, not available through regular courses, under the supervision of a faculty member. **Prerequisite(s):** Permission of the instructor.

GEO 492 - Geosciences Independent Study 3

Course Units: 1.0 (**TBD: Staff**) A program of independent study in a particular area of geology, not available through regular courses, under the supervision of a faculty member. **Prerequisite(s):** Permission of the instructor.

GEO 493 - Geosciences Independent Study 4

Course Units: 1.0 (**TBD: Staff**) A program of independent study in a particular area of geology, not available through regular courses, under the supervision of a faculty member. **Prerequisite(s):** Permission of the instructor.

GEO 494 - Geosciences Independent Study 5

Course Units: 1.0 (**TBD: Staff**) A program of independent study in a particular area of geology, not available through regular courses, under the supervision of a faculty member. **Prerequisite(s):** Permission of the instructor.

GEO 495 - Geosciences Thesis Research 1

Course Units: 0.0 (**TBD: Staff**) Geological research under the direction of a faculty member. A minimum of two terms are required for honors. Only one term can be counted toward the two geosciences electives. **Prerequisite(s):** Permission of the instructor. **CC:** WS (satisfied by completion of GEO 496)

GEO 496 - Geosciences Thesis Research 2

Course Units: 2.0 (**TBD: Staff**) Geological research under the direction of a faculty member. A minimum of two terms are required for honors. Only one term can be counted toward the two geosciences electives. **Prerequisite(s):** Permission of the instructor. **CC:** WS

GEO 497 - Geosciences Thesis Research 3

Course Units: 1.0 (**TBD: Staff**) Geological research under the direction of a faculty member. A minimum of two terms are required for honors. Only one term can be counted toward the two geosciences electives. **Prerequisite(s):** Permission of the instructor. **CC:** WS (satisfied by completion of GEO 496)

GEO 498 - Geosciences Research and Writing

Course Units: 1.0 (**TBD: Staff**) One term of geological research under the direction of a faculty member. **Prerequisite(s):** Permission of the instructor. **CC:** WS

German

GER 100 - Basic German 1

Course Units: 1.0 (**Fall: Nelson-Mukherjee, Staff**) Basic skills for students who begin with no knowledge of German. **CC:** HUM

GER 101 - Basic German 2

Course Units: 1.0 (**Winter: Ricci Bell**) Continuation of GER 100 **Prerequisite(s):** GER 100 or two years of secondary school German. **CC:** LCCG, HUM

GER 102 - Basic German 3

Course Units: 1.0 (**Spring: Ricci Bell**) Continuation of GER 101 , with introduction of readings. **Prerequisite(s):** GER 101 or three years of secondary school German. **CC:** LCCG, HUM

GER 200 - Intermediate German 1

Course Units: 1.0 (**Fall: Staff**) Intensive grammar review, emphasis on vocabulary building, idiomatic expressions, conversation, and composition based on cultural and literary texts. **Prerequisite(s):** GER 102 or equivalent. **CC:** LCCG, HUM

GER 201 - Intermediate German 2

Course Units: 1.0 (**Winter: Staff**) Continuation of extensive grammar review, vocabulary building, conversation, and composition based on more advanced cultural and literary texts. **Prerequisite(s):** GER 200 or equivalent. **CC:** LCCG, HUM

GER 202 - Advanced German

Course Units: 1.0 (**Not Offered this Academic Year**) Mastery of the spoken and written language, with an emphasis on the finer points of grammar, style, and colloquial expression. **Prerequisite(s):** GER 201 or equivalent. **CC:** LCCG, HUM

GER 204T - German Language and Culture Studies Abroad

Course Units: 1.0 (**Spring: Nelson-Mukherjee**) See International Programs. **CC:** HUM, LCCG

GER 205T - German Language and Culture Studies Abroad

Course Units: 1.0 (**Spring: Nelson-Mukherjee**) See International Programs. **CC:** HUM, LCCG

GER 206T - German Language and Culture Studies Abroad

Course Units: 1.0 (**Spring: Nelson-Mukherjee**) See International Programs. **CC:** HUM, LCCG

GER 207T - German Language and Culture Studies Abroad

Course Units: 1.0 (**Spring: Nelson-Mukherjee**) See International Programs. **CC:** HUM, LCCG

GER 250T - The German Language Studied Independently Abroad

Course Units: 1.0 (**TBD: Staff**) **CC:** HUM, LCCG

GER 251T - The German Language Studied Independently Abroad

Course Units: 1.0 (**TBD: Staff**) **CC:** HUM, LCCG

GER 300T - German Civilization

Course Units: 1.0 (**Spring: Nelson-Mukherjee**) (Also MLT-238T) See International Programs. An introduction to the cultural history of German speaking Europe. **Prerequisite(s):** GER 201 or permission of the instructor. **CC:** HUM, LCCG **Note:** Spring term in Freiburg/Berlin.

GER 301 - German Culture and the Professions

Course Units: 1.0 (**Not Offered this Academic Year**) Focus on business oriented linguistic competence (certification possible) and cultural sensitivity, combined with an introduction to the economic history of Germany 1945-present day. **Prerequisite(s):** GER 201 or permission of the instructor. **CC:** LCCG, HUM

GER 302 - German Prose: A Survey

Course Units: 1.0 (**Not Offered this Academic Year**) Selected works representing literature and society from the late eighteenth century to the present. Readings of works from each period to illustrate cultural, historical, and artistic trends. **Prerequisite(s):** GER 201 or permission of the instructor. **CC:** HUL, LCCG, HUM

GER 303 - German Drama: A Survey

Course Units: 1.0 (**Not Offered this Academic Year**) Theory and practice of German theater from the Enlightenment to the Present. **Prerequisite(s):** GER 201 or permission of the instructor. **CC:** HUL, LCCG, HUM

GER 304 - Once Upon a Time: German Fairy Tales, Folklore, and Fantasy

Course Units: 1.0 (**Not Offered this Academic Year**) Exploration of the genre and tradition of the German Fairy Tale, its reception within various cultural frameworks, and its influence on later literature of the nineteenth, twentieth and twenty-first centuries, with special focus on identifying aesthetic, sociological, psychological, and psychoanalytical implications and gender issues. The Grimm Brothers' Kinder- und Hausmarchen (and

their revisions in popular and literary culture) will provide a basis for discussing the fairy tale's role in culture and its continued vitality within the different cultural frameworks of classical, romantic, and modern folklore and fantasy storytelling. **Prereq/Corequisite(s):** GER 201 or permission of the instructor. **CC:** HUL, LCCG, HUM

GER 306 - Twentieth and Twentifirst Century German Literature

Course Units: 1.0 (**Not Offered this Academic Year**) Representative works by major writers, read as expressions of concern about their times. **Prerequisite(s):** GER 201 or permission of the instructor. **CC:** HUL, LCCG, HUM

GER 307 - East German Culture

Course Units: 1.0 (**Not Offered this Academic Year**) This course offers an overview of life in East German socialism, with a focus on cultural, societal and political themes. Centrally, we consider the ways the both literature and film became essential outlets for cultural expression in the GDR, as well as the constraints placed upon such expression. Moreover, we devote time to examining political and social topics affecting cultural production and consumption in the GDR (known as a quintessential "Leseland" - country of readers). Our materials span the critical to the celebratory, and the sober to the comical, capturing important 'snapshots' of this small, short-lived (1949-1990), yet vital country. **Prerequisite(s):** GER 201 **Corequisite(s):** GER 201 or permission of instructor. **CC:** HUL, LCCG, HUM

GER 334 - Femme fatales? Women in 19th and 20th Century German Culture and Society

Course Units: 1.0 (**Not Offered this Academic Year**) An examination of female sexuality as one of the central controversies of modern German culture. In addition to analyzing cultural artifacts (plays, films, paintings), we will discuss such diverse social phenomena as the Women's movement, morality crusades, psychoanalysis, and sexology. **Cross-Listed:** MLT 234 **Prerequisite(s):** GER 201 **CC:** HUL, LCCG, HUM

GER 335 - Voices from Abroad: German Exile Culture, 1933-1990

Course Units: 1.0 (**Not Offered this Academic Year**) This course, taught in translation, is designed for both Germanists and other students of literature interested in exploring notions of exile and the particular cultural artifacts, including novels, films, essays and poetry, that bear witness to the struggle of artists exiled from WWII Germany and Austria. The class additionally examines texts by current emigres to Germany and incorporates theoretical assessments of exile, considering works by Said, Milosz and others. **Cross-Listed:** MLT 235 **Prerequisite(s):** GER 201 or permission of the instructor **CC:** HUL, LCCG, HUM

GER 336 - The Thrill of Victory: Reading German Sports and Culture

Course Units: 1.0 (**Not Offered this Academic Year**) This course traces the ways that Sports have reflected and influenced German culture through the 20th century, analyzing links between athleticism and conceptions of gender, nationhood, individuality and race set out in literary texts, films, and visual arts. Exploring notions of victory, physical perfection, and spectatorship, we will consider works by some of Germany's greatest authors and artists, including Kafka, Schnitzler, Brecht, Riefenstahl, Kirschner and Handke. **Cross-Listed:** MLT 336 **Prereq/Corequisite(s):** GER 201 or permission of the instructor. **CC:** HUL, LCCG, HUM

GER 337 - Flashy Erotics to Forbidden Laughter: German Cabaret through the 20th Century

Course Units: 1.0 (**Spring: Ricci Bell**) This course explores the German "Kabarett," a dramatic form essential to German culture throughout the 20th Century. Very versatile, cabaret throughout Germany's history was at times didactic, subversive, raunchy, witty, extravagant and sharply critical. We examine cabaret's development in contexts ranging from Weimar and Vienna, to Nazi and Concentration Camp forms, to East and West German political cabaret, and contemporary forms, considering the institutions and figures that shaped cabaret over time. **CC:** HUL, LCCG, HUM

GER 338 - Poetry, Performance, Protest & Power: A History of Twentieth-Century Germany

Course Units: 1.0 (**Not Offered this Academic Year**) This course explores the legacy of 20th century German literature and cultural history through its poetic tradition of performance and protest, while analyzing the political, social, and cultural climate and the shifts in understandings of gender, race, class and generational relations during this critical century in contemporary German history. **Cross-Listed:** MLT 236 **CC:** HUL, LCCG, HUM

GER 339 - The Holocaust in Film: Cinematic Treatments of Violence, Trauma and Memory

Course Units: 1.0 (**Winter: Ricci Bell**) The course examines cinematic representations of the Holocaust in the films of German, German-Jewish, and other European filmmakers. Comparing and contrasting a variety of film genres and cinematic techniques, we explore fundamental questions about the relationships between art and history, representation and experience and memory and responsibility. By considering theoretical and historical readings as well, we situate the films within significant intellectual and historical contexts. **Cross-Listed:** MLT 339 **Prerequisite(s):** GER 201 or permission of the instructor. **CC:** HUM, LCCG

GER 340 - Beyond Bedtime Stories: Retelling the Tales of the Brothers Grimm

Course Units: 1.0 (**Not Offered this Academic Year**) This course Investigates the folk and fairy tales of the Brothers Grimm in literature and film, as well as in their cultural, historical, social and ideological contexts. Specific focus is on the "retelling" and "rewriting" of these tales - both by the Brothers Grimm from older French and Italian tales and by Walt Disney and modern Hollywood -- in order to study the similarities and differences in narrative structures, themes, and layers of meaning, as well as the implications such retellings have on social and familial relationships, class structure, race relations, the phenomenon of nation building, the performance of gender and sexuality, orientalism and consumerism. **Cross-Listed:** MLT 239 **Prerequisite(s):** GER 201 or permission of the instructor if student seeking GER credit. **CC:** HUL, HUM

GER 341 - Of Ghosts and Demons: Encountering the Uncanny in German Literature

Course Units: 1.0 (**Not Offered this Academic Year**) From ghost children, animated statues, ominous angels, and the walking dead to machine women, demons, and doppelgangers, German literature teems with things that go bump in the night. The course examines encounters with the supernatural as depicted throughout German literature, with special focus on Romanticism's fascination with das Unheimliche ("the uncanny"), in order to sketch the history of this tradition of fantastic literature in German, trace its origins, and present its main authors and defining features. Readings include works by Goethe, Kleist, the Brothers Grimm, Hoffmann, Hauff, Schnitzler, Kafka, Rilke, and Bachmann, as well as films by Murnau, Lang, and von Sternberg. **Cross-Listed:** MLT 237 **Prerequisite(s):** GER 201 or permission of the instructor. **CC:** HUL, LCCG, HUM

GER 401 - Meeting the Other: Migration and Multiculturalism in Contemporary Germany

Course Units: 1.0 (**Fall: Nelson-Mukherjee**) This course studies post-World War II German cultural and literary history through the lens of migration. How are memories of migration included (or excluded) in national histories? By analyzing recent cultural productions by minorities (literature, music and films) with respect to national, cultural, and sexual self-representations in the context of social and political developments, this course will contextualize controversies and relate specific events to broader questions of economic globalization, the recruitment of "guest workers," refugees and border regimes, xenophobia and racism, citizenship legislation, education and national identity, religion and ritual, media and popular culture. **Prerequisite(s):** Any 300-level course or permission of the instructor. **CC:** HUL, LCCG, HUM

GER 402 - German Film Studies

Course Units: 1.0 (**Not Offered this Academic Year**) Decoding film-specific 'narratives' in German movies on the background of socio-political, economic, and cultural conditions of their production. **Prerequisite(s):** Any 300-level course or permission of the instructor. **CC:** HUM, LCCG

GER 403 - Shoah: Literary, Artistic and Filmic Representations of the Holocaust

Course Units: 1.0 (**Not Offered this Academic Year**) Comparing and contrasting works of German and German-Jewish writers. **Prerequisite(s):** Any 300-level course or permission of the instructor. **CC:** LCCG, HUM, HUL

GER 489 - German Senior Writing Project

Course Units: 1.0 (**Winter, Spring: Staff**) **CC:** WS

GER 490 - German Independent Study 1

Course Units: 1.0 (**Fall, Winter, Spring: Staff**) Individual directed readings in German literature. **Prerequisite(s):** At least one course at the 400-level and permission of the instructor.

GER 491 - German Independent Study 2

Course Units: 1.0 (**Fall, Winter, Spring: Staff**) Individual directed readings in German literature. **Prerequisite(s):** At least one course at the 400-level and permission of the instructor.

GER 492 - German Independent Study 3

Course Units: 1.0 (**Fall, Winter, Spring: Staff**) Individual directed readings in German literature. **Prerequisite(s):** At least one course at the 400-level and permission of the instructor.

MLT 234 - Femmes fatales? Women in 19th- and 20th-Century German Culture and Society

Course Units: 1.0 (**TBD: Staff**) An examination of female sexuality as one of the central controversies of modern German culture. In addition to analyzing cultural artifacts (plays, films, paintings), we will discuss such diverse social phenomena as the Women's movement, morality crusades, psychoanalysis, and sexology. **Cross-Listed:** GER 334 **CC:** HUL

MLT 235 - Voices from Abroad: German Exile Culture, 1933-1990

Course Units: 1.0 (**TBD: Staff**) This course, taught in translation, is designed for both Germanists and other students of literature interested in exploring notions of exile and the particular cultural artifacts, including novels, films, essays and poetry, that bear witness to the struggle of artists exiled from WWII Germany and Austria. The class additionally examines texts by current emigres to Germany and incorporates theoretical assessments of exile, considering works by Said, Milosz and others. **Cross-Listed:** GER 335 **CC:** HUL

MLT 236 - Poetry, Performance, Protest & Power: A History of Twentieth-Century Germany

Course Units: 1.0 (**TBD: Staff**) This course explores the legacy of 20th century German literature and cultural history through its poetic tradition of performance and protest, while analyzing the political, social, and cultural climate and the shifts in understandings of gender, race, class and generational relations during this critical century in contemporary German history. **Cross-Listed:** GER 338 **CC:** HUL, LCC

MLT 237 - Of Ghosts and Demons: Encountering the Uncanny in German Literature

Course Units: 1.0 (**TBD: Staff**) From ghost children, animated statues, ominous angels, and the walking dead to machine women, demons, and doppelgangers, German literature teems with things that go bump in the night. The course examines encounters with the supernatural as depicted throughout German literature, with special focus on Romanticism's fascination with das Unheimliche ("the uncanny"), in order to sketch the history of this tradition of fantastic literature in German, trace its origins, and present its main authors and defining features. Readings include works by Goethe, Kleist, the Brothers Grimm, Hoffmann, Hauff, Schnitzler, Kafka, Rilke, and Bachmann, as well as films by Murnau, Lang, and von Sternberg. **Cross-Listed:** GER 341 **Prerequisite(s):** GER 201 or permission of the instructor. **CC:** HUL, LCC

MLT 239 - Beyond Bedtime Stories: Retelling the Tales of the Brothers Grimm

Course Units: 1.0 (**TBD: Staff**) This course Investigates the folk and fairy tales of the Brothers Grimm in literature and film, as well as in their cultural, historical, social and ideological contexts. Specific focus is on the "retelling" and "rewriting" of these tales -- both by the Brothers Grimm from older French and Italian tales and by Walt Disney and modern Hollywood -- in order to study the similarities and differences in narrative structures, themes, and layers of meaning, as well as the implications such retellings have on social and familial relationships, class structure, race relations, the phenomenon of nation building, the performance of gender and sexuality, orientalism and consumerism. **Cross-Listed:** GER 340 **Prerequisite(s):** None for MLT. GER 201 or permission of the instructor if student seeking GER credit. **CC:** HUL

MLT 336 - The Thrill of Victory: Reading German Sports (and) Culture

Course Units: 1.0 (**TBD: Staff**) This course traces the ways that Sports have reflected and influenced German culture through the 20th century, analyzing links between athleticism and conceptions of gender, nationhood, individuality and race set out in literary texts, films, and visual arts. Exploring notions of victory, physical perfection, and spectatorship, we will consider works by some of Germany's greatest authors and artists, including Kafka, Schnitzler, Brecht, Riefenstahl, Kirschner and Handke. **Cross-Listed:** GER 336 **CC:** HUL

MLT 339 - The Holocaust in Film: Cinematic Treatments of Violence, Trauma and Memory

Course Units: 1.0 (**TBD: Staff**) The course examines cinematic representations of the Holocaust in the films of German, German-Jewish, and other European filmmakers. Comparing and contrasting a variety of film genres and cinematic techniques, we explore fundamental questions about the relationships between art and history, representation and experience and memory and responsibility. By considering theoretical and historical readings as well, we situate the films within significant intellectual and historical contexts. **Cross-Listed:** GER 339 **CC:** HUM, LCC

Greek

GRK 102 - Beginning Ancient Greek 2

Course Units: 1.0 (**Spring: Staff**) Continuation of GRK 101 . **Prerequisite(s):** GRK 101 or one year of secondary school Greek. **CC:** LCCK, HUM

GRK 103 - Greek Reading

Course Units: 1.0 (**Fall: Gazzarri**) Selected readings from the works of a variety of Greek authors. **Prerequisite(s):** GRK 102 or equivalent. **CC:** LCCK, HUM

GRK 230 - Homer: The Iliad

Course Units: 1.0 (**TBD: Staff**) Readings in the Iliad, with relevant secondary readings on Greek epic, its place in the development of Greek literature, and its influence. **Prerequisite(s):** GRK 103 or equivalent. **CC:** HUL, LCC, HUM

GRK 231 - Homer: The Odyssey

Course Units: 1.0 (**TBD: Staff**) A study of several books of the Odyssey, with relevant secondary readings on Greek epic, its place in the development of Greek literature, and its influence. **Prerequisite(s):** GRK 103 or equivalent. **CC:** HUL, LCC, HUM

GRK 235 - Plato

Course Units: 1.0 (**Fall: Gazzarri**) A study of several of the early dialogues in the original together with readings of others in translation. May be repeated with change in texts. **Prerequisite(s):** GRK 103 or equivalent. **CC:** HUL, LCC, HUM

GRK 243 - New Testament Greek

Course Units: 1.0 (**TBD: Staff**) The foundational text of Christianity, the New Testament also represents a fascinating social and historical document, and, as such, offers an unparalleled glimpse into provincial life under the early Roman empire. A survey of the gospels, Acts, and the letters of Paul in light of these contexts. **Prerequisite(s):** GRK 103 or equivalent. **CC:** HUL, LCC, HUM

GRK 320 - Attic Prose

Course Units: 1.0 (**TBD: Staff**) Readings from the major prose authors of Athens. May be repeated with change in author. **Prerequisite(s):** GRK 103 or equivalent. **CC:** HUL, LCC, HUM

GRK 331 - Herodotus and Thucydides

Course Units: 1.0 (**TBD: Staff**) A study of several books of Herodotus and Thucydides with relevant secondary readings. **Prerequisite(s):** GRK 103 or equivalent. **CC:** HUL, LCC, HUM

GRK 333 - Greek Tragedy

Course Units: 1.0 (**TBD: Staff**) Tragedies chosen from the works of the three great tragic poets of Athens, with relevant secondary readings. May be repeated with change in author or texts. **Prerequisite(s):** GRK 103 or equivalent. **CC:** HUL, LCC, HUM

GRK 337 - Greek Oratory

Course Units: 1.0 (**TBD: Staff**) Readings of various Athenian orators, with secondary reading on Greek legal practice and rhetorical style. **Prerequisite(s):** GRK 103 or equivalent. **CC:** HUL, LCC, HUM

GRK 338 - Greek Lyric and Elegiac Poetry

Course Units: 1.0 (**TBD: Staff**) Readings from Sappho, Archilochus, Solon, Pindar, and others. The traditions, evolution of the genre, social context and role of the poet will be considered. **Prerequisite(s):** GRK 103 or equivalent. **CC:** HUL, LCC, HUM

GRK 339 - Greek Comedy

Course Units: 1.0 (**TBD: Staff**) Readings in the plays of Aristophanes. The criticism and theory, history, and social context of the comedies will be studied. **Prerequisite(s):** GRK 103 or equivalent. **CC:** HUL, LCC, HUM

GRK 490 - Greek Independent Study 1

Course Units: 1.0 (**Fall, Winter, Spring: Staff**) Advanced individual study of a special author or subject, or of Greek prose composition. **Prerequisite(s):** Six courses in Greek or the equivalent.

GRK 491 - Greek Independent Study 2

Course Units: 1.0 (**Fall, Winter, Spring: Staff**) Advanced individual study of a special author or subject, or of Greek prose composition. **Prerequisite(s):** Six courses in Greek or the equivalent.

GRK 492 - Greek Independent Study 3

Course Units: 1.0 (**Fall, Winter, Spring: Staff**) Advanced individual study of a special author or subject, or of Greek prose composition. **Prerequisite(s):** Six courses in Greek or the equivalent.

GRK 497 - Greek Senior Project

Course Units: 1.0 (**Fall, Winter, Spring: Staff**) One-term senior project. **CC:** WS

GRK 498 - Greek Senior Thesis 1

Course Units: 0.0 (**Fall, Winter, Spring: Staff**) Independent reading and thesis in the field of Greek language and/or literature. **Prerequisite(s):** Permission of the department chair.

GRK 499 - Greek Senior Thesis 2

Course Units: 2.0 (**Fall, Winter, Spring: Staff**) Independent reading and thesis in the field of Greek language and/or literature. **Prerequisite(s):** Permission of the department chair. **CC:** WS

Gender, Sexuality, & Women's Studies

GSW 100 - Introduction to LGBTQ+ Studies

Course Units: 1.0 (**TBD: Staff**) This course is a transdisciplinary introduction to lesbian, gay, bisexual, transgender, and queer (LGBTQ+) studies. We will explore histories of sexualities; forms of systemic and structural oppression including heterosexism, homophobia, and transphobia and resistance to them; violence against LGBTQ+ people; intersectional queer activism throughout history; diverse experiences of sexuality, desire, and identity; and representations of LGBTQ+ people and experiences in literature, art, and popular culture. Our approach to class material will be intersectional, focusing on the connection between multiple identity components including, but not limited to, race, gender, class, and sexuality. **CC:** HUM, SOCS

GSW 479 - Internship in Gender, Sexuality, and Women's Studies

Course Units: 1.0 (**TBD: Staff**) An internship experience in local agencies, social services, law and media centers, women's advocacy groups, childcare centers, gay and lesbian organizations, with health care providers, and others. The goal is to develop students' knowledge of and ability to analyze organizations that work on issues related to gender and sexuality in the Capital Region. **Prerequisite(s):** Sophomore standing and permission of the director.

GSW 490 - Gender, Sexuality, and Women's Studies Independent Study

Course Units: 1.0 (**TBD: Staff**) **Prerequisite(s):** Faculty permission required.

GSW 495 - Capstone Course on Theories of Gender, Sexuality, and Women

Course Units: 1.0 (**TBD: Staff**) A required interdisciplinary course designed as the culmination of the major or minor. This course reinforces and provides a coherent perspective on the major issues in gender studies and affords an opportunity to reflect upon the importance of the chosen major and/or minor focus in light of these issues. The topic of the capstone course varies from year to year; this year's will be Women's Rights in the United States in the fall and Feminist Film in the spring, cross-listed as EGL 304 and PSC 339, respectively. **Prerequisite(s):** GSW 100

GSW 498 - Gender Sexuality & Women's Studies Senior Thesis 1

Course Units: 0.0 (**TBD: Staff**) A student directed two-term project culminating in a thesis representing the depth and breadth of knowledge attained in Gender, Sexuality, and Women's Studies interdisciplinary course work. Student theses in GSWS are usually advised by the current director, but can be advised by any faculty member in GSWS in consultation with the director.

GSW 499 - Gender Sexuality & Women's Senior Thesis 2

Course Units: 2.0 (**TBD: Staff**) A student directed two-term project culminating in a thesis representing the depth and breadth of knowledge attained in Gender, Sexuality, and Women's Studies interdisciplinary course work. Student theses in GSWS are usually advised by the current director, but can be advised by any faculty member in GSWS in consultation with the director. **Prerequisite(s):** GSW 498

Biblical Hebrew

HBR 111 - Biblical Hebrew 1

Course Units: 1.0 (**TBD: Staff**) Study of elementary Biblical Hebrew grammar with selected readings from the Hebrew Bible.

HBR 112 - Biblical Hebrew 2

Course Units: 1.0 (**TBD: Staff**) Continuing study of elementary Biblical Hebrew grammar with selected readings from the Hebrew Bible. **CC:** LCCB

HBR 113 - Biblical Hebrew 3

Course Units: 1.0 (**TBD: Staff**) Completion of the study of elementary Biblical Hebrew grammar with selected readings from the Hebrew Bible. **CC:** LCCB

HBR 490 - Biblical Hebrew Independent Study 1

Course Units: 0.0 (**TBD: Staff**) Independent reading and thesis in the field of Greek language and/or literature. **Prerequisite(s):** HBR 113 or the equivalent.

Hebrew

HEB 100 - Basic Hebrew 1

Course Units: 1.0 (**TBD: Staff**) The beginning of a year-long sequence of three courses designed to introduce students to the Hebrew language and to familiarize students with linguistic aspects that will prepare them to function with more advanced skills. Emphasis on learners' ability to use the Hebrew language in all four skill areas, listening, reading, writing, and speaking, with particular attention given to mastering conversation in Hebrew. **CC:** HUM

HEB 101 - Basic Hebrew 2

Course Units: 1.0 (**TBD: Staff**) Continuation of HEB 100 . **CC:** LCCH, HUM

HEB 102 - Basic Hebrew 3

Course Units: 1.0 (**TBD: Staff**) Continuation of HEB 101 . **CC:** LCCH, HUM

History

HST 101 - History of the United States to the Civil War

Course Units: 1.0 (**TBD: Staff**) Political, economic, and social developments in the colonial and early national periods.

HST 102 - History of the United States Since the Civil War

Course Units: 1.0 (**TBD: Staff**) Political, economic, and social developments: continuity and change in modern America.

HST 105 - Comparative Global History to 1800

Course Units: 1.0 (**TBD: Staff**) Provides a "bird's-eye" view of human history from the emergence of human "civilization" in the Fertile Crescent to the European conquest of the Americas. Surveys the comparative development of the world's continents, regions, and empires and investigates how expansion of the "human web" facilitated both cooperation and conflict among the world's peoples. Pays particular attention to environmental and ecological determinism, the influence of technology on economic growth, the rise of "portable" religions, and the interaction of culture and politics. **CC:** LCC

HST 106 - Comparative Global History from 1800

Course Units: 1.0 (**TBD: Staff**) This course examines the broad themes in world history from the 19th century onwards, beginning with the rise of the nation-state and the expansion of European and subsequently Japanese imperialism. It looks at the indigenous and global response to colonialism,

the impulse of nationalism and the quest for modernity, as well as how race and gender came to be rethought and reconfigured going into the 20th century. We will examine the impact of the two world wars, the process of decolonization, the Cold War and the rise of globalization in the late 20th century.

HST 107 - Africa to 1800

Course Units: 1.0 (**TBD: Staff**) This course explores the history of Africa from the beginnings of humanity through the period of the trans-Atlantic slave trade. In it, we will examine political, social, economic and cultural changes in Africa, with particular focus on the relationships between local communities and the political elites who sought to rule them. This perspective will enable us to focus on the social dynamics of African communities and the daily activities of ordinary Africans, as well as on the political intrigues and roles of kings, chiefs, and merchants. **CC: LCC**

HST 108 - Africa since 1800

Course Units: 1.0 (**Spring: Peterson**) This course is a survey of the African continent from 1800 to present. In this course, we will examine the political, social, economic and cultural changes in Africa during the nineteenth and twentieth centuries. Focus will be on key themes that span much of African history during this period including: slavery and the slave trade, European conquest and African resistance, the expansion of world religions (Islam and Christianity) in Africa, colonialism, the growth of nationalism, decolonization and the emergence of independent postcolonial states, and the challenges facing contemporary African states related to political instability and economic development. Given the enormous breadth and diversity of Africa, this course explores these themes by focusing on certain case study regions and countries, such as Francophone West Africa, Nigeria, the Congo region (Zaire), the East African coast and Arabic-speaking North Africa. **CC: LCC**

HST 109 - History of Sustainability

Course Units: 1.0 (**TBD: Staff**) Sustainability. You now find the word just about everywhere. For more than a few people it has become the defining mission of their generation, an existential challenge that must be met for the survival of humanity. This is a course in thematic global history that explores the concept of sustainability from an historical perspective. Sustainability is not a new thing in human history or just a consequence of our environmentally-challenged present. Sustainability is part of our cultural inheritance with deep roots in the histories of Asia, the Americas, Europe, and Africa. Also, sustainability is not simply synonymous with environmentalism or climate change. It has always encompassed social realities like power, trade and commerce, cultural identities, human relationships to science and technology, and much more. Sustainability is a history of the societies we create and the values that define them, for good or ill. Ultimately, the history of sustainability is an opportunity to reflect on the nature of our humanity and the ideals that empower a just future. We will explore sustainability's history through primary texts, analyses of the concept across time and space, the study of sustainability challenges - successes and failures - in past societies, and contemporary realities faced by peoples across the globe, whether in the megacities of China and Latin America or the urban gardens of Detroit and the green housing cooperatives of Berlin. **CC: LCC**

HST 113 - The Origins of American Society

Course Units: 1.0 (**TBD: Staff**) The evolution of American society from its 17th-century origins through the aftermath of the Revolution.

HST 114 - The American Revolution

Course Units: 1.0 (**TBD: Staff**) The causes and consequences of the American Revolution (1763-1815).

HST 116 - Age of Jackson

Course Units: 1.0 (**TBD: Staff**) An examination of the United States in the turbulent period from 1815-1845, surveying the second party system, various utopian and reform movements, the cult of domesticity, and other wrenching transformations instigated by the market revolution.

HST 118 - Civil War and Reconstruction

Course Units: 1.0 (**Fall: Foroughi**) An examination of the causes of the deepening sectional crisis; the political, economic, and social reasons for Southern secession; the move toward emancipation as a Northern war aim; the impact of the war on women and men, with special attention to geographic location, race, and class; and the experience of Reconstruction in the South.

HST 120 - The Emergence of Modern America, 1877-1918

Course Units: 1.0 (**TBD: Staff**) The impact of urbanization and industrialization on the creation of the modern United States, 1890-1920.

HST 121 - The Depression and New Deal

Course Units: 1.0 (**Fall: Morris**) The years between the end of World War I and the beginning of World War II witnessed not only a dramatic contrast between the prosperity of the 1920s and the Great Depression of the 1930s, but also a fundamental reordering of America's political system forged during Franklin D. Roosevelt's New Deal. This course will examine the crisis and transformation of the American economy and political system during the 1920s and 1930s, and their impact on Americans of all walks of life.

HST 123 - Postwar America and the Origins of the Cold War

Course Units: 1.0 (**Winter: Morris**) The stand-off between the United States and the Soviet Union permeated the politics and culture of the United States from the end of the Second World War through the early 1960s. This course will explore the origins of the Cold War, the terms on which it was fought, and the degree to which it imposed a political and cultural "consensus" on the United States.

HST 124 - Monuments, Museums, and Movies: Introduction to Public History

Course Units: 1.0 (**Spring: Aslakson**) This course will provide an overview of public history, defined as the presentation of history to a general public audience. Students will learn the theory, methods, and practice of public history in its various dimensions, including museums, monuments, historic sites, and films; they will explore the controversies that emerge in public history settings, including the battle over the Enola Gay, the Holocaust Museum, and commemorations of September 11th; and they will engage in a public history project in the Schenectady area.

HST 125 - Coming Apart?: America in the Sixties

Course Units: 1.0 (**TBD: Staff**) A study of the breakdown of political and cultural consensus between 1956 and 1974. We will examine the degree to which counter-cultural and racial politics of the period successfully challenged the dominant political culture on issues of war, race, and gender.

HST 126 - Since Yesterday: United States History, 1974-2000

Course Units: 1.0 (**TBD: Staff**) If the United States "came apart" in the 1960s, did it come back together in the 1970s and 1980s, or something else? This course looks at the emergence of new social movements (e.g., the women's and environmentalist movements), the rise of the "new right," the Reagan "revolution" in domestic policy, and American foreign policy from the fall of Saigon to the collapse of the Soviet Bloc.

HST 128 - The American Jewish Experience

Course Units: 1.0 (**TBD: Staff**) Jews arrived in Britain's American colonies in 1654. In the space of 350 years their numbers increased dramatically and they made significant contributions to a plethora of areas in American society. Jews and Judaism also experienced significant changes through the encounter with the United States. But for all the gains in status and achievement, there are those who speak of a problematic future for American Jewry.

HST 129 - History of Sports in America

Course Units: 1.0 (**TBD: Staff**) Fields of battle (military, political, economic, and social) generally characterize the teaching of American history. Throughout times of conflict, however, it has often been the fields of American sport which have provided distraction, respite, and relief from these struggles. Meanwhile during times of peace, the fields of sport have contributed more than leisure and entertainment; they have reflected the American people's lives, hopes and dreams. Sport, in other words, has been and continues to be an active mediator in America's life, and a lens through which we can examine the broader contexts of American history.

HST 131 - African-American History 1

Course Units: 1.0 (**Fall: Aslakson**) The purpose of this course is to help you better understand both the role of race and slavery in early American history and the contributions of African-Americans to society and culture in America before 1877. The course will examine the lives of black Americans, enslaved and free, from the arrival of the first Africans in the New World through Reconstruction. It will also address more abstract ideas about cultural and "racial" differences. Throughout this course, you will be asked to consider the question "which came first, racism or slavery?" **CC: LCC**

HST 132 - African-American History 2

Course Units: 1.0 (**TBD: Staff**) This course covers the Black experience in America from the end of the Civil War until the present day. It will generally proceed chronologically, but there may be some overlap as it tries to cover certain themes, such as culture, oppression, resistance, and identity. Throughout the course students will be asked to consider the question to what extent is the African-American experience unique and to what extent is it representative of the "American" experience. **CC: LCC**

HST 135 - Latinos In/As U.S. History

Course Units: 1.0 (**TBD: Staff**) What does U.S. history look like if we consider it a Latin American nation? This course explores the history of El Norte through the eyes of border-crossing, indigenous communities, Spanish settlers in the South and West, and the Latin American and Caribbean immigrant populations that have made their homes across the country since its founding. We end with a particular focus on Latin American and Latinx communities in 21st-century New York.

HST 138 - Big History

Course Units: 1.0 (**Fall: Walker**) An exploration of the past from the big bang to the present, dividing the history of the universe, earth, life, and humanity into periods using very large scales of time.

HST 141 - Medieval Europe

Course Units: 1.0 (**Spring: Staff**) The emergence of western European civilization after the fall of the Roman Empire. The period 300-1350 is surveyed with special attention to factors that influenced later European civilization.

HST 142 - Renaissance and Reformation Europe

Course Units: 1.0 (**TBD: Staff**) The beginnings of modern Europe in the period 1350-1650 with emphasis on Italian humanism, Renaissance Florence, the Protestant Reformation, and the rise and fall of Spain.

HST 145 - Early Modern Europe

Course Units: 1.0 (**TBD: Staff**) European society from the seventeenth century through the Enlightenment, stressing social, economic, institutional, and intellectual developments.

HST 147 - Revolutionary History

Course Units: 1.0 (**TBD: Staff**) This course will survey major themes in modern European history, including: the Enlightenment and the Industrial Revolution; the French Revolution; the Russian Revolution and Soviet Communism; and the National Socialist Revolution, World War II, and the Holocaust.

HST 148 - Europe Between Two Wars

Course Units: 1.0 (**TBD: Staff**) An analysis of major socio-economic and political developments in western Europe from the end of the First World War to the beginning of the Second World War.

HST 149 - The Second World War Era

Course Units: 1.0 (**TBD: Staff**) Authoritarian movements in Europe and Asia during the Depression decade, the origins of World War II, the alliance against the Axis, the consequences of the war, and the emergence of new social and political structures during the postwar era.

HST 151 - To Hell and Back: Europe in the Twentieth Century

Course Units: 1.0 (**Fall: Berk**) This course offers a survey of the tumultuous twentieth century in Europe. War, revolution, women's emancipation and socio-economic and scientific changes constitute the subject matter of the course.

HST 152 - The Great War

Course Units: 1.0 (**TBD: Staff**) This course will cover World War I, at the time called the "Great War," beginning before 1914 with the run-up to war and ending after the war, including the postwar settlement, the early period of the Russian Revolution, and the origins of fascism in Italy and Germany. This is an international history, including the conflict on the western and eastern fronts as well as conditions on the home fronts of the various countries. The course lectures and readings will be accompanied by several films.

HST 154 - Russia in the Imperial Age

Course Units: 1.0 (**TBD: Staff**) Major institutional and ideological developments from the time of the first Romanov to the February Revolution of 1917.

HST 155 - From Lenin to Putin: The Rise and Fall of the Soviet Union

Course Units: 1.0 (**TBD: Staff**) Russia on the eve of the Revolution. Political, economic, and social developments during the periods of revolution, war, communism, NEP, rapid industrialization, and the postwar years, including the post-Soviet period.

HST 156 - History of Poland

Course Units: 1.0 (**TBD: Staff**) A history of Poland from the formation of the first Polish state to the present. Poland under foreign occupation, independent Poland, communist, and post communist Poland are the focal points in this course.

HST 157 - Modern Jewish History

Course Units: 1.0 (**TBD: Staff**) European, American & Middle Eastern Jewish communities from the fifteenth century, their origins and function within Christian Europe; response of the European Jewry to the Enlightenment and the growth of anti-Semitism and Zionism.

HST 158 - The Holocaust

Course Units: 1.0 (**Fall: Berk**) European and American Jewry in the period 1933- 1945, focusing on modern anti-Semitism, the Nazi world view, German extermination policies, the response of Europe and the United States, and Jewish behavior in a time of crisis.

HST 161 - The Peoples of Britain

Course Units: 1.0 (**TBD: Staff**) Images of royalty, Wimbledon, fish and chips, or 'Rule Britannia' sometimes come to mind when we think of Britain. Typically, England has received disproportionate attention in histories despite the fact that four 'nations' have existed within the geographical bounds of the 'British Isles' (Ireland, Wales, Scotland, England) and many peoples have found their way to those islands: Celts, Romans, Angles, Saxons, Jutes, Danes, Norse, Normans, Afro-Caribbeans, Southeast Asians, peoples of South Asia, Africa, and the Middle East. This introductory course explores the remarkable interactions among these people who defined the British Isles from the first settlements right through to the present. Upon completion of this course you will have obtained a working knowledge of British History from which to explore the subject in more depth and also be able to demonstrate understanding and appreciation of cultural complexity through the cross-cultural comparisons made in the course. **CC: LCC**

HST 171 - Europe, Africa, and the Americas in the Era of Columbus

Course Units: 1.0 (**Winter: McGrath**) A study of the relationship of Spain and Portugal with Africa, Asia, and the Americas from the early fifteenth through the late eighteenth centuries. The course examines the early civilizations of Africa, Europe, and the Americas in the era before the voyage of Columbus and the interaction among these three worlds in the centuries after the Encounter. It concludes with an examination of the cultural legacy of Africa and Europe on the indigenous societies of the Americas and the subsequent development of multicultural and multiracial independent nations. The central role of gender relations between the civilizations, the gendered conflict that characterized the era of exploration, and the role of masculinity are all examined. **CC: LCC**

HST 172 - Reform and Revolution in Latin America and the Caribbean

Course Units: 1.0 (**TBD: Staff**) Examines the political and social changes in Latin America as a result of the nineteenth and twentieth century reform and revolutionary movements, including the Unidad Popular government in Chile under Salvador Allende and its overthrow by General Pinochet and the subsequent dictatorial rule. The effect of the 1959 Cuban Revolution on Latin America; the revolutionary uprisings in Central America, in Chiapas, Mexico, and against the military government of Argentina form other key areas of examination. The course places special emphasis on the intersection of gender, race and class conflicts and movements, with particular attention to the role of emerging feminist movements. **CC: LCC**

HST 173 - History of the Caribbean and Central America

Course Units: 1.0 (**TBD: Staff**) This course covers the history of the Caribbean and Central America from pre-colonial times to the present. It includes a survey of the impact of both extinct and enduring indigenous cultures, the rivalries among Spanish, Dutch, French, and British powers for control of the Caribbean, and the history of slavery, the plantation system, rebellions and revolutions against enslavement, colonialism, and modern imperialism. The course ends with the early 21st-century struggles for self-determinism among the nations of the region. **CC: LCC**

HST 174 - Modern Ireland

Course Units: 1.0 (**Winter: Cramsie**) This course surveys the making of modern Ireland from c. 1700. It emphasizes the interplay of social, religious, and political forces that have shaped the island's history. Analytical topics include the origins of the 'Irish' peoples and the conflicts between Catholics and Protestants; Ireland's incorporation within a Protestant British imperial system; the Great Famine; the Irish Diaspora; the War of Independence and Irish Civil War; the creation of the Republic of Ireland and Northern Ireland; the restoration of women to Ireland's national stories; the failed social revolution in the Republic and the impact of a reactionary cultural climate; the Troubles and the legacy of the Good Friday Agreement. The course materials include histories, memoirs, works of literature, and film. **CC: SOCS**

HST 181 - Confucians and Conquerors: East Asian Traditions

Course Units: 1.0 (**TBD: Staff**) An overview of the traditional civilizations of China, Japan, and Korea, focusing on the emergence and development of ideologies, institutions, and social patterns up to 1800. Special emphasis on fostering an appreciation for the richness and complexity of each individual society. **CC: LCC**

HST 182 - Rebels, Reds, and Regular Folks: The Turbulent History of Modern Asia

Course Units: 1.0 (**TBD: Staff**) An analytical overview of the major themes and historical processes that shaped China, Japan, and Korea from the nineteenth century to the present. **CC: LCC**

HST 183 - Introduction to South Asian Civilizations

Course Units: 1.0 (**TBD: Staff**) In this course we shall investigate the area of South Asia by focusing on important historical debates surrounding themes such as history, religion, nationalism, colonialism and family life. We will seek to explore these themes for two to three weeks through Movies and Documentaries: Gandhi, Jinnah, Ambedkar, India Untouched, Jodha Akbar. **CC: LCC**

HST 184 - Modern India

Course Units: 1.0 (**TBD: Staff**) We will concentrate on the impact of colonialism on the Indian subcontinent and on the formation of the modern South Asian States of India and Pakistan through historically-based films. We will study the representation of Indian society and history in the

booming Bollywood film industry. The culture of colonialism, the nature of the colonial state and the emergence of nationalism, are themes which are explored. Chronologically, we will survey the history of Indian subcontinent from the inception of colonial rule in the late eighteenth century to the establishment of independent nation states of India and Pakistan in the middle of the twentieth century (1800-1947). **Prerequisite(s):** Since this is a survey course there are no prerequisites. **CC:** LCC

HST 194 - The Modern History of the Middle East

Course Units: 1.0 (**Fall: Berk**) Problems in the political, social, and economic history of the Middle East in modern times; the demise of the Ottoman Empire; impact of the West upon the Arab world; relations among the new Arab states; and the coming of modernization.

HST 195 - From Abraham to Mohamed and Beyond: The Early History of the Jews

Course Units: 1.0 (**TBD: Staff**) History of the Jewish people in its first 1600 years from tribal beginnings to the destruction of the second Commonwealth.

HST 201 - Contemporary Africa

Course Units: 1.0 (**TBD: Staff**) This course examines the history of Africa since 1950 with an emphasis on politics and culture. Through readings of novels, memoirs and historical accounts, combined with lectures, discussions and films, this course will explore the last fifty years of African history. Much of the course will focus on case studies in such countries or regions as West Africa, East Africa, the Congo, Nigeria, Algeria and Egypt. **CC:** LCC

HST 202 - African Women in History

Course Units: 1.0 (**TBD: Staff**) This course explores the history of women in Africa. It takes an historical approach to looking at the lives, experiences, stories, and changing roles of women across Africa. It situates women's history against the backdrop of gender relations in various contexts in Africa. The course focuses heavily on the writings of African women, such as memoirs, novels, and political treatises. This is a discussion-oriented seminar, interspersed with lectures on salient topics. The weekly meetings will be devoted to discussion of the readings listed in the syllabus. Each class meeting three or more members of the seminar will provide ten-minute summaries of the readings and lead the ensuing discussion. Students in charge of leading discussion should come prepared with plenty of provocative questions. **CC:** SOCS, LCC

HST 203 - Judaism/Christianity/Islam

Course Units: 1.0 (**TBD: Staff**) This course offers a comparative approach to Judaism, Christianity and Islam, three closely related religious traditions. It attempts to draw out commonalities among and differences between these traditions by focusing on their histories, their understandings of God, revelation and tradition, religion and society, and responses to social and political change. **Cross-Listed:** REL 203 **CC:** HUM

HST 204 - Wine: A Global History

Course Units: 1.0 (**Fall: Cramsie**) Global History is the most important field in History today. This thematic course in comparative global history uses an essential foodstuff in human history to weave together societies and peoples across time, space, and geography: grapes, in this case the empire of viticulture (wine-making). There are great stories of human history to be told using wine. Its history is a global environmental history: the spread, retreat, and reintroduction of wine across climate zones and distinctive terroir worldwide. Vineyards also record the natural history of grapes and their evolution, the battles with disease and infestation, the chemical processes of wine-making, the impact of technology, and the biochemical and sensory effects of color, texture, taste, and intoxication. The history of wine is also a history of empire, trade, and power. The Spanish conquest of the Americas brought with it Christianity, expropriation, and viticulture. Today migrant laborers from Mexico and Latin America harvest the grapes that find their way from Washington, Oregon, and California as wine. The commercial history of wine is thus a history of labor and social justice as old as time. Wine also records spiritual and aesthetic journeys through human history. And it is a window into today's existential challenges of sustainability and climate change. This course teaches foundational concepts in global history and introductory research skills through which students have the opportunity to complete a guided research project. **CC:** LCC

HST 205 - Clash of Civilizations?

Course Units: 1.0 (**TBD: Staff**) Are we living through a clash of civilizations? East vs West? Christianity vs Islam? Or is this too simple-minded a way to think about human history? Indeed it is. Simple-minded ideas like the clash of civilizations are not only bad history they betray the need for human understanding in our complex world. This course explores something fundamental to the human experience: the encounters, interactions, and exchanges (for good or bad) of diverse peoples and societies across time and space. We will explore four historic meeting places: Marseille and the south of France in the Classical Greco-Roman Mediterranean; the crossroads of faiths and empires that was early-modern Jerusalem; the Native American and European middle ground of the Great Lakes and the world of the Voyageurs; the hip, historic, and dynamic scene that is modern multicultural Berlin. This is a thematic course in comparative global history; it also teaches research skills and includes the opportunity for you to develop your own guided research on modern Berlin. **CC: LCC**

HST 206 - Environmental Histories of Empire

Course Units: 1.0 (**TBD: Staff**) This course will explore histories of empire in comparative perspective. It provides students with an introduction to global environmental history by focusing on the changing relationships between people and their natural environments. It takes a transnational approach, exploring various case studies drawn from different imperial settings and temporalities. We will look at the development of early states, the growth of the capitalist world economy in the Atlantic, successive periods of empire-building in Africa and Asia, new forms of resource extraction and changing commodity flows, and environmental politics, while placing the natural world at the center of our analysis. In this course, we will use a more expansive definition of imperialism to include not only formal territorial empires, but also informal economic ones and various post-colonial forms of domination. Other themes to be explored will be: changing perceptions of the natural world, industrialization, warfare, urbanization, technological transformations, and changes in production and consumption. The goal is that students will develop of better understanding of the modern world and the ways in which humans have radically changed their natural environments. **CC: SOCS, LCC**

HST 209 - Race, Gender, and Nationalism in American Sports

Course Units: 1.0 (**TBD: Staff**) This course examines the development and the history of US sports from the 19th through the 21st centuries with special focus on sports' bond with nationalism, race, and gender. Modern sports cannot escape its association with US emergence in international affairs at the end of the 19th century. Intertwined with the process of establishing national identity were muscular Christian notions about masculine prowess and belief in women's natural physical limitations accompanied by a persistent belief in the fundamental superiority of the white race and its obligation to dominate over "inferior" races and cultures. As surely as sport became associated with American identity, nationalism, gender, and race became integral defining characteristics of sport. This course will be driven primarily by reading and discussion. Lectures will be used to supplement and place the readings in historical perspective, but the focus will be on reading, comprehension, and analysis. Students are encouraged to bring a variety of pre-occupations, pre-conceived ideas, and personal viewpoints to the course; they will be expected to give oral and written expression to their analysis and perspectives.

HST 211 - American Indian History

Course Units: 1.0 (**TBD: Staff**) An overview of the diverse experiences and histories of the native peoples of North America in the last five centuries. Particular attention will be paid to native peoples' various strategies to respond to change and challenges to native autonomy and communities. **CC: LCC**

HST 212 - "Remember the Ladies": American Women to 1900

Course Units: 1.0 (**TBD: Staff**) An examination of changing gender roles from 1600 to 1890. Topics include work, family, civil and legal identity, and the impact of race, class, and geographic location on women's experiences.

HST 213 - The New Woman: American Women from 1900

Course Units: 1.0 (**TBD: Staff**) An examination of changing gender roles from 1890 to the present. Topics include the evolution of feminism, and the impact of race and class on women's experiences.

HST 216 - The Writing and Ratification of the Constitution

Course Units: 1.0 (**TBD: Staff**) A study of the major influences on the US Constitution, how it was written, and how it was adopted.

HST 219 - Revolutions in the Global South

Course Units: 1.0 (**Winter: Peterson**) Across human history in the modern age, revolutionary processes have defined politics, culture, and economic systems. They have erupted in virtually every part of the world, spread from region to region, and led to dramatic changes. Most often scholars and students have focused on revolutions in the Western world. However, this transnational and thematic course will explore the history of revolutions and revolutionaries in the global South, or the "Third World" as it was commonly known. Drawing on secondary and primary sources, students will learn about a wide variety of revolutions in Africa, Asia, and the Caribbean, ranging from anti-colonial revolts, revolutionary socialist states, opposition politics, and various movements focused on environmentalism, feminism, and indigenous rights.

HST 221 - Popular Culture and American History

Course Units: 1.0 (**TBD: Staff**) The popular arts and entertainments of the late nineteenth and twentieth centuries are placed in historical context and studied as a means to rediscover the intellectual and emotional life of ordinary Americans.

HST 222 - Other Voices: Women in the History of American Ideas

Course Units: 1.0 (**TBD: Staff**) The contribution of women to the development of American intellectual and cultural life, from Charlotte Perkins Gilman to Angela Davis.

HST 223 - Twentieth Century American Intellectual History

Course Units: 1.0 (**TBD: Staff**) An overview of the major social and political issues that shaped and unshaped American liberal thought from John Dewey to Andrea Dworkin.

HST 224 - Transnational America

Course Units: 1.0 (**TBD: Staff**) The United States is now the center of global production, yet it is also swept by the forces of international cultural change. How did we reach that position and what consequences does it have for our national integrity, our identity as Americans, our way of life, and our relationship to other nations and peoples? Students read recent literature on the history of transnationality and globalism as it has affected the economy, ethnic identity, cultural production (in literature and film), and international relations of the United States in the twentieth century.

Prerequisite(s): Any 100-level or 200-level history course or permission of the instructor. **CC:** LCC

HST 225 - American Environmental History

Course Units: 1.0 (**Fall: Morris**) This course aims to give students the knowledge and the tools to think critically about how history has shaped the present state of the earth and human relationships with it. It focuses on the history of man's interaction with nature on the North American continent, with a particular focus on the area that would become the United States, from precolonial times until the present.

HST 226 - A Novel View of US History

Course Units: 1.0 (**TBD: Staff**) This course will examine the broad scope of American history from colonial times to the present as it has been revealed in American literature and novels. Employing principally primary source literature, the course will introduce students not only to American history but to an understanding of important events and developments as comprehended by those who experienced those events or who were contemporary interpreters of those events. Supplemented by lectures on the facts of historical events, primary source works will be used to re-introduce personality and complexity to the historical context in order to stimulate student understanding of the American experience. Students will be encouraged to analyze and examine the variety of outlooks that propel history, while also learning an appreciation for the value and potential of personal scrutiny, insight, and perspective. Primarily driven by readings and discussion, lectures will be used to supplement and place the readings in historical context; however, the focus will be on reading, analysis, comprehension, and communication.

HST 227 - Interviews with History: An Introduction to Oral History

Course Units: 1.0 (**TBD: Staff**) What was history like for men and women who lived it? Oral History is the practice of collecting stories and information about the past from individuals. In this class, students will read, listen to, and watch oral histories; they will learn theories of memory as

they relate to oral history; they will discuss the ethical and legal issues surrounding oral history; and they will learn how to perform, record, and edit an oral history interview. Students will spend a significant portion of their time working on individual projects wherein they will conduct and interpret oral history interviews and write an essay based on that work.

HST 228 - History of Union College

Course Units: 1.0 (**Spring: Staff**) The history of Union College is broad and impressive; however, tight schedules while rushing to class in Butterfield or Bailey, a meeting in Hale House or Feigenbaum, a conference or guest lecture in the Nott, or an event at Achilles makes it easy to overlook that history. Since 1795, there have been wars, economic expansions and depressions, internal and external political conflicts, and social revolutions; through it all, Union has not just survived but endured, while remaining committed to the progressive ideals of its founding. This course will investigate the history of the modern, living institution that is Union today, that is, the physical realities of the college (grounds, buildings, and landscape) as well as the academic, athletic, and social environments that provide life and meaning for all who have entered its gates. Understanding the history of Union gives students an opportunity to shape the future - as Union and its alumni have shaped the past.

HST 229 - The Adirondacks and American Environmental History

Course Units: 1.0 (**TBD: Staff**) The Adirondack region of northern New York Slate has been a proving ground for shifting American attitudes toward the environment, from early colonial (ears of wilderness, to intensive resource exploitation, and to efforts to conserve natural resources and preserve distinctive wilderness areas. This course will examine Adirondack environmental history and place it in the context of broader American environmental history. It will leverage Union College's proximity to the region, and the resources of the Union College Kelly Adirondack Center, to offer students both intellectual and experiential engagement with the history of this distinctive place.

HST 231 - The Civil Rights Movement

Course Units: 1.0 (**TBD: Staff**) A survey of the civil rights movement, assessing the early campaigns of the 1940s, the development of black grassroots organizations in the 1950s and 1960s, and the impact of black nationalist consciousness in the late 1960s and early 70s. **CC: LCC**

HST 232 - History of New Orleans

Course Units: 1.0 (**TBD: Staff**) This class examines the history of New Orleans from its founding in 1718 to the present day. The course will proceed chronologically and will focus on the recurring and interrelated themes of Race, Geography, and Culture. In the process we will unravel the extent to which the crescent city is or is not representative of the history of urban America in general. **CC: LCC**

HST 240 - The Crusades: Christianity and Islam in Conflict

Course Units: 1.0 (**Winter: Staff**) The conquest of Jerusalem and the Holy Land by knights from western Europe and the response of the region's Muslims, 1096-1291. Special attention is given to the development of a crusading spirit and its corruption under the influence of religious, political, and economic expediency and personal greed.

HST 241 - Mystics, Magic, and Witchcraft in Medieval and Early Modern Europe

Course Units: 1.0 (**Winter: Staff**) A survey of learned and popular beliefs about the influence of supernatural and occult powers on individuals and society.

HST 245 - Occult Sciences and Societies

Course Units: 1.0 (**TBD: Staff**) Surveys the rise of occult sciences, such as ritual magic, astrology, and alchemy, and the influence of real and imagined secret societies dedicated to the preservation and transmission of such esoteric knowledge. Examines the legends associated with the suppression of the Templars in fourteenth-century France, and the revival of Platonism, Jewish Kabbalah, and pseudo-Egyptian Hermeticism in Renaissance Italy. Considers the dissemination of such ideas throughout early-modern Europe, the alchemical theories of Paracelsus and Isaac Newton, and the imagined societies of esoteric utopias. Concludes with the rise of Rosicrucianism, Freemasonry, and the Bavarian Illuminati and their possible influence on the French Revolution.

HST 247 - Men, Women, and Gender in Early Modern Europe

Course Units: 1.0 (**TBD: Staff**) This course is a lower-division exploration of the creation, operation, and interaction of masculinities and femininities (in the plural) in Europe between roughly 1500 and 1789. We will read both primary and secondary works on the topic. "Gender history" is not simply another way of saying "women's history." Instead, we also will employ gender as a lens through which to consider the experiences of both men and women during the period. Learning objectives for the term include critiquing the use of gender as a category of historical analysis; investigating the gap between prevailing early modern notions about manhood and womanhood and the lived experiences of modern men and women; and teasing apart the intersection of gender with other factors, especially race, class, age, marital status, and religious identity.

HST 248 - Men, Women, and Gender in Modern Europe

Course Units: 1.0 (**TBD: Staff**) This course is a lower-division exploration of the creation, operation, and interaction of masculinities and femininities (in the plural) in Europe between roughly 1789 and the present. We will read both primary and secondary works on the topic. "Gender history" is not simply another way of saying "women's history." Instead, we also will employ gender as a lens through which to consider the experiences of both men and women during the period. Learning objectives for the term include critiquing the use of gender as a category of historical analysis; investigating the gap between prevailing modern notions about manhood and womanhood and the lived experiences of modern men and women; and teasing apart the intersection of gender with other factors, especially race, class, age, marital status, and religious identity.

HST 256 - Modern European Ideas

Course Units: 1.0 (**TBD: Staff**) This course will survey important ideas in modern European history, including the writings of Jean Jacques Rousseau, Voltaire, Montesquieu, Adam Smith, Karl Marx, Charles Darwin, Friedrich Nietzsche, Sigmund Freud, Albert Einstein, Jean-Paul Sartre, Simone de Beauvoir, and Michel Foucault.

HST 257 - Modern France and Its Empire

Course Units: 1.0 (**Spring: Peterson**) In this course, we will examine the political, social, economic and cultural history of modern France and its empire since 1789. We will explore the history of France within wider transnational and imperial contexts, as well as in its post-colonial era, when immigration and cultural difference have emerged as central issues within France itself. Through lectures, discussions, novels, memoirs, and films, we will seek to understand the history of modern France as both a nation-state and empire. In particular, we will also look at the colonial and post-colonial histories of francophone West and North African countries. **CC: LCC**

HST 258 - Nazi Science, Medicine, & Technology

Course Units: 1.0 (**TBD: Staff**) This course is a history of how science, medicine, and technology interacted with Nazism, beginning with the background of the First World War and Weimar Republic, through the Third Reich, and continuing through to its legacy during the post-Second World War era. This story extends beyond Germany, both because of the international effects of this interaction, and through comparisons with science, medicine, and technology under other regimes and in other cultures.

HST 261 - Medieval Britain 1000-1509

Course Units: 1.0 (**TBD: Staff**) Britain in 1000: England was divided and the Anglo-Saxons were in a fight for survival with the Norse, the kingdom of Scots was an ill-formed hodgepodge of Gaels, Celts, Picts, Saxons, and Norse, and in the West the Cymry, the peoples of Wales, clung fiercely to their identity as the original Celtic inhabitants of Britain. In the decades after the famous Norman conquest of 1066, Britain became part of a vast French-speaking Empire. Which peoples and nations would survive, thrive, and achieve supremacy on the island of Britain? This question is examined by analyzing the Scottish wars of independence, the Hundred Years War with France, the great dynastic struggles of the English Wars of the Roses, the notorious reputation of Richard III and the rise of the Tudors, and the triumph of the Stewart kings in Scotland. **CC: LCC**

HST 262 - The Age of Henry VIII

Course Units: 1.0 (**Fall: Cramsie**) Remarkable women and men made history in Britain during the Age of Henry VIII: six wives (Catherine, Anne, Jane, Anne, Catherine and Katherine), faithful and far from saintly servants like Cardinal Wolsey, Thomas More, and Thomas Cromwell, and an evangelical boy destined to become Edward VI. This was an age of personal monarchy, patriarchy, and the rule of wealthy elites, but these figures travelled paths and pursued policies that changed the way every person lived. They nurtured and unleashed religious passions that divided

generations and whole peoples from one another, and hundreds - eventually thousands - died at the hands of those who believed they had a monopoly on spiritual truth. This course analyzes the imperial ambitions of Henry VIII and Edward VI in Britain and Ireland, the brutal dynastic and religious politics of the period, and the all-out assault on the traditional faith in the Tudor dominions.

HST 263 - The Tudor and Stewart Queens

Course Units: 1.0 (**TBD: Staff**) The radical Protestant John Knox published a tract in 1558 denouncing what he called the 'monstrous regiment of women'. He had in mind three women who dominated the political scene: Queen Mary I of England (Henry VIII's Catholic daughter) Marie of Guise (widow and queen regent of the deceased James V of Scotland); and young Mary Queen of Scots, betrothed to the future king of Catholic France. Knox had the spectacularly bad luck to publish his attack on queenship at the moment when Mary I died and her Protestant sister Elizabeth ascended the throne, a queen mighty in defense of her authority and with a temper to match her illustrious father Henry VIII. These women defined British History after 1550. Looking back on these years, Francis Bacon wrote of the 'strange perturbations' of England, having been ruled by a boy king (Edward VI) and two women before finally again seeing on the throne a proper adult male, James VI of Scotland - with nice irony, Mary Queen of Scots' son. This course explores the lives of these Tudor and Stewart queens and analyzes the intersections of gender, authority, and religious zeal that defined their age.

HST 264 - The Stuart Wars 1603-1660

Course Units: 1.0 (**TBD: Staff**) In 1603, James VI of Scotland became the first king to rule all of Britain and Ireland, when he added Elizabeth I's crown to his own. This was the first in a series of remarkable revolutions examined in this course. James successfully consolidated this new Stuart imperium in England, Wales, and Scotland. The Protestant plantations in Ulster created the origins of the modern-day troubles in Northern Ireland. Settlements in the Americas inaugurated a British Atlantic Empire built on sugar and tobacco, slavery and a British diaspora. James passed to his successor Charles I a dangerous ideology of imperial kingship that asserted the crown's unchallenged authority over all matters spiritual and temporal. When Charles attempted to make good on that ideology in his religiously and ethnically diverse kingdoms, the result was war, wars that eventually cost the king his head. For the first and only time, a British king was tried and executed for committing tyranny, the monarchy abolished, and a republic created. Inspired by the message of radical social justice in the Bible, English men and women demanded freedom and equality in these years. **CC: LCC**

HST 265 - The Museum: Theory and Practice

Course Units: 1.0 (**Spring: Mandancy**) This course is designed to introduce students to the work of museums through an internship at a Schenectady Museum and accompanying seminar. Articles from anthropology and history (including art history) expose you to the range of practical (e.g., exhibit design, collections policy, planning educational programs) and theoretical issues scholars study (e.g., intellectual property, commodifying culture, whose voice and history should be heard). The internship at a Schenectady Museum gives hands-on experience with museum work and the day-to-day issues museum staff confront. Several fieldtrips introduce different types of museums. **Cross-Listed: ANT 265**

HST 268 - The Making of Modern Scotland

Course Units: 1.0 (**TBD: Staff**) Kilts, haggis, heather, and Highlands: all things that come to mind when we think of Scotland. Yet few of us probably appreciate just how much the people of that rugged country contributed to modern history: radical Protestantism and the King James Bible, Highland regiments and Enlightenment thinkers, links golf and Robbie Burns, the steam engine (James Watt) and the "invisible hand" (Adam Smith), Trainspotting (Irvine Welsh) and the Edinburgh Arts Festival. This course studies Scotland's history and its people's search for a modern identity. **CC: LCC**

HST 269 - Orwell's England 1900-1950

Course Units: 1.0 (**TBD: Staff**) The English writer George Orwell did far more than give us the famous novel 1984. Just 47 years old when he died, Orwell lived through the decades that defined both his England and the 20th century. Too young to fight in the Great War, Orwell became a colonial administrator in Burma before answering the call to write. Orwell's pen interrogated English society, championed social justice, and denounced totalitarian ideologies of the Right and Left. He chronicled the epic history through which his generation lived: British imperialism, the Great Depression, Stalinism and the rise of Fascism, Britain's 'finest hour' in World War II, and the challenges of building a just, peaceful order in a world dominated by two rival superpowers. This course examines the history of England and the first half of the twentieth century through a selection of Orwell's novels, non-fiction books, essays, and reportage combined with standard historical accounts, film, and critical analyses of Orwell's literary record. By the time you complete this course you will have studied the works of an important literary figure and used your critical literary and historical analysis of them to broaden and deepen your understanding of England and the Twentieth Century. **CC: HUL**

HST 270 - History of Latin American Popular Culture

Course Units: 1.0 (**Winter: McGrath**) This course examines the history of Latin America and the Caribbean in the 19th and 20th centuries. Our "texts" for this course are novels, political cartoons, movies, TV shows and music, along with traditional history books. The course seeks to examine the way that Latin American societies have depicted themselves in the popular media, the way that the United States has viewed and absorbed Latin American culture, and the ways that historians have sought to explain the transformations in various countries by examining popular culture. Since Latin American and Caribbean cultures are so closely linked to the United States, and because an increasing number of U.S. citizens are of Latino descent, this course offers valuable insights into the transformations occurring in US culture. **CC: LCC**

HST 271 - History of Mexico

Course Units: 1.0 (**TBD: Staff**) Mexican civilization from its origins to the present - ancient Maya and Aztec cultures; the Spanish conquest; colonial society; the independence wars; Mexico in the nineteenth and twentieth centuries, especially the Mexican Revolution; and current cultural, social, and economic issues, including the Zapatista rebellion, NAFTA, and the changing nature of the borderlands region between Mexico and the USA. **CC: LCC**

HST 272 - History of Brazil

Course Units: 1.0 (**TBD: Staff**) This is a survey interpretation of Brazilian history from the days of Portuguese expansion to the present, including the contrast between the urban and rural areas, the Atlantic slave trade, slavery and the resistance to it, the plantation system and post-abolition race relations, the destruction of the rainforest, the emergence of democratic structures in modern Brazil, and the rise of Brazil as a 21st century economic powerhouse. **CC: LCC**

HST 274 - Social and Political Movements in Latin America

Course Units: 1.0 (**TBD: Staff**) This course examines the history of recent social movements in Latin America. We will explore a variety of issues including democracy, racism, class, gender and ethnic divisions, human rights, globalization and popular movements. Rather than viewing Latin America from a North American point of view, we will examine how Latin Americans see themselves and how their culture, economics, and politics have developed in different directions than other parts of the world, especially the United States and Europe. While social movements have at times erupted into full-fledged revolutionary upheavals, more often Latin American struggles have been ongoing, such as factory occupations, land seizures, and demonstrations for gender equality, workers' rights, indigenous autonomy, protection of the environment, and students' rights. **CC: LCC**

HST 275 - United States Foreign Relations and Modern Latin America

Course Units: 1.0 (**Fall: McGrath**) This course is about relationships, exchanges, and tensions among the people and nations of the Americas from the mid 19th century to the present. The most powerful foreign influence (political and otherwise) in Latin America has consistently been the US, often with quite negative consequences. In the 21st century relations between the US and Latin America have changed dramatically. China has replaced the US as the most important trading partner for several countries, particularly Brazil, the largest economy of Latin America. In addition, the US is experiencing a demographic transformation with an increasing number of immigrants from Latin America making up the populations of just about every state. The history of the US and Latin American is increasingly a "shared" history. In this course we will look at interconnections, comparisons, and the common links between Latin America and the US in what is now a history of both foreign and domestic relations. **CC: LCC**

HST 278T - South Africa Mini-Term

Course Units: 1.0 (**TBD: Staff**)

HST 281 - Samurai to Salarymen: Modern Japanese History

Course Units: 1.0 (**TBD: Staff**) Analysis of the social, economic and political changes that have characterized Japan's emergence as a world power from the Meiji restoration to the present. **CC: LCC**

HST 282 - The Mongols: Terror, Trade and Tolerance

Course Units: 1.0 (**Spring: Madancy**) This course explores the rise, fall, and memory of the great Mongol empire. Students will read not only about the Mongols themselves, but also about the many cultures and countries that the Mongols conquered, and we will analyze those fraught cross-cultural encounters through primary and secondary source materials. We will also look at how the overwhelmingly negative portrayal of the Mongols has evolved over time, and students will look at the way Genghis Khan is depicted in films and monuments. **CC: LCC**

HST 283 - The Mao Years

Course Units: 1.0 (**TBD: Staff**) This course explores the phenomenal changes and catastrophic consequences of Mao Zedong's domination of China. Although the bulk of the class focuses on events following the founding of the People's Republic of China in 1949 to Mao's death in 1976, we will begin by looking at the China into which Mao was born in 1893 and trace his rise to power. We will also examine the legacy of the Mao years on contemporary Chinese politics and society. Students will analyze Mao's China through memoirs, films, visual propaganda, secondary analyses, and of course, Mao's Little Red Book. **CC: LCC**

HST 284 - Hobbled and Heroic: Women in China and Japan

Course Units: 1.0 (**TBD: Staff**) A comparative look at how the societies of China and Japan shaped the various roles assumed by women in these two cultures, as well as the evolution of those roles over time. **CC: LCC**

HST 285 - The Samurai: Lives, Loves, and Legacies

Course Units: 1.0 (**TBD: Staff**) This course explores the evolution of the samurai as a caste, their military and family lives, their passions, and their symbolic meaning to Japanese and to others. We will be reading first-hand accounts written by samurai men and women, viewing a number of well-known and lesser-known samurai films, and looking at how the realities of samurai life compare with the many meanings the samurai have acquired over the centuries. **CC: LCC**

HST 286 - Women in South Asia

Course Units: 1.0 (**TBD: Staff**) This course takes a historical approach towards the topic of gender and sexuality in South Asia, with a particular, though not exclusive, focus on the history of women in the region. The course has three major goals: first, to analyze the colonial state and its policies with respect to women and gender relations; second, to study gender relations, women's voices and women's movements within the context of nationalist struggles in the post-colonial era; and third, to understand the complexities of trying to recover the "voice" of heterogeneous groups of women in South Asia, divided along lines of caste, class, region, occupation and religion. Study material will include academic texts, films and popular television from the subcontinent. **CC: LCC**

HST 287 - Film and Modern India

Course Units: 1.0 (**TBD: Staff**) This course uses a medium of visual representation-cinema-to explore the portrayal of India. It historically traces the development of the cinematic industry in India and highlights the changing images of the region since the 1950s. Each decade evokes a list of stereotypes, of ideas, and of historical realities. We will examine the extent to which films in each decade captured the reality of the period. In particular, we will trace the maturation of the idea of a nation through films and we will explore the positioning of gender in these decades. In general, this course will adopt critical approaches for looking at aesthetics and the representation of South Asia through cinema. **CC: LCC**

HST 288 - Twenty-First Century India: Bombay to Mumbai

Course Units: 1.0 (**TBD: Staff**) Bombay represents a distinctive mode of cultural experience in India - an unceasing traffic in things, people, images, and ideas. It has been the crucible of social and cultural politics in India. It is the epitome of modern Indian imagination. The course will examine this state of modernity by doing a focused study on the city of Bombay as a city, society and as the capital of popular culture in India. Some questions the course will examine are: what happens in India when cities-within-cities coincide or collide? How are the categories of caste, class, and ethnicity mapped onto urban bodies and landscapes? What are the political implications of the production of popular culture? How does violence transform the geography of a city and its urban experience? **CC: LCC**

HST 289 - Global Indians: South Asian Identity in the United States

Course Units: 1.0 (**TBD: Staff**) The Indian diaspora today constitutes an important, and in some respects a unique force, in world culture and in the United States. We will begin by studying Indians migrating worldwide through the nineteenth and twentieth centuries with a focus on the United States to pose critical questions about identity, race, religion, gender, cultural assimilation and change. **CC:** LCC

HST 291 - Construction for Humanity

Course Units: 1.0 (**TBD: Staff**) An interdisciplinary introduction to the technology of construction and the social uses of building by humans. The course considers types of building materials and their application to domestic housing, castles, cathedrals, palaces, monuments, dams, bridges, tunnels, and skyscrapers. **Cross-Listed:** ENS 291 **CC:** SET

HST 292 - History of Computing

Course Units: 1.0 (**TBD: Staff**) A survey of tools for computation, from number systems and the abacus to contemporary digital computers. The course focuses on the development of modern electronic computers from ENIAC to the present. Study of hardware, software, and the societal effects of computing. **Cross-Listed:** CSC 080 **CC:** SET

HST 293 - History of Medicine

Course Units: 1.0 (**Winter: Staff**) This course offers a survey of the history of medicine in the Western world from the ancient Greeks to the present. We will consider several key moments in this history, such as the so-called "Greek miracle" in medicine (Hippocrates), the discovery of blood circulation (William Harvey), and the invention of bacteriology (Louis Pasteur and Robert Koch). In the last two class sessions we will focus more specifically on the history of psychiatry. All of the class readings are primary sources. **CC:** SOCS

HST 295H - History Honors Independent Project 1

Course Units: 0.0 (**TBD: Staff**)

HST 296H - History Honors Independent Project 2

Course Units: 1.0 (**TBD: Staff**)

HST 299 - The Nuclear Age

Course Units: 1.0 (**Spring: Walker**) The nuclear age began with the discovery of radioactivity on the eve of the twentieth century and continues on to the present. The technology people have created to study and exploit the energy and particles released by nuclei, including nuclear weapons and nuclear power, but also many other applications in industry and medicine, have defined this age. This course will survey these economic, political, social, and cultural problems facing mankind: the proliferation of nuclear weapons, and human-induced climate change.

HST 302 - Comparing Muslim Cultures

Course Units: 1.0 (**Fall: Peterson**) This course explores the history of Islam in diverse regional and temporal settings. It explores the unity of Islam, through an examination of the early history of the religion and its founding texts and tenets. However, the main emphasis of this course will be Islam's remarkable heterogeneity over time and space; the foci will be case studies drawn from across the Muslim world - in Africa, the Middle East, Asia and Europe. Through readings and discussions, the course examines the following ten topics: The foundation of Islam, the expansion of Islam and conversion processes, Muslim travelers and trade, religious tolerance, women and gender in Islam, Islamic Education, religious revivalism and reform, Muslim lands under European colonial rule, Islam in the West, and the challenge of modernity. **Prerequisite(s):** Any 100-level or 200-level history course or permission of the instructor. **CC:** LCC

HST 304 - Cold War in Africa

Course Units: 1.0 (**TBD: Staff**) This course will explore the Cold War period in African history with particular focus on theaters of conflict, such as the Congo, the Horn of Africa, and Angola, as well as revolutionary movements. We will examine modes of governance and political culture in African states, socialist and capitalist variants of development, and their discontents. **Prerequisite(s):** Any 100-level or 200-level history course or permission of the instructor. **CC:** LCC

HST 310 - Special Topics in United States History

Course Units: 1.0 (**TBD: Staff**) **Prerequisite(s):** Any 100-level or 200-level history course or permission of the instructor.

HST 312 - "Bonds of Womanhood": History of Women's Rights in the United States

Course Units: 1.0 (**TBD: Staff**) This course examines major themes in the study of women's rights in the United States. Topics include constitutional and legal rights changes over time; the interplay of gender with race, class, and sexuality involved in "rights" movements since the nineteenth century; and current controversies over women's rights. **Prerequisite(s):** Any 100-level or 200-level history course or permission of the instructor.

HST 315 - Race and Constitution

Course Units: 1.0 (**TBD: Staff**) One purpose of this course is to help you better understand the role of race in the legal, constitutional, and political history of the United States. Issues regarding race and slavery have been a constant source of constitutional debate (in one way or another) from the drafting of the Constitution until the present day. Focusing on racial issues, this course examines the historical context in which the Constitution of the United States was drafted and ratified and explores the various methods by which its meaning has changed since 1787. Therefore, this course is about both race in America as well as the Constitution and Constitutional interpretation. **Prerequisite(s):** Any 100-level or 200-level history course or permission of the instructor. **CC:** LCC

HST 322 - Slavery and Freedom

Course Units: 1.0 (**TBD: Staff**) Examines major themes in the historiography of American slavery. Topics include the relationship between racism and the growth of slave labor, the development of African American slave culture, the nature of the enslaved family, and the transition from slavery to freedom. **Prerequisite(s):** any 100-level or 200-level history course or permission of the instructor. **CC:** LCC

HST 323 - Race and Revolution

Course Units: 1.0 (**Fall: Alaskson**) This course examines the American Revolution and the Haitian Revolution. With regard to the former, it addresses the "Jefferson question" - that is, how could the author of the Declaration of Independence be the owner of over 200 slaves. Therefore, it deals with competing interpretations in the Early American Republic of the Ideology of "liberty" and "equality." Next, the course delves into the far more radical Haitian Revolution, the only successful slave revolution in history. It will deal with the influences of the American and French revolutions on the French New World colony of St. Domingue that made the Haitian revolution possible. Finally, the course examines the impact of the Haitian Revolution on slavery and the anti-slavery movement in the United States. **Prerequisite(s):** Any 100-level or 200-level history course or permission of the instructor. **CC:** LCC

HST 324 - Race in American Memory

Course Units: 1.0 (**TBD: Staff**) "The struggle of man against power," wrote Milan Kundera, "is the struggle of memory against forgetting." This course will examine that struggle as it has taken place in the United States around the issue of race. How have Americans as a nation chosen to remember events that involved race? How and by whom were these collective memories constructed? In what ways were they contested? How have they changed over time? We will explore these issues focusing on such phenomena as Indian removal, slavery, the Civil War, Jim Crow, Japanese internment and World War II, and the Civil Rights movement, examining depictions in public history and popular cultural forms, including memorials, museums, battlefields, literature, and film. **Prerequisite(s):** Any 100-level or 200-level history course or permission of the instructor. **CC:** LCC

HST 325 - War in American Memory

Course Units: 1.0 (**TBD: Staff**) In recent years, historians have become increasingly interested in collective memory: its construction, its evolution, and the ways in which it has been used as an instrument of power. Collective memories of wars in particular work to inform ongoing debates about national identity. This course examines the ways that Americans have remembered their nation's wars. How were these collective memories constructed and in what ways were they contested? What do they reveal about social, political, and economic tensions? To what ends were these collective memories mobilized? How have they changed over time, and how do we as historians understand those changes? In this class we will explore traditional expressions of war memories such as monuments, memorials, and battlefields as well as cultural expressions of these memories in art, literature, and film. **Prerequisite(s):** Any 100-level or 200-level history course or permission of the instructor.

HST 331 - Representing America: United States History in Film

Course Units: 1.0 (**TBD: Staff**) This course compares the representation of American history in Hollywood film with the reconstruction of our past by scholars. Each week students will critically examine the historically-based films of D. W. Griffith, John Ford, Frank Capra, and others. **Prerequisite(s):** Any 100-level or 200-level history course or permission of the instructor.

HST 333 - Hollywood Film

Course Units: 1.0 (**TBD: Staff**) In studying the history of Hollywood film, then, we will study one of the most important elements of American culture as seen at home and from abroad. Our objectives in this course will be to get behind the clichés and platitudes about the Hollywood experience to its more complex and substantive history. We will learn the basic chronology of American dramatic film history, the tools of historical film research and some of the methods of technical film analysis. **Prerequisite(s):** Any 100-level or 200-level history course or permission of the instructor.

HST 336 - The Roosevelt Era

Course Units: 1.0 (**TBD: Staff**) This course will focus on major interpretive issues that surround the presidency of Franklin Delano Roosevelt. We will study how historians have disagreed, over time, on issues such as: Was FDR a raving radical or the best friend of big business? Was the New Deal a good deal or a raw deal for African Americans? Was World War Two a "good war"? Could FDR's administration have done more to prevent the Holocaust? This is a reading-intensive, discussion-centered class that requires active student engagement. **Prerequisite(s):** Any 100-level or 200-level history course or permission of the instructor.

HST 340 - Special Topics in European History

Course Units: 1.0 (**TBD: Staff**) **Prerequisite(s):** Any 100-level or 200-level history course or permission of the instructor.

HST 362 - Black Britain: Race and Empire

Course Units: (**Winter: Cramsie**) A future king of Great Britain is asked if the royal family is racist. Black Lives Matter activists in Bristol pull down the statue of the notorious slave trader Edward Colston and dump it into the very harbor from which his ships offloaded slaves. The BBC refuses to repeat an episode of the iconic 1970s sitcom Fawlty Towers for being racially insensitive ... to Germans - no one mentions that a British West Indian doctor is labelled with the n-word. Netflix strikes gold with the multicultural cast and romping sexuality of Bridgerton, turning the staid "white" Regency period on its head. The Tories launch a "war on woke" for votes, historical truth be damned. Just how can people figure out what it means to be a citizen of the United Kingdom today? Through an analysis of history, literature, film, and media this course reveals the unknown, lost, and censored history of race and empire that defines the United Kingdom's past. It is a burden of history carried by every U.K. citizen, but in dramatically unequal and inequitable ways. We will learn how historical ignorance and dishonesty fuel racism in the U.K. today - as they do in so many countries. In this course, students play an active role in developing and selecting the content through which we explore these pressing questions of social justice. **Prerequisite(s):** Any 100-level or 200-level history course or permission of the instructor. **CC: LCC**

HST 366 - British Cinema

Course Units: 1.0 (**TBD: Staff**) What films come to mind when you see the words "British Cinema"? Alfred Hitchcock's 39 Steps or Carol Reed's classic film noir The Third Man? Fabulous historical epics like Zulu, Elizabeth, or Braveheart? Comedies from The Ladykillers to the unclothed Sheffield steelworkers of The Full Monty? The tale of football of multicultural Britain that is Bend It Like Beckham? This course will study the historical development of British cinema, tracing its roots from music halls at the turn of century to the multiplexes of a globalized culture dominated

by Hollywood. We will also explore the different types and genres of film to be found in British cinema: realism and expressionism, cinema as national popular culture, humor and horror, constructions of Britishness, film as an ideological medium, films that pushed the boundaries of sex and orientation, epics, and imperial and post-colonial themes that played out on the screen. By the end of this course you will understand the complex and diverse character of British cinema through the analysis of actual films and engagement with critical studies of them. This is a course for advanced students taught in an intensive seminar format; you will be expected to view films outside of class time. **Prerequisite(s):** Any 100-level or 200-level history or film studies course or permission of the instructor. **CC:** LCC

HST 367 - The British Empire

Course Units: 1.0 (**TBD: Staff**) How did the peoples of two windswept, rainy islands - Britain and Ireland - off the northwest corner of Europe create the world's greatest modern empire? Through an analysis of history, literature, and film, this course analyzes the process of empire-building in the eighteenth and nineteenth centuries, the interaction with and impact on the colonial peoples of North America, Asia, and Africa, and the "end" of empire in the twentieth century. This is a course for advanced students taught in an intensive seminar format that emphasizes the creative and critical examination of topics through scholarly reading and active discussion. Prerequisite: any 100-level or 200-level history course or permission of the instructor. **Prerequisite(s):** Any 100-level or 200-level history course or permission of the instructor. **CC:** LCC

HST 370 - Special Topics in Latin American History

Course Units: 1.0 (**TBD: Staff**) **Prerequisite(s):** Any 100-level or 200-level history course or permission of the instructor. **CC:** LCC

HST 372 - Sex, Race and Gender in Latin America

Course Units: 1.0 (**Spring: McGrath**) This course examines the history of the intersection of race, sex and gender in Latin America from the pre-colonial period to the present, especially as evidenced in the changing status of women and the patriarchal order. This history traces the effect of broader societal transformations such as colonialism, imperialism, and economic and political developments on the gender division of labor and the construction of class, race and national identity. **Prerequisite(s):** Any 100-level or 200-level history course or permission of the instructor. **CC:** LCC

HST 380 - Special Topics in East Asian History

Course Units: 1.0 (**TBD: Staff**) **Prerequisite(s):** Any 100-level or 200-level history course or permission of the instructor. **CC:** LCC

HST 383 - The Last Dynasty: The Glory and Fall of the Qing Empire, 1644-1911

Course Units: 1.0 (**TBD: Staff**) For 250 years, the Qing Dynasty ruled China, but when it fell in the dramatic 1911 Revolution, the entire imperial system fell with it. This course will focus on the enormous social, political, and economic changes that shaped China during the reign of the Manchu dynasty and changed China forever. **Prerequisite(s):** any 100-level or 200-level history course or permission of the instructor. **CC:** LCC

HST 401 - Seminar in Africa/Middle East

Course Units: 1.0 (**TBD: Staff**) **Prerequisite(s):** Any 100-level or 200-level history course or permission of the instructor. **CC:** LCC

HST 402 - Seminar in Africa/Middle East: French Empire

Course Units: 1.0 (**TBD: Staff**) This course examines the history of the French empire in West Africa, North Africa and Southeast Asia. The aim of the course is to introduce students to the history of the wider Francophone world. Three main phases in the long history are explored: colonialism, decolonization and immigration. The course moves chronological through these phases exploring each in diverse geographical settings, and drawing on readings pertaining to particular themes such as the culture of empire, political economy of colonialism, women and gender, literature and expressive culture, colonial violence, and resistance. **Prerequisite(s):** Any 100-level or 200-level history course or permission of the instructor. **CC:** LCC

HST 411 - Seminar in US History: History of New York City

Course Units: 1.0 (**TBD: Staff**) New York has occupied the center of American financial, cultural, and political life since the Civil War. This course will trace the history of New York City from the early 19th century to the end of the 20th, as it rose to become the preeminent urban center of the

United States and, for some, the world. We will look at the city's political, social, and cultural history in all its dimensions, including its service as the primary port of disembarkation for European immigrants, its role as a cultural capital and its history as a center of political dissent. **Prerequisite(s):** Any 100-level or 200-level history course or permission of the instructor.

HST 412 - Seminar in US History: The Old South

Course Units: 1.0 (**TBD: Staff**) This class examines the history of the Old South, focusing on the period from 1800 to 1861. The lectures and readings cover a variety of topics, including myths and facts about southern society and culture, slavery and the strengthening of southern distinctiveness, and political events that eventually lead to the creation of a separate (short-lived) southern nation in 1861. **Prerequisite(s):** Any 100-level or 200-level history course or permission of the instructor.

HST 413 - Seminar in US History: Disasters in American History

Course Units: 1.0 (**Spring: Morris**) This research seminar will examine the American experience with disasters over the course of the past three centuries. We will study how natural and technological disasters have impacted American society in different eras; how explanations for the cause of disasters have changed over time; how factors such as race and class have influenced vulnerability to disaster; and how charitable and governmental responses to disaster have evolved over the course of American history. **Prerequisite(s):** Any 100-level or 200-level history course or permission of the instructor.

HST 414 - Seminar in US History: Lincoln: Politician to Pop Icon

Course Units: 1.0 (**TBD: Staff**) Abraham Lincoln has received perhaps the most attention of any U.S. president in both scholarly studies and popular portrayals. Why? This course examines Lincoln during his lifetime: as a man coming of age in Jacksonian America, as an itinerant lawyer, as a fond father and troubled husband, as a politician during a major change in the party system, and as a wartime president. Furthermore, we consider Lincoln's post-assassination career from martyred president to memorialized and criticized symbol of civil rights to motion picture subject. Students will propose, research, and write a seminar paper that examines an aspect of Abraham Lincoln as a major figure in American history and culture. **CC: WAC**

HST 431 - Seminar in European History: Nazism

Course Units: 1.0 (**Winter: Walker**) A history of National Socialism (Nazism) from its origins after the First World War to its postwar legacy, including the Second World War and Holocaust. Students will write a research paper based on both secondary and primary sources. **Prerequisite(s):** Any 100-level or 200-level history course or permission of the instructor.

HST 461 - Seminar in European History: Discovery of Britain and Ireland

Course Units: 1.0 (**TBD: Staff**) The broad topic of this seminar is the 'discovery' of early-modern Britain and Ireland by its own people. When we think of discovery in the early modern period, what comes to mind are often images of intrepid explorers pushing the boundaries of geography and scientific knowledge, merchants eager to tap the exotic wealth of 'the East', or religious fanatics bent on the conquest of bodies and souls in the Americas. Yet for the peoples of Britain and Ireland, their own islands were an undiscovered country in 1500. Only a tiny number of people could claim to have seen some or all of the country outside their own valley or village. By contrast, travel and tourism were commonplace in Britain and Ireland by 1800. What was the experience like for those British and Irish men and women who explored the undiscovered country at home in the three hundred years between? What did they have to say about the people and places they encountered? How did their works "construct" their fellow inhabitants? In this seminar you will learn methods of inquiry that can be applied to answer such questions, conduct original research using early-printed books and manuscript travel narratives, and complete a research paper of your findings. **Prerequisite(s):** Any 100-level or 200-level history course or permission of the instructor.

HST 471 - Seminar in Latin America: The Cuban Revolution

Course Units: 1.0 (**TBD: Staff**) This seminar examines the history of Cuba from the 1959 triumph of the revolution led by Fidel Castro and the 26th of July Movement, through the several decade-long period in which Cuba struggled to build an independent communist nation aligned with the Soviet Union, into the post-Cold War decades since the demise of the Soviet bloc and ending with the recent opening of relations with the United States. Students will write a seminar paper on a topic of their choice, utilizing primary and secondary source. **Prerequisite(s):** Any 100-level or 200-level history course or permission of the instructor. **CC: LCC**

HST 481 - Seminar in East Asian History: Remembering World War II in Asia

Course Units: 1.0 (**TBD: Staff**) World War II was the most destructive conflict of the twentieth century, but many students in America are unfamiliar with the toll it took on Asia and why residual tensions between Japan, China, and Korea remain so real and so raw today. This course examines how the war came about, how it is remembered, and how its complex legacy still affects the region. **Prerequisite(s):** Any 100-level or 200-level history course or permission of the instructor. **CC:** LCC

HST 490 - History Independent Study 1

Course Units: 1.0 (**TBD: Staff**)

HST 491 - History Independent Study 2

Course Units: 1.0 (**TBD: Staff**)

HST 492 - History Independent Study 3

Course Units: 1.0 (**TBD: Staff**)

HST 493 - History Independent Study 4

Course Units: 1.0 (**TBD: Staff**)

HST 498 - History Senior Thesis 1

Course Units: 0.0 (**TBD: Staff**)

HST 499 - History Senior Thesis 2

Course Units: 2.0 (**TBD: Staff**)

Interdepartmental

IDM 295H - Interdepartmental Honors Independent Project 1

Course Units: 0.0 (**TBD: Staff**) First part of the two term scholars independent project. The first part is graded Pass or Fail.

IDM 296H - Interdepartmental Honors Independent Project 2

Course Units: 1.0 (**TBD: Staff**) Second part of the two term scholars independent project. **Prerequisite(s):** IDM 295H

IDM 487 - Double Major Thesis 1

Course Units: 0.0 (**TBD: Staff**) First part of a three term thesis for students pursuing a double major. The first part is graded Pass or Fail.

IDM 488 - Double Major Thesis 2

Course Units: 2.0 (**TBD: Staff**) Second part of a three term thesis. **Prerequisite(s):** IDM 487

IDM 489 - Double Major Thesis 3

Course Units: 1.0 (**TBD: Staff**) Third part of a three term thesis. **Prerequisite(s):** IDM 488

IDM 490 - Interdepartmental Independent Study

Course Units: 1.0 (**TBD: Staff**) For independent studies that span two departments. By permission of instructor only.

IDM 498 - Interdepartmental Senior Thesis 1

Course Units: 0.0 (**TBD: Staff**) For interdepartmental majors who are pursuing a two term senior thesis. The first half is graded Pass or Fail.

IDM 499 - Interdepartmental Senior Thesis 2

Course Units: 2.0 (**TBD: Staff**) Second half of a two term senior thesis. **Prerequisite(s):** IDM 498

Integrated Math-Physics

IMP 120 - Integrated Math/Physics

Course Units: 2.0 (**TBD: Staff**) An introductory team-taught, two-term-long sequence of integrated courses, two in mathematics and two in physics, roughly spanning the content of MTH 115 , MTH 117 , PHY 120 and PHY 121 . Designed for engineering students as well as other interested students. **Prerequisite(s):** MTH 113 , by invitation. **CC:** QMR, SCLB

IMP 121 - Integrated Math/Physics

Course Units: 2.0 (**TBD: Staff**) An introductory team-taught, two-term-long sequence of integrated courses, two in mathematics and two in physics, roughly spanning the content of MTH 115 , MTH 117 , PHY 120 and PHY 121 . Designed for engineering students as well as other interested students. **Prerequisite(s):** IMP 120 **CC:** QMR, SCLB

Interdisciplinary

ISC 008 - Internship

Course Units: 0.3 (**TBD: Staff**) Students who have secured an internship that meets College guidelines may apply for an Internship Transcript Notation. "ICS 008 Internship Transcript Notation" is 0.3 course credits and is graded Pass/Fail. For more information please contact sholarsdirector@union.edu

ISC 080 - Exploring Health Care through Community-Based Learning

Course Units: 1.0 (**TBD: Staff**) A field course combining supervised observation and/or community based learning experiences in various health care settings with the study of problems and means of health care delivery and the social determinants of health. **Note:** On campus seminar meetings are required. Does not fulfill CC science credit.

ISC 260 - Social Entrepreneurship

Course Units: 1.0 (**TBD: Staff**) Entrepreneurs identify opportunities, mobilize resources and make things happen. This course applies the active mindset of the entrepreneur to social organizations. The measure of success is not profit, but change. Passion and mission are the motivators. Examples include feeding the hungry, improving the environment, educating the destitute, housing the poor, training the unskilled, caring for the disenfranchised sick, and much more. Jeroo Billimoria founded Child line in Mumbai, India that provides services to street children. Veronica Khosa

founded Tateni that works with aids victims in South Africa. Jacob Schramm founded College Summit to make college accessible to low-income students in the U.S. And the list goes on. In the course, we will study many examples of social entrepreneurship, identify best and worst practices, work with local social entrepreneurial organizations and identify opportunities to make the world a better place. **CC:** LCC

ISC 299 - Developing a Vision

Course Units: 1.0 (**TBD: Staff**) Throughout history, leaders in many contexts have used "vision" as a means to not only communicate their desires for the future but also to motivate their followers and supporters to great achievements. This course focuses on developing skills in creating, articulating and planning a vision that will inspire the students (and their supporters) to achieve their goals. This class is intended for mature students who want to learn skills that will help them understand and shape the world around them.

ISC 300 - Students Call for Social Change: Write to Change the World

Course Units: 1.0

(**TBD: Staff**) Storytelling is powerful. Storytelling can change the way we see reality, and ourselves in it. Storytelling can inspire; it can change lives. In this class, students will write a personal narrative that calls for social change. Each writer will grapple with a unique and personal issue that has significantly impacted their life. They will set out to express their call to action so as to inspire the next wave of changemakers. This is a highly participatory class in which students work to support one another through workshop-based activities and constant reflection, writing, and editing. Students will work in teams to write, edit, typeset, market, and design their book. This book will be published through Amazon's platform known as "Createspace." In the process, students will gain the skills needed to communicate to a broader public and become published authors. Students will discuss the meaning of social change in their everyday lives and examine what they can learn from other young social changemakers by reading books, such as Adam Braun's *The Promise of a Pencil: How an Ordinary Person Can Create Extraordinary Change*, and viewing films like *The Clean Bin Project* and *Living on One Dollar*. They will also write a journal to reflect on their own growth throughout the course.

ISC 325 - Entrepreneurship Seminar

Course Units: 1.0 (**TBD: Staff**) The object of the course is to develop business/ marketing plans for senior projects in engineering that will explore the potential for commercialization. Interdisciplinary teams are organized around each senior project. In order to be successful, the engineers have to communicate the value of their innovative project to liberal arts students; liberal arts students have to communicate the marketing and business strategy to engineers. Engineering senior projects with elements of social responsibility are preferred. This course is about interdisciplinary communication, teamwork, social responsibility, creativity and entrepreneurship.

ISC 360 - Humanities Super Seminar

Course Units: 1.0 (**TBD: Staff**) A multidisciplinary course taught by three different humanities faculty. Based on a different overarching topic every year, students from all disciplines across campus engage in the reading and analysis of visual and written material, in deeply challenging conversations, in the synthesizing of ideas, and in the creation of a host of different projects, such as podcast interviews, photographic journals, webpage designs, video projects, set designs, sculptures, visual installations, debates and presentations. Each Humanities Super Seminar includes speakers or workshops open to the larger Union and Schenectady community. Course syllabi, student blog discussions, and class projects will be showcased every year on the class website.

Italian

ITL 100 - Basic Italian 1

Course Units: 1.0 (**TBD: Staff**) A foundation course in Italian, open only to students who have been accepted for specific International Programs. **CC:** HUM

ITL 104T - The Italian Language Studied Abroad

Course Units: 1.0 (**TBD: Staff**) A continuation of Basic Italian I. **Prerequisite(s):** ITL 100 . See International Programs. **Note:** Spring term in Florence.

ITL 250T - The Italian Language Studied Independently Abroad

Course Units: 1.0 (**TBD: Staff**)

ITL 251T - The Italian Language Studied Independently Abroad

Course Units: 1.0 (**TBD: Staff**)

Japanese

JPN 100 - Basic Japanese 1

Course Units: 1.0 (**TBD: Staff**) This is the first series of courses in Japanese designed for students with no knowledge of the language. The emphasis is on speaking, listening, reading, writing, and culture supported by communicative practice.

JPN 101 - Basic Japanese 2

Course Units: 1.0 (**TBD: Staff**) A continuation of JPN 100 **Prerequisite(s)**: JPN 100 or equivalent. **CC**: LCCJ

JPN 102 - Basic Japanese 3

Course Units: 1.0 (**TBD: Staff**) A continuation of JPN 101 **Prerequisite(s)**: JPN 101 or equivalent. **CC**: LCCJ

JPN 200 - Intermediate Japanese 1

Course Units: 1.0 (**TBD: Staff**) This course will further develop the student's Japanese proficiency by introducing more complex grammatical structures, idiomatic expressions, and additional kanji characters. Lesson materials incorporate various forms of Japanese culture. **Prerequisite(s)**: JPN 102 or equivalent. **CC**: LCCJ

JPN 201 - Intermediate Japanese 2

Course Units: 1.0 (**TBD: Staff**) A continuation of JPN 200 **Prerequisite(s)**: JPN 200 or equivalent. **CC**: LCCJ

JPN 202 - Intermediate Japanese 3

Course Units: 1.0 (**TBD: Staff**) A continuation of JPN 201 **Prerequisite(s)**: JPN 201 or equivalent. **CC**: LCCJ

JPN 204T - The Japanese Language Studied Abroad

Course Units: 1.0 (**TBD: Staff**) Emphasis on communicative skills. See International Programs. **Note**: Fall term in Japan.

JPN 205T - Written Japanese Abroad

Course Units: 1.0 (**TBD: Staff**) Emphasis on communicative skills. See International Programs. **Note**: Fall term in Japan.

JPN 250T - The Japanese Language Studied Independently Abroad 1

Course Units: 1.0 (**TBD: Staff**)

JPN 251T - The Japanese Language Studied Independently Abroad 2

Course Units: 1.0 (**TBD: Staff**)

JPN 252T - The Japanese Language Studied Independently Abroad 3

Course Units: 1.0 (**TBD: Staff**)

JPN 300 - Advanced Intermediate Japanese 1

Course Units: 1.0 (**TBD: Staff**) The primary goal of this course is the development of a broad competency in speaking listening, reading, and writing in a culturally coherent way. Materials will cover a wide range of academic and cultural interests. **Prerequisite(s):** JPN 202 or equivalent. **CC:** LCCJ

JPN 301 - Advanced Intermediate Japanese 2

Course Units: 1.0 (**TBD: Staff**) Continuation of JPN 300 **Prerequisite(s):** JPN 300 or equivalent. **CC:** LCCJ

JPN 302 - Advanced Intermediate Japanese 3

Course Units: 1.0 (**TBD: Staff**) Continuation of JPN 301 **Prerequisite(s):** JPN 301 or equivalent. **CC:** LCCJ

JPN 490 - Japanese Independent Study 1

Course Units: 1.0 (**TBD: Staff**) **Prerequisite(s):** Permission of the instructor.

JPN 491 - Japanese Independent Study 2

Course Units: 1.0 (**TBD: Staff**) **Prerequisite(s):** Permission of the instructor.

JPN 492 - Japanese Independent Study 3

Course Units: 1.0 (**TBD: Staff**) **Prerequisite(s):** Permission of the instructor.

MLT 250 - Language, Identity, and Power in Japan

Course Units: 1.0 (**TBD: Staff**) This course will focus on societal aspects which are represented in the characteristics of language. Discussions will include gender differences, formality, and communication strategies. This course will be taught in English and no prior Japanese language knowledge is required. **CC:** HUM, LCC

MLT 254 - Explore Japanese Manga and Anime

Course Units: 1.0 (**TBD: Staff**) This course examines the rich world of Japanese manga (comic books) and anime (animation), one of the most significant cultural products in Japan and a dominant global media export. The topics include the issues of the relationship between humans and nature; gender relations; humans and technology; "Japaneseness" of anime; and globalization of manga. This course will be taught in English and no prior Japanese language knowledge is required. **CC:** HUM, LCC

Latin American and Caribbean Studies

LAS 101 - Latin American and Caribbean Studies Intro

Course Units: 1.0 (**TBD: Staff**) This course is an overview of Latin American and Caribbean politics, culture, history, economics, and environmental issues. Through readings, films, discussions, and guest speakers, students gain a solid background in Latin American history and societies. LAS 101 is required for LACS majors/minors and highly recommended for students majoring in Spanish, interested in international or global politics, or planning to apply for full terms or mini-terms to Latin America and the Caribbean.

LAS 200T - Women, Environment, Social Change

Course Units: 1.0 (**TBD: Staff**)

LAS 295H - Latin American and Caribbean Studies Honors Independent Study 1

Course Units: 1.0 (**TBD: Staff**)

LAS 296H - Latin American and Caribbean Studies Honors Independent Study 2

Course Units: 1.0 (**TBD: Staff**) **Prerequisite(s):** LAS 295H Faculty permission required. **Note:** Credit awarded upon completion LAS 296H.

LAS 490 - Latin American and Caribbean Studies Independent Study 1

Course Units: 1.0 (**TBD: Staff**)

LAS 491 - Latin American and Caribbean Studies Independent Study 2

Course Units: 1.0 (**TBD: Staff**)

LAS 497 - Latin American and Caribbean Studies One Term Senior Project

Course Units: 1.0 (**TBD: Staff**)

LAS 498 - Latin American and Caribbean Studies Two Term Senior Thesis 1

Course Units: 0.0 (**TBD: Staff**)

LAS 499 - Latin American and Caribbean Studies Two Term Senior Thesis 2

Course Units: 2.0 (**TBD: Staff**)

Latin

LAT 101 - Beginning Latin 1

Course Units: 1.0 (**Fall: Mueller and Raucci**) An elementary course introducing all major forms and syntax, with some easy reading from classical authors. **CC:** HUM

LAT 102 - Beginning Latin 2

Course Units: 1.0 (**Winter: Mueller. Raucci**) Continuation of LAT 101 **Prerequisite(s):** LAT 101 or one year of secondary school Latin. **CC:** LCCL, HUM

LAT 103 - Latin Reading

Course Units: 1.0 (**Spring: Raucci**) Reading in a wide variety of classical Latin poetry and prose. **Prerequisite(s):** LAT 102 or its equivalent. **CC:** LCCL, HUM

LAT 230 - Catullus and Horace

Course Units: 1.0 (**TBD: Staff**) Readings in Catullus and Horace, emphasizing vocabulary and syntax review. Traditions and social context of lyric poetry are also studied. **Prerequisite(s):** LAT 103 or two years of secondary school Latin. **CC:** HUL, LCC, HUM

LAT 237 - Latin Epic

Course Units: 1.0 (**TBD: Staff**) Readings in Ovid's *Metamorphoses*, Lucan, and others. May be repeated with change in author. The genre, its development and history will be studied. **Prerequisite(s):** LAT 103 or two years of secondary school Latin. **CC:** HUL, LCC, HUM

LAT 240 - Vergil's Aeneid

Course Units: 1.0 (**TBD: Staff**) The purpose of this course is twofold. Our first objective will be to obtain greater proficiency in reading Latin. Through primary readings in their original Latin, students will increase their knowledge of vocabulary, grammar, and syntax. Our second objective will be to read Vergil's Aeneid with a critical eye. What is epic? What is Rome's answer to Homer trying to accomplish? We will consider the political implications of the Aeneid. In addition to close study of selections in Latin, we will read the entire work in English. **Prerequisite(s):** LAT 103 or two years of secondary school Latin. **CC:** HUL, LCC, HUM

LAT 245 - Lucan's Bellum Civile

Course Units: 1.0 (**TBD: Staff**) After a review of the representation of Caesar in Vergil's Aeneid and Ovid's *Metamorphoses*, we will proceed directly to the *Pharsalia* (now more commonly called the *Bellum Civile*), Lucan's dark epic of the bitter war Julius Caesar waged against Rome in his successful quest to topple republican government, seize power, and establish a personal dictatorship. In addition to the study of the epic genre, its development, and its history, students will scan dactylic hexameter, learn about ancient Rome, review Latin grammar, and write a seminar report based on the evidence that they gather from Lucan's text. **CC:** HUL, LCC, HUM

LAT 339 - Roman Satire

Course Units: 1.0 (**TBD: Staff**) Readings in Horace, Petronius, and Juvenal. The origins and development of the genre will also be studied. May be repeated with change in author. **Prerequisite(s):** LAT 103 or two years of secondary school Latin. **CC:** HUL, LCC, HUM

LAT 341 - Roman Historiography

Course Units: 1.0 (**Fall: Winters**) Readings in Sallust, Livy, Tacitus, and others to accompany study of the origins and development of Roman historiographical literature. May be repeated with change in author. **Prerequisite(s):** LAT 103 or two years of secondary school Latin. **CC:** HUL, LCC, HUM

LAT 343 - Roman Drama

Course Units: 1.0 (**TBD: Staff**) Readings in Plautus and Terence along with selections from Seneca. May be repeated with change in author or texts. **Prerequisite(s):** LAT 103 or two years of secondary school Latin. **CC:** HUL, LCC, HUM

LAT 345 - Cicero

Course Units: 1.0 (**TBD: Staff**) A selection from Cicero's massive literary output, with emphasis on his speeches and letters. May be repeated with changes in texts. **Prerequisite(s):** LAT 103 or two years of secondary school Latin. **CC:** HUL, LCC, HUM

LAT 358 - Medieval Latin Literature and Culture

Course Units: 1.0 (**TBD: Staff**) Latin in the Middle Ages was Western Europe's international language of ideas, politics, and literature. It was the language not only of the Bible and the Church, but also of satirists and historians, heretics and mystics, poets and storytellers. Their writings are the vital link between Classical antiquity and the modern literatures of Europe. Students sample this vast literature through readings in the original and become acquainted with the social, intellectual, and cultural climate that produced it. Throughout the course, students develop their Latin reading skills (with attention to the differences between Classical and later Latin). Readings cover a range of authors from St. Augustine to the Arch-poet and may include autobiography, letters, history, visionary literature, philosophy, lyric poetry, hymns, drinking songs, Bible texts and interpretations, legends, encyclopedias, allegorical poetry, and political theory. **Prerequisite(s):** LAT 103 or two years of secondary school Latin. **CC:** HUL, LCC, HUM

LAT 371 - Reading Rome: Textual Approaches to the City

Course Units: 1.0 (**TBD: Staff**) The purpose of this course is twofold. Our first objective will be to obtain greater proficiency in reading Latin. Through primary readings in their original Latin, you will increase your knowledge of vocabulary, grammar, and syntax. The second objective will be to study the literary topography of ancient Rome. We will consider Rome as a palimpsest, tracing the city's changes. Through our examination of sites-in-ink, we will consider how Roman identity and power relations are constructed through the city and its monuments. **CC:** HUM, LCC

LAT 447 - Latin Prose Composition

Course Units: 1.0 (**TBD: Staff**) Practice in composing Latin prose, based on classical authors, and the study of prose style through a wide variety of texts from archaic to vulgar Latin. **Prerequisite(s):** At least one Latin course above 103, four years of secondary school Latin, or permission of the instructor. **CC:** HUM, LCC

LAT 490 - Latin Independent Study 1

Course Units: 1.0 (**Fall, Winter, Spring: Staff**) Advanced individual study of a special author or subject, or of Latin prose composition. **Prerequisite(s):** Six courses in Latin or the equivalent.

LAT 491 - Latin Independent Study 2

Course Units: 1.0 (**Fall, Winter, Spring: Staff**) Advanced individual study of a special author or subject, or of Latin prose composition. **Prerequisite(s):** Six courses in Latin or the equivalent.

LAT 492 - Latin Independent Study 3

Course Units: 1.0 (**Fall, Winter, Spring: Staff**) Advanced individual study of a special author or subject, or of Latin prose composition. **Prerequisite(s):** Six courses in Latin or the equivalent.

LAT 497 - Latin Senior Project

Course Units: 1.0 (**Fall, Winter, Spring: Staff**) One term senior project. Advanced individual study of a special author or subject, or of Latin prose composition. **CC:** WS

LAT 498 - Latin Senior Thesis 1

Course Units: 0.0 (**Fall, Winter, Spring: Staff**) Independent reading and thesis in the field of Latin language and/or literature. **Prerequisite(s):** Permission of the department chair.

LAT 499 - Latin Senior Thesis 2

Course Units: 2.0 (**Fall, Winter, Spring: Staff**) Advanced individual study of a special author or subject, or of Latin prose composition.

Prerequisite(s): LAT 498 **CC:** WS

Mechanical Engineering

MER 010 - Seminar

Course Units: 0.0 (**TBD: Staff**) Discussion of special topics in mechanical engineering important to professional development such as current engineering practices, engineering ethics, codes and standards and intellectual property. Required for all ME majors during the Fall and Winter terms of their Senior year and Spring term of their Junior year as part of the process of selecting their senior writing experience.

MER 101 - Engineering Graphics

Course Units: 1.0 (**TBD: Staff**) Engineering graphics with emphasis on engineering drawings, introduction to solid modeling, and manufacturing. Topics include sketching, descriptive geometry, tolerances, sectioning, auxiliary views, assembly drawings, CAD, and manufacturing techniques.

Corequisite(s): MER-101L **CC:** SET

MER 201 - Statics

Course Units: 1.0 (**TBD: Staff**) A basic engineering mechanics course concerned with the equilibrium of non-deformable bodies at rest or moving with a constant velocity on a straight path. Free body diagrams, Newtonian mechanics, vectors and the calculus are used to solve problems throughout the course. Topics include force vectors and systems, equilibrium, trusses, frames, friction, center of gravity, centroids, moments of inertia and fluid hydrostatics. **Prerequisite(s):** [PHY 120 and (MTH 112 or MTH 113)] or IMP 120 **CC:** SET

MER 212 - Dynamics

Course Units: 1.0 (**TBD: Staff**) A basic engineering mechanics course concerned with the kinematics and kinetics of non-deformable particles and two dimensional bodies undergoing acceleratory motion. D'Alembert free body diagrams, Newtonian mechanics, energy approaches, vectors and the calculus are used to solve problems throughout the course. Topics include kinematics, force and acceleration, work and energy principles and impulse and momentum principles. Includes a design component. **Prerequisite(s):** MER 201 and (MTH 115 or IMP 121) **CC:** SET

MER 213 - Material Science

Course Units: 1.0 (**TBD: Staff**) A basic engineering science course dealing with crystal structure, imperfections in solids, diffusion, mechanical properties of metals, dislocations and strengthening mechanisms, phase diagrams, phase transformations in metals, structure and properties of ceramics, and polymeric structures. The principles formulated in materials science allow engineers to understand the nature and behavior of a wide variety of engineering materials. Includes a laboratory component. **Prerequisite(s):** CHM 101 **CC:** SET

MER 214 - Strength of Materials

Course Units: 1.0 (**TBD: Staff**) A branch of applied mechanics that deals with the behavior of solid bodies subjected to various types of loading. The solid bodies considered in this course include axially-loaded members, shafts in torsion, thin shells, beams, and structures that are assemblies of these components. Strength of materials analysis determines the stresses, strains, and displacements produced by the loads. Includes a laboratory component. **Prerequisite(s):** MER 201 **Corequisite(s):** MER 214L **CC:** SET

MER 231 - Thermodynamics 1

Course Units: 1.0 (**TBD: Staff**) A basic engineering science course dealing with relations between heat and other forms of energy. Topics include: basic thermodynamic principles, properties of simple substances, energy and the first law of thermodynamics, entropy and the second law of thermodynamics, and ideal cycle analysis. Elementary environmental economic and sustainability considerations related to thermodynamic processes. **Prerequisite(s):** PHY 120 & (MTH 112 or MTH 113) or IMP 120. **Corequisite(s):** CHM 101 **CC:** SET

MER 232 - Thermodynamics 2

Course Units: 1.0 (**TBD: Staff**) Application of the fundamental laws of thermodynamics to the analysis of energy conversion devices, systems, and processes. The course moves beyond MER 231 through the analyses of more realistic power-producing and refrigeration systems, systems in which there are more than one substance present, and reactive systems. Factors that govern energy conversion processes and impact on the efficiency of those processes are studied with attention given to environmental and sustainability implications. **Prerequisite(s):** MER 231, CHM 101. **CC:** SET

MER 291 - Sophomore Practicum 1

Course Units: 0.0 (**TBD: Staff**) Any mechanical engineering undergraduate can practice their profession on a part-time basis, for credit, through participation in either (1) undergraduate research or (2) a design project sanctioned by the department. To receive Pass/Fail credit equivalent to one free elective course, the student must earn three terms worth of passing grades for the practicum experience. Credit for up to two free elective courses may be earned in this way

MER 292 - Sophomore Practicum 2

Course Units: 0.0 (**TBD: Staff**) Any mechanical engineering undergraduate can practice their profession on a part-time basis, for credit, through participation in either (1) undergraduate research or (2) a design project sanctioned by the department. To receive Pass/Fail credit equivalent to one free elective course, the student must earn three terms worth of passing grades for the practicum experience. Credit for up to two free elective courses may be earned in this way. **Prerequisite(s):** MER 291

MER 293 - Sophomore Practicum 3

Course Units: 1.0 (**TBD: Staff**) Any mechanical engineering undergraduate can practice their profession on a part-time basis, for credit, through participation in either (1) undergraduate research or (2) a design project sanctioned by the department. To receive Pass/Fail credit equivalent to one free elective course, the student must earn three terms worth of passing grades for the practicum experience. Credit for up to two free elective courses may be earned in this way. **Prerequisite(s):** MER 292

MER 295H - Honors Independent Project 1

Course Units: 0.0 (**TBD: Staff**) First half of a two-term, one credit project, with a professor of the student's choosing. This course is graded pass/fail. **Prerequisite(s):** By permission of instructor.

MER 296H - Honors Independent Project 2

Course Units: 1.0 (**TBD: Staff**) **Prerequisite(s):** By permission of instructor.

MER 301 - Engineering Reliability

Course Units: 1.0 (**TBD: Staff**) Engineering statistics; uncertainty analysis, data collection, computational statistics, probability, statistical inference, confidence limits, tolerance intervals, analysis of variance, least squares regression, and introduction to design of experiments. **Prerequisite(s):** MTH 115 or IMP 121. **CC:** SET

MER 302 - Optimal Design

Course Units: 1.0 (**TBD: Staff**) Introduction to theory and application of computational (and experimental) methods used to optimize performance of engineering systems. These methodologies will be discussed in the context of practical applications ranging from structural shape optimization and robotics to material selection and design for assembly. Special emphasis will be given to translating the design into mathematical terms addressable by these general methods. **Prerequisite(s):** MER 214, CSC 10X **CC:** SET

MER 303 - Space Flight

Course Units: 1.0

(TBD: Staff) The basics of getting into space, traveling about in space and returning to Earth or landing on another celestial body will be studied in this course. Topics will include orbital motion and trajectories, interplanetary transfers, atmospheric entry, ground tracking, and attitude control.

Prerequisite(s): MER 212 **CC:** SET

MER 311 - Advanced Mechanics

Course Units: 1.0 **(TBD: Staff)** Advanced topics in stress analysis, deflection and stiffness, energy methods, failure analysis, fracture mechanics, statistical considerations, impact, fatigue and, introduction to finite element methods. **Prerequisite(s):** MER 213, MER 214 **CC:** SET

MER 312 - Dynamics and Kinematics

Course Units: 1.0 **(TBD: Staff)** Linkage analysis and synthesis, cam design, machine dynamics, computer aided kinematic design, kinetics and balancing. Includes a design component **Prerequisite(s):** MER 212 **CC:** SET

MER 322 - Dynamics of Physical Systems

Course Units: 1.0 **(TBD: Staff)** Time and frequency response of lumped-parameter mechanical, electrical, and fluid systems. Includes a lab component. **Prerequisite(s):** CSC 10X or equivalent, MER 212, (ECE 222 or ECE 225) & (MTH 130 or MTH 234). **Corequisite(s):** MER 322L **CC:** SET

MER 331 - Fluid Mechanics 1

Course Units: 1.0 **(TBD: Staff)** Analysis of fluid systems according to the control volume formulations of Newton's second law and the conservation laws of mass and energy. Both differential and integral analysis approaches are taught. Includes study of hydrostatics, dimensional analysis, boundary layers, Bernoulli's equation, head loss and piping systems, and lift and drag forces. Includes a laboratory component. **Prerequisite(s):** MER 231, MTH 117 or IMP 121 **Corequisite(s):** MER 212 (or BNG 202 for BNG majors only) and MER 331L **CC:** SET

MER 332 - Fluid Mechanics 2

Course Units: 1.0 **(TBD: Staff)** This course will provide a survey of several important areas of fluid mechanics not covered in MER 331. Topics covered in this course may include: differential analysis of fluid flow (Navier-Stokes equations), potential flow analysis, microfluidics, compressible flow analysis and computational fluid dynamics. As part of the course students will complete a project on a fluids topic of their choice.

Prerequisite(s): MER 331 **CC:** SET

MER 333 - Heat Transfer Analysis and Design

Course Units: 1.0 **(TBD: Staff)** Study of the different modes of heat transfer through the development and application of rate equations for quantifying conduction, convection, and thermal radiation heat transfer. Theory and applications are reinforced and complemented by a laboratory component of the course. **Prerequisite(s):** MER 331 and (MTH 130 or MTH 234) **Corequisite(s):** MER 333L **CC:** SET

MER 354 - Advanced Materials

Course Units: 1.0 **(TBD: Staff)** Advanced materials for engineers are introduced with a focus on the properties and applications of the materials. Several advanced materials currently in the research and development stage will also be introduced with a discussion of the needed infrastructure to bring the materials to production. Topics include composites, engineering alloys, microelectromechanical systems (MEMS) devices, nanomaterials, semiconductors and microelectronic fabrication, and superconductors. **Prerequisite(s):** Prerequisite: MER 213 or by permission of the instructor. **CC:** SET

MER 362 - Manufacturing Processes

Course Units: 1.0 (**TBD: Staff**) This course aims to provide students with fundamentals of manufacturing processes and their strong interrelationships with product design and material properties. It will incorporate computer-aided manufacturing tools while covering materials behavior and selection for manufacturing, traditional manufacturing processes such as casting, forming, lathing, milling, polymer injection molding, emerging manufacturing processes such as layer manufacturing and micro-fabrication methods, and GD&T (Geometric Dimensioning and Tolerancing). **Prerequisite(s):** MER 101, MER 213 **CC:** SET

MER 371 - Internal Combustion Engines

Course Units: 1.0 (**TBD: Staff**) This course provides a basic introduction to reciprocating Internal combustion (IC) engines. Idealized underlying thermodynamic cycles (e.g. Otto, Diesel, and Miller) and the mechanisms used to produce them will be covered. Deviations from the ideal cycles will be discussed in depth. Introductory coverage of petroleum based fuel chemistry, combustion, and emissions is included. **Prerequisite(s):** MER 232 **CC:** SET

MER 419 - Design of Mechanical Systems

Course Units: 1.0 (**TBD: Staff**) A capstone design experience for the mechanics area of mechanical engineering program. Students work in teams on challenging design projects with special focus on the design of mechanical devices and systems. **Prerequisite(s):** MER 311, MER 312 **CC:** SET

MER 421 - Mechatronics Design

Course Units: 1.0 (**TBD: Staff**) This course emphasizes the fundamental technologies on which contemporary mechatronic designs are based; sensors and actuators, system dynamics and control, analog and digital electronics, microcontroller technology, interface electronics and real-time programming. The laboratory sessions focus on, hands-on design projects in which small teams of students configure, design, and implement a succession of mechatronic subsystems, leading to system integration in a final project. **Prerequisite(s):** MER 212, ECE 222 or ECE 225, and CSC 10X or equivalent. **CC:** SET

MER 439 - Design of Thermal/Fluid Systems

Course Units: 1.0 (**TBD: Staff**) A capstone, project-oriented course in the thermal-fluids area of mechanical engineering that applies design techniques to the design of thermal fluid processes and systems. Students work in teams on projects that involve the design of piping systems, heat exchangers, thermodynamic cycles, and other thermal fluid systems. **Prerequisite(s):** MER 232, MER 333 **CC:** SET

MER 452 - Composite Materials Technology

Course Units: 1.0 (**TBD: Staff**) A comprehensive introduction to composite materials and motivation for their use in modern applications. Topics include selection and availability of composite materials, manufacturing processes, usable theoretical concepts, testing and characterization of composites, and strength theories. **Prerequisite(s):** MER 213 and MER 311 **CC:** SET

MER 471 - Solar Energy Analysis and Design

Course Units: 1.0 (**TBD: Staff**) Analysis and design applicable to the use of solar energy for heating, cooling, and electric power generation. Solar geometry, solar collector positioning, energy storage, and component and system design. **Prerequisite(s):** MER 333 or by permission of instructor. **CC:** SET

MER 485 - Competition Team 1

Course Units: 1.0 (**TBD: Staff**) Students participating at the level of senior designer and/or system design lead on a departmentally approved engineering design competition team (Aero Team, Mini Baja Team, or Rocket Team). Specific design responsibilities must be approved by the team faculty adviser prior to registration. Weekly meetings with team faculty advisor are required, as is travel to and participation in the competition. Registration requires approval of team faculty adviser who will grade the student. Course counts as a Free Elective. **Prerequisite(s):** Senior standing, permission of instructor and MER 311 or MER 333 **Corequisite(s):** MER 010 , MER 311 and MER 333

MER 486 - Competition Team 2

Course Units: 1.0 (**TBD: Staff**) Students participating at the level of senior designer and/or system design lead on a departmentally approved engineering design competition team (Aero Team, Mini Baja Team or Rocket Team). The student must have senior standing. The student's specific design responsibilities must be approved by the team's faculty adviser prior to registration. Weekly meetings with faculty advisors are required, as is travel to and participation in the design competition. **Prerequisite(s):** MER 311 or MER 333 . Registration requires approval of the selected team's faculty adviser who will grade the student. **Corequisite(s):** MER 010 , MER 311 and MER 333

MER 487 - Senior Writing Seminar

Course Units: 1.0 (**TBD: Staff**) The course will focus on topics in mechanical engineering of current interest and importance. Students will make oral presentations, write reports on scholarly publications and critically evaluate these publications and the written work of their peers. A final thesis is required to fulfill the WS requirement. **Prerequisite(s):** MER 311 and MER 333. This course is required of and limited to seniors who are not satisfying their WS requirement through MER 498. **CC:** WS

MER 490 - Independent Study

Course Units: 1.0 (**TBD: Staff**) Offered with department approval only.

MER 491 - Upper-class Practicum 1

Course Units: 0.0 (**TBD: Staff**) Any mechanical engineering undergraduate can practice their profession on a part-time basis, for credit, through participation in either (1) undergraduate research or (2) a design project sanctioned by the department. To receive Pass/Fail credit equivalent to one free elective course, the student must earn three terms worth of passing grades for the practicum experience. Credit for up to two free elective courses may be earned in this way.

MER 492 - Upper-class Practicum 2

Course Units: 0.0 (**TBD: Staff**) Any mechanical engineering undergraduate can practice their profession on a part-time basis, for credit, through participation in either (1) undergraduate research or (2) a design project sanctioned by the department. To receive Pass/Fail credit equivalent to one free elective course, the student must earn three terms worth of passing grades for the practicum experience. Credit for up to two free elective courses may be earned in this way. **Prerequisite(s):** MER 491

MER 493 - Upper-class Practicum 3

Course Units: 1.0 (**TBD: Staff**) Any mechanical engineering undergraduate can practice their profession on a part-time basis, for credit, through participation in either (1) undergraduate research or (2) a design project sanctioned by the department. To receive Pass/Fail credit equivalent to one free elective course, the student must earn three terms worth of passing grades for the practicum experience. Credit for up to two free elective courses may be earned in this way. **Prerequisite(s):** MER 492

MER 497 - Senior Project 1

Course Units: 1.0 (**TBD: Staff**) Capstone design project or research project, performed either independently or in special cases with other students, under the supervision of one or more of the department faculty. Minimum requirements include one oral report and one written progress report. Consult the Mechanical Engineering department for additional minimum requirements. **Prerequisite(s):** MER 311 or MER 333 **Corequisite(s):** MER 010, MER 311 and MER 333 .

MER 498 - Senior Project 2

Course Units: 1.0 (**TBD: Staff**) Continuation of MER 497. Minimum requirements include one oral report, one written final project report, and one poster. Consult the Mechanical Engineering department for additional minimum requirements. **Prerequisite(s):** MER 311 , MER 333 and MER 497 **Corequisite(s):** MER 010 **CC:** WS

MER 499 - Senior Project 3

Course Units: 1.0 (**TBD: Staff**) Optional follow-on to MER 498 for students who wish to go above and beyond their completed objectives for MER 497, MER 498. Can be counted as a free elective. **Prerequisite(s):** MER 498, permission of the MER 498 project advisor.

Modern Languages & Literatures

MLL 490 - Academic Training Practicum 1

Course Units: 0.0 (**TBD: Staff**) Language Assistants will receive direct supervision from their faculty mentors in becoming effective and skilled language assistants and instructors. Students will also learn from observation and practice how to design and implement curriculum, lessons, and assignments. Course is open only to non-Fulbright Language Assistants. MLL 490 and MLL 491 must be taken simultaneously over 3 terms to receive 2 credits.

MLL 491 - Academic Training Practicum 2

Course Units: 0.0 (**TBD: Staff**) Language Assistants will receive direct supervision from their faculty mentors in becoming effective and skilled language assistants and instructors. Students will also learn from observation and practice how to design and implement curriculum, lessons, and assignments. Course is open only to non-Fulbright Language Assistants. MLL 490 and MLL 491 must be taken simultaneously over 3 terms to receive 2 credits.

Modern Literature in Translation

MLT 297 - Performing Masculinities in Literature, Cinema, and Popular Culture

Course Units: 1.0 (**TBD: Staff**) This is an exploration of how masculinities (and maleness) are performed and how men perform gender. The course is a survey of literary and cinematic texts from around the world, with emphasis on Hispanic and Latinx communities (from Spain, Spanish America, and the USA) that adopt cross-dressing as a subversive device to question and delegitimize authority at various arenas (heteronormative gender roles, sexual and national identities, state politics and citizenship, and cultural hegemony). It also seeks to dissect binary understandings of gender while exploring the concept as a performative social construct, and establishing connections with and drawing examples from literary production, cinema, and popular culture. From this angle, emphasis will be placed on the performance of socially regulated gender roles whose scripts are constantly altered and in flux, albeit at times guarded violently by diverse social members and institutions. Beyond the analysis of literary texts and films, the course incorporates critical theory and cultural artifacts (music videos, magazine ads, billboards, art works) that frame the class discussions and enable us to connect the primary texts with local and global discourses around social demarcations of gender. **CC: LCCS, HUL**

Mathematics

MTH 051 - Cryptology: The Mathematics of Secrecy

Course Units: 1.0 (**Not Offered this Academic Year**) The course will focus on the mathematical aspects of public-key cryptography, the modern science of creating secret ciphers (codes), which is largely based on number theory. Additional topics will be taken from cryptanalysis (the science of breaking secret ciphers) and from contributions that mathematics can make to data security and privacy. **CC: QMR**

MTH 053 - Visualizing the Fourth Dimension

Course Units: 1.0 (**Not Offered this Academic Year**) An investigation of the idea of higher dimensions and some of the ways of understanding them. The classic novel, Flatland, is the starting point; discussions, writing, projects and interactive computer graphics are used to extrapolate ideas from two and three dimensions to their analogues in four dimensions and higher. **CC: QMR**

MTH 054 - Number Theory: From Clock Arithmetic to Unbreakable Codes

Course Units: 1.0 (**Not Offered this Academic Year**) An introduction to the beauty and use of numbers. Topics chosen from divisibility tests, prime numbers and factorization, modular arithmetic with applications to check digit schemes and selected other topics. **CC:** QMR

MTH 055 - Ancient Greek Mathematics

Course Units: 1.0 (**Not Offered this Academic Year**) Ancient Greek mathematicians fundamentally re-invented the notions of abstraction (in mathematics and other fields), absolute precision, and proof. The approach to mathematics that we take today can be traced back to these Greek mathematicians. After examining some pre-Greek mathematical traditions, we study Greek mathematics and its legacies in medieval Islamic and western cultures and in early modern Europe. Topics include Plato and his academy; Euclid and his Elements and the Euclidean construction problems; the greatest of the Greek mathematicians, Archimedes; and the philosophical and cultural influence of Greek mathematics on human endeavors such as understanding the cosmos, educating the young, and running the world. **CC:** QMR

MTH 056 - History of Mathematics

Course Units: 1.0 (**Not Offered this Academic Year**) Traces the development of mathematical ideas and methods in literate cultures from ancient Egypt and Mesopotamia, to Hellenistic Greece and medieval China, India and the Islamic world, up through the dawn of calculus at the start of the Scientific Revolution in early modern Europe. Topics include the interlinked changes and intercultural transmission of basic numeracy, arithmetic, geometry, trigonometry, algebra, practical computation and approximation, and concepts of the infinitely large and small. **CC:** QMR

MTH 057 - Game Theory and its Applications in the Humanities and Social Sciences

Course Units: 1.0 (**Not Offered this Academic Year**) A self-contained introduction to the mathematical theory of conflict. Examples and applications include parlor games, auctions, games from the Bible and games commenting on the existence of superior beings, game-theoretic analyses in literature, philosophical questions and paradoxes arising from game theory, and game-theoretic models of international conflict. **CC:** QMR

MTH 058 - Applications of Mathematics to Economics 1

Course Units: 1.0 (**Not Offered this Academic Year**) Linear and exponential functions, matrix algebra and linear programming with applications to the social sciences. Some sections include the use of computer spread-sheets for computations and graphical analysis. **Prereq/Corequisite(s):** Not open to students who have passed a college calculus course. **CC:** QMR

MTH 059 - Applications of Mathematics to Economics 2

Course Units: 1.0 (**Not Offered this Academic Year**) Differential and integral calculus with applications in the social sciences. Students who wish to continue the calculus after MTH 059 should enroll in MTH 112. **Prerequisite(s):** MTH 058 **Prereq/Corequisite(s):** Not open to students who have passed a college calculus course. **CC:** QMR

MTH 060 - Mathematics and Politics

Course Units: 1.0 (**Not Offered this Academic Year**) A mathematical treatment (not involving calculus or statistics) of escalation, political power, social choice, and international conflict. No previous study of political science is necessary, but PSC 111 or PSC 112 would be relevant. **Cross-Listed:** PSC 123 **CC:** QMR

MTH 061 - Math in the Public Interest

Course Units: 1.0 (**Not Offered this Academic Year**) In what ways do advertisers, politicians, and other propagandists try to trick the public by exploiting our ignorance of or aversion to mathematical reasoning? This course explores key mathematical topics related to these questions, drawing on fields such as probability, statistics, combinatorics, mathematical modeling, and mathematical visualization. We will examine them in the context of contemporary public policy issues, such as climate change, demography, gambling, sports and public health. **CC:** QMR

MTH 062 - Mathematics of Election and Polls

Course Units: 1.0 (**Not Offered this Academic Year**) One part of this course will cover polling, answering questions such as: were the 2016 U.S. Presidential election polls as inaccurate as often reported? What are margins of error, exactly? How many people must be surveyed for accurate results? Which people? To help answer these questions, the course will include background material on probability and statistics. Another part will be on voting theory, where we will look into designing elections from scratch, in search of the "best" system for converting the preferences of the voters into an election winner. This will lead to voting paradoxes and a discussion of Arrow's impossibility theorem. Throughout the course, we will draw on many examples of voting, such as the U.N. Security Council, the election of popes, the academy awards, infamous historical elections, and the U.S. presidential election. Additional topics will be chosen from gerrymandering, Congressional seat apportionment, and game theory. **CC:** QMR

MTH 105 - Differential Calculus with Precalculus

Course Units: 1.0 (**Fall, Winter: Staff**) Differential calculus of functions of a single variable, supplemented with supporting precalculus. Limits, continuity, differentiation, and applications. **CC:** QMR

MTH 110 - Calculus 1: Differential Calculus

Course Units: 1.0 (**Fall, Winter: Staff**) Differential calculus of functions of a single variable. Limits, continuity, differentiation, computational aspects of Maclaurin and Taylor polynomials and series, and applications. **Prereq/Corequisite(s):** Not intended for students who have passed a calculus course or MTH 059. **CC:** QMR

MTH 112 - Calculus 2: Integral Calculus

Course Units: 1.0 (**Winter, Spring: Staff**) Integral calculus of functions of a single variable. The fundamental theorem, formal integration, several techniques of integration, and applications. **Prerequisite(s):** MTH 105 or MTH 110 **CC:** QMR

MTH 113 - Accelerated Single-Variable Calculus

Course Units: 1.0 (**Fall, Winter: Staff**) Self-contained treatment of the main topics in MTH 110 and MTH 112. Intended for first-year students who have been introduced to (but have not yet mastered) the basics of differential and integral calculus. **CC:** QMR

MTH 115 - Calculus 3: Differential Vector Calculus and Matrix Theory

Course Units: 1.0 (**Fall, Winter, Spring: Staff**) Geometry of 3-space, differential calculus of functions of several variables, linear systems, matrices. **Prerequisite(s):** MTH 102, MTH 112, or MTH 113.

MTH 117 - Calculus 4: Integral Vector Calculus

Course Units: 1.0 (**Fall, Winter, Spring: Staff**) Double and triple integrals, line integrals and Green's theorem, divergence and curl, divergence theorem and Stokes' theorem. **Prerequisite(s):** MTH 115

MTH 127 - Numerical Methods

Course Units: 1.0 (**Fall: Staff**) Newton's method, numerical differentiation and integration, solution of ordinary differential equations, error estimates. **Prerequisite(s):** MTH 115 and fluency in some mathematical programming language.

MTH 128 - Probability

Course Units: 1.0 (**Winter: Staff**) This course is a survey of the basic concepts of probability theory including permutations and combinations, conditional probability, Bayes' formula, independence, discrete and continuous random variables, expectation and variance, the Central Limit Theorem, and selected topics. **Cross-Listed:** STA 128 **Prerequisite(s):** MTH 102, MTH 112, or MTH 113.

MTH 130 - Ordinary Differential Equations

Course Units: 1.0 (**Winter, Spring: Staff**) Topics include first and second-order differential equations and first-order systems, including analytic, geometric, and numerical techniques, classification of first-order linear systems by eigenvalues, forcing and resonance, and the Laplace transform. Applications include but are not limited to population models, RC circuits, and damped and undamped harmonic oscillators. **Prerequisite(s):** MTH 115 **Prereq/Corequisite(s):** Not open to students who have passed MTH 234

MTH 140 - Applied Linear Algebra

Course Units: 1.0 (**Fall: Staff**) Linear algebra has an enormous number of applications to the sciences and engineering. This course will cover the basics of linear algebra in Euclidean n -space, including linear systems, linear transformations, determinants, eigenvalues and eigenvectors, orthogonality, and the singular value decomposition. An emphasis will be placed on applications, chosen from least-squares fitting, linear programming, image compression, Markov chains and discrete dynamical systems, computer graphics, principal component analysis, the Google PageRank algorithm, and others. Computer software such as MATLAB or Mathematica will be used in this course to perform numerical calculations. **Prerequisite(s):** MTH 115 . Credit will not normally be given for both MTH 140 and MTH 340 . Exceptions require approval of a proposal from the student to the department chair.

MTH 197 - Discrete Mathematics for Computer Science

Course Units: 1.0 (**Fall: Staff**) An introduction to fundamental concepts and methods of proof in mathematics and computer science. Topics include elementary logic, functions, relations, sets, and basic combinatorics. **Prereq/Corequisite(s):** Not open to students who have passed MTH 199 **CC:** QMR

MTH 199 - Introduction to Logic and Set Theory

Course Units: 1.0 (**Fall, Winter, Spring: Staff**) Designed to enable the student to develop the ability to understand and communicate mathematical arguments. Logic and set theory from the core. Selected topics are covered at the discretion of the instructor. For those considering any form of mathematics major, the department recommends that Math 199 be taken by fall term of the sophomore year, if possible. Credit is not normally given for both MTH 197 and MTH 199. Exceptions require the approval of the department chair. **Prerequisite(s):** MTH 102 , MTH 112, or MTH 113 **Corequisite(s):** MTH 115 is usually taken before MTH 199.

MTH 219 - Topics in Discrete Mathematics

Course Units: 1.0 (**Fall: Staff**) Topics may include graph theory, partially ordered sets, algebraic coding theory, computational complexity, number theory. **Prerequisite(s):** MTH 199 or permission from the Chair.

MTH 221 - Mathematical Cryptology

Course Units: 1.0 (**Fall: Staff**) An in-depth look at the mathematical theory underlying modern methods to accomplish the secret transmission of messages, as well as other tasks related to data security, privacy, and authentication. MTH-221 normally is closed to students who have passed MTH 235 or MTH 051. **Prerequisite(s):** MTH 199 or permission from the Chair.

MTH 224 - Geometry

Course Units: 1.0 (**Winter: Staff**) Topics in transformation geometry, or projective, affine, Euclidean, and/or non-Euclidean geometries. **Prerequisite(s):** MTH 199 or permission from the Chair.

MTH 228 - Probability Theory

Course Units: 1.0 (**Spring: Staff**) An introduction to the theory of probability. Discrete and continuous random variables. Jointly distributed random variables, sums of random variables and properties of Expectation. Moment generating functions, inequalities, and Limit Theorems. Focus will be on both the theoretical aspects of probability and problem solving. Discussion of some of the probability problems encountered in actuarial, financial, and scientific fields. **Prerequisite(s):** MTH 197 or MTH 199 and MTH 117 (MTH 117 can be taken concurrently), or permission from the Chair. Note: Not open to students who have passed MTH 128.

MTH 234 - Differential Equations

Course Units: 1.0 (**Winter: Staff**) Topics include differential equations and models, asymptotic solutions, eigenvalues and eigenvectors, classification of planar systems, higher-dimensional linear algebra, canonical form, linear and nonlinear systems, and applications. **Prerequisite(s):** MTH 115 and MTH 199, or permission from the Chair. **Prereq/Corequisite(s):** Not open to students who have passed MTH 130.

MTH 235 - Number Theory

Course Units: 1.0 (**Not Offered this Academic Year**) Properties of natural numbers including divisibility, prime numbers, congruences, special number theoretic functions and quadratic reciprocity. **Prerequisite(s):** MTH 199 or permission from the Chair. **Prereq/Corequisite(s):** MTH 235 normally is closed to students who have passed MTH 221 .

MTH 238 - Methods of Applied Mathematics

Course Units: 1.0 (**Spring: Staff**) An introduction to the fundamental concepts and techniques in applied mathematics. Topics may include dimensional analysis, scaling, perturbation theory, boundary layer analysis, differential and integral equations, calculus of variations, optimization, and eigenvalue problems. The emphasis is the use of mathematics to quantify and solve problems arising from physical, chemical, biological, and economic phenomena. **Prerequisite(s):** MTH 130 or MTH 234 and MTH 197 or MTH 199

MTH 248 - Intermediate Topics in Mathematics

Course Units: 1.0 (**Not Offered this Academic Year**) An exploration into topics chosen from different areas of pure mathematics, this course is divided into three sequential units, each taught by a different instructor. The topics are 1) convex geometry (including convex sets, linear and affine spans, simplices, and applications to Nash's Bargaining Theorem in Game Theory); 2) continued fractions and their use in number theory, such as in solving linear Diophantine equations and in finding rational approximations to real numbers; 3) introduction to analysis (sequences, series, convergence tests, complex series, and Euler's formula). Students will receive a single grade for the entire course. **Prerequisite(s):** Take MTH 199 or permission from the Chair. **Prereq/Corequisite(s):** Not normally open to students who will have completed MTH 257, or MTH 336 by the end of the term, except by permission of the math department chairperson.

MTH 295H - Mathematics Honors Independent Project 1

Course Units: 0.0 (**TBD: Staff**)

MTH 296H - Mathematics Honors Independent Project 2

Course Units: 1.0 (**TBD: Staff**)

MTH 325 - Knot Theory

Course Units: 1.0 (**Not Offered this Academic Year**) An introduction to the mathematical study of knots, including colorability, chirality, genus, and the Jones polynomial. Course will also explore the relationship between mathematical knots and structures in molecular chemistry and biology, and physics. **Prerequisite(s):** MTH 221, MTH 235, MTH 332 , or MTH 340, or permission of the Chair. **Prereq/Corequisite(s):** Not open to students who have passed MTH 225.

MTH 334 - Partial Differential Equations

Course Units: 1.0 (**Not Offered this Academic Year**) Partial differential equations (PDEs) are formulated to describe a wide range of phenomena in engineering, natural and social sciences. We will study the theories and models of PDEs. Analytical and numerical methods are introduced to examine the solutions of elliptic, parabolic, and hyperbolic types of PDEs. Topics include the formulation of PDEs using conservation laws, classification, solution methods for the wave, diffusion, and Laplace equations, boundary value problems, separation of variables, Green's functions, Fourier series and transforms, stability and convergence. Students will be exposed to both theoretical and applied aspects. Computing tools (such as Mathematica or Matlab) will also be introduced. **Prereq/Corequisite(s):** MTH 234 or (MTH 130 + MTH 199), or permission from the Chair.

MTH 336 - Real Analysis

Course Units: 1.0 (**Fall: Staff**) An introductory course in analysis. Completeness and Cauchy sequences; open, closed, connected, and compact sets; continuous functions, uniform continuity, and uniform convergence; the extreme and intermediate value theorems; differentiation and the mean value theorem; Riemann integration and the fundamental theorem of calculus. Additional topics may be covered, including the contraction mapping principle and sets of measure zero. **Prerequisite(s):** MTH 332 or MTH 340 or permission from the Chair.

MTH 340 - Linear Algebra

Course Units: 1.0 (**Winter: Staff**) Vector spaces, linear transformations, inner product and dual spaces, eigenvalues and eigenvectors, special topics. **Prerequisite(s):** MTH 115 and one of MTH 219, MTH 221, MTH 224, MTH 235, MTH 248, or permission from the Chair. Credit will not normally be given for both MTH 140 and MTH 340. Exceptions require approval of a proposal from the student to the department chair.

MTH 430 - Complex Analysis

Course Units: 1.0 (**Not Offered this Academic Year**) An introduction to analytic functions of a complex variable. **Prerequisite(s):** One 300-level MTH course or permission from the Chair.

MTH 432 - Abstract Algebra 2

Course Units: 1.0 (**Not Offered this Academic Year**) Continuation of MTH 332. Certain topics will be selected for more intensive study. **Prerequisite(s):** MTH 332

MTH 436 - Topology

Course Units: 1.0 (**Not Offered this Academic Year**) Topological spaces, connectedness, compactness, continuous mappings and homeomorphisms. **Prerequisite(s):** One 300-level MTH course or permission from the Chair.

MTH 437 - Real Analysis 2

Course Units: 1.0 (**Spring: Staff**) A second course in real analysis. Topics may include the construction of Lebesgue measure and the Lebesgue integral, limit theorems and Fubini's theorem, differentiation in several variables and the inverse and implicit function theorems, and convergence of series of functions. **Prereq/Corequisite(s):** MTH 336 and MTH 340, or permission from the Chair.

MTH 448 - Differential Geometry

Course Units: 1.0 (**Not Offered this Academic Year**) A study of curves and surfaces in 3-space. Topics include arc length, curvature, torsion, the Frenet frame, the first and second fundamental forms, normal curvature, and Gaussian curvature. **Prerequisite(s):** MTH 117 and MTH 340, or permission from the Chair.

MTH 480 - Foundations of Mathematics

Course Units: 1.0 (**Not Offered this Academic Year**) Propositional and predicate logic, Gödel completeness theorem, introduction to recursion theory. **Cross-Listed:** PHL 480 **Prerequisite(s):** MTH 332 or permission from the Chair. **CC:** HUM

MTH 487 - Senior Writing Seminar

Course Units: 1.0 (**Winter: Staff**) This course is required by, and limited to, seniors who are not satisfying their WS requirement through either a one- or two-term thesis. The seminar will provide a forum in which students continue their study of a common upper-level mathematical topic (exact choice of topic will depend on term and instructor) and explore a new related topic independently. Students will gain experience in giving oral presentations and writing mathematical papers. **Prerequisite(s):** Admission by application only. **CC:** WS

MTH 490 - Mathematics Independent Study 1

Course Units: 1.0 (TBD: Staff) Independent study in a particular area of mathematics under the supervision of a faculty member.

MTH 491 - Mathematics Independent Study 2

Course Units: 1.0 (TBD: Staff) Independent study in a particular area of mathematics under the supervision of a faculty member.

MTH 492 - Mathematics Independent Study 3

Course Units: 1.0 (TBD: Staff) Independent study in a particular area of mathematics under the supervision of a faculty member.

MTH 493 - Mathematics Independent Study 4

Course Units: 1.0 (TBD: Staff) Independent study in a particular area of mathematics under the supervision of a faculty member.

MTH 494 - Mathematics Independent Study 5

Course Units: 1.0 (TBD: Staff) Independent study in a particular area of mathematics under the supervision of a faculty member.

MTH 495 - Mathematics Independent Study 6

Course Units: 1.0 (TBD: Staff) Independent study in a particular area of mathematics under the supervision of a faculty member.

MTH 496 - Mathematics Independent Study 7

Course Units: 1.0 (TBD: Staff) Independent study in a particular area of mathematics under the supervision of a faculty member.

MTH 497 - Mathematics One Term Senior Thesis

Course Units: 1.0 (TBD: Staff)

MTH 498 - Mathematics Two-Term Senior Thesis 1

Course Units: 0.0 (TBD: Staff)

MTH 499 - Mathematics Two-Term Senior Thesis 2

Course Units: 2.0 (TBD: Staff)

Philosophy

PHL 100 - Introduction to Philosophy

Course Units: 1.0 (TBD: Staff) An introduction to some of the most enduring questions of philosophy: Does God exist? Might the external world be an illusion? Is science rational? What is the relationship between the mind and the body? What is it to be moral, and why should one bother? CC: HUM

PHL 105 - Introduction to Ethics

Course Units: 1.0 (**TBD: Staff**) An introduction to traditional normative ethical theories, which attempt to provide a rationally defensible account of morally right and wrong conduct and morally good and bad character, and consideration of the challenges posed to these theories by ethical relativism and feminist ethics. **CC:** HUM

PHL 110 - Moral Problems

Course Units: 1.0 (**TBD: Staff**) An introduction to ethics by considering how a wide variety of reality-based examples of complex and controversial ethical issues might be resolved in a rational manner. **CC:** HUM

PHL 123 - Values and Economic Justice

Course Units: 1.0 (**TBD: Staff**) This class considers the goals economic policy might pursue and how different theories of the good lead to particular choices about desirable or undesirable economic policies. We consider mainstream economic thinking, which has roots in utilitarianism and liberalism, and alternative ideas such as libertarianism, Austrian economics, feminist, communitarian, and religious philosophy and economics. We apply these ideas to relevant policy issues, such as free trade, globalization, unemployment, income distribution, affirmative action, care of the environment, health care, and famine relief. **Cross-Listed:** ECO 123 **CC:** HUM

PHL 125 - Introduction to Logic and Critical Thinking

Course Units: 1.0 (**TBD: Staff**) A course in informal logic, with a very brief introduction to elementary formal logic. Students will learn to identify, analyze and evaluate English-language arguments in areas ranging from the sciences to current affairs to the law. **CC:** HUM

PHL 155 - Seventeenth and Eighteenth Century European Philosophy

Course Units: 1.0 (**TBD: Staff**) An introduction to philosophy by way of some of the most important European philosophical works of the Seventeenth and Eighteenth Centuries. **CC:** HUM

PHL 160 - Nineteenth and Twentieth Century Philosophy

Course Units: 1.0 (**TBD: Staff**) An exploration of some of the major trends in the philosophy of the 19th and 20th centuries focusing especially on contemporary skepticism, cultural relativism, the crisis of faith and morality, language, and the metaphysics of truth, as reflected in the contemporary philosophical movements of existentialism, analytic philosophy, phenomenology, and postmodernism. **CC:** HUM

PHL 167 - Chinese Philosophy

Course Units: 1.0 (**TBD: Staff**) An introductory survey of Confucianism, Daoism, Moism, Yin Yang, Legalism, Neo-Confucianism and Neo-Daoism. Among the theories covered in the course are Confucian theories of self-cultivation, the superior person and human nature, Menzi's theory of original human goodness, Xunzi's theory of evil human nature, Daoist theories of non-action, harmony with nature, and law of reversion, and Moist theories of universal love and non-discrimination. Many of these Chinese theories shaped Chinese civilization for over two millennia. **CC:** HUM, LCC

PHL 180 - Theories of the Good Life

Course Units: 1.0 (**TBD: Staff**) This course takes a cross-cultural approach to theories of the good life by studying ancient Greek, Chinese, African and Hindu theories, as well as more modern versions of these theories. In class, we shall analyze and debate these theories in terms of their underlying beliefs about human nature and in terms of whether someone can actually live by these theories. **CC:** HUM, LCC

PHL 205 - Relativism

Course Units: 1.0 (**TBD: Staff**) Relativism is not just a 'theoretical' issue: the Events of 9/11 have pitted those who demand 'moral clarity' against those who urge 'more understanding'. Moral disagreement is not limited to conflicts between cultures: democratic societies attempt to accommodate

points of view which conflict and diverge, sometimes nearly to the point of violence, as debates on abortion or gay marriage or the separation of church and state, or even taxation, show. But relativism is also an important theoretical issue as it raises questions about truth, justification of belief and moral skepticism. We explore these theoretical, moral and political dimensions through reading of theorists such as Rawls, Nagel, Harman, Thomson, Gutmann, and others. One philosophy course prerequisite or permission of the instructor **CC: HUM**

PHL 216 - (166) Introduction to Indian Philosophy

Course Units: 1.0 (**TBD: Staff**) An introductory survey of Hinduism, Buddhism, Jainism and Carvaka. Over the centuries, Indian philosophers inquired into the nature of reality and mind, debated epistemological issues concerning the criteria for valid knowledge, proposed paths for attaining spiritual liberation, and developed social theories for the welfare of people. Methods used by Indian philosophers include meditation, yoga, reasoning, logic, debate and observation. Some of these methods will be explored in class. **CC: HUM, LCC**

PHL 231 - Symbolic Logic

Course Units: 1.0 (**TBD: Staff**) An introduction to modern symbolic logic, focusing on translation, semantics and syntax for propositional and predicate logic. You will learn to translate natural language into the language of logic and vice versa, and study key concepts such as validity, consistency, proof, soundness and completeness. **CC: HUM, QMR**

PHL 232 - Philosophy of Science

Course Units: 1.0 (**TBD: Staff**) An introduction to philosophy of science. What are scientific theories, and how are they tested? What is scientific method? What counts as evidence for a scientific theory? What is scientific explanation? We will approach these questions both philosophically and through formal techniques. **CC: HUM**

PHL 233 - Early Modern Philosophy

Course Units: 1.0 (**TBD: Staff**) An examination of some of philosophy's "Greatest Hits," from some of the 17th and 18th centuries' greatest thinkers: Descartes, Leibniz, Locke, Berkeley, Hume, and Kant. We will consider questions like: Is there a God, and how could we know? Is your mind just your brain, or do you have an immaterial soul? What is free will, and are we just fooling ourselves when we think we have it? Does your subjective perception of the world correspond to how it is in reality, and how can you possibly know? Are there universal moral duties, which everyone has an obligation to follow regardless of their personal inclinations? **CC: HUM**

PHL 237 - Introduction to Political Philosophy

Course Units: 1.0 (**TBD: Staff**) An historical introduction to issues in political philosophy. The texts that we will consider address questions such as: Why should individuals live in society at all? Why should individuals obey any government at all? What are the sources, limits and purposes of political power? **CC: HUM**

PHL 245 - Buddhist Ethics

Course Units: 1.0 (**TBD: Staff**) Ethics is one of the three main components of the Buddhist path, the others being meditation and wisdom. In the centuries following the Buddha's death, two main branches of Buddhism developed: Theravada Buddhism and Mahayana Buddhism. The older school, Theravada, emphasized moral guidelines and meditation practices that culminate in nirvana; the Mahayana school emphasized a morality of compassion and a metaphysical theory of emptiness. In the contemporary period, Buddhists are concerned about issues relating to the environment, social justice, war, medicine and health, gender, and race. Buddhist ethical theories emphasize selflessness, moral discipline, compassion, karma and awareness. This course draws from ancient ethical texts as well as contemporary works on applying basic Buddhist principles to today's moral problems. **CC: HUM, LCC**

PHL 246 - Art, Media, and Society

Course Units: 1.0 (**TBD: Staff**) An examination of the traditional aesthetic theories of philosophers such as Plato, Aristotle, Burke, Hume, Schopenhauer, and Nietzsche, as well as more recent theories. Among the issues considered will be how art is different from everyday objects and the impact of technology on art. **CC: HUM**

PHL 248 - Philosophy and Current Affairs

Course Units: 1.0 (**TBD: Staff**) "Public philosophy" tests the prospects and limits of philosophy as a means of analyzing events and conditions of current interest. We will select an issue, such as affirmative action, the politics of religion, minority rights, the entertainment industry, etc., and track it both in the scholarly and the popular media (newspapers, television, etc.). **CC: HUM**

PHL 250 - Ethical Theory

Course Units: 1.0 (**TBD: Staff**) Theories such as utilitarianism, pure obligation theory, virtue-ethics, and enlightened self-interest theory propose to provide defensible methods for answering questions about right and wrong. The course examines traditional theories (Aristotle, Hobbes, Kant, Mill, etc.) and contemporary theories (Harman, Rawls, Wolf, Nagel, Gauthier) on issues such as moral skepticism and truth, rational self-interest, care as the basis of ethics, the diversity of moral beliefs, moral trump cards, etc. **CC: HUM**

PHL 251 - (150) Introduction to Ancient Greek Philosophy

Course Units: 1.0 (**TBD: Staff**) An examination of issues debated by ancient Greek and Roman philosophers that became central to western philosophy, including the nature of reality, the criteria for knowledge, the difference between good and pleasure, and the principles of political justice. Discussion of readings from the Pre-Socratics, Plato, Aristotle, the Epicureans and the Stoics **Cross-Listed: CLS 150 CC: HUM**

PHL 255 - On War and Killing

Course Units: 1.0 (**TBD: Staff**) The central goal of this course is to develop and apply some useful tools for critical reflection upon the morality of war. In considering this issue we will focus on two main questions: (i) that of *jus ad bellum* - what, if anything, makes it right to go to war?, and (ii) that of *jus in bello* - what kinds of actions are, and are not, justified in carrying out a war? **CC: HUM**

PHL 261 - Philosophy of Religion

Course Units: 1.0 (**TBD: Staff**) Current research in philosophical theology about language, possible worlds, and evidence used to address issues such as whether moral obligation can depend upon God's will, whether God's power is limited by the possible, whether God owns us, whether it is reasonable to bet on the existence of God. **CC: HUM**

PHL 262 - Problem of Evil

Course Units: 1.0 (**TBD: Staff**) Some actions are bad. Some actions are very bad. Some actions are very, very, very bad. Are there, in addition, actions which are evil? In other words, does "evil" mark out a form of wrongdoing that is qualitatively different from the bad or is it simply a synonym for "bad" or at most a term we reserve for marking a merely quantitative difference between bad and very bad actions? Much turns on how we decide to answer these questions - concerning both the nature of morality and of the world we inhabit. **CC: HUM**

PHL 263 - Philosophy of Gender and Race

Course Units: 1.0 (**TBD: Staff**) An examination of the central normative issues related to the gender equality and discrimination.

PHL 265 - Minds and Machines

Course Units: 1.0 (**TBD: Staff**) Is it possible to build a computer that effectively simulates human intelligence? If we did so, would the computer really be intelligent, or would it merely seem to be: Would the computer have free will? Do we have free will, or is human freedom merely an illusion? Do we have immaterial souls that can survive the deaths of our bodies and brains? In this advanced introduction to the philosophy of mind, we will consider these and other questions about what it means to have a mind, and about the relationship between mind and the brain.

PHL 266 - Philosophy in Literature

Course Units: 1.0 (**TBD: Staff**) An examination of the connections between the two disciplines. **CC: HUM**

PHL 273 - Environmental Ethics

Course Units: 1.0 (**TBD: Staff**) An exploration of the ethical and philosophical ideas that have shaped attitudes toward the environment and toward non-human species. **CC:** HUM

PHL 274 - (174) Biomedical Ethics

Course Units: 1.0 (**TBD: Staff**) An introduction to ethical problems in biology and medicine, touching on such issues as reproductive ethics (abortion, cloning), research ethics, the ethics of death and dying (assisted suicide, euthanasia) and similar subjects. **CC:** HUM

PHL 295H - Philosophy Honors Independent Project 1

Course Units: 0.0 (**TBD: Staff**)

PHL 296H - Philosophy Honors Independent Project 2

Course Units: 1.0 (**TBD: Staff**)

PHL 297 - The Ethics of Forgiveness and Revenge

Course Units: 1.0 (**TBD: Staff**) Examination of different ways of responding to wrongdoing. When is revenge appropriate and why? When is forgiveness appropriate and why? **CC:** HUM

PHL 311 - (244) Plato's Republic

Course Units: 1.0 (**TBD: Staff**) Most people care deeply about justice and strive to live just lives. But what is justice and why should we try to be just? What if we always do the right thing, but we are constantly treated badly and as if we are untrustworthy? Should we be just even if others think we are dishonest and corrupt? Is justice worth pursuing for itself? If justice is good how do we make our cities and our fellow citizens just? What kind of ruler would make a city just? In this course we will try to answer these questions as we work our way through Plato's most famous work, Republic. Each class will be organized around specific question(s). We will focus most of our attention on analyzing and interpreting Plato's answer to these questions, but we will also try to answer these questions ourselves and see whether or not we agree with Plato. **Cross-Listed:** CLS 311 **CC:** HUM

PHL 338 - Zen and Tibetan Buddhism

Course Units: 1.0 (**TBD: Staff**) Mahayana Buddhist philosophy explains the nature of reality as emptiness, which means that the nature of reality is beyond (and thus empty of) words, concepts and characteristics. Mahayana Buddhism also regards compassion as the primary motivation for ethics. This course focuses on the metaphysical theories of two schools of Mahayana Buddhist philosophy: Chinese/Japanese Zen Buddhism and Tibetan Buddhism. The course examines Zen Buddhist theories of No-Self and the nature of mind that makes sudden enlightenment possible, as well as Tibetan Buddhist theories of interdependent arising and emptiness. This course is applicable to the Asian Studies and Religious Studies majors. **CC:** HUM, LCC

PHL 341 - The Contemporary Crisis of Truth

Course Units: 1.0 (**TBD: Staff**) A study of 20th century European or American philosophies: phenomenology, existentialism, or analytic philosophy. **CC:** HUM

PHL 342 - Aristotle

Course Units: 1.0 (**TBD: Staff**) Aristotle is one of the most influential philosophers in the Western world. His impact spans centuries, influencing ancient Greek and Roman thought, medieval Christian, Arabic, and Jewish thinkers, and even today's philosophers and intellectuals. In this class we will focus mostly on his contribution to metaphysics, philosophy of mind, epistemology, and ethics. What is the nature of reality? How do we come

to have knowledge? What constitutes a good human life? These are just some of the questions that we will discuss in the course. **Cross-Listed:** CLS 242

PHL 343 - Metaphysics: On What There Is

Course Units: 1.0 (**TBD: Staff**) An examination of such topics as determinism and free will, causation, time, personal identity, necessity and possibility, objectivity, and God **Prerequisite(s):** Two philosophy courses or permission of the instructor. **CC:** HUM

PHL 344 - Advanced Political Philosophy

Course Units: 1.0 (**TBD: Staff**) This course concentrates on issues in contemporary political philosophy. **Prerequisite(s):** Two philosophy courses or permission of the instructor. **CC:** HUM

PHL 359 - Postmodernism

Course Units: 1.0 (**TBD: Staff**) Do some groups control the way we use language? Is discourse male-dominated or Euro-centric? Postmodern theories investigate the nature of language, as well as questions concerning power and language: How is power gained and controlled through discourse, the media and other cultural institutions? Postmodern theories have had an impact on contemporary literature, art, and media theory. Readings by Structuralist and Postmodern thinkers, such as Saussure, Barthes, Foucault, Cixous, Irigaray, and Derrida will be discussed. **Cross-Listed:** WGS 359 **Prerequisite(s):** One philosophy course or permission of the instructor. **CC:** HUM

PHL 365 - Philosophy of Mind

Course Units: 1.0 (**TBD: Staff**) Critical examination of some central issues in the philosophy of mind, including the mind/body problem, the problem of other minds, "intelligent" machines, and animal minds. **CC:** HUM

PHL 374 - Advanced Biomedical Ethics

Course Units: 1.0 (**TBD: Staff**) An advanced historically based introduction to biomedical ethics. Among the subjects treated will be the relationship between bioethics and traditional medical ethics, the evolution of the discourse, core concepts, models, theories and organizational infrastructure of bioethics, including IRBs and ethics committees. The course is designed to serve as a foundation for graduate work in bioethics and to fulfill the required knowledge competencies recommended by the American Society of Bioethics and Humanities in its 1998 report Core Competencies for Health Care Ethics Consultation. **Prerequisite(s):** Two philosophy courses or permission of the instructor. **CC:** HUM

PHL 376 - (476) Philosophy of Law/Jurisprudence

Course Units: 1.0 (**TBD: Staff**) An advanced course in jurisprudence. Primary topics include: the nature of law and legal reasoning in general; the nature of criminal law, including both the role of excuses in the criminal law and the aims and justification of criminal punishment; and the nature of tort law, including both the relationship between negligence and liability and the relationship between causation and liability **Prerequisite(s):** One philosophy course or permission of the instructor. **CC:** HUM

PHL 388 - (288) Skepticism East and West

Course Units: 1.0 (**TBD: Staff**) For as long as there have been philosophers engaged in passionate pursuit of knowledge, there have been skeptics critical of the entire enterprise. Can we really know the Truth about anything? For that matter, how important is it for us to know the Truth? Skeptical thinkers have appeared in all times and cultures. We will engage with three venerable texts: the Zhuangzi from ancient China, Nagarjuna's writings on the Middle Way from ancient India, and the Outlines of Skepticism by Sextus Empiricus from ancient Greece. Our goal is to put these authors into dialogue and then join in that dialogue. **CC:** HUM

PHL 408 - New Directions in Philosophy

Course Units: 0.0 (**TBD: Staff**) Preparation for biweekly talks by visiting philosophers and development of writing skills. This course extends over two terms. Only one course credit is given. Required of philosophy and interdepartmental majors. During the first term, students sign up for 408;

during the second, for 418. Both 408 and 418 may be taken during any year. Because 408 carries no credit, students should register for it in conjunction with three other full-credit courses. Seniors who have not otherwise satisfied their Senior Writing Requirement may do so by taking this course.

PHL 418 - New Directions in Philosophy

Course Units: 1.0 (**TBD: Staff**) Preparation for biweekly talks by visiting philosophers and development of writing skills. This course extends over two terms. Only one course credit is given. Required of philosophy and interdepartmental majors. During the first term, students sign up for 408; during the second, for 418. Both 408 and 418 may be taken during any year. Because 408 carries no credit, students should register for it in conjunction with three other full-credit courses. Seniors who have not otherwise satisfied their Senior Writing Requirement may do so by taking this course. **CC:** HUM

PHL 445 - Seminar in Metaphysics

Course Units: 1.0 (**TBD: Staff**) May be repeated, if topic changes. **Prerequisite(s):** Two philosophy courses or permission of the instructor. **CC:** HUM

PHL 446 - Seminar in Epistemology

Course Units: 1.0 (**TBD: Staff**) Spring Topic: Topics in Philosophy Mind. **Prerequisite(s):** Two philosophy courses or permission of the instructor. **CC:** HUM

PHL 447 - Advanced Logic

Course Units: 1.0 (**TBD: Staff**) May be repeated, if topic changes. **Prerequisite(s):** PHL 231 or permission of instructor. **CC:** HUM

PHL 448 - Seminar in Ethics or Value Theory

Course Units: 1.0 (**TBD: Staff**) **Prerequisite(s):** Two philosophy courses or permission of the instructor. **CC:** HUM **Note:** Course may be repeated, if topic changes.

PHL 450 - Seminar in the History of Philosophy

Course Units: 1.0 (**TBD: Staff**) The topic changes from course to course and is up to the discretion of the instructor. **CC:** HUM

PHL 462 - Philosophy of Language

Course Units: 1.0 (**TBD: Staff**) An examination of key concepts in the philosophy of language, such as truth, meaning, reference, definite descriptions, names, demonstratives, and propositional attitudes. The fundamental question: How does language connect us to the world? **Prerequisite(s):** Two philosophy courses or permission of the instructor. **CC:** HUM

PHL 490 - Philosophy Independent Study 1

Course Units: 1.0 (**TBD: Staff**) Selected topics in philosophy. **Prerequisite(s):** Permission of the instructor.

PHL 491 - Philosophy Independent Study 2

Course Units: 1.0 (**TBD: Staff**) Selected topics in philosophy. **Prerequisite(s):** Permission of the instructor.

PHL 492 - Philosophy Independent Study 3

Course Units: 1.0 (**TBD: Staff**) Selected topics in philosophy. **Prerequisite(s):** Permission of the instructor.

PHL 493 - Philosophy Independent Study 4

Course Units: 1.0 (**TBD: Staff**) Selected topics in philosophy. **Prerequisite(s):** Permission of the instructor.

PHL 498 - Philosophy Honors Thesis 1

Course Units: 0.0 (**TBD: Staff**) Substantial two-term written project on a specific philosophical topic, under the direction of an advisor, culminating in an honors thesis. Philosophy 498 carries 0 credits. Upon completion of PHL 499 the student receives two course credits. Normally taken in the senior year.

PHL 499 - Philosophy Honors Thesis 2

Course Units: 2.0 (**TBD: Staff**) Substantial two-term written project on a specific philosophical topic, under the direction of an advisor, culminating in an honors thesis. PHL 498 carries 0 credits. Upon completion of PHL 499 the student receives two course credits. Normally taken in the senior year. **Prerequisite(s):** PHL 498

Physics

Physics Courses

Common Curriculum Courses

Courses numbered in the 050's are designed particularly for non-science majors seeking to satisfy Common Curriculum requirements, and all of these courses carry Common Curriculum credit. They may not be counted toward the major in physics or toward any other science or engineering major, but may count toward an interdepartmental major (see requirements for Physics, B.S.).

PHY 010 - Physics and Astronomy Seminar

Course Units: 0.0 (**TBD: Staff**) Discussion of special topics in physics and astronomy relevant to senior research projects and professional development. Attendance at Physics and Astronomy seminars is required. Required for all Physics and Astronomy Majors and co-requisite for PHY 490 and PHY 493 . Students must pass PHY 010 to receive a passing grade in PHY 490 or PHY 493.

PHY 100 - Exploring Physics & Astronomy

Course Units: 1.0 (**TBD: Staff**) Team-taught course introducing physics at Union. Topics covered may include astronomy, astrophysics, atomic and molecular physics, biophysics, computational physics, laser physics, quantum measurement, nuclear and particle physics, solid-state physics, and statistical physics. **Prerequisite(s):** By invitation. **CC:** SET

PHY 110 - Physics for the Life Sciences 1

Course Units: 1.0 (**TBD: Staff**) An introduction to classical mechanics, fluids, and thermodynamics with applications in the life sciences. Students must major in a life science or be admitted by permission of the instructor. **Prerequisite(s):** MTH 102 or MTH 112 or MTH 113 (may be taken concurrently). **Corequisite(s):** PHY 110L **CC:** SCLB **Lecture/Lab Hours** Three lab hours each week.

PHY 111 - Physics for the Life Sciences 2

Course Units: 1.0 (**TBD: Staff**) An introduction to electromagnetism, optics, and the structure of matter with applications in the life sciences. **Prerequisite(s):** PHY 110 or PHY 120 or IMP 120 . **Corequisite(s):** PHY 111L **Lecture/Lab Hours** Three lab hours each week.

PHY 120 - Matter in Motion

Course Units: 1.0 (**TBD: Staff**) Calculus-based introduction to classical mechanics; Newtonian dynamics and energetics of a single particle and of systems of particles. Integrated class and lab meets four times each week. **Prerequisite(s):** MTH 102 or MTH 112 or MTH 113 (may be taken concurrently). **CC:** SCLB

PHY 121 - Principles of Electromagnetics

Course Units: 1.0 (**TBD: Staff**) Calculus-based introduction to waves, electro and magneto statics, and electrodynamics through Maxwell's equations. Integrated class and lab meets four times each week. **Prerequisite(s):** PHY 120 or IMP 120 **and** MTH 102 or MTH 112 or MTH 113 (may be taken concurrently) **CC:** SCLB

PHY 122 - Relativity, Quantum, and Their Applications

Course Units: 1.0 (**TBD: Staff**) Calculus-based introduction to the structure of matter, including quantum effects, particle, nuclear, atomic, molecular, and solid state physics, and applications to materials of interest to engineers and scientists. **Prerequisite(s):** PHY 121 or IMP 121 . **Corequisite(s):** PHY-122L **Lecture/Lab Hours** Three lab hours each week.

PHY 123 - Heat and Light

Course Units: 1.0 (**TBD: Staff**) Calculus-based introduction to thermodynamics, geometric and physical optics, and astrophysics. Integrated class and lab meets four times each week. **Prerequisite(s):** PHY 121 or IMP 121 .

PHY 200 - Molecular Biophysics

Course Units: 1.0 (**TBD: Staff**) Selected topics in molecular biophysics including an overview of proteins, nucleic acids, viruses and bacteria, with an emphasis on molecular structure and functioning. Experimental techniques used in modern biophysical research included in the course are various optical spectroscopies and microscopies, as well as hydrodynamic methods (sedimentation, diffusion, viscosity, electrophoresis), NMR, and x-ray diffraction. **Prerequisite(s):** PHY 111 or PHY 121 or IMP 121 , and some exposure to biology or permission of the instructor.

PHY 210 - The Physics of Modern Medicine: Applications in Imaging, Surgery and Therapy

Course Units: 1.0 (**TBD: Staff**) This course introduces the technologies used in modern medicine and the basic physical principles that underlie them. Topics will include: laser surgery, ultrasound imaging, laparoscopic surgery, diagnostic x-ray imaging, nuclear medicine, computed tomography (CAT) scans, magnetic resonance imaging (MRI) scans, and radiation therapy. Safety issues involved in the use of each technique will be considered in depth, and discussions will include societal implications of the growing use of technology in medicine. Specific medical applications discussed will include (but are not limited to): colon cancer screening, arthroscopic knee surgery, laser eye surgery, dermatological laser surgery, obstetrical ultrasound, cardiovascular ultrasound, mammography, osteoporosis screening, cancer radiation therapy, and applications of PET and MRI brain scans in neuroscience. **Prerequisite(s):** PHY 111 or PHY 121 or IMP 121 , or permission of the instructor.

PHY 220 - Relativity and Introduction to Quantum Mechanics

Course Units: 1.0 (**TBD: Staff**) A second course in modern physics covering special relativity and an introduction to quantum mechanics. Topics include relativistic kinematics, relativistic dynamics, four-vector notation, relativistic collisions, origins of quantum mechanics, Schrodinger's equation and the development of wave mechanics, applications of wave mechanics in one and three dimensions (step potential, square well, harmonic oscillator), angular momentum operators, the hydrogen atom, Dirac notation and matrix formulation of linear operators, Dirac Delta function, spin angular momentum, measurement theory, and time-independent perturbation theory. **Prerequisite(s):** PHY 122 **Lecture/Lab Hours** One hour computational lab each week.

PHY 230 - Intermediate Classical Mechanics

Course Units: 1.0 (**TBD: Staff**) An analytical treatment of classical mechanics. Topics include motion of a particle in one, two, and three dimensions; planetary motion; collision theory; moving coordinate systems; dynamics of rigid bodies; and the Lagrangian form of the equations of motion. **Prerequisite(s):** PHY 110 or PHY 120 or IMP 120 **Prereq/Corequisite(s):** MTH 117 (pre- or co-requisite), or permission of the instructor. **Lecture/Lab Hours** One hour computational lab each week.

PHY 270 - Intermediate Electromagnetism

Course Units: 1.0 (**TBD: Staff**) Electric and magnetic fields and potentials; electric and magnetic properties of matter; Maxwell's field equations. **Prerequisite(s):** PHY 121 and MTH 117 or IMP 121 , or permission of the instructor. **Lecture/Lab Hours** One hour computational lab each week.

PHY 295H - Physics Honors Independent Project 1

Course Units: 0.0 (**TBD: Staff**) Topic to be chosen in consultation with a faculty member and the student's advisor.

PHY 296H - Physics Honors Independent Project 2

Course Units: 1.0 (**TBD: Staff**) Topic to be chosen in consultation with a faculty member and the student's advisor.

PHY 300 - Methods of Modern Experimental Physics

Course Units: 1.0 (**TBD: Staff**) A laboratory-based course dealing with contemporary techniques in experimental physics. **Prerequisite(s):** PHY 122 and one physics course at the 200-level or higher, or permission of the instructor. **CC:** WAC

PHY 310 - Advanced Topics in Physics 1

Course Units: 1.0 (**TBD: Staff**) Course topic for each year to be chosen from the following: Computational Physics: A laboratory-based course providing practical tools to solve computational physics problems drawn from a wide range of areas, including classical mechanics, electromagnetism, special relativity, and quantum mechanics. Algorithms include root-finders, integration techniques, Monte Carlo methods, ordinary and partial differential equation solvers, numerical Fourier transforms, minimization tools, and numerical linear algebra algorithms. Condensed Matter Physics: An introduction to the microscopic structures and to the electrical and thermal properties of metals, insulators, and semiconductors. Topics include the description of crystal lattices, electrons in a periodic potential, electronic band theory, phonons and their interactions with electrons, cohesive energy of solids, defect states, and superconductivity. Modern Physical Optics: Interference, diffraction and polarization of light, interaction of light and matter, classical and quantum description of optics, and lasers. Three-hour lab each week. Nuclear/Elementary Particle Physics: An introduction to both nuclear and particle physics covering basic nuclear structure and properties, nuclear models, nuclear decay and radioactivity, nuclear reactions, fission, fusion, accelerators, elementary particle physics, and the quark model. Statistical Mechanics: Probability theory, laws of thermodynamics, kinetic theory of gases and the statistical basis of thermodynamics, Bose Einstein and Fermi Dirac distributions, applications to simple fluids, magnetic systems, metals, photons, and superfluid helium. Advanced Electromagnetism: Relativistic electrodynamics, electromagnetic radiation and waves. Quantum Optics: The study of the interaction of light and matter in systems where the wave nature of matter and the particle nature of light must be taken into account. Topics may include single-photon interference, correlated photons and the EPR paradox, quantum computing, quantum cryptography and quantum teleportation, atom optics and atom interferometry, laser cooling and Bose-Einstein Condensation, and implications of quantum mechanics for nanomaterials and nanodevices. Electronics: A laboratory course in basic electronics and instrumentation for science majors. Topics include AC and DC circuits, diodes, rectifiers, transistors, operational amplifiers, binary logic, Boolean algebra, digital circuits, analog-digital conversion, transducers, and computer interfacing. Six hours of lab each week. Others depending upon student interest. **Prerequisite(s):** Course open to juniors and seniors only. Enrollment by permission of the instructor.

PHY 311 - Advanced Topics in Physics 2

Course Units: 1.0 (**TBD: Staff**) Course topic for each year to be chosen from those listed in Physics 310 depending upon student interest. Course open to juniors and seniors only. Enrollment by permission of the instructor.

PHY 312 - Advanced Topics in Physics 3

Course Units: 1.0 (**TBD: Staff**) Course topic for each year to be chosen from those listed in Physics 310 depending upon student interest. Course open to juniors and seniors only. Enrollment by permission of the instructor.

PHY 350 - Advanced Quantum Mechanics

Course Units: 1.0 (**TBD: Staff**) A second course in quantum mechanics with applications to selected problems in atomic, nuclear, and solid state physics. **Prerequisite(s):** PHY 220 and MTH 117, or permission of the instructor.

PHY 490 - Physics Two-Term Senior Thesis 1

Course Units: 0.0 (**TBD: Staff**) The student will normally begin a research project by the fall of the senior year under the supervision of a faculty member; interested students are encouraged to begin research projects earlier in their studies. All students involved in research will meet together

once a week with a faculty member who will organize oral reports by the students based on their progress. A written report is required on completion of the project. **Prereq/Corequisite(s):** Completion of PHY 491 earns the total credits.

PHY 491 - Physics Two-Term Senior Thesis 2

Course Units: 2.0 (**TBD: Staff**) The student will normally begin a research project by the fall of the senior year under the supervision of a faculty member; interested students are encouraged to begin research projects earlier in their studies. All students involved in research will meet together once a week with a faculty member who will organize oral reports by the students based on their progress. A written report is required on completion of the project. **Prerequisite(s):** PHY 490 **CC:** WS

PHY 492 - Physics Senior Thesis 3

Course Units: 1.0 (**TBD: Staff**) The student will normally begin a research project by the fall of the senior year under the supervision of a faculty member; interested students are encouraged to begin research projects earlier in their studies. All students involved in research will meet together once a week with a faculty member who will organize oral reports by the students based on their progress. A written report is required on completion of the project. **Prerequisite(s):** PHY 491 **CC:** WS (final term)

PHY 493 - Physics Senior Writing Project

Course Units: 1.0 (**TBD: Staff**) The student will normally begin a research project by the fall of the senior year under the supervision of a faculty member; interested students are encouraged to begin research projects earlier in their studies. All students involved in research will meet together once a week with a faculty member who will organize oral reports by the students based on their progress. A written report is required on completion of the project. **Corequisite(s):** Fall term students attend PHY 490 Lectures. **CC:** WS

PHY 495 - Physics Independent Study 1

Course Units: 1.0 (**TBD: Staff**) Topic to be chosen in consultation with a faculty member and the student's advisor.

PHY 496 - Physics Independent Study 2

Course Units: 1.0 (**TBD: Staff**) Topic to be chosen in consultation with a faculty member and the student's advisor.

PHY 497 - Physics Independent Study 3

Course Units: 1.0 (**TBD: Staff**) Topic to be chosen in consultation with a faculty member and the student's advisor.

PHY 498 - Physics Independent Study 4

Course Units: 1.0 (**TBD: Staff**) Topic to be chosen in consultation with a faculty member and the student's advisor.

Portuguese

POR 100 - Basic Portuguese 1

Course Units: 1.0 (**TBD: Staff**) A foundation course in Portuguese, open only to students who have been accepted for the following fall's term abroad in Brazil. Study of the structure of the language supported by laboratory work, audio-lingual training. **CC:** HUM

POR 104T - Portuguese Language Studied Abroad

Course Units: 1.0 (**TBD: Staff**) A continuation of Basic Portuguese I. **Prerequisite(s):** POR 100 . See International Programs.

POR 200 - Intermediate Portuguese 1

Course Units: 1.0 (**TBD: Staff**) Intermediate Portuguese I is an intensive and accelerated grammar review, and offers vocabulary growth. This course furthers the development of conversation, reading and writing skills based on a variety of cultural text and authentic cultural artifacts. **CC:** LCCP, HUM

POR 490 - Portuguese Independent Study

Course Units: 1.0 (**TBD: Staff**) **Prerequisite(s):** Permission of the instructor.

Political Science

Political Science - Introductory Courses

PSC 111 - Introduction to US Politics

Course Units: 1.0 (**Fall: Wiest; Winter: Staff; Spring: Oxley**) A broad overview of the operation and issues of central concern in the study of U.S. politics. Particular attention is paid to evaluating the U.S. governing system in relation to major theories of political power, such as elitism, pluralism, and populism. In examining these and other broad concepts there is a focus on the foundations, institutions, and linkage mechanisms (political parties, media, etc.) that play a critical role in U.S. politics. Depending on the instructor, topics covered often include: the founding period, U.S. political culture, civil rights and liberties, money and politics, campaigns and elections, the role of mass media, parties and interest groups, politics in the post 9/11 era, and public policies focusing on crime, foreign affairs, the environment, poverty, health care, and war. **CC:** SOCS

PSC 112 - Introduction to Global Politics

Course Units: 1.0 (**Fall: Lobe; Winter: Ahmed; Spring: Hislope**) An overview of 21st century dynamics that shape national politics in different regional settings, the behavior of states in the world arena, and how global actors impact each other. Depending on the instructor, topics to be explored could include war, terrorism, political economy, historical perspectives, cultural tensions, nation-building and development, imperialism, democracy, balance of power, human rights, emerging institutions, and the world's ecology. In all sections, attention will be paid to the development of political arguments, the critical use of concepts and theories, and strategies of making judgments about globalization and about the impact of international affairs on domestic politics and vice-versa. **CC:** SOCS

PSC 113 - Introduction to Political Thought

Course Units: 1.0 (**Fall: Cidam; Winter: Seri; Spring: Cidam**) This course examines key ideas and concepts, as well as "eternal" questions, in the history of western political thought. We will ask controversial questions such as: What is justice? Can we achieve democracy without eliminating poverty? What are the qualities of a good leader? Should we even have leaders? Can women be philosopher-kings? How does class struggle affect the participation of citizens? What are the qualities of a "good" citizen? These questions have been debated for over 2500 years. The debate continues in this course as we learn what the major thinkers said about these issues. **CC:** SOCS

Political Science - Common Curriculum Course

PSC 123 - Topics in Mathematical Political Science

Course Units: 1.0 (**Not Offered this Academic Year**) A mathematical treatment (not involving calculus or statistics) of escalation, political power, social choice, and international conflict. **Cross-Listed:** MTH 060 **Prerequisite(s):** No previous study of political science is necessary, but PSC 111 or PSC 112 would be relevant. **CC:** QMR

Political Science - Research Methods

PSC 220 - Social Data Analysis

Course Units: 1.0 (**Winter: Wiest**) Introduction to the research process in political science with an emphasis on the analysis of social science data. Focus on the utility of quantitative data and statistical techniques to answer research questions about the political world. **Cross-Listed:** SOC 201
Prerequisite(s): Any introductory social science course; a background in math is not necessary. **CC:** QMR

PSC 223 - Critical Comparisons in Politics

Course Units: 1.0 (**Fall: Hislope**) What does a convincing explanation in political science look like? This course will focus on how to make good comparative explanations in political science. We will explore how to do this by studying and applying key concepts, such as culture, social movements, elites, institutions, hegemony, and the state. This course will help prepare students for writing the senior thesis.

Political Science - Comparative Politics

200-level courses in comparative politics generally cover political issues that are regionally concentrated (such as Latin America, Europe, China, and the Middle East), or they focus on themes (such as democracy, nationalism, social movements) that are framed at a conceptual level accessible to students from across the college.

300-level courses in comparative politics have a special topics theme (women and politics, the Marxist political tradition, democratization, genocide, and film) and/or a strong methodological component. The course materials are more conceptually and theoretically complex, and involve a more sophisticated set of intellectual problems.

PSC 201T - Cambodia Study Abroad: Crossing Cultures

Course Units: 1.0 (**Not Offered this Academic Year**) This class is geared towards deepening students' understanding of Cambodian history, culture and contemporary society. During Winter term (prior to the beginning of class in Spring term), there are two weeks of instruction designed to give students academic background on political and economic development, and a brief primer on 20th century and contemporary Cambodian history, politics, economy, and society. However, the core of the class is the experience in-country during spring term. This will consist of classroom study, lectures by in-country experts, excursions to learn and interact with the broader society, and will help students to excel in their internships with local NGOs. **Prerequisite(s):** PSC 111 or PSC 112 or sophomore standing.

PSC 213 - Contemporary China: Politics, Economy and Society

Course Units: 1.0 (**Not Offered this Academic Year**) A survey course on the politics of the People's Republic of China, with an emphasis on state-society relations. After briefly introducing the Republican and state socialist eras, the heart of the course provides a historical and topical overview of the contemporary political and economic reforms in China. It explores topics in Chinese domestic politics, such as policy-making, center-local relations, inequality, rural transformation, industrialization, village elections, the rule of law and contentious politics, in addition to China's relationship with the outside world, including its integration into the international economy, the environment, energy and foreign policy.
Prerequisite(s): PSC 111 or PSC 112 or sophomore standing. **CC:** LCC

PSC 216 - Politics in Africa

Course Units: 1.0 (**Not Offered this Academic Year**) This course is designed to introduce students to the essential political history and political dynamics of contemporary Sub-Saharan Africa. By the end of the term, students will have developed an understanding of the process through which the states of contemporary Sub-Saharan Africa emerged; the types of political systems that have evolved in these states; ethnicity and ethnic conflict in Africa; inter and intra-state wars on the continent and their impact; the challenges of economic development and securing prosperity for Africa; and gender and politics, religion and politics, and the politics of terrorism in Africa. **Prerequisite(s):** PSC 111 or PSC 112 or sophomore standing.

PSC 240 - Comparative Ethnic and Racial Politics

Course Units: 1.0 (**Spring: Hislope**) An introduction to the trends and patterns of ethnic conflicts in the contemporary world. Issues pertaining to the rise of nations; theories of ethnic mobilization; the attempt to build general, cross-national explanations; and current efforts to solve ethnic conflict.
Prerequisite(s): PSC 111 or PSC 112 or sophomore standing. **CC:** LCC

PSC 243 - Latin American Politics

Course Units: 1.0 (**Not Offered this Academic Year**) This course offers a working knowledge of Latin America's current politics, trends, and challenges. Years after democratization, regular elections are in place, and support for democracy in the region seems widespread. Still, as local traditions infuse the principles of liberal democracy, politics in Latin America reveal unique traits. Exploring the political as an interpretive endeavor, the course's readings, assignments, and class discussions will help to identify key political institutions, traditions, and cleavages, as well as forms of agency and leadership, both in specific countries and at the regional level. **Prerequisite(s):** PSC 111 or PSC 112 or sophomore standing. **CC:** LCC

PSC 245 - Populisms in Latin America & Beyond

Course Units: 1.0 (**Not Offered this Academic Year**) Leadership and politics in Latin America are often characterized as populist, but there is widespread disagreement as to what populism is. Claimed by no one, most of the time populism is blamed, disapprovingly, upon leaders and movements connoting demagoguery, manipulative appeals to people's emotions and disregard for formal institutions and rules. Interestingly, a similar characterization of populism has recently entered politics in countries such as France or the U.S. With a main focus on Latin America, extending the discussion outside the region, this course scrutinizes three different "populist moments," from the first half of the 20th century to the present. Major figures such as Peron or Vargas; neoliberal reformers from the 1990s, from Fujimori to Menem, and recent Latin American leaders, from Chávez, to Fernandez de Kirchner, plus a few salient cases from outside the region (e.g. Trump, Le Pen) will be examined in the class.

Prerequisite(s): PSC 111 or PSC 112 or sophomore standing.

PSC 246 - Asian Development: Industrialization Beyond the West

Course Units: 1.0 (**Not Offered this Academic Year**) How did some Asian countries become the first non-Western countries to achieve high-income status, near elimination of poverty, a highly educated and healthy population, leading edge technology and in some cases robust democracies and even admirably equal distributions of wealth? And how did they come to compete with the West, often on terms set by Western countries, despite the West's much earlier industrialization, and the vast geographic and cultural distances? Are answers to be found in politics and institutions? Culture? Resources and demography? Historical effects of imperialism? Regionalism? After a brief comparison of pre-modern China and Europe, the course focuses on the 'miracle' of Japanese industrialization from the late 19th to early 20th century, as well as Japan's combination of industrialization and militarization on the road to World War Two. This is followed by post-World War Two Japan and the four Asian Tigers (South Korea, Taiwan, Hong Kong and Singapore), before focusing on the return of China since the 1980s, and Southeast Asia within the Asian region. This is a reading intensive course, though no background in Asia, political science or economics is required **Prerequisite(s):** PSC 111 or PSC 112 or sophomore standing.

PSC 247 - Human (In) Security in a Comparative Perspective

Course Units: 1.0 (**Not Offered this Academic Year**) With a focus on "the daily lives of ordinary people", the recent tradition of Human Security redefines safety as "freedom from fear and freedom from want." At the interface of security, development, and Human Rights grounding democratization, Human Security adopts the perspective of the common citizen, calling for collaboration between states and international and grassroots organizations to prevent and eliminate obstacles undermining people's autonomy, rights, and development. This course aims, first, to provide students with a solid conceptual and applied knowledge of Human Security. Second, by learning about the deep-seated conditions that hinder people's safety from fear and from want, students will gain a thicker perspective on the structural challenges for peace and democracy around the world through the eyes of the people on the ground. **Prerequisite(s):** PSC 111 or PSC 112 or sophomore standing.

PSC 248 - The Politics of the New Europe

Course Units: 1.0 (**Fall: Hislope**) A survey of contemporary European politics including topics such as the emerging European Union, the rise of right-wing movements, growing regional and sectional conflict, patterns of immigration, and debate about the very meaning of "Europe."

Prerequisite(s): PSC 111 or PSC 112 or sophomore standing.

PSC 249 - Middle East Politics

Course Units: 1.0 (**Not Offered this Academic Year**) This course is designed to introduce students to the essential political history and dynamics of the Middle East in the 20th century. Students will study the processes through which the states of the contemporary Middle East emerged; the types of political regimes that have evolved in these states; the origins and evolution of the Arab-Israeli conflict; the relationships between Islam and politics; and debates regarding U.S. foreign policy toward the region. **Prerequisite(s):** PSC 111 or PSC 112 or sophomore standing.

PSC 340 - Politics and Film

Course Units: 1.0 (**Fall: Lobe**) This course explores political themes through the rigorous viewing of feature films and documentaries from the United States and abroad. Films present differing perspectives on the subject. Themes include war, revolution, counter-revolution, role of the individual in social conflict, and US intervention in foreign lands. Class requires critical analysis of the films, supplementary readings, and six conceptual-analytical papers. **Prerequisite(s):** PSC 111 or PSC 112 or sophomore standing.

PSC 341 - Genocide

Course Units: 1.0 (**Not Offered this Academic Year**) Genocide is humanity's greatest and most enduring scourge. After the horrific Holocaust, the world's leaders cried out, "Never Again." Sadly, genocide has occurred, again and again, wherein mass murders, ethnic cleansing, mass rape and pillaging, has taken place in countless places and times since World War II. This course examines examples, causes and motives, position of the perpetrators, victims and bystanders. We shall also look at proposals for avoiding or preventing genocide, perhaps through some form of international humanitarian intervention, or "responsibility to protect." **Prerequisite(s):** PSC 111 or PSC 112 or sophomore standing.

PSC 342 - Challenges to Democratization in Latin America

Course Units: 1.0 (**Fall: Seri**) Democracies in Latin America confront a number of challenges, obstacles, and dilemmas that frequently put their continuity at risk. With the format of a research seminar, this course will explore five thematic clusters. Social indicators on rights and inequality, political identities and citizenship, political and legal institutions, life and economic growth after Neoliberalism, and public safety, crime, and state violence. A preoccupation with some of the most urgent challenges faced by democratization in the region will also lead us to assess actual and potential alternatives. **Prerequisite(s):** PSC 111 or PSC 112 or sophomore standing. **CC: LCC**

PSC 343 - Women and Politics in the Muslim World

Course Units: 1.0 (**Not Offered this Academic Year**) In this course we will study how politics and women intersect across the Muslim world, including the Middle East, Sub-Saharan Africa, Central Asia, and South Asia. Empirically, we will investigate the varied paths women's rights have taken in different national settings while examining similarities and differences in the degree to which women wield social, economic, and political power in their respective countries. We will seek theoretical explanation for women's status in the region, which varies significantly from country to country. Sample topics for discussion include the Koran and women, debates about the veil, honor killings, the impacts of oil, war, and foreign intervention on women's status, and Muslim female prime ministers and presidents. **Prerequisite(s):** PSC 111 or PSC 112 or sophomore standing.

PSC 346 - Technologies in Society: Power, Politics and Economy across Industrial Revolutions

Course Units: 1.0 (**Not Offered this Academic Year**) With the advent of the internet, robotics, Big Data, artificial intelligence and machine learning, we are already well into a Third (some say 'Fourth') Industrial Revolution. If history is any guide, this industrial revolution is transforming society, politics and culture in ways both overt and subtle. Further, as it diffuses, it will not be replicated identically across time and space. This course compares the first, second and third industrial revolutions - selectively focusing on the advent of factories/machines, mass production and information technologies, respectively. For each revolution, the course asks three questions 1) how value is created, 2) who controls and benefits from the new modes of production and consumption, and 3) how it transforms and is transformed by its social and political contexts. Second, it explores variation across different national political economies, most prominently in the advanced countries of England, the US, Europe and Japan, with selective comparisons to other developing countries, including China today. **Prerequisite(s):** PSC 111 or PSC 112 or sophomore standing.

PSC 347 - Comparative Left Politics

Course Units: 1.0 (**Not Offered this Academic Year**) A critical exploration of Marxian ideas and a comparative examination of how those ideas were, and are, translated into political practice. **Prerequisite(s):** PSC 111 or PSC 112 or sophomore standing.

PSC 349 - Seminar: Comparative Politics

Course Units: 1.0 (**Not Offered this Academic Year**) Selected topics in comparative politics. Content will vary from year to year. Preference to junior and sophomore political science majors. **Prerequisite(s):** PSC 111 or PSC 112 or sophomore standing. **CC: LCC**

Political Science - International Politics

200-level courses in international relations cover foreign policy-oriented courses (China and the USA), regional interstate topics (Asia and the Middle East), and practicum-based courses (Model UN). These courses are framed at a conceptual level accessible to students from across the college.

300-level courses in international relations cover advanced issues in international political economy, institutions of global governance, US security, and transnational actors and trends. The course materials are more conceptually and theoretically complex, and involve a more sophisticated set of intellectual problems.

PSC 251 - American Foreign Policy

Course Units: 1.0 (**Not Offered this Academic Year**) This course will provide an overview of the history of US Foreign Policy from the Cold War to the post-Cold War era. The course focuses on major policy options, issues in the Middle East, reset to Asia, and the choices between multilateralism and hegemonic dominance. The course emphasizes policy-making, especially the role of the President and Executive, in struggles with Congress, and the role of various NGO's, think tanks, and other lobbyists in the formation of foreign policy outcomes. **Prerequisite(s):** PSC 111 or PSC 112 or PSC 113 or sophomore standing.

PSC 252 - Global Value Chains

Course Units: 1.0 (**Not Offered this Academic Year**) This course examines the intertwining of power, politics and markets that undergird the production and consumption of everyday consumer goods, from coffee to cars to iPhones. It examines the primary countries where these goods are produced, their differing labor regimes, the international agreements regulating them, the transnational corporations which coordinate the chain of production and consumption, how goods are globally traded and the relative winners and losers these linkages create, usually between developing and developed countries. Each product also corresponds with an underlying theoretical topic, such as natural resources and the global commons or heavy industrialization and industrial policy. The course will introduce some basic conceptual building blocks which will help us organize the extraordinary variety of places, production processes, policies and populations engaged in global value chains. But, we will spend most of the course examining one commodity or product at a time, using what we learn along the way to build an increasingly sophisticated understanding of global production and exchange. Finally, for a final project, students will conduct research on their own product of choice and explore a theoretically important concept associated with it. **Prerequisite(s):** PSC 111 or PSC 112 or PSC 113 or sophomore standing.

PSC 253 - International Relations of East Asia

Course Units: 1.0 (**Not Offered this Academic Year**) This course surveys the main currents of international politics in East Asia since World War Two, with an emphasis on events since the end of the cold war. It considers the sequential rise of the economies of Japan, the four East Asian tigers, and finally Southeast Asia and China, and how regional integration across East Asian countries differs from other regions in the world. Furthermore, it examines the foreign policies of the main players in this area, including the important role of the United States, and it explores the evolution of international institutions and norms pertinent to East Asia. **Prerequisite(s):** PSC 111 or PSC 112 or PSC 113 or sophomore standing. **CC:** LCC

PSC 254 - Politics of the Arab-Israeli Conflict

Course Units: 1.0 (**Not Offered this Academic Year**) In this class students will develop an understanding of the origins, development, and essence of the Arab-Israeli conflict as well as the challenges involved in resolving the conflict. The conflict will be examined in its historical, political, and human dimensions. **Prerequisite(s):** PSC 111 or PSC 112 or PSC 113 or sophomore standing.

PSC 256 - Model United Nations

Course Units: 1.0 (**Not Offered this Academic Year**) This course prepares students to participate in the National Model United Nations (NMUN), the largest UN simulation in the world. The NMUN program provides students a better understanding of the inner working of the United Nations. Course goals are to develop research, writing, public speaking, and diplomatic skills amongst students as they confront at myriad of global public policy challenges. At the simulation, students and faculty from five continents work to propose resolutions addressing regional conflicts, peacekeeping, human rights, women and children, economic and social development, and the environment. Students are permitted to take PSC 256 multiple times for credit, but this course can only count once toward a PSC major, ID major or minor. **Prerequisite(s):** PSC 111 or PSC 112 or PSC 113 or sophomore standing.

PSC 258 - Strategies of WWII

Course Units: 1.0 (**Not Offered this Academic Year**) This course will examine the interplay between military and political strategies that shaped the course of World War II, with special attention to the European Theater. It is designed to illustrate the nature of strategic thinking, its relationship to tactical thinking, and its real-world constraints. Special attention will be given to the British decision to continue fighting after the French surrender, the Battle of Britain, Hitler's decision to invade Russia, the allied decision to invade North Africa, and the planning for Normandy. **Prerequisite(s):** PSC 111 or PSC 112 or PSC 113 or sophomore standing.

PSC 350 - Theories of International Politics

Course Units: 1.0 (**Winter: Brown**) In-depth investigation and evaluation of the major perspectives on world politics. Mainstream theories will be compared and contrasted to critical/alternative paradigms. Special attention is given to modes of theory evaluation. **Prerequisite(s):** PSC 111 or PSC 112 or PSC 113 or sophomore standing.

PSC 351 - Global Organized Crime

Course Units: 1.0 (**Not Offered this Academic Year**) This course will focus on the emergence of new transnational criminal networks in the age of globalization, and the sources and patterns of political corruption in a comparative perspective. Specific issues to be explored include: trafficking zones, weak states, economic underdevelopment, the western consumer demand for illegal commodities, international anti-corruption discourse, US drug policy, comparative analysis of mafia organizations, and how private money corrupts democracies. **Prerequisite(s):** PSC 111 or PSC 112 or PSC 113 or sophomore standing.

PSC 352 - International Organizations

Course Units: 1.0 (**Not Offered this Academic Year**) This course analyzes the development of contemporary international organizations in all forms, examines the activities of various regional organizations and non-governmental organizations (NGO's), as well as multinational organizations. Focusing on major principles, organizational characteristics, functions, and activities of the United Nations and the UN system, the course assesses the rapid changes, problems, and opportunities that have developed since the end of the Cold War. **Prerequisite(s):** PSC 111 or PSC 112 or PSC 113 or sophomore standing.

PSC 353 - Terrorism and Torture

Course Units: 1.0 (**Not Offered this Academic Year**) This course considers the definition(s) and history of terrorism, as well as its causes and manifestations in the contemporary era. Next, strategies for combating terrorism will be explored - with a major focus on the so-called "war on terror" the U.S. has been engaged in since 2001. A particularly controversial aspect of U.S. actions in the past decade has been the use of torture against detainees at Guantanamo Bay, Abu Ghraib, and other locations. The course will therefore consider a broad-ranging literature on torture - from its history, to the conditions under which it is used in the contemporary era, to questions regarding whether or not torture is effective (and for what purpose). **Prerequisite(s):** PSC 111 or PSC 112 or PSC 113 or sophomore standing.

PSC 354 - Human Rights and Immigration

Course Units: 1.0 (**Winter: Cidam**) This course explores the tense relation between immigration, nation-states, and human rights. What are the rights of documented/undocumented immigrants? What kind of human rights abuses are these people subjected to? What renders non-citizens so vulnerable to various forms of violence, discrimination, and mistreatment? To what extent can these problems be addressed and remedied by appeals to human rights? In what ways does the contemporary condition of non-citizens reveal the limits, paradoxes, and promises of human rights? In this upper level political science course, we will address these challenging, intriguing, and somewhat disconcerting questions through an interdisciplinary inquiry. **Prerequisite(s):** PSC 111 or PSC 112 or PSC 113 or sophomore standing. **CC:** SOCS

PSC 355 - Defense Policy

Course Units: 1.0 (**Spring: Brown**) A deeper understanding of US Defense Policy in relation to current trends in the international threat environment. Examines the historical roots of US defense policy with a focus on the impact of isolationism, exceptionalism, and the Cold War on those policies. The policy-making process itself will be examined highlighting the influence of the realist paradigm, as well as the various organizational inputs, which help to shape the policy outcomes. A look at the post-Cold War period with emphasis on the impact of 9/11 and the proliferation of weapons of mass destruction on changes in US policy. **Prerequisite(s):** PSC 111 or PSC 112 or PSC 113 or sophomore standing.

PSC 358 - Wealth and Power Among Nations

Course Units: 1.0 (**Not Offered this Academic Year**) An examination of the tensions between developed and developing countries in the global political economy. First, the course traces the genealogy of thinkers on the issues of development, such as Smith, Marx, Keynes, modernization theory and development economics, as a way to understand the enduring debates within the field. Second, it examines historical transformations in the international economy, such as in trade, global finance and economic crises, in order to understand how the structures and opportunities for developing countries have transformed over time. Finally, although there is no focus on any single region of the world, the course touches upon the oil boom in the Middle East in the 1970s, the debt crises in Latin America and Africa in the 1980s, the rise of Japan and the East Asia tigers, the fall of the Soviet Union and Eastern bloc countries in the 1990s, the new giants of China and India, new forms of post-Fordist production, and the relationship between production and identity. **Prerequisite(s):** PSC 111 or PSC 112 or PSC 113 or sophomore standing.

PSC 359 - Seminar: International Politics

Course Units: 1.0 (**Fall: Brown**) Selected topics in international politics. Content will vary from year to year. Preference to sophomore and junior political science majors. **Prerequisite(s):** PSC 111 or PSC 112 or PSC 113 or sophomore standing.

Political Science - Political Theory

200-level courses survey a wide range of texts and themes, and may focus on a specific historical period or a specific theoretical approach. These courses can be taken by students at all levels.

300-level courses are geared towards students who have likely taken PSC 113 or a 200-level course in theory, and have basic familiarity with the history of Western political thought. Some familiarity with close reading and textual interpretation is expected, although these are practices and skills that students will also further develop in 300-level courses.

PSC 230 - Ancient Political Thought

Course Units: 1.0 (**Not Offered this Academic Year**) Examines the ideas of major political thinkers in ancient philosophy. Potential themes include the tension between philosophy and politics, the nature of democracy, the relationship between war and political life, debates concerning how to live a "good life," the political significance of poetry and art, and the body/mind duality. Thinkers and texts that may be covered include Homer, Thucydides, Plato, Aristotle, the Greek poets, Saint Augustine, Thomas Aquinas, and the Bible.

PSC 231 - Theories of Peace and War

Course Units: 1.0 (**Not Offered this Academic Year**) Do aggression and violence arise from individuals or groups, from nations, global forces, or from entire civilizations? Is warfare an eliminable pathology or just part of the human condition? Any answer to these questions ultimately involves ontological claims on how things are, key in shaping the ways in which we imagine and inhabit our world. This course revisits arguments on peace, war, and violence central in the tradition of Western political thought. By exploring works of classical, modern, and contemporary political thinkers, contextualized in reference to key cases, we will identify and critically assess contentious explanations and philosophical justifications.

PSC 232 - Violence and Politics

Course Units: 1.0 (**Not Offered this Academic Year**) What is the relationship between violence and politics? Is politics a continuation of violent struggle through other means? Or is there a fundamental difference between the two? What is the relationship between legal order and violence? What is the role of violence in resisting different forms oppression? Can the use of violence ever be morally justifiable? If so, when and why? This political theory course aims to inquire into these challenging questions by studying the theoretical debates on the relationship between violence and politics with a special emphasis on questions related to the relationship between legal order, constitution of the state, and the use of violence both in support of, and in opposition to, the existing order. During the course of the term, we will focus on debates surrounding different forms of violence in embedded in our legal systems, look at examples of resistance movements, assess different arguments made in defense of nonviolent and violent methods of resistance, analyze different conceptions of civil disobedience, and grapple with the question of how representations of violence affect our judgments about its legitimacy and/or justification.

PSC 233 - Intellectuals and Politics

Course Units: 1.0 (**Not Offered this Academic Year**) Following the aftermath of World War II, we have seen the emergence of innumerable international and nongovernmental organizations that are specifically devoted to the protection of human rights. And yet, despite all these developments, human rights abuses, in different guises, rage on all over the world, including the developed countries of the West. During the course of the term, rather than covering the usual terrain by focusing on the outrageous and blatant human rights abuses undertaken by dictatorial regimes, we will turn our gaze to our own world and critically engage with the human rights issues that plague Western democracies, especially since the beginning of the "global war on terror" following the 9/ 11 terror attacks. Given how central human rights are to the identity of the democratic West, it is particularly disconcerting to observe increasing number of human rights abuses in countries such as the United States, UK, and various members of the European Union. What can account for this unsettling fact? Are the ongoing human rights abuses a result of an implementation problem bringing to light the inadequacies of the current international human rights regime(s) or are they symptomatic of a deeper problem that goes to the heart of the notion of human rights itself? Do the unprecedented developments in human rights law announce the coming of a new and better world where all people, regardless of their race, gender, and citizenship status will benefit from legal protection or is the idea of expanding human rights to whole humanity a utopian dream that runs the risk of becoming an ideological tool used by the Western powers? In this political theory course, we will address these challenging, intriguing, and somewhat distressing questions through an interdisciplinary inquiry.

PSC 234 - Women Political Theorists

Course Units: 1.0 (**Fall: Marso**) Where are all the women in the history of political thought? Some thinkers we explore throughout history include Mary Astell, Mary Wollstonecraft, Harriet Taylor Mill, and Emma Goldman. Their work will prepare us to discuss the political and social thought of three prominent women thinkers of the 20th century: Simone de Beauvoir, Iris Murdoch, and Hannah Arendt. We investigate questions concerning freedom and contingency, responsibility, the nature of self in relation to others, and the limits and scope of ethical action in the work of these theorists. Women political theorists often write novels, short stories, and autobiography/biography (rather than philosophical texts) to explore political and philosophical themes. Consequently, we will be reading novels and autobiography along with political philosophy to think about the relationship between philosophy, politics, and literature. We will also be interested in considering how living their lives as women might have influenced the way these philosophers viewed major political and intellectual issues of the day.

PSC 235 - African American Political Thought

Course Units: 1.0 (**Fall: Marso**) This course will introduce students to the critical and constructive dimensions of African American political thought. We will assess the claims that Black Americans have made on the polity, how they define themselves, and how they have sought to redefine the basic terms of American public life.

PSC 236 - Police, Security and Biopower

Course Units: 1.0 (**Not Offered this Academic Year**) While the development of a political community presupposes a certain level of security, the second half of the 20th century shows how unfortunately frequent it has become for people to turn into victims of the devices they set to secure themselves. How can the tensions between the political and security be addressed to enhance, not to destroy, the freedom and creativity that characterize a political community? Organized as a seminar, and heavy in contemporary political theory, this course will explore both practical and theoretical relations between political communities and the pre-political preconditions for their preservation. **CC: LCC**

PSC 237 - Music and Politics

Course Units: 1.0 (**Not Offered this Academic Year**) This class explores the multiple relationships between music and politics with a specific focus on the following dimensions: (1) the use of music as a lens to perceive the world, to frame injustices, to inform political discourse, to raise consciousness, and to mobilize public opinion; (2) the political context in which critically significant music is produced; (3) biographical details of artists that bring understanding to the art they produce; (4) the impact of class, race, ethnicity, and gender on music; (5) the interpretation of political messages found in music; and (6) the intentional and unintentional political consequences of popular music.

PSC 239 - American Political Thought To World War I

Course Units: 1.0 (**Not Offered this Academic Year**) Political thought in America from the colonial period until World War I with an emphasis on evolving political, social, cultural, and intellectual perspectives on enlightenment values, nationalism, slavery, the rise of the industrial economy, the political machine, and America's changing role in the world.

PSC 330 - Enlightenment and Its Discontents

Course Units: 1.0 (**Spring: Brown**) Is there a politics to the "age of reason?" This course focuses on enlightenment thought and its critics, in the modern as well as the contemporary era. We will inquire about the role of reason in setting the terms of citizenship, including how the citizen should behave. Is reason a male attribute? Does passion and/or religion play a role in reasonable thinking? The historical span of this course will generally cover the 17th to the 19th centuries and show how we have come to think about politics the way we do today.

PSC 333 - Twenty-First Century American Political Thought

Course Units: 1.0 (**Not Offered this Academic Year**) An exploration of political thinking in regard to the multiple crises the United States faces in the 21st century. Potential topics include threats to democracy in the United States by right wing groups and White Supremacy; specific challenges of structural racism, gender inequity, police violence, guns; social movements such as Black Lives Matter, #metoo, the Sunrise Movement; and the historical meanings of individualism, diversity, freedom, imperialism, and Western expansion in the US.

PSC 334 - Contemporary Continental Theory

Course Units: 1.0 (**Not Offered this Academic Year**) In the latter half of the twentieth century, theorists working in the continental tradition have developed new approaches to modern political concerns about the power of the state, the possibility of democracy, the importance of language, media and rhetoric, and the connections between knowledge, ethics, religion and politics. Students in this course will grapple with some of the most important figures and theories at the leading edge of this tradition. While this course presumes no background in continental theory, students must be prepared to wrestle with difficult texts, ideas and thinkers. Authors may include: Agamben, Badiou, Butler, Cavarero, Cavell, Deleuze, Derrida, Fanon, Foucault, Ranciere, Zizek.

PSC 339 - Seminar: Political Theory

Course Units: 1.0 (**Spring: Cidam**) Selected topics in political theory. Content will vary from year to year. Preference to sophomore and junior political science majors.

PSC 434 - Feminist Film

Course Units: 1.0 (**Winter: Marso**) Using 10 films as our "texts" we will examine the role of women in society, the diversity of women's lives, the impact of gender roles in various cultural contexts, the possibility of alternative sexualities and ways of living, and whether we can say what constitutes a "feminist film." The course is focused on discussion of, and writing about, the films but includes analysis of feminist political theory and feminist film theory to provide tools for better interpretation.

Political Science - United States Politics

200-level courses in United States politics generally focus on institutions of government, political behavior, or public policymaking. These courses are framed at a conceptual level accessible to students from across the college.

300-level United States politics courses focus on a special topic (such as film, political psychology, and constitutional law) and/or contain a strong methodological component. The course materials are more conceptually and theoretically complex, and involve a more sophisticated set of intellectual problems.

PSC 160 - Presidential Elections

Course Units: 1.0 (**Not Offered this Academic Year**) This course will be offered every four years, in the fall term of U.S. presidential election years. The course will consist of an in-depth examination of the presidential election. Candidates, developments, and events of that year will be analyzed, as well as placed within their broader historical and conceptual contexts. **Prerequisite(s):** PSC 111 or PSC 112 or sophomore standing. Students who have taken PSC 159 will need special permission from the instructor to enroll. **CC:** SOCS

PSC 260 - Policy Making and American Society

Course Units: 1.0 (**Not Offered this Academic Year**) The process through which public policies are originated, shaped, adopted, and applied at all levels of government in the U.S. and the impact of public policies on American society. Policies such as crime, immigration, gay rights, abortion, the environment, smoking, and others are used as case studies to examine the policy process. **Prerequisite(s):** PSC 111 or PSC 112 or sophomore standing.

PSC 261 - Public Opinion

Course Units: 1.0 (**Spring: Oxley**) An overview of public opinion in the United States. Topics include the content of citizens' opinions toward a wide range of political topics, the sources of people's opinions, and an evaluation of whether the opinions of the public matter (for policy, for governance, and for democracy). The course material is structured around important normative questions, such as: What is the role of citizens in a democratic society? Are citizens pliable? Do citizens organize their political thinking? Do citizens demonstrate and endorse democratic basics? **Prerequisite(s):** PSC 111 or PSC 112 or sophomore standing.

PSC 264 - Congressional Politics

Course Units: 1.0 (**Not Offered this Academic Year**) An examination of the U.S. Congress emphasizing elections, representation, organization, decision-making and the human psychology of being a representative. Course is unique among PS courses in that almost the entire course is conducted as a simulation, with students taking on the roles of legislators, journalists, lobbyists, and members of the executive branch. **Prerequisite(s):** PSC 111 or PSC 112 or sophomore standing.

PSC 266 - Women and Politics

Course Units: 1.0 (**Not Offered this Academic Year**) The political, social, and economic circumstances of women in the U.S. Topics include history of women's rights, feminism, women as political actors (voters, candidates, and government officials). Issues including work, reproductive rights, violence against women and poverty are covered. Special attention to the role of minority women. **Prerequisite(s):** Sophomore standing or PSC 111 or SOC 100

PSC 268 - Electoral Politics

Course Units: 1.0 (**Not Offered this Academic Year**) Examination of elections in the U.S., including presidential, congressional, and state elections. Specific topics include the democratic theory of elections, candidate strategy, voter decision making, identity politics, campaign finance, and the electoral roles of the media, political parties, and campaign consultants. The course is typically offered every four years, during congressional midterm election years. Examination of elections in the U.S. Course is taught as a simulated presidential election with students taking on the roles of presidential candidate, campaign staff member, or journalist. Specific topics include the democratic theory of elections, candidate strategy, fundraising, voter decision making, and the electoral roles of the media, political parties, and campaign consultants. **Prerequisite(s):** PSC 111 or PSC 112 or sophomore standing.

PSC 269 - Media and Politics

Course Units: 1.0 (**Winter: Oxley**) Major trends in U.S. media, politics, and political communication. The focus is on media treatment of politics as well as effects of media on the public, across various types of media sources. These will include the traditional news media, partisan media sources, entertainment shows that address politics, and social media. The larger context is the role of media in a democratic society. **Prerequisite(s):** PSC 111 or PSC 112 or sophomore standing.

PSC 270 - CIA and the Art of Intelligence

Course Units: 1.0 (**Not Offered this Academic Year**) Provides an historical background to intelligence and espionage, and offers perspectives on present day secret intelligence operations of world powers in support of their national security objectives. Discussions on intelligence analysis, evaluation, human and technical intelligence, cryptography, counter-intelligence, moles, various kinds of overt operations, US foreign policy issues and goals. **Prerequisite(s):** PSC 111 or PSC 112 or sophomore standing.

PSC 272 - The Environment, Energy, and US Politics

Course Units: 1.0 (**Fall: Wiest**) Examination of how politics and policymaking affect the air we breathe, the water we drink, and the land we live on. This course will explore key U.S. environmental issues and their scientific underpinnings as well as the connections between these issues and our collective use of natural resources. The course will review major pieces of federal environmental law in the United States and address the policy considerations, justifications, and regulatory frameworks underlying them, as well as the effectiveness of these laws in achieving a healthier environment. The course will also examine the respective roles of Congress, the executive agencies, and the courts in determining environmental policy. **Prerequisite(s):** PSC 111 or PSC 112 or sophomore standing.

PSC 273 - The Supreme Court and Judicial Politics

Course Units: 1.0 (**Fall: Hays**) An investigation of the judicial branch of government in the U.S. that focuses on the role of judges, the functioning of courts, and leading contemporary controversies in the judicial system. Among the primary concerns of this course are: the structure of the American Judiciary, judicial selection processes, how cases originate and move through the judicial system, how judges think about and reach decisions in the cases, and the role law plays in society. In exploring these topics many actual Supreme Court cases are dissected, focusing on such issues as: gay rights, pornography, rights of disabled citizens, the rights of those accused of crimes, and free speech over the Internet, to name only a few areas. **Prerequisite(s):** PSC 111 or PSC 112 or sophomore standing.

PSC 277 - Capital Region Political Internships

Course Units: 1.0 (**Fall, Winter, Spring: Oxley**) This class enables students to become politically active and/or gain political experience by working for elected officials, government agencies, election campaigns, interest groups, non-profit organizations, lobby firms, etc. Students draw on their internship experience and related academic work to reach a better understanding of the complexities and dynamics of politics at the state or local level. Students are permitted to enroll in this course twice, although the course will count toward the Political Science major only once. **Prerequisite(s):** Sophomore standing and permission of the instructor. **Note:** This course does not count towards the PSC portion of an ID major.

PSC 280T - Washington, DC Internship Program

Course Units: 1.0 (**Winter: Lobe**) A 10-week spring term in Washington, DC wherein each student is an intern either on the Hill, with a Nongovernmental agency (NGO), or with some other political, social, cultural, or scientific organization in DC. The internship receives one course credit. The second course is a seminar focused on a specific political theme (examples from past years include national security and foreign policy) introducing students to the policy, partisan and ideological debates within Washington. The third course is Washington, DC: Cultural and Political Spaces in America's Capital (AMS 251T). **Prerequisite(s):** Sophomore standing and permission of the instructor. These courses may not be taken as pass/fail. **Note:** The internship does not count towards the PSC portion of an ID major.

PSC 281 - Issues in American Education

Course Units: 1.0 (**Not Offered this Academic Year**) The analysis of current conflicts over education policy at all levels of government including the funding of education, increased testing for accountability, the impact of charter schools and choice, bilingual education, religion and prayer, tenure laws and the role of teacher unions. Most of the focus will be on K-12 education but we will also address higher education and the recent concerns about tuition costs, financial aid, and the mission of colleges and universities. **Prerequisite(s):** Sophomore standing and PSC 111 or SOC 100 or ANT 110 or PSY 100

PSC 282 - Health Politics and Policy

Course Units: 1.0 (**Not Offered this Academic Year**) This course will examine the subject of health care policy in the American political system. Students will learn about the roles and functions of key actors, institutions, concepts, and principles as part of a broad overview of American health politics. From this foundation, we will develop a theoretical and practical framework to ground our analysis of current health policy issues and debates. Topics will include finance, insurance, Medicare/Medicaid, the Patient Protection and Affordable Care Act (aka "Obamacare"), prescription drug regulation, private markets, the public interest, ethics, and the role of government. **Prerequisite(s):** PSC 111 or PSC 112 or sophomore standing.

PSC 283 - Social Movements, the Environment and Society

Course Units: 1.0 (**Not Offered this Academic Year**) The role of extra-governmental actors in the formation of public policy with a focus on environmental issues. The origins and development of social movements and the differences and similarities among these. Topics include the means by which such groups seek to influence policy and social practice and the outcomes of such attempts. **Cross-Listed:** SOC 270 **Prerequisite(s):** PSC 111 or PSC 112 or sophomore standing.

PSC 284 - Political Sociology

Course Units: 1.0 (**Not Offered this Academic Year**) Issues of political power, domination, and legitimacy from a sociological perspective. Topics include the creation and maintenance of political power, the role of legitimacy and the impact of political socialization. **Cross-Listed:** SOC 240 **Prerequisite(s):** PSC 111 or PSC 112 or sophomore standing.

PSC 286 - The Modern Presidency

Course Units: 1.0 (**Winter: Brown**) Case studies in Presidential leadership and administrative styles, including those of FDR, Eisenhower, Kennedy, Johnson, Reagan, Clinton, Obama, and Trump. **Prerequisite(s):** PSC 111 or PSC 112 or sophomore standing.

PSC 287 - The Contemporary Presidency

Course Units: 1.0 (**Not Offered this Academic Year**) The rapidly-changing Trump-era presidency in contemporary and historical context: recent developments in the institutional and narrative-based presidency, with a background examination of the administrations from Reagan through Trump.

PSC 288 - American Constitutional Theory

Course Units: 1.0 (**Not Offered this Academic Year**) This course is concerned with the theoretical foundations of American constitutionalism. American constitutional theory is a broad topic, inclusive of the nature of constitutions, interpretive methodologies, institutional design, institutional function, and political development. While this course will touch on each of these, the central animating question is: Who shall interpret the Constitution? Twenty-first century constitutionalism has been marked by interpretive pluralism and the interpretations offered by different departments of government bear their distinct imprimatur. As such, understanding which institution does and ought to interpret the Constitution is among the most important political questions of our time. **Prerequisite(s):** PSC 111 or PSC 112 or sophomore standing.

PSC 289T - New Hampshire Primary Mini-Term

Course Units: 1.0 (**TBD: Staff**) One of the most important events in every presidential election cycle is the New Hampshire primary. In this mini-term, students will analyze the New Hampshire primary through formal coursework (readings, discussions, papers, etc.). They will also experience the primary by spending three weeks in New Hampshire in late November-early December, shortly before balloting occurs early in the following year (a presidential election year). While in New Hampshire, students will volunteer with a candidate campaign organization, media outlet, or other campaign-related group. In addition, students will attend campaign events and guest lectures (by state officials, campaign staff members, journalists, scholars, etc.). This course is offered every four years consistent with the presidential election cycle. **Prerequisite(s):** PSC 111 or PSC 112 or sophomore standing.

PSC 361 - Political Psychology

Course Units: 1.0 (**Not Offered this Academic Year**) The application of psychological theories to understanding the political attitudes and behavior of individuals (citizens, political leaders) as well as small groups (juries, presidential advisors). Specific topics include stereotypes, personality, social cognition, attitude formation, altruism, emotion, psychoanalysis, groupthink and elite decision-making. **Prerequisite(s):** PSC 111 or PSC 112 or PSY 100

PSC 364 - Law and Film

Course Units: 1.0 (**Not Offered this Academic Year**) This course uses the medium of film as a springboard to introduce and explore concepts in legal theory, American legal culture, and the exercise of public and private power through the legal system. Specific topics of discussion include law as morality, higher versus positive law, law and gender, and the heroic lawyer mythology. **Prerequisite(s):** PSC 111 or PSC 112 or sophomore standing.

PSC 365 - Law, Society, and the Wire

Course Units: 1.0 (**Not Offered this Academic Year**) HBO's *The Wire* is often hailed as one of the greatest television series. During its run, critics compared it to a novel or epic poem. Along with its gritty portrayal of inner city decay and the lives lived in this environment, the crime drama convincingly portrays communities and their institutions. *The Wire's* depiction of law is among its most nuanced and provocative features. The show easily slips among the black letter law, the law on the street, and informal law-like systems that exist among communities that do not fully subscribe to the norms of the state. This course will use the portrayal of law in *The Wire* to address some of the following questions: What is law? Is law only the domain of the state? What is the relationship between law and power? Is violence inherent in law? Is law inherently oppressive? If so, how do we reconcile oppression with democratic practice and human rights? **Prerequisite(s):** PSC 111 or PSC 112 or sophomore standing.

PSC 369 - Seminar: US Politics

Course Units: 1.0 (**Winter: Hays**) Selected topics in U.S. politics. Content will vary from year to year. Preference to sophomore and junior political science majors. **Prerequisite(s):** PSC 111 or PSC 112 or sophomore standing.

PSC 370 - Constitutional Law

Course Units: 1.0 (**Not Offered this Academic Year**) An examination of the Constitutional tradition in the United States, focusing upon the structure and powers of the federal government. Topics and themes include the power of the courts to interpret the laws and the Constitution, the power of the federal government and the significance of "states' rights," federal government intervention in matters of "commerce" or economics, and the nature and expansion of executive power, especially in the area of national security. The course proceeds mainly through close examination of Supreme Court cases, considered in their political, historical and legal context.

PSC 371 - Civil Rights and Civil Liberties

Course Units: 1.0 (**Not Offered this Academic Year**) Considers the protections afforded to individual rights and liberties by the U.S. Constitution and the Bill of Rights. Topics include freedom of speech and assembly, the right to privacy, religious freedom, equal protection and discrimination, and the due process rights of those accused of crimes. The course proceeds mainly through close examination of Supreme Court cases, considered in their political, historical and legal context. **Prerequisite(s):** PSC 111 or PSC 112 or sophomore standing.

Political Science - Independent Research

PSC 295H - Political Science Honors Independent Project 1

Course Units: 0.0 (**TBD: Staff**) By application to the individual instructor and subject to confirmation by the Department Chair.

PSC 296H - Political Science Honors Independent Project 2

Course Units: 1.0 (**TBD: Staff**) By application to the individual instructor and subject to confirmation by the Department Chair.

PSC 490 - Political Science Independent Study 1

Course Units: 1.0 (**TBD: Staff**) By application to the individual instructor and subject to confirmation by the Department Chair.

PSC 498 - Political Science Senior Thesis 1

Course Units: 0.0 (**TBD: Staff**) Open to seniors in political science. Subject to department approval, this requirement may be fulfilled by the completion of original political science research, political action, political art, or applied public policy research. The senior project is an intensive two-term research project serving as the capstone experience for the major. All senior projects are subject to an oral examination as a requirement for graduation as a major.

PSC 499 - Political Science Senior Thesis 2

Course Units: 2.0 (**TBD: Staff**)

Psychology

PSY 100 - Introduction to Psychology

Course Units: 1.0 (**TBD: Staff**) The activities and experiences of the human being. Personality and its development, motives, learning and intelligence, and behavior in conflict. **CC:** SOCS

PSY 200 - Statistical Methods in Psychology

Course Units: 1.0 (**TBD: Staff**) The descriptive and inferential statistical procedures used by researchers to explain and analyze their results. Mean, variance, correlation, hypothesis testing using t-test, ANOVA, and nonparametric tests. **Prerequisite(s):** PSY 100 or PSY 210 or BIO 210 or (BIO 103 and BIO 104)

PSY 210 - Neuroscience: Mind & Behavior

Course Units: 1.0 (**TBD: Staff**) Basic concepts of brain functioning as they relate to psychological phenomena. Including methodology, neuroanatomy, and neurotransmission, important for understanding the mediation of behavior. **Cross-Listed:** BIO 210 **Prerequisite(s):** PSY 100 or (BIO 103 and BIO 104) **CC:** SET

PSY 212 - Neurobiology

Course Units: 1.0 (**TBD: Staff**) **Cross-Listed:** BIO 242 **Prerequisite(s):** BIO 103 and BIO 104

PSY 213 - Clinical Neuropsychology

Course Units: 1.0 (**TBD: Staff**) This course will examine the relationship between brain function and behavior, especially the evaluation and treatment of individuals across the lifespan with cognitive deficits and brain compromise (e.g., due to injury, neurodevelopmental or degenerative processes, toxic exposure, etc.). The material is interdisciplinary, integrating across various sub-disciplines of medicine (e.g., neurology, psychiatry, radiology) and subfields of psychology (e.g. neuroscience, abnormal, assessment, cognitive, health). Clinical cases and research reports will be used to illustrate and characterize neuropsychological phenomena, conditions, and diagnoses. The course objectives will be accomplished through lecture, readings, and discussion as well as via experiential and service learning opportunities. **Prerequisite(s):** PSY 100 or PSY 210 or BIO 210

PSY 215 - Health Psychology

Course Units: 1.0 (**TBD: Staff**) This course will examine psychology's role in the etiology, prevention, progression, and treatment of disease. Topics will include mechanisms by which stress and health-related behaviors such as diet, exercise, smoking and substance abuse contribute to illness, doctor-patient communication, problems of medical compliance, cognitive/behavioral treatment techniques, pain management, and health promotion/disease prevention strategies. **Prerequisite(s):** PSY 100

PSY 220 - Attention and Memory

Course Units: 1.0 (**TBD: Staff**) This course will focus on how people take in information about the world around them, store that information, and retrieve it to help them solve problems. In doing so, we will discuss the seemingly paradoxical conclusion that we take in and interpret a great deal of our environment but that we also fail to notice much of it. We will also discuss how we are able to work on and manipulate the information we have taken in, and make decisions based on it, emphasizing the impact that this process has on our ability to perform many cognitive tasks. Additionally, those factors that influence how and how well we encode and later retrieve various types of information will be considered. **Prerequisite(s):** PSY 100 or (BIO 103 and BIO 104)

PSY 225 - The Psychology of Language

Course Units: 1.0 (**TBD: Staff**) This course will present a broad overview of language and its instantiation within the human brain. We will pay particular attention to 1) the ways that neurological disorders impact language functioning, and 2) how these patterns of language breakdown inform psychological models of typical language processing. This course will cover basic anatomy as well as a survey of language related topics (e.g., speech perception, deafness, language acquisition, linguistic diversity). **Prerequisite(s):** PSY 100

PSY 230 - Social Psychology

Course Units: 1.0 (**TBD: Staff**) This course presents an overview of the field of social psychology: We live in a world in which social factors can dramatically impact us. We will thus explore major theories and classic and contemporary research on why people think, feel, and behave the way they do in both individual and group settings. Topics may also include evolutionary and cultural perspectives, research methods and ethics in the field, and applications of social psychology to areas such as health, law, education, and public policy. **Cross-Listed:** SOC 203 **Prerequisite(s):** PSY 100 is required per the PSY Department. SOC 100 does not serve as a prerequisite.

PSY 235 - Industrial-Organizational Psychology

Course Units: 1.0 (**TBD: Staff**) A general overview of the research and theory relating psychology to work behavior and to applications in the industrial setting. Personnel psychology, human factors and engineering psychology, organization theory, organizational development, and organizational behavior will be examined. **Prerequisite(s):** PSY 230 preferred, but not required.

PSY 240 - Developmental Psychology

Course Units: 1.0 (**TBD: Staff**) This course traces the processes that influence human development across the lifespan, from infancy to old age. What are the cognitive, emotional and social behavioral milestones that occur at each significant stage of development? In what ways do human beings change as they get older, and in what ways do they stay the same? What early experiences can influence later developmental outcomes? The major theoretical perspectives that help illuminate the developmental process, as well as the experimental and quasi-experimental methods of study, will be emphasized. **Prerequisite(s):** PSY 100

PSY 242 - Death and Dying

Course Units: 1.0 (**TBD: Staff**) This course will examine the social and psychological processes that shape the dying and bereavement process. The historical and cultural factors that influence attitudes toward dying and the ethical issues that impact decisions about how we die will be discussed. In addition, this course will discuss end of life care, including hospice, palliative care and pain management; how our health care system treats the dying; mental health interventions; and suicide. There are no prerequisites for this course.

PSY 245 - Psychology of Gender Roles

Course Units: 1.0 (**TBD: Staff**) The psychological bases and effects of the masculine and feminine role norms in our culture. Topics include biological bases of sex differences, sexuality, romance, work and family roles, origins of sex-typed personality in family and cultural socialization. **Prerequisite(s):** PSY 100

PSY 246 - Educational Psychology

Course Units: 1.0 (**TBD: Staff**) In this course, we will apply the principles of psychology to various aspects of teaching and learning, with an emphasis on the cognitive abilities of students, classroom management procedures, and motivational techniques. **Prerequisite(s):** PSY 100

PSY 250 - Clinical Psychology 1: Disorders

Course Units: 1.0 (**TBD: Staff**) An introduction to the diagnosis, study, and treatment of psychological disorders. Emphasis will be placed on the cause (i.e., etiology), expected outcome (i.e., prognosis), and prevalence of the major mental disorders recognized by the American Psychiatric Association in the Diagnostic and Statistical Manual for Mental Disorders. The course covers major categories of psychiatric diagnoses including Anxiety, Mood, Eating, Sexual, Trauma and Stressor-Related, Obsessive-Compulsive, Personality, Somatic, Dissociative, and Psychotic Disorders. **Prerequisite(s):** PSY 100

PSY 251 - Personality

Course Units: 1.0 (**TBD: Staff**) This course will emphasize personality theory and research in an effort to understand individual persons. Students will come to learn more about their own and others' personality through a variety of approaches, such as traits and individual differences, psychoanalysis, personality development, self psychology, and the humanistic perspective. Drawing connections to other areas of psychological science, the course will explore how personality relates to motivation, emotion, cognition, and behavior. **Prerequisite(s):** PSY 100

PSY 255 - Psychology of Addiction

Course Units: 1.0 (**TBD: Staff**) A socio-psychological approach to understanding a variety of addictive behaviors. Includes coverage of substance abuse, e.g., alcohol, tobacco, illegal drugs and foods, as well as activities such as gambling, sex, work, relationships etc. **Prerequisite(s):** PSY 100

PSY 257 - Evolutionary Psychology

Course Units: 1.0 (**TBD: Staff**) This course will provide a solid theoretical foundation for the study of psychology from an evolutionary perspective. We will apply to humans the same lens that evolutionary biology has applied to other species. This perspective cuts across cognition, motivation, attention, social behavior, and many other aspects of psychology. The course will begin with an in-depth introduction to evolutionary theory as it applies to human psychology and behavior followed by a survey of more specific psychological phenomena studied from an evolutionary perspective. **Prerequisite(s):** PSY 100

PSY 261 - Psychology of Women and Gender

Course Units: 1.0 (**TBD: Staff**) This course will introduce students to the psychology of gender. We will examine both how psychologists study gender and how psychology itself can be a gendered field. Time will be spent addressing relevant research methods, theories, and applications. During this course, students will learn about the different research methods, clinical techniques, and applications used by psychologists that are relevant to the psychology of gender. In focusing on psychology's role in examining women and gender, students will be exposed to primary source readings in the field and personal accounts. Lastly, students will engage with this material via in-depth class discussions and diverse assignments. **Prerequisite(s):** PSY 100 **CC:** SOCS

PSY 291 - Psychology Research Practicum 1

Course Units: 0.0 (**TBD: Staff**) The Psychology Research Practicum experience allows students to become involved in psychological research early in their careers at Union College. Students work under the supervision of a member of the Psychology Department. Duties will be determined individually with the research supervisor, and may include such things as: surveying the literature in an area, designing or testing research materials, interacting with research participants, collecting data, and analyzing data. Expectations include at least four hours per week devoted to the research, as well as attendance at Psychology Speaker Series seminars. This course requires permission of the individual research supervisor, and is graded on a Pass/Fail basis. In order to receive credit equivalent to one course, the student must earn passing grades in three terms of practicum experience within the psychology department. Research Practicum is normally not open to students who are currently enrolled in independent research experiences in psychology, except by permission of the department chair. The Research Practicum course does not count towards the major requirements in psychology. **Prerequisite(s):** PSY 100 or PSY 100P

PSY 292 - Psychology Research Practicum 2

Course Units: 0.0 (**TBD: Staff**) The Psychology Research Practicum experience allows students to become involved in psychological research early in their careers at Union College. Students work under the supervision of a member of the Psychology Department. Duties will be determined individually with the research supervisor, and may include such things as: surveying the literature in an area, designing or testing research materials, interacting with research participants, collecting data, and analyzing data. Expectations include at least four hours per week devoted to the research, as well as attendance at Psychology Speaker Series seminars. This course requires permission of the individual research supervisor, and is graded on a Pass/Fail basis. In order to receive credit equivalent to one course, the student must earn passing grades in three terms of practicum experience within the psychology department. Research Practicum is normally not open to students who are currently enrolled in independent research experiences in psychology, except by permission of the department chair. The Research Practicum course does not count towards the major requirements in psychology. **Prerequisite(s):** PSY 291

PSY 293 - Psychology Research Practicum 3

Course Units: 0.0 (**TBD: Staff**) The Psychology Research Practicum experience allows students to become involved in psychological research early in their careers at Union College. Students work under the supervision of a member of the Psychology Department. Duties will be determined individually with the research supervisor, and may include such things as: surveying the literature in an area, designing or testing research materials, interacting with research participants, collecting data, and analyzing data. Expectations include at least four hours per week devoted to the research, as well as attendance at Psychology Speaker Series seminars. This course requires permission of the individual research supervisor, and is graded on a Pass/Fail basis. In order to receive credit equivalent to one course, the student must earn passing grades in three terms of practicum experience within the psychology department. Research Practicum is normally not open to students who are currently enrolled in independent research experiences in psychology, except by permission of the department chair. The Research Practicum course does not count towards the major requirements in psychology. **Prerequisite(s):** PSY 292

PSY 295H - Psychology Honors Independent Project 1

Course Units: 0.0 (**TBD: Staff**) **Note:** Total credit is obtained by the completion of PSY 296H.

PSY 296H - Psychology Honors Independent Project 2

Course Units: 1.0 (**TBD: Staff**)

PSY 300 - Research Methods in Psychology

Course Units: 1.0 (**TBD: Staff**) Students will learn how to conduct research in psychological science, including hypothesis development, research design, data collection, scientific writing, ethical considerations, and dissemination. Students will also learn how to conduct statistical analyses using the SPSS software package, to include regression as well as analysis of within-participant and factorial designs. In the capstone assignment, students will develop their own hypotheses and design their own psychological experiments with which to test those hypotheses. **Prerequisite(s):** PSY 200 or a grade of B+ or higher in STA 104 or STA 164 or ECO 243 **Corequisite(s):** PSY 300L **Lecture/Lab Hours** One lab per week.

PSY 310 - Cognitive Neuroscience

Course Units: 1.0 (**TBD: Staff**) This course will present in depth the present understanding of the brain mechanisms that give rise to many mental processes, including attention, memory, language production, and comprehension, numerical processing, reasoning, emotions, and executive functioning. Weekly laboratory sessions will cover major methodologies used in cognitive neuroscience, including brain imaging and neural network simulation. **Prerequisite(s):** (PSY 210 or BIO 210) and PSY 220 and PSY 300 **Corequisite(s):** PSY 310L **CC: SCLB Lecture/Lab Hours** One lab per week.

PSY 313 - Sensation and Perception

Course Units: 1.0 (**TBD: Staff**) The study of sensation and perception examines the physics of the real world (stimulus), how the nervous system captures information about the environment (sensation), and the translation of sensory information into meaningful events (perception). Multiple levels of analysis will be introduced including sensory physiology, psychophysiology, and psychophysics. The class will cover a variety of topics,

possibly to include how the eye is not a camera, why people need glasses, how 3-D movies work, the mysteries of face blindness, and what's hiding behind your eardrum. **Prerequisite(s):** (PSY 210 or BIO 210) and PSY 300 **Corequisite(s):** PSY 313L **CC: SCLB Lecture/Lab Hours** One lab per week.

PSY 330 - Advanced Personality and Social Psychology

Course Units: 1.0 (**TBD: Staff**) Covers contemporary theory and research on (a) attitudes and social cognition (e.g., attitude formation and change; impression formation; persuasion; stereotypes and prejudice; emotion; self-regulation), (b) interpersonal relationships and group processes (e.g., romance; intergroup relations; aggression; pro- and anti-social behavior), and (c) personality and individual differences (e.g., trait structure, development, assessment, and outcomes). Weekly lab involves learning and applying topically relevant research methods. **Prerequisite(s):** PSY 300 and (PSY 230 or PSY 251) **Corequisite(s):** PSY 330L **CC: SCLB Lecture/Lab Hours** One lab per week.

PSY 331 - Psychology of Emotion

Course Units: 1.0 (**TBD: Staff**) Examination and evaluation of scientific theories and research about emotions, including the evolution and development of emotions, the physiological and neurological underpinnings of emotions, individual differences and psychopathology, and the role of emotions in close relationships and everyday life. **Prerequisite(s):** Any PSY area course (PSY 210 or PSY 213 or PSY 220 or PSY 225 or PSY 230 or PSY 240 or PSY 250 or PSY 251)

PSY 347 - Psychology of Sexuality

Course Units: 1.0 (**TBD: Staff**) We will examine the varied forms of human sexuality from a psychological perspective. This analysis will include several theoretical approaches (e.g., comparative, biological, evolutionary, psychoanalytic, queer theory) and a range of topics (e.g., sexual development across the lifespan, choice of gender of partners, the relation of sexuality and gender, power relations in sexuality). **Prerequisite(s):** PSY 100

PSY 351 - Clinical Psychology 2: Interventions

Course Units: 1.0 (**TBD: Staff**) Survey of the major contemporary systems of psychotherapy. Includes analytic, family systems, cognitive and behavioral approaches. Students will learn theories, techniques, and processes involved in the practice of psychotherapy. Clinical diagnoses and interventions are revisited from the perspective of communications theory. The lab portion of the course will include opportunities for experiential learning, including: clinical skill development using clinical research methods for coding and analyzing factors salient in dyad and group communication (e.g., non-verbal, verbal, and other aspects of communication). **Prerequisite(s):** PSY 250 and PSY 300 **CC: SCLB Note:** This course is designed to be taken in sequence with PSY 451 , but enrollment in PSY 451 is optional and may be taken in a subsequent year, space permitting. Also, note that this course was formally known as Human Relations 1: Communications.

PSY 352 - Psychological Assessment and Testing

Course Units: 1.0 (**TBD: Staff**) Learn about one of psychology's most important and unique practical contributions. Examine assessment tools that are key to the practice of clinical and counseling psychology (e.g., diagnostic and personality tests). Review issues related to test construction (e.g., reliability and validity). Practice construction and validation of a new test. **Prerequisite(s):** PSY 100 (PSY 200 is preferred, but not required)

PSY 353 - Child and Adolescent Psychopathology

Course Units: 1.0 (**TBD: Staff**) This course will focus on major forms of atypical development in childhood and adolescence. These include disorders of behavior, disorders of emotion, and developmental and learning problems. You will learn about the defining characteristics, associated features, possible causes, theoretical formulations, research evidence, and current approaches to intervention and prevention for a wide range of child and adolescent disorders. In addition, we will focus on diversity, inclusion, and ethics in this population. We will trace the possible developmental course of each disorder and show how biological, psychological, and socio-cultural factors interact with the child's environment to determine its expression. Case examples will be used to enrich your understanding of the experience of children with psychopathology. **Prerequisite(s):** PSY 100 and PSY 240 or PSY 250 **CC: SOCS**

PSY 402 - Honors Colloquium 1

Course Units: 0.0 (**TBD: Staff**) A one-credit course running the full academic year, open to junior and senior qualified students. Limited enrollments; students will be recommended for the course by faculty. Each year's topic will be chosen by the supervising faculty member. Normally, students will meet to discuss readings pertaining to the topic and upcoming speakers. About seven to nine speakers with expertise in the chosen area will be invited to discuss their positions with students. Relevant field trips may also be arranged. **Note:** This course does not fulfill the psychology major requirement of a seminar.

PSY 403 - Honors Colloquium 2

Course Units: 0.0 (**TBD: Staff**) A one-credit course running the full academic year, open to junior and senior qualified students. Limited enrollments; students will be recommended for the course by faculty. Each year's topic will be chosen by the supervising faculty member. Normally, students will meet to discuss readings pertaining to the topic and upcoming speakers. About seven to nine speakers with expertise in the chosen area will be invited to discuss their positions with students. Relevant field trips may also be arranged. **Note:** This course does not fulfill the psychology major requirement of a seminar.

PSY 404 - Honors Colloquium 3

Course Units: 1.0 (**TBD: Staff**) A one-credit course running the full academic year, open to junior and senior qualified students. Limited enrollments; students will be recommended for the course by faculty. Each year's topic will be chosen by the supervising faculty member. Normally, students will meet to discuss readings pertaining to the topic and upcoming speakers. About seven to nine speakers with expertise in the chosen area will be invited to discuss their positions with students. Relevant field trips may also be arranged. **Note:** This course does not fulfill the psychology major requirement of a seminar.

PSY 410 - Seminar in Brain and Behavior

Course Units: 1.0 (**TBD: Staff**) This seminar will provide students with an opportunity to examine how brain processes impact behavior and psychological functioning. Students will gain experience giving oral presentations and critically evaluating empirical studies pertaining to both normal and abnormal behavior. **Cross-Listed:** BIO 211 **Prerequisite(s):** (PSY 210 or BIO 210) and PSY 300 **CC:** SET

PSY 411 - Seminar in Clinical Neuropsychology

Course Units: 1.0 (**TBD: Staff**) Through this course you should gain a close-up view into the field of Clinical Neuropsychology, which aims to explore the relationship between brain function and behavior, especially the evaluation and treatment of brain damaged individuals. This will be accomplished through lecture, readings, discussions, field-work/ service-learning, and other hands-on practice experiences. **Prerequisite(s):** PSY 250 and one of the following: PSY 210 or BIO 210 or PSY 220 ; or permission of the instructor.

PSY 420 - Seminar in Cognitive Psychology

Course Units: 1.0

(**TBD: Staff**) The aim of this course is explore the concept of emotion from behavioral- and brain-based perspectives. While trying to understand the role of emotion in behavior has been an interest for centuries, what we know about the biological underpinnings of emotion, or affect, is only decades old.

Students will become familiar with basic concepts and methods used in affective science. Course discussions will likely include material related to pleasure/pain, mental health, neurological/psychiatric illnesses, psychotropic drugs, sexuality, eating, decision-making, and emotional regulation.

Prerequisite(s): PSY 210 or BIO 210 or PSY 220 or permission of instructor.

PSY 430 - Seminar in Social Psychology

Course Units: 1.0 (**TBD: Staff**) A selected area of social psychology. Specific topic will be announced in advance by the instructor. **Prerequisite(s):** PSY 300 or permission of instructor.

PSY 431 - Seminar in Psychology of Religion

Course Units: 1.0 (**TBD: Staff**) The psychological origins of religious beliefs and the apparent behavioral consequences of holding such beliefs. Specific topics will include: religiosity as an evolutionary, psychological, and social phenomenon; the role of religious beliefs in mental health, physical health, interpersonal relationships, and prejudice. **Prerequisite(s):** PSY 210 or BIO 210 or PSY 220 or PSY 230 or PSY 240 or PSY 251 ; or permission of the instructor.

PSY 432 - Seminar in Love and Death

Course Units: 1.0 (**TBD: Staff**) This course examines two lines of inquiry, principally initiated in the 1950's and 60's by John Bowlby and Ernest Becker, respectively, which have subsequently developed into two influential contemporary theories in experimental social and personality psychology: attachment theory and terror management theory (TMT). These theories and the intellectual traditions that spawned them address two elements of life - love and death - that have far-reaching psychological consequences and philosophical implications. The course will start with discussion of Bowlby's and Becker's classic books, and as class progresses, class members will assume increased responsibility for leading discussions and examining contemporary research. Ultimately, each class member will develop his or her own questions, and tentative answers, relating to the course material, which will culminate in a significant paper. There are no prerequisites for this course.

PSY 433 - Seminar in Psychology of Sports

Course Units: 1.0 (**TBD: Staff**) In this seminar, we'll explore a variety of ways in which psychology and sports intersect. First, we'll discuss the psychology of the athlete: Which psychological mechanisms and traits predict success in competition? Next, we'll discuss the psychology of the fan: Why are we so emotionally impacted when our team wins or loses? Finally, we'll discuss the psychology of sports marketing: How do advertisers and marketers use sports to get us to buy their stuff? Readings will primarily consist of peer-reviewed journal articles from the fields of social psychology, cognitive psychology, sports psychology, marketing, and advertising. The term will conclude with each student creating a novel hypothesis relating to the psychology of sports, designing a rigorous study with which one might empirically test that hypothesis, and creating mock data that supports that hypothesis. **Prerequisite(s):** PSY 300 or permission on instructor.

PSY 440 - Seminar in Human Development

Course Units: 1.0 (**TBD: Staff**) A selected area of developmental psychology. Topic will be announced in advance by the instructor. **Prerequisite(s):** PSY 240 or PSY 251 or permission of the instructor

PSY 441 - Seminar in Adolescence

Course Units: 1.0 (**TBD: Staff**) Development during adolescence and early adulthood, including changing relations to parents, love and sexuality, moral and cognitive growth, and the establishing of identity. The seminar will use the case study method, i.e., we will analyze a series of individual people's accounts of their adolescent experience. **Prerequisite(s):** PSY 240 or PSY 251 or permission of the instructor

PSY 450 - Seminar in Clinical Psychology

Course Units: 1.0 (**TBD: Staff**) A selected area of clinical psychology. Topic will be announced in advance by the instructor. **Prerequisite(s):** PSY 250 or permission of the instructor.

PSY 451 - Clinical Psychology 3: Internship

Course Units: 1.0 (**TBD: Staff**) Intensive practicum course designed to provide direct exposure to clinical populations, along with structured individual and group clinical supervision. Activities include placement at a psychologically-oriented internship site, along with seminar discussion of clinical cases and systems issues. Emphasis on the theoretical understanding of clinical assessment and intervention from a psychological perspective, integrating both nomothetic and ideographic approaches. **Prerequisite(s):** Permission of the instructor.

PSY 480 - Psychology 1 Term Internship

Course Units: 1.0 (**TBD: Staff**) Students gain real-world experience working on projects dealing with psychology in organizations such as hospitals, psychiatric facilities, advertising agencies, charitable organizations, government agencies, and educational institutions. Students complete 100 hours of such experience per term, and undertake a significant academic project arranged with the faculty supervisor. PSY 480 is a one-term internship.

Prerequisite(s): PSY 100

PSY 481 - Psychology 2 Term Internship 1

Course Units: 0.0 (**TBD: Staff**) Students gain real-world experience working on projects dealing with psychology in organizations such as hospitals, psychiatric facilities, advertising agencies, charitable organizations, government agencies, and educational institutions. Students complete 100 hours of such experience per term, and undertake a significant academic project arranged with the faculty supervisor. A two-term internship, PSY 481 and PSY 482, spans two terms and earns two course credits. The first term is graded pass/fail; a comprehensive grade is assigned for both terms at the end of the second term. **Prerequisite(s):** PSY 100

PSY 482 - Psychology 2 Term Internship 2

Course Units: 2.0 (**TBD: Staff**) Students gain real-world experience working on projects dealing with psychology in organizations such as hospitals, psychiatric facilities, advertising agencies, charitable organizations, government agencies, and educational institutions. Students complete 100 hours of such experience per term, and undertake a significant academic project arranged with the faculty supervisor. A two-term internship, PSY 481 and PSY 482, spans two terms and earns two course credits. The first term is graded pass/fail; a comprehensive grade is assigned for both terms at the end of the second term. **Prerequisite(s):** PSY 481

PSY 487 - Psychology 3 Term Thesis 1

Course Units: 0.0 (**TBD: Staff**)

PSY 488 - Psychology 3 Term Thesis 2

Course Units: 0.0 (**TBD: Staff**)

PSY 489 - Psychology 3 Term Thesis 3

Course Units: 3.0 (**TBD: Staff**)

PSY 490 - Psychology Independent Study 1

Course Units: 1.0 (**TBD: Staff**)

PSY 491 - Psychology Independent Study 2

Course Units: 1.0 (**TBD: Staff**)

PSY 492 - Psychology Independent Study 3

Course Units: 1.0 (**TBD: Staff**)

PSY 493 - Psychology 2 Term Independent Study 1

Course Units: 0.0 (**TBD: Staff**) First term grade is normally pass or fail. A comprehensive grade for both terms is assigned at the end of second term.

PSY 494 - Psychology 2 Term Independent Study 2

Course Units: 2.0 (**TBD: Staff**)

PSY 495 - Psychology 1 Term Senior Project

Course Units: 1.0 (**TBD: Staff**) CC: WS

PSY 496 - Psychology 2 Term Senior Project 1

Course Units: 0.0 (**TBD: Staff**)

PSY 497 - Psychology 2 Term Senior Project 2

Course Units: 2.0 (**TBD: Staff**) CC: WS

PSY 498 - Psychology Senior Thesis 1

Course Units: 0.0 (**TBD: Staff**) First term grade is pass or fail; a comprehensive grade for both terms is assigned at the end of the second term.
Prerequisite(s): PSY 300

PSY 499 - Psychology Senior Thesis 2

Course Units: 2.0 (**TBD: Staff**)

Religious Studies

REL 103 - Introduction to Religious Studies

Course Units: 1.0 (**TBD: Staff**) This course introduces students to the academic study of religion through an investigation of central topics such as sacred space, sacred text, myth, ritual, ethics, religion and society, concepts of the divine and ultimate reality, anthropology, and others. Examples for discussion are drawn from a variety of religious traditions including Judaism, Christianity, Islam, Hinduism, and Buddhism, as well as other religious traditions, ancient and modern. Attention is also given to aspects of religion in contemporary settings. **CC:** HUL, LCC

REL 170 - Myth, Ritual and Magic

Course Units: 1.0 (**TBD: Staff**) This course examines some of the theoretical issues surrounding myth, ritual and magic as well as specific examples of their cultural expression. How do people make sense of themselves, their society and the world through myth and ritual? How do cosmology and belief systems help them gain and organize knowledge about the world and themselves? The course will be examining a number of "occult" and "esoteric" practices, that is, practices that were not commonly known to all members of society, including Sufism, kabbalah, alchemy, and shamanism. **Cross-Listed:** ANT 170 **CC:** HUM, LCC **Note:** Electives (only one cross-listed course can count for the major or minor)

REL 203 - Judaism/Christianity/Islam: Comparative Perspectives

Course Units: 1.0 (**TBD: Staff**) This course offers a comparative approach to Judaism, Christianity and Islam, three closely related religious traditions. It attempts to draw out commonalities among and differences between these traditions by focusing on their histories, their understandings of God, revelation and tradition, religion and society, and responses to social and political change. **Cross-Listed:** HST 203 **CC:** HUM

REL 230 - Judaism and Christian Origins

Course Units: 1.0 (**TBD: Staff**) **Cross-Listed:** CLS 230 **CC:** HUM, LCC

REL 271 - Religion and Food

Course Units: 1.0 (**TBD: Staff**) Why do we eat the things we eat in the way we eat them? Used in religious rituals, food can become a potent symbolic expression of people's relationships to one another, to the world, and to the Ultimate. Historically, food has been an integral part of religious activity through practices such as preparation, consumption, and fasting. In order to understand these practices better, the course begins with a brief exploration of how food functions in culture generally to create and sustain meaning. The bulk of the course investigates the place of food in the rituals and beliefs of three of the world's great religious traditions: Hinduism, Judaism, and Christianity. The course also examines the phenomena of over- and under-eating in light of the importance given to feasting and fasting in these religious traditions, as well as the issue of food production and consumption from the perspective of social justice. **CC: LCC**

REL 280 - Religion and Science

Course Units: 1.0 (**TBD: Staff**) This course explores the historical and contemporary relations between several of the world's major religions and the natural sciences. The presently pervasive "conflict" view is examined, along with alternative views. The course assumes no background in science beyond high school, nor adherence to any particular religious tradition. **CC: HUM**

REL 295H - Religious Studies Honors Independent Study 1

Course Units: 1.0 (**TBD: Staff**)

REL 296H - Religious Studies Honors Independent Study 2

Course Units: 1.0 (**TBD: Staff**)

REL 300 - Seminar: Theory and Method in the Study of Religion

Course Units: 1.0 (**TBD: Staff**) This course offers an introduction to the theory and methodology of the academic study of religion. It explores several of the most influential efforts to develop theories of religion and methods for its study, including approaches found in disciplines such as anthropology, sociology, psychology and phenomenology. The course adopts an historical perspective, outlining issues and developments in the field from the Enlightenment through to today. **CC: HUM**

REL 490 - Religious Studies Independent Study 1

Course Units: 1.0 (**TBD: Staff**)

REL 491 - Religious Studies Independent Study 2

Course Units: 1.0 (**TBD: Staff**)

REL 498 - Religious Studies Senior Thesis 1

Course Units: 0.0 (**TBD: Staff**)

REL 499 - Religious Studies Senior Thesis 2

Course Units: 2.0 (**TBD: Staff**)

Russian and East European Studies

REE 295H - Russia and Europe Honors Project 1

Course Units: 0.0 (**TBD: Staff**)

REE 296H - Russia and Europe Honors Project 2

Course Units: 1.0 (TBD: Staff)

REE 490 - Russia and East Europe Independent Study

Course Units: 1.0 (TBD: Staff)

REE 498 - Russia and East Europe Thesis 1

Course Units: 0.0 (TBD: Staff)

REE 499 - Russia and East Europe Thesis 2

Course Units: 2.0 (TBD: Staff)

Russian

MLT 230 - Madness and The Mad in Russian Culture

Course Units: 1.0 (TBD: Staff) In this course we will investigate illness and its various representations in 19th and 20th century Russian culture. Specific emphasis will be placed on madness, disease and death in our discussion of various literary and historical madmen. The course will be conducted as a combination of lectures and class discussion. An occasional film will be shown. **Cross-Listed:** RUS 330 **CC:** HUL, HUM, LCC

MLT 260 - The Vampire as Other in East European and American Culture

Course Units: 1.0 (TBD: Staff) We will discuss the present distribution of the East European peoples, their prehistory, and their relation to other peoples of Europe and Asia. We will also survey their early culture, including pagan, animistic, and dualistic religious beliefs, and Christianization. Our focus will be the myth of the vampire, which has had enduring power not only in Eastern European folk belief but also in American popular culture right up to the present day. **CC:** HUL, HUM, LCC

MLT 262 - Russia: Magnificence, Mayhem, and Mafia

Course Units: 1.0 (TBD: Staff) Through analysis of literature, film, and visual arts we will discuss the Russian impact on the world with all its manifestations, constructive and destructive, and we will also attempt to "imagine" Russia in the future. Do you want to know more about Dostoevsky, communist and post-communist Russia, and, most importantly, the Russian Mafia? **CC:** HUL, LCC

MLT 265 - Soviet and Russian Film Revolutions: Political, Social, Cultural

Course Units: 1.0 (TBD: Staff) At its inception, Soviet film was intertwined with political revolution. In masterpieces such as Eisenstein's *The Battleship Potemkin* and Pudovkin's *Mother*, film directors sought to portray the Bolshevik take-over as a legitimate and inevitable response to oppression. Who could imagine that the same country would produce *Little Vera*, a film about the sexual revolution of the 1980's or *Brother*, a hero-story about assassins? This course will follow the trajectory of Soviet and Russian cinema from the 1917 Revolution to the present day, as it was used to chronicle social and cultural upheavals. **CC:** HUM, LCC

MLT 300T - Irkutsk, Russia Internship

Course Units: 1.0 (TBD: Staff) This course is designed to help students connect their academic studies to practical application by offering academic credit for environmentally-focused work experience. Students will work 10-12 hours at an internship and will also attend class once a week. Articles on geography, climatology, resource allocation, remote sensing, and conservation biology will expose students to a wide range of practical and

theoretical issues connected to the environment; specific focus will be on the Lake Baikal region of Siberia. The internships (at Great Lake Baikal Trail, museums or schools) will provide students with hands-on experience with environmental conservation and expose them to the day to day issues that Russian NGOs, schools and museums confront. **Cross-Listed:** REE 300 **CC:** LCCR

RUS 100 - Basic Russian 1

Course Units: 1.0 (**TBD: Staff**) For students with no knowledge of Russian. An introduction to the language, with emphasis on oral skills and communicative proficiency. **CC:** HUM

RUS 101 - Basic Russian 2

Course Units: 1.0 (**TBD: Staff**) Continuation of RUS 100 **Prerequisite(s):** RUS 100 or two years of high school Russian. **CC:** LCCR, HUM

RUS 102 - Basic Russian 3

Course Units: 1.0 (**TBD: Staff**) A continuation of RUS 101 , with increasing attention paid to reading simple, every day texts. **Prerequisite(s):** RUS 101 or equivalent. **CC:** LCCR, HUM

RUS 200 - Intermediate Russian 1

Course Units: 1.0 (**TBD: Staff**) Intensive development of the four proficiency skills (speaking, listening, reading, writing) with continued emphasis on strategies of basic conversation. **Prerequisite(s):** RUS 102 or equivalent. **CC:** LCCR, HUM

RUS 201 - Intermediate Russian 2

Course Units: 1.0 (**TBD: Staff**) Continuation of RUS 200 **Prerequisite(s):** RUS 200 or equivalent. **CC:** LCCR, HUM

RUS 202 - Advanced Russian

Course Units: 1.0 (**TBD: Staff**) Development of skills and vocabulary necessary to deal with conversation about and texts on Russian cultural life. Basic grammar review. **Prerequisite(s):** RUS 201 or equivalent. **CC:** HUM, LCCR

RUS 224T - The Russian Language Studied Abroad 1

Course Units: 1.0 (**TBD: Staff**)

RUS 225T - The Russian Language Studied Abroad 2

Course Units: 1.0 (**TBD: Staff**)

RUS 226T - The Russian Language Studied Abroad 3

Course Units: 1.0 (**TBD: Staff**)

RUS 227T - The Russian Language Studied Abroad 4

Course Units: 1.0 (**TBD: Staff**)

RUS 230 - Contemporary Russian Culture

Course Units: 1.0 (**TBD: Staff**) A course that combines expanding oral, aural, and written skills with an introduction to contemporary issues in Russian culture and political life. **Prerequisite(s):** RUS 202 or instructor's permission. **CC:** LCCR, HUM

RUS 250T - The Russian Language Studied Independently Abroad 1

Course Units: 1.0 (TBD: Staff)

RUS 251T - The Russian Language Studied Independently Abroad 2

Course Units: 1.0 (TBD: Staff)

RUS 295H - Russian Honors Independent Study 1

Course Units: 0.0 (TBD: Staff)

RUS 296H - Russian Honors Independent Study 2

Course Units: 1.0 (TBD: Staff)

RUS 300 - Survey of Russian Literature 1: From Pushkin to Revolution

Course Units: 1.0 (TBD: Staff) Readings that begin with the godfather of Russian literary life, Aleksander Pushkin, and that ends on the eve of the October revolution. Continued attention to development of vocabulary and oral presentation. **Prerequisite(s):** RUS 202 or instructor's permission. **CC:** HUL, LCCR

RUS 301 - Survey of Russian Literature 2: From Revolution to Present

Course Units: 1.0 (TBD: Staff) Readings ranging from the great revolutionary writers (Mayokovsky, Babel, Platonov, etc.) to contemporary writers of interest. **Prerequisite(s):** RUS 300 **CC:** HUL, LCCR

RUS 302 - The Russian Short Story: Pathologies of the Everyday

Course Units: 1.0 (TBD: Staff) A survey of Russian short prose, with emphasis on its reflected/distorted images of Russian everyday life. Includes Gogol, Tolstoy, Gorky, Kharmis, Petrushevskaia, and others. **CC:** HUL, LCCR

RUS 330 - Madness and The Mad in Russian Culture

Course Units: 1.0 (TBD: Staff) In this course we will investigate illness and its various representations in 19th and 20th century Russian culture. Specific emphasis will be placed on madness, disease and death in our discussion of various literary and historical madmen. The course will be conducted as a combination of lectures and class discussion. An occasional film will be shown. **Cross-Listed:** MLT 230 **CC:** HUL, HUM, LCCR

RUS 490 - Russian Independent Study 1

Course Units: 1.0 (TBD: Staff) **Prerequisite(s):** One 300-level course and permission of the instructor.

RUS 491 - Russian Independent Study 2

Course Units: 1.0 (TBD: Staff) **Prerequisite(s):** One 300-level course and permission of the instructor.

RUS 492 - Russian Independent Study 3

Course Units: 1.0 (TBD: Staff) **Prerequisite(s):** One 300-level course and permission of the instructor.

Scholars Program

SCH 150 - Scholars Research Seminar

Course Units: 1.0 (**TBD: Staff**) Ensures that students have an early hands-on experience thinking and working as an academic researcher. Note that students in the Scholars Program take the Scholars Research Seminar (SCH 150) after the Scholars Preceptorial.

SCH 295H - Scholars Honors Independent Project 1

Course Units: 0.0 (**TBD: Staff**) First half of the two term, one credit independent project required of all scholars. Scholars will need written permission from the supervising faculty member to engage in a project. First half is graded pass/fail. Second half is graded with a letter. Students will register for their project with the department designation of the supervising faculty member's department instead of the SCH prefix.

SCH 296H - Scholars Honors Independent Project 2

Course Units: 1.0 (**TBD: Staff**) Second half of the two term, one credit independent project required of all scholars. Scholars will need written permission from the supervising faculty member to engage in a project. First half is graded pass/fail. Second half is graded with a letter. Students will register for their project with the department designation of the supervising faculty member's department instead of the SCH prefix. **Prerequisite(s):** SCH 295H

SCH 297H - Scholars Honors Independent Project

Course Units: 1.0 (**TBD: Staff**) Scholars will be able to use any course as the basis for their project. They will then go on to register for 297H, which will be a one term, one credit, letter graded course that replaces SCH 295H and SCH 296H. The learning outcomes for 297H will remain the same whether the Scholar chooses the current option (295H and 296H) or the new option. Individual faculty will oversee the project and will decide how best to achieve these learning outcomes based on the needs and skills of the student. Students will register for their project with the department designation of the supervising faculty member's department instead of the SCH prefix.

SCH 400 - Senior Colloquium

Course Units: 1.0 (**TBD: Staff**) Senior Colloquium is the capstone honors course for students in the Scholars Program. The topic is appropriate to Scholars in the senior year regardless of major. Permission to enroll may also be given for Scholars in their sophomore and junior years at the discretion of the instructor. It is usually offered in the spring term and is only graded on a pass/fail basis.

Science, Medicine, and Technology in Culture

SMT 123 - Ethics, Technology & Society

Course Units: 1.0 (**TBD: Staff**) In today's technologically advanced society, professionals are faced with situations that require more than technical knowledge, common sense, and good judgment. Many of the issues borne by the complexity of modern day life are not only interwoven but are multidimensional. One of these dimensions is ethics. To illustrate how ethics, technology, and society intersect, this course offers case-based situations where students will learn from well-documented cases how to engage ethics principles in the decision making process, and how to put into practice the experience gained in the classroom from discussing various scenarios and from making one's own arguments. **Cross-Listed:** ISC 123
CC: SET

SMT 498 - Science, Medicine & Technology Senior Thesis 1

Course Units: 0.0 (**TBD: Staff**)

SMT 499 - Science, Medicine & Technology Senior Thesis 2

Course Units: 2.0 (**TBD: Staff**)

Sociology

SOC 100 - Introduction to Sociology

Course Units: 1.0 (**TBD: Staff**) The basic concepts and perspectives of sociology, including a survey of the major social institutions, social aspects of personality, and the processes of social interaction. **CC:** SOCS

SOC 201 - Social Data Analysis

Course Units: 1.0 (**TBD: Staff**) The analysis of social science data. Emphasis on testing substantive hypotheses by means of computer data processing and statistical techniques. **Cross-Listed:** PSC 220 **Prerequisite(s):** SOC 100 **CC:** QMR, SOCS

SOC 202 - Social Problems, Policy and Pop Culture

Course Units: 1.0 (**TBD: Staff**) Identification of social forces and cultural images of major social problems (i.e. substance abuse, violence, crime, pollution) and relevant social policies. **Prerequisite(s):** SOC 100 **CC:** SOCS

SOC 203 - Social Psychology

Course Units: 1.0 (**TBD: Staff**) **Cross-Listed:** PSY 230 **Prerequisite(s):** PSY 100 is required per the Psychology Department due to its cross-listing with PSY 230. SOC 100 **will not satisfy** this course alone. **CC:** SOCS

SOC 204 - Social Construction of Deviance

Course Units: 1.0 (**TBD: Staff**) An examination of "deviance" as a sociological phenomenon, including how the deviant label develops and how those so labeled are treated and controlled. Crime, prostitution, witch persecutions, mental illness, and the shaping of sexual identities and preferences are investigated. **Prerequisite(s):** SOC 100 **CC:** SOCS

SOC 205 - Social Work and Human Services

Course Units: 1.0 (**TBD: Staff**) The history of social services and the development of the profession of social work. Social problems and society's response to these problems will be investigated. **Prerequisite(s):** SOC 100 **CC:** SOCS

SOC 206 - Aging and Society

Course Units: 1.0 (**TBD: Staff**) The social, psychological, and economic consequences of aging, with an emphasis on successful aging. Social programs and policies for the aged are evaluated. **Prerequisite(s):** SOC 100 **CC:** SOCS

SOC 207 - Sociology of the Black Religious Experience

Course Units: 1.0 (**TBD: Staff**) Sociology of Black Religious Experiences is a sociological analysis of a pivotal sector of Black communities, namely Black religious institutions and spiritual encounters. Topics include slave religions, the founding of independent Black churches, the Black musical heritage, Voodoo, and the legacies of Malcom X and Martin Luther King, Jr. and Black Lives Matter issues. The cornerstone of the course is the examination of how Social Justice and spiritual expression are interconnected and socially constructed. **Prerequisite(s):** SOC 100 **CC:** LCC, SOCS

SOC 209 - Staging Black Feminisms

Course Units: 1.0 (**TBD: Staff**) This course considers the feminist and anti-racist practices of Black female dramatists, placing their plays within their cultural contexts. We will examine the ways in which these works construct Black feminist histories, genealogies, and cultures while challenging racial and sexual hierarchies in both American society and artistic canons. Each week, students will read a landmark dramatic text by a Black female playwright as well as seminal sociological texts and scholarly studies that contextualize the work within broader artistic and social

movements. Through discussions, field trips including attendance at theatrical performances and other cultural events, reading responses, and a final presentations based on individual research, students will hone their thinking about the development of Black female voices in American dramatic literature and society. **Prerequisite(s):** SOC 100 or GSW 100 or a 100-level EGL **CC:** SOCS, HUM, HUL

SOC 212 - The American Family and Cross-Cultural Perspectives

Course Units: 1.0 (**TBD: Staff**) This course examines historical and contemporary patterns of American family from cross-cultural perspectives. We explore the ways in which race/ethnicity, social class, gender roles, conflict and crisis, and the media influence family life. **Prerequisite(s):** SOC 100 **CC:** LCC, SOCS

SOC 221 - School Social Work

Course Units: 1.0 (**TBD: Staff**) This course focuses on the optimal use of Social Work in the public school setting as well as the role of the school in delivering human services effectively. Public education has long been considered the great equalizer in American society. This course will analyze the fundamental mission of both Social Work and schools to provide equal access and opportunity for our youngest generation. **Prerequisite(s):** SOC 100 **CC:** SOCS

SOC 222 - Schools and Societies

Course Units: 1.0 (**TBD: Staff**) Sociological analysis of education as an institution over time and across societies. **Prerequisite(s):** SOC 100 **CC:** SOCS

SOC 223 - Sociology of Religion

Course Units: 1.0 (**TBD: Staff**) The role of religion and religious phenomena from an institutional, organizational, and individual perspective in contemporary and historical context, exploring the interplay between the public and private spheres. **Prerequisite(s):** SOC 100

SOC 224 - Sociology of Community

Course Units: 1.0 (**TBD: Staff**) How communities and their residents respond to external environments and internal organization. A series of case studies of urban, rural, and suburban communities and their effect on social behavior is a focus. **Prerequisite(s):** SOC 100

SOC 228 - Sociology of Medicine

Course Units: 1.0 (**TBD: Staff**) Sociological perspectives on health, illness, the health professions and institutions, including studies of the social components of disease and its distribution, doctor-patient relations, and alternative health-care systems. **Prerequisite(s):** SOC 100 **CC:** SOCS

SOC 230 - Sociology of the Black Community

Course Units: 1.0 (**TBD: Staff**) This course is an introduction to African American society as revealed in the empirical literature of social sciences. Teaching and Learning in the context of this class will be multidimensional. You will learn about social structure and inequalities through readings, lectures, discussions, popular media examples, and field trips. Using these pedagogical strategies, our class will work as a learning community to explore contemporary issues relating to African American experiences. **Prerequisite(s):** SOC 100 **CC:** LCC

SOC 231 - Sex and Gender in American Society

Course Units: 1.0 (**TBD: Staff**) An examination of gender and the social context of the behavior of men and women in contemporary American Society. **Prerequisite(s):** SOC 100

SOC 233 - Race, Class, Gender, and Sexuality

Course Units: 1.0 (**TBD: Staff**) The issues of gender, race, and class as organizing principles within sociology. The course draws broadly from the critical tradition, which focuses on issues of power, control, opportunity, gender, and economic relations. **Prerequisite(s):** SOC 100 **CC:** LCC, SOCS

SOC 240 - Political Sociology

Course Units: 1.0 (**TBD: Staff**) Explores issues of political power, domination, and legitimacy from a sociological perspective. Topics include the creation and maintenance of political power and the impact of political socialization. **Cross-Listed:** PSC 284 **Prerequisite(s):** SOC 100 **CC:** SOCS

SOC 260 - Population and Society: Demographic Trends

Course Units: 1.0 (**TBD: Staff**) An introduction to the study of human populations and the dynamics of birth, death and migration. Focus on how populations grow and decline and the implications for social policy in areas such as health, aging, social inequality, the environment, immigration and urban life. **Prerequisite(s):** SOC 100

SOC 261 - Crime and Justice in Society

Course Units: 1.0 (**TBD: Staff**) The social construction of crime and delinquency as social and legal categories; perspectives on causation and consequences of the societal reaction to crime. **Prerequisite(s):** SOC 100

SOC 262 - Juvenile Delinquency

Course Units: 1.0 (**TBD: Staff**) An overview of sociological theory and research concerning juvenile delinquency and youth culture. Analyzes causes of juvenile delinquency, current strategies to control delinquency, perceptions of youth crime and contemporary youth problems. In addition, the course considers the strategies young people historically employ to counter situations of deprivation, alienation, and isolation **Prerequisite(s):** SOC 100 **CC:** SOCS

SOC 270 - Social Movements, the Environment, and Society

Course Units: 1.0 (**TBD: Staff**) The role of extra-governmental actors in the formation of public policy with a focus on environmental issues. The origins and development of social movements and the differences and similarities among these. Topics include the means by which such groups seek to influence policy and social practice and the outcomes of such attempts. **Cross-Listed:** PSC 283 **Prerequisite(s):** SOC 100

SOC 271 - Sociology of Disaster

Course Units: 1.0 (**TBD: Staff**) This course is an introduction to the sociological analysis of disasters. We will consider how sociologists conceptualize and theorize about disasters and the social and physical damage, death and injury, and economic loss they involve. Variations in the vulnerability of communities and particular social groups to such events will also be examined. **Prerequisite(s):** SOC 100

SOC 284 - Sociology of Women & Health

Course Units: 1.0 (**TBD: Staff**) A critical introduction to the sociological analysis of issues in women's health in the contemporary United States, emphasizing how the key variables of gender, race & class structure access to health & well-being for women in our society. **Prerequisite(s):** SOC 100

SOC 285 - Food, Nutrition and Society

Course Units: 1.0 (**TBD: Staff**) In this course we will explore the social construction of food and its emotional and cultural meaning. How do social structures, such as education, affect how we eat? Included in the topics addressed in this course are how gender, culture, socio-economic status, ethnicity, and media affect our food choices, nutrition, health and health care system. **Prerequisite(s):** SOC 100

SOC 290 - Personality, Media, and Society

Course Units: 1.0 (**TBD: Staff**) How social roles and group dynamics impact personality and group behavior. Agents of socialization, with particular emphasis on the media and their impact on individual and societal expectations and values, will also be examined. **Prerequisite(s):** SOC 100 **CC:** SOCS

SOC 295H - Sociology Honors Independent Project 1

Course Units: 0.0 (**TBD: Staff**)

SOC 296H - Sociology Honors Independent Project 2

Course Units: 1.0 (**TBD: Staff**)

SOC 300 - Quantitative Methods of Social Research

Course Units: 1.0 (**TBD: Staff**) Identifying sociopolitical questions and developing hypotheses; designing research instruments (questionnaires); basic statistics and introduction to social science computer analysis. **CC:** SOCS

SOC 302 - Qualitative Social Research Methods

Course Units: 1.0 (**TBD: Staff**) Introduction to qualitative research methods. The course is equally concerned with research design, techniques for gathering data, ethics in research, and the translation of field data into text. **Cross-Listed:** PSC 222

SOC 305 - History of Sociological Thought

Course Units: 1.0 (**TBD: Staff**) The development of sociological theory, with particular emphasis on the works of Marx, Weber, Durkheim, Mead, Foucault, and Bourdieu, with a feminist critical analysis of each. **CC:** SOCS

SOC 314 - America's War on Drugs: Culture, Conflict, & Social Policy

Course Units: 1.0 (**TBD: Staff**) A critical evaluation of United States domestic and international drug policy. In this course, students will gain an understanding of domestic and international drug policy, and will apply a sociological perspective to understand the historic and current situational forces which shape America's War on Drugs. We will evaluate current drug control strategies and the inequalities that have emerged as a result. This course also offers an overview of America's international war on drugs and the role it plays in other parts of the world. **Prerequisite(s):** SOC 100 **CC:** SOCS

SOC 340 - Inequality and Mobility: From Penthouse to Poorhouse

Course Units: 1.0 (**TBD: Staff**) The forms, causes, and consequences of social inequality. Topics include objective and ideological manifestations of trends and patterns in wealth, poverty, mobility, and welfare policy.

SOC 346 - Sociology of Black Women's Culture

Course Units: 1.0 (**TBD: Staff**) This course examines the socialization of black womanhood. We will explore how certain socio-historical norms shape black women's ideas about race, gender, class, sexuality, constructions of femininity, and public and private activism. Understanding the complexities of strategies of resistance to multiple and intersecting oppressions (race, class, gender, sexuality, etc.) forms the focus of the course. **Prerequisite(s):** Suggested: SOC 230 , SOC 233 , GSW 100 **CC:** LCC

SOC 359 - Environmental Policy and Resource Management

Course Units: 1.0 (**TBD: Staff**) An examination of environmental issues and problems such as acid rain, ocean dumping, and nuclear wastes, and the social forces that shape environmental policies. Students complete an internship with an environmental service theme. **CC:** SOCS

SOC 360 - Domestic Violence

Course Units: 1.0 (**TBD: Staff**) A sociological examination of issues and questions raised by violence within American families. The public definition of family violence, subjective experiences of abusers and victims, social and individual causes and consequences of abuse, complexities and problems of social interventions. **CC: SOCS**

SOC 362 - Family and Community Services

Course Units: 1.0 (**TBD: Staff**) An examination of the response of community organizations and services to family life. Particular issues will include spouse and child abuse, juvenile delinquency, teenage pregnancy, daycare, and family instability and mental health. Visits to community and human service organizations will also be arranged. **CC: SOCS**

SOC 364 - Sex and Motherhood

Course Units: 1.0 (**TBD: Staff**) An analysis of selected issues in the regulation of human reproduction & family building, primarily from sociological and feminist perspectives. Topics such as birth control, abortion, adolescent pregnancy, infertility & pregnancy are examined in historical and cross-cultural contexts with particular focus on the variables of gender, class and race.

SOC 370 - Public Health

Course Units: 1.0 (**TBD: Staff**) An overview of public health with emphasis on the impact of large-scale social and cultural forces on the health of the public. The epidemiology of selected diseases, injuries, and the addictive disorders; the health effects of exposure to environmental and work place toxins; the role of nutrition in health.

SOC 372 - Global Health

Course Units: 1.0 (**TBD: Staff**) An in-depth survey of health care systems and topics from a cross-cultural perspective, of particular interest to health care providers and practitioners and to students interested in comparative health care systems particularly those planning to go on the Health Systems Term Abroad.

SOC 374 - Mental Health and Society

Course Units: 1.0 (**TBD: Staff**) A general introduction to the social scientific study of mental health. Topics include theories of mental illness, epidemiology of mental illness, the social experience of being a mental patient, and contemporary issues in mental health.

SOC 385 - Internships for Community Outreach

Course Units: 1.0 (**TBD: Staff**) Designed to provide the student with work and research experience within a human service organization. Registration by application filed during winter term and by permission of instructor. **CC: SOCS**

SOC 387T - Community Service Miniterm

Course Units: 1.0 (**TBD: Staff**) An integrative learning experience that combines an intensive off-campus December service experience with academic inquiry and critical reflection about the social, political, cultural and economic issues in which such service is embedded. Current focus is hurricane recovery in Louisiana Gulf coast. Registration by application filed in spring term and permission of instructor. **CC: LCC**

SOC 450 - Environmental Services and Policy

Course Units: 1.0 (**TBD: Staff**) The focus of this seminar is on the implementation of different environmental policies. Internships or case studies of environmental organizations, including NYS Department of Environmental Conservation, are part of the course. **CC: SOCS**

SOC 490 - Sociology Independent Study 1

Course Units: 1.0 (**TBD: Staff**) **Prerequisite(s)**: Permission of the department chair.

SOC 491 - Sociology Independent Study 2

Course Units: 1.0 (**TBD: Staff**)

SOC 492 - Sociology Independent Study 3

Course Units: 1.0 (**TBD: Staff**)

SOC 493 - Sociology Independent Study 4

Course Units: 1.0 (**TBD: Staff**)

SOC 494 - Sociology Independent Study 5

Course Units: 1.0 (**TBD: Staff**)

SOC 495 - Sociology Independent Study 6

Course Units: 1.0 (**TBD: Staff**)

SOC 496 - Sociology Independent Study 7

Course Units: 1.0 (**TBD: Staff**)

SOC 497 - Sociology Independent Study 8

Course Units: 1.0 (**TBD: Staff**)

SOC 498 - Sociology Senior Thesis 1

Course Units: 0.0 (**TBD: Staff**) Special project for senior majors. **Prerequisite(s)**: Permission of the department chair.

SOC 499 - Sociology Senior Thesis 2

Course Units: 2.0 (**TBD: Staff**) Special project for senior majors. **Prerequisite(s)**: Permission of the department chair.

Sophomore Research Seminar

SRS 200 - Sophomore Research Seminar

Course Units: 1.0 (**TBD: Staff**) Ensures that students have an early hands-on experience thinking and working as an academic researcher. (Students in the Scholars Program take the Scholars Research Seminar (SCH-150) instead of the Sophomore Research Seminar, and take it after the Scholars Preceptorial.)

Spanish

MLT 272 - Art and Politics in Spain: From the Civil War to PostFrancoism and Postmodernity

Course Units: 1.0 (**TBD: Staff**) The impact that political events of this century in Spain have had on Spanish society and culture, as manifested in the arts in general and in literature in particular. **CC:** HUL

MLT 273 - Introduction to Spanish Cinema

Course Units: 1.0 (**TBD: Staff**) This course examines canonical and non-canonical Spanish cinema by well-known as well as lesser-known filmmakers. In addressing questions pertaining to national and regional identities, the Spanish Civil War and the Franco dictatorship, the Spanish transition to a democratic republic and its evolving cultural values, and the country's subsequent incorporation into the European Union, the course also revisits Spain's imperial past and the country's place, today, in world affairs. Students should expect to acquire greater knowledge of Spanish cultural diversity and history, while developing further their film analysis, conversation, and writing skills. **CC:** HUM

MLT 281 - Screening Identities in Latin American Cinema

Course Units: 1.0 (**TBD: Staff**) A survey of the main trends in film production in Latin America since the 1950s (Mexican Golden Age Cinema, Brazilian Cinema Novo, Cuban Imperfect Cinema, Mexican New Wave, the 1990's and beyond). Readings and discussions on issues of film history, aesthetics, representation and reception will frame our critical reflection on the construction of identities (inner-city youth, gender roles, masculinities, race and ethnicity, and US Latinos). **CC:** HUM, LCC

MLT 283 - Beyond the Sunny Paradise: Caribbean literature and politics

Course Units: 1.0 (**TBD: Staff**) Through the study of the literature and the political history of the Caribbean, the course aims to introduce students to a region comprised of a diverse conglomerate of nations that share several important parallels (colonial legacies; ethnic and sociocultural heterogeneity; racialized national identities; US interventionism; heavy dependence on tourism, among others). The pan-Caribbean scope of the course will provide students an in-depth view of the shared issues in the region, while the analysis of literary texts-from Antigua, Barbados, Cuba, Dominican Republic, Haiti, Jamaica, Martinique, Puerto Rico, and Trinidad-will allow the students to recognize the idiosyncratic characteristics of Caribbean nations. Students will explore the rich and often-overlooked literary production of the Caribbean, drawing lines of comparison and contrast among writers from several of the islands, and identifying the common literary elements and devices shared by them. The course seeks to promote a reflection on how Caribbean intellectuals explore and deal with issues of self-determination and the construction of identities. **CC:** HUL, LCC

MLT 284 - Popular Religion and Politics in Latin America

Course Units: 1.0 (**TBD: Staff**) In this course we will examine the connection between politics and popular religions in Latin America, taking a critical view of several of their manifestations without losing track of the language and "sciences" historically used to describe them. We will engage biblical, anthropological, videographic, ethnohistorical and cultural theory texts as well as oral histories and collective memories. The final goal is to tease out those ideas that have traditionally defined the terms in which we understand and explain the "popular" in religious behavior; to understand better the conflicted relationship between "popular" cultural and institutional spaces; and finally to understand why the evolution of popular religions in Latin America cannot be examined without also taking into account their political economy. **CC:** HUL, LCC

MLT 286T - Gender and Identity in Contemporary Brazilian Cinema

Course Units: 1.0 (**TBD: Staff**) The course is a survey of contemporary Brazilian cinema focusing on issues of representation, reception and spectatorship, and construction of (national, cultural, gender, and racial) identity. Besides the films, reviews and substantive readings will contribute to an examination of five main topics: 1) Constructions of Gender; 2) Representations of National Identity; 3) Race and Class; 4) Queer Images; and, 5) Imagining Marginality. All films studied in class will link two or more of these topics. **CC:** HUM, LCC

MLT 287 - Filming Margins: Cinema Verite and Social Realism in Latin America

Course Units: 1.0 (**TBD: Staff**) This course examines different styles of documentary and realist film making from Latin America. It looks critically and with a "film-eye" at the aesthetic and socio-political meanings of conventional and experimental films dealing with social reality and its representation. We will analyze a selective, but historically contextualized and engaging, collection of films that include, among others, Luis Buñuel's *Los Olvidados* (1950), Hector Babenco's *Pixote* (1981), and Fernando Meirelles' *City of God* (2002). **CC: HUM, LCC**

MLT 288 - Torture and Dictatorship in Latin American Literature

Course Units: 1.0 (**TBD: Staff**) This course explores Latin American literature and film in the twentieth century, with a particular focus on the dictatorships and the early years after the military coups in Argentina, Chile, and Uruguay. Readings include texts by writers who stayed in their countries and wrote under the confines of censorship, texts by writers in exile, and theoretical texts on violence, torture, and censorship. Some themes and questions we will discuss are constraints of censorship, the gendering of the nation, control and punishment. **CC: HUL, LCC**

MLT 289 - Literature of the Mexican-American Border

Course Units: 1.0 (**TBD: Staff**) This is a class in literature, film and essays from both sides of the Mexican-American border. This course is designed to give students an under-standing of the complexities of the history, culture and sense of identity of residents from both sides. The class will be discussion based and will focus on the close readings of novels, poems, short stories and plays. **CC: HUL, LCC**

MLT 293 - Made in New York: Puerto Rican and Dominican Transnational Identities in American Literature & Cinema

Course Units: 1.0 (**TBD: Staff**) The course is a survey of the cultural production and representation of the Dominican and Puerto Rican communities in New York City from the late 1950's to the present. Through the analysis of literary texts (narrative, poetry, theater) and films, students are encouraged to reflect on the forging of transnational identities and other issues (race, cultural identity, gender and masculinities) related to these two Caribbean diasporic communities in the U.S., and on the politics of their representation within the American cultural economy. **CC: HUL, LCC**

MLT 294 - Generation X: Global Youth Culture in Fiction and Film

Course Units: 1.0 (**TBD: Staff**) In this course we will examine the production of Generation X literature and culture worldwide. We will begin the course by gaining an understanding of the roots and meaning of "Generation X" since the US post-war period, to its various outgrowths around the world. We will examine how the axis of a "GenX" consciousness plays itself out in countries around the world in narrative, film, art, and music. Possible authors, artists and directors include Canadian Douglas Coupland, American Richard Linklater, Spaniard Ray Loriga, Chilean Alberto Fuguet, Bolivian Edmundo Paz-Soldan, Australians Andrew McGahan and Justine Ettler, Icelandic author Hallgrímur Helgason, British artist Sarah Lucas, Chinese writers Mian Mian and Wei Hui, Russian Viktor Pelevin, Check writer Jachym Topol, and others. In this course, students will create their own short films through a careful, task-by-task research and creative idea generation process, they will receive training using iMovie, and they will learn about the ethical and lawful use of digital media material. For MLT Spanish credit, students must engage in a research / film project related to the Hispanic world. **CC: HUM, LCC**

SPN 100 - Basic Spanish 1

Course Units: 1.0 (**TBD: Staff**) An introduction to the study of the Spanish language and culture through listening, speaking, reading, and writing. No prior knowledge of Spanish is required. Attendance of weekly sessions with the language assistant is required. **CC: HUM**

SPN 101 - Basic Spanish 2

Course Units: 1.0 (**TBD: Staff**) A continuation of Spanish 1. This course further develops all language skills. **Prerequisite(s):** SPN 100 or two years of Spanish at high school level. Attendance of weekly sessions with the language assistant is required. **CC: LCCS, HUM**

SPN 102 - Basic Spanish 3

Course Units: 1.0 (**TBD: Staff**) A continuation of Spanish 2. This course further develops all language skills. **Prerequisite(s):** SPN 101 or three years of Spanish at high school level. Attendance of weekly sessions with the language assistant is required. **CC: LCCS, HUM**

SPN 200 - Intermediate Spanish 1

Course Units: 1.0 (**TBD: Staff**) Intensive and accelerated grammar review, and vocabulary growth. Further development of conversation and writing skills based on cultural texts. **Prerequisite(s):** SPN 102 or equivalent or four years of secondary school Spanish. **CC:** LCCS, HUM

SPN 201 - Intermediate Spanish 2

Course Units: 1.0 (**TBD: Staff**) Continuation of the intensive and accelerated grammar review and vocabulary growth initiated in the previous course. Further development of conversation and writing skills based on cultural and literary texts. **Prerequisite(s):** SPN 200 or AP Spanish credit in high school **CC:** LCCS, HUM

SPN 202 - Intermediate Spanish 3

Course Units: 1.0 (**TBD: Staff**) Continuation of the intensive and accelerated grammar review and vocabulary growth initiated in the previous course. Further development of conversation and writing skills based on literary texts. **Prerequisite(s):** SPN 201 or a score of 3+ on AP Spanish exam. **CC:** LCCS, HUM

SPN 203 - Advanced Spanish

Course Units: 1.0 (**TBD: Staff**) The course emphasizes the further development of composition and writing skills using the process-writing approach. Writing production will consist of expository and creative pieces based on cultural and literary readings. **Prerequisite(s):** SPN 202 or permission of the instructor. **CC:** LCCS, HUM

SPN 204T - The Spanish Language Studied Abroad 1

Course Units: 1.0 (**TBD: Staff**) See International Programs.

SPN 205T - The Spanish Language Studied Abroad 2

Course Units: 1.0 (**TBD: Staff**) See International Programs.

SPN 206T - The Spanish Language Studied Abroad 3

Course Units: 1.0 (**TBD: Staff**) See International Programs.

SPN 207T - The Spanish Language Studied Abroad 4

Course Units: 1.0 (**TBD: Staff**) See International Programs.

SPN 208T - Spanish Cultures and Societies

Course Units: 1.0 (**TBD: Staff**) See International Programs.

SPN 209T - Mexican Cultures and Societies

Course Units: 1.0 (**TBD: Staff**)

SPN 250T - The Spanish Language Studied Independently Abroad 1

Course Units: 1.0 (**TBD: Staff**)

SPN 251T - The Spanish Language Studied Independently Abroad 2

Course Units: 1.0 (**TBD: Staff**)

SPN 295H - Spanish Honors Independent Study 1

Course Units: 0.0 (**TBD: Staff**)

SPN 296H - Spanish Honors Independent Study 2

Course Units: 1.0 (**TBD: Staff**)

SPN 304 - Performing Identities in Contemporary Spanish Theater

Course Units: 1.0 (**TBD: Staff**) This course examines representative works by Spain's leading playwrights from the 1930's to the present (Garcia Lorca, Sastre, Buero Vallejo, Muniz, Arrabal, Lopez Rubio, Cabal, Pedrero, Diosdado, Onetti). The course will focus on the dramatic exploration of Spanish cultures and their histories, the formation of identities, and self and other, studied from diverse theoretical and literary perspectives in order to reflect on the representation of the many performed realities that, woven together, comprise this genre. **Prerequisite(s):** SPN 203 or permission of the instructor. **Prereq/Corequisite(s):** SPN 203 or permission of the instructor. **CC:** LCCS, HUL

SPN 306 - Narrative and New Media in Contemporary Spanish Literature

Course Units: 1.0 (**TBD: Staff**) The contemporary Spanish authors known as "Generacion Nocilla" or the Mutantes are well-connected and savvy users of new media and social networking sites. They maintain their own web pages, they write blogs, produce videos and book trailers, and adopt narrative techniques from digital media. Who are they? And how have they disrupted literary traditions through fiction? Students in this course will critically explore the relationship between identity, technology, and storytelling through theoretical texts on rhizomes, topology, sampling, and remaking. They will then engage in a close reading and analysis of the most influential novel of the time: *Nocilla Dream* by Agustín Fernandez Mallo. And as a class, students will work collaboratively to write and design a critical-creative remake of the novel with the goal of sending it to the author himself. **Prerequisite(s):** SPN 203 or permission of the instructor. **CC:** LCCS, HUM, HUL

SPN 308 - The Spanish Movida: Explosive Youth Culture of the 1970s and 80s

Course Units: 1.0 (**TBD: Staff**) The Spanish Movida was an explosive artistic youth cultural movement that emerged during the Spanish transition to democracy in the 1970's and '80s. Although short-lived, it left a lasting mark on Spanish cultural history because Spanish youth used music, art, photography, fashion, film, fanzines, comics, sculpture, architecture, and design to challenge social norms, question assumptions, open new spaces, and give expression to their vision of a new democratic Spain. How and why did the vibrant Movida come about? Who were the major contributors to this cultural explosion? And what was their lasting legacy? Through the step-by-step development of a research project and student-centered conversations and workshops, this course engages with the prolific multi-disciplinary expressions of individual artists and visionaries of the Movida. **Prerequisite(s):** SPN 203 or permission of the instructor. **CC:** LCCS

SPN 311 - Otherness and Citizenship in Contemporary Spanish Theater and Cinema

Course Units: 1.0 (**TBD: Staff**) An introduction to the study of the dramatic and film genres through the analysis and discussion of contemporary works by Spanish playwrights (Alonso deSantos, Moral, Onetti, Pedrero) and filmmakers (Almodovar, Bollain, De la Iglesia, Leon de Aranoa, Pons, Uribe). Theoretical readings and diverse critical approaches to theater and cinema frame the course around the portrayal of the Other (women, North African and Latin American immigrants, LGBT communities, Roma people, and the poor). The analysis of primary texts will center on how the authors/directors weave representations of difference into narratives of nationhood, engaging in cultural and political debates about citizenship. The course also aims to familiarize students with Spanish visual culture and performance from "la Movida" (immediate post-Franco period) to the new millennium. **Prerequisite(s):** SPN 203 or permission of the instructor. **CC:** LCCS, HUM

SPN 312T - Immigration in Spanish Cinema

Course Units: 1.0 (**TBD: Staff**) This course examines the filmic representation of migration in Spain in the context of contemporary debates related to cultural, economic, and political change throughout Europe. The course seeks as well to grasp in an interdisciplinary way immigration's racial, gender, sexual, religious, and other identity locations, as the Spanish nation and its people negotiate--often in paradoxical ways--national and social proximity with demographic realities. The course will analyze miscellaneous printed (newspapers, magazines, literary and economic-political texts) and visual media (digital and not) dealing with the topic of migration in the context of re-settlement, human rights and institutional, cultural, and national beliefs. **CC:** LCCS

SPN 314 - Spain is Different: Current Debates Shaping Spain's Future

Course Units: 1.0 (**TBD: Staff**) The slogan "Spain is different" was coined by Francisco Franco's dictatorial regime in the 1960s as part of its campaign to advertise Spain to its northern neighbors as an exotic tourist destination characterized by sunny beaches, siestas, flamenco, and bullfights. Today, many Spaniards use the phrase colloquially, not to celebrate their country's uniqueness, but rather to comment on its perceived backwardness in comparison to other industrialized countries. The evolving meaning of this slogan epitomizes Spain's sometimes contradictory efforts to maintain local traditions and values while aligning with broader European and global identities. These opposing forces of change and tradition are at the root of many of the economic, social, and cultural issues dividing public opinion in Spain today. In this course we will examine a few of the current debates around workers', women's, and animal rights through discussion of literature, cinema, and the media. **Prerequisite(s):** SPN 203 or permission of the instructor. **CC:** LCCS, HUM

SPN 325 - Staging Conflict: Studies in One-Act Mexican Theater

Course Units: 1.0 (**TBD: Staff**) This course surveys contemporary one-act Mexican theater focusing on the theatrical devices, trends, and discourses adopted by playwrights to explore conflictive issues in Mexican society and culture: urban violence, generational clashes within the family, sexual diversity, gender roles, consumerism, among others. The course offers an introduction to the study of drama and the analysis of theatrical signs, and it attempts to complement the students' term abroad experience in Mexico by focusing on and contextualizing linguistic and cultural aspects in the texts. Students read texts by Emilio Carballido, Victor Hugo Rascon Banda, Sabina Berman, Hugo Salcedo, among others. **Prerequisite(s):** SPN 203 or permission of the instructor. **CC:** LCCS, HUL

SPN 327 - The Nation at Home: Family and Nationhood in Spanish American Theater

Course Units: 1.0 (**TBD: Staff**) An introduction to the study of the dramatic genre through the analysis and discussion of representative works by Spanish American playwrights (Triana, Wolff, Diaz, Gambaro, Arguelles, Berman, Canales, among others). Theoretical readings and diverse critical approaches to theater frame the course around the representation of family as a microcosm in which narratives of nationhood are contested, revised, and imagined. **Prerequisite(s):** SPN 203 or permission of the instructor. **CC:** LCCS, HUL

SPN 328 - Inquiring Latin American Identities: Reading Context, Space and Cultural Artifacts

Course Units: 1.0 (**TBD: Staff**) This course reflects on how Latin American identities are constructed through the lenses of written, visual, and oral texts. Latin-American cultural identities are conceived as processes initiated and sustained by the merging of radically different cultures that framed and continue to shape people's lives. Particularly, the course explores the impact of gender relations, ethnicity, urban spaces, cultural practices and beliefs on identity. Substantive theoretical readings will complement the assignments. **Prerequisite(s):** SPN 203 or permission of the instructor. **CC:** LCCS, HUM

SPN 329 - TRADITION AND INTERRUPTION IN SPANISH AMERICAN POETRY

Course Units: 1.0 (**TBD: Staff**) Octavio Paz describes modern literature as a "tradition of discontinuity," one that constantly rebels against itself in search of innovation. This course examines Paz's assertion through the study of Spanish American poets, and it aims to introduce students to the genre while surveying major poetic traditions and trends in Spanish America. The course's objectives are centered on strengthening the student's process of language acquisition, developing critical skills, and reinforcing linguistic proficiency and intercultural competence through reading and analysis of poetic texts. **Prerequisite(s):** SPN 203 or permission of the instructor. **Prereq/Corequisite(s):** SPN 203 or permission of the instructor. **CC:** LCCS, HUL

SPN 330 - Contemporary Hispanic Women's Short Fiction

Course Units: 1.0 (**TBD: Staff**) This course focuses on Latin American and Spanish women's contemporary (20th & 21st centuries) short fiction. It centers on the close reading of selected works that deal with some of the most significant formative female experiences and perspectives in contemporary Latin-American societies and in the analyses of selected films. The course examines how women's creative expressions explore political and social realities that question the laws and myths surrounding their formation, call critical attention to the foundations and manifestations of a patriarchal order, and offer alternative visions of, or models for, a renewed social life. **Prerequisite(s):** SPN 203 or permission of the instructor. **CC:** LCCS, HUL

SPN 332 - An Introduction to Afro-Hispanic Literatures and Cultures

Course Units: 1.0 (**TBD: Staff**) This course exposes students, through selected readings dealing with the black experience in Latin America, to African diaspora literature particular to Spanish- and Portuguese- speaking regions. It bridges various genres and artistic media (narrative, poetry, drama, film, music) in order to provide a general sense - aesthetic, material and cultural, theoretical and cross-temporal - of different manners in which black diasporic expressions have intervened in the re-creation, transformation, and interrogation of Afro identities in Latin America. As such, this course examines these expressions as locutions that enrich our perceptions of social, cultural, economic, religious, gender, and sexual social orders and identities related to the black experience in the hemisphere. **Prerequisite(s):** SPN 203 or permission of the instructor. **CC:** LCCS, HUL

SPN 334 - Cartographies of Disasters

Course Units: 1.0 (**TBD: Staff**) **CC:** HUM

SPN 351 - Border Identities

Course Units: 1.0 (**TBD: Staff**) This course explores Chicano culture through essays, literature, and films that represent current and historical issues of the Mexican-American border. Readings will provide research and data, while literary texts and films will offer varying interpretations and representation of the border culture that will allow you to consider critically the complexities of 20th and 21st century issues that include immigration, working conditions, socio-economic status, the role of women, and identity. The course should also help you improve your proficiency in Spanish at all levels: building vocabulary, speaking, listening, reading, and writing. **Prerequisite(s):** SPN 203 or any other 300-level Spanish course. **CC:** LCCS, HUL

SPN 352 - Imagining Latinx Identities

Course Units: 1.0 (**TBD: Staff**) This course is an introduction to contemporary US Latinx literature with a focus on Cuban-Americans, Dominican-Americans, Mexican-Americans/ Chicanxs, and Puerto Ricans. We will study representative works of various genres (narrative, drama, poetry, and film) within their cultural context. Our exploration of US Latinx production seeks to reflect on the plurality and diversity of (self-) representation and the various ways in which Latinx authors and artists imagine and construct their identities and communities in the United States. In addition to acquainting students with significant works of US Latinx literature, the course seeks to strengthen reading ability and sharpening writing and critical skills. Class discussions and writing assignments are in Spanish. **Prerequisite(s):** SPN 203 or permission of the instructor. **CC:** LCCS, HUL

SPN 360 - Spanish Communication: Speaking and Writing in Contemporary Settings

Course Units: 1.0 (**TBD: Staff**) The goal of this course is to build oral proficiency in Spanish at advanced levels. Oral communication will be supported by readings and intensive writing in the target language. Acquisition of linguistically and culturally appropriate oral skills will allow students to communicate successfully in academic and professional settings as well as daily life. **CC:** LCCS, HUM

SPN 375 - Reality Interrupted in Hispanic Narratives

Course Units: 1.0 (**TBD: Staff**) This course explores the disruption of reality in narratives from the Hispanic world (Spain, Latin America, and US Latinx communities), surveying the myriad representations of reality through the subconscious, the magical real, and the unreal or fantastic. In addition to acquainting students with major literary trends affecting the depiction or construction of reality in Hispanic literature, the course seeks to strengthen speaking and reading abilities, to sharpen writing and critical skills, and to familiarize students with critical approaches to various literary genres and film. Class discussions and writing assignments are in Spanish. **Prerequisite(s):** SPN 203 or permission of the instructor. **CC:** LCCS, HUL

SPN 376 - Down to Earth: Cross-Cultural Explorations of the Hispanic World

Course Units: 1.0 (**TBD: Staff**) This course furthers the development of cultural competency while maximizing language skills and providing the foundation for further studies in language, literature, and culture. "Down to Earth" broadens students' knowledge of the Spanish-speaking world by focusing on shared past and present issues affecting people living in similar geographic regions. **CC:** LCCS, HUM

SPN 380 - What's Love Got to Do with It: Gender and Nation in Hispanic and US Latino Literatures

Course Units: 1.0 (**TBD: Staff**) An introduction to the study of literary genres thematically anchored in the intersection of gender dynamics, national politics, and the construction of identity (sexual, cultural, national). Students will read narrative, poetry, and drama from Spain, Spanish- America, and U.S. Latino communities. Theoretical readings and diverse critical approaches to literature frame the course around the portrayal of romantic/sexual relationships that acquire broader dimensions when scrutinized from the perspective of gender and national politics. How are gender and sexual identities inscribed in national identity? How cultural artifacts project and reflect the gendered body of the nation? **Prerequisite(s):** SPN 203 or permission of the instructor. **CC:** LCCS, HUL

SPN 381 - Hauntings in Hispanic Fiction

Course Units: 1.0 (**TBD: Staff**) Ghost stories evoke both fear and delight in readers, listeners, or viewers. But beyond entertaining us, tales of haunting can reveal memories, traumas, and social figures that an individual or society has repressed or maybe just never noticed before. For example, a ghostly apparition may serve to remind a nation of historical violence that it has sought to forget. Or it may represent a silenced social figure clamoring to be heard from the margins. In this course we will explore haunting as a theoretical concept and storytelling device. To do so we will analyze a variety of ghostly narratives - both literary and cinematic - from the Hispanic world. As we summon these fictional phantoms and work to interpret their messages, we will situate each text within its particular cultural, sociopolitical, and intellectual contexts. **Prerequisite(s):** SPN 203 **CC:** HUM, HUL, LCCS

SPN 401 - Bodies and Power in Latin American Narrative

Course Units: 1.0 (**TBD: Staff**) This course examines a selection of some of the most representative but also less canonical manifestations of the Latin American novel, in the context of cultural and national formations that marked Latin American history. By highlighting the particular developments and contradictions explored in these works, students will reflect upon political movements, artistic trends, and intellectual debates that have shaped Latin America. **Prerequisite(s):** Two 300-level courses. **CC:** LCCS, HUL

SPN 405 - Lost and Found in Translation

Course Units: 1.0 (**TBD: Staff**) This course was created to provide advanced students of Spanish with foundational knowledge of the emergent field of Translation and Interpretation Studies. The course complements the curriculum in Spanish Language and Literatures by (1) building upon the Studies in Contemporary Communications cluster at the 300-level and (2) by honing advanced language skills, broadening cultural knowledge, and sharpening critical thinking skills. The course also makes connections with other fields in the Humanities--mainly Japanese, Classics, Theater, and Philosophy--by forging understandings on how notions of interpretation are enacted in these specific disciplines. Class will be taught in Spanish. **CC:** WAC, HUM, LCC

SPN 406 - Film of the Mexican American Border

Course Units: 1.0 (**TBD: Staff**) Through the study of 9 films, students will gain an understanding of cinematic techniques and the ways in which the directors of these films use them to convey differing perspectives of the Mexican-American border, with emphasis on the Mexican side. The films will be presented thematically in reference to the border as the perceived locus of perversion and violence, emigration/immigration, and identity. Readings for the course will come from texts on film, and from book chapters and articles. By the end of the term students will have a better understanding of the history and social dynamics of the Mexican- American border. They will also better understand how to "read" film through different theoretical approaches. They will also be able to discuss and write analytically about what a director does and why. **CC:** LCCS, HUM

SPN 407 - Cultures in Contact (and Conflict) in Contemporary Spain

Course Units: 1.0 (**TBD: Staff**) What is a nation? We will develop complex answers to this question as we explore the case of Spain, a plurinational state where the definition of nation is under constant debate. To do so, we will examine narrative, essay, theater, film, political documents, news, and television shows from culturally and linguistically distinct regions of Spain. We will analyze these texts through the lenses of various theories of nationalism. **Prerequisite(s):** Take any two 300-level Spanish courses. **CC:** LCCS, HUL

SPN 408 - Digital Storytelling in the Hispanic World

Course Units: 1.0 (**TBD: Staff**) In this course students will explore contemporary Hispanic literature as it moves from the printed page to digital screen. Students will analyze contemporary novels, poems, microtexts and hypertexts in digital and printed formats by authors from Spain, Argentina, Mexico, Columbia and the U.S., among others. The interpretation of these texts will allow us to question how digital literature alters our understanding of reading and writing. What is gained and what is lost when the design of digital spaces alter an author's mode of expression? What assumptions are questioned along the way? Can a Twitter text, for instance, be considered "literature"? Why, or why not? Coursework includes the writing of several critical blogs and a final interpretive paper expressed in digital format. **Prerequisite(s):** Two 300-level SPN courses. **CC:** LCCS, HUL

SPN 409 - Rebels with a Cause: Spanish Youth Culture and Protest

Course Units: 1.0 (**TBD: Staff**) This course examines fiction, film, visual arts and social media of Spanish writers and directors from 1975 until today. Students consider critical perspectives on the development and expression of youth from the Spanish Movida (1975-85), Generation X (1990-2000), the Mutantes (2000-2010) to the M-15 Movement. What are the socio-historical and cultural developments that have influenced these groups of writers? How have they reacted and represented their social realities? How did they define their identities, question and rebel against society? To what degree did North American popular and commercial culture and developments in media technologies infuse their storytelling practices on thematic and technical levels? Students in this course will read short stories and extracts from novels, magazines, newspaper articles, and blogs, and will analyze films and other multi-media products. **Prerequisite(s):** Two 300-level courses. **CC:** LCCS, HUL

SPN 415 - What Remains: Waste in Latin American Cinema, Literature, Media, and Art

Course Units: 1.0 (**TBD: Staff**) This course examines the presence and impact of trash, disposed objects and life, and landfills/wastelands in the context of expiry, renewal, and globalization in Latin America. Borrowing from philosophy and urban sociology and anthropology, Latin American, cultural, media and cinema, and environmental studies, the course teases out the aesthetic, political, and economic aspects of "trash" as an intricate stockpile of modern, industrial, digital, and postindustrial traces of discarded and remnant history as well as a multifaceted symbolic index with particular trajectories and manifestations in Latin America contexts. The course will revisit cultish films like *Amores Perros* (Gonzalez Inarritu, 2000) and lesser known films like *La sociedad del semáforo* (Mendoza, 2010) and *Buscando a Miguel* (Fisher, 2006); examine Photography work by Manuel Alvarez Bravo, Miguel Río Branco, and Enrique Meinitides and conceptual art by Teresa Margolles and Doris Salcedo, among others; explore documentary and environmental work looking at waste, neoliberalism, and recovered and precarious life such as *Sequia* (Sanchez Macias, 2009), *Cartoneros* (Livon-Grosman, 2006), *Lixo extraordinario* (Walker, Jardim, Harly 2010), *El tren blanco* (Garcia, Perez Gimenez y Garcia, 2003), and *Yasuni: dos segundos de vida* (Leonardo Wild, 2010); and finally, analyze select literary and alternative initiatives related to "basura" (Ibargoyen, Bolanos, Restrepo, editorial Eloisa Cartonera, Spregelburd, among others). **Prerequisite(s):** Take two SPN 300 level courses. **CC:** LCCS, HUM

SPN 417 - Death and Revenge in the Southern Cone

Course Units: 1.0 (**TBD: Staff**) This course examines the dictatorship in Argentina, Chile, and Uruguay. Through analysis of cultural products including narrative, theater, and film, students will reflect on themes and questions such as the effects of torture and terrorism on society, the constraints of censorship, and revenge. We will read texts by Marta Traba, Luisa Valenzuela, Diana Raznovich, Eduardo Pavlovsky, Ariel Dorfman, among others. Films will include *Camila* and *Death and the Maiden*, among others. **Prerequisite(s):** Two 300-level courses. **CC:** LCCS, HUL

SPN 418 - Readings on Contemporary Mexican Theater

Course Units: 1.0 (**TBD: Staff**) The course explores Mexican theater from the 1950's to the present focusing on playwrights that seek to stage and imagine the nation and their communities either contesting or legitimizing hegemonic narratives of cultural uniformity, normative gender and sexual

roles, and a cohesive political state. We will analyze dramatic texts by Luisa Josefina Hernandez, Emilio Carballido, Hugo Arguelles, Leonor Azcarate, Víctor Hugo Rascon Banda, Jesus Gonzalez Davila, Sabina Berman, Hugo Salcedo, among others. **Prerequisite(s):** Two 300-level courses. **CC:** LCCS, HUL

SPN 431 - Latin America in Colonial Times

Course Units: 1.0 (**TBD: Staff**) This course examines European, indigenous, mestizo and African chronicles of the encounter between Europeans, slaves and native Americans that started in the fifteenth century with the emergence of the "New World." By looking closely at the colonization and subsequent reconfiguration of communities and their cultures, the course analyzes the chronicle and representation of this trans-Atlantic collision and exchange from a historiographic and literary perspective. We will read travel journals, poetry, drama, histories, ethnographies, and other types of textual/visual production such as films and codices, a diverse production that bore witness to the many ways in which the various peoples of and in the Americas documented, perceived, and imagined the old and the new, themselves and others. **Prerequisite(s):** Two 300-level courses. **CC:** LCCS, HUL

SPN 432 - Islands Adrift: Race, Politics, and Diasporas in the Hispanic Caribbean

Course Units: 1.0 (**TBD: Staff**) Introduction to the literatures and cultures of Cuba, Dominican Republic, and Puerto Rico centering on how the region continues to approach its development tempered by an array of colonial legacies-from the slave plantation system to globalization-that impact on social, political, economic, and cultural dynamics. Diverse critical approaches will frame the analysis of literary, visual, and musical texts by Luis Pales Matos, Nicolas Guillen, Pedro Mir, Heberto Padilla, Tomas Gutierrez Alea, Aida Cartagena Portalatin, Celia Cruz, Ana Lydia Vega, Juan Luis Guerra, Reinaldo Arenas, Mayra Montero, among others. **Prerequisite(s):** Two 300-level courses. **CC:** LCCS, HUL

SPN 433 - Latin American Colonial Crossroads at the Movies

Course Units: 1.0 (**TBD: Staff**) This course explores critically filmic approaches to colonial Latin American literature and history. Its main objectives are to analyze films preoccupied with historical events and life in colonial times, to engage the filmic representation of the cultural, political, and religious encounters and tensions informing our desire to revisit contact among Amerindians, African slaves and Europeans, and to familiarize students with debates pertaining to reconstructing the colonial past for contemporary consumption. **Prerequisite(s):** Two 300-level courses. **CC:** LCCS, HUM

SPN 473 - Spain on Screen

Course Units: 1.0 (**TBD: Staff**) In this course we will examine the works of some of Spain's most prominent filmmakers, focusing especially on how they portray traditional definitions of "Spanishness," represent Spain's regional and ethnic diversity, grapple with evolving social norms, and engage with European and global filmmaking traditions and markets. You will become familiar with the conventions of a variety of genres, from arthouse to romantic comedy. Throughout the course you will gain analytical skills and technical vocabulary that will enable you to enjoy a deeper understanding of cinema and discuss it fluently in Spanish. **Prerequisite(s):** Two 300-level courses. **CC:** LCCS, HUM

SPN 489 - Honors Senior Seminar

Course Units: 1.0 (**TBD: Staff**) For seniors who qualify for departmental honors; please contact the department during the winter term. **CC:** LCCS

SPN 490 - Spanish Independent Study 1

Course Units: 1.0 (**TBD: Staff**) Individual directed readings in the field of Spanish or Spanish-American literature. **Prerequisite(s):** At least one course in Spanish at the 400-level and permission of the instructor.

SPN 491 - Spanish Independent Study 2

Course Units: 1.0 (**TBD: Staff**) Individual directed readings in the field of Spanish or Spanish-American literature. **Prerequisite(s):** At least one course in Spanish at the 400-level and permission of the instructor.

SPN 492 - Spanish Independent Study 3

Course Units: 1.0 (**TBD: Staff**) Individual directed readings in the field of Spanish or Spanish-American literature. **Prerequisite(s):** At least one course in Spanish at the 400-level and permission of the instructor.

Statistics

STA 064 - Statistical Thinking

Course Units: 1.0 (**Not Offered this Academic Year**) Seeks to provide the conceptual foundation and analytical skills required to understand a complex, data-rich and uncertain world, and to navigate through the daily bombardment of data from all sides. Significant emphasis is given to understanding the difficulties in acquiring high-quality data, before moving on to graphical and statistical analysis of data, in order to draw actionable conclusions. **Prereq/Corequisite(s):** Not open to students who have passed STA 104, ECO 243, MER 301, PSY 200 or a college calculus course. **CC:** QMR

STA 104 - Introduction to Statistics

Course Units: 1.0 (**Fall, Winter: Staff**) This course is intended to provide the conceptual foundations, and also analytical skills, for students to be able to quantify uncertainty, and further, to make rational decisions in the face of uncertainty. It addresses collection of high-quality data, basic statistical analysis of such data, including use of computer software, and drawing actionable conclusions from analyses. These conclusions include understanding the limitations of statistical analyses. The integration of subject matter knowledge with data analysis within the sequential cycle of scientific inquiry will be emphasized. This course is also intended to prepare students for more advanced statistics courses, such as those in experimental design or regression analysis. **Prereq/Corequisite(s):** This course is designed for first year students and sophomores, and preference will be given to such students in accepting petitions. Not open to students who have passed STA 064, STA 164, STA 264, MTH 115, MER 301, ECO 243 or PSY 200 **CC:** QMR **Note:** More advanced statistics courses, such as STA 164 or STA 264, may be more appropriate for upper class students with solid backgrounds in calculus, e.g., who have taken MTH 112.

STA 128 - Probability

Course Units: 1.0 (**TBD: Staff**) Probability theory and applications. This course is a survey of the basic concepts of probability theory including permutations and combinations, conditional probability, Bayes' formula, independence, discrete and continuous random variables, expectation and variance, the Central Limit Theorem, and selected topics. **Cross-Listed:** MTH 128 **Prerequisite(s):** MTH 102, MTH 112, or MTH 113

STA 164 - Strategies of Experimentation: Statistical Design and Analysis of Experiments

Course Units: 1.0 (**Spring: Staff**) Experimentation is at the heart of the scientific method, both in the physical and social sciences. Not only do experiments validate or disprove existing hypotheses, but often unexpected results lead to the development of new hypotheses and new theoretical understanding. This course will focus on strategies to accelerate the scientific method when experimenting with multiple variables. Specific topics include design options, such as simple comparative experiments, factorials and fractional factorials, and response surface designs, as well as analysis methods such as graphical methods, analysis of variance, and regression models. **Prerequisite(s):** STA 104 (MTH 104), STA 128 (MTH 128), STA 264, MTH 228, MER 301, ECO 243, PSY 200 or permission from the Chair, which may be granted to upper-class students who have solid backgrounds in calculus, e.g., who have taken MTH 112

STA 264 - Regression Analysis

Course Units: 1.0 (**Winter: Staff**) Regression analysis is one of the most important and influential methods in statistics, finding application in virtually all disciplines, from business to healthcare to sociology to the hard sciences. This course will cover both the science of regression analysis - its underlying mathematical theory, as well as the art of its practical application. The course project will involve development of a regression model to fit a real data set. Lectures will be given primarily in matrix notation, i.e., using linear algebra. While the course will not be all-encompassing in itself due to time constraints, it would be good preparation for more advanced modeling courses involving data mining, machine learning, "Big Data", and so on. Prior understanding of statistical concepts is assumed **Prerequisite(s):** MTH 115 and STA 104, ECO 243, STA 164, PSY 200, MER 301 or permission from the Chair, which may be granted to upper class students who have solid backgrounds in calculus and linear algebra, e.g., who have taken MTH 115.

STA 295H - Statistics Honors Independent Project 1

Course Units: 0.0 (TBD: Staff)

STA 296H - Statistics Honors Independent Project 2

Course Units: 1.0 (TBD: Staff)

STA 364 - Big Data Analytics

Course Units: 1.0 (**Spring: Staff**) This course focuses on the analysis of large data sets in diverse application areas using statistical programming languages. Students will develop an understanding of the role of machine learning methods within the context of the scientific method. They will analyze real data sets using downloadable statistical programming packages, including on a course project of their own choosing. This analysis will include exploratory data analysis, visualization, and use of more sophisticated classification and predictive algorithms including nearest neighbor, naïve Bayes, classification and regression trees (CART), neural networks, and others. During the course we will pay special attention to validating models using the "train and test" regimen, as well as through cross validation and bootstrapping. In the process of studying the machine learning methods themselves, students will develop an ability to manipulate big data to accomplish the previous objectives. This includes downloading, merging, appending and reshaping data, and creating new variables. Successful completion of this course would be advantageous for those considering graduate study or employment in the areas of statistics, data science, machine learning, computer science, econometrics, or related disciplines. **Prerequisite(s):** STA 264 or ECO 243 or permission from the Chair.

STA 490 - Statistics Independent Study

Course Units: 1.0 (TBD: Staff) Independent study in a particular area of statistics under the supervision of a faculty member. **Note:** Subject to faculty availability and Chair approval.

Prizes, Honors, and Scholarships

Endowed and Annual Prizes

William F. Allen (1895) Essay Prize. To a senior in any department for the best essay.

Ronald K. Amiraian (1980) Memorial Prize. To a student of modern languages who has performed with distinction on a Union Term Abroad.

Andrew W. Archibald (1872) Prize. To the senior earning a Bachelor of Arts degree with the highest scholastic standing.

Frank Bailey (1885) Prize. To the senior who has rendered the greatest service to the College in any field.

Arnold I. Bittleman Memorial Prize. To a student who has studied drawing in the Visual Arts department and whose work, in the judgment of the Visual Arts faculty in collaboration with an outside juror, is outstanding.

Fletcher (1947) and Grace Blanchard Memorial Prize in Bioengineering. To a senior who has excelled in Bioengineering.

William H. Bloom, M.D. (1945) and Jonathan R. Bloom (1988) Poetry Prize. For the best poems or series of poems by an undergraduate.

David Brind (1982) Memorial Prize in English. To one or more outstanding senior students in English.

Stephen P. Brown Memorial Trophy. To the fraternity that has the best record in scholarship, intramural athletics, and extracurricular activities.

George H. Catlin (1867) Prize. To the graduating senior in liberal arts with the highest scholastic record and deemed most promising for graduate study and for eventual service in the field of college teaching.

Alan Lake Chidsey (1925) Citizenship Award. To a senior for distinctive contribution to the advancement of responsible government in student affairs.

Hans Hainebach Memorial Prize in German Literature. To a sophomore or junior who has demonstrated particular promise as a student of German literature.

Hans Hainebach Memorial Prize in Judaica. To a student who has offered the best performance in the field of Judaica.

Hedda Hainebach Memorial Prize in Music and Theater. Alternating annually between music and theater, to the best performer of classical music as a soloist, with accompanist or with a group; or to a student who has written the best short play or to the best actor or actress.

Edward Everett Hale, Jr. Prize. For the best essay written by a sophomore or junior.

Joel A. Halpern (1961) Prize. To a student or students who have reached out beyond the campus to make a commitment in service to the community

Oswald Heck (1924)-Irwin Steingut Prize. To the student who has consistently done the best work in Political Science.

Eugene W. Hellmich (1923) Memorial Prize. To seniors who demonstrate excellence in mathematics and are planning to teach math.

Victor Herbert Prize. To the student who shows the most promise of making a contribution to American music.

Albert Hill Recognition Award. To a senior who has held a leadership position and has demonstrated exceptional commitment to enhancing the college community.

Kurt W. Hillig (1975) Biochemistry Prize. To a senior who demonstrates outstanding work, ability, and promise in biochemistry.

Julian B. Hoffman, M.D. Memorial Award. To the student (preferably premedical) for distinguished interest, devotion, and contribution to the arts and/or intellectual climate at Union College.

Hollander Convocation Music Prize. To a musician or ensemble for musical performance.

Roger H. Hull Community Service Award. To a senior who has rendered the greatest sustained service to the greater Schenectady Community and who has initiated or is actively engaged in an ongoing community service project.

Charles B. Hurd Prize. To a student of physical chemistry.

Albert C. Ingham (1847) Prize. To the student in the Social Sciences judged to have done the most outstanding piece of scholarly work.

Ingvar V. Ingvarsson Prize. To a senior in electrical engineering chosen for high scholarship.

John Iwanik Prize. To an outstanding Russian language student.

William B. Jaffe (1926) Art Award. For exceptional achievement by an art major, marked by excellence in the study of art history, independent scholarship, and interest in the work of the department.

William B. Jaffe (1926) Athletic Award. To the member of the graduating class to be the outstanding athlete of the year, taking into account the character and motivation of the individual in addition to athletic excellence.

Thomas J. Judson (1966) Memorial Book Prize. To a sophomore who has shown academic excellence as well as sincere interest in the study of modern languages.

David S. Kaplan (1982) Prize. To a student applying to participate in a term abroad. Preference to students majoring in political science.

Warner King (1906) Prize. To the senior in engineering who has contributed most to the traditions and ideals of the College.

Ethel Kirchenbaum Memorial Prize. To the senior who, in the opinion of the Engineering Departments, shall be deemed to possess the best potential for furthering the ideals of the engineering profession.

Harold A. Larrabee Prize. To the student who has done the best work in philosophy during the year.

William E. Lasnik (1968) Prize. To a junior or senior premedical student on the basis of scholarship and character.

Anthony C. LaVecchia (1998) Memorial Award. To a student who demonstrates a keen interest and passion in journalism, especially with a focus in political journalism.

Stephen F. Leo, M.D. (1884) Prize. To the premedical student on scholarship who attained the highest grades in the graduating class and who has been accepted in medical school.

Alice P. and Donald C. Loughry (1952) Prizes. To students completing the best senior projects in computer science, computer engineering, and electrical engineering.

Edith Emilee MacCoy Prize. To the student who excels in botany.

John Lewis March Prize. To a senior who has shown increased interest and ability in psychology during the final two years of college.

Minerva Prize. Awarded to the female student whose work best combines the scholarly study of women or gender with activities that enhance the life of women on campus.

Lewis Henry Morgan (1840) Prize. To the anthropology major who produces the best senior thesis.

R. E. Morgan Memorial Award. To a senior in computer engineering chosen for high scholarship.

Harold and Ellen Nagorsky Memorial Prize. Awarded to a premedical junior student who contributes the most to the Union College community through extracurricular activities.

Alvin F. Nitchman (1924) Prize. To the most promising senior who plans to attend law school.

Ronald M. Obenzinger (1961) Prize. To a premedical student who is selected for high academic merit and personal worthiness.

Robert G. O'Neale (1878) Prize. To a Bachelor of Arts candidate with the highest standing in Classics.

Hans Pasch Memorial Prize. Awarded for the best essay written about the Holocaust.

Elias Peissner Prize. To an economics major who has done work of outstanding merit.

William A. Pike Memorial (1960) Trophy. To a junior for attitude, ability, participation, and achievement in intercollegiate sports.

President's Commission on the Status of Women at Union College Prizes. To seniors who have contributed significantly to promoting equality between the sexes on campus in areas such as scholarship, college and community service, and athletics.

Daniel F. Pullman Prizes. To a senior of high scholastic standing in Humanities and Engineering.

Rennes Lecturer/Lectrice Prize. To a senior planning to serve as a lecturer or lectrice pursuant to Union College's teacher exchange program in Rennes, France.

Martin Terry Resch Prize. To the senior who shows the greatest promise for advanced study in pure or applied mathematics.

Mrs. Edwin L. Rich Prize. To a student majoring in English who has demonstrated outstanding scholarship.

Charles Alexander Richmond Prizes. One for excellence in the fine arts, the other for excellence in the appreciation of music.

Robert B. Ridings Award. To a senior female athlete for her attitude, ability, participation, and achievement in intercollegiate sports.

Paul Rieschick (1974) Prize. In appreciation of the time and effort he devoted to the basketball program and individual players.

Mark Rosenthal (1976) Memorial Prize. To a senior involved in community activities, in good academic standing and planning to attend medical school after graduation.

Rotary Foundation Endowed Prize for International Study. To the senior who shows the greatest promise and interest in an area of international relations. Preference to a student from Schenectady County.

Robert L. Royal (1938) Award. To a financially deserving student who has been accepted by Albany Medical College, to be applied to the purchase of instruments and equipment necessary to medical studies.

Mortimer F. Sayre Prize. To the senior with the best potential for furthering the ideals of the mechanical engineering profession.

Calvin G. Schmidt (1951) Prize. To the member of the junior class who has contributed most to the betterment of student life on campus.

J. Richard Shanebrook Prize. To a student of any religious tradition who has contributed the most to the betterment of religious life on campus.

Daniel Shocket (1972) Memorial Award. To a student majoring in English with a strong interest in creative writing.

Aime Simon (1991) Term Abroad Prize. To students of high academic standing and promise with strong interests in French studies, participating in a term abroad program in a French-speaking country.

Edward S.C. Smith Geology Prize. To a senior majoring in geology who demonstrates high professional potential.

Freling H. Smith (1865) Prize. To the History major with the best senior thesis.

Dr. Reuben Sorkin (1933) Award for Proficiency in Premedical Studies. To a senior demonstrating proficiency in undergraduate studies with an outstanding aptitude for continuing work leading to a degree in medicine.

Ralph W. Stearns (1907) Prize. To the outstanding student or students in electrical or computer engineering.

Milton Hymes Sternfeld (1916) Prize. For the best original essay in philosophy by a member of the senior class.

Roger Thayer Stone (1928) Prize. To the sociology major who produces the best senior thesis.

William W. Thomas Award in French and Francophone Studies. To a senior who has excelled in and contributed most to French and Francophone Studies on the basis of academic, personal and extracurricular achievement.

Joel D. Ticknor (1960) Annual Prize. To a senior graduating from the political science or philosophy departments (alternating yearly) who has demonstrated a capacity for long term thinking and who plans to use his/her career to help solve the world's most pressing problems.

Charles M. Tidmarch Memorial Prize. To a student who has written the best senior thesis in political science.

Professor Frank Titus Memorial Prize in Physics. To a senior who demonstrates outstanding work, ability and promise in physics and/or astronomy.

Frances Travis Award. To a student who is working his or her way through college and who has demonstrated unusual responsibility and self-reliance.

James Henry Turnbull (1929) Prize. To a sophomore student who excelled in physics.

UNITAS Diversity Leadership Award. To the student who has made a significant contribution toward fostering diversity on campus.

Wessel Ten Broeck Van Orden (1839) Prize. To a first-year student excelling in English composition.

Edward Villella, L.H.D. 1991 Prize. To the student for the best dance performance.

David Wagenseil (1978) Memorial Award. To a senior fraternity man for outstanding participation and leadership in intramural sports.

Horatio G. Warner (1826) Prize. To a student of high personal character who has the highest scholastic standing in the Bachelor of Arts program.

Mildred Wilder Prize. To the senior majoring in political science who has written the best piece of scholarly work pertaining to the subject of women and politics.

George H. Williams Prize. To a graduating senior for excellence in Computer Science.

Lee, William, Dr. Norman (1943) and Dr. George (1953) Wrubel Memorial Prize. (Previously named the Lee and William Wrubel Memorial Prize) To a senior preparing for dentistry or medicine, based upon both academic achievement and character.

Eugene I. Yudis (1955) Prize. To the student in any class who has produced the best piece of prose fiction.

Special Awards and Prizes

John Bigelow Medal (2008). Recognizes friends of the College who have contributed to the advancement of humanity.

Eliphalet Nott Medal. Established by President Roger H. Hull. Recognizes the perseverance of alumni who have attained great distinction in their fields. The medal is named for Eliphalet Nott, president of Union College from 1804 to 1866.

Founders Medal. Established by action of the Board of Trustees in 1968. Presented at irregular intervals in recognition of unusual and distinguished service to Union College in a particular area of institutional life.

Gideon Hawley Teacher Recognition Award. Nominated by first-year and sophomore Union College students, to a secondary school teacher who has made a difference in their lives.

John H. Jenkins Award. Awarded for the best bibliography or bibliographical work published during the year, or for a bibliographical research project of significance while in process of preparation. Determination of the recipient of the award shall be at the sole discretion of Union College or such agents as it shall engage.

Stillman Prize for Faculty Excellence in Research. To a faculty member to encourage outstanding research.

Stillman Prize for Faculty Excellence in Teaching. To a faculty member to encourage outstanding teaching.

UNITAS Community-Building Award. To the Union College student, administrator, staff or faculty member who best demonstrates leadership in bringing together as many segments as possible of the campus community for purposes such as community service, fundraising for a worthy cause or celebration of College history.

Endowed Scholarships

The scholarships listed below are available to qualified students in any course of study unless there is a notation to the contrary.

Stephen C. Ainlay and Judith Gardner Ainlay Scholarship. Established by the Board of Trustees in honor of President Stephen C. Ainlay and Judith Gardner Ainlay. For students who have demonstrated need but are also eligible for a merit award, whose attendance at Union will enhance the diversity of the College.

Robert Carter Alexander (1880) Memorial Scholarship. The gift of friends in memory of Robert Carter Alexander, Class of 1880, a lawyer, journalist, and life trustee of Union. Income awarded as a scholarship to encourage academic excellence in classical studies.

Floyd E. Allen (1909) Memorial Scholarship. Established by Helen M. Allen in memory of her husband, Floyd, Class of 1909, a graduate engineer, to establish a scholarship in the Division of Engineering.

Mark T. Allen (1990) Endowed Scholarship. Established from the gifts of Mark T. Allen, Class of 1990, for students requiring financial assistance to attend Union College.

William Allen (1895) Scholarship. The gift of Judge William Allen, Class of 1895.

Ann and Bruce Allison Scholarship. Established by Robert M. DeMichele, Class of 1966, a life member of the Board of Trustees of Union College. Preference given to a high academic achieving member of the men's lacrosse team.

Alpha Delta Phi Scholarship. Established in 1998 by Union College and Alpha Delta Phi. Awarded annually to students majoring in English or the humanities.

Alumni Graduate Council Scholarship. (Previously named "Graduate Council Scholarship") Established by the Graduate Council (now called Alumni Council) at its meeting October 13, 1935, reserving income from the Losee estate for this purpose.

Carlos Alvarez (1982) Memorial Scholarship. Created from the gifts of the Kappa Sigma brothers and friends.

Ronald Amiraian (1980) Memorial Scholarship. Established by Dr. and Mrs. Kenneth Amiraian in honor of their son, Ronald, Class of 1980. First preference to a modern language major with outstanding merit; second preference to a modern language minor with outstanding merit; third preference given to a student who has participated in a term abroad.

A.M. and S.M. Anderson Scholarship. Created by A. Melcher Anderson, Class of 1945, and his wife, Shirley M. Anderson. Preference shall be given to students majoring in engineering and related technologies, or in the natural sciences including physics, chemistry and mathematics.

Albert E. Anderson (1950) Endowed Scholarship. Established by Joan Anderson, widow of Albert E. Anderson, for students with financial need, with first preference given to members of Alpha Delta Phi who are economics and/or history majors; second preference to a student majoring in economics and/or history; third preference to a member of Alpha Delta Phi; fourth preference to any appropriate undergraduate student.

James E. Anderson (1960) Endowed Scholarship. Created from the gifts of Wendy, Stephen, Dean and Nina Anderson and additional family, friends and colleagues of James E. Anderson, Class of 1960. For students requiring financial assistance to attend Union College, with first preference to students who have declared physical chemistry as their area of focus, and second preference to students majoring in chemistry.

Cecil E. Angell (1941) and Jane S. Angell Memorial Scholarship. Created in memory of Cecil E. Angell, Class of 1941, by his family and friends. Income awarded annually to students pursuing courses in engineering who require financial assistance.

Applegarth Memorial Scholarship. Created from the bequest of Lillian E. Applegarth, former secretary and assistant to several Union College presidents, in memory of William R. Applegarth, Gladys M. Applegarth, and Lillian E. Applegarth.

Jeremy April (2005) Memorial Scholarship. Created from the gifts of Union College and the April family and friends.

Michael J. Arato Memorial Endowed Scholarship. Established by Michael Arato, M.D. (1980) for students requiring financial assistance to attend Union College.

Arkell Hall Foundation Scholarship. A gift of The Arkell Hall Foundation in memory of Bertell Arkell Barbour. Income used to aid a student or students selected on the basis of character, financial need, and academic performance. Further qualifications in order of priority are: (1) students from the Canajoharie (N.Y.) Central School District; (2) students from other parts of Montgomery County; (3) students from the general area of New York State.

Clarence S. Arms (1905) Scholarship. The gift of Clarence S. Arms, Class of 1905, an engineer in the steel and wire industry and a leading consultant on wire mills in Europe, the United States, and Canada. Preference to a deserving applicant from Sidney (N.Y.) High School.

Thomas Armstrong (1871) Scholarship. The gift of Thomas Armstrong of Plattsburgh, N.Y. Restricted to residents of Clinton County.

R. Douglas Arnold (1972) Scholarship. Created from the gifts of R. Douglas Arnold, Class of 1972.

Robert D. Arnold (1941) & Miriam H. Arnold Endowed Scholarship. A gift from the estate of Robert & Miriam Arnold.

Thomas E. Axelson Endowed Scholarship. For qualified students based upon need and merit.

Brayton R. Babcock Memorial Scholarship. The gift of Brayton R. Babcock, Jr., in memory of his father, Brayton Babcock, Class of 1893.

Marian A. Baciewicz (1977) Memorial Scholarship. Established by Mr. and Mrs. Frank A. Baciewicz in memory of their daughter, Marian, Class of 1977. Annual income awarded on the basis of need to a female member of Union's senior class whose goal is furthering human understanding. Preference to a female student studying biology, chemistry, or biochemistry.

AlJean Baechlin Memorial Scholarship. Created from the bequest of Alfred Baechlin, Class of 1932, and Jean Baechlin, for students who were born and raised in New Jersey, Arizona, Pennsylvania, Florida or Switzerland.

Frank Bailey, Jr., Fund. A gift from Dr. and Mrs. Frank Bailey, in memory of their son, class of 1931 who died during his senior year in Union. Preference will be given to members of the Alpha Delta Phi Fraternity.

Frank Bailey, Jr., (1931) Memorial Fund. A gift from the members of the Class of 1931 in memory of their classmate, Frank Bailey, Jr., and contributed to by the Bailey family. Frank Bailey, Jr., died a few days before his class graduated. He was the son of Frank Bailey, Class of 1885, long-time treasurer of Union College and a life trustee.

James F. Bailey (1999) Endowed Scholarship. Created from the gifts of the Bailey family in memory of James F. Bailey '99, for students who require financial assistance to attend Union College.

Richard M. Baird (1930) Scholarship. Created from the gifts of Richard M. Baird, Class of 1930.

May I.C. Baker Scholarship. The gift of Mrs. Harriet C. Moore in memory of her sister, Mrs. Walter C. Baker. Income awarded to a student pursuing a course of study in humanities. May I.C. Baker was the wife of Walter C. Baker, Class of 1915, a past chairman of the Board of Trustees and a life trustee of the College.

May I.C. Baker Scholarship. The gift of Mrs. Anna C. Newberry in memory of her sister, Mrs. Walter C. Baker. Income awarded to a student pursuing a course of study in humanities.

Walter C. Baker (1915) Scholarship. Established by Walter C. Baker, Class of 1915, a member of the Board of Trustees of Union College.

Walter R.G. Baker (1916) Scholarship. Established by the Baker Charitable Foundation in honor and memory of Walter R.G. Baker, Class of 1916. Preference to students pursuing a degree in engineering.

Thomas A. Baltay (1987) Memorial Scholarship. Established by Charles Baltay, Class of 1958 in memory of his son, Thomas, Class of 1987.

Barandes Scholarship. (Formerly the Max and Helen B. Barandes Scholarship) Created from the gifts of Gerald Barandes, Class of 1954, Dr. Martin Barandes, Class of 1959, and Robert Barandes, Class of 1969 in honor of their parents.

Salvatore and Lorraine Barbagallo Endowed Scholarship for the Humanities. Created from the gifts of John Barbagallo, Class of 1981 in honor of his parents. First preference shall be given to a rising junior who has shown promise in the discipline of humanities.

Richard I. Barstow (1929) Scholarship. Established by Richard I. Barstow, Class of 1929.

Dr. David J. Becker (1979) Scholarship. Created from the gifts of Dr. David J. Becker, Class of 1979, on the occasion of his 25th Class ReUnion.

Stanley R. Becker (1940) Scholarship. Created from the bequest of Stanley R. Becker, Class of 1940. Awarded to junior and seniors majoring in political science.

John W. Belanger Scholarship. Created by the bequest of John W. Belanger, a former trustee. Awarded to students pursuing courses in engineering.

Randi Sue Bell (1985) Scholarship. Established in memory of Randi S. Bell, Class of 1985 through gifts of her family and friends.

Rett (1964) and Michele Benedict Endowed Scholarship. Created from the gifts of Rettig P. Benedict Jr, a member of the class of 1964, and his wife, Michele A. Benedict. Awarded to students who are majoring in either the fine arts and/or the physical sciences.

Ralph D. Bennett (1921) Scholarship. Established by his family and friends. Mr. Bennett was a trustee of the College from 1946 to 1994. Preference to students pursuing courses in engineering or physics.

Dr. Daniel Berkenblit and Dr. Phillipine Meister Endowed Scholarship. Established from the gifts of Dr. Daniel Berkenblit and Dr. Phillipine Meister, for students requiring financial assistance to attend Union College.

Mitchell D. Bernstein (1985) Memorial Endowed Scholarship. Created from the gifts of Richard B. Bernstein in memory of his son, Mitchell D. Bernstein, a member of the Class of 1985. Awarded to students with a strong interest in theater arts as demonstrated by a major or minor in Theater.

Preference to qualified students in the following order: graduate of Chaminade High School, graduate of Portsmouth Abbey School, discretion of the College.

J. Alfred Greene, Jr., (1919) and Harriette W. Greene Scholarship. Established through a bequest from Harriette W. Greene in memory of her husband, J. Alfred Greene, Jr., Class of 1919.

J. William Greve (1951) Scholarship. Created by J. William Greve, Class of 1951.

Dickinson E. Griffith, Jr., (1941) Memorial Scholarship. The gifts of friends of Dickinson E. Griffith, Jr., Class of 1941.

Carroll C. Grinnell (1919) Memorial Scholarship. Established by the gifts of the members of the Class of 1919 in memory of their classmate, Carroll Grinnell.

Robert Shepard Griswold (1952) Memorial Fund. Established through a bequest from his mother, the late Clare S. Griswold. The income is to be used to further the musical career study of a student.

James R. Gross (1963) Scholarship. Established by James R. Gross, Class of 1963.

Jerome D. Guthmann (1914) Scholarship. Established under the will of Mrs. Fannie D. Guthmann in memory of her son, Class of 1914.

Denise Kitsock Gutstein (1986) Scholarship. Established by Denise Kitsock Gutstein, Class of 1986.

Hans and Hedda Hainebach Humanities and Arts Scholarship. Established through bequest of Hedda Hainebach. Awarded to students who are majoring in the humanities or arts.

Hallenbeck Family Scholarship. (Previously named "Potter Hallenebeck (1910) Scholarship") Established by the gifts of the Hallenbeck family in memory of J. Potter Hallenbeck, Class of 1910; Lewis W. Hallenbeck, Class of 1940, and Robert P. Hallenbeck, Class of 1942.

Joel A. Halpern (1961) Memorial Scholarship. Established by the Halpern family in memory of Joel A. Halpern, Class of 1961. Awarded to a member or members of the first-year class. The scholarship will be renewed in the sophomore, junior, and senior years provided the recipient(s) continues to qualify for financial aid. Preference to students from Westchester County, N.Y.

Joseph K. and Mary Jane Handler Scholarship. Established by Joseph Handler, Class of 1952, and his wife Mary Jane. Preference given to students living west of the Mississippi.

Thomas E. Hanigan, Jr., (1944) Scholarship. Established by life trustee Thomas E. Hanigan, Class of 1944, for students in the humanities.

Thomas E. Hanigan, Jr., (1944) Memorial Scholarship. Established by the W.R. Grace Foundation in honor of Mr. Hanigan, Class of 1944, who served as trustee of Union College and officer and director of W.R. Grace Co.

John C. Hanson, Sr. Memorial Endowed Scholarship. Created from the gift of John C. Hanson, Sr., by his son John C. Hanson, Jr. (1978) and his daughter-in-law Kathleen M. Hayes (1976), for students who require financial assistance to attend Union College.

John J. Hardiman (1938) Memorial Scholarship. Established in his memory by three of his classmates in the Class of 1938. Mr. Hardiman lost his sight in 1954 but continued to operate the Hardiman Liquor Store in Watertown, N.Y., until his death, demonstrating great courage.

Dr. and Mrs. David M. Harvey Scholarship. Established by Dr. David M. Harvey, Class of 1951. Preference given to students who reside in Schenectady County.

Mortimer T. Harvey (1917) Scholarship. Created from the gift of Mortimer T. Harvey, Class of 1917, with preference to students studying or majoring in chemistry who would like to pursue a career in research.

Haviland Family Scholarship. Created from a trust established by Dr. and Mrs. James W. Haviland, Class of 1932 in honor of Morrison L. Haviland, Class of 1898; Karl F. West, Class of 1904; James W. Haviland, Class of 1932 and Donald S. Haviland, Class of 1970.

Hawkes Family Scholarship. Established by Donald C. Hawkes, Jr., Class of 1937, to honor all the members of the Hawkes family who have attended Union College.

E. Zeh Hawkes (1926) Scholarship. Gift of Dr. Stuart Z. Hawkes, Class of 1926, in tribute to his father, Class of 1887 and a former life trustee of Union. Preference first to candidates from Essex County, N.J., and second to other residents of New Jersey.

Reuben D. Head (1925) Scholarship. Established by Mr. Head, Class of 1925, with the. Preference to graduates of Greenville (N.Y.) Central School.

William Randolph Hearst Foundation Scholarship. Created by the William Randolph Hearst Foundation with preference given to minority students from the five boroughs of the City of New York.

Oswald D. Heck (1924) Memorial Scholarship. Established under the will of Oswald D. Heck, Class of 1924, member of the New York State Assembly from 1931 to 1959 and Speaker of the Assembly from 1937 to 1959, and supplemented by contributions from friends and associates.

Eugene W. Hellmich (1923) Scholarship. Created from the bequest of Eugene W. Hellmich, Class of 1923.

Rutson R. Henderson (1923) Scholarship. Established by James A. Henderson in memory of his father. Preference shall be given to a student(s) selected on the basis of character, and academic performance. Further qualifications are: 1) students from Oneonta High School, and 2) students from Otsego and Delaware counties.

Seward Daniel Hendricks (1910) and Sarah Winifred Hendricks Trust Fund. The gift of Seward Daniel, Class of 1910 and Sarah Winifred Hendricks.

Robert J. Henkel (1976) and Roseanne Chismar Henkel Family Endowed Scholarship. Earnings distributed to a student who demonstrates financial need.

David L. Henle Merit Scholarship. Created by David L. Henle, Class of 1975.

Hequembourg Family Scholarship. Created in memory of members of the Hequembourg family: Louis Hequembourg, Class of 1910, Charles L. Hequembourg, Class of 1912, and Frederick W. Hequembourg, Class of 1939. Preference to students from either Albany, Rensselaer, Saratoga, or Schenectady counties.

Roy M. Hershey (1968) Endowed Scholarship. Established by Nancy Hershey in memory of her husband Roy M. Hershey, Class of 1968. Awarded to students who are U.S. Citizens majoring in English, who require financial assistance to attend Union College.

William Parker Hesse (1949) Financial Need Scholarship. Established by William Parker Hesse, Class of 1949.

Joseph M. (1947) and Barbara B. Hinchey Scholarship. Established by Joseph M. Hinchey, Class of 1947. Awards given annually with preference to students studying electrical engineering.

Donald Hirshorn (1956) Endowed Scholarship. Created from the gifts of Shirley Hirshorn and Jim and Alison Hirshorn in memory of Donald Hirshorn, Class of 1956, for students requiring financial assistance to attend Union College.

Betsy Ann Hochman (1989) Scholarship. Established by Harold M. and Merle E. Hochman, in memory of their daughter. Awarded in collaboration with the Harry A. (1925) and Bess Kaplan Kappa Nu Scholarship to an upper-class student or students with a demonstrated need and without regard to sex.

Rose L. and Philip Hoffer Family Scholarship. Created from the gifts of Rose and Philip Hoffer.

Thomas R. (1945) and Barbara P. Hoffman Scholarship. Created from the gifts of John R. Peckham, Class of 1978.

Valerie J. Hoffman (1975) Scholarship. Established by Valerie J. Hoffman, Class of 1975.

Lawrence J. Hollander Bicentennial Scholarship. Established by Lawrence J. Hollander (professor and dean of engineering, 1986-93). Awarded to students enrolled in the undergraduate engineering program.

Alice Holmes Scholarship. Established by a bequest from Alice Holmes. Preference is given to students graduating from Schenectady city or county schools.

Elizabeth W. Holt Scholarship. Established by a bequest from the late Mrs. Holt for students entering from the public schools of Mechanicville and Stillwater or, if no one from these towns, any other public school graduate in Saratoga County, N.Y.

Anthony J. Hornsby (1899) Memorial Scholarship. Established under the will of Mrs. Mabel H. Hornsby in memory of her husband, Class of 1899. Available to students studying engineering.

Henry J. Horstman (1928) Scholarship. Established by Henry J. Horstman, Class of 1928.

Raymond H. Horstman (1923) Scholarship. Established by Raymond H. Horstman, Class of 1923.

Henry L. Howe III (1943) Scholarship. Established by Henry L. Howe, Class of 1943. Preference to sophomore(s) who pursue a full-time course of study leading to a career in business management and/or manufacturing, and to a student who is a well-rounded individual, involved in various aspects of college life.

The Irving D. Karpas, Jr., (1947) and Suzanne T. Karpas Scholarship. Created by a gift from Irving D. Karpas, Jr., Class of 1947. Annual income awarded as scholarship support with preference to an upper-class student or students who plan to enter medical school.

Norman D. Kathan (1926) Scholarship. Established by a gift from Dr. Norman D. Kathan, Class of 1926. Preference to students pursuing a course of study in preparation for graduate study in medicine and who demonstrate potential for making contributions to the improvement of the quality of human life.

Karp Family Posse Scholars Program Endowed Fund. Created from the gifts of the Karp Family Foundation for Union College Posse scholars who require financial assistance to attend Union College.

William G. Keens (1902) Scholarship. Established under the will of William G. Keens, Class of 1902.

John Kelleher (1970) Memorial Scholarship. Established by classmates and friends of John Kelleher, Class of 1970.

Dr. Ellis Kellert Memorial Medical Society Scholarship. Established by the Medical Society of Schenectady County in memory of Dr. Ellis Kellert, head pathologist at Ellis Hospital. The fund provides scholarships for premedical students, with first preference to children of present or former members of the society.

William L. Kennedy (1888) and William L. Kennedy, Jr., (1918) Scholarship. A scholarship created by combining the bequest of William L. Kennedy, Jr., Class of 1918 and a gift by Edwin O. Kennedy, Class of 1921, in memory of his father, William L. Kennedy, Class of 1888 and brother, William L. Kennedy, Jr. Awarded annually to students pursuing a course of study in the humanities. Preference to students from Johnstown, N.Y., and the surrounding area.

Kenneth A. Kesselring Memorial Scholarship. Created by Jane Kesselring Collamer and Nelson P. Collamer, Class of 1933, in memory of Kenneth A. Kesselring. Preference to students whose major is within the Division of Engineering.

Bill and Mabel Ketz Scholarship. Created in honor of Bill and Mabel Ketz by Kenneth J. Whalen, Class of 1949, a life trustee of Union, to recognize and honor them for many years of dedication and service to the College.

Richard J. Killeen (1951) & Patricia M. Killeen Scholarship. Created from the gifts of Richard J. Killeen '51 and Patricia M. Killeen. Awarded to U.S. citizens who are from the capital district of New York State with intended majors in engineering and/or mathematics and/or the technical sciences.

Robert K. (1942) and Evelyn Killian Scholarship. Created from the gifts of Robert K. Killian, Class of 1942 and Robert K. Killian, Jr., Class of 1969 in honor of Evelyn Killian, wife and mother. Preference to students from Connecticut.

Howard William Kitchin Scholarship. Established by Alma Harris Kitchin, widow of Howard William Kitchin, Class of 1908, for students in a liberal arts curriculum.

Dr. Clarence E. Klapper (1932) Memorial Scholarship. Established by Dr. Margaret E. Klapper in memory of her husband.

Frederick A. and Eleanor G. Klemm Scholarship. Established by Eleanor G. and Frederick A. Klemm, professor of German (1947-1978) and founder of the Terms Abroad Program, to help students with travel expenses on the Terms Abroad Program or similar programs.

Arthur A. Klein (1925) Endowed Scholarship. Established by Lewis S. Klein, PhD (1954) in honor of his father, Arthur A. Klein (1925) for students who require financial assistance to attend Union, with preference to students majoring in physics.

Charles A. Koch Scholarship. Established from the estate of Charles A. Koch, father of the late Charles A. Koch, Class of 1954.

Mr. and Mrs. Stanislaus Kosinski Memorial Scholarship. Established from the gifts of Alexander Kosinski, Class of 1935 and his wife, Barbara, in memory of his parents. Awarded to a promising student in music.

Kruesi Scholarship Fund. Established by Paul J. Kruesi, Class of 1900, as a memorial to five Kruesi brothers: August H., Class of 1898, Walter E., Class of 1902, Frank E., Class of 1908, and John, Class of 1914.

Paul E. Kummer (1943) Endowed Scholarship. Created from the gifts of Paul E. Kummer, Class of 1943. Awarded to students majoring in chemistry or biochemistry requiring financial assistance to attend Union College, with preference given to students from Essex or Morris Counties in New Jersey.

Rear Admiral Lee E. Landes (1945) Scholarship. Established by Lee E. Landes, Class of 1945. Awarded to students majoring in economics with first preference given to students from Michigan.

Olin G. Landreth Scholarship. Established by Miss Helen A. Landreth in memory of her father, Olin H. Landreth, professor of engineering from 1894-1917. Awarded annually to students pursuing courses in engineering.

Robert P. Larsen (1953) Scholarship. Established by Robert P. Larsen (1953) for students requiring financial assistance to attend Union who are involved in extracurricular activities and who graduated from a high school located in Geneva, N.Y., or Fullerton, California. In making awards, first preference given to students studying electrical engineering, second preference to students studying engineering, and third preference to any appropriate undergraduate.

Alan A. Lascher (1963) Scholarship. Created from gifts of The Weil, Gotshal and Manges Foundation, family and friends, in memory of Alan A. Lascher, Class of 1963.

Laudise Family Scholarship. Originally established by Robert A. Laudise, Class of 1952, in honor and memory of his father.

Karges Lauterbach (1927) Scholarship. A gift from the estate of Karges Lauterbach, Class of 1927, for the benefit of students studying engineering.

John Y. Lavery (1895) Scholarship. Established under the will of John Y. Lavery, Class of 1895. Preference to a student working his or her way through college.

Joseph L. Lawrence D.D.S. (1939) Scholarship. Established in memory of Joseph L. Lawrence, Class of 1939, D.D.S., by his family, including his wife, Pearl Lawrence; son, David B. Lawrence, MD, Class of 1965; and daughter, Barbara Lawrence Scharf.

Marie E. & Harry R. (1950) Lawton Endowed Merit Scholarship. Established from the gifts of Harry R. and Marie E. Lawton. Preference is given to an outstanding incoming student with proven academic abilities (a strong "A" average in a rigorous high school curriculum, and a class ranking in the top 10%), identified as a merit scholar.

Katherine Spencer Leavitt Scholarship. Established under the will of Mrs. Katherine S. Leavitt.

Craig LeDuc (2005) Memorial Scholarship. Created from the gifts of Union College and others. Preference is given to students majoring in economics.

Alexander M. Lee '03 Memorial Scholarship. Established by Union College and the family and friends of Alex Lee, Class of 2003, who lost his life in a tragic accident at the end of his sophomore year.

Max Len (1939) Endowed Scholarship. Established from the gifts of Max Len '39 for students who require financial assistance to attend Union College.

John J. Leonard (1949) Scholarship. A gift from the estate of John J. Leonard, Class of 1949, for the benefit of students enrolled in pre-med.

Laurence W. Levine (1953) Scholarship. Created by Laurence W. Levine, Class of 1953.

Patricia Bohem Levinson (1975) Scholarship. Created by Richard D. Levinson, Class of 1973, to honor his wife, Patricia, Class of 1975. Preference to students who are involved with the arts and/or humanities.

Larry E. Levitz (1976) Memorial Endowed Scholarship in History. Created from the gifts of Jeanne Levitz in memory of her son, Larry E. Levitz, Class of 1976, for a student majoring in history.

Ruth Lewin Endowed Scholarship. Established by Ruth Lewin, friend of Union College.

John V. Lewis (1914) Memorial Scholarship. Established by bequest of his late wife, Mary McDonnell Lewis, in his memory.

Stanley R. Liebman (1939) Scholarship. Established by the bequest of Stanley R. Liebman, Class of 1939, and awarded based solely on scholastic merit.

Gilbert R. Livingston (1924) Memorial Scholarships. Established by bequest of Mr. Livingston, Class of 1924, a scholarship fund that annually designates 30 first-year students as Gilbert R. Livingston Scholars. Awarded on the basis of financial need, academic excellence, and potential for contribution to the quality of life at Union.

Susan Davis Lloyd Scholarship. Created from the gifts of Mr. and Mrs. Randolph Meyer, Class of 1957, and others to benefit students with a medical disability.

Thomas B. Lockwood Scholarship. Established by Thomas B. Lockwood in memory of his father, Daniel Lockwood (1865). Available to students from Buffalo, N.Y.

Guy Christopher Logan Scholarship. Established by Pamela and Guy T. Logan, Class of 1990, in memory of their son.

Edward A. Lonergan (1959) Endowed Scholarship. Created from the gifts of Edward (1981) and Laura Lonergan in honor of father and father-in-law, Edward A. Lonergan, Class of 1959. Awarded to students who require financial assistance to attend Union College, with preference given to those who may have a high school GPA below Union's average GPA, but who demonstrate character, commitment, and the promise to contribute to the Union Community.

Frederick J. (1942) and Beatrice J. Longe Scholarship. Established by Frederick J. Longe, Class of 1942. Awarded to students pursuing courses in science or engineering.

Eunice E. Lord Scholarship. Created by Frank E. Lord, Class of 1951, in memory of his mother, Eunice E. Lord.

James M. Loree (1980) and Rebecca Corbin Loree Family Scholarship. Established by James M. (1980) and Rebecca Corbin Loree for students who require financial assistance to attend Union College. First preference to students who are "A Better Chance" scholars, and second preference to students from underrepresented backgrounds and/or first-generation college students.

Lubart Family Scholarship. An endowed fund created from the gifts of Mitchell R. Lubart (1975) for students in need.

William G. Lutz (1914) Scholarship. Established with a bequest from William G. Lutz, Class of 1914, who died on May 25, 1971. Preference to engineering students.

Harold S. MacGowan (1933) Scholarship. Established from the estate of Harold S. MacGowan, Class of 1933, to benefit a student excelling in a course or courses in the fields of business management and/or industrial engineering.

Edward A. & Neva Jean Sharpe Mahoney Endowed Scholarship. Created from the gifts of Neva Madeline Mahoney in memory of her parents, Edward A. and Neva Jean Sharpe Mahoney. Preference to students pursuing courses in psychology who reside in the Capital District of New York State.

Sigmund Makofski (1926) Scholarship. Established by gifts from friends and admirers of Sig Makofski, Class of 1926. Preference to graduates of Schenectady High School.

C. T. Male (1913) Scholarship. Established by Charles T. Male, Class of 1913, and supported by contributions from members of the Male family.

C.T. Male Associates Scholarship. Created from the gifts of Kenneth J. Male, Class of 1945, C.T. Male Associates, and others. Awarded to students entering their junior year and renewed for the senior year.

Babu Rao Mandava Endowed Scholarship. Created from the gifts of Vinod Voleti, M.D., Class of 2003 in honor of his grandfather, Babu Rao Mandava, for students requiring financial assistance to attend Union College. Preference shall be given to junior or senior students majoring in a

S.T.E.M. field. In addition to a focus on self-achievement in academics, recipients should demonstrate exemplary citizenship by their commitment to the well-being and success of the Union College community.

Mandeville Scholarship. Created from the estate of David C. Mandeville, Class of 1945.

Joseph T. Maras Memorial Scholarship. Created from the gifts of the family and friends of Joseph T. Maras, former football coach and admissions officer at Union College.

John Lewis March Scholarship. Established by Miss Mildred March in memory of her brother, John L. March, professor at Union College from 1915 to 1948.

A.J. Martini Memorial Scholarship. Established by Paul J. Martini, Class of 1973, and Peter P. Martini, Class of 1978, in honor and memory of their father.

Thomas J. Marvin (1826) Scholarship. Established by the gift of Mrs. Mary L. Sackett in memory of Thomas J. Marvin, Class of 1826.

George Mason Memorial Scholarship. Established under the will of John J. Mason in memory of his brother

Victor F. (1949) and Shirley Mattson Scholarship. Established by Victor Mattson, Class of 1949. Preference to students majoring in chemistry, physics, or mathematics.

McCabe Family Scholarship. Established by Timothy McCabe '73 and Karen Fasoli McCabe '74 in honor of Paul Fasoli '12. For students requiring financial assistance to attend Union, with preference for students who have immigrated to America.

Alice W. and Fred W. McChesney Scholarship. Established by the bequest of Alice and Fred McChesney.

Carl E. McCombs (1904) Memorial Scholarship. The bequest of Alice Losee McCombs in memory of her husband, Carl E. McCombs, Class of 1904, a physician, author, and former manager of the New York Bureau of Municipal Research.

Jay McDermott (1982) and Lisa McDermott Family Scholarship Fund. Created from the gifts of Jay McDermott '82 and Lisa McDermott, for students who are involved in extracurricular activities or from a single-parent family showing financial need or studying Economics.

Alfred H. McKinlay (1951) Scholarship. Established by Mark A. McKinlay, Class of 1973. Preference shall be given to students who have demonstrated outstanding humanitarian concern and a willingness to help others.

John J. McManus (1942) Memorial Scholarship. Created by the friends and family of John J. McManus, Class of 1942, and by McManus, Longe, Brockwehl, Inc., of which he was a co-founder.

Charles B. McMurray (1887) Scholarship. Established by Charles B. McMurray, Class of 1887, and former life trustee of Union. Preference to applicants from Lansingburgh High School, from Troy, N.Y., and from Rensselaer County, N.Y., in the order named.

Walter S. McNab (1908) and Duncan S. McNab (1935) Endowed Scholarship. (Previously named "Walter S. McNab (1908) Scholarship"). Created by Duncan S. McNab, Class of 1935, in memory of his father, Walter S. McNab, Class of 1908. Awarded to students who require financial assistance.

Kenneth J. Meaney (1944) Memorial Scholarship. Created by Henriette Thomas in memory of her brother. Preference shall be given to students from Schenectady majoring in history.

Elma C. and Dominick Mele (1937) Scholarship. Established by Dominick Mele, MD, Class of 1937, a Schenectady pediatrician who has provided a lifetime of service to the community and the College. Preferences in the following order: students from three high schools in Billings, Mont.; the Montana area; Schenectady, N.Y.

Meola Family Endowed Scholarship. Created from the gifts of Carol Behrendt Meola, Class of 1976, and Peter Meola Class of 1977. Awarded to a graduate of Schenectady High School.

Frank L. Messa (1973) Endowed Scholarship. Created by Frank L. Messa, Class of 1973. Preference to students from (1) the state of Texas and (2) the Southwest region of the United States.

George E. (1917) and Lester T. (1927) Moston Scholarship. Created from a gift from Lester T. Moston, Class of 1927, in memory of his brother, George E. Moston, Class of 1917.

Herman Muehlstein Foundation Scholarship. A grant from the Herman Muehlstein Foundation for scholarship assistance to students from the New York metropolitan area.

Donald E. Mullen (1949) Scholarship. Established through gifts of General Electric employees and corresponding matching gifts from General Electric. Donald E. Mullen, Class of 1949, was a GE employee who died at age 49 as a result of an accident in Brazil. Preference given to foreign students.

Natalie M. and Oscar J. Muller, MD (1937) Scholarship. Created by Oscar J. Muller, Class of 1937. Preference to students who are pre-med majors.

M. William Munno (1970) Scholarship. Established by M. William Munno, Class of 1970.

Hans W. Munzer (1939) Scholarship. Established from the gifts of Grace Elaine Munzer. Preference shall be given to students pursuing courses of study with a concentration in modern languages and/or history who possess above average aptitude for these subjects.

Sean Matthew Murphy Memorial Scholarship. Created from the gifts of family and friends in memory of Sean Murphy '13, for students who require financial assistance to attend Union College.

David Murray (1852) Scholarship. Established by the gift of Mrs. Martha Nelson Murray in memory of her husband, Class of 1852.

J. Elbert Myer Jr. (1960) Endowed Scholarship. Created from the gifts of J. Elbert Myer, Class of 1960. First preference to student(s) from Columbia County, N.Y. or Dutchess County, N.Y.; second preference to any student majoring in STEM (Science, Technology, Engineering or Mathematics).

Harold and Ellen Nagorsky Memorial Endowed Merit Scholarship. Awarded annually based on merit with preference given to a pre-medical student who also contributes to the Union College community through extracurricular activities.

Anna C. Newberry Scholarship. Established by the gift of Mrs. Anna C. Newberry.

George Chapman Newbury (1906) Memorial Fund. The bequest of Florence B. Newbury in memory of her husband, George Chapman Newbury, Class of 1906. Awards to students who are studying for the B.S. degree in engineering.

Gordon F. Newell (1946) Scholarship. Established by Gordon F. Newell, Class of 1946. Awards made to students majoring in physical sciences or engineering (except computer science).

Niedermeyer Endowed Scholarship. Established by Thomas Niedermeyer, in honor of Monica Niedermeyer, a member of the Class of 2010. Preference will be given to a student who will participate in a term abroad program during the current academic year.

Sture and Hilda Nilsson Scholarship. Created by Sture H. Nilsson, father of Harold Nilsson, Class of 1965.

Dr. Donald and Marie Nitchman Scholarship. Established by Marie Nitchman in memory of her husband, Donald E. Nitchman, Class of 1933. Preference to premedical students showing promise of compassion and selflessness.

Robert C. North and Dorothy North Scholarship. Created by the Norths to honor the memory of Arthur Walbridge North and Irene Davenport North. Preference to encourage and support students who have achieved junior class status and who have, in the judgment of the Department of Political Science, demonstrated promise and skill in the field of international relations, employing quantitative, systemic, and interdisciplinary approaches to the field.

Eliphalet Nott Scholarship. Established by a gift from the Francis L. Pruyn estate to provide scholarships for worthy engineering students in memory of Mr. Pruyn's great-grandfather, Dr. Eliphalet Nott, president of Union College from 1804-1866, who inaugurated the first course in engineering at a liberal arts college.

Simon F.R. Nottidge (1991) Memorial Endowed Scholarship. Created from the gifts of the Union College Class of 1991 in honor and memory of Simon F.R. Nottidge, Class of 1991, for a student whose family has endured financial hardship as a result of an unanticipated medical or personal tragedy.

Michael R. Novack (1990) Scholarship. Established from the gift in memory of Michael R. Novack, Class of 1990. Preference shall be given to students who have exhibited aptitude and dedication toward biotechnology.

Lisa M. Novak (1979) Memorial Scholarship. (Previously named "Lisa Novak Peretz (1979) Memorial Scholarship"). Created from the gifts of family and friends in memory of Lisa Novak Peretz, Class of 1979 and Gregg Peretz.

Ronald Matthew Obenzinger (1961) Memorial Premedical Scholarship. Created by his parents, Nathan and Romana Obenzinger.

Obler Family Endowed Scholarship. Created from the gifts of Ralph Obler, M.D., Class of 1048, and his wife June Obler, for students who demonstrate and maintain the highest academic standing.

Patrick O'Connor (1978) and Robin Pellish (1978) Endowed Scholarship. Created from the gifts of Patrick O'Connor, Class of 1978, and Robin Pellish, Class of 1978. First preference to students admitted to the Leadership in Medicine (L.I.M.) program; second preference to upper-class students who will attend Albany Medical College; third preference to upper-class students who will attend medical school.

Gerald and Anna O'Loughlin Scholarship. Created by Arthur D. O'Loughlin, Class of 1960, in honor of his parents. Preference to engineering or science students who demonstrate leadership in student activities.

Kenneth Olsen, DMD (1968) Endowed Scholarship. Created in memory of Kenneth Olsen, DMD, Class of 1968, from the gifts of Marna Davis, sister of Kenneth Olsen, and her husband's foundation, The Charles A. and Marna Davis Foundation. Awarded to students majoring in 'hard sciences' (chemistry, biology, physics, geology, or similar) who require financial assistance to attend Union College.

Paul (1959) and Josephine O'Neil Endowed Scholarship. Established by Paul O'Neil, Class of 1959, and Josephine O'Neil for students who require financial assistance to attend Union College.

Anna and Harry Ortner Scholarship. Established by their son, Herbert T. Ortner, a friend of Union College, to honor his parents, and in particular to give recognition to Harry Ortner's interest in the English language and literature.

C. Rolland Oswald and Dorothy C. Oswald Scholarship. Established from the gifts of Mr. and Mrs. C. Rolland Oswald in memory of their daughter, Karen Oswald Janaitis, for students requiring financial assistance to attend Union College.

William L. Oswald Scholarship. Established by the gift of William L. Oswald.

Nicandro and Amelia Ottaviano Scholarship. Established by Orazio Ottaviano, Class of 1947, and Gioia Ottaviano in honor of their parents.

Jonathan Stanley Parry Scholarship. Created from the gifts of Sherman W. Parry, Class of 1940, in memory of his son, Jonathan Stanley Parry. Preference shall be given to students from Washington County, New York, or the state of Tennessee.

Moses and Issac Parshelsky Scholarship. Established by the gift of Issac Parshelsky. Available to students from Brooklyn, N.Y.

James S. Parson (1919) Scholarship. Awarded to students majoring in one of the natural sciences.

Levi Parsons Scholarship. Established by the gift of Levi Parsons of Gloversville, N.Y. Available to students from Fulton, Montgomery, or Hamilton counties.

Robert Porter Patterson (1912) Scholarship. Established by Margaret W. Patterson in loving memory of her husband, Robert Porter Patterson, Class of 1912, a trustee of Union, U.S. Secretary of War, a distinguished judge, attorney, scholar, leader, and humanitarian. Preference to students who intend to pursue a career in the field of law.

George L. Peck (1940) Memorial Scholarship. Established by bequest of his mother, Mrs. Florence L. Wells of Gloversville, N.Y., in memory of George L. Peck, Class of 1940, an advertising executive in Schenectady.

Roger P. Penny (1958) Scholarship. Established by Roger P. Penny, Class of 1958.

Jim Perlstein (1942) Endowed Scholarship. Created from the gifts of the Perlstein family in honor of Jim Perlstein '42, with preference given to a student majoring in mathematics.

Peter C. Persico Endowed Scholarship. Created from the gifts of Charles J. Persico '85 for students studying electrical engineering who require financial assistance to attend Union College, with first preference given to students from the NYS Capital District.

Joseph I. and Virginia M. Petrucci Memorial Scholarship. Created from the gifts of Dr. Ralph H. Petrucci, Class of 1950, and his wife, Ruth P. Petrucci. Preference will be given first to students who are the first generation in their family to attend college and, second, from Schenectady and/or the Capital District of New York State.

Donna E.D. Phillips Scholarship. Established by Donna E.D. Phillips, Class of 1979. Awarded to students who require financial assistance to attend Union College, with preference given to students majoring in sciences, technology, engineering or mathematics.

Ronald F. Plumb (1980) Scholarship. Created by the family and friends of Ronald Plumb. Preference shall be given to juniors whose background experiences demonstrate the commitment and ability to have served and, to continue to serve, in a leadership capacity and who have an excellent record of extracurricular activities.

Posse Scholarship. For students who are part of the Union College Posse Scholars Program.

Horatio M. Pollack (1895) Scholarship. Established under the will of Horatio M. Pollack, Class of 1895. For a needy and deserving student, with preference to graduates of the Middleburgh and Cobleskill, N.Y., high schools.

Reverend Gary K. Price (1945) Endowed Scholarship. Created from the gifts of Reverend Gary K. Price, Class of 1945, for students requiring financial assistance to attend Union College, with first preference to students from the state of Maine, and second preference to students pursuing courses in the Classics.

Daniel F. Pullman Scholarship. Established by Daniel F. Pullman. Available to students taking the regular classical curriculum. Preference to qualified students who are members of the Methodist Church.

Dr. Marshall W. Quandt (1933) Scholarship. Established by Dr. Marshall Quant, Class of 1933. Awarded to a resident of the Town of Waterford and made in the following order: 1) graduates of Waterford-Halfmoon High School; 2) graduates of Lansingburg High School, Troy, N.Y. or Catholic Central High School, Troy, N.Y.; 3) graduates of other schools nearby the schools designated in 1 and 2. If none are applicable, the recipient can be from any high school located in Saratoga County, N.Y.

Andrew V.V. Raymond (1875) Scholarship. Gift of Nicholas V.V. Franchot, Class of 1875, in memory of Andrew V.V. Raymond, Class of 1875, president of Union College from 1894 to 1907.

Raymond Family Memorial Endowed Scholarship. Created from the gifts of Peter D. Raymond, Class of 1980 in honor and memory of his father, Richard DeVries Raymond, Class of 1945, and the rich legacy of Raymond family Union College alumni. Awarded to students who require financial assistance to attend Union College.

Reader's Digest Foundation Scholarship. Established to provide scholarships for worthy students.

William Friedrich (1970) & Susan Reville (1972) Endowed Scholarship. Created from the gifts of William Friedrich, Class of 1970, and Susan Reville, Class of 1972, with preference for students who demonstrate exceptional talent and academic potential, but require financial assistance to attend Union College.

Dr. Edwin W. Rice, Jr., Scholarship Fund. The College received, under the will of Dr. Edwin W. Rice, Jr., \$5,000 as a trust fund, the interest to be used to aid needy students.

Jeanie C. Robb Endowed Scholarship. Created from the gifts of Donald J. Marshall, Class of 1966, for students requiring financial assistance to attend Union College. First preference shall be given to students pursuing a degree in engineering; second preference given to students studying either physics or mathematics.

Phil Alden Robinson (1971) Scholarship. Created from the gifts of Phil A. Robinson, Class of 1971.

S. Jesse and Jessie Robinson Scholarship. Established by Phil A. Robinson, Class of 1971, in honor of his parents.

Sam & Roslyn Roden and Charles (1960) & Leslie Roden Family Scholarship. Created from the gifts of Charles Roden, Class of 1960.

Thomas Romeyn (1797) Scholarship. Established by the grandsons and great-grandsons of Thomas Romeyn, Class of 1797, a prominent clergyman of the Dutch Reformed Church.

Peter V. Roosa (1974) Memorial Scholarship. Created from the gifts of the Roosa Family Foundation. Preference will be given to students majoring in environmental science and/or biology.

Nathan and Jennie Rosenberg Scholarship. Established by Henry E. Montross, Class of 1919 to aid a student who, by grades and general comportment, gives promise of becoming a substantial contributing citizen of the United States of America.

Harry A. Rositzke (1931) Scholarship. Created from the gifts of Harry A. Rositzke, Class of 1931.

Joseph Rotundo (1929) Scholarship. Gift of alumni and friends in memory of Prof. Joseph Rotundo, Class of 1929, member of the faculty from 1929-1953.

John A. Royce (1913) Scholarship. Established under the will of Mrs. Blanche C. Royce in memory of her husband.

Christian and Verna Rumpf Scholarship. Awarded to two academically outstanding students who demonstrate financial need.

Bernard Salad (1937) & Geraldine Demar-Salad Scholarship. Established by Maureen Demar Hall in memory of her mother and step-father.

Robert J. Sallick (1959) Scholarship. Established by Robert J. Sallick, Class of 1959.

Henry Clay Sanborn (1864) Endowed Scholarship. Established by Thomas Burleigh, Class of 1956, in honor of his great-grandfather. Awarded to student(s) requiring financial assistance to attend Union College, with first preference given to students from Ticonderoga, NY and neighboring counties; second preference to students from New York's North Country, and third preference to students from New York State.

Saperstone Family Scholarship. Created by Peter S. Saperstone, Class of 1989, and family. Preference given to students from Northern Virginia.

Nicholas T. Saviano (1951) Scholarship. Established by Nicholas Saviano, Class of 1951, awarded to an electrical engineering graduate.

Rose Ann and Nicholas T. Saviano Scholarship. Created by Nicholas T. Saviano, Jr., Class of 1951, in memory of his parents.

Harold L. Saxton (1924) Scholarship. A gift from a trust established by Harold L. Saxton, Class of 1924.

Mortimer F. Sayre Scholarship. Established by Harrison S. Sayre, Class of 1934, in memory of his father, Mortimer F. Sayre, a professor of mechanical engineering. Awarded to students pursuing mechanical or civil engineering.

Edwin W. Scantlebury (1941) Scholarship. Established from gifts of Edwin W. Scantlebury, Class of 1941.

R.A. Schatzel (1921) Scholarship. Created from gifts of Rudolph A. Schatzel, Class of 1921.

Jessie Scheman and Lillian Rosen Memorial Scholarship. Created from the gifts of Robin J. Scheman, Class of 1984.

Calvin G. Schmidt (1951) Scholarship. Created by the Student Council, Inc. in honor of Calvin G. Schmidt, Class of 1951, who retired in 1984 after thirty years of service to Union, the last twenty as registrar.

Roland W. and Claire K. Schmitt Scholarship. Created from the gifts of Roland W. Schmitt, Class of 1985-H and Claire K. Schmitt.

Jack J. Schneider, (1962), M.D. Scholarship. Established by Jack J. Schneider, MD, Class of 1962. Preference is given to students preparing for a career in medicine.

Kyle Schrade (2005) Memorial Scholarship. Created from the gifts of Union College and others. Preference is given to students majoring in history.

Murray D. Schwartz (1969) Scholarship. Established by Murray D. Schwartz, Class of 1969, and his friends. Income used to aid students studying in the humanities.

Daniel Seymour (1866) Scholarship. A bequest from Harris P. Wetsell in memory of his uncle, Daniel Seymour, Class of 1866, a lawyer. Awarded by the president of the College to students who show promise of future success.

Hester Shapiro '73G Scholarship. Created from the gifts of Rochelle, Sarah and William Shapiro, in memory of William's mother. Preference will be given to a female student majoring in chemistry or English and residing in the Boston area or Schenectady, N.Y.

Morris A. Shapiro (1932), M.D., Scholarship. Created by Hester Shapiro '73G, in honor of her husband, Dr. Morris A. Shapiro, Class of 1932. Preference to students who plan to enter medical school.

Samuel R. Sharp (1981) Memorial Scholarship. Established by the Sharp family and Steven A. Klinger, Class of 1981. Preference to students majoring in political science.

Howard Sheffer (1939) Chemistry Scholarship. Established by the family of Prof. Howard Sheffer, Class of 1939, for a worthy chemistry major in his or her junior or senior year.

Kenneth S. Sheldon (1920) Scholarship. Established by Mildred L. Steele, in memory of her father. Preference shall be given to juniors or seniors.

Sherman Family Scholarship. Created from the gifts of Andrew Sherman '70, son of Lee Sherman '42, for students who require financial assistance to attend Union College.

Daniel Shocket (1972) Memorial Scholarship. Created from the gifts of Carol and Sheldon Shocket in memory of their son. Preference given to students majoring in English with a strong interest in creative writing.

Anna Shriber Memorial Scholarship. Created from the gifts of Marlene C. Gilbert '83, with preference given to students who require financial assistance to attend Union College.

Scott M. Siegler (1969) Scholarship. Created by Dr. Edward Siegler and Scott M. Siegler, Class of 1969. Preference to students majoring in English.

Joseph E. Silver (1976) Memorial Scholarship. Established by a bequest from the estate of Charlotte E. Silver. Preference to students majoring in political science.

Jamie Silverberg (1979) Scholarship. Created by Dr. Doris Silverberg in memory of her daughter, Jamie, Class of 1979. Awarded to a senior pursuing a career in medicine.

Jerry and Sandra Silverman Scholarship. Created from the gifts of Dr. Mitchel U. Silverman, Class of 1976, as a permanent tribute to his parents, Jerry and Sandra Silverman. Preference will be given first to students who are the first generation in their family to attend college, secondly from the state of California or thirdly to students in the pre-med program.

Coletta S. & J. Jay Sitney (1934) Scholarship. Established through bequest of Coletta S. & J. Jay Sitney, Class of 1934.

Jeanne L. and Robert L. Slobod (1935) Scholarship. Created from the gifts of Jeanne L. and Robert L. Slobod. Preference will be given to students of Iroquois heritage and then to Native American students.

Robert Avon Smith (1952) Scholarship. Established by Robert Avon Smith, Class of 1952. First preference to premedical students from the Binghamton, Johnson City, and Endicott areas of New York State. Second preference to electrical engineering students from that area, then other students from that area.

Stanley M. Smith, Jr. (1950) Scholarship. A gift from the estate of Stanley M. Smith, Jr., Class of 1950.

Walter C. Smith (1914) Memorial Scholarship. Established through a bequest of his widow, Josephine Hull Smith, in memory of her husband, Walter, who graduated in 1914 with a bachelor of science in engineering degree.

Frank B. Snell (1895) Scholarship. Established by Mrs. Katherine B. Snell in memory of her son, Frank B. Snell (1895). Available to a student who is working his or her way through college.

Johnson Ide Snell (1865) Scholarship. Established by Mrs. Katherine B. Snell in memory of her husband, Johnson Ide Snell, Class of 1865. Available to a student who is working his or her way through college.

George W. Spaine Memorial Scholarship. Established through the gifts of the community in memory of George W. Spaine, principal of Mont Pleasant High School from 1931-1954. Awarded to graduates of Schenectady High School.

Ichabod Spencer (1822) Scholarship. Established by Mrs. Katherine Spencer Leavitt in memory of her father, the Reverend Ichabod S. Spencer, Class of 1822.

Walter A. Spencer (1972) Scholarship. Established by Walter A. Spencer, Class of 1972.

Dr. Jonathan R. Spicehandler (1970) Scholarship. Established by Debra F. Spicehandler in memory of her husband. Awarded to a student majoring in the sciences.

Nancy and Ross H. Spicer (1947) Scholarship. Created by Ross H. Spicer, Class of 1947. Preference shall be given to students majoring in Engineering.

Dorothy Golub Spira Scholarship. Established by Dorothy Golub Spira.

Leo Winston Spira (1927) and Dorothy Golub Spira Scholarship. Created by Dorothy Golub Spira in honor of her husband, Leo Winston Spira, Class of 1927.

Ronald W. (1958) and Carol A. Spira Endowed Scholarship. Created from the gifts of Ronald Spira '58 and Carol Spira, with preference for students studying English or humanities and require assistance to attend Union College.

Robert C. Sprong (1950) and Anna Sprong Scholarship. Created from the gifts of Robert C. Sprong, Class of 1950, to students majoring in engineering.

Dr. Frank R. (1926) and Adelaide H. Stansel Scholarship. Created by Dr. and Mrs. Frank Stansel.

Eric T. Starck (1990) Memorial / Alumni Club of Boston Scholarship. Created from the gifts of family and friends of Eric T. Starck '90 and the Union College Regional Alumni Club of Boston. Preference to student(s) from the Greater Boston area, majoring in Political Science.

Starr Foundation Scholarship. Established in 1995 by a grant from the Starr Foundation to support an engineering student studying abroad.

Frederick Starr Scholarship. The gift of the Frederick Starr Contracting Co. Available to students from New York City.

Ralph W. Stearns (1907) Memorial Scholarship. Created from the gifts of Emma L. Stearns in memory of her husband.

Christian Steenstrup Memorial Scholarship. Established by the bequest of Laura Auer in memory of her father. Preference shall be given to students majoring in Mechanical Engineering.

Edward C. (1945) and Mary Regis Stefic Endowed Scholarship. Created from the gifts of Edward Stefic '45 for students who require financial assistance to attend Union College.

Earl E. Steinert (1924) Fund. Established through bequests from Earl E. and Margaret W. Steinert. Awarded to a student in the engineering division.

Charles P. Steinmetz Scholarship. A gift of the General Electric Co. Awarded first to employees or children of employees of the General Electric Co. and second to children of residents of Schenectady if there should be no GE applicants.

Charles P. Steinmetz Memorial Scholarship. Established by Marjorie Hayden, daughter of Joseph and Corrine Hayden. Charles Steinmetz adopted Joseph, his young lab assistant, in 1903 and they worked together until Steinmetz's death in 1923. Preference to students majoring in engineering or physics.

Stevens-Chadbourne Scholarship. Established by the daughters of Norman O. Chadbourne, Class of 1935, and Dorothy Stevens Chadbourne in honor of their 50th wedding anniversary. First preference to students from Schenectady County selected on a basis of character, financial need, and academic performance.

Albert Henry Stevenson (1936) Scholarship. Created from the gifts of Albert H. Stevenson, Class of 1936. Preference given to Union Students who reside at least 500 miles from the Capital District of New York State.

Charles D. Stewart (1952) Scholarship. Created by Charles D. Stewart, Class of 1952. Preference to students majoring in psychology, on the Dean's list, interested in continuing for a graduate degree and indicating an interest in an "applied" field, e.g. industrial, social clinical, counseling or organizational psychology.

Mark Stokes (2003) Memorial Scholarship. Created from the gifts of Union College and the Stokes family and friends. Preference shall be given to students who participate in extracurricular activities.

Hugh M. Stoller Memorial (1913) Scholarship. Established under the will of Prof. James H. Stoller, Class of 1884, in memory of his son, Hugh M. Stoller, Class of 1913.

Dr. William Stone Memorial Scholarship. Established by Warren Peter Wells '64 and Joan Walmsley Wells '59G and '61G for students requiring financial assistance to attend Union College.

Hyacinthia Stromillo Scholarship. Created from the gifts of Hyacinthia Stromillo, a friend of Union College.

Twitty J. Styles Endowed Scholarship. Created by Fred G. Pressley, Class of 1975, and others to honor Professor Twitty J. Styles. Preference shall be given to students majoring in biology.

A. Walter Suiter (1893) Scholarship. Established under the will of Dr. A. Walter Suiter, Class of 1893. Preference to a resident of the village or county of Herkimer, N.Y.

Surdna Foundation Scholarship. Established by a grant from the Surdna Foundation of New York City, John E. Andrus, donor of the initial gift to finance the foundation.

Henry J. Swanker (1931) Scholarship. Created from the gifts of Henry J. Swanker and Esther M. Swanker. First preference to students from Schenectady County; second preference to students from the Capital District of New York State.

Monroe M. Sweetland (1885) Scholarship. Established by the gift of Monroe M. Sweetland, Class of 1885. Preference to members of the Sweetland family.

Alfred J. Swyer, M.D. (1941) Scholarship. Established by Dr. Alfred J. Swyer, Class of 1941. First preference to a junior pre-med student who is ranked in the second quarter of his/her class.

Daniel M. Tanenbaum (1979) and Richard E. Tanenbaum (1982) Endowed Scholarship. Established through the gifts of Daniel M. Tanenbaum, Class of 1979 and Richard E. Tanenbaum, Class of 1982 to provide financial assistance to student(s) from the Northeast who were involved in extracurricular activities in high school.

Wilbur S. and Claire A. Tarbell Scholarship. Established by bequest of Claire A. Tarbell of Brooklyn, N.Y.

Tarica Family Endowed Scholarship for Art History. Created from the gifts of David and Michele Tarica in honor of their daughter Rachel Tarica, Class of 2010, with preference given to students majoring in Art History.

Anthony P. Tartaglia, M.D. (1954) Scholarship. Established by Dr. Anthony P. Tartaglia, Class of 1954.

Warren C. Taylor Memorial Scholarship. Established by Elizabeth L. Taylor in memory of her father, a professor of civil engineering from 1910 to 1950. Awarded to a student or students in the junior or senior year pursuing a full-time course of study in civil engineering or related fields.

Willard G. Taylor (1952) Scholarship. Established by William G. Taylor, Class of 1952.

Willard H. Taylor (1942) Scholarship. Established by Willard H. Taylor, Class of 1942. First preference to student(s) selected on the basis of character, financial need, and academic performance.

Taylor/Schneiderwind Scholarship. Established from the bequest of Helyn Taylor in memory of her husband, J. Stanley Taylor, Class of 1925, and her nephew, Harold C. Schneiderwind, Class of 1935.

Temple Family Endowed Scholarship. Created from the gifts of John E. Temple (1967), his wife Judy T. Temple and their three children. First preference will be given to students majoring in mathematics, the sciences or engineering and are from the states of Oregon, Washington, Idaho, Montana, Wyoming, or Utah. Second preference will be students majoring in mathematics, the sciences, or engineering.

Aaron Thal (1943) Scholarship. Established from the bequest of Aaron Thal, Class of 1943, awarded to a student who is a resident of the State of Ohio.

Muriel and Seymour Thickman (1944) Family Scholarship. Established by Muriel and Seymour Thickman, Class of 1944, to encourage students with a principally liberal arts education who are considering a career in the practice of medicine.

William (Billy) T. Thomas (1939) Scholarship. Established by Henriette Thomas in memory of her husband.

Chester C. Thorne (1857) Scholarship. Established under the will of Chester C. Thorne, Class of 1857. Awarded at the end of the junior year.

Denise Meigher Summerhayes Todd Memorial Scholarship. Created by Timothy A. Meigher, Class of 1975 in memory of his mother. Denise Todd graduated from Union College in 1986 at the age of 71.

Toll-Hill Scholarship. Created from the gifts of Albert Karen Hill, Class of 1946 and Perrie Jones Hill honoring members of the Toll and Hill families who have attended Union College.

Alan R. Tropp (1951) Scholarship. Created from the gifts of Mrs. Yvonne Tropp, family, and friends.

Troy Scholarship Fund. The gift of residents of the city of Troy, N.Y., secured through the efforts of Union College alumni in that city. The annual income used to award a scholarship to students who reside in the city of Troy.

James Ullman (1941) Scholarship. Established by Dr. Sanford Ullman, son of James Ullman Class of 1941. Preference will be given to students who graduated from the following high schools: Hudson, Germantown, Chatham, Ichabod Crane or Taconic Hills.

Samson O.A. Ullman Endowed Scholarship. Established by Samson O.A. Ullman, Preference will be given to students who are foreign born.

Professor James E. and Jean A. Underwood Scholarship. Created from the gifts of Richard A. Ferguson, Class of 1967, in honor of Professor and former interim President of Union College, James E. Underwood.

Union College Club of the Capital Region Ed Fitz Memorial Scholarship. Created by members of the Schenectady Alumni Club to honor Ed Fitz, athletic trainer for thirty-three years. Awarded with preference to students from Schenectady County who, it is anticipated, will enhance the reputation of the College through participation in extracurricular activities.

United States Navy V-12/V-5 Scholarship. Established by gifts from alumni who were members of the V-12/V-5 units at Union College during World War II, in memory of deceased members of these units and to honor all who served in these units. Preference to undergraduates who are children of parents who have served or are currently serving in the United States Armed Forces.

Joseph Ushkow Scholarship. Created by Jerome Serchuck and Joan Ushkow Serchuck. Mr. Ushkow received an honorary degree in 1971.

Laszlo Z. Valachi (1961) Scholarship. Created from the gifts of Laszlo Z. Valachi, Class of 1961 and Susan F. Valachi. Awarded to students who are majoring in or studying Geology.

William Henry Van Schoonhoven (1829) Scholarship. Established by Mrs. Harriet V. E. Thorne in memory of her father, William Henry Van Schoonhoven, Class of 1829.

Robert Bruce Van Valkenburg Endowed Scholarship. An endowed scholarship created from the gifts of Howard E. Van Valkenburg, Class of 1942, and his wife Betty A. Van Valkenburg, in memory of their son, Robert Bruce Van Valkenburg.

Alan B. Van Wert Scholarship. Established by Alan B. Van Wert, Class of 1937. First preference shall be given to a resident of the State of Maine in recognition of his/her scholastic accomplishments, character, and promise in extracurricular activities.

John Vanneck Scholarship. Established by Paul Rieschick, Class of 1974, in memory of John Vanneck, a benefactor to Paul Rieschick and others.

Edward F. Vassallo (1990) Memorial Endowed Scholarship. Established by members of the Class of 1990, for students requiring financial assistance to attend Union College. First preference given to students who demonstrate an interest in the Arts at Union, with an emphasis on involvement in Theatre. Second preference given to students involved in Arts-related endeavors such as dance, music, or art.

William H. Vaughn (1885) Scholarship. Established by Mrs. Jennie C. Vaughn, in memory of her husband, William H. Vaughn, Class of 1885.

Daniel Vedder Scholarship. Established by Daniel Vedder. Available at the end of the first year to a member of the first-year class who is preparing for the Christian ministry.

Cornelia Veeder Scholarship. Established under the will of Miss Cornelia Veeder.

Eugene P. Vehslage (1949) Scholarship. Established by Eugene P. Vehslage, Class of 1949. Preference to students pursuing electrical engineering or computer science.

Luciano & Pasqua Venditti Scholarship. Award to any and all direct linear descendants of Luciano & Pasqua.

Leo and Evelyn Viniar Scholarship. Created from the gifts of David A. Viniar, Class of 1976, as trustee for the Viniar Family Foundation, in honor of his parents.

Samuel Sherwood Wakeman (1864) Scholarship. Established under the will of Samuel Sherwood Wakeman, Class of 1864. Available to residents of Saratoga County, N.Y., preference to applicants from the village of Ballston Spa.

Charles Newman Waldron (1906) and Dorothy Waterman Waldron Memorial Fund. Created from the gifts of William A. Waldron, Class of 1935, and others in memory of his parents, Charles Newman Waldron, Class of 1906, and Dorothy Waterman Waldron, in honor of their long lives of devoted and fruitful service to Union College. Income is used to assist deserving undergraduate students in purchasing books and other articles necessary or desirable in their academic work.

Nicholas L. Wallace (1926) Scholarship. Created from the gifts of Mildred S. Wallace in memory of her husband, Nicholas L. Wallace, Class of 1926.

William and Dorothy Reimann Wallace Scholarship. Created from the gifts of William Wallace III (1947).

Maurice C. Walsh Memorial Scholarship. Created by Margo and Bruce Walsh, Class of 1960, in memory of Mr. Walsh's father. Preference to students studying electrical engineering or computer systems engineering.

Ruth E. Walsh Memorial Scholarship. Created by Margo and Bruce Walsh, Class of 1960, in memory of Mr. Walsh's mother. Preference to students studying electrical engineering or computer systems engineering.

Howard C. Ward Endowed Scholarship. Created from the gifts of Howard C. Ward for students born in the United States of America who require financial assistance to attend Union. Preference to students from the local area (or at least New York State) pursuing engineering.

Warner-Lambert/Kenneth Whalen (1949) Scholarship. Created by the Warner-Lambert Company in honor of Union's life trustee and director of Warner Lambert, Kenneth J. Whalen, Class of 1949.

Cecil M. Waterbury (1924) and John W. Waterbury (1965) Endowed Scholarship. Created from the gifts of John W. Waterbury, Class of 1965, for students requiring financial assistance to attend Union College.

Taylor Waterhouse (1923) Memorial Scholarship. Established by the bequest of Alice Waterhouse in memory of her brother, Taylor Waterhouse, Class of 1923. Awarded annually to fulltime students pursuing courses in chemistry, with preference to students who plan a career in the field of chemistry.

J. Herbert Watson (1940) Endowed Scholarship. An endowed fund created from the gifts of Rachel Watson in memory of her late husband. Preference will be given to engineering students.

Dr. Myron Weaver Scholarship. Established by friends of Dr. Myron Weaver and supplemented by the bequest of Dr. Weaver, dean of the faculty of medicine at the University of British Columbia and the Union College physician and director of health service from 1956 until his death on Dec. 26, 1963.

Abbott S. Weinstein (1946) Scholarship. Established by Natalie W. Weinstein in memory of her husband, Abbott S. Weinstein, Class of 1946.

Steven D. Weinstein (1976) Memorial Scholarship. Established with proceeds from a life insurance policy. Preference to students participating in the Terms Abroad program.

Weisburgh Scholarship. Created from the gift of Leon Weisburgh, Class of 1950 and his wife, Frankie.

Charles D. Weller Memorial Endowed Scholarship. Established from the gifts of Edward R. "Ted" Weller (2009) in memory of his father, Charles D. Weller. Awarded to students requiring financial assistance to attend Union College, with preference given to students from diverse geographic locations (outside of New York and its bordering states) who demonstrate and maintain high academic standing.

Mildred and E. Glen Wells (1927) Scholarship. Created from the gifts of E. Glen Wells, Class of 1927. Preference to students pursuing courses in economics.

Mary Elizabeth Wemple Memorial Scholarship. Established by the family and friends of Betty Wemple, who was a long-time employee serving the College in many positions helping students.

Ellwood B. And Alma A. Wengenroth Scholarship. Created from the gifts of Ellwood B. Wengenroth, Class of 1935. Awarded to students pursuing courses in engineering.

Elizabeth R. Whalen Scholarship. Established by Kenneth J. Whalen, Class of 1949, in honor of his wife.

Royton F. Wheadon (1908) Scholarship. A gift from a trust established by Royton F. Wheadon, Class of 1908.

William M. Wheeler (1936) Scholarship. Established from gifts of William M. Wheeler, Class of 1936, and awarded annually to students pursuing courses in engineering.

Squire Whipple (1830) Memorial Scholarship. Established in 1999 in memory of Squire Whipple, Class of 1830.

William C. White Memorial Scholarship. Established by his wife, Mrs. Lillian McKim White, and three children, Dr. Malcolm L. White, William M. White, and Mrs. Virginia White Sargent. Awarded annually to an electrical engineering student who has demonstrated inventive and creative thinking in the field of electronics.

Willis Rodney Whitney-Peter Stephen Sykowski (1935) Scholarship. Gift of the late Dr. Peter Sykowski, Class of 1935, a prominent Schenectady ophthalmologist, in memory of Dr. Willis R. Whitney. Annual income used to award a scholarship to one or more students. Preference to a qualified graduate of St. Mary's Parochial School of Schenectady, N.Y.

Robert H. Wiese (1944), M.D., Scholarship. Created by Joyce M. Wiese in memory of her husband.

James W. Wilson (1969) Scholarship. Established by James W. Wilson, Class of 1969, and awarded to students who require financial assistance. Preference to students who demonstrate leadership in extracurricular activities as well as maintaining high academic performance.

John David Wolfe Memorial Scholarship. Established by Miss Catherine Lorillard Wolfe in memory of her father, John David Wolfe. Preference to students residing south of the Mason-Dixon Line.

The Wold Geoscience Scholarship. A merit-based scholarship established by John S. Wold, Class of 1938, and his wife, Jane Wold, for award to a first-year student, who will receive the scholarship until graduation provided the student is majoring in the geosciences and whose performance is outstanding.

Arthur S. Wright (1882) Scholarship. Established under the will of Mrs. Julia B. Wright in memory of her husband, a member of the Class of 1882.

W. Howard Wright (1895) Scholarship. Established by W. Howard Wright, Class of 1895, and his son, Henry DeForest Wright, in memory of his father. Mr. W. H. Wright and Henry D. Wright served with distinction on the Union College Board of Trustees. Awarded to outstanding full-time undergraduate students majoring in Mechanical Engineering, in recognition of scholastic achievement and leadership in extracurricular activities.

Kenneth L. Wyse (1972) Endowed Scholarship. First preference given to students who are interested in the fields of fashion and design; second preference to students who study in the visual and performing arts.

William C. Yates (1898) Scholarship. The bequest of his wife, Grace Lawrence Yates, who was the daughter of Rev. Dr. Egbert C. Lawrence, Class of 1869. William C. Yates, Class of 1898, was an honorary trustee of Kappa Alpha fraternity and the recipient of the Alumni Council Gold Medal for Notable Service.

Martha H. and Alexander J. Young (1928) Scholarship. A gift established from the estate of Martha H. Young, widow of Dr. Alexander J. Young, Class of 1928.

Shiu Kong Yuen (1942) Scholarship. Created from gifts made by the family of the late Shiu Kong (Mac) Yuen, Class of 1942. Preference to students studying science or engineering.

Albany Law School and Albany Medical College Scholarships

Union College administers scholarships for graduates of the College attending the Albany Law School and the Albany Medical College.

Carter Davidson Memorial Scholarship. Established by friends and associates of Carter Davidson, 13th president of Union College and seventh chancellor of Union University. Awarded to a graduating senior of Union College who will attend a graduate division of Union University.

Fuller Medical Scholarship. Established under the will of Dr. Robert M. Fuller, Class of 1863. Available to medical students of the Albany Medical College who have excelled in chemistry at Union.

John K. Porter (1837) Memorial Scholarship. Established by the gift of Mrs. John K. Porter in memory of her husband, John K. Porter, Class of 1837. Available to graduates attending the Albany Law School.

William C. Saxton Scholarship. Established from the estate of Anna Hotaling Saxton in memory of her husband, William C. Saxton. Available to students in the Albany Law School.

Judge Gilbert McMaster Speir (1832) Memorial Scholarship. Established by Emily Speir Arnold in memory of her father, Judge Gilbert McMaster Speir, Class of 1832. Awarded by the faculty to the graduating senior entering the Albany Law School who has the greatest proficiency in historical studies.

Harold C. Wiggers Scholarship Fund. Established by Dr. David and Elynor Falk to honor the former dean of the Albany Medical College, Harold C. Wiggers. Used at Albany Medical College and limited to graduates of Union College who have completed two years of premedical preparation at Union College. Dr. David Falk graduated from Union College in 1939 and Albany Medical College in 1943.

Annual Scholarships

Walter & Naomi Baker Scholarship. Preference given to one or more students in the following order: 1. engineering students; 2. students in the field of science; 3. students in the field of mathematics.

Dr. David J. Becker (1979) Annual Scholarship. For students requiring financial assistance to attend Union College.

David J. Breazzano (1978) Scholarship. Sustained by the annual gift of David J. Breazzano, Class of 1978.

Claire Marie Burchill (1982) Annual Scholarship. Established by Claire Burchill, Class of 1982, to provide support for a student(s) who, after experiencing a significant change in family financial circumstances, is eligible for scholarship funds or an increase to his or her originally calculated eligibility for financial assistance.

Butterfield-Howard-Humphrey Family Scholarship. Established by Thomas R. Humphrey (1984) in honor of the Butterfield, Howard and Humphrey families and their teaching legacy in the Utica City School District. For a student requiring financial assistance to attend Union College, with first preference to a student graduated from a Utica, New York high school; second preference to a student from the Mohawk Valley region of New York State; and third preference to any other appropriate undergraduate.

Class of 1941 Scholarship. Preference will be given to a student in good standing who has achieved the Dean's List for at least one year, is involved in extracurricular activities and has worked part time to support his or her education.

Class of 1963 Scholarship. Established by the Class of 1963 in honor of their 45th ReUnion.

Dreyfus Foundation Scholarships. Gift of the Dreyfus Foundation for National Merit scholars who are beginning their sophomore year and who plan a career in chemistry or related science.

Goldman Scholars - David Viniar (1976). Established through gifts from Goldman Sachs Gives at the recommendation of David Viniar, Class of 1976 and his wife, Susan.

Golub Annual Business Campaign Scholarship. Awarded to students from the Capital Region, NY (Schenectady, Albany, Montgomery, Saratoga, Rensselaer counties) with preference given to students from Schenectady County.

Frederick Jack (1979) Memorial Scholarship. Established by Rebat M. Halder, M.D., Class of 1974, in memory of his friend, Frederick Jack, Class of 1979, in hopes of providing other Union students the opportunity to follow Frederick's path to success. Preference given to socioeconomically disadvantaged students from New York City.

Jacobson Family Annual Scholarship. Preference given to students with financial need who demonstrate academic potential and reside in Wood River Valley, Idaho.

Ernest L. and Florence L. Judkins Scholarship. Established under the will of Mrs. Florence L. Judkins, providing for the Ernest L. and Florence L. Judkins Scholarship Fund. Selection of recipients to be made by the Scholarship Committee of the College.

Maggs Annual Business Campaign Scholarship. Awarded to students from the Capital Region, NY (Schenectady, Albany, Montgomery, Saratoga, Rensselaer counties) with preference given to students from Schenectady County.

President John S. Morris Annual Scholarship. Created from the gifts of Paul Morris, son of President Morris, for students requiring financial assistance to attend Union College.

Sarah Y. Pontius (2004) Annual Scholarship. Created to encourage women to participate and lead in the fields of economics and mathematics.

Lothrop (1956) and Janice D. Smith Scholarship. Created by Janice D and Lothrop Smith, Class of 1956.

Albert J. Taggi (1945) Annual Scholarship. Preference given to a student studying electrical engineering.

Union College Community Scholarship. (Formerly the Annual Business Campaign Scholarship) Sustained by annual gifts from Union College Community Scholars program donors. Awards will be made to students from the Capital Region (Schenectady, Albany, Saratoga, Montgomery, and Rensselaer counties) eligible for financial aid. Preference to students from Schenectady County.

The Morton H. Yulman (1936) Scholarship. Sustained by annual gifts from the children of Morton H. Yulman, Class of 1936, a life trustee of the College. Awarded to students entering their junior year. Preference given, but not limited to, students from the Capital District of New York State.

Fellowships

Alpha Phi Alpha Mohammad Omar (1994) Memorial Community Service Internship. Established by the brothers of Alpha Phi Alpha fraternity in memory of Mohammad A. Omar, a brother of the Pi Pi chapter who died in 1993 (degree awarded posthumously in 1994). The internship provides support to students volunteering for not-for-profit community organizations. Through it, and the example of Mohammad Omar, Alpha Phi Alpha strives to build awareness of and dedication to a lifetime of improving the quality of life for others, as well as promote the development of individuals to serve as strong examples of commitment to service.

Alexander David Askenazy (2020) Memorial Fellowship for Summer Research. Established by Wendy L. Hansen and Philip D. Askenazy in memory of their son, Alexander David Askenazy, Class of 2020. To support undergraduate summer research with first preference being research in the field of biochemistry, second preference being research in the field of chemistry, and third preference being research in the field of biology.

David J. Bigda Summer Internship. An annual internship established by Carolyn Bigda Dulchinos '84 from the gift of her late father, David J. Bigda, to provide summer internship opportunities for students interested in progressive political, social and/or environmental activism.

Arnold Bittleman Fund for Undergraduate Summer Research. Established by students and friends of the late Professor Arnold Bittleman. Awarded to students performing summer research in the field of Visual Arts.

Booth Ferris Research Fellowship. Established by the Booth Ferris Foundation to support the Summer Science Research Endowment Fund.

Peter R. Brayton (1972) Endowed Fund. Created from the gifts of Peter R. Brayton '72 to provide assistance to undergraduate students interested in pursuing summer research projects in the biological sciences.

Andrew M. Brooks (1978) and Cassandra N. Brooks Terms Abroad Fellowship. Created by Andrew M. Brooks (1978) and Cassandra N. Brooks. Awarded to students who require financial assistance to participate in Union College's Terms Abroad Program.

Class of 1963 Annual Internship. Established through the gifts of members of the Class of 1963 in honor of their Class, for students who require financial assistance to participate in internships.

Class of 1964 Mini-Term Endowed Fellowship. Created from the gifts of members of the Class of 1964, for a student requiring financial assistance to participate in a mini-term.

Class of 1971 Annual Internship. Established through the gifts of members of the Class of 1971 in honor of their Class, for students who require financial assistance to participate in internships.

Class of 1973 35th ReUnion Community Service Internship. Established by the Class of 1973 in honor of their 35th ReUnion. Awarded annually to Union College students interning in not-for-profit community service organizations.

Class of 1989 Endowed Terms Abroad Fellowship Fund. Established by Andrew Albert (1989) and Stephan Jaeger (1989) to provide financial assistance for students participating in Union College's Terms Abroad Program, with first preference to AOP/HEOP students with a minimum GPA of 3.5; second preference to students with a minimum GPA of 3.5; and third preference to any other appropriate undergraduate.

Chelsea Leigh Cobb (2008) Terms Abroad Fellowship. Created by Ty and Leigh Stevenson Cobb to honor their daughter Chelsea Leigh Cobb. Awarded to students who require financial assistance to participate in Union College's Terms Abroad Program.

Lee L. Davenport (1937) Summer Research Fellowship. Established by Lee L. Davenport, Class of 1937, to students pursuing studies in engineering, chemistry, biology, physics, or geology.

Robert G. Englebach Endowed Fund for Asian Studies. Created from the gifts of Robert Englebach, to support the opportunity for students to travel to and study in Asia.

Dr. Gerald Ente (1951) Endowed Mini-Term Fund. Established by the Fraternal Order of Police Surgeons Lodge SAO3 in honor of Dr. Gerald Ente (1951), for students who require financial assistance to participate in a mini-term, with first preference to students majoring in the 'hard sciences' (chemistry, biology, physics, geology or similar).

Tracy Leigh Epstein-Pesikoff Terms Abroad Fellowship. Established by Michael J. Epstein, MD, Class of 1959, in honor of his daughter. Awarded annually to students participating in terms abroad.

Philip B. Evans (1965) Terms Abroad Fellowship. Established by Philip B. Evans, Class of 1965. Awarded to students who require assistance to participate in the terms abroad program for study in Asia.

Frank Gado Endowed Terms Abroad Fellowship. Created by Janet, Class of 1974, and Hans Black, MD, Class of 1974, to honor Frank Gado, professor emeritus of English, who retired in 1996 after more than 30 years of service. Awarded to a student who wants an international learning experience and cannot afford the full cost.

Paula Gmelch Fund for Undergraduate Summer Research. Created by George and Sharon Gmelch, faculty members in Union's Anthropology Department, in honor of their sister-in-law. Awarded to a student interested in performing summer research in the areas of anthropology or environmental studies.

Kelsey Hastings Golitz Memorial Fund for Cancer Research. Established by Rebecca Hastings and Dr. Michael Golitz in memory of their daughter, Kelsey Hastings Golitz, Class of 2010, to support summer research fellowships, senior thesis projects or other such academic undertakings related or contributing to understanding the causes of cancer or improving the diagnosis/treatment of cancer. In making awards, first preference shall be given to a student planning to pursue a career in medicine.

Roger H. Hull Community Service Internship. Created by the Trustees of Union College in honor of President Roger H. Hull's service to the College from 1990 to 2005. Awarded to a student interested in pursuing a career in community or non-profit service.

Edward R. Kane (1940) Endowed Chemistry Fund.

David S. Kaplan Term in Washington. Created from the gifts of Congressional Quarterly, its employees, and friends and relatives of David S. Kaplan, with income awarded to a student participating in Union's annual term in Washington, DC.

The Professor Frederick A. Klemm and Eleanor G. Klemm Fund for International Study and Service. Established by Frederick Klemm, professor emeritus of German, considered the "father of Terms Abroad" and his wife Eleanor, to develop College programs that prepare students for international careers in government service, non-governmental organizations and the private sector.

Laudise Summer Research Fellowship in Chemistry. Created by Robert A. Laudise, Class of 1952, in memory of his father, Anthony T. Laudise.

Ruth Lewin Endowed Fund for Students on Terms Abroad. Created by Ruth Lewin, a good friend of Union College. To assist students who choose to extend their education by taking part in terms abroad.

Christopher Michael Mastrangelo (1989) Memorial Internship. Created by Clifford M. Mastrangelo (1963) in memory of his son Christopher Michael Mastrangelo (1989), for students who require financial assistance to participate in internships.

Kenneth N. Mathes (1935) Fund. Created by Kenneth N. Mathes, Class of 1935, for engineering students on terms abroad.

Francis C. McMath (1946) Summer Research Fellowship in Engineering. Established from the gifts of Francis C. McMath, Class of 1946, with income awarded annually to students entering senior year who wish to conduct research in the field of environmental engineering.

Byron A. Nichols Endowed Fellowship for Faculty Development. Created from the gifts of Alan and Susan Maycock and friends of Prof. Byron Nichols, to help Union College faculty develop programs and skills that reflect the quality of intellectual, social and personal interactions that Byron fostered and developed with students during his career at Union.

Merck Summer Undergraduate Research Scholarship. Established by the Merck Co. Foundation to support summer research in chemistry.

NYNEX Foundation Endowment Fund. Established in 1988 with funds applied to the teaching interns component of the Student Aid for Educational Quality.

Robert Panoff (1942) Summer Research Fellowship. Established by Kathleen Panoff in memory of her husband, Robert, Class of 1942, and supported by gifts of Mrs. Panoff and others. Made to students of high academic standing in electrical engineering who participate in a summer research program under the guidance of the electrical engineering faculty.

David Potts Research Fellowship in History. Established through the gifts of Neil Kramer, Class of 1970, in honor of Union College Professor David Potts, to support student research in history.

Rampe Family Annual Internship. Established through the gifts of Kevin Rampe, Class of 1988, to support students who require financial assistance to participate in internships.

Harriet and Paul (1958) Rosen Endowed Summer Research Fellowship. An endowed fund created from the gifts of Dr. Paul R. Rosen and Harriet Rosen to provide financial assistance to students who apply and receive undergraduate summer research fellowships at Union College.

Henry S. Scherer, Sr. (1922) Endowed Internship. Established through the gifts of Henry and Nancy Klingeman in honor of Henry S. Scherer, Sr., Class of 1922 to provide financial assistance for student(s) participating in internships related to community service.

John (1981) and Michele (1984) Sciortino Cancer Research Fund. Established in 2005 by John Sciortino, Class of 1981, and Michele Sciortino, Class of 1984, in memory of Russell Sciortino, Frederick Hudson, Jr., Mark Hudson and all those whose lives have been affected by cancer illnesses. Awarded annually to a student to support a summer research fellowship, senior thesis project or such other academic undertaking that is related or might contribute to the understanding of the causes of cancer or improve the diagnosis or treatment of cancer illnesses.

Robert Avon Smith (1952) Summer Research Fellowship in Biomedical Engineering. Created by Robert Avon Smith, Class of 1952. Awarded to students in the sciences or engineering who participate in a summer research program in biomedical engineering under the guidance of College faculty.

Virginia Smith (1978) Summer Internship. Created from the gifts of Virginia Smith (1978) for students participating in summer internships, with preference to students from diverse backgrounds.

Dr. Alfred Sommer (1963) and Jill Sommer Health Science Endowment. Established through the gifts of Dr. Alfred Sommer, Class of 1963, and Jill Sommer, to encourage Union College undergraduates to experience the excitement and fulfillment of academic medicine and public health.

William Cady Stone Fellowship. Established by William Stone. Awarded to help provide a full-time student with one year of study abroad.

Surdna Summer Science Research Fellowships. Established by the Surdna Foundation. Awarded to students enrolled in the sciences.

Bill Thomas Endowed Study Abroad Fund. Established by the friends of Prof. William W. Thomas to support students with financial need who wish to go on full terms abroad. Preference given to declared Modern Languages majors and minors with emphasis on those programs that involve the study of a foreign language.

Richard C. Tilghman (1969) Term Abroad Fellowship. Established by Richard C. Tilghman, Class of 1969. Awarded to a student pursuing a major in the sciences, engineering, or mathematics.

J. and P. Fisher Viglielmo Terms Abroad Fellowship. Established from the gifts of James A. Fisher '81 and Pamela Viglielmo '82. Awarded annually to students who participate in the terms abroad program.

Kelly M. Williams (1986) Terms Abroad Fellowship. Established by Kelly M. Williams, Class of 1986 to support students who require assistance to participate in Union College's Terms Abroad Program.

Jody Lynn Yetzer (1994) and Alexander Manual Kayne Charitable Fund Community Service Internship. Established by Jody Lynn Yetzer, Class of 1994, and Manual Kayne for a student(s) who requires financial assistance to participate in an unpaid internship with a nonprofit organization.

Directory

Officers of the College

Board of Trustees

Hon. Governor **Andrew M. Cuomo** of the State of New York Ex-officio

Life Trustees

David J. Breazzano '78, B.A., M.B.A. President, DDJ Capital Management, LLC

Neil M. Golub, B.A., M.S. Executive Chairman of the Board, Price Chopper Supermarkets/Golub Corporation

Douglass Karp '97, B.S., President, New England Development

Frank L. Messa '73, B.A., J.D. Retired Senior Vice President, Ayco Co., L.P.

Mark L. Walsh '76, B.A., MBA, Managing Director, Ruxton Ventures, LLC

Term Trustees

Robert D. Bertagna '85, B.A., M.B.A. Senior Managing Director, Macquarie Capital

Kathleen Brown '88, B.S., M.B.A., J.D. Chief Investment Officer, Denison University

Thomas Caulfield P '19, B.A., M.B.A., Ph.D. Chief Executive Officer, Globalfoundries

Thomas J. Coleman '88, B.A., M.B.A. Co-Founder and Co-President, Kensico Capital Management Corporation.

Dennis Coleman, GP'24, B.A., J.D., Senior Counsel, Ropes & Gray LLP

Thomas G. Connolly '89, B.A. Global Head of the Principal Debt Group, Goldman Sachs Merchant Banking Division

Estelle Cooke-Sampson '74, B.S., M.D. Director of Women's Imaging, Howard University Hospital

Judith G. Dein '76, B.A., J.D. Magistrate Judge, U.S. District Court, District of Massachusetts

Richard Delaney '80, B.S., Retired Senior Vice President, Global Operations, PepsiCo

David L. Henle '75, B.S., M.B.A. President, DLH Capital, LLC

Arthur L. Holden '77, B.S., M.B.A. Founder, Chairman and CEO, Pharmaceutical Biomedical Research Consortium, Ltd.

Roy Jackson '82, B.A., M.P.A. Executive Vice President, Development & Industry Restaurant Association

Brad S. Karp '81, B.A., J.D. Chairman, Paul, Weiss, Rifkind, Wharton & Garrison

John E. Kelly III '76, B.S., M.S., Ph.D. Senior Vice President and Director of Research, IBM Corporation

Jennifer Sconyers Lawton '85, B.S. Chief Strategy Officer, littleBits

Guy T. Logan '90, B.A., M.B.A. Managing Director & Head, Metropolitan Issuers Finance Group, Citigroup Global Markets Inc.

James M. Loree '80, B.A. President and Chief Operating Officer, Stanley Black & Decker, Inc.

Robert J. Moser '99, B.S., Founder & CEO, Prime Group Holdings

Stanley O'Brien '74, B.A., M.B.A. Retired Vice President, BNY Mellon Center

William J. Perlstein '71, B.A., J.D. Chief Deputy General Counsel, Bank of NY Mellon

Sarah Pontius '04, B.A. Real Estate Consultant

Ellen Smith '80, B.S.M.E. M.S. Senior Managing Director, FTI Consulting

Julie Greifer Swidler '79, B.A., J.D. Executive Vice President of Business Affairs/General Counsel, Sony Music Entertainment

William M. Wicker '71, B.A., M.A., M.B.A. Vice Chairman of Investment Banking, Morgan Stanley/Investment Banking Division

President of the College

David R. Harris, Ph.D. President, Trustee ex-officio; B.S. 1991, Northwestern University; Ph.D. 1997, Northwestern University

Alumni Trustees

Kathryn Stefanik Barry '01, B.S., M.A. Partner, Isaacson, Miller
Betsy Modest Brand '82, B.A., M.B.A. Founder and Principal, Brandmark Studios, LLC
Peter Kwetu Haviland-Eduah, '10, B.A., M.P.P, Communications Manager, Facebook
John K. Johnson '85, B.A. Senior Sales Director, Arizona Beverages

Chair, President's Council

Shari Midoneck-Pochapin '85, B.S., M.D. Internal Medicine, MD2 Park Avenue

Campus Trustees

Rebecca Cortez, Ph.D. Professor, Department of Mechanical Engineering
Andrew Morris, A.B., M.A., Department of History
Brian Huang, Class of 2021
Sophia Anderson, Class of 2022

Trustees Emeriti

Gerald Barandes '54, A.B., LL.B. Of Counsel, Beckman, Lieberman & Barandes
Philip R. Beuth '54, A.B., M.S. Retired President of Entertainment, Capital Cities/ABC-TV

Stanley O'Brien '74, Vice Chair
Ellen Smith '80, Secretary
William J. Perlstein '71, General Counsel

The Faculty

The year that appears after each faculty member's title refers to the start of service to the College.

Caroline E. Abraham, Visiting Assistant Professor of Economics (2020). B.A. 2009, St. Joseph's College of Arts and Science, India; M.S. 2012, TERI School of Advanced Studies, India; Ph.D. 2020, Vanderbilt University
James C. Adrian, Professor of Chemistry (1994). B.S. 1980, University of Maryland; Ph.D. 1992, University of Pittsburgh
Saladdin Ahmed, Visiting Assistant Professor of Political Science (2019). B.A. 2006, M.A. 2009, Carleton University; Ph.D. 2013, University of Ottawa
Samuel Amanuel, Associate Professor of Physics and Astronomy (2006); Chair of the Department. B.Sc. 1992, Addis Ababa University; M.S. 1997, Ph.D. 2004, Southern Illinois University
Ann M. Anderson, Agnes S. Macdonald Professor of Mechanical Engineering; Director of Energy Studies (1992). B.S. 1984, Tufts University; M.S. 1985, Ph.D. 1990, Stanford University
Matthew Anderson, Assistant Professor of Computer Science (2014). B.S. 2004, Carnegie Mellon University; M.S. 2009, Ph.D. 2012, University of

Wisconsin-Madison

- Cay M. Anderson-Hanley**, Professor of Psychology; Co-director of Neuroscience Program (2004). B.S. 1988, Gordon College; M.S. 1991, Ph.D. 1995 State University of New York at Albany
- Michele P. Angrist**, Professor of Political Science; Dean of Studies; Director of Advising (2000). B.A. 1992, Washington University; M.P.A. 1995, Ph.D. 2000, Princeton University
- Kenneth Aslakson**, Associate Professor of History (2007). B.A. 1986, Southwestern University; J.D. 1991, Ph.D. 2007, University of Texas at Austin
- Charles R. Batson**, Florence B. Sherwood Professor of History and Culture (1998). B.A. 1987, Furman University; M.A. 1989, University of Virginia; Ph.D. 1997, University of Illinois
- Peter R. Bedford**, John and Jane Wold Professor of Religious Studies; Director of Religious Studies (2007). B.A. 1981, University of Sydney; B.D. 1982, University of London; M.A. 1985, Ph.D. 1992, University of Chicago
- Brittney Belz**, Senior Lecturer of Theater and Dance and Costumer (2010). B.F.A. 2005, University of Connecticut at Storrs; M.F.A. 2008, University of Virginia at Charlottesville
- Martin Benjamin**, William D. Williams Professor of Visual Arts (Photography) (1979). B.A. 1971, State University of New York at Albany
- Marianna Bergamaschi Ganapini**, Assistant Professor of Philosophy (2017). B.A. 2004 & M.A. 2009, University of Florence, Italy; Ph.D. 2017, Johns Hopkins University
- Stephen M. Berk**, Henry and Sally Schaffer Professor of Holocaust and Jewish Studies (1967). B.A. 1962, University of Pennsylvania; M.A. 1964, University of Chicago; Ph.D. 1971, Columbia University
- Kristin A. Bidoshi**, Associate Professor of Russian; Director of Russian & East European Studies (2001). B.A. 1991, Beloit College; M.A. 1995, Ph.D. 2000, Ohio State University
- Jennifer Bishop**, Senior Lecturer in Biology (2009). B.S. 1997, Bloomsburg University of Pennsylvania; Ph.D. 2005, North Carolina State
- George Y. Bizer**, Professor of Psychology (2005); Chair of the Department. B.A. 1995, Indiana University; M.A. 1997, Ph.D. 2001, Ohio State University
- Andrew Bodd**, Lecturer of Theater and Dance (2019). B.A. 2002, Ithaca College; M.F.A. 2011, University of North Carolina
- Elise Bouhet**, Visiting Assistant Professor of French (2017). B.A. 2001, Universite Stendhal, France; M.A. 2008 and Ph.D. 2017, State University of New York at Albany
- Claire Bracken**, Associate Professor of English (2007). B.A. 2001, University College Dublin; M.A. 2002, University College Cork; Ph.D. 2008, University College Dublin
- Karen Brison**, Roger Thayer Stone Professor of Anthropology (1993); Chair of the Department. B.A. 1981, McGill University; M.A. 1983, Ph.D. 1988, University of California at San Diego
- Clifford W. Brown, Jr.**, Robert Porter Patterson Professor of Government (1978). A.B. 1964, A.M. 1970, Ph.D. 1970, Harvard University
- Bradford A. Bruno**, Professor of Mechanical Engineering (2001). B.S. 1990, Pennsylvania State University at University Park; M.S. 1992, University of Michigan at Ann Arbor; Ph.D. 2000, Pennsylvania State University at University Park
- Zachary L. Buchin**, Visiting Assistant Professor of Psychology (2021). B.S. 2015, James Madison University; M.A. 2018, Ph.D. 2021, University of North Carolina, Chapel Hill
- Ronald Bucinell**, Associate Professor of Mechanical Engineering (1993). B.S. 1981, Rochester Institute of Technology; M.S. 1983, Ph.D. 1987, Drexel University
- Takashi Buma**, Associate Professor of Electrical, Computer and Biomedical Engineering; Director of Biomedical Engineering Program (2011). B.S. 1995, Princeton University; M.S. 1999, Ph.D. 2002, University of Michigan
- Andrew Burkett**, Associate Professor of English (2011); Director of Science, Medicine & Technology in Culture. B.A. 2000, Washington & Jefferson College; M.A. 2001 University of Chicago; Ph.D. 2008, Duke University
- Daniel J. Burns**, Gilbert R. Livingston Professor of Psychology (1993). B.S. 1981, State University of New York at Oswego; M.A. 1984, Ph.D. 1986, State University of New York at Binghamton
- Mary K. Carroll**, Dwane W. Crichton Professor of Chemistry (1992). B.S. 1986, Union College; Ph.D. 1991, Indiana University
- Aaron G. Cass**, Associate Professor of Computer Science; Co-Director of Digital Media (2003). B.S. 1993, M.C.S. 1996, University of Virginia; Ph.D. 2005, University of Massachusetts at Amherst
- Louisa Catalano**, Visiting Assistant Professor of Mathematics (2020). B.A. 2011, the College of Wooster; M.S. 2014, John Carroll University; Ph.D. 2020, Kent State University
- Laurie Z. Cawley**, Lecturer of Theater and Dance (2019). B.A. 2019, State University of New York, Empire State College
- Davide P. Cervone**, Professor of Mathematics (1996). B.A. 1984, Williams College; Ph.D. 1993, Brown University
- Christopher Chandler**, Assistant Professor of Music (2019). B.A. 2008, University of Richmond; M.M. 2011, Bowling Green State University; Ph.D. 2017, Eastman School of Music, Rochester
- Dong Cheng**, Assistant Professor of Economics (2018). B.A. 2010, M.A. 2012, Renmin University of China; M.A. 2014, Ph.D. 2018, Vanderbilt University
- A. Michelle Chilcoat**, Associate Professor of French; Co-Director of Film Studies (1999). B.A. 1998, University of Georgia; M.A. 1991, Ph.D. 1998, University of Michigan
- Quynh Chu-LaGraff**, Professor of Biological Sciences; Co-director of Neuroscience (1999). A.B. 1989, Cornell University; Ph.D. 1996, University of Illinois

Cigdem Cidam, Associate Professor of Political Science (2013). B.A. 2002, Boğaziçi University; Ph.D. 2009, University of Minnesota

Brian D. Cohen, Senior Lecturer in Biological Sciences; Co-Director of Biochemistry (2003). B.S. 1993, Muhlenberg College; Ph.D. 1998, Albany Medical College

David Collinge, Lecturer of Modern Languages and Literatures (2016). B.A. 2005, Boise State University; M.A. 2013, University of Michigan, Ann Arbor; Ph.D. 2015, University of Michigan, Ann Arbor

Angela Commito, Lecturer of Classics (2016). A.B. 2003, Bowdoin College; M.A. 2010, University of Michigan, Ann Arbor; Ph.D. 2014, University of Michigan, Ann Arbor

Colleen Connelly, Assistant Professor of Chemistry (2019). B.S. 2008, University of North Carolina; Ph.D. 2014, North Carolina State University

Jeffrey D. Corbin, Professor of Biological Sciences (2006). B.A. 1991, University of California at Santa Cruz; Ph.D. 1998, University of North Carolina at Chapel Hill

Cecilia Bores Quijano, Assistant Professor of Physics and Astronomy (2021). B.S. 2010, M. Phil. 2012, University of Valladolid, Spain; D. Phil. 2016, Institute of Physical Chemistry Rocasolano, Spain

Rebecca Cortez, Thomas J. Watson, Sr. and Emma Watson Day Professor of Mechanical Engineering, (2007); Director of Engineering; Co-director of Nanotechnology. B.S. 1988, Washington University; Ph.D. 1992, Northwestern University

David A. Cotter, Professor of Sociology (1995). B.A. 1988, College of Wooster; M.A. 1992, Ph.D. 1996, University of Maryland at College Park

Shane F. Cotter, Horace E. Dodge III Associate Professor of Electrical, Computer and Biomedical Engineering; Chair of the Department (2005). B.S. 1994, University College Dublin; M.S. 1998, Ph.D. 2001, University of California at San Diego

Lorraine M. Cox, Associate Professor of Visual Arts; Chair of the Department (2001). B.F.A. 1992 Virginia Commonwealth University; M.A. 1996, Ph.D. 2001, University of Illinois at Urbana-Champaign

John R. Cramsie, Professor of History (2000). B.A. 1987, University of Minnesota; Ph.D. 1997, University of St. Andrews

Maite Cruz-Tleugabulova, Assistant Professor of Philosophy (2020). B.A. 2010, University of Alberta; M.A. 2011, Western University; Ph.D. 2019, Boston University

Jennifer A. Currey, Associate Professor of Electrical, Computer and Biomedical Engineering; Interim Director of Templeton Institute of Engineering & Computer Science (2007). B.S. 2000, M.S. 2003, Ph.D. 2006, Rensselaer Polytechnic Institute

Mark Dallas, Associate Professor of Political Science; Director of Asian Studies (2010). B.A. 1996, Princeton University; M.A. 2002, Ph.D. 2011, University of California at Berkeley

Huong Dang, Assistant Professor of Economics (2020). B.A. 2011, Brown University; M.Phil. 2012, University of Cambridge; Ph.D. 2020, George Washington University

Barbara A. Danowski, Professor of Biological Sciences (1992). B.A. 1977, University of Connecticut; Ph.D. 1989, University of North Carolina, Chapel Hill

Lewis S. Davis, Thomas Armstrong Professor of Economics; Chair of the Department (2006). B.S. 1988, Davidson College; Ph.D. 1999, University of North Carolina at Chapel Hill

Kenneth G. DeBono, Gilbert R. Livingston Professor of Behavioral Sciences (1986). B.A. 1980, Grinnell College; Ph.D. 1985, University of Minnesota

James de Sève, Senior Lecturer of Film Studies (2008). B.F.A. 2008 State University of New York at Albany; M.F.A. 2011, Rensselaer Polytechnic Institute

Funda Dogruer, Visiting Assistant Professor of Economics (2018). B.S. 2008, Ankara University, Turkey; M.S. 2011, Western Kentucky University; Ph.D. 2018, Texas Tech University

Luke Dosiek, Associate Professor of Electrical, Computer and Biomedical Engineering (2014). B.S. 2004, Clarkson University; M.S. 2006, Clarkson University; Ph.D. 2010, University of Minnesota

Kara A. Doyle, Professor of English (2000); Director of Faculty Development. A.B. 1991, Georgetown University; M.A. 1998, Ph.D. 2000, Cornell University

Chris N. Duncan, May I. Baker Professor of Visual Arts (1988). B.A. 1975, Colby College

Tomas Dvorak, Professor of Economics (2002). B.A. 1994, Prague School of Economics; M.A. 1995, Central European University; Ph.D. 2000, University of Maryland at College Park

Andrew Feffer, Professor of History; Co-Director of Film Studies (1989). B.A. 1977, Swarthmore College; M.A. 1984, Ph.D. 1987, University of Pennsylvania

Kathryn D. Feller, Assistant Professor of Biology (2020). B.S. 2006, Hobart & William Smith Colleges; Ph.D. 2014, University of Maryland

Chris S.T. Fernandes, Associate Professor of Computer Science; Co-Director of Digital Media (2001). B.A. 1991, M.S. 1993, Ph.D. 2000, Northwestern University

Megan M. Ferry, Professor of Modern Languages & Literatures (1999). B.A. 1989, Mount Holyoke College; M.A. 1993, Ph.D. 1998, Washington University

Leo J. Fleishman, William D. Williams Professor of Biological Sciences (1989). B.A. 1978, Tufts University, Ph.D. 1986, Cornell University

Andrea R. Foroughi, Associate Professor of History (1999); Chair of the Department. B.A. 1990, Santa Clara University; M.A. 1995, Ph.D. 1999, University of Minnesota

Kristin Fox, Florence B. Sherwood Professor of Physical Sciences (1995). B.S. 1988, Lafayette College; Ph.D. 1994, Cornell University

Jennifer A. Fredricks, Professor of Psychology; Dean of Academic Departments and Programs (2017). B.A. 1992, Columbia University; M.A., 1998 and Ph.D. 1999, University of Michigan, Ann Arbor

Holli M. Frey, Associate Professor of Geosciences; Chair of the Department (2007). B.A. 1999, Franklin & Marshall College; Ph.D. 2005, University of Michigan

David Friedell, Assistant Professor of Philosophy (2020). B.A. 2006, University of California, Berkeley; M.A. 2007, University of West Indies, Mona; M.A. 2009, Ph.D. 2015, University of California, Los Angeles

Paul D. Friedman, Senior Lecturer in Mathematics (2001). A.B. 1989, Dartmouth College; Ph.D. 1997, State University of New York at Stony Brook

William Garcia, Professor of Spanish (1991). B.A. 1986, University of Puerto Rico; M.A. 1988, Ph.D. 1995, Rutgers University

Maria Dolores Garrido-Garcia, Visiting Assistant Professor of Economics (2020). B.S. 2002, University of Wales, UK; M.S. 2010, Ph.D. 2014, University of Cordoba, Spain; Ph.D. 2020, Washington State University

John I. Garver, Professor of Geosciences (1989). B.A. 1984, Middlebury College; M.S. 1985, Ph.D. 1989, University of Washington

Ellen Gasparovic, Associate Professor of Mathematics (2015). B.A. 2006, College of the Holy Cross; Ph.D. 2012, University of North Carolina at Chapel Hill

Tommaso Gazzarri, Associate Professor of Classics (2014). B.A. 2001, University degli Studi de Pisa; M.A. 2003, Johns Hopkins University; M.A. 2006, M. Phil. 2008, Ph.D. 2010, Yale University

Timothy George, Visiting Assistant Professor of Psychology (2019). B.A. 2006, M.A. 2008, American University; M.A. 2015, Ph.D. 2019, University of Illinois at Chicago

Ashraf Ghaly, Carl B. Jansen Professor of Engineering (1993). B.Sc. 1982, M.Sc. 1986, Alexandria University, Alexandria, Egypt; Ph.D. 1990, Concordia University, Montreal, Canada

David Gillikin, Professor of Geosciences; Director of Environmental Science, Policy and Engineering Program (2010). B.Sc. 1994, State University of New York at New Paltz; M.Sc. 1998, Ecotechnie, UNESCO/Cousteau European Postgraduate Programme; M.Sc. 2000, Ph.D. 2005, Free University of Brussels

Colin Gleason, Visiting Assistant Professor of Physics and Astronomy (2020). B.S. 2011, Union College; Ph.D. 2017, University of South Carolina

George Gmelch, Professor of Anthropology (1982). B.A. 1968, Stanford University; M.A. 1970, Ph.D. 1975, University of California, Santa Barbara

Sharon B. Gmelch, Professor of Anthropology (1981). B.A. 1969, M.A. 1971, Ph.D. 1974, University of California, Santa Barbara

Melinda A. Goldner, Professor of Sociology (1998); Chair of the Department. B.A. 1990, Tufts University; M.A. 1993, Washington State University; Ph.D. 1998, Ohio State University

Pradeep Gudler, Visiting Assistant Professor of Mechanical Engineering (2019). B.S. 2006, Jawaharlal Nehru Technological University; M.S. 2008, Ph.D. 2013, Texas A&M University

Ali H. Hamed, Assistant Professor of Mechanical Engineering (2017). B.S. & B.A. 2013, Washington and Lee University; Ph.D. 2017, University of Illinois, Urbana

Helen M. Hanson, Associate Professor of Electrical, Computer and Biomedical Engineering (2007). B.S. 1983, Union College; M.S. 1986, Simmons College; S.M. 1990, Ph.D. 1995, Harvard University

Joshua Hart, Professor of Psychology (2007). B.A. 2001, Skidmore College; M.A. 2004, Ph.D. 2006, University of California-Davis

Jeffrey Hatley, Assistant Professor of Mathematics (2015). B.A. 2009, College of New Jersey; M.S. 2011, Ph.D. 2015, University of Massachusetts

Bradley Hays, Associate Professor of Political Science; Director of 3+3 Accelerated Law Program; Chair of the Department (2008). B.S. 1997, Northeastern University; Ph.D. 2005, University of Maryland at College Park

James N. Hedrick, Senior Lecturer in Electrical, Computer and Biomedical Engineering (2001). B.S. 1992, M.S. 1996, Union College

Christine Henseler, Professor of Modern Languages & Literatures (2001). B.S. 1993, B.A. 1993, M.A. 1995, University of Kansas; Ph.D. 1999, Cornell University

Deidre Hill Butler, Associate Professor of Sociology (2001); Director of Diversity, Equity and Inclusion / Academic Chief Diversity Officer;. B.A. 1991, Oberlin College; M.A. 1994, Cornell University; Ph.D. 2001, Clark University

Robert Hislope, Professor of Political Science (1999). B.S. 1985, Bradley University; M.A. 1990, Ph.D. 1995, Ohio State University

David Hodgson, Associate Professor of Mechanical Engineering (2005). B.S. 1994, Rensselaer Polytechnic Institute; M.S. 2005, Ph.D. 2009, Colorado State University

Roger W. Hoerl, Donald C. Brate '45-Stanley G. Peschel '52 Associate Professor of Statistics (2012). B.S. 1979, Elizabethtown College; M.S. 1981, Ph.D. 1983, University of Delaware

Kurt Thomas Hollocher, Professor of Geosciences (1985). B.S. 1978, Antioch College; M.S. 1981, Ph.D. 1985, University of Massachusetts

John Stephen Horton, Professor of Biological Sciences (1993). B.Sc. 1981, Ph.D. 1990, University of Toronto

Jeffrey L. Jauregui, Associate Professor of Mathematics (2013). B.S. 2005, Harvey Mudd College; M.A. 2006, Ph.D. 2010, Duke University

Hugh Jenkins, Professor of English (1992). B.A. 1981, Carleton College; M.A. 1988, Ph.D. 1991, Cornell University

Brenda Johnson, Professor of Mathematics (1991). B.A. 1985, Grinnell College; Sc.M. 1987, Ph.D. 1991, Brown University

Ilene M. Kaplan, Joseph C. Driscoll Professor of Sociology and Marine Policy (1978). B.S. 1973, Cornell University; M.A. 1976, Ph.D. 1980, Princeton University

Ercan Karadas, Visiting Assistant Professor of Economics (2019). B.A. 2001, Bogazici University; M.S. 2007, Ankara University; M.S. 2008 Pompeu Fabra University; Ph.D. 2017, New York University

William D. Keat, Professor of Mechanical Engineering (1996). B.S. 1976, M.S. 1983, Worcester Polytechnic Institute; Ph.D. 1989, Massachusetts Institute of Technology

Joanne D. Kehlbeck, Professor of Chemistry (2002); Chair of the Department; Co-director of Biochemistry. B.S. 1992, Duquesne University; Ph.D. 1999, Carnegie Mellon University

Arsalan Khan, Assistant Professor of Anthropology (2015). B.A. 2005, Beloit College, Wisconsin; M.A. 2011, Ph.D. 2014, University of Virginia, Charlottesville

Leila Khatami, Professor of Mathematics (2011); Chair of the Department. B.S. 1997, Sharif University of Technology; M.S. 1999, Ph.D. 2003, University of Tehran

Sudhir Khetan, Assistant Professor of Electrical, Computer and Biomedical Engineering (2012). B.S. 2007 Johns Hopkins University; Ph.D. 2012, University of Pennsylvania

Scott D. Kirkton, Associate Professor of Biological Sciences (2006). B.S. 1997, Denison University; Ph.D. 2004, Arizona State University

Rebecca A. Koopmann, Professor of Physics and Astronomy (1998). B.S. 1989, Union College; M.S. 1992, Ph.D. 1997, Yale University

Bernhard H. Kuhn, Associate Professor of English (2000). B.A. 1991, Brown University; Ph.D. 2001, Princeton University

Scott M. LaBrake, Senior Lecturer in Physics and Astronomy and Accelerator Manager (2001). B.S. 1995, Siena College; M.S. 1997, Ph.D. 2003, State University of New York at Albany

Robert J. Lauzon, Professor of Biological Sciences (1996). B.S. 1982 McGill University; Ph.D. 1987, Queen's University

Stephen C. Leavitt, Professor of Anthropology (1993). B.A. 1981, Swarthmore College; M.A. 1983, Ph.D. 1989, University of California at San Diego

Kathryn Lesh, Professor of Mathematics (2001). B.A. 1983, Swarthmore College; Ph.D. 1988, Massachusetts Institute of Technology

Judith M. Lewin, Associate Professor of English, Chair of the Department (2000). B.A. 1991, Brown University; M.A. 1994, Ph.D. 2002, Princeton University

Bradley G. Lewis, Professor of Economics (1979). B.A. 1969, Carleton College; M.A. 1978, Ph.D. 1982, University of Chicago

Shou-Ping Liu, Lecturer in Choral and Orchestra; Director of Performance (2017). B.M. 2006, New England Conservatory; M.M. 2006, West Virginia University; Ph.D. 2020, University of Southern California

Thomas Lobe, Senior Lecturer in Political Science (2002). B.A. 1965, Earlham College; M.A. 1966, London School of Economics; Ph.D. 1975, University of Michigan

Kathleen LoGiudice, Professor of Biological Sciences (2002). B.S. 1981, Boston College; M.S. 1995, Ph.D. 2000 Rutgers University

Sheri Lullo, Associate Professor of Visual Arts (2011). B.A. 1999, University of Chicago; M.A. 2003, Ph.D. 2009, University of Pittsburgh

Katherine R. Lynes, Associate Professor of English (2006) B.A. 1991, M.A. 1994, Portland State University, Ph.D. 2004, Rutgers University

Laura A. MacManus-Spencer, Associate Professor of Chemistry (2006). B.S. 2000, College of St. Benedict; Ph.D. 2005, University of Minnesota

Joyce Madancy, Professor of History (1995). B.A. 1980, College of William and Mary; M.A. 1983, Cornell University; Ph.D. 1996, University of Michigan

Mohammad Mafi, Professor of Engineering; Leader of Environmental Engineering Section (1985). B.S. 1977, Sharif University of Technology; M.S. 1980, Ph.D. 1985, Pennsylvania State University

Jennifer Weil Malatras, Visiting Assistant Professor of Psychology (2021). B.S. 2002, Cornell University; M.A. 2009, Ph.D. 2012, State University of New York, Albany

Seyfollah Maleki, R. Gordon Gould Professor of Physics and Astronomy (1983). B.S. 1974, University of New Orleans; M.S. 1978, Ph.D. 1981, Rensselaer Polytechnic Institute

Greg Malen, Visiting Assistant Professor of Mathematics (2020). B.A. 2007, Wesleyan University; Ph.D. 2016, the Ohio State University

Nelia Mann, Associate Professor of Physics and Astronomy (2015). B.S. 2001, Stanford University; M.S. 2003, Ph.D. 2006, University of California, Santa Barbara

Andrew Mannion, Lecturer of Theater and Dance (2017). B.A. 2007 Elizabethtown College; M.F.A. 2012, University of Washington

Matthew R. Manon, Lecturer of Geosciences (2015). B.A. 2002, Franklin and Marshall College; Ph.D. 2008, University of Michigan

Phanuel Mariano, Assistant Professor of Mathematics (2020). B.A. 2012, Western Connecticut State University; Ph.D. 2018, University of Connecticut

Jonathan M. Marr, Senior Lecturer of Physics and Astronomy (1995). B.S. 1981, University of Rochester; M.A. 1985, Ph.D. 1990, University of California at Berkeley

Lori Jo Marso, Doris Zemmurray Stone Professor of Modern Literary and Historical Studies (1997); Director of African Studies; Director of American Studies . B.S. 1985, University of South Dakota; M.S. 1986, London School of Economics; Ph.D. 1994, New York University

Jennifer M. Matsue, Professor of Music; Chair of the Department (2003). B.A. 1992, Wellesley College; M.A. 1996, Ph.D. 2003, University of Chicago

Louisa C. Matthew, Professor of Visual Arts (1991). B.A. 1972, M.A. 1975, University of Vermont; M.F.A. 1982, Ph.D. 1988, Princeton University

Shena McAuliffe, John D. MacArthur Assistant Professor of English (2018). B.A. 2000, Colorado State University; M.F.A. 2006, Washington University, St. Louis; Ph.D. 2014, University of Utah

Therese A. McCarty, John Prior Lewis '41 Professor of Economics (1987). A.B. 1979, Bryn Mawr College; A.M. 1981, Ph.D. 1987, University of Michigan

Elena C. McGrath, Assistant Professor of History (2020). B.A. 2006, Reed College; M. A. 2011, Ph.D. 2016 University of Wisconsin-Madison

Dianne McMullen, John Howard Payne Professor of Music (1996). A.B. 1976, Smith College; M.M. 1978, M.A. 1980, Ph.D. 1987, The University of Michigan at Ann Arbor

Jennifer Mitchell, Associate Professor in English (2015). B.A. 2004, Union College; M.A. 2005, Washington University, St Louis; Ph.D. 2012, City University of New York

Andrew J.F. Morris, Associate Professor of History (2003). A.B. 1991, Brown University; M.A. 1996, Ph.D. 2003, University of Virginia

Daniel O. Mosquera, Professor of Modern Languages & Literatures (1998); Chair of the Department. B.A. 1988, M.A. 1992, Cleveland State University; M.A. 1993, Ph.D. 1998, Washington University

Eshragh Motahar, Professor of Economics (1984). B.Sc. 1970, M.Sc. 1971, University of London; M.A. 1979, Ph.D. 1989, Johns Hopkins University

Miryam Moutillet, Gustave L. Davis, Class of 1959, and Susan S. Davis Director of Dance; Senior Artist-in-Residence (1996). B.S. 1996, Skidmore College

Hans-Friedrich O. Mueller, Thomas Lamont Professor of Ancient and Modern Literature (2004). B.A. 1983, B.A. 1985, University of Wisconsin-Milwaukee; M.A. 1989, University of Florida; Ph.D. 1994, University of North Carolina at Chapel Hill

Stephanie A. Mueller, Assistant Professor of Modern Languages & Literatures (2013). B.A. 2005, Luther College; M.A. 2007, Ph.D. 2013, University of Iowa

Jillmarie Murphy, William D. Williams Professor of English; Director of Gender, Sexuality and Women's Studies (2008). B.A., M.A. 1989, College of Saint Rose; Ph.D. 2005, State University of New York at Albany

Cheikh M. Ndiaye, Associate Professor of French (2000). B.A. 1991, M.A. 1993, University of Dakar; Ph.D. 2001, University of Connecticut

Erika M. Nelson-Mukherjee, Associate Professor of German (2007). B.A. 1990, Oberlin College; M.A. 1995, Ph.D. 2001, University of Texas at Austin

Laini Nemett, Associate Professor of Visual Arts (2015). B.A. 2006, Brown University; M.F.A. 2012, Maryland Institute College of Arts

Conor J. O'Dea, Visiting Assistant Professor of Psychology (2020). B.S. 2013, M.S. 2017, Ph.D. 2019, Kansas State University;

David C. Ogawa, Associate Professor of Visual Arts; Co-Director of Digital Media (1999). B.A. 1986, University of Missouri; M.A. 1989, Ph.D. 1999, Brown University

Timothy Olsen, Professor of Music (1994). B.M. 1983, Washington University; M.A. 1985, University of Minnesota; M.M. 1988, M.M.A. 1989, D.M.A. 1995, Yale University

Fernando D. Orellana, Associate Professor of Visual Arts (2005). B.F.A. 1998, School of the Art Institute of Chicago; M.F.A. 2004, Ohio State University

Zeynep Orhan, Visiting Assistant Professor of Computer Science (2019). B.S. 1996, M.S. 1998, I.D. Bilkent University, Turkey; Ph.D. 2006, Istanbul University, Turkey

Chad R. Orzel, Associate Professor of Physics and Astronomy (2001). B.A. 1993, Williams College; Ph.D. 1999, University of Maryland at College Park

Maritza M. Osuna, Senior Lecturer of Modern Languages & Literatures (1993). B.A. 1983, University of Puerto Rico; M.A. 1988, University of Michigan; Ph.D. 2003, State University of New York at Albany

Zoe M. Oxley, Professor of Political Science (1998). A.B. 1991, Bowdoin College; M.A. 1995, Ph.D. 1998, Ohio State University

Chandra Sekhar Pappu, Assistant Professor of Electrical, Computer and Biomedical Engineering (2016). B.S. 2008, Jawaharlal Nehru Technology University; M.S. 2010, Ph.D. 2015, University of Texas at El Paso

Rosemary K. Patterson, Visiting Assistant Professor of Sociology (2020). B.S. 2009, the College of Saint Rose; M. Social Work, 2011, the University of Albany, New York

Anastasia Pease, Senior Lecturer in English (2007). B.A. 1995, M.A. 1998, Louisiana Tech University; M.A. 2002, Doctor of Arts 2004, State University of New York at Albany

Lee Pedzisa, Visiting Assistant Professor of Chemistry (2020). B.A. 2009, the Colorado College; Ph.D. 2016, the Scripps Research Institute

Brian J. Peterson, Associate Professor of History (2006). B.A. 1994, M.A. 1998, University of California at Santa Cruz; Ph.D. 2005, Yale University

Kim Plofker, Associate Professor of Mathematics (2007). B.A. 1985, Haverford College; Ph.D. 1995, Brown University

Barbara A. Pytel, Senior Lecturer in Biological Sciences (1997). B.S. 1973, St. John's University; M.S. 1978, Ph.D. 1985, New York University

Kaywana Raeburn, Feigenbaum Assistant Professor of Behavioral Economics (2016). B.S. 2007, University of West Indies; M.A. 2009, McGill University; Ph.D. 2016, McGill University

Ashok Ramasubramanian, Professor of Mechanical Engineering; Director of Assessment (2007). B.E. 1996, Anna University, Chennai, India; M. S. 1998, University of Massachusetts; Ph.D. 2002, Dartmouth College

Andrew J. Rapoff, Professor of Mechanical Engineering; Chair of the Department (2004). B.S. 1983, University of Missouri at Columbia; M.S. 1989, University of Missouri at Rolla; Ph.D. 1997, University of Wisconsin at Madison

Stacie Raucci, Frank Bailey Professor of Classics (2004); Chair of the Department. B.A. 1997, Wellesley College; M.A. 2000, Ph.D. 2004, University of Chicago

Michael Reardon, Visiting Assistant Professor of Chemistry (2017). B.S. 2012, Massachusetts College of Liberal Arts; Ph.D. 2017, Clark University

Michele Ricci Bell, Associate Professor of German (2006). B.A. 1993, Columbia University; M.A. 1997, Ph.D. 2003, Stanford University

Steven K. Rice, Florence B. Sherwood Professor of Life Sciences (1998); Chair of the Department. B.S. 1983, Yale University; M.S. 1991, Ph.D. 1994, Duke University

John Rieffel, Associate Professor of Computer Science (2009); Chair of the Department. B.A., B.S. 1999, Swarthmore College; M.A. 2004, Ph.D. 2006 Brandeis University

Ellen J. Robertson, Assistant Professor of Chemistry (2018). B.S. 2008, Kalamazoo College; M.S. 2010, Ph.D. 2014, University of Oregon

Donald T. Rodbell, John and Jane Wold Professor of Geosciences (1993). B.S. 1983, St. Lawrence University; M.S. 1986, Ph.D. 1991, University of Colorado

Chad Rogers, Assistant Professor of Psychology (2018). B.A. & B.S. 2004, the University of Florida; M.A. 2008, Ph.D. 2010 Washington University

Stephen G. Romero, Associate Professor of Psychology; Director of Interdisciplinary Studies (2001). B.M. 1990, Berklee College of Music; M.A. 1995, Ph.D. 1998, University of Colorado

Jill L. Salvo, Associate Professor of Biology (1991). B.S. 1980, Denison University; M.Phil. 1982, Ph.D. 1987, Yale University

Robert Samet, Associate Professor of Anthropology (2014); Director of Latin American and Caribbean Studies. B.A. 1998 Duke University; M.A. 2004, Columbia University; Ph.D. 2012, Stanford University

Brandon Schabes, Lecturer of Chemistry (2020). B.A. 2011, Kalamazoo College; Ph.D. 2019, University of Oregon

Krisanna Scheiter, Associate Professor of Philosophy (2102); Chair of the Department. B.A. 2002, M.A. 2005, University of Missouri-St. Louis; M.A. 2006, Ph.D. 2012, University of Pennsylvania

Shelton S. Schmidt, Chauncey H. Winters Professor of Economic Thought (1974). B.A. 1969, Ph.D. 1977, University of Virginia

Stephen J. Schmidt, Kenneth B. Sharpe Professor of Economics (1994). A.B. 1989, Ph.D. 1995, Stanford University

Mehmet Fuat Sener, Professor of Economics (1999). B.S. 1993, Middle East Technical University; M.S. 1995, London School of Economics; Ph.D. 1999, University of Florida

Guillermina Seri, Professor of Political Science (2007). B.A. 1986, Catholic University of Córdoba, Argentina; M.A. 1998 FLACSO, Buenos Aires; Ph.D. 2005, University of Florida

Jordan F. Smith, Edward Everett Hale Jr. Professor of English (1981). B.A. 1977, Empire State College; M.A. 1978, Johns Hopkins University; M.F.A. 1981, University of Iowa

Younghwan Song, Professor of Economics (2002). B.A. 1991, M.A. 1993, Seoul National University; M. Phil. 1996, Ph.D. 2002, Columbia University

John M. Spinelli, Professor of Electrical, Computer and Biomedical Engineering (1989). B.E. 1983, The Cooper Union; S.M. 1985; Ph.D. 1989, Massachusetts Institute of Technology

Timothy Stablein, Associate Professor of Sociology (2013). B.S. 1998, Bridgewater State College; M.A. 2000, University of Massachusetts-Boston; Ph.D. 2009, University of Connecticut

Mason O. Stahl, James M. Kenney Assistant Professor of Environmental Engineering, Geosciences (2017). B.S. 2009, Tufts University; Ph.D. 2015, Massachusetts Institute of Technology

Linda N. Stanhope, Professor of Psychology (1986). A.B. 1976, Wellesley College; M.A. 1980, Ph.D. 1984, University of Virginia

Yijing Y. Stehle, Assistant Professor of Mechanical Engineering (2019); Co-director of Nanotechnology. B.S. 2004, Lanzhou University; M.S. 2007, Fudan University; Ph.D. 2010, University of Miami

Kristina I. Striegnitz, Associate Professor of Computer Science (2007). Vordiplom 1995, Diplom 2000, Saarland University; Ph.D. 2004, Saarland University and the University Henri Poincaré Nancy 1

Poorna Talkad Sukumar, Templeton Institute Instructor of Computer Science (2021). B.E. 2008, Dayananda Sagar College of Engineering, Bangalore, India; M.S. 2010, Lancaster University, U.K.; Ph.D. 2021, University of Notre Dame

Alexander Lee Sweger, Visiting Assistant Professor of Biological Sciences (2021). B.S. 2010, Susquehanna University; Ph.D. 2017, University of Cincinnati

Alan D. Taylor, Marie Louise Bailey Professor of Mathematics (1975). B.A. 1969, A.M. 1970, University of Maine; Ph.D. 1975, Dartmouth College

Strom Thacker, Professor of Political Science; Stephen J. and Diane K. Ciesinski Dean of the Faculty and Vice President for Academic Affairs (2016). B.A. 1988, Pomona College; M.A. 1991, Ph.D. 1996, University of North Carolina, Chapel Hill

Nicole A. Theodosiou, Associate Professor of Biological Sciences (2007). B.A. 1991, Swarthmore College; Ph.D. 1999, Yale University School of Medicine

Christina Tønnesen-Friedman, Professor of Mathematics (2001). Cand.Scient. 1995, Ph.D. 1997, Odense University, Denmark

Cherrice A. Traver, David Falk '39 and Elynor Rudnick-Falk Professor of Computer Engineering (1986). B.S. 1982, State University of New York at Albany; Ph.D. 1986, University of Virginia

Jenelle Troxell, Associate Professor of English (2013). B.A. 1992, Johns Hopkins University; M.A., Ph. D. 2009, Columbia University

Bunkong Tuon, Associate Professor of English (2008). B.A. 2000, California State University at Long Beach; M.A. 2006, Ph.D. 2008, University of Massachusetts at Amherst

Laurie A. Tyler, Professor of Chemistry (2004). B.A. 1996, University of Washington at Seattle; Ph.D. 2002, University of California at Santa Cruz

Junko Ueno, Associate Professor of Modern Languages & Literatures (2000). B.A. 1994, Kyushu University; M.A. 1995, Ph.D. 2001, Indiana University

Jayson Vedad, Lecturer of Chemistry (2018). B.S. 2010, University of the Philippines Los Banos; M.Phil, 2015, Ph.D. 2019, City University of New York

Daniel Venning, Assistant Professor of Theater and Dance (2017). B.A. 2004, Yale University; M. Litt. 2005, University of St. Andrews; Ph.D. 2016, City University of New York

Anouk Verheyden-Gillikin, Lecturer in Geosciences (2015). Licentiate Degree 1997, Ph.D. 2004, Free University of Brussels

Michael F. Vineyard, Frank and Marie Louise Bailey Professor of Physics and Astronomy (2002). B.S. 1978, Stockton State College; M.S. 1981, Ph.D. 1984, Florida State UniversityD.

Catherine Walker, Assistant Professor of Psychology (2015). B.A. 2004, Rutgers College; M.A. 2008, Ph.D. 2013, State University of New York at Albany

Mark W. Walker, John Bigelow Professor of History; Director of General Education(1987). B.A. 1981, Washington University; M.A. 1983, Ph.D. 1987, Princeton University

Jue Wang, Associate Professor of Mathematics (2007). B.S. 2001, Peking University; M.A. 2003, Ph.D. 2007, University of Wisconsin-Madison

Patricia Wareh, Associate Professor of English (2010). B.A. 1993, University of Florida; Ph.D. 2002, University of California at Berkeley

Heather C. Watson, Associate Professor of Physics and Astronomy (2015); Director of Undergraduate Research. B.S. 2000, University of Toronto; M.S. 2002, Ph.D. 2004, Rensselaer Polytechnic Institute

Nicholas Webb, Associate Professor of Computer Science (2011). B.S. 1995, M.Sc. 1996, University of Essex; PH.D. 2010, University of Sheffield

Kirk Wegter-McNelly, Dona and Marshall Robinson Assistant Professor in Science, Philosophy and Religion (2020). B.A. 1990, Central College, Iowa; M. Div. 1995 Princeton Theological Seminary; Ph.D. 2003, Graduate Theological Union, California

Shawn Wehe, Visiting Assistant Professor of Mechanical Engineering (2019). B.S. 1987, M.S. 1990, State University of New York at Buffalo; Ph.D. 2000, Stanford University

Carol Silvia Weisse, Ronald M. Obenzinger Professor of Psychology; Director of Health Professions Programs (1988). B.S. 1983, Quinnipiac College. Ph.D. 1988, Uniformed Services University

Sara L. Wiest, Visiting Assistant Professor of Political Science (2019). B.A. 2002, Michigan State University; M.A. 2010, Ph.D. 2018 Purdue University

Richard D. Wilk, Professor of Mechanical Engineering (1989). B.S. 1980, M.S. 1982, Ph.D. 1986, Drexel University

Francis P. Wilkin, Senior Lecturer in Physics and Astronomy; Observatory Manager (2004). B.S. 1989, University of Massachusetts at Amherst; M.A. 1991, Ph.D. 1997, University of California at Berkeley

Laura E. Winters, Visiting Assistant Professor of Classics (2020). B.S. 2008, Austin Peay State University; Ph.D. 2020, Duke University

Jeffrey Witsoe, Associate Professor of Anthropology (2008). B.A. 1998, University of California at Santa Cruz; M.A. 2000, University of Chicago; Ph.D. 2005, University of Cambridge

Randy Wyatt, Associate Professor, Artistic Director and Department Chair of Theater and Dance (2019). B.A. 1993, Cornerstone University; M.F.A. 2007, Minnesota State University - Mankato

Zheng Yang, Visiting Assistant Professor of Electrical, Computer and Biomedical Engineering (2019). B.S. 2001, M.S. 2004, Nanjing University; Ph.D. 2009, University of California at Riverside

Silvina Yi, Assistant Professor of Modern Languages & Literatures (2019). B.A. 2019, University of California, San Diego; M.A. 2015, Ph.D. 2019, University of Michigan

Roman Yukilevich, Associate Professor of Biological Sciences (2012). B.S. 2000, University of Illinois at Chicago; Ph.D. 2008, State University of New York at Stony Brook

Leo Zaibert, William D. Williams Professor of Philosophy, Law and Humanities (2009). LL.B 1989, Universidad Santa Maria, Caracas, Venezuela; Ph.D. 1997, State University of New York at Buffalo

Zhen Zhang, Associate Professor of Chinese (2007). B.A. 1995, Yantai University; M.A. 1998, Beijing University; M.A. 2001, State University of New York at Stony Brook; Ph.D. 2007, University of California at Irvine

Departmental Assistants and Technicians

Gene E. Davison, Engineering Assistant, Electrical, Computer and Biomedical Engineering (1980)

Ethan Edmans, Laboratory Technician, Chemistry (2017). B.S. 2014, State University of New York at Oneonta; M.S. 2016, State University of New York at Albany, Colleges of Nanoscale Science and Engineering

Stanley J. Gorski, Technology Coordinator, Mechanical Engineering (1997). A.A.S. 1975, A.A.S. 1976, Hudson Valley Community College

Robert Harlan, Engineering Laboratory Technician, Engineering Machine Lab (2016).

Amy M. Kelley, Life Science Coordinator, Biological Sciences (2000). B.S. 2014, Union College

Robin Macduffie, Scene Shop Technician, Theatre & Dance (2016). B.F.A. 1986, Wesleyan University; M.F.A. 1997, Yale School of Drama

Matthew McClosky, System Administrator / Manager of Research Computing (2018).

Madelyn Miller, Laboratory Technician, Geosciences (2018). B.S. 2018, State University of New York, New Paltz

Frank Rapant III, Photography and Exhibition Technician, Visual Arts (2006). B.A. 2007, Union College

Audrey Sartiaux, Director of Learning Center, Modern Languages and Literatures (2004). DEUG Lettres et Civilisations Etrangères Anglais 1994, Licence Langues Vivantes Étrangères Anglais, 1996, University of Paris - Sorbonne Nouvelle; M.A. French and Francophone Studies 1997, Ph.D. French and Francophone Studies 2006, University of Connecticut

John T. Sheehan, Machinist / Technician, Physics and Astronomy (1997). A.A.S. Electrical Engineering Technology, 1984, Mohawk Valley Community College

Paul Tompkins, Supervisor, Engineering Machine Lab (2006).

Endowed Professorship

Date is year chair was established.

Thomas Armstrong Professor of Economics (2006) - Lewis S. Davis
Frank Bailey Professor of Classics (1945) - Stacci Raucci
Frank and Marie Louise Bailey Professor of Physics (1949) - Michael F. Vineyard
Marie Louise Bailey Professor of Mathematics (1952) - Alan D. Taylor
May I. Baker Professor of Visual Arts (1979) - Chris Duncan
John Bigelow Professor of History (1916) - Mark W. Walker
Donald C. Brate '45 - Stanley G. Peschel '52 Associate Professor of Statistics (2012) - Roger W. Hoerl
Dwane W. Crichton Professor of Chemistry (2006) - Mary K. Carroll
Gustave L. Davis, Class of 1959, and Susan S. Davis Director of Dance (2018) - Miryam Moutillet
Horace E. Dodge III Associate Professor of Electrical and Computer Engineering (1997) - Shane F. Cotter
Joseph C. Driscoll Professor of Sociology and Marine Policy (2006) - Ilene M. Kaplan
David Falk '39 and Elynor Rudnick-Falk Professor of Computer Engineering (2007) - Cherrice A. Traver
Feigenbaum Assistant Professor of Behavioral Economics (2016) - Kaywana Raeburn
R. Gordon Gould '41 Professor of Physics and Astronomy (1995) - Seyfollah Maleki
Edward E. Hale, Jr. Professor of English (1980) - Jordan F. Smith
Carl B. Jansen Professor of Engineering (1992) - Ashraf Ghaly
James M. Kenney Assistant Professor of Environmental Engineering (2017) - Mason O. Stahl
Thomas Lamont Professor of Ancient and Modern Literature (1948) - Hans-Friedrich Mueller
John Prior Lewis Professor of Economics (2016) - Therese A. McCarty
Gilbert R. Livingston Professor of Psychology (1970) - Daniel J. Burns
Gilbert R. Livingston Professor of Behavioral Sciences (1994) - Kenneth G. DeBono
John D. MacArthur Assistant Professor (1982) - Shena McAuliffe
Agnes S. Macdonald Professor of Mechanical Engineering (2006) - Ann M. Anderson
Ronald M. Obenzinger Professor of Psychology (2019) - Carol S. Weisse
Robert Porter Patterson Professor of Government (1956) - Clifford W. Brown Jr.
John Howard Payne Professor of Music (2006) - Dianne McMullen
Dona and Marshall Robinson Assistant Professor of Science, Philosophy and Religion (2018) - Kirk Wegter-McNelly
Henry and Sally Schaffer Professor of Holocaust and Jewish Studies (2003) - Stephen M. Berk
Kenneth B. Sharpe Professor in Management (1993) - Stephen J. Schmidt
Florence B. Sherwood Professor of History and Culture (1993) - Charles R. Batson
Florence B. Sherwood Professor of Life Sciences (1994) - Steven K. Rice
Florence B. Sherwood Professor of Physical Sciences (1994) - Kristin Fox
Doris Zemurray Stone Professor in Modern Literary and Historical Studies (1976) - Lori J. Marso
Roger Thayer Stone Professor of Anthropology (1989) - Karen Brison
Templeton Institute Assistant Professor of Computer Science (2021) - Poorna Talkad Sukumar
Thomas J. Watson, Sr., and Emma Watson Day Professor of Mechanical Engineering (1989) - Rebecca Cortez
William D. Williams Professor of Biological Sciences (2008) - Leo J. Fleishman
William D. Williams Professor of English (2021) - Jillmarie Murphy
William D. Williams Professor of Philosophy, Law and Humanities (2006) - Leo Zaibert
William D. Williams Professor of Visual Arts (2006) - Martin Benjamin
Chauncey H. Winters Professor of Economic Thought (1978) - Shelton S. Schmidt
John and Jane Wold Professor of Geosciences (1988) - Donald Rodbell
John and Jane Wold Professor of Religious Studies (2007) - Peter R. Bedford

The Administration

Office of the President

David R. Harris, President; Trustee ex-officio; Professor of Sociology (2018). B.S. 1991; Ph.D. 1997, Northwestern University
Darcy A. Czajka, Chief of Staff (2017). B.S. 2000, Union College; M.Ed. 2005, Harvard University

Campus Diversity and Inclusion

Andrew Alvez, Assistant Director of Intercultural Affairs. B.A. 2010, M.A. 2012, State University of New York, Potsdam
Christa Grant, Assistant Dean of Diversity and Inclusion (2019). B.A., University at Buffalo (2005); M.S. Ed., the College of Saint Rose (2010)
Deidre Hill Butler, Director of Diversity, Equity and Inclusion / Academic Chief Diversity Officer; Associate Professor of Sociology (2001). B.A. 1991, Oberlin College; M.A. 1994, Cornell University; Ph.D. 2001, Clark University
Mary F. Simeoli, Title IX Coordinator. B.A. 2012, Quinnipiac University; J.D. 2016, Western New England University

Office of Communications

Charles K. Casey, Senior Editor of Strategic Communications. B.A. 1984, Hartwick College
Joyce E. Chabot, Printing Manager.
Erin DeMuth Judd, Associate Editor of Strategic Communications. B.A. 2002, Syracuse University; M.S. 2004, University of Tennessee
Kenneth George, Director of Web Communications. B.A. 1989, Earlham College
Christen Gowan, Director of Digital Strategies. B.A. 2004, State University of New York at Albany
Kathleen A. Kelley, Web Specialist/Designer. B.S. 1986, Bentley College
Tina Lincer, Associate Director of Communications and Marketing. B.A. 1976, State University of New York at Albany
Jason M. Slater, Associate Director of Web Communications. B.A. 2002, Union College
Phillip Wajda, Director of Media and Public Relations. B.A. 1987, Rowan University

Office of Academic Affairs

Strom Thacker, Stephen J. and Diane K. Ciesinski Dean of the Faculty and Vice President for Academic Affairs; Professor of Political Science (2016). B.A. 1988, Pomona College; M.A. 1991, Ph.D. 1996, University of North Carolina, Chapel Hill
Michele P. Angrist, Dean of Studies and Director of Advising; Professor of Political Science (2000). B.A. 1992, Washington University; M.P.A. 1995, Ph.D. 2000, Princeton University
Greta Donato, Director of Academic Planning and Resources (2017). B.S. 1997, State University of New York, Oneonta
Jennifer A. Fredricks, Dean of Academic Departments and Programs; Professor of Psychology; (2017). B.A. 1992, Columbia University; M.A. 1998 and Ph.D. 1999, University of Michigan, Ann Arbor

Academic Support Services

Rhona Jane Beaton, Assistant Director of Health Professions Programs. B.A. 1985, Suffolk University; M.A.T. 1989, Boston College
Cole M. Belmont, Director of Makerspace Consortium (2018). B.A. 2003, University of New Mexico; M.Arch, 2010, Pratt Institute
Rebecca Cortez, Thomas J. Watson, Sr. and Emma Watson Day Professor of Mechanical Engineering (2007); Director of Engineering; Co-director of Nanotechnology. B.S. 1988, Washington University; Ph.D. 1992, Northwestern University
Kara Doyle, Director of Faculty Development; Professor of English (2000). B.A. 1988, the College of Wooster; M.A. 1992, Ph.D. 1996, The University of Maryland at College Park
Lynn Evans, Class Dean and Director of National Fellowships & Scholarships. B.A. 1998, Witterberg University; M.S. 2000, Ph.D. 2004, University of California, San Diego
Kristen Fanfarelli, Director of Academic Achievement. B.S. 2010, M.A. 2013, University of Central Florida
Joanne Fitzgerald, Director of Leadership in Medicine. B.S. 1979, University of Delaware; M.B.A. 2001, Union College
Amarilis M. Francis, Associate Director of AOP/HEOP. B.A. 2007, Union College; M.A. 2009, State University of New York, Binghamton
Deidre Hill Butler, Director of Diversity, Equity and Inclusion / Academic Chief Diversity Officer; Associate Professor of Sociology (2001). B.A. 1991, Oberlin College; M.A. 1994, Cornell University; Ph.D. 2001, Clark University
Joseph Johnson, Director of Writing Center (2015). B.A. 2000, Saint Michael's College; M.A. 2005, Villanova University; Ph.D., Emory University
Heather Watson, Director of Undergraduate Research; Associate Professor of Physics and Astronomy (2015). B.A. 1993, Williams College; Ph.D. 1999, University of Maryland at College Park
Philip Poczik, Director of AOP/HEOP. B.A. 2001, Hobart and William Smith Colleges; M.A. 2002, Carnegie Mellon University
Ashok Ramasubramanian, Director of Assessment; Professor of Mechanical Engineering (2007). B.E. 1996, Anna University, Chennai, India; M.S. 1998, University of Massachusetts; Ph.D. 2002, Dartmouth College
Stephen G. Romero, Director of Interdisciplinary Studies; Associate Professor of Psychology (2001). B.M. 1990, Berklee College of Music; M.A. 1995, Ph.D. 1998, University of Colorado

Mark W. Walker, Director of General Education; John Bigelow Professor of History(1987). B.A. 1981, Washington University; M.A. 1983, Ph.D. 1987, Princeton University

Derek J. Zuckerman, Class Dean and Director of the Scholars Program (2018). B.S. 1993, Le Moyne College; M.B.A. 1998, Bentley College; Ph.D. 2010, Fordham University

Athletics

James M. McLaughlin, Director of Athletics. B.A. 1993, Union College; M.B.A. 1997, Union College

Erik Ackerman, Assistant Athletic Trainer. B.S. 2010, Central Connecticut State University

David M. Baglio, Coordinator of Varsity Sports Services

Mitchell Baker, Assistant Women's Hockey Coach. B.A. 2008, Bethel University

Jeffrey Behrman, Head Football Coach. B.A. 1995, John Carroll University; M.S. 1998, West Virginia University

Rick Bennett, Head Men's Ice Hockey Coach. B.A. 1990, Providence College

Brian Bowman, Assistant Director of Athletics; Head Men's and Women's Tennis Coach. B.A. 2010, University of Rochester; M.Ed. 2012, St. Lawrence University; M.B.A. 2015, University of Rochester

Brianne M. Brinker, Assistant Director of Athletics/Facilities. B.S. 1987, M.A. 1993, Kent State

Peter W. Brown, Assistant Football Coach. B.A. 1983, Union College

Mary Ellen Burt, Head Women's Basketball Coach and Women's Golf Coach. B.S. 1982; University of Southern California; M.A. 1989, St. John Fisher College

Nicholas Ciresi, Men's Assistant Basketball Coach. B.A. 2009, Union College; M.B.A. 2014, Fairleigh Dickinson University

Michelle Connors, Head Softball Coach. B.A. 2010, State University of New York at Albany

Jill Crary-Gracz, Assistant Athletics Trainer. B.S. 1993, Russell Sage College; M.S. 1996, University of Wisconsin at La Crosse

Laura Falkowitz, Head Volleyball Coach. B.S. 2013, College of St. Rose; M.A. 2017, Concordia University, Irvine

Scott D. Felix, Aquatics Director and Head Coach of Men's and Women's Swimming and Diving. B.S. 1991, University of Delaware; M.S. 1996, Springfield College

Richard S. Flanders, Assistant Football Coach - Defensive Coordinator. B.S. 1979, State University of Maine at Orono; M.Ed. 1983, State University of New York at Albany

Daniel Gabelman, Strength and Conditioning Coach. B.S. 2007, Boston University

Jeffrey D. Guinn, Head Men's Soccer and Assistant Track Coach. B.A. 1987, North Carolina State University

Kelly Harchetts, Head Field Hockey Coach. B.S. 2005, William Paterson University; M.S. 2012, Salisbury University

Abigail L. Jackson, Head Women's Lacrosse Coach. B.A. 2003, Williams College; M. S. 2016, Trinity College

Gary Ross LaDue, Associate Athletics Communications Director. B.S. 2009, Iowa State University

Joanne M. Little, Senior Associate Director of Athletics. B.S. 1982, University of New Hampshire at Keene; M.S. 1990, Ithaca College

Laura Nardelli, Head Men's and Women's Cross Country & Track Coach. B.S. 1982, Syracuse University; M.S. 1984, Syracuse University

Paul Mound, Head Baseball Coach. A.A.S. 1975, State University of New York at Delhi; B.A. 2010, Syracuse/SUNY ESC

Christopher A. Murphy, Head Men's Basketball Coach. B.A. 2006, Union College; M.B.A. 2009, Union College

Brandon D. Perry, Assistant Athletic Trainer. B.S. 1995, State University of New York at Cortland; M.Ed. 1997, Springfield College

Cheryl Rockwood, Head Trainer/Director for Student-Athlete Programming. B.S. 1985, Central Connecticut State University; M.S. 1986, Old Dominion University

John M. Ronan, Assistant Coach. Men's Ice Hockey. B.A. 2013, University of Maine

Joshua Sciba, Head Women's Hockey Coach. B.A. 2007, University of Notre Dame

Steven Sheridan, Athletics Communications Director. B.A. 2006, Colgate University

Brian K. Speck, Head Women's Soccer Coach. B.A. 1988, State University of New York at Albany

Elizabeth M. Tiffany, Associate Director of Athletics. B.A. 2003, University of Puget Sound; M.S. 2004, University of Massachusetts at Amherst

Kevin Trigonis, Assistant Football Coach. B.A. 2006, St. Lawrence University; M.S. 2017, Castleton University

Thomas M. White, Head Crew Coach. B.S. 1987, Northeastern University

Derek Witheford, Head Men's Lacrosse Coach. B.A. 2011, Union College

Jared Zeidman, Associate Head Women's Basketball Coach. B.A. 2008, Quinnipiac University; M.A. 2011, State University of New York at Buffalo

Learning Technologies and Environments

Denise Snyder, Director of Learning Technologies and Environments. B.S. 1995, State University of New York at Fredonia; CTE 2003, ALM 2007, Harvard University Extension School

Kevin Barhydt, Senior Inclusive & Learning Technology Analyst. B.S. 1991, State University of New York at Albany; M.S. 2018, University of Wisconsin-Stout

Virginia L. Solomon, Manager of Learning Technologies and Environments Support. A.A. 1976, Penn State University at New Kensington; B.S. 1979, Slippery Rock State University; M.A. 1986, Western Carolina University

James J. Strohecker, Assistant Director of Learning Environments. A.S. 1995, Junior College of Albany

Kesheng Yu, Senior Learning Technology Consultant. B.B.A. 1985, Heilongjiang Mechanical Institute, Harbin, China; M.S. 1992, M.Ed. 1993, Ed.D. 1997, Texas Tech University

Information Technology Services (ITS)

Ellen Yu, Chief Information Officer. B.S. 1987, Rensselaer Polytechnic Institute; M.Ed. 1997, University of Maryland

Severian Brink-Forrest, Network Analyst (2019). A.S. 2018, Excelsior College

William Callanan, Enterprise Applications Developer (2019). B.S. 2014, Union College

Deborah Coyle, Systems Analyst. B.A. 1991, State University of New York at Albany

Stephen DeGeyter, Telecommunications Analyst. AOS 2003, ITT Technical Institute

Mina Evtimova-Rios, Senior Web Developer.

Mark Giemza, Senior Systems Administrator (2019). B.S. 2005, Rochester Institute of Technology

Waldemar Kania, Director of Enterprise Systems. B.A. 1993, Philosophical College of Divine Word, Nysa, Poland; M.A. 1998, SS. Cyril & Methodius Seminary

Gabriel Leifer, End User Support Analyst (2019). B.A. 2003, College of Wooster

Daniel Mahar, Assistant Director of Networking. A.A.S. 1993, Schenectady County Community College

William McCaffery, Manager, Tier 1 Help Desk. B.A. 1987, Elmira College; M. Div. 1993, Colgate Rochester Divinity School

Carlos Nieves, Senior End User Support Analyst

Kevin Petronis, Senior Enterprise Systems Manager (2019). B.A. 2006, State University of New York at Oneonta

William Pizer, Enterprise Applications Developer (2019). AAS, 2014, the Sage Colleges

Susan Rinaldi, End User Support Analyst

David Sindoni, Senior End User Support Analyst. A.A.S. 1978, Hudson Valley Community College; B.S. 1984, Union College

Paul Vinette, Senior Systems Analyst. B.S. 1983, State University of New York at Brockport; M.S. 1986, State University of New York at Binghamton

Institutional Research

Leonard Schlegel, Director of Institutional Research (2019). B.A. 1999, State University of New York at Albany

Jill Bleyl, Assistant Director of Institutional Research (2019). B.A. 2008, Western New England College; M.S. 2009, State University of New York at Albany

International Programs

Lara Atkins, Director of International Programs. B.A. 1990, University of Wisconsin at Madison; M.A. 2002, Florida State University at Tallahassee

Rosa E. Casper, Assistant Director of International Programs. B.A. 1990, George Washington University; M.A. 1998, University of Puerto Rico

Office of College Grants and Sponsored Programs

Nicole Marshall, Director of College Grants and Sponsored Programs (2006). B.A. 1997, Nazareth College of Rochester

Mercedes Susi, Associate Director of College Grants and Sponsored Programs (2016). B.A. 2012 and M.P.A. 2013, Clark University

Registrar

Andrew D. Lentz, Assistant Registrar - Degree Audit. B.A. 2002, Boston University; M.S. in Ed. 2008, College of Saint Rose

Albert L. Sacco, Assistant Registrar - Registration. B.A. 2000, State University of New York at Oswego; M.S. in Ed. 2007, College of Saint Rose

Schaffer Library

Frances J. Maloy, College Librarian. B.A. 1980, St. Lawrence University; M.L.S. 1982, State University of New York at Albany
Andrea Belair, Archives and Special Collections Librarian/Assistant Librarian. B.A. 2004, Marlboro College; M.L.I.S. 2012, Rutgers University
Lindsay Bush, Instructional Services Librarian/Associate Librarian. B.S. 2007, State University of New York at Oneonta; M.S. 2010, Simmons College
Joanna DiPasquale, Director of Content and Digital Library Systems/Associate Librarian. B.A. 1998, State University of New York at Geneseo; M.A. 2001, New York University; B.A. 2003, City University of New York; M.L.I.S. 2010, Rutgers University
Rebecca Fried, Digital Projects and Metadata Librarian/Assistant Librarian (2019). B.A. 2004, Smith College; M.S.I.S. 2009, State University of New York at Albany
David A. Fuller, Data Services Librarian/Associate Librarian. B.A. 1982, State University of New York at Oswego; M.A. 1988, New York University; M.L.S. 1989, State University of New York at Albany

Ellen H. Fladger, Head of Special Collections Emerita (1979 - 2014). A.B. 1970, Mount Holyoke College; M.A. 1982, New York State University College at Oneonta

Ellen Foster, Lecturer in Economics Emerita (2000 - 2018). B.A. 1980 Bryn Mawr College; Ph.D. 1991, State University of New York at Albany

Harold O. Fried, David L. and Beverly B. Yunich Professor of Business Ethics and Professor of Economics Emeritus (1983 - 2018). B.A. 1972, University of Michigan; Ph.D. 1978, University of North Carolina

Frank Gado, Professor of English Emeritus (1963-1999). A.B. 1958, Dartmouth College; M.A. 1961, Ph.D. 1968, Duke University

Jagdish T. Gajjar, Professor of Electrical and Computer Engineering Emeritus (1970-2003). B.E. in Elec. 1960, B.E. in Mech. 1961, Bombay University; M.E.E. 1963, University of Oklahoma; Ph.D. 1970, University of Houston

Charles Gati, Professor of Political Science Emeritus (1963-68, 1969-1994). A.B. 1961, A.M. 1961, Ph.D. 1965, Indiana University

Carl J.W. George, Professor of Biological Sciences Emeritus (1967-1997). B.S. 1956, University of Michigan; Ph.D. 1960, Harvard University

David R. Gerhan, Reference and Instructional Librarian/Professor Emeritus (1972-2012). A.B. 1967, Brown University; M.L. 1972, SUNY at Albany; M.A. 1977, Union College

Gail Golderman, Digital Scholarship and Services Emerita (1992-2019). B.A. 1978, State University College at New Paltz; M.L.S. 1992, the State University of New York at Albany

Seth N. Greenberg, Gilbert R. Livingston Professor of Psychology Emeritus (1979-2007). B.A. 1968, Queens College; M.A. 1970, Ph.D. 1972, The Ohio State University

Janet P. Grigsby, Senior Lecturer of Sociology Emerita (2000-2017). B.A. 1969, Oberlin College; M.Phil. 1976 & Ph.D. 1983, Yale University

David G. Hannay, Professor of Computer Science Emeritus (1978-2011). B.S. 1966, Wheaton College; M.A. 1967, SUNY at Stony Brook; M.S. 1970, SUNY at Albany; Ph.D. 1973, Rensselaer Polytechnic Institute

Erik Hansen, Professor of History Emeritus (1964-2006). B.A. 1958, University of Oregon; M.A. 1960, Ph.D. 1968, Cornell University

Walter J. Hatke, Walter C. & May I. Baker Professor of Visual Arts Emeritus (1986-2015). B.A. 1971, DePauw University; M.A. 1981, M.F.A. 1982, the University of Iowa

David M. Hayes, Professor of Chemistry Emeritus (1976 - 2014). B.S. 1966, Massachusetts Institute of Technology; Ph.D. 1970, Cornell University

David Hemmendinger, Professor of Computer Science Emeritus (1989-2010). B.A. 1962, Harvard University; M.S. 1963, Stanford University;

M.A. 1966, Ph.D. 1973, Yale University, M.S. 1982, Wright State University

Leslie A. Hull, Professor of Chemistry Emeritus (1972-2006). B.S. 1965, University of Rochester; M.S. 1967, Ph.D. 1971, Harvard University

Roger H. Hull, President Emeritus (1990-2005). A.B. 1964, Dartmouth College; LL.B. 1967, Yale Law School; LL.M. 1972, S.J.D. 1974, University of Virginia

Thomas K. Jewell, Carl B. Jansen Professor of Engineering Emeritus (1978 - 2014). B.S. 1968, U.S. Military Academy; M.S. Envir. Engr. 1974, Ph.D. C. E. 1980, University of Massachusetts

Christopher Jones, Professor of Physics Emeritus (1967-2000). B.S. 1957, Hobart College; M.A. 1960, Johns Hopkins University; Ph.D. 1967, Iowa State University

Sigrid Kellenter, Thomas Lamont Professor of Ancient and Modern Literature Emerita (1977-2003). B.A. 1967, M.A. 1969, University of California; Ph.D. 1978, SUNY at Albany

James M. Kenney, Professor of Economics Emeritus (1972 - 2017). B.A. 1967, Wesleyan University; Ph.D. 1972, Stanford University

J. Douglass Klein, Kenneth B. Sharpe Professor of Economics Emeritus (1979-2019). B.A. 1970, Grinnell College; M.A. 1972, Ph.D. 1975, University of Wisconsin

Melinda A. Lawson, Senior Lecturer in History Emerita (2000-2021). B.A. 1985, State University of New York at Albany; M.A. 1987, Ph.D. 1998, Columbia University

Annette M. LeClair, Director of Collection and Technical Services / Librarian Emerita. B.A. 1974, University of Minnesota; M.A. 1976, University of Virginia; M.S.L.S. 1980, University of North Carolina, Chapel Hill

Karen A. Lou, Senior Lecturer in Chemistry Emerita (1993-2020). B.A. 1979, Williams College; Ph.D. 1985, Massachusetts Institute of Technology

Jan K. Ludwig, Professor of Philosophy Emeritus (1969-1999). B.A. 1963, Gettysburg College; Ph.D. 1971, Johns Hopkins University

Eli Majlaton, Director of Union College Bookstore, Central Mail and Copy Center Emeritus (1988-2006).

Mary Mar, Director of Writing Services Emerita (2002-2014). B.A. 1971 University of Illinois, Champaign-Urbana; M.Ed. McGill University, Montreal; Ph.D. McGill University, Montreal.

Harry Marten, Edward E. Hale Jr. Professor of English Emeritus (1976-2012). B.A. 1965, Harpur College; M.A. 1967, Ph.D. 1970, University of California, Santa Barbara

Victoria J. Martinez, Professor of Modern Languages & Literatures Emerita (1991-2019). B.A. 1971, M.A. 1986, University of Kentucky; Ph.D. 1992, Arizona State University

James D. McCord, Professor of English Emeritus (1977-2011). B.A. 1968, M.A. 1971, Ph.D. 1976, University of California at Santa Barbara

George McMillan, Purchasing Director Emeritus (1982-2004). B.S. 1964, University of Steubenville

Teresa A. Meade, Florence B. Sherwood Professor of History and Culture Emerita (1987-2020). B.A. 1972, University of Wisconsin; M.A. 1975, Ph.D. 1984, Rutgers University

Frank F. Milillo, Professor of Mechanical Engineering Emeritus (1974-2001). B.S. 1966, M.S. 1968, Ph.D. 1974, Polytechnic Institute of Brooklyn

Carolyn Mitchell, Professor of English Emeritus (1998-2003). B.A. 1960, Hunter College; M.A. 1962, Michigan State University; Ph.D. 1977, Boston College

Cara Molyneaux, Associate Librarian/Head of Access Services Emerita (1987-2011)

Pilar Moyano, Professor of Modern Languages and Literatures Emerita (1986-2015). B.A. 1976, M.A. 1978, Ph.D. 1985, State University of New York at Albany

Jay E. Newman, R. Gordon Gould Professor of Physics and Astronomy Emeritus (1978-2015). B.S. 1967, City University of New York; M.S. 1970, Ph.D. 1975, New York University

Byron A. Nichols, Professor of Political Science Emeritus (1968-2008). A.B. 1964, Occidental College; M.A. 1966, Ph.D. 1969, Johns Hopkins University

Susan B. Niefeld, Professor of Mathematics Emerita (1981-2015). B.A. 1974, Ph.D. 1978, Rutgers University

Rudy Nydegger, Professor of Psychology Emeritus (1977-2015). B.A. 1966, M.A. 1969, Wichita State University; Ph.D. 1970, Washington University

Robert M. Olberg, Florence B. Sherwood Professor of Life Sciences Emeritus (1981-2020). B.A. 1968, Rice University; Ph.D. 1978, University of Washington

Linda E. Patrik, Professor of Philosophy Emerita (1978-2012). B.A. 1971, Carleton College; M.A. 1973, Ph.D. 1978, Northwestern University

Judith A. Peck, Associate Registrar Emerita (1975-2005)

Peter A. Prosper, Jr., Professor of Economics Emeritus (1964-1999). B.S. 1958, Pennsylvania State University; Ph.D. 1970, Cornell University

Frederick Puliafico, Associate Director of Facilities/Utilities Construction and Management Emeritus

Kathryn Quinn, Special Assistant to the President Emerita (2005 - 2012).

Gary R. Reich, Professor of Physics and Astronomy Emeritus (1979 - 2017). A.B. 1968, Kenyon College; M.S. 1970, Northwestern University; Ph.D. 1978, Rutgers University.

Bruce L. Reynolds, Professor of Economics Emeritus (1974-2002). B.A. 1966, Yale University; M.A. 1971, Ph.D. 1975, University of Michigan

Kimmo I. Rosenthal, Professor of Mathematics Emeritus (1979-2020). B.S. 1974, M.A. 1976, Ph.D. 1979, State University of New York at Buffalo

Michael Rudko, Horace E. Dodge III Professor of Electrical and Computer Engineering Emeritus (1984-2012). B.S.E.E. 1965, M.S.E.E. 1969, Ph.D. 1974, Syracuse University

Steven D. Sargent, Professor of History Emeritus (1982-2020). B.S. 1968, Purdue University; M.S. 1970, New York University; B.A. 1973, M.A. 1975, University of Massachusetts; Ph.D. 1982, University of Pennsylvania

Kenneth L. Schick, Frank and Marie Louise Bailey Professor of Physics Emeritus (1959-2000). A.B. 1951, Columbia University; Ph.D. 1959, Rutgers University

George Schiller, Associate Director (Information and Systems), Human Resources Emeritus (1972 - 2014). A.O.S. 1968

Josef Schmee, Kenneth B. Sharpe Professor of Management Emeritus (1972-2006). Magister 1968, University of Vienna; M.S. 1970, Ph.D. 1974, Union College

Ann M. Seemann, Director of Schaffer Library, Professor Emerita (1973-1990). A.B. 1956, Oberlin College; M.S. in M.L.S. 1964, Simmons College

Gwen Sellie, Manager of Support Services Emerita

Bruce Senn, Senior Systems Manager/Administrative Systems Emeritus

Arnold Seiken, Professor of Mathematics Emeritus (1967-1996). B.A. 1951, Syracuse University; M.A. 1954, Ph.D. 1963, University of Michigan

J. Richard Shanebrook, Professor of Mechanical Engineering Emeritus (1965-2001). B.S. in M.E. 1960, M.S. in M.E. 1963, Ph.D. 1965, Syracuse University

George H. Shaw, John and Jane Wold Professor of Geosciences Emeritus (1988-2011). B.S. 1967, University of Rochester. M.S. 1969, Ph.D. 1971, University of Washington

Jeane A. Sinnenberg, Assistant Registrar Emerita (1967-2003) B.A. 1981, Union College

Barry K. Smith, Associate Professor of Performing Arts (Theater) Emeritus (1971-1999). B.A. 1960, Westminster College; M.F.A. 1971, Yale University

George W. Smith, Professor of Biological Sciences Emeritus (1974-2005). B.S. 1962, Cookman College; M.S. 1966, Virginia State College; Ph.D. 1974, University of Virginia

John R. Sowa, Professor of Chemistry Emeritus (1967-2002). B.S. 1956, Notre Dame University; Ph.D. 1964, University of Pennsylvania

Donald E. Spring, Assistant Professor of Psychology and Director of the Counseling Service Emeritus (1973-2007). B.S. 1969, Springfield College; M.A. 1972, Ph.D. 1973, University of Rhode Island

Charles N. Steckler, Dwane W. Crichton Professor of Theater Emeritus (1971-2017). B.S. 1968, Queens College; M.F.A. 1971, Yale University

Ruth M. Stevenson, Thomas Lamont Professor of Literature Emerita (1972-2013). A.B. 1961, Smith College; M.A. 1962, University of Richmond; Ph.D. 1972, Duke University

Martin A. Strosberg, Professor of Political Science Emeritus.

Carmela St. George, Associate Registrar Emerita (1964-1989)

Hilary Tann, John Howard Payne Professor of Music Emerita (1980-2019). B. Mus. 1968, University of Wales; M.F.A. 1978, Ph.D. 1981, Princeton University

Ann Thomas, Slide Curator Emerita (1979-2013). A.B. 1962, Manhattanville College

Donald R. Thurston, Professor of Political Science and History Emeritus (1966-1996). B.A. 1951, Syracuse University; M.A. 1956, Ph.D. 1970, Columbia University

Peter L. Tobiessen, Professor of Biological Sciences Emeritus (1970-2006). B.A. 1963, Wesleyan University; M.S. 1966, Pennsylvania State University; Ph.D. 1971, Duke University

Mark S. Toher, Frank Bailey Professor of Classics Emeritus (1983-2020). B.A. 1974, Brown University; B.A. 1976, Oxford University; Ph.D. 1985, Brown University

W. Loretta Walker, Head of Information Services at Schaffer Library, Associate Professor Emerita (1968-1981). B.S. 1949, Howard University; M.L.S. 1968, SUNY at Albany; M.A. 1977, College of Saint Rose

Anton R. Warde, Professor of German Emeritus (1969-1999). B.A. 1964, Union College; M.A. 1966, Ph.D. 1969, University of Nebraska

Terry S. Weiner, Chauncey H. Winters Professor of Comparative Social Analysis Emeritus (1974-2010). B.A. 1970, University of Illinois; M.A. 1972, Ph.D. 1975, University of North Carolina

Robert V. Wells, Chauncey H. Winters Professor of History Emeritus (1969-2013). B.A. 1965, Denison University; Ph.D. 1969, Princeton University

Thomas C. Werner, Florence B. Sherwood Professor of Chemistry Emeritus (1971-2008). B.S. 1964, Juniata College; Ph.D. 1969, Massachusetts Institute of Technology

Frank E. Wicks, Associate Professor of Mechanical Engineering Emeritus (1988 - 2016). B.S. 1961, State University of New York Maritime College; M.S. 1966, Union College; Ph.D. 1976, Rensselaer Polytechnic Institute

George H. Williams, Professor of Computer Science Emeritus (1970-2003). A.B., B.E.E. 1965, Union College; M.S. 1966, M. Phil. 1968, Ph.D. 1970, Yale University

Sandra S. Wimer, Senior Lecturer in Visual Arts Emerita (1997-2021). B.S. 1974, Pittsburgh State University; B.F.A. 1987, University of Oklahoma; M.F.A. 1990, State University of New York at Albany

Brenda Wineapple, Doris Zemurray Stone Professor of Modern Literary and Historical Studies Emerita (1976 - 2016). B.A. 1970, Brandeis University; M.A. 1972, Ph.D. 1976, University of Wisconsin

Dwight S. Wolf, Associate Dean for Academic Services and Planning Emeritus (1977-2007). B.A. 1968, Union College; M.A. 1974, Ed.D. 1980, University of Virginia

Suthathip Yaisawarnng, Thomas Armstrong Professor of Economics Emerita (1989-2020). B.B.A. 1977, Thammasat University, Thailand; M.B.A. 1983, Howard University, Ph.D. 1989, Southern Illinois University

Jane S. Zacek, Director of Grant Support Emerita (1993-2008). B.A. 1960, Cornell University; M.A. 1962, Ph.D. 1967, Columbia University

Karl Zimmermann, Professor of Mathematics Emeritus (1981-2015). B.S. 1974, Tufts University; M.S. 1976, University of New Hampshire; Ph.D. 1985, Brown University

William S. Zwicker, William D. Williams Professor of Mathematics Emeritus (1975-2021). A.B. 1971, Harvard University; Ph.D. 1975, Massachusetts Institute of Technology
